Bulk sugar: The installation of bulk sugar throwers operated by Empresa Consolidada del Azucar, at Reynold Garcia Pier, is by system of conveyor and distribution crane which runs from Parabolicos warehouses up to the end of the pier. A special structure protects the conveyor.

The crane runs on special rail throughout the pier (fore and aft) stopping at each vessel's hold. In cases where the vessel has projecting superstructure, she has to be separated from the pier.

Average loading rate is about 350 t.p.h., depending on the type of vessel. On vessels without tweendecks, an average of 43 t.p.h. has been attained.

Weights of shipment estimated on draft and information provided by Master. Notations are entered in Bill of Lading declaring quantity as subject to amount discharged at destination, which is supervised by Cuban Producers' Representative.

TANKERS: Pumping rate:

Fuel oil	– discharge:	about 500 t.p.h.
Alcohol	– loading:	,, 208 ,,
Molasses	– loading:	,, 263 ,,

FRESH WATER: Supplied only at Reynold Garcia Pier. Delivery slow.

REPAIRS: Can be performed by Cearra y Trabazo.

COMMUNICATIONS: Long-distance telephone, Corporacion Inalambrica Cubana, Press wireless, Government telegraph, postal communication, railroad and buses.

Vessels can communicate through CLA via Cardenas and/or Havana.

MEDICAL: Following hospitals where sick crew members can receive attention: Civil Hospital, Army Hospital, Clinica Moderna, Clinica Villar, Clinica Matanzas.

AUTHORITIES: Located as follows:

Port Doctor: Milanes St. No. 2. Tel. 2672 (home tel. 2338).
Immigration: Santa Teresa St. No. 19. Tel. 2695.
Port Captain: Muelle del Real. Tel. 2469.
Custom House: Versalles St. e/Navia and Riech St. Tel. 2269 (home tel. 2339). (Chief of Custom House watching services.)

AGENT: Empresa Consignatarias Mambisas, POB 245, Tello Lamar Street No. 88, Matanzas. Tel. 2519 and 3079 (night: 3819).

Due to short distance between Havana and Matanzas, a close co-ordination inter-agencies must exist regarding advices of ETA and ETS of vessels transitting between these two ports.

NUEVA GERONA (Isla de Pinos): 21.58 N. 82.56 W.

PILOTAGE: Pilots board vessels at Punta Frances. Distance from place where Pilots board vessels to loading berth is about 34 miles. No pilot station. Chief Pilot is located at No. 3 St. Mo. 612 e/ 6 and 8 Streets, Nueva Gerona, Isla de Pinos.

APPROACHES: Entrance channel or passage from the Gulf to the bank is about 2 miles wide. Bottom throughout the 34 miles is mud (from entrance to anchorage in front of Las Casa River). No dangerous turns or narrows.

RESTRICTIONS: Entry and sailing only during daylight.

ANCHORAGE: Fruit-loading operations performed at anchorage when vessels' draft does not permit them to enter the river.

Vessels are permitted to load at anchorage up to a max. of 19 ft. Swinging area: 600 ft.

Following barges are available:

Evangelina – capacity 80 tons (schooner)
Bongo – capacity 80 tons (barge)
Natalia – capacity 100 tons (schooner)

Working periods: Monday to Friday 0700/1100 – 1300/1700 hrs.; Saturday 0700/1100 hrs.

Whenever sufficient cargo is supplied by the packing plant, the loading rates should be about 120 tons per gang in 8 hours.

MAX. SIZE: Max. draft up to which vessels can load out of the river is 19 ft. Tidal variation 1 ft.

BERTHING: Ferry Dock: Length 200 ft., draft 8 ft. Dock situated about 2 miles up river. Depth of river is 13 ft., and 250 ft. wide. At present dock used for coastwise services by Flota de Navegacion Mambisas (cargo and passengers).

FUEL/FRESH WATER/REPAIRS: Not available.

MEDICAL: General hospital "Heroes de Baire", where sick crew members can receive attention.

COMMUNICATIONS: There are telephone, telegraph and cable (Inalambrica) communications, also air postal service.

AUTHORITIES: Port Authorities are located at Nueva Gerona.

It is strongly recommended that when vessels are assigned to this port, all measures be taken for perfect co-ordination between Agents, Pilots and Port Authorities, and Masters should give ETAs in advance.

SUB-AGENT: Empresas Nacional de Cabotaje, Calle 14 entre 1ra. y 3ra, Nueva Gerona, Isla de Pinos. Cable: "Vapor Nueva Gerona". Tel. 33 and 163 (night: 277).

NUEVITAS: including Pastelillo, Puerto Tarafa, and Bufadero. 21.33 N. 77.16 W.

Nuevitas has following load/discharge berths and terminal facilities at Pastelillo and Puerto Tarafa, also loading berths at Bufadero, through which molasses are exported.

(a) **Pastelillo:**

PILOTAGE: Pilots board vessels at Punta Practicos, 1 mile from buoy No. 1.

Distance from place where Pilots board to: Pastelillo, 8 miles; Bufadero, 12 miles; Puerto Tarafa, 14 miles.

Pilot station located at Punta de Practicos, East of entrance channel. Usual means of communications are radio, telephone and launches.

APPROACHES: Entrance is narrow and winding. Channel is between Point Sotavento and Practicos and is 7 miles long. Vessels may use it safely although care to be taken because of narrow and sharp turns, and velocity of tidal currents.

RESTRICTIONS: Recommended that vessels enter or sail during daylight.

ANCHORAGE: Botijuela Anchorage: Can accommodate vessels up to 33 ft. draft.

MAX. SIZE: Up to 575 ft. length – 33 ft. draft. Up to 610 ft. length – 31 ft. draft. Tidal variation 1 ft. 6 in.

BERTHING: Pier No. 4: Length 458 ft., draft 32 ft. both sides. Vessels must be operated at high tide. Trucking operations cannot be performed at this pier. Pier has 2 railroad tracks. of standard gauge with only 1 inlet.

North side of pier is used for sugar, general cargo and fuel oil. South side of pier used for sugar, general cargo and molasses.

Vessels drawing over 30 ft. 3 in. have to wait high tide for shifting to anchorage.

STEVEDORES: Working periods: Monday to Friday, 0700/1300 – 1300/1900 hrs.; Saturday, 0700/1300 – 1300/1900 hrs.; Sunday, no work is performed.

Raw Sugar: loading rate: max. 1,800 bags per gang in 6 hours. Minimum fixed rate 975 bags in 4 hours or equivalent in 6 hours. 6 bags loaded per sling.

Loading Capacity: 2 sugar vessels can perform sugar loading operations simultaneously.

Refined Sugar: this type of shipment is not regularly performed at this port.

Loading rate: 3,300 bags of 100 lb. each are loaded per gang in a 6-hour period.

General Cargo: discharging rate is about 11 to 12 t.p.h.

Raw Sugar in Bulk: there are 7 sugar thrower machines.

No shore crane available.

TANKERS: Molasses pumping rate about 85,000 g.p.h.

FUEL: Bunkers can be supplied at No. 4 pier. Grades available: fuel oil, diesel oil, and gasoline, but only supplied in small quantities. Delivery rate average – fuel oil 200 t.p.h., diesel oil and gasoline 40 t.p.h. Delivery is by pipe-line or tank cars.

FRESH WATER: Can be supplied at No. 4 pier. Delivered by means of railroad tank cars, each with capacity of approximately 34 tons. Delivery rate about 20 t.p.h.

REPAIRS: Repair Shop "Boga" incorporated in the Industry Ministry.

MEDICAL: There is a municipal hospital where sick crew members can receive attention.

COMMUNICATIONS: There are long-distance telephone communications, cables RCA, Government telegraph and postal service. There is a long-distance telephone between Nuevitas/Pastelillo/Tarafa and Bufadero.

Vessels can communicate with Nuevitas by radiogram (CLA).

AUTHORITIES: Located at Nuevitas.

Authorities travel from Nuevitas to clear the vessels for whichever of the 3 berths they may have been assigned, i.e. Pastelillo, Tarafa or Bufadero.

Means of transportation for port authorities from Nuevitas to the loading/discharging berths is automobile or launches.

AGENTS: Empresa Consignatarias Mambisas, Apartado 250, Puerto Tarafa, Nuevitas. Cable: Mambisas Nuevitas. Tel.: 3–1435 (night: 3–5805 and 3–6025).

(b) **SUB-PORT OF TARAFA:**

PILOTAGE: See "Pastelillo" Distance from place where Pilots board vessels to Tarafa is about 14 miles.

APPROACHES: See "Pastelillo".

RESTRICTIONS: Vessels can enter or sail only during daylight and should wait for slack water.

MAX. SIZE: Max. draft with which vessels can enter Tarafa is 25 ft. 8 in. In exceptional cases up to 26 ft. 6 in.

Max. length up to 600 ft. Vessels drawing over 25 ft. 3 in. should wait for high tide before shifting anchorage. Tidal variation 1 ft. 6 in.

BERTHING: For sugar and general cargo.

Pier "B" – North side: length 480 ft., depth 19 ft. (high water). South side: depth 19 ft. (high water).

Pier "C" – North side: length 767 ft., depth 25 ft. 6 in. (high water). South side: depth 25 ft. (high water).

Pier "D" – North side: length 767 ft., depth 25 ft. 6 in. (high water). South side: length 477 ft., depth 25 ft. (high water).

Vessels drawing 25 ft. 6 in. and over when shifting to Pastelillo must do so at high tide.

These 3 piers each have 4 railroad tracks of standard gauge but sugar cars cannot enter loaded at one side and exit at the other side. Usually loaded sugar cars are unloaded first and, whilst shifting takes place, the last ones are discharged in order not to lose time in this movement.

STEVEDORES: Working periods – raw sugar, loading rate, refined sugar, general cargo, etc., same as for Pastelillo. 6 sugar vessels can operate simultaneously. No crane available.

FUELS: No bunkers usually supplied at this terminal, but in special cases bunkers have been supplied at Pier "B".

FRESH WATER: Can be supplied at Pier "B", "C", and "D".

AUTHORITIES: See "Pastelillo".

(c) **SUB-PORT OF BUFADERO:**

PILOTAGE: See "Pastelillo". Distance from place where Pilots board vessels to Bufadero is 12 miles.

APPROACHES: See "Pastelillo".

RESTRICTIONS: Vessels drawing over 25 ft. 3 in. should await high tide for shifting to anchorage.

For entering-sailing, vessels should wait for slack water and only during daylight.

MAX. SIZE: Max. draft with which vessels can enter/sail to/from Bufadero is officially up to 25 ft. 3 in. but actually up to 25 ft. 6 in. Length 600 ft. Tidal variation 1 ft. 6 in.

BERTHING: Pier, length 557 ft.; draft, North side, 25 ft.; draft South side, 25 ft.

This pier is only used for molasses and fuel oil. Average pumping rate of molasses is 70,000 g.p.h. Only South side is in operation.

FUEL/FRESH WATER/REPAIRS: Not available.

AUTHORITIES: See "Pastelillo".

PUERTO PADRE–Cayo Juan Claro: 21.17 N. 76.32 W. (and sub-port of Manati)

Vessels can proceed direct to Cayo Juan Claro and Port Authorities travel to Cayo Juan Claro for clearance.

PILOTAGE: Pilots board vessels at entrance, not less than 1 mile from mouth of port. Distance from place where Pilots board vessels to pier is about 2.5 miles.

APPROACHES: Funnel-shaped at entry. 2 turns, but the one to take into consideration when manoeuvring vessels over 525 ft. is "Careneoro" turn. Vessels with a length of 565 ft. have entered this port. Bottom is rocky in entrance channel and muddy in bay.

RESTRICTIONS: Vessels can enter only during daylight and must wait for slack water for entering/sailing due to current in the channel.

MAX. SIZE: Vessels can sail with max. draft of 25 ft. up to length of 500 ft. Over 500 ft. length with draft up to 24 ft. Max. length permitted 557 ft. Tidal variation 2 ft. 3 in.

BERTHING: Loading and/or discharging operations are carried out at Cayo Juan Claro which is about 3 miles distant from Puerto Padre.

Dock No. 1 For loading sugar: length 509 ft., width 30 ft., depth 25 ft.

Dock No. 2 For loading molasses and discharge of fuel oil and gas oil: length 272 ft., width 12 ft., depth 25 ft. This dock has railroad tracks of non-standard gauge. A launch is used for handling lines in berthing.

STEVEDORES: Working periods: Monday to Friday 0700/1100 – 1300/1700 hrs.; Saturday 0700/1100 hrs.

Raw sugar: loading rate max. 1,430 raw sugar bags loaded per gang period. Minimum is 650 bags. 5 bags loaded per sling. Only one vessel can operate at a time. Empty jute bags have been discharged and average discharge rate is about 45 metric tons per gang period. No crane available.

Sugar in bulk: 5 thrower machines for loading sugar in bulk.

TANKERS: Molasses average pumping rate 50,000 g.p.h. Fuel oil, discharging rate 45,000 g.p.h. Gas oil discharging rate 35,000 g.p.h.

FUEL: Not available.

FRESH WATER: Can be supplied at No. 1 pier by pipe-line. Delivery rate 17 t.p.h.

REPAIRS: Port has no repair shop, but in event winch damage or any other light repairs, this work can be carried out at the Sugar Mill "Central Antonio Guiteras" Repair Shop.

MEDICAL: General Hospital at Puerto Padre where sick crew members can receive attention.

AUTHORITIES: Port Doctor and Custom House are located at Puerto Padre. Immigration at Chaparra. Port Captain at Cayo Juan Claro.

Distance from Cayo Juan Claro where all cargo operations are performed to Puerto Padre is 3 miles. Means of transportation between Puerto Padre and Cayo Juan Claro: motor-boat, railroad, and automobile.

From Puerto Padre to Cayo Juan Claro it takes: by motor boat 30 minutes; by automobile 5 minutes; railroad 20 minutes.

Means of communications available at Puerto Padre: telephone, cable (Inalambrica), telegraph and postal service. Vessels can communicate with Puerto Padre via CLA Habana.

AGENT: Empresa Consignatarias Mambisas, Cayo Juan Claro, Puerto Padre. Tel. 208–7 (Cayo Juan Claro); (Night 165). Cable: "Mambisas Puerto Padre".

(a) **SUB-PORT OF MANATI** 21.24 N. 26.49 W.

Vessels can proceed directly to this sub-port without calling first at Puerto Padre for clearance.

PILOTAGE: Pilots board vessels about 1 mile from entrance. No pilot station. Pilots located at Manati and ETA notice to be given to them well in advance. Distance from place where pilots board vessels to pier is about 3 miles.

APPROACHES: Narrow channel, very deep (min. depth 40 ft.) Bottom is irregular, parts where it is sandy and others rocky.
RESTRICTIONS: Not necessary to await slack water for entry/sailing; but considering large tonnage of vessels presently entering port for topping-off, if there is a strong current Pilots wait until current loses strength order to avoid accidents. Vessels can enter and sail only during daylight.
ANCHORAGE: Swing area 600 ft. (approx.). Owing to reduced space, this anchorage is not safe for anchoring vessels drawing over 26 ft.
MAX. SIZE: Vessels drawing up to 30 ft. and a length of 500 ft. have entered. Max. draft with which vessels can enter and sail:

(a) Presently vessels can enter with length (Liberty type) up to 440/460 ft. drawing up to 28 ft. Up to 29 ft. as max. limit.

(b) With a length up to 500 ft. drawing not over 26 ft. Vessels with above specifications can enter port and berth whenever tide favourable and weather good.

Both sizes of vessels can load up to a max. draft of 30 ft. Also vessels with length up to 560 ft. and drawing up to 17 ft. can enter port, although it is not advisable to do so on account of the present dock conditions. Tidal variation, 2 ft. 6 in.
BERTHING: Dock length 465 ft. At South end of dock there is a small shallow which renders worthless about 70 ft. of dock space. Present max. depth at dock is 30 ft. 02 in. at high tide.
STEVEDORES: Loading sugar: working periods: Monday to Friday 0700/1100 – 1300/1700 hrs.; Saturday 0700/1100 – 1300/1700 hrs. When necessary, work is performed at night. Sunday is also worked when required. 1,040 sugar bags loaded per gang period; 4 sugar bags loaded per sling. Only one vessel can operate at a time. No refined sugar operations performed. No shore crane available. Sugar mill has 5 grates and 3 machines for spreading sugar in hatches.
TANKERS: Molasses pumping rate 25/30,000 g.p.h. Fuel oil pumping rate at average of 1,700 b.p.h.
FUEL: Not available.
FRESH WATER: Supplied by pipe-line at pier. Pipe-line 2 in. in diameter and delivery at an average rate of 15 – 16 t.p.h. Amount that can be delivered depends on supply at sugar mill.
REPAIRS: Sugar mill repair shop for minor repairs. Welder available.
COMMUNICATIONS: Long-distance telephone communication between Manati and Puerto Padre, although difficult owing to fact that there are only two lines from Manati and they are almost always congested. There are some occasions when an entire day is spent trying to obtain communication without result. Victoria de las Tunas telephone operator serves on occasions as "relay".

Vessels cannot communicate by radio with this port.
AUTHORITIES: Port Doctor and Port Captain located at this port. Custom House delegation located here, also Immigration Inspector who attends Gibara, Vita and Puerto Padre. When vessels enter and anchor awaiting for favourable tide to dock, they are cleared by Customs at the anchorage. If vessel arrives on flood tide (which is best tide for berthing) Port Authorities visit vessel when berthed.

When vessels enter at Manati, the Manifest order number is given by Puerto Padre Custom House. Custom House clearance is given by Manati Custom House Delegation of Puerto Padre. Distance from Manati subport to Puerto Padre port is 17 miles by sea. By highway, as journey is made through Victoria de las Tunas, distance about 140 kilometres. From Manati to Victoria de las Tunas, takes 1.5 hours. From Victoria de las Tunas to Puerto Padre, about 1 hour. There is railroad transportation between Manati and Puerto Padre and it takes about the same time. There are 3 daily services between Manati and Victoria de las Tunas by train, and 2 by highway.
AGENT: Empresa Consignatarias Mambisas, Central Manati. Cable: "Mambisas Puerto Padre". Tel. 144–3.

SANTA CRUZ DEL SUR (and sub-ports of Manopla and Guayabal): 20.42 N. 77.59 W. (See Plan Book)

PILOTAGE: Pilots board vessels close to buoy indicating entrance channel (Cuatro Reales) between "La Ceiba" bank and Carapacho Cay Lighthouse. Distance from place where Pilots board vessels (Cuatro Reales Channel) to Santa Cruz anchorage is 11 miles.
APPROACHES: Entrance channel has depth of 45 ft. Bottom is mud, gravel and loose sand. In the narrowest part of channel is a turn of about 20 degrees.
RESTRICTIONS: Vessels cannot enter/sail at night. Not necessary to wait for slack water for entering/sailing.
ANCHORAGES: No. 1, 24 ft.; No. 2, 26 ft.; No. 3, 36 ft.; No. 4, 40 ft. Sugar-loading operations were perfomed at anchorages. There were 10 barges available which are presently operating at the sub-port of Santa Maria (Jucaro). Similarly, the tugs which were used at this port are at present operating at Jucaro.
MAX. SIZE: Vessels can enter/sail through channel with any draft and length subject official draft of the port which is 35 ft. Tidal variation 1 ft. 5 in.
LOADING: Raw sugar: working periods: Monday to Friday 0600/0800 – 0830/1100 – 1200/1530 hrs.; Saturday 0600/0800 – 0830/1030 hrs.; Sunday: when it has been necessary, work has been performed.

Loading rate: 1,950 bags loaded per gang period. 6 bags loaded per sling. Only 1 vessel can operate at a time. No crane available.

Refined sugar – no operations performed.

Raw sugar in bulk – no sugar in bulk is shipped by this port. Bulk sugar is shipped by the sub-port of Guayabal.
TANKERS: No tankers operate at Santa Cruz del Sur proper.
COMMUNICATIONS: Long-distance telephone communication with Guayabal can be established through San Francisco Sugar Mill. Telegraph can also be used. There is no telephone or telegraph communication beteen Santa Cruz and Manopla.

At Santa Cruz del Sur there are long-distance telephone, Government telegraph and postal service. Vessels can communicate with Santa Cruz by telegraph via Radio Habana.
MEDICAL: No hospital. The nearest hospital where sick crew members can be attended is located at Camaguey, 80 km. from Santa Cruz.
FUEL/WATER/REPAIRS: Not available.
AUTHORITIES: Port Authorities are located at this port. Launch services are used by Port Authorities to clear vessels.

Distance from Santa Cruz del Sur to Manopla: 14 miles; Guayabal: 14 miles. From Santa Cruz to Manopla by sea 1.5 hours; by road 1 hour. To Guayabal by sea 3 hours; by road 2.5 hours.

No daily transportation between Santa Cruz and its sub-ports. Launch or automobile are to be hired for this purpose.
AGENT: Empresa Consignatarias Mambisas, Calle Carretera s/n, PO Box 49, Santa Cruz del Sur, Camaguey. Tel. 11 (night 65 and 26–8). Cables: "Mambisas Santa Cruz del Sur".

(a) SUB-PORT OF MANOPLA:

PILOTAGE: After Pilot boards vessel at Cuatro Reales Channel, vessel proceeds to Santa Cruz for clearance, thence takes another Pilot and proceeds to sub-port of Manopla, 14 miles distant from Santa Cruz.
APPROACHES: See Santa Cruz. Entrance channel to sub-port of Manopla – Canal de Media Luna, Canal de los Bayameses, where vessels anchor, is a mile wide, bottom soft mud. No dangerous turns. Vessels of any length can enter and the anchorage depth is 24–40 ft. Official permitted draft 35 ft. Vessels can enter/sail only during daylight. Not necessary to wait for slack water for entering/sailing. Tidal variation 1 ft. 6 in.
LOADING: Anchorage No. 1: 26 ft.; No. 2: 40 ft. Loading sugar operations were performed at above anchorages by means of barges. The following barges and tugboats were available:

Macareno No. 1	– capacity: 329 metric tons, 2870 bags of raw sugar or 75,000 gallons of molasses.
Macareno No. 2	– capacity: 329 metric tons, 2,870 bags of raw sugar or 75,000 gallons of molasses.
Eulalia	– capacity: 269 metric tons, 2,350 bags of raw sugar. Has no tanks.
Miguelito	– capacity: 269 metric tons, 2,340 bags of raw sugar. Has no tanks.
Josefa	capacity: 269 metric tons, 2,340 bags of raw sugar or 48,000 gallons of molasses.

Tug: *Fox* – length 66 ft., breadth 14 ft., 165 h.p. Tows the fleet of barges utilised at Manopla.
TANKERS: Average pumping rate of molasses 20,000 g.p.h.
COMMUNICATIONS: No long-distance telephone communication. There is telegraph service which works up to 1800 hrs.
FUEL/WATER/REPAIRS: Not available.

AUTHORITIES: See "Santa Cruz".

(b) SUB-PORT OF GUAYABAL: (See Plan Book)

PILOTAGE: After Pilots board vessels at Cuatro Reales Channel, they proceed directly to sub-port of Guayabal, where Customs clearance takes place. Also see "Shipmaster's Report".
APPROACHES: Dredged channel 2,474 m. in length, 60 m. in width with average depth of 30 ft.
ANCHORAGE: Suitable for vessels with draft up to 40 ft.
MAX. SIZE: Official draft for the port is 35 ft., but Pilots advise max. draft with which vessels may sail from the berth is 32 ft. 9 in. at HW, with max. length 510 ft.
BERTHING: Pier: length 508 ft., depth 32 ft. 9 in. at high water.
STEVEDORES: Sugar loading in bulk. Loading of molasses and alcohol takes place frequently. Fuel oil and general cargo discharge.

Sugar in bulk – at pier there is an installation operated by electric motor control which moves a convex-shaped conveyor and transports the bulk sugar from warehouse to the vessel. 2 thrower machines, 600 and 400 t.p.h. respectively. Average loading rate about 250 t.p.h. although occasionally average of 400 tons has been obtained. There is some time lost on account of shifting the crane. Occasionally shovellers are required, and work continues 24 hours a day.

General cargo – it is not customary to receive general cargo at this sub-port, although on occasion bales of empty jute bags have been received, destined to neighbouring sugar mills. At present there are no facilities for discharge of general cargo, and no shore cranes available.
TANKERS: Shipment of molasses and alcohol is quite frequent. Vessels discharging fuel oil may berth with max. draft of 27 ft. without touching bottom, which is of soft mud.
COMMUNICATIONS: Communications between Guayabal and Santa Cruz are good. It is necessary to travel to Sugar Mill San Francisco (about 20 km. from the pier) in order to communicate by telephone with Santa Cruz.

Masters must send messages giving ETA addressed to Mambisas Santa Cruz del Sur.
FUEL/REPAIRS: Not available.
FRESH WATER: Supplied at pier by pipe-line at average rate of delivery 10 t.p.h.

SHIPMASTER'S REPORT: 1978.

Pilotage: Pilots are arranged by the Agent at Santa Cruz del Sur, (Mambisas). The boarding station shown on charts and mentioned in Pilot Books is now non-existent. Instead the Pilot comes direct from Santa Cruz when a ship is expected and boards the vessel between No. 2 Buoy and No. 4 Buoy South of the entrance to Cuatro Reales Channel. Vessel then proceeds to Guayabal, where it is necessary to anchor off the port for clearance.

Approaches: The navigable width of the approach channel, is at present 50 m., the buoys being moved accordingly, with an average depth of 32 ft. The centre alignment of the approach channel is 011.5° T. This is indicated by two fixed leading marks. The forward one, a metal pole with a yellow triangle mark, apex up, at night a fixed red light. The rear mark is a yellow triangle apex up, attached to the top of a water tank (on a framework tower) at night a fixed green light. This leading line leads "down" the Eastern side of the one and only jetty, along the top of the elevated (roofed-over) conveyor belt.

Documents/Customs:

Crew Declaration (Manifest)	6 copies
Steward's store list	6 copies
Deck/Engine store list	6 copies
Maritime Declaration of Health	3 copies
Dangerous drugs list	6 copies
Slop chest/Bonded stores	6 copies
Explosives list (Distress Rockets, etc.)	6 copies
List of foreign currency	5 copies
List of ship's equipment, i.e. films, binoculars, T.V.'s, sextant, etc.	4 copies.

All foreign currency, cameras, dangerous drugs, and crew presents to take home were all sealed up in the bond locker along with its contents. Meat room sealed up. Although all our meat is of Australian or New Zealand origin, some of the lamb had a USA wrapper on it which made it American meat and this is not acceptable in Cuba. As far as I can understand the meat from Australia, New Zealand, Japan, USSR, only is acceptable in Cuba. Valid smallpox vaccinations are required.

AUTHORITIES: Port Captain and Immigration's Delegations at Guayabal. Custom's delegate travels from Santa Cruz to Guayabal to conduct clearance. Distance 24 miles (by sea) from Guayabal to Santa Cruz. By road 60 km. Time 3 hours by sea and 2 hours by road.

AGENT: Vessels operating at Guayabal are attended by Santa Cruz del Sur agency personnel.

SANTIAGO DE CUBA: 19.50 N. 75.52 W.

PILOTAGE: Pilots board vessels 1 mile from mouth of port. Pilot station located in small Cay at entrance of bay known as Gramma Cay (formerly Smith Cay). Launch service is only means of communication available between Santiago de Cuba and Gramma Cay. Pilots also have office located at Custom House building with telephone communication. Distance from place where Pilots board vessels to: Piers 4 miles; Anchorage 3.5 miles; Refinery Pier 1.5 miles.

APPROACHES: The entrance, up to a distance of 0.5 mile, has a rock bottom. Thereafter, for a distance of 1 mile muddy bottom, and remaining 2.5 miles is soft mud. There are some turns, and the channel and entrance to the port are narrow.

RESTRICTIONS: Vessels can enter and sail only during daylight from 0600 to 1800 hrs.

ANCHORAGES: Inner anchorages located in the area from North of "Ratones Cay" up to West of buoy No. 20. Can accommodate vessels drawing up to 30 ft. and a length up to 680 ft.

MAX. SIZE: Vessels with a length of 680 ft. and a draft of 35 ft. can enter up to the refinery, provided they arrive during early morning hours. Tidal variation 1 ft. 6 in.

TUGS: Tugs are used for deep-drafted vessels and otherwise as situation demands. Following tugs are available:

Toledo	length 5.18 m.;	h.p. 165;	speed 9 knots
Santa Barbara	length 60 ft.;	h.p. 165;	speed 8 knots
Caridad	length 45 ft.;	h.p. 110;	speed 7 knots

BERTHING: Dock No. 1 "Luis Felipe Mena Gil" (formerly Malecon). Length 400 ft., depth 25 ft. at centre, 22 ft. at West end, and 22 ft. fore and 24 ft. aft at East end. Dock used for sugar loading and discharge of mineral, heavy lifts and volume cargo. It has 2 railroad tracks of standard gauge. (Notwithstanding above depth, vessels drawing up to 28 ft./28 ft. 6 in. sail from this dock.)

Ferrocarril Pier – length 240 ft., depth 23 ft. Vessels moor to dolphins. Distance between end dolphins is 400 ft. Used only for molasses loading. There is a pipe-line installation.

Pier No. 2 – "Miguel Santiesteban Reyes" (formerly Muelle de Luz) Wooden pier, length 500 ft., depth (North side) 22 ft. 06 in. shore end; 23 ft. 06 in. sea end. (South side) 20 ft. 06 in. shore end; 22 ft. 6 in. sea end. Used for general cargo discharge. Trucks and trailers operate at this pier.

Pier No. 3 – "Rolando Roca Pacheco" (formerly La Maritima). Concrete pier, length 650 ft., depth (North side) 22 ft. shore end; 4 ft. sea end. (South side) 24 ft. shore end; 25 ft. sea end. Used for discharge of general cargo. Trucks and trailers operate at this dock.

La Molinera Oriental Pier (present name: "Frank Pais"). Depth 21 ft. fore; 22 ft. 06 in. aft.

Vessels do not berth directly on to this pier, but are secured to dolphins at narrow side of the pier. Used for bulk wheat discharge. Capacity of silos 8,200 tons. Conveyor and pipe-line are available.

Cement Factory Pier – length 290 ft., depth 17 ft. Used for cement loading. Trucks can be used.

Refineria Hnos. Diaz Pier – length 789 ft., depth 40 ft. both sides. depth 45 ft. at head of pier. Used for discharge and loading fuel. Also used for bunkering. Pipe-line installation.

Muelle Romero Dock – length 492 ft., depth (East side) 14 ft. fwd., 19 ft. aft (West side) 19 ft. 06 in. fwd., 22 ft. aft.

Above depths taken at low water.

STEVEDORES: Working periods: Monday to Friday 0700/1300 – 1300/1900 hrs.; Saturday the same; Sunday worked only if vessel completing cargo.

Raw Sugar: Loading rate about 1,200 bags loaded per gang period; 6 bags loaded per sling. 2 vessels can load sugar simultaneously.

General Cargo – approximate discharging rates:

General cargo	7–8 tons per gang hour
Bagged cargo	15 tons per gang hour
Iron	7 tons per gang hour
Wood	3 standards
Fertilisers	15 tons per gang hour

Shore Crane – there is movable crane with boom of 75 ft. length and lifting capacity about 19 tons.

Bulk sugar – 5 thrower machines available.

TANKERS: Average pumping rate: Molasses 30,000 g.p.h. Fuel oil 13,000 b.p.h.

COMMUNICATIONS: Radio telegrams, radiotelephony, telegraph and telephones. R.C.A., Inalambrica. All-American, Prewi, radio and Government telegraph. Also air, railroad and bus services.

Vessels can communicate with Santiago de Cuba through CLM and RCA.

MEDICAL: Sick crew members can be attended at Army Hospital or Los Angeles Hospital.

FUEL: Fuel oil and diesel oil available. Delivery rate about 7,000 b.p.h.

FRESH WATER: Can be supplied docked/anchored.

REPAIRS: Following repair shops: Joaquin Lamas, Giron.

AUTHORITIES: Located at Custom House building.

AGENT: Empresa Consignatarias Mambisas, PO Box 522, Jose Antonio Saco 10, Santiago de Cuba. Tel. 2891/7489 (night: 6874). Cables: "Mambisas Santiago de Cuba."

TANAMO: 20.44 N. 75.20 W.

PILOT: Pilot boards about 1 mile from entrance. Pilot station located at entrance of port mouth. Usual means of communication is by launch. Distance from place where Pilots board vessels to: Punta Gorda Dock: 5 miles; Cayo Mambi Dock: 7 miles.

APPROACHES: Entrance channel has rocky and muddy bottom. There are 90° turns, and narrow passes.

RESTRICTIONS: Entry and sailing at slack water and daylight only. Tug assistance required for vessels between 450 and 600 ft. length.

MAX. SIZE: If berthing, draft 22 ft., length 450 ft. If anchoring, draft 28 ft.

BERTHING: Punta Gorda Dock: length 345 ft., depth East side 22 ft., West side 19 ft. Dock used for loading sugar and molasses; also for fuel oil discharge or heavy cargo.

Cayo Mambi Dock: length 200 ft., depth 14 ft. Dock used in discharge of coastwise merchandise.

Docks have railroad tracks of non-standard gauge. Punta Gorda Dock has 4 inlet tracks only. Cayo Mambi has 2 tracks.

STEVEDORES: Working periods: Monday to Friday 0700/1100 – 1300/1700 hrs.; Saturday 0700/1100 hrs.; Sunday no work performed.

Raw sugar: 975 sugar bags loaded per gang period. 6 sugar bags loaded per sling.

Refined sugar: 1,875 bags of 100 lb., loaded per gang period. 12 bags of 100-lb. type loaded per sling.

General Cargo: Working periods same as for sugar.

TANKERS: Molasses average pumping rate: 20,000 g.p.h. Fuel oil average pumping rate: 11,750 b.p.h.

COMMUNICATIONS: Long-distance telephone communication at sugar mill. Radio service Inalambrica and Government telegraph. Interior telephone communication between sugar mill yard and port.

Air service at Cayo Mambi. Vessels can communicate with Cayo Mambi by Government telegraph.

FRESH WATER: Can be supplied at Punta Gorda, delivery by pipe-line at rate of 5 t.p.h.

FUEL/REPAIRS: Not available.

MEDICAL: There is a hospital where sick crew members can receive attention in urgent cases. For serious cases, sick men are sent to Nicaro Hospital or to Santiago de Cuba.

AUTHORITIES: Port Doctor and Immigration Inspectors located at Sagua de Tanamo. Captain of Port and Custom House located at Cayo Mambi. Custom House and Captain of Port are Delegations of Antilla.

Entry and sailing clearances attended by Cayo Mambi Delegation Office. Port Authorities travel from Cayo Mambi to Punta Gorda by railroad, thereafter by launch to the anchorage.

SUB-AGENT: Empresa de la Industria Azucarera de Oriente, Central Frank Pais (Tanamo), Cayo Mambi, Oriente, Cables: "Franpa Cayo Mambi". Tel. 2 (night: Zona 2). Central Switchboard.

VITA (sub-port of Gibara – Oriente Province): 21.05 N. 75.57 W.

PILOTAGE: Pilots board vessels 3 miles from entrance channel. Pilot station located at Vita. Interior telephone communication. Distance from place where Pilots board vessels to dock: 5 miles.

APPROACHES: Owing to narrowness of channel, turns may be considered as dangerous for vessels over 450 ft. length.

RESTRICTIONS: Entry and sailing only during daylight.

MAX. SIZE: Max. draft with which vessels can enter/sail is 27 ft. at high tide and 26 ft. at low tide. Max. length 500 ft. (although vessels with length of 550 ft. have entered this port).

BERTHING: Dock: length 300 ft., depth 26 ft. Vessels drawing 26 ft. 06 in. or 27 ft., touch bottom. Loading of sugar and molasses and discharge of fuel. Only one railroad track of non-standard gauge.

STEVEDORES: Working periods: Monday to Friday 0700/1100 – 1300/1700 hrs., Saturday 0700/1100 hrs.

800–1,100 sugar bags loaded per gang period. Four sugar bags are loaded per sling.

TANKERS: Average pumping rate (molasses) 25,000 g.p.h.

COMMUNICATIONS: Long-distance telephone, post and telegraph services.

MEDICAL: No hospital at Vita. Sick crew members can receive attention at Gibara Hospital. Port Doctor at Santa Lucia, Oriente.

FUEL/REPAIRS: Not available.

FRESH WATER: Can only be supplied in exceptional cases. Delivery by 2-in. diameter pipe, by gravity. Delivery average 3 t.p.h. Recommended that Masters always check availability in advance.

AUTHORITIES: Immigration at Chaparra, who travels to Vita on ship's arrival advice. Captain of Port at sub-port of Vita. Gibara is the Customs Official Port having Custom Delegation at sub-port of Vita. Vessels can proceed directly to Vita where they are cleared by Authorities.

SUB-AGENT: Empresa de la Industria Azucarera de Oriente, Central Rafael Freyre (antes Santa Lucia), Oriente. Cables: "Rafy Santa Lucia Oriente." Tel. Dock 43–3. Centre 37–1. Home 28.

PILOTAGE: Ships are not allowed to enter the port or berth at the mooring buoys outside the breakwater port without Pilot, unless permission is granted by the Port Authority. Port Authority Pilot boards vessel at roadstead. Master must give 24 hour's notice of ETA to vessel's Agents to enable them inform the Port Manager in time. Pilot boat is of light grey colour flying Pilot flag. Pilot may be contacted on VHF Channel 16 during working hours. Pilot's Telegraphic Address is: Port Manager, Larnaca, Cyprus. Tel.: 041-53563.

ANCHORAGE: Open roadstead.

RESTRICTIONS: See "Max. Size" and "Berthing". Rise of tide up to 1.5 ft.

MAX. SIZE: For berthing in the port, vessels must not exceed 500 ft. L.O.A. However vessels of few feet in excess may receive berthing permission if vessel's manoeuvrability and prevailing weather conditions permit.

The port is dredged to 31 ft. (9.5 m.) Max. draft allowed 9 m. The height of the quay above sea level is 2.30 m.

Tankers discharge outside port at mooring buoys. Draft up to 32 ft. Max. L.O.A. 600 ft.

HEALTH: Pratique is required at Cyprus first port of call only. Pratique is granted either before or after berthing as appropriate.

RADIO: Cables sent through "Cyprus Radio", call sign: 5BA.

RADAR/VHF: Port Manager Larnaca and Pilot service on VHF Channel 16.

TUGS: Port Authority tugs join vessels outside breakwater using ship's lines.

BERTHING: Vessels may berth inside port between 0600 hrs. and sunset, but may unberth and sail until midnight. Cargo vessels are allowed to berth during night-time provided berth space is available and vessel will immediately operate with at least 1 gang.

Quay length; (a) Main quay 1,060 ft. (326 m.) and (b) Floating pontoon quay 656 ft. (200 m.).

CRANES: 9 mobile cranes 2 to 15 ton, 1 – 35 ton level luffing crane.

BULK CARGO FACILITIES: Not available.

SPECIALISED CARGO-HANDLING FACILITIES: Ro-Ro and containers facilities available.

BRIDGES: None.

STEVEDORES: 24 hours notice of ETA to Agent is required to enable him arrange gangs.

MEDICAL: It is necessary for Agent to receive advance notice of at least 2–3 hours before vessel's arrival. Hospital facilities constantly available. Smallpox vaccination is necessary; other inoculations or vaccinations are required according to prevailing circumstances.

TANKERS: Diameter of discharge lines up to 12 in. Max. draft 32 ft. Discharging takes place at mooring buoys outside port. Position of buoys 34° 54′ 75″ N., 33° 39′ E. No slop discharge facilities.

Buoy berths outside port:

Synergas Co-Operative Society Ltd: Depth of water 11.0 m. Pipe-lines 2. Fresh water not available. Pilot available through Port Manager at Larnaca. Position of buoys, 34° 55.5′ N., 33° 40′ E.

Petrolina Ltd: Depth of water at end of pipe-line 11.0 m. Pipelines 3. Pilot available through Port Manager at Larnaca. Position of buoys 34° 55′ N., 33° 39′ E.

Shell Company of Cyprus Ltd: Depth of water 11.0 m. Pipe-lines one 8 in. white oil line jointly owned by Shell, Mobil and Esso. Fresh water available by pipe-line. Pilot available through Port Manager at Larnaca. Position of buoys, 34° 54.75′ N., 33° 39′ E.

Agip: Depth of water 6 m. (approx.). Pipe-lines two. Fresh water not available. Pilot available through Port Manager at Larnaca. Position of buoys, 34° 55.5′ N., 33° 39.5′ E.

Cyprus Petroleum Refinery Larnaca: Depth of water 11.0 m. Pipe-lines 1×12 in. for crude oil and 1×8 in. for ballast. Fresh water available by pipe-line. Pilots available through Port Manager at Larnaca. Position of buoys 34° 54.75′ N., 33° 39′ E.

Mobil Oil Cyprus Ltd: Depth of water, 11.0 m.

Pipe-lines: 1×8 in., Jointly owned by Mobil, Shell and Esso.
1×4 in., LPG Line owned by Esso.
1×4 in., Vapour Line owned by Esso.
1×3 in., LPG Line owned by Mobil.
1×3 in., Vapour Line owned by Mobil.
1×2 in., Fresh water underwater pipe-line.

DENSITY: 1025.

FRESH WATER: Facilities available on quay. Delivery by hoses at about 50 t.p.h.

FUEL: 12 hour's advance notice is required. Available in unlimited quantities.

FIRE PRECAUTIONS: No tankers are allowed in the port. Vessels and operators must comply with internationally applicable regulations concerning explosives and dangerous goods.

CONSULS: Italy, Sweden, Denmark, Portugal, Finland.

REPAIRS: Minor repairs and overhauls may be carried out.

DRY DOCKS: Not available.

SURVEYORS: Lloyds, Bureau Veritas, Registro Italiano Navale, Germanischer Lloyd.

GANGWAY/ DECK WATCHMEN: Not necessary but available.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 50 grams tobacco or 40 cigarettes, and 0.25 litres spirits, 0.25 litres wines, per man per day.

For reasons of administrative convenience, issues of high duty goods for use by Crew on board will be made every 3 days, beginning with the first day of the ship's arrival in Cyprus waters. For each member of the Crew (other than the Master, the Chief Officer and the Chief Steward) each issue will consist of, 120 cigarettes or an equivalent quantity of other tobacco goods. 1 bottle of spirits, and 3 bottles of wine.

Each issue for the Master, the Chief Officer and the Chief Steward of ocean-going vessels will consist of: 200 cigarettes, 2 bottles of spirits and reasonable quantity of wine they may request.

Concessions to Crew landing from ship. On coming ashore, for a short period, 50 grams of tobacco, or 40 cigarettes per day or part thereof.

The above allowances are in force for all Cyprus ports.

CARGO GEAR: Load or discharge may be effected either by ship's or shore gear. 35 ton heavy lift crane available.

REPATRIATION: Facilities are available.

AIRPORT: Larnaca International Airport 3 miles from Larnaca Port. Daily flights to Europe and Middle East.

TIME: GMT plus 2 hours.

HOLIDAYS: Every Sunday; 1st January; 6th January; 25th March; 1st May; 28th October; 29th October; Good Friday; Saturday following Good Friday; Easter Monday; First Day of Kurban Bairam; Birthday of Prophet; First Day of Ramazan Bairam; Christmas Day; Boxing Day.

Work can be arranged on any holiday other than New Year's Day, Christmas Day, and Easter Sunday.

POLICE/AMBULANCE/FIRE TEL.: Police 52001, Hospital (ambulance) 52007, Fire 52683.

TELEPHONES: Line available for placing telephone on board.

SERVICES: Compass adjusting; Radar; Radio telephones; Gyro compass repairs; hull scraping and engine repairs.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Shore leave passes are issued. Seaman's Book or Passport required whilst ashore.

REGULATIONS: Port Manager's permission is required for: immobilising engine, cleaning or repairs whilst vessel alongside quay, lowering lifeboats and use of ship's radio. Port and customs clearance required before departure. Cyprus flag to be hoisted on mast from 0800 hrs. to sunset. Landing of dogs or other animals not allowed; also discharging of fruits, vegetables and eggs unless authorised by Produce Inspection Office. Disposal of garbage and waste strictly prohibited both in port and Cyprus waters.
DELAYS: According to prevailing circumstances but normally no delays.
DEVELOPMENTS: Extension of quay length by 340 m. Specialised ro-ro berth. Additional 4,000 sq.m. of paved open stacking area for general cargo and containers. Additional 9200 sq.m. of covered storage space. New luggage hall. New administration building.
GENERAL: Weather conditions permit entrance and working of ships all the year round.
AUTHORITY: Port Manager, Cyprus Port Authority, Larnaca.

LATCHI (Limni Mines): 35.03 N. 32.27 E.

DOCUMENTS: See "Limassol".
PILOTAGE: No Pilot available. Vessels chartered for Company advise ETA via Cyprus Radio to "Limni Poliscyprus". Anchorage 0.5 mile North of Mavroli Pier. During daylight hours Company launch leads vessels to anchorage.
ANCHORAGE: As above, depth 0.5 mile from pier is 10 fathoms.
MAX. SIZE: No restrictions on size.
HEALTH: All necessary action to obtain pratique made by Agent in the event of any suspected disease on board, necessary action and precautions taken by Health Authorities.
RADIO: Cyprus Radio – call sign BA on 500 or radio telephone 2182.
TUGS: None available.
BERTHING: Mavroli Pier in Khrysokhou Bay, Cyprus, in position 35° 03′ 15″ N. 32° 27′ 10″ E. bearing 072° approximately 3.2 miles from Latchi. Necessary to have Cyprus flag, and to have gangway and not a rope ladder for Authorities and stevedores to board.
STEVEDORES: ETA advice required order arrange gangs at least 24 hours. Loading rate 2,000 tons per day. Loading from 6 barges, average capacity 45 tons each.
MEDICAL: Agent to receive 24 hours notice. Hospital facilities available at Ktima, 24 miles from Terminal at Limni. Each member of crew to possess valid vaccination certificate.
DENSITY: 1025.
FRESH WATER: None available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Unnecessary.
OPENING/CLOSING HATCHES: Done by the crew.
CUSTOMS ALLOWANCES: See "Limassol".
IDENTIFICATION CARDS: Required.
CONSULS: No consuls at Terminal.
REPAIRS: No repairs can be carried out.
REPATRIATION: Can be arranged through Nicosia Airport.
AIRPORT: Nicosia Airport 68 miles away, served by regular airlines.
TIME: GMT plus 2 hours. Permanent.
HOLIDAYS: See "Limassol".
POLICE/AMBULANCE/FIRE: Such services arranged through Agent.
TELEPHONES: No arrangements exist for placing on board.
SHORE LEAVE: Landing permits obtainable from local Police Authorities by lodging passports or seamen's books.

LIMASSOL: 34.40 N. 33.03 E.

DOCUMENTS:
- 1 Arrival Declaration.
- 4 Crew Lists.
- 4 Passenger Lists and 1 Transit Passenger List (the latter in case of passenger vessels).
- 3 Transit Passenger Lists.
- 1 Fire Arms Declaration.
- 1 Stores Declaration.
- 1 Declaration signed by each member of Crew stating dutiable goods in their possession.
- 1 Form of appointment of Agent.
- 1 Maritime Declaration of Health.

PILOTAGE: Ships are not allowed to enter the port or to berth at the mooring buoys outside the breakwater port without Pilot, unless permission is granted by the Port Authority. Port Authority Pilot boards vessel at roadstead. Master must give 24 hour's notice of ETA to vessel's Agents to enable them inform the Port Manager in time. Pilot's Telegraphic Address is Port Manager, Limassol, Cyprus. Tel.: 051-65246.
ANCHORAGE: No specific boundary but ships usually anchor about 0.5 mile S.E. of lighter basin entrance where depth is 8 fathoms.
RESTRICTIONS: See "Max. Size" and "Berthing". Rise of tide up to 1.5 ft.
MAX. SIZE: *Old Port:* Vessels berthing must not exceed 265 ft. LOA and 14 ft. draft.

New Breakwater Port: Depth alongside 11 m. Max. draft 10.5 m. No LOA limit on ships entering and berthing. The height of quay above sea level is 2.30 m.

HEALTH: Pratique is required at first Cyprus port of call only. Pratique is granted either before or after berthing as appropriate.
RADIO: Cables sent through "Cyprus Radio", call sign: 5BA.
RADAR/VHF: No port radar service. Port Manager and Pilots equipped with VHF radiotelephone operating on Channels 16 and 14 during office hours only.
TUGS: Port Authority tugs join vessels outside breakwater using ships' lines.
BERTHING: Vessels may berth inside port between 0600 hrs. and sunset, but may unberth and sail until midnight. Cargo vessels are allowed to berth during night-time provided berth space is available and vessels will immediately operate with at least 1 gang. Quay length available 800 m.
CRANES: Floating crane with capacity of 60 tons at 22 m. and 15 tons at 30 m. Luffing Crane on rails with maximum capacity of 35/5 tons at 26/30 m. 16 mobile cranes 3 to 16 ton. 6 straddle van 4 carriers.
STEVEDORES: 24 hours notice of ETA to Agent is required to enable him arrange gangs.
MEDICAL: It is necessary for Agent to receive advance notice of at least 2–3 hours before vessel's arrival. Hospital facilities constantly available. Smallpox vaccination is necessary; other inoculations or vaccinations are required according to prevailing circumstances.
TANKERS: Not allowed to berth in the port. No slop discharge facilities.
FRESH WATER: Facilities available on quay.
FUEL: 12 hours' advance notice is required. Available in unlimited quantities.
FIRE PRECAUTIONS: No tankers are allowed in the port. Vessels and operations must comply with internationally applicable regulations concerning explosives and dangerous goods.
CONSULS: Belgium, Holland, Italy and France.
REPAIRS: A floating dock 66 m. long and 18 m. wide capable of lifting a 1,200 tons light ship is in operation.
SURVEYORS: Lloyds, Bureau Veritas, Registro Italiano Navale, Germanischer Lloyd.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCES: 50 grams tobacco or 40 cigarettes, and 0.25 litres spirits, 0.25 litres wines, per man per day.

For reasons of administrative convenience, issues of high duty goods for use by crew on board will be made every 3 days, beginning with the first day of the ship's arrival in Cyprus waters. For each member of the crew (other than the Master, the Chief Officer and the Chief Steward) each issue will consist of, 120 cigarettes or an equivalent quantity of other tobacco goods, 1 bottle of spirits and 3 bottles of wine. Each issue for the Master, the Chief Officer and the Chief Steward of ocean-going vessels will consist of: 200 cigarettes, 2 bottles of spirits and reasonable quantity of wine they may request. Concessions to crew landing from ship. On coming ashore, for a short period, 50 grams of tobacco, or 40 cigarettes per day or part thereof.

CARGO GEAR: Load or discharge may be effected either by ship or shore gear. 35 tons heavy lift crane and 60 tons floating crane available.
REPATRIATION: Facilities suitable for effecting crew changes and arranging any necessary repatriations. Usually arranged with Agent.
AIRPORT: Larnaca International Airport served by regular lines, situated 43 miles from Limassol.
TIME: GMT plus 2 hours. Permanent.
HOLIDAYS: Every Sunday; 1st January; 6th January; 25th March; 1st May; 28th October; 29th October; Good Friday; Easter Monday; First Day of Kurban Bairam; Birthday of Prophet; First Day of Ramazan Bairam; Christmas Day; Boxing Day. Work can be arranged on any holiday other than New Year's Day, Christmas Day, and Easter Sunday.
POLICE/AMBULANCE/FIRE: Tel: Police 63171; Ambulance 63111, Fire Brigade 71939 or 999.
TELEPHONES: Available on request, for placing on board.
SERVICES: Compass adjusting, servicing of radar, R/T, echo sounders.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore leave passes are issued. Seaman's Book or Passport required whilst ashore.
REGULATIONS: Port Manager's permission is required for: immobilising engine, cleaning or repairs whilst vessel alongside quay, lowering lifeboats and use of ship's radio. Port and Customs clearance required before departure. Cyprus flag to be hoisted on mast from 0800 hrs. to sunset. Landing of dogs or other animals not allowed; also discharging of fruits, vegetables and eggs unless authorised by Produce Inspection Office. Disposal of garbage and waste strictly prohibited both in port and Cyprus waters.
DELAYS: According to prevailing circumstances but normally no delays.
DEVELOPMENT: Extension of quay length by 480 m. Specialised ro-ro and container berths. Additional 30,000 sq.m. of paved open stacking area and additional 90,000 sq.m. of paved container yard. Additional 25,000 sq.m. of closed storage space. New passenger terminal. New administration building.

The above development with the exception of 17,000 sq.m. of closed storage space, which will be completed by the end of 1978, will begin in 1979.

GENERAL: Weather conditions permit entrance and working of ships all the year round.
AUTHORITY: Port Manager, Cyprus Ports Authority, Limassol.

MONI: 34.42 N. 33.11 E.

PILOTAGE: Pilots available from Limassol.
RADIO: Communication between ship and shore by Walkie-Talkie after berthing.
BERTHING: *Electricity Authority of Cyprus:* Buoy berth for oil. Min. depth of water 18.29 m. One pipe-line. Position of buoys 34° 41′ 50″ N., 33° 10′ 36″ E.
Cyprus Cement Factory: Depth of water 9.75 m. One pipe-line. Position of buoys, 34° 41′ 50″ N., 33° 10′ 36″ E.
FRESH WATER: By barge from Limassol, rate 10 t.p.h.

VASSILIKO BAY: 34.43 N. 33.19 E.

LOCATION: 13.5 miles due East of Limassol on South coast of Cyprus, and 1.5 miles West of Zyghi.
PILOTAGE: Company's Pilot available for berthing and shifting operations.
PYLON: The pylon, diameter of 34 ft. fitted with mechanism which enables buckets conveying ore along ropeway, to be emptied automatically through a chute into holds of ships.
MAX. SIZE: Ore carriers of 12,000 d.w.t. and over can be accommodated. Max. permissible height of ship between sea level and top of hatches (vessel in full ballast) 25 ft. Max. length 450 ft. Max. beam 60 ft.
BERTHING: Depth of water at pylon 30 ft., but if necessary ships may berth further out where depth 31–32 ft. In such cases, double chute used. Height of articulation of chute 49 ft. above sea level; height of unloading tip varies according type chute used. Bottom of sea near pylon, sandy.
LOADING: Loading of ores (pyrites and gypsum-rock) effected through an aerial maritime ropeway line, which starts at a point close to the shore and extends over a distance of 1,750 ft. in the sea to a reinforced concrete pylon. Ropeway cables supported at 3 intermediate points by steel trestles.
CAPACITY: Installation has loading capacity of 3,500/4,000 tons pyrites and 2,500/3,000 tons gypsum rock per 24 consecutive hours; electrically operated and all ores automatically weighed at loading point by means of electric Avery machine.
TANKERS: One pipe-line to buoy berth, depth of water, 12.19 m. Position of buoys, 34° 42′ 42″ N., 33° 18′ 42″ E.
FRESH WATER: By barge from Limassol.
HOLIDAYS: All weekends and 18 days throughout the year.

NOTES

Please also advise Shipping Guides Ltd.

Denmark

GENERAL: A routing system has been established, so ships with a draft up to 17 m. (55.77 ft.) can pass the Great Belt. Ships bound for the Baltic are restricted to a draft of 15 m. (49.21 ft.) owing to shallow waters N.E. of Gedser.

For the passage through Danish waters by ships with a d.w.t. of more than 40,000 tons or with a draft of 13 m. or more, we would like to draw your attention to the "IMCO–recommendation of Nov. '75 on navigation through the entrances to the Baltic Sea", and to the radio reporting system established by the Danish Ministry of Commerce.

AABENRAA: 55.05 N. 09.25 E. (See Plan Book)

DOCUMENTS: See "Kalundborg".
PILOTAGE: Telegraphic address: "Pilot – Aabenraa". Short notice about 2/4 hours – VHF Channel 16. Small red motor-boat flying International pilot flag. Normally located middle of Aabenraa Fjord. On request Pilot comes aboard vessel between buoys 3–4, way 25.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.
ANCHORAGES: Aabenraa Fjord or road. Depths: about 75/80 ft.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Length and breadth no restrictions. Draft limit: max. 36 ft. at Aabenraa, max. 32 ft. at Ensted Harbour (Power Station). Also see "Ensted". No tide – occasionally low water of 3–5 ft. in heavy gales from West. Entry day or night.
HEALTH: Pratique granted by Customs Officers. In event of disease or fever on board, vessel's Agent to be informed before arrival.
RADIO: Blavand Radio or Lyngby Radio.
TUGS: Usually not necessary, but pilot boat may assist at reasonable rates.

Large vessels may require towage assistance on entering and leaving Enstedvaerkets Harbour, and in such cases a few days notice is required to call a Svitzer-tug.
BERTHING: Length of quays, 1,700 m. Depths 5.5 m. – 11.0 m. Two electric travelling cranes, capacity, 5 tons at 20 m. One stationary electric crane, capacity 20 tons at 4 m. from quay wall. One Coles mobile crane, capacity 11 tons at 3.05 m.
STEVEDORES: Stevedores informed by Agent.
MEDICAL: A few hours notice in order to arrange for doctor to come on board. Hospital in Aabenraa.
TANKERS: Diameter of discharge line: 10 in. 2 berths – draft Aabenraa berth 36 ft. – draft Power Station berth 32 ft., normal water level.
TIDE: No tide – vessels arriving and sailing by day and night.
FRESH WATER: Day and night from shore line, 10/15 t.p.h.
FUEL: All grades available. Minimum 24 hours notice.
OPENING/CLOSING HATCHES: Normally done by crew.
CERTIFICATES:
Tonnage Certificate.
Radio Certificate.
Load-line Certifcate.
Safety Equipment Certificate.
Deratting Certificate.
CUSTOMS ALLOWANCES: Tobacco, 100 cigarettes per man for 3 days. Wine and/or Spirits, 1 bottle spirit or wine per man.
IDENTIFICATION CARDS: Not needed.
CONSULS: German; Finnish; Norwegian; Swedish; British.
REPAIRS: Available.
DRY DOCKS: One dock – length 100 ft., breadth 54 ft., depths on blocks 12 ft., lifting capacity power 800 tons.
REPATRIATION: Facilities exist.
AIRPORT: About 30 km. Feeding line for Copenhagen – daily departure.
TIME: Local time is GMT plus 1 hour. No alterations to clocks.
POLICE/AMBULANCE/FIRE: Dial "000".
TELEPHONES: None available for placing on board.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Normally no delay except during severe Winters due to ice between mid December and end March.
AUTHORITY: Harbour Master.

AALBORG: 57.03 N. 09.55 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
Load-line Certificate. (All vessels over 150 GRT.)
Road Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or Exemption.
1 Crew List.
Stores List.
Crew Personal Effects List.
Cargo Manifest or Bills of Lading.
PILOTAGE: Compulsory at Hals Bar for ships drawing more than 5 m. Pilot boards at Hals Bar Light. Pilot boat equipped with VHF Channel 16. The Western entrance at Logstor is only navigable in daylight for vessels under 4 m. draft.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.
ANCHORAGE: Vessels may anchor in Limfjord or Aalborg Roads, depths 9 — 15 m.
RESTRICTIONS: The port is situated in Limfjord, 16 miles from entrance at Hals. Controlling factor is depth at Hals Bar. 9.5 m. MLW. Night entry permitted. Also see "General" before first port.
MAX. SIZE: Maximum draft for crossing Hals Bar 8.5 m.
HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival. When vessel arrives from port outside of Europe and U.S.A. and has been less than 14 days at sea, all crew members require valid smallpox vaccination certificates.
RADIO; Radio stations to be used: Skagen and Lyngby, Port Authority, Pilot station. Tugs and Bridges can be contacted on VHF Channel 16.
TUGS: Eight tugs available from 250 to 1,400 h.p. Not compulsory except through bridges for vessels over 1,500 d.w.t.
BERTHING: Aalborg on North and South sides of Limfjord. Total quayage 11.4 km., whereof public quays 10.1 km. All main quays suitable for vessels able to cross Hals Bar. Depths alongside 7.5 to 10.0 m.

Vendsysselvaerket power station wharf, depth 10.0 m.
Lindholm Pier Cement factory wharf, depth 7.8 m.
Rordal Cement factory wharf, depth 7.5 — 9.3 m.

BRIDGES: Two lift bridges cross Western end of Aalborg harbour. Horizontal opening 30 m. Only vessels bound for Lindholm Pier are affected.
MEDICAL: Doctors, hospital facilities available.
FRESH WATER: Supplied by pipe-line at all berths.
FUEL: All grades available.
DEVELOPMENTS: Aalborg has considerable areas under development for industry. In connection with this, preparations are being made for the building of new public harbour facilities. On the South bank of the fjord the Port Authority has available a 3.2 km stretch of coast with an area of approx. 200 hectares. This area is in connection with a new industrial and residential district of approx. 400 hectares. According to present plans approx. 7,000 m. of new quayage can be built here. Investments are estimated at 300 mill. Kr. Factories within the electronic and textile sectors are already established here and a continuous expansion goes on. On the site a special harbour with a quayage of 660 m. and with facilities for unit load ships as well as conventional cargo ships, with warehouses and administration blocks etc. was constructed during 1972 as base port for the Royal Greenland Trade Department's routes calling at all ports in Greenland. Enterprises undertaking construction, repairs and maintenance of oil rigs etc., for offshore activities have also settled on this site. On the North bank of the fjord East of the existing harbour areas approx. 140 hectares have been laid out as a new harbour and industrial area. This area has coast length of approx. 3.5 km.
DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally by crew with assistance of stevedores.
IDENTIFICATION CARDS: Not required.

POLICE/AMBULANCE/FIRE: Tel. 000
TELEPHONES: Installed by request at certain quays.
SHORE LEAVE: No restrictions.
AIRPORT: Situated 3 miles from town centre.
AUTHORITY: Aalborg Havnevaesen.
AGENT: Chr. Jensen, Soeborg & Benthin's EFTF. Slotsgade 35, PO Box 160, 9100 Aalborg. Telex 69735. Cables "Soeborg". Tel. (08) 122566.

ARHUS: 56.09 N. 10.13 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Derating Certificate.
Load Line Certificate (all vessels above 150 g.r.t.).
Radio and Equipment Security Certificate (all cargo vessels on 500 g.r.t. and above).
Customs Passport from last port of call.
Spirits and Tobacco List specifying stock in hand for ship and crew.

PILOTAGE: Not compulsory. Harbour Pilot normally boards 1-2 miles outside port.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.

ANCHORAGE: Anchorage in roads – good holding ground. Nature of bottom: clay.

RESTRICTIONS: No restrictions. Night entry permitted. Also see "General" before first port.

MAX. SIZE: Oil port 36 ft. General cargo port up to 33 ft. Container terminal up to 36 ft. No tide.

HEALTH: Necessary formalities carried out by customs on arrival.

RADIO: Radio stations to be used: Skagen and Lyngby. Pilot station and tugs can be contacted on VHF Channel 12 and 13 – emergency 16.

TUGS: Call by VHF.

CARGO HANDLING FACILITIES: 9 cranes for coal, fertilisers, sulphur, ore, etc.; max. capacity per crane, 120 t.p.h. 10 cargo handling cranes up to 2.5 tons and 9 cranes up to 5 tons. One floating crane up to 20 tons and 3 mobile cranes up to 4 tons.

Container Terminal: Min. depth of water 10 m. (33 ft.). Total quay length 816 m. (2,677 ft.). 1 cargo handling and container crane up to 50 tons. 2 gantry container cranes up to 40 tons. Fork lifts up to 32 tons.

Roll-on/roll-off: 2 moveable and 3 solid roll-on/roll-off berths. Fork lifts up to 32 tons. Several berths for liquid chemicals and LPG carriers.

Private Cranes: 4 travelling cranes on carriage bridges for handling of coal, coke, fertilizer, and broken stone, etc., capacities 5–7.5 tons. 3 travelling cranes on fixed bridges for handling of sand, stone and gravel, etc., capacities 2.5–3.3 tons. 2 travelling cranes on carriage bridges for handling of general cargo, capacity 1.5 tons.

Private Suction Plants, etc.: 4 grain suction plants, capacities of 60–100 t.p.h. 1 grain elevator, capacity of 35 t.p.h. 2 grain loading pipes. 6 cup elevators for copra and soya beans (80 t.p.h. each). 4 suction elevators for copra and soya beans (125 t.p.h. each). 1 loading pipe for copra and soya beans.

Arhus Stevedore Company: 2×40 ton, 2×30 ton, fork trucks with telescopic yoke for top lifting of containers. 1×32.5 ton, 1×23.5 ton, fork trucks with top lifting yoke for containers. 1×12.5 ton, 26×3–7 ton fork trucks. 5×3 ton electric pallet lifters. 5 shovel trucks for stowing. 7 terminal tractors with Appurtenant swan's necks. 18 terminal carriages.

STEVEDORES: Available. Ordered by Agents.

Normal working hours: Mondays/Fridays 07.00–16.30 hrs. Work on Saturdays, Sundays and Holidays is on full overtime terms only.

Meal hours: 08.30–09.00 and 12.00–13.00 hrs.

Shifts: Labour can be employed Mondays/Fridays at 07.00 hrs. and at 10.00 hrs., although the 07.00 hr. shift is by far the best supported.

On Fridays and on a day preceding a holiday labour can also be employed at 13.00 hrs. (for overtime work generally).

Furthermore labour can be transferred from a completing vessel to another job within normal working hours provided certain union regulations are observed. Crew is not allowed to load, discharge or run the winches under normal circumstances.

Overtime: Can be worked round the clock against overtime pay. The rates for the first 3 hours are plus approximately 50% and all following hours plus 100%.

First shift is from 07.00–21.00 hrs. and next from 21.00–07.00 hrs. the following morning.

Week-end work: Can be ordered as late as Friday 13.00 hrs. (deadline) but ordering during Thursday gives a far better position for making a good arrangement.

MEDICAL: All medical services possible. Call Pilots if medical attendance required aboard.

TANKERS: Discharge lines: 4 in., 6 in., 8 in. and 10 in. Quay 201–203, max. oil discharging 1,200 cu.m./hr. Quay 202 and 124, 1,000 cu.m./hr., and quay 120, 800 cu.m./hr.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: All grades available.

FIRE PRECAUTIONS: Tankers discharging: Fire watch. Special harbour fire fighting on tugs.

DEVELOPMENTS: In the Northern port there will be 36–39 ft. depth of water in the future. The newly started project for the new Eastern Division comprises of a land area of 45 hectares, 1,680 m. of quays and up to 39 ft. depth of water.

DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Normally by crew with assistance of stevedores.

IDENTIFICATION CARDS: Not required.

CONSULS: Belgium, Tel. (06) 13.18.55; Brazil, Tel. (06) 12.88.88; Finland (06) 29.21.00; France (06) 11.22.22; Germany (06) 12.32.11; Great Britain (06) 17.66.33; Greece (06) 13.06.55; Iceland (06) 13.40.00; Japan (06) 14.48.00; Netherlands (06) 12.81.88; Norway (06) 14.41.11; Spain (06) 15.57.55; Sweden (06) 27.32.33.

REPAIRS: Most repairs and overhauls possible. See "Dry Docks".

DRY DOCKS: Dannebrog Vaerft A.S. The shipyard possesses a large repair section and specializes, among other things, in extending ships and in undertaking comprehensive re-building. But all kinds of ships' repairs and overhauls of machinery are performed in its modern workshops. It employs a staff of 500–600, and it has recently invested in new cranes, floating docks, and workshops.

The yard's Dock I measures 141 m. and is 24 m. wide. Its capacity is ships up to 167.6 m. long, 22.8 m. wide, and with drafts of 5.8 m. and a maximum net weight of about 8,000 tons corresponding to a d.w.t. of about 16,000 tons. Dock II is 83 m. long and also 24 m. wide. Its maximum capacity is ships of 110 m., a width of 22.8 m., a draft of 5.8 m. and a maximum net weight of 4,000 tons corresponding to about 7,000 d.w.t.

There are also two minor slipways in the Port of Arhus, and the city possesses all sorts of service workshops which are available to ships needing installations or repairs of electronic or mechanical equipment in either the engine room, the catering department, or on deck.

REPATRIATION: Arhus Sofarts Service. Tel. (06) 19.13.33.

AIRPORT: 32 km. – 20 miles from port.

TIME: GMT plus 1 hour (permanent).

HOLIDAYS: 5 day week, but loading and discharging can be effected on Saturdays and Sundays on payment of overtime. See "Copenhagen".

POLICE/AMBULANCE/FIRE: Tel. "000".

TELEPHONES: At several piers.

SHORE LEAVE: No restrictions.

AUTHORITY: Port of Arhus Authority.

ASNAES: 55.40 N. 11.05 E.

PORT LIMITS: When boarded by Harbour Pilot at the Forth of Kalundborg; or when at anchorage at the Forth waiting for berth.

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Deratting or Exemption Certificate.
Construction Certificate.
Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage.
2 Crew Lists.
Tobacco and Spirit List covering all goods on board belonging to crew, officers, Master, ship's bar or passengers.
Cargo Manifest or Bill of Lading.

Smallpox: When a ship arrives from places outside Europe and USA, and it has been at sea less than 14 days, each member of the crew has to present a valid smallpox certificate to the authorities on arrival.

PILOTAGE: Pilotage not compulsory. Harbour Pilot boards at entrance of Kalundborg Forth; bigger ships usually take Pilot by Skaw lightvessel about 130 miles from Kalundborg. Skaw as well as Harbour Pilots listening on VHF Channel 16.

Pilots to be ordered by ETA-telegram to Agents at least 24 hours in advance.

ANCHORAGE: Large vessels anchor in 16 m. of water outside between Roesnaes and Asnaes; S.W. to N.W. winds cause swell, but holding ground is good.

RESTRICTIONS: No entry restrictions; arrival day and night and no tide with normal winds. Also see "General" before first port.

MAX. SIZE: Oilberth: depth alongside: 13 m. Coalberth: depth alongside: 11 m. Length of quay: 285 m.

HEALTH: No special restrictions as to free pratique, which will be granted by authorities on arrival, however, see "Documents", "Smallpox" – suspected disease or fever must be telegraphed to agents before arrival.

RADIO: Lyngby radio.

VHF: Channel 16 to pilot station (also Skaw Pilot).

RADAR: No radar installations.

TUGS: At Forth of Kalundborg – 2/3 miles from port – ships' lines to be used.

BERTHING: One oil berth: length 200 m. (a further length of ships at abt. 100 m. acceptable for berthing alongside the dolphins). Max. safe arrival draft: 41 ft. (12.5 m.), however, ships of more than 70,000 d.w.t. 40 ft. (12.19 m.) have berthed.

One Coal berth: length 285 m. Max. safe arrival draft: 35 ft. (10.67 m.). 4 cranes available.

DENSITY: Brackish – about 1011.

STEVEDORES: Private stevedores to be ordered through receivers – coal discharge rate per crane per hour: about 200 tons.

MEDICAL: All medical and hospital facilities available. No advance notice necessary.

TANKERS: 2 discharge hoses (a possibility of 3) of 8 ins. each. No slop facilities. Average discharge rate 3,000 t.p.h., max. back pressure 14 kg. Also see "Berthing".

FRESH WATER: Available by pipe-line at the berth. Rate 10 t.p.h.

FUEL: Available by barge or truck.

CONSULS: Swedish and Norwegian at Kalundborg. Others at Copenhagen.

REPAIRS: All types of smaller repairs can be carried out.
DRY DOCKS: No dry dock available.
SURVEYORS: Major Classification Societies represented in Copenhagen. 100 km. from Kalundborg.
GANGWAY/DECK WATCHMEN: Not recommended.
HATCHES: Opening closing hatches to be carried out by crew.
AIRPORT: Nearest at Copenhagen (100 Km.).
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits.
REPATRIATION: All repatriation can be arranged normally via Copenhagen 100 km. from Kalundborg.
TIME: GMT plus 1 hour. No alterations during the year.
HOLIDAYS: Saturday/Sunday normally no work, also no work on holidays declared as offical Danish holidays.
POLICE/AMBULANCE/FIRE: 0–0–0 all alarms.
TELEPHONES: No telephone connection on board.
SERVICES: No tank-cleaning facilities; all other services to ships can be arranged through specialists from Copenhagen.
SHORE LEAVE: No restrictions for shore leave.
IDENTIFICATION CARDS: No shore passes necessary.
AUTHORITY: Private port owned by: IFV Power Co., Hellerup. Local Office: Asnaes Power Station, Kalundborg.

BANDHOLM: 54.50 N. 11.30 E. (See Plan Book)

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Stores List.
1 Manifest or Bill of Lading.
PILOTAGE: Not compulsory. Pilot boards vessel at Sea Buoy off Vejroe from pilot vessel, hull painted green and "LODS" on each side of the hull. Pilot ordered through Agent, telephone 03–88 80 11 four hours prior arrival at Sea Buoy. VHF Channel 16. Telephone number of Pilot Station 03–89 49 75/03–89 41 52 day/night.
ANCHORAGE: Near Sea Buoy off Vejroe.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. length 330 ft. draft 17 ft. 6 ins.
HEALTH: Normal quarantine rules.
RADIO: Lyngby Radio or Kiel Radio.
TUGS: None.
BERTHING: Sheltered harbour with 366 m. of stone quays available and easily accessible. Depth of water at entrance 19 ft. Depth at old quays, 4.4 m. At new quay 244 m. there is 5.8 m. average depth. Electric coal crane to discharge 60 t.p.h with grab. Average daily rates: Coal and coke 500–1,000 tons. Grain elevator, loading or discharging capacity 110 t.p.h. storage capacity 25,000 tons.
STEVEDORES: Ordered by Agent. Working hours Monday to Friday 0700 – 1600 hrs. Saturday no work.
MEDICAL: Doctors, hospital facilities available.
GENERAL: Tide normally 1 ft.
FRESH WATER: Supplied from quay installations.
FUEL: Available.
OPENING/CLOSING HATCHES: Carried out by crew.
GANGWAY/DECK WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of wine and 1 bottle of spirit permitted out of bond for each man.
IDENTIFICATION CARDS: Not required.
REPAIRS: Small deck and engine repairs possible.
AIRPORT: Maribo Airport, about 15 Km. away.
TIME: GMT plus 1 hour.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Dial 0–0–0 and ask for Police, Ambulance or Fire Brigade.
TELEPHONE: Not available on board vessels.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.
AGENT: Alfr. Hovmand, Shipbroker, Havnepladsen 10, Bandholm, DK–4930 Maribo. Phone: 03–88 80 11. Telex: 40256 hoban dk. Cable: "Hovmand Bandholm".

COPENHAGEN: 55.42 N. 12.37 E. (See Plan Book)

DOCUMENTS:
1 Crew List.
2 Passenger Lists.
1 List giving stock of stores and provisions.

Customs officers bring form to be signed by Captain indicating that no epidemic diseases are on board. Formal Bill of Health signed by Danish Consul in port of departure is not necessary.
PILOTAGE: Telegr. address: Coppilot-Copenhagen. Tel. Tria 6700. Pilotage not compulsory. ETA: 1 hour. VHF Channel 16. Pilot boats blue with "LODS" on the side. Pilot flag "G" (white light) – VHF. Pilot comes on board at buoy No. 21 (Pilot for Drogden at the same place). Pilot boards by ship's ladder.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA–telegrams to Skawpilot Skagen, at least 12 hours in advance. Skawpilot listening on VHF Channel 16.
ANCHORAGE: Depth 11 m., 1 mile North of Middelgrund Port.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Limited by draft only. Depths in the port, 10 m.; in the Oil Harbour, 10.5 m.; at the Oil Pier, 12 m.
HEALTH: See "Documents". If fear of suspected disease or fever: yellow flag – VHF.
RADIO: Lyngby Radio: OXZ. VHF Channel 16 to all installations. ETA cables to Agents and receivers, preferably by Lyngby Radio.
RADAR/VHF: No port radar. VHF Channel 16. Port Radio Beacon 219.9 kHz.
TUGS: Towage not compulsory. Tugs join ships at entrance to port. Ship's hawsers only.
BRIDGES: Larger ships must take Pilot and tugs to pass the bridges down to the South Harbour.
The Knippelsbro and Langebro and Sjaellandsbroen will be closed experimentally for passage as follows:

	Knippelsbro/Langebro	*Sjaellandsbroen*
Monday – Friday	0001 – 0550 hrs. 0615 – 0655 hrs. 0735 – 0900 hrs. 1500 – 1800 hrs.	0001 – 0600 hrs. 0615 – 0655 hrs. 0735 – 0900 hrs. 1500 – 1800 hrs. 2000 – 2400 hrs.
Saturday	0001 – 0655 hrs. 0735 – 0900 hrs. 1200 – 1230 hrs. 1300 – 1330 hrs. 1800 – 2400 hrs.	0001 – 0600 hrs. 0615 – 0655 hrs. 0735 – 0900 hrs. 1200 – 1230 hrs. 1300 – 1330 hrs. 2000 – 2400 hrs.

U.S.S.R.
Venezuela
West Germany
REPAIRS: All types of repairs possible.
DRY DOCKS: Respective lengths, 787 ft. 5 in., 712 ft. 11 in. and 478 ft.
FLOATING DOCK: One of 7,000 tons capacity.
SLIPWAYS: 4 from 120 ft. to 280 ft. length.
REPATRIATION: Facilities exist for changing crew and arranging any necessary repatriation.
AIRPORT: 6 miles from centre. Direct lines for all parts of the world.
TIME: GMT plus 1 hour. No change.

HOLIDAYS: New Year's Day (January 1); Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day (December 25); Boxing Day (December 26).

Half holidays: Labour Day (May 1); Constitution Day (June 5); Christmas Eve (December 24).

Working hours: 0700-1630 with 2 half-hour meal breaks.

Saturday: All work performed at overtime rates.

Overtime work on Saturday and Sunday should be ordered by 1130 hrs. on Friday.

The working hours vary slightly from port to port as some start at 0730 hrs. and others at 0800 hrs., but a 42.5 hour week is common to all.

POLICE/AMBULANCE/FIRE: Call "000".

TELEPHONES: In many berths telephones can be placed on board ships.

GENERAL: Customs Authorities supervision of ship's provisions and bonded stores is carried out in the Free Port in the same way as in Customs Port. In this connection the Free Port is no Free Port.

SERVICES: All services available (tank cleaning, discharge of tank washings, compass adjusting etc.).

SHORE LEAVE: No restrictions.

AUTHORITY: Port of Copenhagen Authority.

ENSTED: 55.05 N. 09.25 E. (See Plan Book)

Also Refer to "Aabenraa"

DOCUMENTS: See "Kalundborg".

PILOTAGE: See "Aabenraa".

ANCHORAGES: See "Aabenraa".

HEALTH: In event of disease or fever on board, vessels Agent to be informed before arrival.

RADIO: Blaavand or Lyngby radio.

TUGS: Large vessels may require towage assistance on entering and leaving Ensted Harbour. A few days notice is required to call a Svitzer tug.

BERTHING:

Oil Terminal: Largest vessels which can be accommodated at the oil pier: (Berth No. 1).

Length overall	350 m.
Beam	no limits
Water depth	18 m.
Bow/centre	165 m.
Max. height water-level/manifold	26.5 m.

Coal Terminal: Largest vessels which can be accommodated at the deep sea coal berth:

Length overall	300 m.
Beam	no limits
Water depth	16 m.
Discharging facilities for coal: 2×20 ton unloading cranes.	
height from normal water level to lower edge grabs	22 m.
outlay of cranes from the quay side to centre grab	30 m.

STEVEDORES: To be informed by Agent.

MEDICAL: A few hours notice required to arrange for doctor to come on board. Hospital in Aabenraa.

TIDE: No tide – arriving and sailing day and night.

FRESH WATER: Fresh water from shore line 5 t.p.h.

FUEL: Not available.

OPENING/CLOSING HATCHES: By crew.

TELEPHONES: Available for placing on board.

AGENT: Aabenraa Shipping Agency ApS., Kilen 29, DK 6200 Aabenraa Telex 52160 – Telephone: International 4-62-77-00.

ESBJERG: 55.28 N. 08.26 E. (See Plan Book)

DOCUMENTS: Tonnage certificate, certificate of nationality, trade certificate, de-ratization certificate, and ship's manifest.

PILOTAGE: Advance notice of 3 hours prior to ETA "Graadyb Barre" is required; this may be done via Blaavand Radio. Alternatively, Port Authority's VHF may be used. Watch is kept on Channel 16. Telegraphic address is "Pilotstation Esbjerg". Pilot vessel is a 71 g.r.t., stationed in the Port of Esbjerg, it is furnished with VHF, Channel 16. Vessel carries signals prescribed. Pilot to be taken on board outside Graadyb Barre, at buoy "O". Vessels awaiting Pilot or high tide may anchor between buoys "1" and "Graadyb 0".

Pilotage is not compulsory except for tankers over 500 d.w.t. and when tugs are assisting in berthing.

ANCHORAGES: There are anchorage areas North West of buoy "Graadyb" (depth 35 ft. at MLWST).

RESTRICTIONS: Normally not sufficient ice to impede navigation. No ice dues charged. Also see "General" before first port.

MAX. SIZE: Length and breadth: no restrictions. Draft 30 ft. – 31 ft. Entry to port is through a dredged channel, width 200 m., depth 9.30 m. at MLWST.

RADIO: Blaavand Radio, call sign OXB.

TUGS: Tugs join vessel at Esbjerg Roads. Ship's own hawsers must always be used. 4 tugs available of 700, 1,500, 1,900 and 2,100 h.p.

BERTHING:

	Approach at MLWST.	Berth at MLWST
Trafikhavn	31 ft.	22 ft.–35 ft.
Foergehavn	28 ft.	22 ft.
Outer Foergehavn for Roll-on/Roll-off vessels	28 ft.	28 ft.
Dokhavn	22 ft.	22 ft.
Englandskaj	31 ft.	22 ft.
Osterhavn	31 ft.	22 ft.
Osterhavn – New Berth (when entering max. draft 30 ft.–31 ft. LOA 705 ft.)	31 ft.	35 ft.
Sonderhavn	31 ft.	22 ft.–31 ft.
Fishery Harbour – Consumption	15 ft.	15 ft.–17 ft.
Fishery Harbour – Industrial Fish	17 ft.	17 ft.–18 ft.

CARGO HANDLING: The port of Esbjerg has no specially equipped berths besides the tanker berths and container terminal for lift-on/lift-off, but private companies own suction plants for discharge/loading of feeding stuffs. Furthermore, mobile cranes also with grabs and stationary coal cranes are available. Container terminal for roll-oh/roll-off. Vessels with own gear can however be handled successfully, at different berths. 12 mobile cranes, capacity between 8 and 110 tons, 78 forklift trucks, capacity between 4 and 34 tons. There is also 1 stationary crane, capacity 35 tons.

STEVEDORES: Gangs are mustered daily at 0700, and 1000 hrs. ETA should be given to above hours to ensure that gang(s) are available on arrival. Working hours are from 0700 to 1630 and meal hours are 0830–0900 and 1200–1300. No work on Saturdays. Overtime can be arranged.

MEDICAL: Medical attention can be arranged at any time. Modern hospital facilities available.

TANKERS:

Trafikhaven: Depth in approaches to oilberths in Trafikhavn MLWST 31 ft. (MHWST 36 ft.)

Old Oilberth No. 101: Depth alongside old oilberth No. 101 MLWST 22 ft. (MHWST 27 ft.)

New Oilberth No. 102: Depth alongside new oilberth No. 102 MLWST 25 ft. (MHWST 30 ft.)

During time alongside these berths, vessels can touch bottom, which is soft and muddy. Largest vessel berthed had a LOA of 621 ft. A tanker with a LOA of 560 ft. has berthed at No. 101, and simultaneously another tanker with a LOA of 600 ft. has berthed at No. 102. The length between the outer point of No. 101 and the opposite outer point of No. 102 is 1,200 ft.

Osterhavn: Depth in approaches to oilberth in Osterhavn MLWST 31 ft. (MHWST 36 ft.). Max. length 564 ft., max. draft 30 ft. 6 in.

Powerstation Vestkraft No. 506: Depth alongside Powerstation Vestkraft No. 506 MLWST 35 ft. (MHWST 40 ft.).

Under normal weather conditions Pilot states to be able to berth tankers with a LOA of maximum 705 ft.

FRESH WATER: Can be delivered at all berths. Capacity 20 t.p.h.

FUEL: All viscosities available by road tanker. Marine Gas Oil also by tanker vessel. 4 hours should be given, always during office hours.

FIRE PRECAUTIONS: A fire watch is necessary when loading/discharging oil and petrol, if flash point is under 50.

GANGWAY/DECK WATCHMEN: Watchman is not essential, but advisable.

OPENING/CLOSING HATCHES: This can be done by members of ship's crew, or by stevedores at an additional charge of 8%.

IDENTIFICATION CARDS: Advisable.

CONSULS:

CUSTOMS ALLOWANCES: Tobacco, 40 cigarettes per man/day. Wine and spirits, 0.25 litre per man/day.

REPAIRS: All types of deck and engine repairs can be effected.

DRY DOCKS: No dry docks, but slipways: Slipway No. 1 for trawlers, own weight max. 125 tons; Slipway No. 2 for vessels, own weight max. 160 tons; No. 3 – 500 tons; No. 4 – 750 tons.

REPATRIATION: Ample facilities for effecting crew changes and arranging repatriations.

AIRPORT: 8 km. from centre of town. Daily flights to Copenhagen.

TIME: Local time is GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year's Day (Jan. 1); Maundy Thursday; Good Friday; Easter Day; Day after Easter Day; the 4th Friday after Easter; Ascension Day; Whit Sunday and Whit Monday; Christmas Day and Boxing Day. Permission to load/discharge on these days obtainable.

POLICE/AMBULANCE/FIRE: In case of emergency, dial "000" and ask for: Brand (fire), Politi (police), or Ambulance. Regular Tel. numbers are: Police 12 46 66; Ambulance and Fire Dept. (Falck/Zonen) 12 82 99.

TELEPHONES: Not possible to have telephones installed on board.

SERVICES: No tank-cleaning equipment available. For discharge of tank washings apply to Port Master's Office, Tel. 12 92 00. Compass adjusting can be effected.

SHORE LEAVE: Normally granted.
DEVELOPMENTS: Extension of the Harbour towards the East, and modernization of Trafikhavn and Sonderhavn.
AUTHORITY: Port of Esbjerg Authority.
AGENT: J. Lauritzen EFTF., Vestkraftkaj. P.O. Box 100, DK-6700 Esbjerg. Tel. (45-5) 123133. Telex 54133 and 54155. Cables "Lauritzen".

FREDERICIA: 55.35 N. 09.46 E. (See Plan Book)

DOCUMENTS:
1 copy Bill of Lading for all cargo (manifests are not required).
1 copy Manifests for Dangerous Cargo.
2 copies Crew List.
2 copies List of Dutiable Goods.
2 copies Stores Lists.

PILOTAGE: Three Pilots available for docking purposes and for through traffic to any place in Denmark or the Baltic. Pilots have a 24-hour watch and are located on the top floor of the KFK grain silo in the West Harbour. Can be contacted day or night over VHF radio Channel 16, working 12 and 13, or Tel. 05-920959. Pilotage is compulsory for tankers carrying chemicals or LPG and for all other tankers above 2,500 d.w.t.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.

ANCHORAGE: To avoid hindrances to docking or undocking ships, ships of over or about 4,000 d.w.t. are requested to anchor off Trellenes. Smaller ships will find good anchoring conditions in Mollebugten.

RESTRICTIONS: Day and night entry possible, least depth in the approach channel is 15.0 m. Also see "General" before first port.

MAX. SIZE:

	Max. draft acceptable
Kastels Harbour	11.70 m.
Old Harbour	5.30 m.
Shipyard Harbour	2.80 m.
Dock Entrance	4.60 m.
West Harbour	8.70 m. to 6.70 m.
Moellebugt Harbour	9.70 m. to 8.70 m.

Also see "Tankers".

HEALTH: See "Copenhagen".
RADIO: VHF Channel 16.
TUGS: Tugboats from Switzer's Salvage Enterprise is stationed in Fredericia, but any amount of tugs are available, when ordered previously.

BERTHING:
Mollebugt Harbour: Quays Nos. 24 & 25 Length 250 m., depth 9–10 m.

Facilities for container traffic and Ro/Ro traffic. 40-ton gantry crane. 3 mobile cranes, capacity 6 to 25 tons. Railtracks. Facilities for temporary storage of goods. Modern quayside warehouses.

Gas, Oil & Chemicals Harbour: Quays Nos. 18, 19, 20, 22 & 23 for tankers. Quays Nos. 18 & 19, length 90 m., depth 7 m. in berth. Equipped for loading and discharging gas tankers.

Quay No. 20 – Jetty I. 15 m. depth in berth. Hydraulically operated hose handling gear for discharging petrol and oil products. 10 in. and 12 in. ASA. Connection range between + 0.4 and 18.5 m. above MWL.

Quay No. 22 – Jetty II. 11 m. depth in berth. Equipped for discharging petrol and gas products and bitumen. 6 in. and 8 in. hoses and 6 in. marine hose handling gear.

Quay No. 23 – Jetty III. 7.5 m. depth in berth. Equipped for discharging liquid chemical products. 4 in. DIN hoses.

West Harbour: Quays Nos. 13 to 17. Length 670 m., depth 7–9 m. in berth.

Cranes with grab and hook. 2.5 to 25 ton suction plant* available for discharging feedstuffs – max. capacity: 80 t.p.h. Railtracks. Facilities for temporary storage of goods.
Modern quayside freezing and storage facilities.

Shipyard Harbour: Quays Nos. 8 to 12. Length 500 m., depth 5.0–6.5 m. in berth. Modern repair and equipment piers with workshops. Slipways available for 75-ton and 1,000-ton light displacement. Floating dock 64 m. × 12.5 m. max. capacity: 700-ton light displacement. Dry dock facilities 108 m. × 22 m., 5.1 m. access depth. Average docking/sailing time: 45 mins.

Old Harbour: Quays Nos. 6 & 7. Length 200 m., depth 5.6–7.5 m. in berth. Mobile cranes, capacity: 6 to 25 tons. Suction plant* available for discharging grain – max. capacity 60 t.p.h. Facilities for discharging liquid chemical products. Railtracks. Facilities for temporary storage of goods.

Kastels Harbour: Quays Nos. 1 & 2. Length 450 m., depth 12 m. in berth. Mobile cranes, capacity: 6 to 25 tons. Discharging facilities for bulk fertiliser* – max. capacity: 250 t.p.h. Grab crane* – max. capacity: 300 t.p.h. Siwertell worm conveyor – max. capacity: 400 t.p.h. Railtracks. Facilities for temporary storage of goods. Preference for vessels destined for the Superfos Company.

* Private.

CARGO HANDLING FACILITIES: The Port possesses all types of modern facilities for loading and discharging. Crane facilities include a 40-ton gantry crane, a grab crane with a max. capacity of 300 t.p.h. and a number of grab and hook cranes and mobile cranes with capacities ranging from 2.5 to 25 tons. There are ample facilities for container and Ro/Ro traffic. The suction plant* is capable of handling up to 80 t.p.h. and the Siwertell worm conveyor equipment* has a max. capacity of 400 t.p.h. In addition, there are modern facilities for handling liquid chemicals, gas, petrol and oil products and bitumen. There are also facilities for handling fertiliser* – max. 250 t.p.h. The Port has a rail network freeze/cold stores*, approximately 6,000 sq.m. modern warehouse space and ample facilities for temporary quayside storage.

* Private.

STEVEDORES: Ordinary working hours Monday to Friday: 0700-0830, 0900-1200, 1230–1600 hrs. Night gangs on week days must be ordered no later than 1230 hrs. the same day. Working overtime weekends is possible, but gangs must be ordered no later than Friday 1230 hrs. Average output per 8-hour day, loading or unloading general cargo, is 200 tons per gang.

MEDICAL: Hospitals available.

TANKERS:

Jetty I – Chicksan arms – for vessels discharging bitumen and other special products, and for loading fuel-oil, gas-oil, gasoline, diesel fuel, and LPG.

Jetty II – Curacao hosehandling gear – for vessels discharging crude, fuel-oil-handling subject to size of vessel.

Pilotage: Pilotage is compulsory for tankers carrying chemicals or LPG, and for all other tankers above 2,500 d.w.t.
Dirty Ballast Reception: Oily ballast reception facilities available – maximum quantity 5,500 cu.m.
Restrictions: Height from normal water level to hose connections must not exceed 15.90 m. during discharging and ballasting.
Communication: The port is equipped with VHF station – Channels 16, 12 and 14.

FUEL: Available.
FRESH WATER: Available ex wharf. Rate 10–50 t.p.h.
DEVELOPMENTS: Plans to build an ocean berth in the Mollebugten just West of pier 22. The ocean berth will be 350 m. long and have a depth of 12 m. Part of the New Harbour is ready – See Plan.
GANGWAY/DECK WATCHMEN: Available upon request.
OPENING/CLOSING HATCHES: Stevedores or crew.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Radio Safety Certificate.
International Safety Certificate.
Deratification Certificate.
CUSTOMS ALLOWANCES: See "Copenhagen".
IDENTIFICATION CARDS: Required.
CONSULS: Finland, France, Holland, Iceland, Norway, and Sweden.
REPAIRS: All repairs undertaken with modern equipment.
DRY DOCKS: Length 354 ft., breadth 72 ft. Max. depth at Dock gate 16 ft. 06 in. Slipway available for ships up to 1,000 tons, light displacement (divers available).
AIRPORT: At Billund and Beldringe 35 miles from Fredericia.
REPATRIATION: All facilities exist.
TIME: GMT plus 1 hour. No change.
HOLIDAYS: See "Copenhagen".
POLICE/FIRE/AMBULANCE: Police 921577; Ambulance 924000; Fire 921573; Emergency 000.
TELEPHONES: Both oil piers have telephones in the watchmen's room but for local calls only.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

FREDERIKSHAVN: 57.28 N. 10.33 E. (See Plan Book)

DOCUMENTS: Ship's papers, 2 Crew Lists, 1 Passenger List, 2 Bills of Lading, 1 Manifest, 1 Customs declaration of tobacco and spirits for Officers and crew, 1 Customs declaration (TOLDPAS) if arrived from port in EEC or Scandinavia.

PILOTAGE: Call the Pilot either over the coast radio station "Skagen Radio", call sign "OXP", telephone 426532 or direct by VHF Channel 16. Pilot outside the harbour boards at the buoy 1.7 miles S.E. of the harbour entrance. The pilot boat is a little red painted motorboat. ETA required as soon as possible, minimum 3 hours.

ANCHORAGE: In the roads South of the red leading lights in 10 m. water depth. Good holding ground. At the entrance to the fishing harbour between the pierheads for a width of 50 m. on each side of the heads, anchoring is prohibited (submarine cable).

RESTRICTIONS: Vessels coming from or entering the naval base and the fishing harbour must wait for ships entering or leaving the commercial harbour. Maximum speed Frederikshavn L/B – to harbour 12 knots, in outer basin – 7 knots, Harbour – 3 knots. Entering the Naval Base without special permission prohibited. Ships entering the harbour must if necessary wait outside for ships leaving the harbour. Also see "General" before first port.
MAX. SIZE: Max. length about 200 m., draft 8 m. at high water. At oil quay max. draft 8 m. at high water. Tide about 0.3 m.
HEALTH: Use international quarantine signals. If suspected disease or fever on board wire the Agent to arrange everything to obtain pratique as soon as possible.
RADIO: Nearest coast radio station "Skagen Radio", call sign "OXP". The harbour office is fitted with VHF Channels 16, 12 and 13. Watch kept day and night.
TUGS: Tugs join vessel outside the harbour between the buoy and the harbour entrance. Only the ship's line to be used.
BERTHING: No special requirement for berthing in the harbour, but several big ferries are running in and out during day and night and sailing after a time schedule. It is therefore recommended to call the harbour office, VHF Channel 16, for permission to enter.
BULK HANDLING FACILITIES: One grain berth, with 8 m. depth alongside, equipped with suction pipe capacity 60 t.p.h. approx.

Ferry berths in Harbour, depth 6.4 m. to 8 m., equipped for handling containers and roll-on/roll-off traffic.
TANKERS: Oil quay max. depth 8 m., Hoses 8 in. diameter. Reducing pieces may be necessary. Slop water discharging and cleaning can be done by oil-separator. Tankers draft max. 8 m. at high water.
DENSITY: 1,020 (approx.).
STEVEDORES: ETA advices are required before 0900 hrs. in order to arrange gangs for discharge/loading the same day.
MEDICAL: No special requirement is necessary for medical attention. The town has all ordinary medical and hospital facilities.
FRESH WATER: Supplied by water hydrants on all quays.
FUEL: All kinds of fuel are available and no advance notice is necessary.
FIRE PRECAUTIONS: No smoking and no open fire. If discharging oil, fire watchman from the Harbour Authority required. If discharging gas, dangerous chemicals and ammunitions, etc., beside the watchman, the Harbour Authority will require restricted access to vessel.
GANGWAY/DECK WATCHMEN: Not compulsory but available if required.
OPENING/CLOSING HATCHES: Ship's crew open and close the hatches. If necessary the longshoremen can do it for extra pay.
CUSTOMS ALLOWANCES: Only for ships coming from abroad – 0.25 litre wine and 0.25 litre spirits, 40 grams tobacco or 40 cigarettes per man per day and only 3 days ration in one time. On requirement after that, the Master can obtain a new allowance in proportion to the stay in harbour.
CONSULS:

Sweden	Tel. 08-422922	Germany	Tel. 08-420011
Norway	,, 08-420900	France	,, 08-422299
Finland	,, 08-421044		

REPAIRS: Three steel shipyards and one wood shipyard doing all kinds of repairs.
DRY DOCKS: Four dry docks, two floating dock and two small slips. Dimensions of largest dry dock: length 195 m., breadth 32.2 m. and depth 7 m. Largest floating dock: length 129 m., breadth 28 m., depth 3.7 m., capacity 7.500 tons.
REPATRIATION: Agent will arrange repatriation. All facilities for changing crew.
AIRPORT: Aalborg Airport, 60 km's. from port, several daily flights to Copenhagen.
TIME: Local time GMT plus 1 hour.
HOLIDAYS: Weekends, Easter, Whitsun, Christmas, New Year and two Danish holidays in the Spring.
POLICE/AMBULANCE/FIRE: Police, Tel. 08-421444; Ambulance, Tel. 08-422222; Fire, Tel. 08-421444. in emergency dial 000.
SERVICES: Separating of slop water, compass adjusting, oil bunkering, repairing all kinds of navigation instruments and provisions.
SHORE LEAVE: After clearing inwards, crew members are allowed ashore without special permission.
AUTHORITY: Harbour Council

GULFHAVN: 55.12 N. 11.16 E. (See Plan Book)

Tanker discharge terminal operated by Gulf Oil Refining A/S.
DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio-telephone Certificate.
Derating Certificate or Exemption Certificate.
Exact list of tobacco, cigarettes and spirits showing the vessel's and the crew's supply on arrival.
Bill of Lading (if vessel is carrying cargo).

Copy of the crew list is required by Gulf Oil Refining A/S.
PILOTAGE: 2 Pilots and pilot vessel available. Pilot acts as Berthing Master; may be requested to board arriving vessels at either: Halsskov Lightship position 55° 20.1′ N. 11° 02.5′ E. or 2 nautical miles South of Halskov Lightvessel or any place in proximity of Gulfhavn.

Pilot vessel equipped with VHF following Channels: 6, 10, 12, 16 of which Channel No. 6 used for ship-to-ship communication. Pilot station at Agerso also equipped with VHF radio with following Channels: 12, 13 and 16. Pilot can be contacted at the station on Channel 16.

A vessel's ETA should be communicated by Master to Agent, 72, 48 and 24 hours prior to arrival. Agent will keep Refinery advised and make necessary arrangement with Pilot.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance. Skawpilot listening on VHF Channel 16.
ANCHORAGES:
Korsor: Roads: depth 20 m. (65.6 ft.). Bottom sand, good holding ground. Width of area about 2 square nautical miles.
Gulfhavn Roads: depth 30 m. (98.4 ft.). Bottom clay. Good holding ground. Width 0.5 nautical mile. Length 1.5 nautical miles.

Power cables running between Zealand and Agerso Island (marked on charts) must be avoided.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. draft at normal tide is 15 m.; safe draft is considered to be 14.3 m.
VHF: Call sign "Gulfhavn" Channels 12, 14 and 16, on 16, 24 hours a day.
TUGS: None available locally. If required 24 hours notice must be given. Pilot will advise if weather conditions demand use of tugs (in good time).
BERTHING: Oil pier is a T-shaped structure on which 4 berths provide – 1 berth for 100,000 d.w.t. tankers, 1 for 20,000 d.w.t. tankers, 1 for 5,000 d.w.t. tankers and 1 for smaller vessels up to 500 d.w.t.

Depths alongside:		
	Berth 1	15.0 m. (49.2 ft.)
	Berth 2	12.0 m. (39.4 ft.)
	Berth 3	7.5 m. (24,6 ft.)
	Berth 4	4.5 m. (14.8 ft.)

Adequate lifting facilities to assist in hose connecting and handling of necessary hose equipment should be ready on arrival. Refinery representative will board on arrival and discuss discharging/loading operation.

Berth No. 1

Berth 1 is equipped with mechanically operated Woodfield hose-handling structure. The booms are 12.2 m. (40 ft.) long. Berth No. 1 is primarily equipped for handling incoming crude, but can be used for other purposes (gasoils, intermediate and heavy fuels) when not being occupied by crude vessels.

The booms are arranged in the following sequence of product handling:

Boom No.	*Size of booms and contents*
1	10 in. Ballast water
2	12 in. Crude oil
3	12 in. Crude oil
4	12 in. Crude oil
5	8 in. Intermediate and heavy fuel (all grades)

The sequence is from South to North or from right to left as you face the shore.

The distance from Danish Mean Sea Level to the highest position of centre line of manifold is 17.0 m. (55.8 ft.).

In addition to the oil products handled on Berth No. 1 there are the following other connections on the pier:

Size of connection	*Contents*
6 in.	Ballast water
6 in.	Gas oil
6 in.	Intermediate and heavy fuel (all grades)
4 in.	Tetra methyl lead

Berth No. 2

Berth No. 2 is equipped with mechanically operated hose-handling structure (Woodfield). The booms are 9.1 m. (30 ft.) long.

The booms are arranged in the following sequence of product handling:

Boom No.	*Size of booms and contents*
1	10 in. Ballast water and crude oil
2	10 in. Intermediate and heavy fuel (all grades)
3	12 in. Intermediate and heavy fuel (all grades)
4	10 in. Diesel fuel
5	10 in. Diesel fuel
6	10 in. Gasoline
7	10 in. Gasoline

The sequence is similar to pier No. 1, i.e., South to North.

The distance from Danish Mean Sea Level to the highest position of centre line of manifold is 15 m. (49.2 ft.).

In addition to the oil products handled on Berth No. 2, there are the following other connections on the pier:

Size of connection	*Contents*
6 in.	Intermediate and heavy fuel (all grades)
6 in.	Gas oil
6 in.	Ballast water
6 in.	Stoddard solvent
6 in.	Naphtha
6 in.	Kerosene
6 in.	Gasoline

In addition to the oil products handled on Berth No. 2, Berth No. 3 and 4 can also handle L.P.G. (liquid petroleum gas) and Berth No. 4 solid sulphur product. All connections on Berth No. 3 and 4 are 6 in. Berth No. 3 also handles Bitumen (Asphalt).
MEDICAL: Hospital at Skelskor; Tel. Skelskor (03) 59 44 50.
DENSITY: Ranges between 1023 and 1007, dependent on season and weather conditions.
FRESH WATER: Available at all 4 berths. Limited to 160 tons. Supplied with a pumping rate of 45 t.p.h.

FUEL: Bunker fuel available at all 4 berths. 24 hours notice required.

FIRE PRECAUTIONS: The harbour is not equipped with fire-fighting vessel. Fire-fighting equipment is stationed on quay.

GANGWAY/DECK WATCHMEN: Available if required.

IDENTIFICATION CARDS: Required by crew.

CONSULS:

Finnish Consulate: (Mr. Axel Le Dous) Algade 14, Korsor, Tel. (03) 57 03 20.

Norwegian Consulate: (Mr. J. U. Jepsen) Jens Baggesensgade 35, Korsor, Tel. (03) 57 00 06.

Swedish Consulate: (Mr. Bjarne Fischer) Brogade 2, Korsor, Tel. (03) 57 00 02.

German Consulate: (Mr. Finn Poulsen) Batterivej 7, Korsor, Tel. (03) 57 05 86.

All other consulates are situated in the Copenhagen area.

REPAIRS: Small deck and engine repairs can be carried out.

REPATRIATION: Facilities exist via Agent.

AIRPORT: Copenhagen 120 km. away.

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police Skelskor (03) 59 61 00; Ambulance Skelskor (03) 59 47 07; Fire Refinery 00.

TELEPHONES: A public telephone box situated at entrance of pier outside cooling-water pumphouse. In addition temporary phones will be provided upon request at Berths 1 & 2. Billing will be handled directly by Agent.

SHORE-LEAVE: Allowed, but personnel not allowed to walk in refinery area. Transport will be arranged from ship to refinery entrance upon request.

AUTHORITY: Stigsnaes Toldkontrol.

HADERSLEV: 55.15 N. 09.29 E.

DOCUMENTS: See "Copenhagen".

PILOTAGE: Aarosund Pilot station.

ANCHORAGES: Aarosund.

RESTRICTIONS: Impossible to enter Haderslev by night since there are no lights in the fjord. Also see "General" before first port.

MAX. SIZE: Length 110 m.; width 17 m.; depth 4.9 m.

HEALTH: See "Copenhagen".

RADIO: Lyngby Radio.

TUGS: None available.

MEDICAL: Advance notice required if hospital facilities are required.

FRESH WATER: Fresh water from quay.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Carried out by the crew.

CUSTOMS ALLOWANCES: Tobacco (100 cigarettes per man per 3 days); wine/spirits (1 bottle per man per 3 days).

IDENTIFICATION CARDS: Not needed.

CONSULS: Swedish, French, Belgian.

REPAIRS: Small repairs available.

REPATRIATION: No facilities.

AIRPORT: 15 km. from Haderslev.

TIME: GMT plus 1 hour.

HOLIDAYS: Discharging can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 045 2 2525; Ambulance, 000; Fire, 000.

TELEPHONES: No facilities.

SHORE LEAVE: Allowed.

AUTHORITY: Harbour Master.

HELSINGOR (Elsinore): 56.02 N. 12.37 E. (See Plan Book)

DOCUMENTS:

1 Cargo Manifest.
2 Crew and Passenger Lists.
2 Tobacco Lists.
2 Stores Lists.
Measurement Certificate or Registry Certificate.

PILOTAGE: Call Pilot by hoisting Pilot Flag "G", or Morse signal "PT". Cable Address: "Helsingorpilot". Alternatively contact by VHF.

VHF Channel 16, Frequency 156,80 mHz (receiving frequency)
VHF Channel 13, Frequency 156,65
VHF Channel 12, Frequency 156,60

One hour's notice required before arrival at port. Pilot cutter, green hull, yellow superstructure, "Pilot" painted on superstructure. Boarding North of, South of and East of the port of Helsingor. Waiting area 0.5 mile South of the port of Helsingor. Helsingor Pilots are also sea Pilots for Kattegat, the Belts, The Orestraights and the Baltic.

ANCHORAGE: South of the port, in the roads of Helsingor, depths from 19 to 25 m. with sand or loose clay bottom.

RESTRICTIONS: Following signals are given from the lighthouse situated on the head of the Southern pier: prohibition to sail is signalled by red rapid flashes in the harbour direction and green flashes out towards the approaches. Entering and sailing prohibition is signalled by red rapid flashes both sides. "Vessels moving in the harbour" is signalled by yellow flashes out towards the approaches, yellow in towards the harbour. Ship departing waits for ship entering. When a vessel gives signal to enter (1 long whistle or blast) it is regarded as an entering vessel.

MAX. SIZE: Up to 26 ft. draft. Also see "General" before first port.

RADIO: Harbour Office of Helsingor call VHF Channel 16, shift to Channels 12 or 13 for working.

TUGS: Tugs come from Copenhagen at 2–3 hours notice.

BERTHING: Vessels berthed in order of arrival.

MEDICAL: Hospital and medical facilities available.

FUEL: Not available.

FRESH WATER: Approx. 30 tons of fresh water per hour delivered through 15 in. hoses at the berths.

WATCHMEN: Not required.

CUSTOMS ALLOWANCES: For use on board during call reasonable stores and other requirements will be approved by the customs. Following quantities allowed per man per 24 hours, not exceeding 3 days: 40 cigarettes or 10 cigars or 20 cigarillos or 40 grams other tobacco products, 0.25 litre wine and 0.25 litre spirits.

IDENTIFICATION CARDS: Crew need passports.

REPAIRS: Helsingor Skibsvaerft og Maskinbyggeri A/S are qualified to undertake all forms of repair work.

DRY DOCKS: Dock No. 1: 155 m. long, 20.5 m. wide, 6.6 m. depth. Dock No. 2: 116 m. long, 16.3 m. wide, 4.7 m. depth.

AIRPORT: 1 hour by car from Copenhagen International Airport.

TIME: GMT plus 1 hour.

HOLIDAYS: Work can be performed all the year round.

POLICE/FIRE/AMBULANCE: Police Tel. 03.21.14.48; Ambulance/Fire Tel. 03.22.31.31.

TELEPHONES: Telephones are only available on board in particular circumstances.

SHORE LEAVE: Crew are free to go ashore.

AUTHORITY: Harbour Master.

HORSENS: 55.52 N. 09.52 E. (See Plan Book)

DOCUMENTS:

Crew List (East European countries only).
List of Tobacco.
Manifest (for Agents and Stevedores).
Bills of Lading (for Agent's use).

Ship's papers:

International Load Line Certificate.
Certificate of Register (international letter of measurement).
Derating Certificate.
Radio Safety Certificate.

PILOTAGE: Pilot station is situated at Juelsminde.

VHF Channels 6, 12 and 16.

Advance notice of 2 hours required.

Normally pilot boat will be located South of Lillegrund – 55.43° N. 10.08° E.

ANCHORAGE: No special anchorages at the firth; vessels may anchor where safe navigation permits – attention is called to cable area at Hjarno Sound.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Max. length, approx. 500 ft.; max. breadth, approx. 70 ft.; max. draft, approx. 22 ft. A dredged channel 32 m. wide and 6.9 m. deep leads to the harbour.

HEALTH: Kindly inform Agent or Port Authorities in advance in event of any suspected disease or fever on board. Normally no necessary procedure to obtain pratique. Pratique is automatic after calling at another Danish port.

RADIO: VHF at Harbour office, Channels 9, 12, 13 and 16.

TUGS: Tug "Vitus" stationed in the harbour.

STEVEDORES: For working Monday morning ETA must be given Friday during office hours. Otherwise ETA must be given the day before work to commence. One suction apparatus for discharging grain. Normally the cargo is handled by shore cranes. There are 2 coal cranes and 5 piece-goods cranes available.

MEDICAL: No advance notice required. Hospital facilities available.

TANKERS: Discharge lines diameter: 6 in. and 8 in. Four berths for tankers, 1 at Esso with 5.6 m. of water alongside, 1 at DAK with 6.9 m. of water, 1 at KH with 6.9 m. of water and 1 at Nynas Johnson.

FRESH WATER: Delivered alongside from shore connections.

FUEL: All types of light fuel available.

GANGWAY/DECK WATCHMEN: No service of watchmen necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew, but can be done by stevedores.

CUSTOMS ALLOWANCE: Tobacco: 30 cigarettes per man per day – or 100 cigarettes permitted to be held out of bond. Wine and or Spirit: One bottle of each to be held out of bond.

IDENTIFICATION CARDS: Not needed.

CONSULS: Finland, 05-623433; Norway, 05-624666; Sweden, 05-624411; France, 05-623288.

REPAIRS: No shipyard – only small repairs can be carried out.

REPATRIATION: No special facilities for effecting crew changes exist.

AIRPORT: Distance from airport about 50 km., with regular airlines.

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Dial 0-0-0. Fire alarms placed around the port.

TELEPHONES: Not available on board vessels.

SHORE LEAVE: Allowed.

DELAYS: No delays can normally be expected. Larger ships with big draft may expect delay during nights with poor visibility. They have to wait for daylight in order to enter port through dredged channel.

AUTHORITY: Harbour Master.

AGENT: Wilh. Chr. Bech Rederi-& Skibsmaeglerforretning. Proprietor: O. H. Rasmussen, Jens Hjernoesvej 22, dk-8700 Horsens. Phone: 5–62 65 66. After office hours: 5–61 19 65 – 61 08 10 – 62 29 56. Telegrams: "Brokerbech". Telex: 61616.

KALUNDBORG: 55.41 N. 11.06 E. (See Plan Book)

OPERATORS: Dansk Esso A/S.

DOCUMENTS: Ship's Register

Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derating Certificate or exemption.
Bill of Lading (if cargo).
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply by arrival.

PILOTAGE: Not compulsory. Pilot station situated at Kalundborg, telegram: Kalundborg Pilot, tel. Kalundborg 03.51.08.89. Green plastic vessel carrying int. signal flag or lights for Pilot. Contact by VHF Channels 16, 12 and 6. Pilot is taken on board at the entrance of Kalundborg Fjord.

Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to "Skawpilot Skagen", at least 12 hours in advance, Skawpilot listening on VHF Channel 16.

ANCHORAGE: Large vessels anchor in 42 ft. of water outside between Rosnaes and Asnaes; S.W. to N.W. winds cause swell but holding ground is good. Small vessels anchor between Gisselore Point and Harbour. From where channel leads to harbour.

Tankers: The anchorage is approximately 4–5 miles W.N.W. of the oil pier. Particulars regarding the anchorage will be given by the Pilot.

RESTRICTIONS: Depth in channel and at entrance 39 ft. 4 in., entrance width 131 ft. Also see "General" before first port and "Tankers".

MAX SIZE: 900 ft. length. 38 ft. draft.

RADIO: *Arrival Message:* The Masters of crude or deep-sea vessels are requested to advise the refinery through their Agents of their ETA 72 hours in advance, and again 24 hours before ETA. For other vessels operating in Scandinavian waters, a 24 hours ETA notice will be required. For coastal traffic in Danish waters, ETA is required when departing for Kalundborg. If there should be any significant change in the ETA over 2 hours, additional advice is required.

HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival. When vessel arrives from port outside of Europe and U.S.A. and has been less than 14 days at sea, all crew members require valid smallpox vaccination certificates.

TUGS: Available, normally join vessel off harbour, often using vessel's lines. If tug's lines are used, an extra charge will be made.

Tankers: The required number of tugs will be ordered through the Agent in accordance with the agreement between the Pilot and the Pier Captain.

For vessels between 16,500 d.w.t. and 70,000 d.w.t. the following tug assistance will normally be required: One 1,700 h.p. tug forward on starboard side and 2 tugs of 1,800 h.p. and 400 h.p. aft.

For vessels over 70,000 d.w.t. an additional tug of minimum 1,000 h.p. will normally be required.

For all traffic to and from Pier C, tug assistance must be used in all cases where a vessel of 10,000 d.w.t. and over is already moored at Pier B.

Also see "Tankers" Pier Traffic Restrictions.

BERTHING:

East Harbour: Depth is 23 ft. Equipment: 1 crane for coal-discharge and 1 crane for grain-discharge.

Fertiliser-quay: Depth is 26 ft. 6 in. Equipment: 1 crane for phosphate-discharge.

West Harbour: Depth is 22 ft. 6 in. Equipment: 1 suction-apparatus.

South Harbour: Length 240 m., depth 10 m. (32.6 ft.). One crane capacity 12–25 tons. Roll-on/Roll-off facilities. Max. draft 30 ft.

2 mobile cranes available in all harbours.

TANKERS:

Pier A: For deep-sea vessels. Max. draft 41 ft. up to 70,000 d.w.t. For larger vessels between 70,000 and 100,000 d.w.t. the max. draft is 40 ft.

Crude discharge is via 2×12 in. hoses to the 30 in. crude pipe-line to the refinery, approximately 2 km. in length.

Bunker/Heavy Fuel deliveries through 14 in. line and 12 in. hose to the vessel. There are 10 other products, all in 10 in. lines and 10 in. hoses connected to the vessel.

The products are:

Naphtha/LVN.
Regular/Premium Gasoline.
Kerosene.
Auto Diesel.
Heating Oil.
Marine Diesel.
Fuel Oils: LFO, LSHFO, LPHFO.

Ballast is discharged through 1 by 10 in. and 1 by 12 in. hose into a 14 in. pipe-line.

Pier B: For vessels up to 16,000 d.w.t. (under special circumstances vessels up to 25,000 d.w.t. can be accepted). Max. draft 33 ft. Bunker/Heavy Fuel deliveries through 14 in. and 12 in. hose to the vessel. There are 10 other products all in 10 in. lines and hoses connected to the vessel. The products are:

Naphtha/LVN.
Regular/Premium Gasoline.
Kerosene.
Auto Diesel.
Heating Oil.
Marine Diesel.
Fuel Oils: LFO, LSHFO, LPHFO.
LPG is available through a 4 in. line.

Ballast is discharged through 1×10 in. and 1×12 in. hose into 14 in. pipe-line.

Pier C: For vessels up to 3,000 d.w.t. Max. draft 15 ft. 4 in. Products are:

Regular/Premium Gasoline.
Naphtha (discharging).
Kerosene.
Auto Diesel/Heating Oil.
Marine Diesel.
Fuel: HFO, LFO, LSHFO.

Loading is through 6 in. hose over the vessel's rail, although LPG is loaded via 4 in. line and 3×2 in. hoses, and asphalt over 6 in. steel arm.

Ballast can be discharged into a 6 in. line.

Pier D: For vessels up to 1,300 d.w.t. Max. draft 15 ft. 4 in. Loading through 6 in. hose over vessel's rail.

Products are:
Varnolene.
Solvents.
Regular/Premium Gasoline.
Naphtha/LVN (loading and discharging).
Kerosene.
Marine Diesel.
Auto Diesel/Heating Oil.
Fuel: HFO-LSHFO.

Ballast can be discharged into a 6 in. line.

The above maximum drafts for Pier A, B, C and D are based on normal water level in the Fjord.

Pier Traffic Restrictions: Restrictions for movements of vessels under varying weather conditions:

All Piers will be closed for in and outgoing traffic if the wind force is over 23 m/sec. (9 Bs).

Pier A & B, if the wind direction is between S.W. and N.N.W. and the wind force is between 15 m/sec. (7 Bs) and 23 m/sec. (9 Bs) tug must be used.

Pier C, If the wind direction is between S.W. and N.E. and the wind force is between 15 m/sec. (7 Bs), and 23 m/sec. (9 Bs) tug must be used.

Pier D, If the wind direction is between S.W. and N. and the wind force is over 15 m/sec. (7 Bs), the pier will be closed for all traffic.

Woodfield Loading Arms: If the wind force is over 23 m/sec. (9 Bs), all discharging/loading via loading arms will be stopped. Valves on shore line and vessel closed, and the system drained free of oil. It is the pier foreman's duty to enforce the above wind restrictions. His decisions will be based on actual measurements of the meteorological conditions.

Discharging and Loading Rates: Crude discharge rate is 38,000 Bbls. or about 5,000 t.p.h. Maximum inline pressure is 105 p.s.i.g. except for LPG where the maximum pressure is 250 p.s.i.g.

Approach Speed and Engine Check: Vessels approaching the Pier for berthing without tug assistance must slow down to an absolute minimum speed before passing the outer dolphin. Before reaching this point, a test of a true and realistic reverse manoeuvre must have been carried out to make sure that the system is functioning correctly.

Traffic Passing the Pier: There is a brisk ferry boat traffic in the outer harbour. Approximately 40 times a day a ferry passes the outer pier head in a distance of 100–300 m.

Dry cargo vessels up to about 10,000 d.w.t. call at the Kalundborg harbour and will be passing the outer Pier at a distance of approximately 500 m. from the pier head. The vessels pass at slow speed.

Tank/dry cargo vessels call at the nearby Power Plant which is equipped to handle vessels of 70,000 and 20,000 d.w.t., respectively.

Wind Conditions: The prevailing wind is from West, but most of the heavy winds and storms come from N.W.

Wind velocities exceeding 15 m/sec. (7 Bs) occur on the average about 20 days a year from S.W., about 15 days from West, 40 days from N.W. and 25 days from North.

Tide and Current: The difference between the average high-tide and average low-tide is approximately 0.3 m.

A storm from N.W. can give a high-tide of approximately 1.3 m. over normal daily average, whereas a storm from S.E. can result in a tide 0.9 m. below daily normal average.

There is practically no current at the Pier.

Wave Height at the Pier: The highest waves at the Pier will occur when the wind is from W.N.W.

The theoretical average wave height exceeds 0.7 m. for approximately 35 days a year, and an average wave height of 1 m. will be exceeded about 6 days a year.

Signal Flag: Vessels must, when loading/discharging, carry signal flag "B" during the day from sunrise to sunset, and a red light during the night.

Sanitary Regulations: The Standard regulations for Danish Harbours governing sanitation also apply to Kalundborg Oil Pier.

Trash and galley refuse must not be thrown overboard. Special containers for refuse are placed on the Pier.

Precautions must be taken to prevent discharge from toilet, bath room, etc. onto the Pier.

Gangway: Vessel to provide a safe gangway.

Laundry: Requirements should be given to the Agent's representative immediately on arrival. Laundry to be ready for delivery on arrival. A complete list is required.

Visitors: Only persons on business are allowed on the Pier. Visitors, as guests of the Master, are allowed to board vessels provided there is a request from the Master to the pier office. Further details for obtaining permits for visitors can be obtained from the pier office.

Telephone: For short distance calls a coin telephone is provided in the Pier Office building; for long distance calls arrangement must be made through the vessel's Agent.

STEVEDORES: Available, ordered by Agent, no ETA to stevedores necessary.

BALLAST: All ballast is to be discharged into the shore ballast tank. This tank is a 30,000 Bbls. tank, and usually there is approximately 20,000 Bbls. room available.

Disposal of ballast overboard is prohibited. Engine room or pump room bilges must not be pumped overboard when in Danish waters.

Sea valves will be sealed on vessel's arrival and must not be broken without approval by the pier captain or his substitute. Ballast for entering the harbour should be carried in a minimum number of tanks, and all other tanks stripped so as to minimize the time required for ballast discharge when alongside the Pier.

MEDICAL: Hospital and doctors available.

DENSITY: 1,011.

FRESH WATER: Available, supplied from shore by hose, about 15 t.p.h. 25 t.p.h. in Oil Harbour.

FUEL: All grades available, 24 hours ETA required by truck or barge.

FIRE PRECAUTIONS: No smoking allowed.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCE: Each Crew member allowed 100 cigarettes or 20 cigars or 100 grams tobacco and 1 bottle spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: Swedish, Norwegian; others at Copenhagen.

REPAIRS: All types of repairs available.

REPATRIATION: All facilities exist.

AIRPORT: Nearest at Copenhagen about 80 miles from Kalundborg. Served by regular airlines.

TIME: GMT plus 1 hour. No alterations through the year.

HOLIDAYS: New Year's Day; Easter Thursday; Good Friday; Easter Monday; Ascension Day; 1st May; Whit Monday; Prayer Day; 5th June; Christmas Day; 2nd Christmas Day. No work can be carried out.

SHORE LEAVE: Allowed.

DELAYS: Due to ice between 15th December and 31st March.

KOGE: 55.27 N. 12.12 E. (See Plan Book)

DOCUMENTS: For Customs vessels require:

Vessels of 150 ton and upwards, Load Line Cert.

Vessels of 300 ton and upwards, Load Line Cert. Radio Security Cert.

Vessels of 500 ton and upwards, Load Line Cert. Radio Security Cert. Equipment Security Cert.

For all passenger vessels also Security Cert.

For stevedores vessel shall have Bills of Lading, Manifests and Loading plans.

PILOTAGE: Vessel to call Pilot 2 hours before arrival. VHF on pilot station and pilot boat. Watch on Channel 16. Normal international light and sound signals used. Pilot boat located about 2 nautical miles East of port. No difference in bad weather.

ANCHORAGES: 1–2 nautical miles East of port with good bottom conditions.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Max. permissible length, 150 m.; max. permissible draft, 7 m.

HEALTH: Normal quarantine rules.

RADIO: Lyngby Radio or any other radio station in Denmark.

TUGS: No tugs in port. Can be obtained from Copenhagen.

STEVEDORES: Normal ETA and description of vessel required.

MEDICAL: Doctor and hospital assistance available; other facilities to be obtained from Copenhagen.

TANKERS: Only 1 tanker berth, no specific requirements.

GENERAL: Wind between N.E. and S.E. can give up to 1.6 m. high water and West wind up to 0.9 m. low water.

FRESH WATER: Water from wharf.

FUEL: Products are delivered in Koge, others from Copenhagen.

FIRE PRECAUTIONS: Normal fire precautions. Tankers cannot request to go to berth before loading/discharging. 2 fire watchmen from the fire department.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco: about 40 grams per day per man or 40 cigarettes per day per man. Wine and/or Spirits: about 0.25 litre spirits and 1 litre wine per man per day.

IDENTIFICATION CARDS: Not needed.

CONSULS: Nearest in Copenhagen.

REPAIRS: Small repairs.

DRY DOCKS: 2 small slipways for vessels up to 200 tons.

REPATRIATION: No facilities exist.

AIRPORT: Nearest is Kastrup Lufthavn; Copenhagen about 40 km. away.

TIME: GMT plus 1 hour. No change during year.

HOLIDAYS: Normal Danish holidays, change from year to year. Normally work can be arranged.

POLICE/AMBULANCE/FIRE: Ambulance and Fire (03) 653300; Police 651448 or use alarm 000.

TELEPHONE: No arrangements exist for placing on board.

GENERAL: The port North of Koge, Junckerhvnen, 55° 27′ 4″ N. 12° 118′ 7″ E. is a private port used only for vessels to the factory.

SERVICES: Pilot makes compass adjustments.

SHORE LEAVE: Allowed.

AUTHORITY: The Harbour Master.

KOLDING: 55.29 N. 09.29 E.

DOCUMENTS: See "Copenhagen".

PILOTAGE: Pilot station in Skaerbaek at mouth of Kolding Fjord. Tel. (05) 562486. VHF Channel 16.

ANCHORAGES: At Skaerbaek.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Maximum permissible length 180 m. Max. draft: 7.0 m.

RADIO: Lyngby Radio.

TUGS: Available.

STEVEDORES: Obtained through Agents.

MEDICAL: Hospital facilities available.

FRESH WATER: Available from quay.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes. Wine and/or Spirits: 1 bottle wine, 1 bottle spirits.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Finland: J. Borum, Haderslevvej 25, Kolding. Tel. (05) 521233.

Iceland: V. Thorning–Petersen, Dalbygade 40, Kolding. Tel. (05) 520022.

Malta: Chr. Hindkjoer, Fabriksvej 27, Kolding. Tel. (05) 525533.

Norway: Eduard Christensen, Lasbygade 34, Kolding, Tel. (05) 527711.

Peru: Mercedes Ohmeyer, Kobbelhave 4, Strandhuse, Kolding. Tel. (05) 528981.

Sweden: Ove Gronborg, Osterbrogade 14, Kolding. Tel. (05) 522711.

REPAIRS: Only small repairs can be carried out.

AIRPORT: Distance from Billund Airport 40 km. Billund Airport is served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: See "Copenhagen".

POLICE/AMBULANCE/FIRE: Police, tel. (05) 522800; Ambulance, tel (05) 522344; Fire, tel. (05) 522344, Help, tel. 000.

TELEPHONES: Telephones obtainable on board.

SHORE LEAVE: Allowed.

AUTHORITY: Harbour Master.

KYNDBY: 55.49 N. 11.53 E.

PORT LIMITS: Vessel is considered to be an "arrived ship" when passing the Breakwater to the port or when at anchorage waiting for berth.

DOCUMENTS:

Ship's Register.

Load Line Certificate.

Radio Safety Certificate.

Safety Equipment Certificate.

Derat Certificate or exemption.

2 Crew Lists.

Cargo Manifest or Bills of Lading.

Construction Certificate.

Certificate of Insurance or other financial security in respect of civil liabilities for oil pollution damage.

Tobacco and Spirit List, covering all goods on board belonging to crew, officers, Master, ship's bar or passengers.

Smallpox: When a ship arrives from places outside Europe and USA and has been at sea less than 14 days, each member of the crew has to present a valid smallpox certificate to the authorities on arrival.

PILOTAGE: Pilotage not compulsory. Pilot boards at the entrance of Isefjord and takes the vessel to the port and berths her. Pilots listening on VHF Channel 16.

Pilots to be ordered by ETA telegram to Agent at least 24 hours in advance.

ANCHORAGE: Larger vessels anchor in 15–20 m. of water either in the Isefjord or outside the entrance to the Isefjord. Holding ground good.

RESTRICTIONS: Arrival only by day-light. No tide by normal winds. Vessel's draft entering Isefjord not to exceed 22 ft. Also see "General" before first port.

MAX. SIZE: *Oilberth:* depth alongside: 21 ft. 6 in., one berth length 570 ft.

Coalberth: depth alongside 23 ft.

HEALTH: No special restrictions as to free pratique, which will be granted by authorities on arrival, however, see "Documents – Smallpox". Suspected disease or fever must be telegraphed to Agents before arrival.

RADIO: Lyngby Radio.

VHF: Channel 16 to Pilot Station (also Scaw Pilot).

RADAR: No installation.

TUGS: Available. Join at Isefjord, outside the entrance to the port of Kyndby, ship's lines to be used.

BERTHING: One Oilberth: length 570 ft., draft 21 ft. 6 in. One Coalberth: 530 ft. long, draft 22 ft. Water brackish.

CRANES: As berth private, only handling own coal cargoes – 3 cranes available.

STEVEDORES: Private stevedores to be ordered through receivers – coal discharge – rate per crane per hour: about 200 tons.

MEDICAL: All medical and hospital facilities available, no advance notice necessary.

TANKERS: 2 discharge hoses, one of 12 in. and one of 16 in.

No slop facilities.

One tanker berth, safe arrival draft: 21 ft. 6 in. Average discharge rate: 1,000 t.p.h.

DENSITY: Brackish.

FRESH WATER: By hose from quay – 10 t.p.h., D. Kr. 2.50 per ton.

FUEL: Available from all bigger companies by trucks or barge from Copenhagen – about 40 miles from Kyndby.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Nearest Copenhagen about 40 miles from Kyndby.

REPAIRS: All types of smaller repairs can be carried out.

DRY DOCKS: No dry dock available.

SURVEYORS: All bigger Classification Societies represented in Copenhagen about 40 miles from Kyndby.

GANGWAY/DECK WATCHMEN: Watchmen not to be recommended.

OPENING/CLOSING HATCHES: To be carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirit.

CARGO GEAR: Shore coal cranes.

REPATRIATION: Can be arranged normally via Copenhagen about 40 miles from Kyndby.

AIRPORT: About 40 miles to Airport in Copenhagen.

TIME: Local time one hour ahead of GMT.

HOLIDAYS: Saturday/Sunday normally no work, and further no work on holidays declared as official Danish holidays.

POLICE/AMBULANCE/FIRE: 0–0–0 all alarms.

TELEPHONES: No telephone connection on board.

SERVICES: No tank-cleaning facilities; all other services to ships can be arranged through specialists from Copenhagen.

SHORE LEAVE: No restrictions.

IDENTIFICATION: No shore passes necessary.

REGULATIONS: None.

DELAYS: None.

DEVELOPMENTS: None at the present time.

AUTHORITY: Private port owned by: Elektricitetsselskabet "Isefjordvaerket" I/S., Hellerup. Local office: Kyndbyvaerket.

NAESTVED: 55.14 N. 11.45 E. (See Plan Book)

DOCUMENTS: See "Kalundborg".

PILOTAGE: Compulsory between the entrance to Karrebaeksminde and Naestved for all ships over 150 g.r.t. VHF Channel 16. Tel. 03–727366 and 03–742397.

ANCHORAGES: 1 – 2 miles S.W. of head light in Karrebaeksminde in 10 – 12 m. depth.

RESTRICTIONS: Only navigable from half hour before sunrise to half hour after sunset, and according to tides. Also see "General" before first port.

MAX. SIZE: Max. length 100 m. Max. draft 5.60 m. with breadth 12.20 m. Max. breadth 14.40 m. with draft 4.80 m.

HEALTH: See "Kalundborg".

RADIO: Lyngby radio. VHF Channel 16.

TUGS: m/s "Eno" 360 h.p. VHF Ship's lines.

BERTHING: No berthing in Karrebaeksminde. Naestved 3 quays: 365, 270, 170 m., all with depth 6 m.

BRIDGES: One in Karrebaeksminde, total width 23.3 m.

MEDICAL: Hospital available.

FRESH WATER: Available from quay, 10 t.p.h.

FUEL: All grades. Deliveries by lorry only.

AIRPORT: Kastrup Airport, Copenhagen 90 km. away.

TIME: GMT plus 1 hour.

SHORE LEAVE: No restrictions.

AUTHORITY: Harbour Master.

NAKSKOV 54.50 N 11.08 E.

PILOTAGE: Al Albuen at the entrance of the firth.

RESTRICTIONS: Sailing in the harbour at night-time with help of projector only. Also see "General" before first port.

MAX. SIZE: Draft: 19 ft., Length: 660 ft., Breadth: 70 ft., Height: None — no bridges to pass.

TUGS: Tug available, with 24 hours notice.

BERTHING: Protected from all winds. Depth up to 20 ft. 6 ins (6.3 m). 7,500 ft. of quay. In the fairway leading up to the harbour there is a depth of 20 ft. 6 ins (6.3 m.), distance about 6 miles.

CARGO HANDLING FACILITIES: Tracks along the quays in connection with the railway station and all Danish Railways. Also good road connections.

3 grain silos: 4,000, 12,000 and 15,000 tons 3 grain elevators loading 90, 80 and 50 t.p.h. respectively. 1 grain elevator discharging rate 40 t.p.h. 4 mobile belt conveyors loading up to 100 t.p.h. 2 mobile cranes (20 tons lift) — also grab and polygrab.

MEDICAL: Treatment of all kinds possible.

FRESH WATER: Available.

FUEL: Available.

CONSULS: Dutch, Finnish, French, Norwegian and Swedish.

DRY DOCK: Shipyard provided with 2 dry docks up to 32,000 d.w.t., building slips up to 35,000 d.w.t. Cranes to lift up to 100 tons.

AGENT: Casper Andrea's Succrs. Havnegade 33, PO Box 66, DK-4900 Nakskov, Denmark. Phone: 03-923333 Telex: 47545 andrea dk. Tlgms: Andrea Nakskov.

NYBORG: 55.19 N. 10.49 E.

DOCUMENTS:

Health Declaration.
Customs Declaration.

TIME: No alteration to clocks. GMT plus 1 hour.
HOLIDAYS: New Year; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; 1st May (Labour Day, half only); Ascension Day; Whit Monday; Constitution Day (5th June, half only); Christmas and Second Christmas Day.
POLICE/AMBULANCE/FIRE: Dial 0–0–0 and ask for police, ambulance or fire service.
SHORE LEAVE: Crew members may go ashore without any restrictions.

ODENSE: 55.25 N. 10.23 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Radio Safety Certificate.
Safety Equipment Certificate.
Derat Certificate or exemption.
1 Crew List.
Stores List.
1 Crew Personal Effects List.
1 Cargo Manifest or Bills of Lading.

PILOTAGE: Compulsory between Gabet and Stige for all tankers of 1,500 d.w.t. and over. Pilotage compulsory between Stige and Odense for all vessels of 150 g.r.t. and over. Contact Odense Fjord Pilot (Gabet-Stige) on VHF Channel 16. Odense Fjord Pilot boards just North of light-buoy 2A outside of Gabet. In bad weather the Pilot will board inside of Gabet between light-buoys 2 and 4. Stige Pilot (Stige-Odense) boards at Stige and operates on VHF Channel 12.
ANCHORAGE: Inside of Gabet in depths of 7.5 m. Larger vessels anchor outside of Gabet.
RESTRICTIONS: Port is entered through dredged canal, 22 m. wide, 7.5 m. deep. Navigation usually throughout the year. Ice-breaker assistance available if necessary. Vessels over 3,000 d.w.t. enter in daylight only. Speed limit of 6 knots in entrance canal. Arriving ships must wait for vessels leaving port. Also see "General" before first port.
MAX. SIZE: Draft, max. 7.0 m. fresh water, length, max. 160 m. controlled by swinging basin and draft.
HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival. When vessel arrives from port outside of Europe and U.S.A. and has been less than 14 days at sea, all crew members require valid smallpox vaccination certificates.
RADIO: Lyngby Radio.
VHF: Port Authority, tug and Stige Pilot communicate on Channel 12, Odense Fjord Pilot on Channel 16.
TUGS: Tug is available (660 h.p.). Not compulsory but necessary for large vessels. Tug normally joins vessels in port. Large vessels at Gabet. Ship's line.
BERTHING:— Three harbour basins including 4,200 m. of quays with depth of 7.5 m. alongside. Coal quays at Fynsvaerket, depth 7.5 m. alongside.
CRANES: At Basin I: one 6-ton crane with polyp-grab if needed, and one 3.5-ton crane.
At Basin II: two 3.5-ton cranes both with grab if needed.
At Basin III: two 6-ton cranes, one 15-ton crane and one 50-ton crane.
Quay along the canal: eight private cranes with grab.
At Fynsvaerket: three cranes with grab.
Also available in the port: two 6-ton mobile cranes. No floating cranes.
BULK CARGO FACILITIES: Five private suction-installations for grain, etc. Coal and chemicals are handled by crane.
SPECIAL CARGO FACILITIES: Berths available for handling of containers and Ro-Ro traffic. Installation for liquefied ammonia.
BRIDGES: No bridges but powerlines max. height 45 m.
STEVEDORES: To be arranged through Agent.
MEDICAL: Doctors and hospital facilities anytime. Arrange through Agent.
TANKERS: Two berths length 160 m. each, depth 7.5 m. also one jetty, depth 6 m.
DENSITY: 1003.
FIRE PRECAUTIONS: In addition to the usual precautions a firefighter is posted at the vessel while in the port when the cargo is petrol, kerosene, etc.
AIRPORT: Situated 15 km. from the harbour. 3–5 flights a day to and from Copenhagen.
POLICE/FIRE/AMBULANCE: Dial 000 and ask for service required.
CONSULS: All European countries represented.
FRESH WATER: Available by pipe-line at all berths. Rate: 10–15 t.p.h.
FUEL: All grades available by road transport.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle wine and 1 bottle of spirits permitted out of bond for each man.
TIME: GMT plus 1 hour. No alterations during the year.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
Half-holidays: May 1st, June 5th and December 24th. Work can be arranged.
REPAIRS: All engine and boiler repairs can be effected.
DRY DOCKS: One 500,000 d.w.t. and three 100,000 d.w.t. dry docks in Lindoe Shipyard and one 500 d.w.t. slipway in port.
SURVEYORS: N.V. and Lloyd's.
HATCHES: Normally opened by ship's crew.
REPATRIATION: Can be arranged.
TELEPHONES: No telephones on board.
SERVICES: Compass adjustment can be arranged.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
REGULATIONS: Nothing unusual.
DELAYS: None.
AUTHORITY: The Harbour Office, Odense.

RANDERS: 56.29 N. 10.04 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists
2 Lists with statement of each Crew member's cigarettes, tobacco and spirits.

AUTHORITY: Harbour Master, Randers Havnevaesen.

RODBY: 54.39 N. 11.20 E. (See Plan Book)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Stores List.
1 Manifest or Bill of Lading.

PILOTAGE: As the harbour is so easily accessible there is no Pilot. A person with local knowledge may be engaged by calling ferry "Danmark" VHF 16.

ANCHORAGES: At a distance of 1.5–2 miles, bearing S.E. – S.S.E. of approaching buoy, depth of water 10 m.
RESTRICTIONS: See "General" before first port.
REGULATIONS: Ferries owned by D.S.B. or D.B. (Trainferries) have priority using the entrance.
MAX. SIZE: Largest vessel Length 80 m. Draft 4.5 m. Depth of water in North and West Basin: 5 m. N.E. Storm can give rise of up to 1.5 m. S.W. – Storm can give fall of 1.2 m. on daily depth.
HEALTH: No Certificates required.
RADIO: All messages via "Lyngby Radio".
TUGS: None.
BERTHING: Quay length 518 m. equipped with 3 mobile cranes 8, 15 and 25 tons capacity. Two grain silos, loading capacity 60–90 t.p.h.
STEVEDORES: Provided by "Rodby Shipping" Telephone 03. 905522. Telex 40022 or Shipbroker A. Hovmand, Telephone 03. 888011, Telex 40256.
MEDICAL: 2 hospitals available.
FRESH WATER: Can be supplied alongside the quay.
FUEL: Obtainable alongside the quay.
OPENING/CLOSING HATCHES: By crews or stevedores, ship's option.
CERTIFICATES: On arrival, ships register only.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 litre spirits and 3 litres wine.
IDENTIFICATION CARDS: Not required.
AIRPORT: Maribo Airport, 14 km.
SHORE LEAVE: After clearing inwards, Crew members are allowed to go ashore without special permission.
AUTHORITY: Harbour Master.

RONNE: 55.06 N. 14.42 E. (See Plan Book)

DOCUMENTS:
1 Crew list.
1 Passenger List.
1 Customs Declaration.
1 Declaration for crew's tobacco, spirits, etc.
1 Declaration of Health.
1 Declaration to Police, number of crew, passengers, etc.
1 Bill of Lading (or Manifest).
PILOTAGE: Apply for Pilot via Ronne or Lyngby Radio, advance notice not less than 1 hour. Pilot listens continuously on VHF. Call Ronne Pilot or Ronne Harbour. Area where Pilot to be taken on board is by Ronne light-buoy, 2 miles S.W. of the harbour; if weather bad pilot boat guides the ship inside the breakwater and then Pilot boards.
ANCHORAGE: No safe anchorages outside the harbour.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. length 400–450 ft., draft 22 ft. There is no tide.
HEALTH: No special procedure necessary, but if there is suspected disease or fever on board or ship comes from area with fever, etc., call for quarantine doctor. If ship's last call was Danish port pratique automatic.
RADIO: Ronne Radio, call-sign OYE; or Lyngby Radio, call-sign OXZ.
VHF: Listens on Channel 16. Working Channels 12 and 13. Same in tug and Pilot boat. Mainly traffic concerning pilotage and harbour operations.
RADAR: Located at Pilot station, mostly look-out aid, but advice on entering can be given.
TUGS: Normally join the vessel inside breakwater; ship's lines to be used.
BERTHING: 3 berths equipped with hydraulic ramps for roll-on/roll-off traffic via stern or head only, one of which is suitable for ships up to 450 ft. length, 65 ft. beam, draft 21 ft.

3 berths for sand loading 400–600 t.p.h., for vessels up to 350 ft. length, 21 ft. draft.

2 berths for macadam loading 400 t.p.h., for vessels up to 300 ft. length, 21 ft. draft.

1 permanent heavy lift crane with 30 ton capacity is situated on pier 23.

1 grab-crane, capacity 100 t.p.h. is situated on pier 13.

3 mobile cranes with capacities up to 12 tons are available for both hook and grab operations.

Also berths for handling coal and grain.
STEVEDORES: To arrange gangs Monday morning, advices have to be given Friday before 1100 hrs. To arrange work other days, notice must be given before 1600 hrs. the day before.
MEDICAL: Hospital facilities are available. It is not necessary to give advance notice.
TANKERS: Two berths for coastal tankers draft up to 22 ft., length up to 300 ft.
FRESH WATER: Available 10–12 t.p.h.
FUEL: Light fuel, Redwood 200 sec. Heavy fuel 3500 sec., also 1000 and 1500 sec. Notice 6 hours ETA.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
CERTIFICATES: Nationality Cert., Derat. Cert., Load Line Cert. Radio Cert. (Safety Cert. for passenger ships only).
CUSTOMS ALLOWANCE: Tobacco: 40 cigarettes or other tobacco per day. Wine/Spirit: half a bottle per day.
IDENTIFICATION CARDS: Not needed.
CONSULS: The following countries are represented in Ronne: Sweden, Finland, France, Netherlands, Norway and West Germany.
REPAIRS: All kinds of repairs can be carried out.
DRY DOCKS: Only small ships up to 350 tons.
REPATRIATION: Possible.
AIRPORT: 3 miles, served 3–5 times per day by SAS to Copenhagen.
TIME: GMT plus 1 hour. No alteration.
HOLIDAYS: New Year's Day; Easter, 3 days Thursday, Friday, Easter Day (Monday); May 1; Whit Monday; June 5; Christmas Eve; Christmas Day; 2nd Christmas Day. Cargo work only possible for foodstuff, etc.
SERVICES: Compass adjustment at Duc d'Albe in Southern part of Forhavn.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Piers Nos. 2 and 3 are under reconstruction.

A turning Dolphin is under construction approx. 40 m. South of Pier No. 11.

The dredged area has been extended as shown on the plan.

The Dolphin West of Pier 22 is used for compass adjustment.

The reconstruction of the North Harbour and the extension of the dredged area will enable the Port to handle bigger ferries, which is planned to serve the domestic routes from October 1978.

The reconstruction will be completed about May 1979.
AUTHORITY: Harbour Master.

SKAERBAEK: 55.31 N. 09.37 E. (See Plan Book)

DRY DOCKS: None.
REPATRIATION: No facilities.
AIRPORT: Billund 32 km., 3 flights per day.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Easter; 1st May, Whit Sunday, Christmas holidays. Cargo work can be done on overtime except 1st May (Labour Day).
POLICE/AMBULANCE/FIRE: Police, tel. 821744; Ambulance, 822244; Fire, 822244.
TELEPHONES: No arrangements exist for placing on board.
DEVELOPMENTS: A highway-bridge is being built over the fjord over the entrance-channel about 1 mile outside the harbour entrance. The bridge will be opened in Autumn 1979. Max. height over the channel, 40 m.
SHORE LEAVE: Allowed for all crew.
AUTHORITY: Harbour Master.

VORDINGBORG (South Harbour – formerly Masnedsund): 55.30 N. 11.54 E. (See Plan Book)

DOCUMENTS: See "Copenhagen".
PILOTAGE: Available from Masnedoe Pilot Station tel. 03-770355.
ANCHORAGE: Vordingborg Roads.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Draft 21 ft. max., breadth 25 m. owing to passage of bridge before entering harbour. Width of bridge opening 25 m. At a height of 25 m., width of opening 22 m. due to angle of raised bridge. Max. breadth recommended 20 m.
RADIO: Lyngby Radio.
TUGS: Available from Nakskov, Korsoer, Copenhagen. Notice for towage about 6/8 hours.
BERTHING: Berths equipped for handling grain, ore, coal, liquid chemicals and LPG carriers.
MASNEDOE POWER STATION: Private harbour. Draft 21 ft. Fresh water available. Pilotage, towage, as for Vordingborg.
BRIDGES: Passage of bridge 25 m. wide, opening day and night. Bridge normally in radio contact with pilot station. Fully lighted. Approach to power station from the west – pier situated just to the west of opening bridge, and therefore no passage.

In the approach to Vordingborg and power station passage of overhead power cables, max. air-draft 36 m.

STEVEDORES: Local stevedores ordered by Agent.
MEDICAL: Hospital available.
FRESH WATER: Supplied by pipe-line to berths.
FUEL: All common fuels available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close, otherwise as per C/P.
CERTIFICATES:
Registered Certificate of tonnage.
Derating Certificate.
Construction Certificate.
Load Line, and Equipment Certificate on first call.

CUSTOMS ALLOWANCE: About 200 cigarettes and a limited amount of spirits each man.
CARGO GEAR: 2 mobile cranes, one grain-sucker and elevator, one coal crane.
IDENTIFICATION CARDS: Not required.
CONSULS: At Copenhagen.
REPAIRS: Most repairs, engine and equipment available. Electronic service only available from Copenhagen.
DRY DOCK: No local dry dock. Nakskov/Copenhagen nearest.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Police 03-771448; Ambulance, Fire Brigade 0–0–0.

NOTES

Please also advise Shipping Guides Ltd.

Djibouti, Republic of

DJIBOUTI: 11.36 N. 43.08 E. (See Plan Book)

DOCUMENTS: Crew List for ship's Agent. Crew Manifests and Manifests of Passengers in transit or for disembarkation, for whom disembarkation cards are to be completed. Presentation of Health Declaration and verification of compulsory immunisations by the health representative. Cargo Manifest, required in 5 copies prior to any discharging operations, also deposit of 1 copy at port operation office.

PILOTAGE: Compulsory. Pilot boards in vicinity of buoy No. 2 of the Heron Bank, where all vessels must wait. Call signals are regulated by International Code. Vessels at the quay wishing to put to sea must call Pilot half an hour beforehand by 3 long blasts (in addition to the "G" flag). VHF radiotelephony station to liaise with ships. Ships must ensure a permanent watch on Channel 12, at the latest after clearing parallel of Muskali beacon.

MAX. SIZE: Entrance to inner roads dredged to 11 m. depth.

ANCHORAGE: Anchorage zone is within following limits:

1. Eastern limit: a line parallel to and 0.25 miles West of the North passage.

2. Southern limit: Latitude 11° 37′ N.

3 Western limit: a bearing with the Western extremities of Penguin and Ambouli Banks in alignment.

It is forbidden to anchor 1.5 cables on each side of the alignment of Ambouli and d'Ayabele lights.

Average depth is of 15 to 20 m. Anchor hold is excellent, even with a strong S.W. monsoon when there is often a heavy swell.

RESTRICTIONS: Entry during the day or night. Highest tide 2.90 m. Mean tide is approximately 1.60 m., and lowest are 0.20 m. Tidal currents are very weak in bay and rarely exceed 1 knot.

HEALTH: Generally free pratique by radio can be granted to all ships applying through Coastwise Station Djibouti Radio. Ships must radio in plain or international code, a maximum of 12 hours and a minimum of 4 hours prior to arrival in port. In all cases, when Pilot boards vessel he gives Captain a copy of Maritime Health Declaration which must be filled in by Captain and countersigned by ship's doctor, if the crew includes one. An examining official comes on board when vessel arrives to receive the Maritime Health Declaration. Smallpox certificate required from all travellers coming from all countries. Cholera certificate required from all travellers coming from an infected area, excepting children of under 6 months of age.

RADIO: For short distance communications, ships contact shore by radio telephone VHF through Harbour Master's office. Port office is equipped with a VHF station transmission and reception: Channel 12 (156.6 mHz) and 16 (158.8 mHz). For medium or long distance communications, ships contact shore by radiotelegraphy and radiotelephony through Djibouti coastwise station, call sign: TXZ; call frequency: 8.682 and 500 kc/s; working frequency 8.682 and 464 kc/s.

TUGS: In Winter (slight Easterly monsoon), a single tug is generally sufficient for manoeuvring. In Summer during the Khamsin period, berthing or sailing often requires 2 tugs. There is a 1,500 h.p. diesel tug *Aboubaker Pacha*, a 1,800 h.p. tug, *A. Rimbaud*, a 1,320 h.p. diesel tug *Henri Lambert*, a 1,000 h.p. tug *Administrateur Bernard* and 1 auxiliary 600 h.p. tug.

BERTHING: exterior docks comprise:

Dock 11	depth of 11 m.
Dock 12	depth of 12 m.
Dock 10	depth of 11 m.
Dock 13	depth of 10.80 m.
Dock 9	depth of 9 m.

Average depth of remaining roadstead is between 15 and 20 m.

CRANES: There are no cranes on quays, but the port has 2 mobile cranes of 15 tons and 25 tons capacity plus a floating crane for the handling of heavy-lifts of 70 tons capacity.

BULK CARGO FACILITIES: Molasses can be handled.

SPECIALISED CARGO HANDLING FACILITIES: Open ground and shedded areas for containers, Roll-on/Roll-off traffic and Quay for the traffic of lighters.

STEVEDORES: Four companies available, office hours from 0700 to 1730 hrs. Stevedoring 24 hours.

MEDICAL: Port Medical Service directed by medical practitioner specialised in industrial medicine is situated in a building neighbouring the port offices. It operates a dispensary. Passengers and sailors in transit are treated by private doctors from town who may visit the ships. Serious cases can be hospitalised in Djibouti's civil or military hospitals.

TANKERS: Reception lines: Berths 12 to 13 specially equipped for reception of bunkering products are linked with installations of the petroleum companies by a 16-in. dock-line and 12-in. (FO) and another of 12-in. (DO). Pier No. 10 is connected to the installation with a dock-line of 12-in. Rate of discharging can reach between 2,000 and 2,500 t.p.h. Reception of white products is assured from quay No. 13 by an 8-in. line; for gas there is a 4-in. line.

FRESH WATER: Each quay provided with 3–5 (200 mm.) water-hydrants. Delivery of 40 cu.m. of water per hour. Regardless of the season, there is never any shortage of fresh water.

FUEL: A complete range of different viscosities and products is available. Meets all the usual requirement of bunkering vessels. Ample supplies of fuel and diesel oil are always available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

IDENTIFICATION CARDS: Required.

CONSULS:

Belgium
Egypt
Ethiopia
France
Great Britain
Iraq
Italy
Libya
Oman
Saudi Arabia
Somalia
Sudan
Yemen (N)
Yemen (S)
U.S.A.

REPAIRS: Small repairs available.

REPATRIATION: Good facilities exist.

AIRPORT: International airport with regular and local flights.

HOLIDAYS: New Year's Day (1 January); Aid Seghir (El Fithir) and the following day; Labour Day (1 May); Aid El Kebir and the following day; Muslim New Year (1st Mouharam); National Holiday (27 June); Mouloud El Nabi; Al yarah wal Mirage.

Dates referring to religious holidays vary every year, particularly where Muslim holidays are concerned. Loading and discharging operations as well as bunkering can be carried out during all of above holidays when other services are also available.

TELEPHONES: Available on every berth.

SHORE LEAVE: Allowed.

DEVELOPMENTS: A 4,400 sq.m. shed and two 1,600 sq.m. sheds (South Mole extension) are finished.

Building of 10,000 sq.m. sheds completed for trailers, tractors and elevators of strong capacity for the handling of containers. Berth 9 under reconstruction.

AUTHORITY: Directeur, Port de Commerce de Djibouti.

AGENT: Socopao – Djibouti, P.O. Box 57. Tel. 35.11.50. Telex 827 Djibouti. Cables "Marill".

NOTES

Please also advise Shipping Guides Ltd.

Dominican Republic

GENERAL: All ports.

DOCUMENTS:

Vessels calling at Dominican ports require a complete Dominican consular despatch from every loading port as well as from the last foreign port of call. Should there be no Dominican Consulate at the respective loading port, the Agents should prepare 3 copies of the manifest to be delivered to Customs. If no Dominican Consulate at the last foreign port of call, the Agent will attend to all the formalities required by the local port authorities.

Smallpox vaccination certificates, not over 2 years old, will be required by the Port Doctor as well as the Deratization, resp. Exemption Certificate.

Additional papers, besides consular despatch, required by authorities are as follows:

Port Doctor:
1 copy crew list,
1 copy landing/transit passenger list,

Harbour Master:
Port clearance from last port of call,
3 copies crew list,
3 copies landing/transit passenger list,
3 copies negative passenger list (if none landing),
3 copies arms list,

Customs:
2 copies crew list,
2 copies arms list,
2 copies landing/transit passenger list,
2 copies negative passenger list (if none landing),
2 copies stores list,
1 copy tallybook.

Immigration:
2 copies crew list,
2 copies landing/transit passenger list.

Police:
1 copy crew list,
1 copy landing/transit passenger list.

Department of Agriculture:
1 copy stores list,
1 copy tallybook.

Agency:
1 copy crew list
1 copy landing/transit passenger list,
4 copies manifest (if not airmailed previously),
2 copies each B/L (if not airmailed previously),
7 copies tallybook.

Additional lists, etc., required are:
10 crew lists,
10 landing/transit passenger lists,
5 negative passenger lists (if none landing),
5 arms lists,
3 stores lists,
9 tallybooks,
4 copies cargo manifest (if not previously airmailed),
2 copies B/L (if not previously airmailed).

HOLIDAYS: New Year's Day (January 1st); Our Lady of High Grace (January 21st); Duarte's Day (January 26th); Independence Day (February 27th); Good Friday (Variable); Labour Day (May 1st); Corpus Christi (Variable); Restoration of Independence (August 16th); Our Lady of Mercy (September 25th); Christmas Day (December 25th).

Regular working hours: 0800 — 1200 hrs., 1400 — 1800 hrs., Mondays to Fridays and 0800 — 1200 hrs. Saturdays.

Saturday: Overtime is payable to labour for work performed after 1200 hrs. Pilots and government officials are paid overtime rates all day, but Customs personnel are only paid overtime rates after 1200 hrs.

The above holidays are legal in the Dominican Republic and for the diplomatic and consular representations abroad.

Work can be performed on all Sundays and holidays against payment of overtime to labour, Pilots, Customs and government officials.

TIME: GMT minus 4 hours all year round.

SPARES: Same can be withdrawn same day of arrival via air express. No Customs duties assessed as brought under Customs custody on board vessel. Airwaybill should be addressed to Agent, with clear indication that it covers spares for such and such a vessel.

SECURITY: Stevedores board vessel with special passes issued for vessel in question. Any other visitors must obtain pass from Harbour Master's Office. Nevertheless it is definitely recommended that all cabins be kept locked. This also applies to hatches that are not being worked.

POLLUTION: No garbage, refuse, etc., can be thrown overboard. Vessels liable to heavy fines for oil pollution, etc.

PLAGUE CONTROL: All lines leading to shore must be protected by ratguards. Non-compliance subject to Customs fines.

AZUA (Puerto Viejo): 18.30 N. 70.40 W.

See "General" before first port.

PILOTAGE: Ordered by Agent; vessel should wait for Pilot at a distance of 0.5 mile from the port.

ANCHORAGE: In the approaches, depth is 28 ft.

RESTRICTIONS: Berthing during daylight only.

HEALTH: Pratique is obtained by Agent. In case of infectious illness the whole crew is put in quarantine.

TUGS: Not available.

BERTHING: Finger pier, length 650 ft., width 120 ft. Dredged to 35 ft.

MEDICAL: Necessary for Agent to receive advance notice of required medical attention. Doctor available.

FRESH WATER: Delivered by barge.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: No restrictions.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: No repairs possible.

REPATRIATION: Facilities available.

AIRPORT: Situated 170 miles from port.

POLICE/AMBULANCE/FIRE: Tel. 175.

TELEPHONES: None available on board.

SHORE LEAVE: Allowed.

AUTHORITY: Comandancia de Puerto de Azua RD.

AGENTS: See "Santo Domingo".

BARAHONA: 18.10 N. 71.10 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone frequency 2738. Pilot boards approximately 1.5 miles outside the port. Pilot also on VHF Channel 16.

ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: No entry or departure at night.

MAX. SIZE: 575 ft. length; 29 ft. draft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: One small tug available, ship's lines used.

BERTHING: Sugar molasses wharf, general gypsum wharf.

STEVEDORES: ETAs required 24 and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.

TANKERS: Discharge at molasses wharf.

DENSITY: Salt water inside harbour.

FRESH WATER: Pipe-line at wharves, ship's hoses used.

FUEL: Small quantities of diesel available by truck from Santo Domingo.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.

IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.

CONSULS: All Consuls at Santo Domingo.

REPAIRS: Minor repairs only.

REPATRIATION: Can be arranged.

AIRPORT: Distance to airport 230 km.

POLICE/FIRE/AMBULANCE: Police, tel. 417; Ambulance, tel. 441; Fire, tel. 348 or 398.

TELEPHONES: Shore telephone alongside ship connected to Sugar Mill.

SHORE LEAVE: Allowed.

GENERAL: No boats to be lowered without official permission. Berthing/unberthing during daylight only.

AUTHORITY: Comandante de Puerto.

AGENTS: See "Santo Domingo".

BOCA CHICA: 18.27 N. 69.35 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone frequency 2738, and 2638 kHz. Pilot also on VHF Channel 16. Pilot boards 1 mile outside the harbour.

ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: No entry or departure at night.

MAX. SIZE: 400 ft. length; 25 ft. draft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: If required, tug is brought from Santo Domingo.

STEVEDORES: ETAs required 24 and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: Only small propane gas tankers can be accommodated.
DENSITY: Salt water inside harbour.
FRESH WATER: Pipe-line connection at dock, low pressure, Ship's hoses used.
FUEL: Only available by truck from Santo Domingo.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only.
REPATRIATION: Can be arranged.
AIRPORT: 6 km. to airport, served by regular airlines with numerous flights daily.
POLICE/FIRE/AMBULANCE: At Santo Domingo.
TELEPHONES: No connection to vessels.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante de Puerto.
AGENTS: See "Santo Domingo".

CABO ROJO: 17.55 N. 71.39 W.

See "General" before first port.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738.
ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.
RESTRICTIONS: Entry and departure permitted daylight only.
MAX. SIZE: 600 ft. length; 40 ft. draft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio.
TUGS: No tugs available.
BERTHING: Alcoa Private Wharf, bauxite only. Mechanical loading, no stevedores.
MEDICAL: Medical attention can be arranged by Alcoa after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: One tanker at a time could be accommodated.
DENSITY: Salt water inside harbour.
FRESH WATER: Sometimes available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Not possible.
REPATRIATION: Can be arranged.
AIRPORT: Distance to airport 360 km.
POLICE/FIRE/AMBULANCE: Contact Port Authority.
TELEPHONES: Telephone on dock connected to Alcoa office.
SHORE LEAVE: Allowed.
GENERAL: No boats to be lowered without official permission.
AUTHORITY: Comandante de Puerto.
AGENTS: See "Santo Domingo".

LA ROMANA: 18.27 N. 69.01 W.

See "General" before first port.
PILOTAGE: Compulsory. Ordered by Agents on receipt of vessel's ETA, 72, 48 and 24 hours before arrival. Pilot launch painted white with grey cabin and with letters "LP-24" painted on sides. Pilot boards 1.5 miles from port entrance. Contact Pilot on 2738 and 2638. Pilot also on VHF Channel 16.
ANCHORAGE: West of Isla Catalina in depths of 15 to 18 fathoms.
RESTRICTIONS: No entry or sailing in hours of darkness.
MAX. SIZE: Length: 580 ft. Draft: arrival 25 ft., sailing 28 ft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: Santo Domingo Radio, HIX2, frequency 2738 kc/s. Near the port, use Centromana Radio on same frequency.
TUGS: One tug of 620 h.p. available. Extra charge for use of tugs line.
BERTHING: One concrete pier 720 ft. long.
STEVEDORES: To be ordered 4 hours before commencing work.
MEDICAL: Doctors and hospital facilities available. Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: Berth for 1 tanker at the pier. Discharge lines 10 in., 8 in., and 4 in.
DENSITY: 1025.
FRESH WATER: Available from 2 in. pipe-line on pier. Very low rate of supply.
FUEL: Not available.
WATCHMEN: To be provided by vessel. Compulsory gangway watch kept by Customs Guards.
OPENING/CLOSING HATCHES: Generally by ship's crew.
CUSTOMS ALLOWANCES: Seamen may take ashore only 2 packets of cigarettes and no alcohol.
IDENTIFICATION CARDS: Shore passes issued by Immigration Officer.
REPAIRS: Only minor repairs can be effected.
REPATRIATION: Arranged via Santo Domingo.
AIRPORT: Distance 70 km.
POLICE/FIRE/AMBULANCE: Police, 235; Ambulance, 455; Fire, 455.
TELEPHONES: In dock office, ask Sugar Mill for number required.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante de Puerto.

MANZANILLO: 19.43 N. 71.45 W.

See "General" before first port.
PILOTAGE: Compulsory. Pilot comes from Puerto Plata. Boards incoming vessels about 1 mile from the dock. (The Pilot's working hours from 0800 to 1200 hrs., 1400 to 1700 hrs.; a fee charged after working hours. A fee is also charged for movements in harbour.) Ships will be received Saturdays and Sundays and at night for the same rate for the Pilot. Contact Pilot on 2738 and 2638, also on Channel 16 VHF.
ANCHORAGE: Vessels that cannot be docked on arrival will find safe anchorage to the East of the dock where there is plenty of swinging room, in about 20 fathoms of water, with good holding ground of mud and sand.
APPROACHES: Coast Guard Service recommend that a ship, entering Manzanillo Bay from the East, should stay well out until it has rounded shoals surrounding Seven Brothers Islands. At approximately 19° 58′ W. Long. a course of 127° will bring it into the bay near the wharf. A ship arriving from the West should stay about 6 miles off Cape Haitian Light. When abreast the light a course of 111° will lead into the Bay a short distance North of the pier.
RESTRICTIONS: Entry and departure day and night.
RADIO: Radio Station HIL31. This station is private and for the use of Grenada Co. only. Messages of ETA, etc. from vessels should be sent via Miami WAX or New Orleans Radio WNU.

Vessels bound for Manzanillo, should radio their ETA to Santo Domingo Pilot Station daily, from 0600 to 1800 hrs. on frequency 2738 and 2182.

Vessels having single sideband equipment may also contact Radio Instituto Agriario Dominicano at Manzanillo, at wavelength 2670 and 2638 kHz from 0700 to 1200 hrs. and 1400 to 1700 hrs. EST.

TUGS: No heavy duty tugs available but there is a launch for the handling of ship lines. Tug available from Puerto Plata if required due to size of vessel.
BERTHING: Prevailing winds are Easterly and sometimes interfere with docking or undocking. On the East side vessels should dock bow in, since there is not enough room to swing vessels safely around for a port docking. On the West side vessels can dock either side to the pier, depending on the direction and force of the wind. In general banana vessels will be docked on West side of the pier and cargo vessels on the East side. Pier has a concrete deck 744 ft. long, 72 ft. wide. Both sides of the pier are protected with a pine fender system. The water depth at land end of pier is 10 ft. and at the seaward end 40 ft.
MEDICAL: Small dispensary in Manzanillo. Hospital facilities in Monte Cristi, 30 km. away.
STEVEDORES: Available.
FRESH WATER: Available for ships calling at this port only.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCES: Each crew member will be allowed to take ashore one only opened package of cigarettes.
CREW IDENTIFICATION CARDS: Required.
REPAIRS: Small repairs carried out only.
REPATRIATION: Facilities available.
SHORE LEAVE: Members of crew are allowed to go ashore at this port, but Masters should caution them not to take on their persons any dutiable articles, as the Customs will search such men upon landing and should any such articles be found on their persons, this will be treated as an attempt to smuggle; severely punishable offence.
AUTHORITY: Comandante de Puerto.

PALENQUE: 18.12 N. 70.11 W.

SHIPMASTER'S REPORT (1976)

The vessel called at Punta Palenque to discharge a cargo of feedstock from Venezuela. The SBM is located in position 18° 12.2′ N. 70° 11.3′ W. and operated by Refineria Dominicana.

ARRIVAL ADVICE: Agent at last port should telex ETA to Punta Palenque. Unable to establish Radio contact with local coast station.

DOCUMENTS:

7 Crew Lists
2 Store Lists.
1 Crew Effects List.
2 Passenger Lists.
2 Lists of Arms & Ammunition.
2 Lists of Narcotics.
1 Health Declaration.
Clearance last Port.

PILOTAGE: Pilotage is compulsory. Mooring and unmooring 24 hours a day. Pilot boards about 1 mile Southwest of SBM.

Pilot boat, a small tug with black hull and white superstructure, is equipped with VHF Channels 16 & 14, call sign Punta Palenque Pilot. Pilot moors the vessel with the assistance of the Loading Master who gives directions on the focs'le. The tug delivers the mooring gear consisting of 2 nylon tails put on vessel's bits and shackles. The nylon tail will be shackled to SBM mooring lines. These mooring lines consist of about 100 ft. nylon rope and 10 ft. chain. The chain is heaved inboards by means of 1 wire and 1 nylon or polyprop messenger and connected to nylon tails on vessel's bits.

MAX. SIZE: Vessels up to 260 m. in length with max. draft of 14.6 m. A circle of 2000 ft. around the buoy with a min. depth of 50 ft.

HEALTH: Radio Pratique not available.

TUGS: Not available for mooring itself. Messengers to and from SBM are handled by a small work boat.

BERTHING: SBM of standard type with 2 moorings. Two floating hoses attached with 12 in. manifold connection. Hoses are handled by ship's crew under the supervision of the loading master. Maximum discharge pressure 125 lbs/sq. in.

REPAIRS: None available.

GENERAL: No navigational hazards approaching Punta Palenque from the South. SBM shows on radar at a distance of about 11 miles.

Reference: B.A. charts 3689, 471; West Indies Pilot Volume 1, Supplement No. 3 1975.

Weather: Wind: N.E. Trades

Current: Predominating from East to West but sometimes shifting to opposite direction for short periods. Velocity about 1.5 knots.

Services: Fresh water, provisions, fuel oil and diesel oil not available. No medical assistance. Shore leave not permitted, repatriation not possible.

Master's Remarks: When approaching from the South, the coast of Dominican Republic gives a good radar target. SBM could be picked up at about 11 miles distance, however, the red flashing light of SBM is very poor. Punta Palenque Pilot could be contacted at a distance of 30 miles.

Authorities: After vessel is moored Pilot acts as Agent together with a senior Custom Officer who came on board with the Pilot. Two junior Custom Officers will stay on board during the stay in port, also Loading Master and/or his assistant. Pilot delivers outward clearance.

SHIPMASTERS REPORT: (1977)

Documents: Last port clearance.

8 Crew lists.
6 Passenger Lists (nil).
3 Stores lists.
5 Firearms declarations.
1 Vaccination list.

To be legitimised by Dominican Consulate if possible, otherwise notarised by the Chamber of Commerce at sailing port or pay local requirements fee.

Pilotage: Pilotage compulsary. Pilot boards 1 mile S.W. of S.B.M. which is the waiting area. ETA required by Pilot at least 6 hours before arrival. The vessel cannot under any circumstances dock without the Pilot as the Loading Master is stationed on the forecastle head and advises Pilot of helm and engine requirements when approaching S.B.M.

Anchorage: Temporary anchorage on the coastal bank to the West of S.B.M. to suit vessels draft.

Restrictions: A vessel may enter and leave the port during hours of darkness and at any stage of the tide.

Max. Size: Max. length 854 ft. Max. draft 48 ft.

Tugs: 1 tug available, tug attends on arrival and departure bringing to and removing from the vessel all the gear required for mooring (Snotters, Strops,etc.). At night the tug also illuminates the hose string as the buoy light is poor.

Radar: The radar reflector on the S.B.M. is excellent and gives out a good echo at 10 miles.

Berthing: Position of S.B.M. 18° 12′ N., 70° 11.4′ W.

Terminal Operator: Refineria Dominicana De Petroleo S.A. (Refidom SA).

At the time of bething depth of water under the keel by echo sounder was 45 ft., the nature of the bottom at the berth was sand and coral.

As stated above the vessel is able to dock and un-dock at any stage of the tide day or night.

When 1 mile from the S.B.M. (waiting area) vessel approaches the buoy on a N.E. heading parallel to the hose strings and then turns the vessel to stem the current flow.

Moorings: Plaited ropes with cable chafing lengths shackled between the two plaited ropes. Snotters to the bits from the central panama lead.

The port derrick to be rigged in advance to except mooring gear from the tug and lift hoses (2×12″ string).

Hoses: S.B.M. hoses connected to the ships manifold (2×12″). Distance from the S.B.M. to the shore tanks is 1.5 miles. Shore booster pump not available, steam jacket or similar facilities not available. Max. pressure on line 125 p.s.i., max. weight to be lifted 5 tons. Product Handled: Crude Oil. Ships accommodation ladder not required.

Density: 1025.

Services: Fresh water, provision, repairs, airport, surveyors, fuel oil, doctor, hospital, laundry, slop facilities, none of these services are available.

Time: Pilot advises time is GMT minus 4 hours (throughout the year).

General: Vessel's ETA by telex to be given to Santo Domingo from the last port of call, any changes should be passed to the Agent through 'Curacao Radio' as at no time whilst on passage from Punta Cardon could traffic be passed through 'Santo Domingo Radio'. The Pilot acts for Agent, Customs and Immigration (with Port Captain in attendance) leaving with papers, cables and telex, consignees documents etc., after the vessel is all fast. The ship's official documents were not examined. 2 custom guards and the Loading Master remain on board and should be provided with cabins and meals.

The Loading Master accepts the notice of readiness and ullages, specific gravity and temperatures of the cargoes given by ship's staff, he also maintains VHF contact with the Agent in Santo Domingo through the refinery.

The Loading Master, Berthing Master and Sailing Pilot all speak English. VHF contact made with the refinery when 45 miles from the S.B.M. who then passed our amended ETA to the Pilot.

Shore Leave: Not possible.

PUERTO PLATA: 19.49 N. 70.41 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738 and 2638. Pilot boards 0.5 miles from port entrance. Pilot also on VHF Channel 16.

ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: Night entry not recommended.

Depth at entrance 42 ft., depth on bar 37 ft. H.W. and 34 ft. L.W. Depth in harbour 30 ft. to 35 ft.

MAX. SIZE: 500 ft. length, 28 ft. draft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range Santo Domingo Radio.

TUGS: Tugs available.

BERTHING: One wharf 30 ft. alongside. Pier 496 ft. long, 135 ft. wide. Facilities include water, electricity, cranes, warehouses. New pier recently constructed is 934 ft. long, with depth alongside 35 ft., also 144 ft. wide.

STEVEDORES: ETAs required 24 and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.

TANKERS: Berth at molasses/petroleum berth.

DENSITY: Salt water inside harbour.

FRESH WATER: Pipe-line at wharves. Ship's hoses used.

FUEL: Diesel and fuel oil available by truck from Santo Domingo.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.

IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.

CONSULS: All Consuls at Santo Domingo.

REPAIRS: Minor repairs only.

REPATRIATION: Can be arranged.

AIRPORT: Distance 250 km.

POLICE/FIRE/AMBULANCE: At Santo Domingo.

TELEPHONES: Nearest in Customs House alongside wharves.

SHORE LEAVE: Allowed.

GENERAL: No boats to be lowered without official permission.

AUTHORITY: Comandante de Puerto.

AGENTS: See "Santo Domingo".

RIO HAINA: 18.25 N. 70.01 W.

See "General" before first port.
PILOTAGE: Pilot boards from small boat flying a flag with a white "P" on a black background, about 1.0 mile from harbour entrance. Contact Pilot on 2738 or 2638 and Channel 16 VHF.
RESTRICTIONS: It is recommended to sail during daylight only.
TUGS: 2 tugs, 1,200 h.p. and 850 h.p.
MAX. SIZE: Draft about 29 ft. Length about 600 ft. for sugar berth.
BERTHING: Vessels going to load sugar swing inside the harbour with the aid of a tug, and berth starboard side to the quay. Ship's gangway is recommended. There is sometimes quite a swell running inside the harbour. The port anchor is used for berthing and unberthing.
LOADING: Sugar is loaded by 3 mechanical loaders which are fixed so that large vessels are required to shift along the quay to load in end hatches. Loading rate is quoted as being 350 t.p.h. Cargo quantities are given in short tons.

At least one beam has to be removed from each hatchway to allow loader to enter.

Possible to load 8,500 ton vessel within 24 hours.
SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off facilities on East bank of river. Container gantry crane available.
FUEL: Fuel oil, diesel and intermediate fuels available from bunker barge.
REPAIRS: Minor repairs in Santo Domingo.
AUTHORITY: Commander of the Port and Collector of Customs.

SAN PEDRO DE MACORIS: 18.30 N. 69.12 W.

See "General" before first port.
PILOTAGE: ETA required 24 hours before arrival. Pilot meets vessels 0.5 mile from buoy. Pilot Radio Station frequency is 2738 and 2638 also VHF Channel 16. In the event of bad weather vessel should remain 3 miles South of the buoy. Pilot boards from small unmarked motor boat.
ANCHORAGE: One mile South of the lighthouse; depth 60 ft.
RESTRICTIONS: Channel depth 30 ft. Up to 350 ft. length, no restrictions. Larger vessels enter in daylight only.
MAX. SIZE: Vessels of 600 ft. length have berthed alongside. Draft up to 26 ft. maximum.

Larger vessels leaving port after loading may require to use port anchor to manoeuvre around sharp bend in buoyed channels just inside harbour entrance.
HEALTH: In case of illness or death on board, send a cable before arrival; doctors available.
RADIO: Radio Station, frequency 2738, call Radio Pilot de San Pedro de Macoris.
TUGS: Compulsory. Tug joins vessels inside the port – 150 ft. from the quay. One tug 500 hp.
BERTHING: Quay No. 1, – 900 ft. long, 25 ft. depth; Quay No. 2, 600 ft. long, 25 ft. depth; Quay No. 3, 600 ft. long 24 ft. depth.

Large vessels arriving to load swing inside the harbour using starboard anchor and berth port side to quay. At a later date barges are placed between the ship and quay, to permit greater draft, and Pilot receives extra payment for doing so. Use of gangway is recommended.
LOADING: Vessels loading sugar use ship's gear and ship has to supply rope slings. The chains on the centre sections of MacGregor hatches are broken, and a gap of about 2 ft. made, through which the bags of sugar are bled into the holds at the rate of about 220 tons per gang per day. Only 6 bags per sling are lifted at a time. Stevedores cover hatch openings with tarpaulins when loading is completed for the day. They will make up any extra slings that are required if ship supplies rope.
TANKERS: Oil line diameter 8 in. Max. pressure 60 p.s.i.
FRESH WATER: Available.
FUEL: Supplied by truck.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew.
CUSTOMS ALLOWANCES: Only sufficient for port consumption. Allowed take only 2 open packets cigarettes ashore.
IDENTIFICATION CARDS: Required.
CONSULS: Great Britain Vice-Consul only. Others at Santo Domingo.
REPAIRS: Minor repairs only.
AIRPORT: Airport is located at 40 km. distance.
TELEPHONES: No telephones on board.
REGULATIONS: Rat guards to be fitted on all ropes. No boats to be lowered without official permission.
REPATRIATION: Can be arranged.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Harbour being dredged to 30 ft. alongside the wharves.
AUTHORITY: Comandante de Puerto.

AGENT: See "Santo Domingo".

SANTO DOMINGO 18.28 N. 69.53 W.

(See Plan Book)

See "General" before first port.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738, 2182, and 2638 kHz. Pilot boards 1.5 miles off breakwaters. Pilot also on VHF Channels 12 and 16.
ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.
RESTRICTIONS: If draft over 24 ft., Master should advise Agent before arrival. Berthing after dark not advisable for petroleum and grain berths.
MAX. SIZE: Length over 650 ft. inadvisable. Max. draft 29 ft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio.
TUGS: Join vessel inside port. Ship's lines used. 2 tugs available, 1,200 h.p. and 800 h.p.
BERTHING: Daylight berthing only for vessels proceeding to private Tallow/Soda terminal and Cement Wharf.
BRIDGES: Vessels proceeding up river, height limited to 95 ft. above waterline.
STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.
MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore.
TANKERS: One berth, draft 29 ft., at Sans Souci.
DENSITY: Brackish inside harbour. Effect of tide negligible.
FRESH WATER: Pipe-line alongside berths. Ship's hoses used.
FUEL: Fuel and diesel available ex-tanker berth. At other berths by bunker barge.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond not sealed.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only.
DRY DOCK: Can accept vessels up to 320 ft. long, 50 ft. beam, 17 ft. draft.
REPATRIATION: Can be arranged.
AIRPORT: Distance, 26 km.; served by regular airlines with numerous flights daily.
POLICE/FIRE/AMBULANCE: Police, San Domingo 682-3000; Ambulance, San Domingo 682-4288; Fire, San Domingo 682-2000.
TELEPHONES: No connection to vessels.
SHORE LEAVE: Allowed.
GENERAL: No boats to be lowered without official permission.
DEVELOPMENTS: Santo Domingo's Sans Souci tourism wharf, phase 1, is now under construction on the Eastern side of Santo Domingo harbour. It is scheduled to be completed by the end of 1977.

Phase 1 of the project comprises the construction of a dock with a platform measuring 250 m. in length by 31.40 m. in width. Totally made out of precast prestressed concrete members, it is designed to accommodate simultaneously two 20,000 metric ton displacement passenger ships or one of 50,000 metric tons. Besides the dock itself, there is a 20,000 sq. ft. passenger terminal building to be built which will be equipped with all the services and facilities necessary to allow cruises to originate in the new port.

Also under construction is a 1,000 metric ton potable water reservoir with a 50,000 G.P.H. pumping station.

The site selected, the Eastern shore of Ozama River, is 15 minutes by car from Santo Domingo's Las Americas International Airport.

The entire harbour will be dredged to a minimum depth of 35 ft. below mean sea level; the dredging work for the tourism wharf is expected to be finished before the end of 1977.

Upon completion the Sans Souci tourism wharf will be exclusively dedicated to tourism traffic.

Phase 2 and Phase 3 consist of berthing facilities for one 20,000 metric ton displacement passenger ship each; construction of these additional berths has not yet been ordered by the Government.
AUTHORITY: Comandante de Puerto.

AGENTS: Baez & Ranik S.A., Edificio La Cumbre, Centro Commercial NACO, Apartado 1221, Santo Domingo. Cables: "Tatem Santodomingord". Telex: ITT 3460364, RCA 326178. Tel. 565-6661.

NOTES

Please also advise Shipping Guides Ltd.

Ecuador

GENERAL

DOCUMENTS: Apart from the usual ships papers the following documents are required by the Port Authorities using Standard ALALC forms.

1 Health Declaration and Annex.
2 Voyage Memorandum.
1 Crew List, with vaccination dates.
6 Crew List.
6 Passenger List (or negative).
6 Passenger List (in transit).
2 Crews Personal Effects.
3 Passenger Baggage.
3 Mail List (or negative).
4 Store List.
3 Cargo Manifest (in transit).
3 Cargo Manifest (for port).
1 Bills of Lading for the Port.

The ship's Agents may also require copies of these forms.

Consular documents must be delivered to the Customs Authorities as follows:–

From each port where cargo was loaded for Ecuador
  Consular Manifest (legalised).
  1 Parcel List, if any (legalised).
  4 envelopes addressed to the Custom's Administrator, the Director General of Customs, The Controller General of the Nation, and the Ministry of Finance.

Notice of Arrival, and intended sailing date must be given to the Port Authorities, via the Agent, at least 3 days prior to arrival.

PRATIQUE: Radio Pratique is not normally granted. Notice of arrival should be given at least 24 hours prior to arrival to Radio Naval Guayaquil, call sign HCG. Listens on 500 kc/s. 8,385 kc/s. 8,320 kc/s. Answers back on 8,472 kc/s. 8,475 kc/s.

The message should read as follows:–

CAPUERTO
MEDICO SANIDAD
ADMINISTRADOR ADUANA followed by name of port
IMMIGRATION

"vapor ...1...…2... procedente ...3... no enfermos abordo, no explosivos no pasajeros para ...4... pasajeros en transito ...5... tons carga para descargar ...6... sacos correo para descargar eta boya ...7... agencia ...8... ...9... Capitan. or in translation (original must be sent in Spanish).

SS ...1... ...2... from ...3... no sick on board, no explosives no passengers for Guayaquil (or name of port) ...4... passengers in transit ...5... tons cargo to discharge ...6... bags of mail to unload ETA sea buoy ...7... agency ...8... ...9... Captain.

1. being name of the vessel.
2. nationality of the vessel.
3. last port and port of call.
4. number of passengers in transit (logically, if there are passengers for the port call, instead of saying (no pasajeros para .. the correct number would be indicated).
5. number of weight tons of cargo for the port.
6. number of bags of mail.
7. estimated hour of arrival at sea buoy, or buoy No. 1 off Data.
8. Agent's name.
9. Master's name.

The same message should be sent to the ship's Agent.

When quoting arrival times use GMT or Ecuadorian Time (GMT minus 5 hours). Summer time is not kept.

The boarding party usually arrives on berthing.

The Vaccination Certificates should be ready in the same order as the Crew Lists.

FLAG: The national flag has yellow, blue and red horizontal stripes. The yellow is twice the width of the others. Government vessels show the national Arms in the centre of the flag.

All foreign vessels will fly the flag from the highest mast.

PILOTAGE: Pilotage is compulsory for all vessels over 500 tons gross. Vessels should await the Pilot off the sea buoy at all ports unless instructed to the contrary. The Pilot must be requested by the Agent at least 12 hours in advance. They are available 24 hours a day, every day of the year.

STEVEDORES: The stevedores are drawn from the 4 respective unions in rota. The foremen are generally selected by the Agent. The same gang will work the ship until completion, working around the clock if necessary. Gangs will start work at virtually any hour.

Opening and closing of ships hatches is undertaken by the stevedores and also the rigging of gear. Even though the stevedores receive payment for rigging anyway, it is advisable to use the ships crew.

Cold Fresh water and lavatories must be made available to the stevedores.

Tally clerks are selected in a smiliar way to the stevedores.

WATCHMEN: 1 or 2 Customs guards will remain on duty, nevertheless the use of watchmen is advised.

GARBAGE: Before docking all vessels should cover all discharge points to prevent material or water being deposited on the quayside. The dumping of any waste is strictly forbidden except in an emergency. No oil may be dumped within 50 miles of the coast, and Ecuador strictly enforces the Anti-Pollution laws.

RAT GUARDS: There must be placed on all mooring lines while the vessel is in port. This rule is strictly enforced.

FIRE DRILL: Periodical fire drills are held. The signal is 6 short blasts. Smoking on dock is prohibited, and cigarettes must not be thrown through port holes.

CREW: Shore leave is permitted except at the Tanker berths. Each man must carry an identity card. It is difficult to sign on a foreign Crew member in Ecuador, unless he has been left behind by another company vessel. A visa is not required for replacements arriving from abroad, but the Crew member must have a passport or seaman's book, together with a letter from the ship operator stating name of vessel to be joined.

In declaring personal effects, all new purchases must be listed, as well as electrical devices, typewriters, sextants, etc.

The master has the right to issue or annul boarding passes if he has the approval of the Port Authority.

As a rule visitors are not allowed entry to the Port Area, although special permits are given to certain vendors. They may come on board solely at the discretion of the Master.

BALAO TERMINAL (ESMERALDAS):
01.02 N. 79.44 W.

OPERATORS: Texaco-Gulf.

LOCATION: Sea terminal berth X (SBM-W) for vessels up to 100,000 d.w.t. is off the mouth of the Esmeraldas River in position Lat. 01° 02′ 03″ N. Long. 79° 42′ 57″ W. and has a minimum depth of 120 ft. at LWS. Berth Y (SBM-E), also for 100,000 d.w.t. vessels, is situated 3.3 miles from the shore and 1 mile distant on true bearing 081°. From berth X in position Lat. 01° 02′ 12″ N. Long. 79° 41′ 51″ W. and has a minimum depth of 120 ft. at LWS.

Berth X (SBM-W): *Lights:* green – blue, flash 1.2 secs., eclipse 6.8 secs., range 5.3 miles, fitted with radar reflector.

Berth Y (SBM-E): *Lights:* green – blue, flash 0.3 secs., eclipse 0.7 secs., range 5.3 miles, fitted with radar reflector.

DOCUMENTS: The following documents are required for the Port Officials who will board any time after arrival, usually during mooring operations.

8 Crew Lists.
6 Passengers List.
4 Cargo Manifest (1 visaed).
2 Bills of Lading.
8 Stores Lists.
6 Copies of List of Personal Effects of Crew.
6 Copies of Voyage Memorandum.
1 Copy of Health Patient Certificate.
2 sets Consular Papers to be obtained at the Ecuadorian Consulate at last port. If no Consul available or by other reason, this matter will be arranged and settled by Ship's Agency in Esmeraldas.

Consular papers may be obtained by the Agents of ship at last port, however they MUST arrive at Esmeraldas no later than 4 days after the vessel has left Balao. Otherwise agency will arrange locally and pay dues in Esmeraldas.

PILOTAGE: Pilotage is compulsory and Masters of vessels are reminded of their obligations to comply with statutory rules and are requested to comply with the following:

1. The Watchkeeping Officer of the ship must be responsible for the boarding and dispatching of the Harbour Pilot.
2. The ladder should be properly secured.
3. The pilot ladder and immediate areas must be adequately illuminated at night.
4. The upper part of the ladder should be safe and secure to enable the Pilot to pass to the ship's deck.
5. The ladder should be in good condition and its treads should remain horizontal throughout the boarding or dispatching.
6. The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to the point of access is more than 30 ft., a combination accommodation ladder/pilot ladder, or other equally safe and convenient unit for boarding or dispatching should be used.
7. The ladder should be rigged in such a manner that each step rests firmly on the ship's side, and spreaders should be placed at intervals of no more than 10 ft. to prevent the ladder twisting.
8. Nylon pilot ladders must not be used.

Pilotage zone: This zone must be considered within the following co-ordinates:

01° 00′ N.
01° 04′ N.
79° 40′ W.
79° 46′ W.

In this zone are included the Pilot boarding, anchoring and mooring areas.

Pilot boarding area: The Pilot boarding area is in a position approximately 1.5 miles N.W. of berth Y (SBM-E) between the parallels of 1° 04′ and 1° 03′ N. and meridians of 79° 40′ W. and 79° 43′ W.

ANCHORAGE: Vessels required to anchor on arrival will anchor in a position approx. 1.5 miles S.W. of the berth X (SBM-W) in an area between the parallel of 1° 02′ N. and 1° 00′ 30″ N. and the meridians 79° 44′ W. and 79° 46′ W.

RADIO: Vessels bound for Balao must advise their ETA to Superintendencia Naval, Esmeraldas, 72 hours and 24 hours before arrival. Message must contain vessel's name, ETA, Master's name. A 24 hour watch is maintained on HF-SSB-2182 – 2136.3 kHz call frequency, and 4139-6210 kHz working frequency and VHF Channel 16. Vessels are usually able to make contact on this channel at a distance of 20-30 miles on the seaward side of the berth operation. Channel 14 will be used for contact between ships and the Superintendencia Naval before the port arrival. Channel 12 is used for internal traffic, loading, unloading and ships berthing operations.

TUGS: 3 line boats available, 560 h.p. each.

BERTHING: The mooring area is situated between the parallels of 01° 03′ N. and 01° 00′ N. and the meridian 79° 40′ W. and 79° 44′ W. Mooring operation will be undertaken by day under normal weather conditions (0500 – 1700 hrs.). Unmooring operation will be undertaken by day and night without restrictions.

In this area the traffic of small craft such as fishing vessels, coasting vessels engaged in cabotage is absolutely prohibited with the sole exception of small craft used in the reception and mooring of tankers.

Mooring Turn (Arrival): Arrival time is considered the time the vessel reaches the anchorage vicinities or the time the Pilot boards the vessel, whichever occurs first. In any case, the Terminal will give priority to the ship that arrived first.

Mooring information: When a vessel is within reasonable distance of the buoy, two ship's lines will be carried by the mooring tug to the floating buoy lines and secured to same. These lines will then be heaved aboard. As the buoy ropes come clear of the water, it will be noted that chains are attached to them. These chains are to be secured to the bitts in such a manner that the nylon is outside of the external length of the ship so the chains absorb any chafing if the buoy lines cross the bow. There are two buoy lines. Power must be available at all times on all deck winches and windlass while the vessel is at the berth.

A mooring line must be available aft, secured to the bitt and of sufficient length to enable a tug boat to pick up the eye and tow off if necessary.

Unmooring: The Mooring Master will advise to Texaco Control the estimated time for the completion of loading and will ask for Official Pilot. Then, hose disconnecting operation is undertaken aboard ship. After the unmooring takes place, the tug boat comes alongside the ship to transfer all material and personnel that have been used during the operation. Then the vessel will be ready to leave the Terminal after receiving the respective documents.

Average Operation Time: Subject to different characteristics of each ship, it can be considered as reference, the following rates:

(a) Approaching the SBM from Anchor Area, 50 minutes or	
(b) Approaching the SBM from Pilot Boarding Area	30 minutes
(c) Putting mooring and connection equipment aboard ship	30 minutes
(d) Mooring	30 minutes
(e) Hose lifting and hose connection	80 minutes
(f) Hose disconnecting	40 minutes
(g) Unmooring	10 minutes
(h) Removal of Personnel and Equipment	25 minutes
(i) Maximum flow rate	4,200 t.p.h.

HOSE HANDLING: *Buoys "X" and "Y".* Lifting, connecting, disconnecting, lowering and other operations will be performed by a special team from shore under the Loading Master's orders with assistance of the ship's deck Officer. Port derrick must be rigged and ready for use on arrival and vessels should be warned that the weight of each hose is at least of 5 tons under favourable conditions. Members of the ship's crew will be required to operate the winch or winches.

Particular care should be taken during the hose handling operation in order to avoid serious damage to the hoses, the plastic floats and buoys on the plate edges, rails, etc.

LOADING: Loading is through SBMs which are 49.5 ft. in diameter and held, each one in position by fixed chains secured to piles sunk into the sea bed. Buoy X is equipped with 810 ft. length and 24-inch self-float loading hose which is manifolded to two 105 ft. length and 12 in. tail hoses. Buoy Y is equipped with a 20 in. self-float loading hose manifolded to two 12 in. tail hoses. Each buoy is equipped with a 810 ft. length and 20 in. floating string reduced to 12 in. tail hoses for deballasting. Standard loading rate is about 30,000 b.p.h.

Potential Loading Rate:
Berth X 38,000 b.p.h.
Berth Y 36,000 b.p.h.
Max. Pressure allowed· 225 p.s.i.
Booster pump: none.

DEBALLASTING: The load on top system is accepted at this terminal and vessels are requested to arrive with slop tanks "settled out" as far as possible. At the present time the terminal is not able to handle slops and until such time as the terminal is able to receive slops, shore discharge is prohibited.

All clean ballast must be pumped ashore, with the exception of vessels especially equipped with clean segregated systems – which are reserved for ballast only. Vessels so equipped will be permitted to pump segregated ballast overboard after being accepted and approved by shore inspectors.

For the water processing of ballasted tankers, the Balao Terminal has an adequate system that starts in the hoses of the buoys and passes through a submarine pipe going to a preseparator, where it hits and separates: first the water of the hydrocarbons, then goes to a decantation pool, where it stays 48 hours and after goes to a final separator in which are collected the last traces of hydrocarbons and finally the clean water is drained to the sea.

Vessels going to Balao to load crude oil must arrive with sufficient ballast for safe manoeuvring, that is, should be 25 to 30% of the capacity of the ship (Deadweight tonnage) and 10 ft. trim or less.

After the ballast tanks have been inspected and found satisfactory, deballasting will commence on the advice of the Company representative. When the ballast has been discharged, the tanks will again be inspected and if ready for cargo, a Dry Certificate will be signed by the Company representative. In any case cargo will be loaded when both ship and shore are ready to commence operations.

Under no circumstances will the vessel be expected to load at a faster rate than that requested by the Master. It is the ship's responsibility to check that the requested loading rate is not being exceeded. The Company for their part, will make every effort to maintain the requested rate and will advise of any alteration in the loading rate immediately.

POLLUTION: The Ecuadorian Government have very strong views on pollution and vessels are warned that a very careful watch is kept at all times to ensure that pollution does not take place – or that if pollution does occur it is controlled as quickly as possible. Masters are advised that it is against the law to pollute the waters and coast of this Country and severe penalties are imposed for such offences.

During the hours of darkness it is requested that searchlights from bridge wings and approved floodlights are used to illuminate surrounding waters to facilitate detection of oil and assist generally in loading operations. Vessels are advised that failure to supply sufficient lighting could result in cargo operations not being allowed during the hours of darkness. Such delays would be for vessel's account.

SHIP'S OBLIGATIONS IN PORT:

(a) It is the obligation of the ship's Master or his representative to receive the official Pilot at the gangway and provide him with all information required.

(b) Ship's Master must delegate the First Officer or any other responsible officer as his representative for receiving Official Authorities at the gangway and provide them with documents and information while remaining on board.

(c) Ship's Master is obliged to present to the Superintendencia Balao Insurance Certificate against pollution issued by Tovalop, Ship's Register and all ship's documents that might be required.

(d) Accommodation and meals must be provided for Ecuadorian Guard personnel, such as naval personnel and others as required.

(e) Accommodation and meals must be provided for the Mooring Master on duty.

(f) Meals must be provided for official Pilots if they are on board at meal times.

(g) Facilities and personal assistance must be provided for Government officials representing the Natural Resources Ministry who will board the vessel to perform tank inspections and loading control.

WEATHER AND CURRENT: Wind and swell are mostly from S.W. direction. During the wet season (December to May approximately) wind and current are from a N.E. direction. The currents vary frequently, sometimes reverse direction from the wind causing the vessel to yaw heavily at the berth. Nevertheless, in general, the weather the whole year is good. Sometimes, however, during the dry season (June-November) mooring operations are limited to wind intensity.

DENSITY: 1025.

FRESH WATER: Available but limited.

MEDICAL: Hospital and clinic available, but limited.

FUEL: Not available.

TIME: GMT – minus 5 hours throughout the year.

PROVISIONS: Available.

REPAIRS: No facilities of any kind are available at this port.

DIRTY BALLAST: Ballast facilities are available except slops.

REPATRIATION: Only if the person concerned holds the necessary valid certificates and documents. For crew joining make Quito the disembarking airport.

CONSULS: Colombia, all other consuls in Quito.

SHORE LEAVE: Possible, two radio-equipped launches provide service day and night.

DEVELOPMENTS: *Esmeraldas:*
The first stage of the new port now under construction will have 2 general cargo berths, a service wharf and a floating berth for local traffic. The master plan provides for expansion of the port to 5 general cargo berths, a container berth and a roll-on/roll-off berth.

At present, the traffic (mostly banana exports) through Esmeraldas is handles by lighters working to ships moored in the Rio Esmeraldas.

GENERAL INFORMATION: Yagua Shipping Agency has its installations on the Oceanfront side of Esmeraldas, Ecuador, and dedicated exclusively to attend to handling and protecting Agents on behalf of Owners, Charterers and Operators for crude oil tankers arriving at this port. They are also Agents of Texaco-Gulf consortium for their individual and chartered vessels as well as handling of documents and export policy of every particular crude shipment.

They are also attending the vessels which carry shipments of the Ecuadorian Government on behalf of the Operators.

AGENTS: *Main Office:* Yagua Ltd., Shipping Agency, P.O. Box No. 69, Quito, Ecuador. Rodriguez Soto No. 112 y 18 de Septiembre, Quito, (Ecuador). Cable: Yagua Quito (Ecuador). Telex: Yagua Quito 3530047 (Monday through Friday. See Esmeraldas Inf. for Saturdays and Sundays). Telephones: 524816 – 521706 – 529133.

Operations Office: Avenida Kennedy 509, Las Palmas. Cable: Yagua Esmeraldas (Ecuador). Telephone: 711-670 (available 24 hours a day).

Also on VHF Channels 16, 6, 12 and 71.

GUAYAQUIL: 02.12 S. 79.52 W.

DOCUMENTS:

Port Doctor:

Derat Certificate.

Maritime Declaration of Health.

Crew Roll with dates of vaccination against smallpox for each member.

Same for each passenger.

Passenger List.

Passenger List in Transit.

Harbour Master's Office:

Voyage Report.

Clearance from last port.

Crew Roll with original visa from Ecuador Consul in first port of voyage (3 copies).

Passenger List with original visa from Ecuador Consul in embarking port, or declaration that they have no visa, signed by Captain (2 copies).

Passenger List in transit signed by Captain or declaration that they have no passengers in transit (2 copies).

Provisions List, Stock and Medicines on ship (3 copies).

Cargo Manifest in transit (1 copy).

Combustible or inflammable Cargo (1 copy).

Customs:

8 copies of Manifest.

Sealed envelope of Manifests, consular and commercial invoices and non negotiable vouchers.

Cargo index and copy of Cargo Manifest in direct transit (8 copies).

A Register (8 copies) of spare parts for vessel and provisions.

Crew Roll and detailed list (8 copies) of personal belongings of officers and crew.

Passenger List, with indication of their suitcases and list of suitcases that travel without their owners; in this case should be specified the port where they were put on board and personal declaration of each passenger (8 copies).

If the vessel with ballast, Master will be obliged to produce (besides the ballast certificate) documents already mentioned in each respect. Master or Maritime Agency will produce a written statement to Customs within 12 hours from arrival of vessel whether they decide to take any cargo for exporting. If not loading vessel must leave within the following 24 hours.

Immigration:

Crew List signed by Master.

Passenger List of those who disembark there or a declaration of none for this port, signed by Master.

Passenger List in transit, or a negative declaration signed by Master.

In case of having passengers to disembark in this port, Master should produce passports and visas.

Crew identification cards or similar documents.

Inspection of ship by Authorities will be done (compulsory) within 3 hours of arrival, usually as soon as ship berths, or in quarantine.

PILOTAGE: Vessels approaching port to notify their arrival by Naval Radio Station HCG, 24-hour service, frequency 8476 kc/s. and 500 kc/s. Traffic list broadcast every hour on 8476 kc/s.

Advance notice of not less than 12 hours required, addressed to Capuerto Aportuaria Agencia in either English or Spanish with the following details: date, and time of ETA, destination (whether Buoy No. 1 or Puna), maximum draft, cargo details, details of passengers or mail, and if Pilot required.

Pilot Station for Puerto Maritime: Situated in position 02° 43′ 18″ S. 80° 17′ 30″ W. Pilot boat needs 1 hour to go from Pilot station to Buoy No. 1. Contact by VHF Channel 16, 24-hour service. Pilot boat is wooden, 45 ft. long, black hull, white cabin, with letter "P" on sides. During day carries blue flag with letter "P" and by night has regulation pilot lights.

Pilot Station for River Guayas: Situated in village of Puna. Pilot boat requires a minimum of 30 minutes to move from Pilot station to vessel. Vessels requiring Pilot signal Morse letter "X" by lamp or sound.

Pilot boat has grey iron hull, white cabin with Lancha de Practicos written on both sides. By day carries blue flag with letter "P". By night regulation pilot lights.

ANCHORAGES: *Puerto Maritime:* 1 mile South and 2 miles West of sea buoy in position 2° 44′ 26″ S. 80° 24′ 44″ W. Min. depth in the area is 35 ft.

Guayas River: Inside area between bearings 180° and 135° from the lighthouse of Punta Mandinga at Puna, 1 mile from the lighthouse.

MAX. SIZE: Max. length for ships entering Puerto Maritime is 650 ft., with a max. draft of 33 ft. Vessels of deepest draft should begin to enter 1 hour before high tide. For Guayas River max. length 600 ft. max. draft 23 ft. 6 in.

HEALTH: Procedure to obtain free pratique is to produce health certificates to port doctor upon arrival. To get free pratique by radio, ship must radio to port doctor any changes in health situation on board since leaving last port.

TUGS: Normally join vessel beyond Buoy No. 80. Tugs are compulsory, also use of their lines is compulsory. Cost of both services is included in total cost of port duties.

BRIDGES: No bridges that restrict traffic either in Estero Salado nor in Guayas River, but ships that are to berth in village of Eloy Alfaro (Duran) should take into consideration height of telephone lines between Guayaquil and El Islote, min. height 48 ft.

STEVEDORES: Radio message to ship's Agent will give agency enough data to make all arrangements required for operations of loading/discharging. In Maritime Terminal an average discharge/loading rate of 25 metric t.p.h. per hook.

MEDICAL: If ship requires medical attention, a notice of 12 hours should be given to Agents. Guayaquil Hospital and clinics are available. Vaccination supplied by Health Authorities against smallpox.

TANKERS: Discharge asphalt in Guayas River at a special quay, max. draft 23 ft. 6 in. Discharge of petrol for aviation in Puerto Maritime is to lighters, max. draft permitted is 33 ft.

DENSITY: 1012.

FRESH WATER: Available. Three pipes at each berth delivering at a rate of about 20 metric t.p.h. each.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Capitania del Puerto provides members of the Policia Maritima. Ships should supply watchmen with food.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES: All ship's certificates required.

CUSTOMS ALLOWANCE: Each member of crew allowed 600 cigarettes. Each Crew member or passenger allowed 1 litre of wine and 1 litre of spirits.

IDENTIFICATION CARDS: Not required.

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Dry dock with capacity of 3,600 metric tons.

REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriation.

AIRPORT: Airport is 8 miles from Maritime Terminal and has scheduled flights to everywhere.

TIME: Local time is GMT minus 5 hours. There are no alterations during year.

HOLIDAYS: 1st January; Good Friday, 1st and 24th May; 24th and 25th July; 10th August; 9th and 12th October; 2nd and 3rd November; 25th December. But only on the 1st January and 25th December is there no working in port.

POLICE/AMBULANCE/FIRE: For any of these services call 211 (interno del Puerto).

TELEPHONES: Arrangements for placing telephone on board ships on request.

SHORE LEAVE: Allowed.

PURSER'S REPORT: (March 1975)

The government have now issued their own set of papers. These must be made out is sets of seven (7) ie:— Seven Crew Lists. Seven Passenger Lists, Seven Crew Customs Declaration Forms, Seven Cargo Manifests, Seven Dangerous Cargo Manifests (if carried), Seven Lists of Mail (if none – nil returns on sheet), Seven General Declarations. One (1) Maritime Health Form. Seven Stores List.

All Forms should be certified by Ecuadorian consul or friendly Nation at Port of departure.

AUTHORITY: Capitan del Puerto de Guayaquil, Puerto Maritimo.

LA LIBERTAD: 02.12 S. 80.55 W. (See Plan Book)

DOCUMENTS: Port clearance is effected at La Libertad.

The following papers must be ready for presentation to the authorities on arrival:

1 Bill of Health signed by the Master and visaed by the Ecuadorian Consul at port of departure.

1 Ballast Certificate visaed by Ecuadorian Consul at port of departure.

6 copies of Cargo Manifest (if any cargo for the port).

6 copies Bills of Lading.

9 Crew Lists (original visaed by Ecuadorian Consul at port of departure).
9 Passenger Lists for the port (if no passengers state "without passengers"). If applicable, the list should show names, sex, age, nationality, port of embarkation, occupation and whether married or single. Passengers must make a declaration of their luggage on Ecuadorian Form No. 94.
9 Stores Lists.
5 Lists of Crew's personal effects (new articles only).
4 Lists of unaccompanied baggage (if none, state "without them").
4 Lists of Encomiendas (list of small private parcels to be landed in Ecuador – if none, state "without them").
4 Lists of Mail (if none, state "without them").

If there is no Ecuadorian Consul at the port of departure, the documents must be visaed by the Consul of a friendly nation.

PILOTAGE: Compulsory. Pilots boarding in position 2° 08′ S. – 2° 10′ S. and 80° 55′ W. – 80° 56′ W. ETA should be given to port 12 hours before arrival. Open roadstead.

ANCHORAGE: No limitations except depth 36 ft.

Vessels proceeding to oil terminal should anchor about 1 mile N.N.E. of the mooring buoys (which are about 15,000 ft. off-shore) where the Port Authorities and Mooring Master board. The anchorage is an open roadstead with sandy bottom.

RESTRICTIONS: *Tankers:* Daylight berthing only.

MAX. SIZE: *Tankers* – LOA 650 ft.
Beam 84 ft.
Loaded draft 34 ft. 6 in. max.
Depth MLWS at mooring is 43 ft.

HEALTH: Vessels arriving from foreign ports should fly appropriate International Code signals to advise state of health and request free pratique. Vessels put in quarantine required to fly signal QL all the time they are in port until Port Health Authority advises to the contrary.

RADIO: ETA messages may be sent by radio to Radio Naval, HCG Guayaquil Radio, 8476 kc/s., 500 kc/s. Radio Naval would then repeat the message to the Naval Station in Salinas, or to the Telegraph Office. Radio Naval has VHF/RT and Telex.

TUGS: Only tankers require tugs to berth at the buoys. Other vessels work cargo at anchor.

BERTHING: No wharves for large vessels, only for coasters.

STEVEDORES: Arranged by Agent; separate ETA not required.

MEDICAL: If urgent medical attention required, Master should radio details in advance. All facilities available.

TANKERS: The Anglo-Ecuadorian Oil Fields Terminal is located in Santa Elena Bay. Four small marker buoys indicate the seaward end of the submarine pipe-line. An Easterly current usually prevails, rate being from 0.5 to 1.5 knots. There is one 14 in. submarine pipe-line fitted with two 10 in. flexible hoses for connecting to ship. Max. loading rate is about 450 t.p.h, and max. pressure is about 150 p.s.i.

Mooring Master assists in berthing vessels. Vessels are moored port side to, using starboard anchor off the starboard bow and mooring buoys for lines to the port bow and astern. Vessels moored during daylight hours only; however, they may unmoor at any hour of the day or night. Recommended that at least 1 tank of clean ballast be retained on board vessels until mooring has been completed. Ballast will then be pumped overboard. Vessels should be equipped with three 9.5 in. or 10 in. (circ.) – 200 fathom hawsers for use in mooring to and 7 rope stoppers each at least 3 fathoms long. The following signals are used in connection with the loading of cargo.

By day: Start loading 2 long blasts of vessel's whistle or siren, 1 red flag hoisted; stop loading 4 long blasts of vessel's whistle or siren, flag hauled down.

By night: Start loading, 2 long blasts of vessel's whistle or siren, 1 red light hoisted; stop loading, 4 long blasts of vessel's whistle or siren, 1 red light hauled down.

To summon the launch, 3 long blasts are to be blown on the vessel's whistle.

DENSITY: 1028

FRESH WATER: Not available.

FUEL: Bunkers available, but have to be requested 72 hours prior to arrival in order to make transport arrangements.

CONSULS: There is no consular representation of any country at La Libertad. The nearest are at Guayaquil and include the U.K., U.S.A., Norway, Sweden, Denmark, Greece and Panama.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by the crew or stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per man.

IDENTIFICATION CARDS: Required.

REPAIRS: Anglo-Ecuadorian Oil Fields Company can effect small repairs.

REPATRIATION: Can be effected from port of Guayaquil.

AIRPORT: At Guayaquil, 130 km. away, served by regular airlines.

TIME: GMT minus 5 hours.

HOLIDAYS: January 1st; Carnival; Good Thursday; Good Friday; May 1st; May 24th; July 24th; August 10th; October 9th; October 12th; November 2nd; November 3rd; December 25th.

TELEPHONES: No connections to vessels possible, except at tanker moorings which is direct to loading installation only.

SHORE LEAVE: Permitted.

GENERAL: Dirty ballast or slops not admissible at La Libertad.

AUTHORITY: Terminal Superintendence La Libertad.

MANTA: 00.56 S. 80.43 W. (See Plan Book)

DOCUMENTS:

A. List of documents, 2 copies (Port Authority 1, the latter will sign a copy for Purser).
B. Sailing Permit from last port. 1 copy for Port Authority representative, who will copy the permit and give original to Captain of Port.
C. General Declaration, 5 copies – Health Department 1, Captain of Port 1, Immigration 1, Custom House 1, and Port Authority 1. The document will contain (see Note No. 4 below):
    1. General data on ship, voyage, cargo and passengers.
    2. Health Declaration.
    3. Stores Declaration.
    4. Under remarks – any pertinent item.

    Should be signed by Master and ship's Doctor or, if no doctor aboard, by Purser. For further details, see Note No. 3 at end of this Article.
D. List of passengers destination Manta, including list of their baggage, 4 copies – Customs 1, Immigration 2, Port Authority 1.
E. List of Passengers in transit, 3 copies – Immigration 2, Port Authority 1.
F. Crew List (including and indicating any members leaving vessel at Manta), 4 copies – Customs 1, Immigration 1, Captain of Port 1, Port Authority 1.
G. Manifest of Cargo for discharge at Manta including transhipment 4 copies – Customs original and copy, Port Authority 2.
H. Unaccompanied Baggage List including baggage for any member of the crew, who may disembark, 3 copies – Customs 2, Port Authority 1.
I. Mail Manifest, 2 copies – Post Office 1, Port Authority 1.
J. Checking Books, 5 copies, plus one copy for each point of possible discharge of cargo from vessels for Port Authority.
K. Bills of Lading, 1 complete set for Port Authority.
L. List of vessel supplies including liquors, cigars, cigarettes, other tobacco products, matches, lighters, clothes, novelties, and provisions will be maintained in Purser's office for review by Custom House.
M. Tissue Manifest, hatch list and cargo plan. 1 copy of each for Port Authority prior to arrival of vessels. These papers to be sent by air mail as per regulations.
N. Ballast Certificates will be used instead of manifests when vessels do not carry any cargo.
O. General Manifest. This manifest will include all cargo loaded during voyage which will include all cargo in transit – 1 copy. General manifest will be maintained in Purser's office for review by Custom House, and be accessible for customs at all times.

Note No. 1: All papers (items A to K) will be delivered to representative of Port Authority who will check them against list of documents to be receipted for Purser. Port Authority will subsequently distribute documents to interested parties as indicated above.

Note No. 2: Port Authority reserves the right to refuse berthing facilities until all documents received. Of course, this authority will be handled with discretion to avoid unnecessary or unwarranted delay to vessels, passengers, and cargo.

Note No. 3: All ship's papers will be filed in Port Authority office, and authorities noted herein are welcome to inspect them whenever they wish to do so.

Note No. 4: General Declaration should contain the following:

A. Name of vessel, length and registered tonnage.
B. Owners.
C. Voyage number and ports of call on voyage.
D. Total number of passengers aboard.
E. Total tonnage (of 1,000 kilos) of cargo aboard.
F. Total number of passengers for Manta.
G. Total tonnage (of 1,000 kilos) of cargo for Manta.
H. Health Declaration.
I. Stores Declaration that ship's consumable foodstuffs and consumable supplies are under lock and key; that the slop chest, bazaar, and store-rooms containing liquors, cigars, cigarettes, other tobaccos, matches, lighters, clothes, novelties, sports material, toilet articles, cosmetics, medicines, etc. have been locked and sealed with metallic non re-usable seals with . . . . serial numbers. The seals are identifiable by their non-repeat numbers.

    All vessels should have these seals aboard and should equip doors and door frames with suitable secure hardware through which seals can be passed. (Model of the form for the above document may be obtained from the Port Authority).

Note No. 5: Baggage listed as cargo should not also be listed as baggage or vice versa.

PILOTAGE: Compulsory. Pilot boat by day will show blue flag at mast head; by night red light 2 ft. 6 in. below mast head light, both visible around the horizon.

Pilot will board at point located at distance of half a mile, 045 degrees from Manta lighthouse (Lat. 00° 56′ 20″ S. Long. 80° 43′ 02″ W.). He will immediately proceed to conduct ship to inner harbour and dock at assigned pier or anchor in assigned anchorage.

Vessels will not have to anchor, but will reduce speed to steerageway and stop propeller. Lower Jacob's ladder so Pilot may board safely. Pilot will act as Representative of Port Authority. Other officials and Representative of steamship Agency will embark once ship has tied up.

Pilotage compulsory for all foreign vessels over 500 tons, with following exceptions:

(1) Fishing craft, yachts, tugs, barges and other craft of less than 500 tons total displacement whose handlers are suitably licensed by Captain of the Port of Manta.

(2) Vessels of the Ecuadorian Navy.

Note: Masters of large vessels and handlers of small craft who do not follow all rules of safety, including Rules of the Road may lose their right to navigate within jurisdiction of the Port Authority and may be subject to additional sanctions.

ANCHORAGES: Free anchorage area located around a point 1 mile from Manta lighthouse (Lat. 00° 56′ 03″ S., Long. 80° 43′ 01″ W.). Depth 45 ft. Anchorage inside breakwater will be assigned by Pilot.

RESTRICTIONS: No restrictions upon entry. Vessels up to 32 ft. draft may enter at any time of day or night.

MAX. SIZE: Max. permissible length 600 ft.; breadth 60 ft. draft 32 ft.

HEALTH: Radio pratique granted all ships in accordance with International Sanitary Regulations. Health documents will be delivered to boarding officer of Port Authority. When pratique granted by radio, not necessary for port doctor to board vessel.

In request by radio for pratique, vessels should give following data 12 to 24 hours before arrival.

A. Date and hour of expected arrival.
B. Number of Ecuadorian passengers.
C. Number of alien passengers.
D. Statement regarding existence or non-existence of communicable diseases aboard.

RADIO: Manta HCM 8372 kc/s. Radio telephone 2182 kc/s. VHF Channels 5, 6, 12, 16, 24, 25 and 26.

TUGS: A 1,200 h.p. tug, joins vessel in vicinity of pier. Ship's lines usually used. Use of tug for docking and undocking is at discretion of Port Authority.

BERTHING: Berth will be assigned by Pilot at boarding time.

Berthing facilities:

2 Piers Length 200 m. for vessels with draft up to 10 m. Roll-on/Roll-off facility at one pier.

Marginal Quay, length 150 m., for vessels with draft up to 7.5 m.
Marginal Quay, length 150 m., for vessels with draft up to 5.7 m.
Marginal Quay, length 150 m., for vessels with draft up to 3.8 m.

Cranes: Mobiles cranes with capacity 12–35 tons.

STEVEDORES: Arrangement for stevedores made by ship's Agent prior arrival.

FRESH WATER: Fresh water available in small quantities.

FUEL: Diesel oil available in small quantities by truck.

FIRE PRECAUTIONS: Regular fire precautions should be taken by all ships. Smoking should be prohibited in any section of the ship used for cargo. No smoking on the weather deck, cargo decks, and the ship's holds, whether cargo being worked or not. Smoking around hatches or at cargo winches must be prevented.

Smoking should be restricted to the passenger section of vessels, and to officers' and crew's quarters where suitable receptacles are available.

Persons including officials can be fined or refused entrance to terminal at discretion of Port Authority for careless or intentional disregard of reasonable fire prevention precautions.

Port Authority reserves right to inspect cargo working sections of vessel, to check precautions against fire, and to determine whether there are any undue accumulations of combustible materials.

Pumps and other fire fighting equipment aboard should be maintained in a state of readiness as long as vessels are in the terminal.

DEVELOPMENTS: Open storage area of 10,000 sq.m. will be available near berths in February 1979.

GANGWAY/DECK WATCHMEN: Custom police keep watch at the gangway.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco, small amounts for personal use while in port. Wine and/or Spirits, wines and liquors by the glass for consumption on board while in port.

CARGO GEAR: Ship should have cargo nets, but Port Authority can provide cargo nets at extra cost.

IDENTIFICATION CARDS: Crew members should have identification cards while ashore at all times.

CONSULS:

Germany: Mr. Jorge Appenzauser, Tel. 611-169.
Colombia: Dr. Anibal Ramirez Angel, Tel 610-989.–Malecon.
Chile: Mr. Marino Concha Richards, Manuel J. Calle 200, Tel. 610-151.
Panama: Dagoberto Santana. Morona.
Italy: Romulo Massari P. P.O. Box 4847. Tel. 610-395.

REPAIRS: No repair facilities available.

REPATRIATION: Repatriation of crew members through Port of Guayaquil.

AIRPORT: Airport with 2,500 m. runway. Flights to Quito at 10.50 hrs. on Monday, Wednesday, Friday. From Portoviejo (36 kms.) flights to Quito on Tuesday, Thursday, and Saturday. Air taxis on request.

TIME: Local time GMT minus 5 hours.

HOLIDAYS: No movement of cargo within the terminal on 1st May, Christmas Day, or after 2000 hrs. on the 31st December, or on New Year's Day.

POLICE/AMBULANCE/FIRE: Police 610-900; Ambulance 612-014; Fire 610-100.

TELEPHONES: Telephone service can be obtained at Terminal Office, at same rate as public telephones.

SHORE LEAVE: Crew members are welcome ashore.

AUTHORITY: Autoridad Portuaria de Manta.

PUERTO BOLIVAR: 03.14 S. 80.01 W.

DOCUMENTS:

3 Voyage Memorandums.
2 Maritime Health Declarations.
1 Consular Despatch.
1 Port of Origin Certificate.
10 Crew Lists.
8 Stores Lists.
3 Individual Declaration List for each member of the crew.
8 Lists Passengers Disembarking at this port.
8 Lists Passengers in transit.
4 Luggage, Mail and Commissions Lists.
4 Manifest of Cargo Lists.

Documents for Port's Authority should be supplied by Agents:.

1. General Cargo Manifest in complete sets (Importation in triplicate, Exportation one set).
2. Bill of Lading, complete sets: Importation (one set), Exportation (one set) at time of sailing.
3. Export Customs House Clearance Document (one set). This document is replaced by the Bill of Lading.
4. Certificate of Ballasting.
5. Request for Mooring Berth.
6. Stevedore's cargo plan per hatch.
7. Muster-roll of cargo.
8. Tally books: 15 copies in Spanish. These must be in accordance with the current Tally Law.

PILOTAGE: Send ETA through Radio Naval of Guayaquil 24 hours before arrival. Pilot will board vessel on the port side 1 mile from the sea buoy on arrival and disembark on the starboard side. In case Pilot not available it is recommended to anchor 1 mile from "Punta Jambeli" between the buoy and the lighthouse of Lambeli. Pilot boat is steel, black hull and white cabin, it carries pilot signals in accordance with International Regulations. Service available 24 hours a day. Pilotage is compulsory.

ANCHORAGES: Pilot will indicate recommended anchorage.

RESTRICTIONS: Depths 30 ft. at low water, from 0600 to 1800 hrs. draft allowable 30 ft. From 1800 to 0600 hrs. draft allowable 27 ft.

MAX. SIZE: At Espigon Quay depths alongside 30 ft. inner end to 36 ft. at quay head.

HEALTH: On the arrival of vessel the authorities come on board. If there are no illnesses aboard, the doctor gives free pratique. In case of any illness, Master should advise by radio and the vessel waits in quarantine for the visit of Port Health Doctor.

RADIO: Radio Naval of Guayaquil, Radio Naval of Puerto Bolivar VHF available call pilot station on Channel 16, effective reception 30 miles.

TUGS: 2 tugs available one at 1,200 h.p. and one of 500 h.p. Usually, ship's lines – are used. This service is free.

BERTHING: At Espigon Quay should be carried out within 1 hour before or after slack water. Tidal currents of 1–3 knots in dry season and 3–5 knots in Winter are at right angles to berthing face of the quay.

Wind: From 000° in the morning, speed 3 to 5 knots. From 210° in the afternoon and night, speed 3 to 5 knots.

STEVEDORES: Agents take charge of gangs.

MEDICAL: Hospitals, clinics and dental surgery in Machala, 6 km. from the port. There is also a medical service for vaccination.

DENSITY: Salt water.

FRESH WATER: Only available by tanker truck, capacity 7 tons.

FUEL: No fuel in this port. In case required one has to contact Guayaquil and they send it by small tankers.

GANGWAY/DECK WATCHMEN: The Agent names 1 or 2 watchmen for the vessel besides the maritime police and coast guard.

OPENING/CLOSING HATCHES: Carried out by shore gang supervised by someone on board.

CERTIFICATES: Vessel's Register and Tonnage Declaration required.

CUSTOMS ALLOWANCES: 100 cigarettes per person and 1 bottle wine or spirits per person.

IDENTIFICATION CARDS: Not necessary.

CONSULS: Consul of Peru, tel. 920608.

REPAIRS: There are no facilities in this port.

REPATRIATIONS: The Immigration Office can arrange.

AIRPORT: Distance to the airport is 6 km. It has 6 daily flights in connection with Guayaquil.

TIME: GMT minus 5 hours; there is no change.

HOLIDAYS: No work from 1700 hrs. on 24th December till 0800 hrs. on 26th December, and 1700 hrs. on 31st December till 0800 hrs. on 2nd January; Carnival; Maundy Thursday; Good Friday and Saturday; 1st May; 24th and 25th July; 9th October.

POLICE/AMBULANCE/FIRE: There are services.

TELEPHONES: Can be connected to the vessel.

DEVELOPMENTS: A marginal pier for general cargo is being built. Length of pier 360 m.

GENERAL: When the vessel is anchored, landing service is done by launches. They are called by one long whistle and two short ones. This service works 24 hours a day.

At night: A flashing light is to be used to call launches and not the whistle.

SHORE LEAVE: Passengers or crew do not need any special permit to land.

SHIPMASTER'S REPORT: 1978

Fresh Water: Water is available at anchorage by a barge of 48 ton capacity, at a cost of 120 Sucre (US $4.80) per ton. For ships berthed alongside, water is delivered by modern trucks of 7 or 8 ton capacity, at a cost of 70 Sucre (US $2.80) per ton.

Surveyor: A non-exclusive surveyor acting for Lloyds, Det Norske Veritas, and the Japanese Classification Society, is based at Guayaquil. Loadline survey and engine survey work done. He travels by air from Guayaquil (45 minutes).

Watchmen: One Customs and one Naval guard are obligatory, and should be fed and provided with room to sleep. Ship's crew should be employed day and night, one as accommodation watchman and one as deck watchman. Store-rooms should be locked up, and all loose equipment and lifeboat equipment stowed in lockers or accommodation. Only one accommodation door should be left unlocked, and a ship's watchman posted there, day and night.

Banana Cargoes: Loaded through side doors from the quay or from barges, or both together. No cranes, derricks or mechanised equipment used. About 400 men employed at one time. Very fast.

Casual Labour: This is freely available for painting hull, cleaning engine room, etc. The usual rate of $1 per hour with double for the foreman is now rising, some ships paying $1.50 during 1978. Overtime after 6 p.m., usually double. Possibly negotiable.

PURSER'S REPORT: See "Guayaquil".

AUTHORITY: Port Captain.

NOTES

Please also advise Shipping Guides Ltd.

Egypt, Arab Republic of

AIN SUKHNA: 29.35 N. 32.24 E. (See Plan Book)

DOCUMENTS: Free zone area, no entry documents to the offshore terminal are required.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker two miles Southeast of buoy S2.

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and Night berthing and operation). Arrival draft should be indicated.

LOCATION OF BUOYFIELD: (SBM's)

S1:	29° 35′ 16″ N.	32° 23′ 35″ E.
S2:	29° 34′ 12″ N.	32° 22′ 42″ E.
S3:	29° 35′ 17″ N.	32° 22′ 16″ E.

ANCHORAGE: Tankers can anchor to the S.E. of the buoyfield.

MAX. SIZE: The three berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for S1 and S2 (accommodates vessels up to 285,000 d.w.t.); 320 m. for S3 (accommodates vessels up to 130,000 d.w.t.); Manoeuvring Area Radius: For S1 and S2, 1,220 m.; For S3, 915 m.

Water Depth and Draft Limitations:

For S1 and S2: 85 ft. minimum water depth
75 ft. maximum draft
For S3: 65 ft. minimum water depth
55 ft. maximum draft

RADIO: All messages to be sent via Alexandria/Port Said Radio. Ain Sukhna has a HF long range radio working on 2182 kHz and 4142.5 kHz.

VHF: Channels 16, 78 and 79.

TUGS: Tug "Sukhna" 3,200 hp with fire fighting and with anti-pollution equipment is available as required.

Mooring Launches: 500 hp mooring launches assist in mooring and hose operations.

BERTHING: *Ship's Derrick:* The ship's derrick should be capable of lifting 10 tons and rigged on the port side ready on arrival to take the gear on board for berthing the ship and connecting the hoses.

Hoses: Each berth has two cargo hoses with a 16 in. connection (ASA 150). Connection of hoses to be performed by the vessel under the supervision of SUMED's Mooring Master.

SUPPLIES: No bunkers or supplies are available or permitted.

MEDICAL: Private doctors available at Sukhna for emergency and hospitals are available in Suez.

SHORE LEAVE: There is no shore leave for personnel of vessels unloading at Ain Sukhna Terminal (disembarkment from vessels is strictly forbidden except in emergencies).

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus two hours.

SHIPMASTER'S REPORT: (1977)

Location: The Suez Terminal Ain Sukhna is located on the Western side of the Gulf of Suez, approximately 20 miles South of Suez Bay itself. It is the Southern Terminal of the Arab Petroleum Pipelines Company.

Some of the information to follow may prove to be of a temporary nature since from verbal information obtained, this vessel was part of the 1,000,000 tons of crude oil required by the Arab Petroleum Pipelines in conjunction with Builders Consortium for testing purposes and commissioning of the project.

The Ain Sukhna Terminal will then serve the newly completed Trans-Egypt pipe-line terminating in the Mediterranean to the West of Alexandria.

It is understood that both Terminals and the strip covering the pipe-lines is to become a Free Zone thus dispensing with Customs and a number of other formalities.

Approaches: The anchorage for Ain Sukhna is located approximately 4 miles South-east of the berths and anchorage area is bounded by the following co-ordinate positions:

A	29° 35′ North	32° 25.6′ East
B	29° 32.5′ North	32° 27.6′ East
C	29° 31′ North	32° 25.4′ East
D	29° 33.4′ North	32° 23.4′ East

with an average depth of 40 m. and a sandy bottom.

SBM Mooring Facilities: 3 SBM points are located in the following positions:

A	29° 35.3′ North	32° 23.6′ East
B	29° 34.2′ North	32° 22.7′ East
C	29° 35.3′ North	32° 22.3′ East

All SBM's are painted bright yellow and were originally planned to flash their respective identifications A-B-C in morse code. This is also part of the information received, but are in fact marked by an ordinary Flash every 16 to 18 seconds.

The Pilot and Berthing Masters, one acting in each capacity, are Italian and experienced tanker people. They are currently employed by the Builders of the terminal and are presently engaged in training their Egyptian substitutes who will take over all piloting and berthing duties at a later date.

It appears this vessel was the second unit to visit the terminal and all piloting and berthing operations were performed in a cool and efficient manner. Also while the commissioning of the terminal project is in progress an Egyptian Marine Superintendent, employed by Arab Petroleum Pipelines remains on board with the Pilot and Berthing Masters during the vessel's stay in the berth. This, together with the trainees, etc., may not always be convenient for vessels with limited accommodation. A total of 5 bunks in 4 cabins was required by the shore team.

A tug named *Fish* of 2,400 h.p. used as a workboat and for firefighting purposes, flying the French Flag and French manned remains in attendance during mooring operations, and can be called upon to push should this become necessary.

Operations: Since no information to the contrary was obtained it is envisaged that the terminal will operate round the clock, weather and other circumstances permitting.

Radio Facilities: During the voyage ships send their cables to SUMED CAIRO using Alexandria Radio and for the present ETAs and such were confirmed on a daily basis. It is envisaged that at some later date the normal 72, 48 and 24 hours confirmations prior to arrival will be maintained.

A 500 watt transmitter is to come into operation at Ain Sukhna in the very near future with a range of 500 km. and operating on the 2182 kc/s frequency. This will be the Pipelines own transmitter and manned on a 24 hour basis.

For the present Ain Sukhna Marine is to be called on VHF Channel 16 when vessels come within 50 miles radius from the terminal to confirm berthing information and procedures.

The Suez Agency MINSHIP is also contacted via Alexandria Radio. Sumed Cairo does not relay messages or copies to MINSHIP.

Port Papers; The documents and forms required are as for other Egyptian Ports but it is expected that these may be reduced upon the Pipeline becoming fully operational and in a Free Zone. Customs formalities might end but some sort of relationship with Suez might remain for Port Clearance purposes.

Agency: Agency work and formalities are covered by the EL MENIA Shipping Agency of the Canal Shipping Agencies Company at Suez. Cable address is MINSHIP SUEZ. Telephone numbers: Suez 2639, 2801 and 3085 which is the El Menia Offices.

According to information received, facilities for bunkers, water and most other requirements are not available at Ain Sukhna. The Agency however has given verbal assurances to the contrary, and claims the usual services are obtainable from Suez, such as repatriation, provisions and stores, doctor as well as bonded stores. A limited amount of fresh vegetables have been obtained which appear to be of good quality and reasonably priced. According to information from the chandler, *anything* can be obtained providing sufficient notice of the requirements is received, via the Agency. Repatriation for personnel sounds interesting since it would or could cut airflights and accommodation costs to the Persian Gulf for vessels employed on the Ain Sukhna run.

Requirements for Mooring – Cargo hose connections: The SBM moorings consist of 2 buoy lines. The vessel requires to have ready 2 normal good mooring ropes with sufficient good lashing. The vessels mooring lines are taken one at a time through the centre lead by mooring boat and are then attached by lashing to the buoy lines, and hove on board in the usual way. Good stoppers also are required.

The moorings are belayed on bitts on each side of the forecastle.

Each of the 3 berths is equipped with 2 × 24 in. floating hoses, similar to the Juaymah berths, but are each fitted with a floating "Y" piece to which further 16 hoses are connected. The last 4 lengths are approximately 100 ft. long and are hove on board on the port side. This requires a derrick and fittings capable of lifting 10 tons. Ships personnel do all the connecting and provides all gear and equipment such as good strops (3 in.), gaskets, bolts and spanners for normal 16 in. ASA connections.

At this stage the similarity between Juaymah and Ain Sukhna connection of hoses ends. The Ain Sukhna connections do not have the short angled spool piece so that the ships manifold and the hose flanges are at an angle of about 15 to 20 degrees, and require to be brought parallel by brute force. Time required connecting hoses at Ain Sukhna – 5 hours and some minutes. This was a considerable improvement on the connecting time of the previous vessel which required in excess of 7 hours.

The hose connections problem has been discussed with the Terminal.

Cargo: At the present time all cargo tanks are gauged and checked for water on arrival and gauged again on completion of the discharge or ballasting of tanks, for 'Dry Certificate' purposes. It is understood that when operations become normal, the gauging, etc., by shore staff will be dispensed with, and ships figures for arrival will be accepted without check so that vessels can remain inerted during all phases of operations at the terminal.

Possible changes being evaluated:

1. Changing the 2 SBM mooring lines to 1 single line ending in a length of chain suitable for use, and making fast to the Smith Towing Bracket.
2. Dispensing with 2 of the 4 × 16-in. connections. During tests the difference in the discharge rate attained by using 2 hoses as compared to using the 4 appeared to be insignificant.

AUTHORITY: Arab Petroleum Pipeline Co., SUMED.

ALEXANDRIA: 31.09 N. 29.53 E. (See Plan Book)

DOCUMENTS:

4 copies of Crew List.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of passengers in transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Deratisation Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration form, duly completed.

1 Passenger List.

List of Passengers finally landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and passengers' List in duplicate, showing rate of consumption of each.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (31° 12.6′ N., 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 35 ft. draft.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory Quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under Quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Captains of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 35 ft.

TANKERS: Petroleum Basin: in West part of outer harbour, Berths 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 35 ft. Berths 3 and 4: in East part of outer harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International vaccination certificates required.

REPAIRS: *Ships Officers Report:*

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

TIME: GMT plus 2 hours.

HOLIDAYS: The following are the public holidays in the A.R.E.:

1st and 2nd Day of Ramadan Bairam } changeable dates
Courban Bairam Eve
1st and end day of Courban Bairam } as based on Moslem Calendar
Mohamedan New Year's day
Prophet's Birthday (Mewlid El-Nabi)

Eastern Monday (Sham El Nassim) (changeable); Evacuation Day (18th June); Revolution Day (23rd July); Victory Day (23rd December).

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the Pilot ground as possible. Ras el Tin lighthouse, Great Pass beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the Pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with seven shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

The main engine should be kept at very short notice when at anchor inside the harbour.

The accommodation ladder should never be left down while at anchor but should be raised and lowered as required.

It is usually an easy matter to hail a passing boat and bargain for a trip either ashore or to another ship. However, all ship movements and boatwork are officially prohibited after dark.

Pilotage: The pilot launches are Fairmiles (ex H.D.M.L's.) painted light blue with white wheelhouses and the word 'Pilot' in black on the side of the bridge.

All the Pilots employed spoke good English and were competent. They board at any time during the day and often without the slightest warning. They order tugs as they think necessary.

The beacons and leading marks in the Great Pass were good but the fairway buoy at the outer end of the channel is no longer there. Most of the mooring buoys marked on chart number 3119 have either been removed or changed.

As a result of experience, the Pilots have considerable skill in handling ships in very congested situations and they are to be relied upon.

Arrival Formalities: These are carried out at the Outer Harbour Anchorage. A list of documents required follows.

Documents:

2 Health Declaration*
1 Crew Customs Manifest
1 Arrival Form†
1 Stores List
1 Bond Stores List
8 Crew Lists‡

* Supplied by Quarantine Officers
† Brought out by Agent.
‡ This is the minimum number required.

Notes:— Customs manifests, stores lists and crew lists should be typed out on plain paper – there does not appear to be any proper forms.

Immigration officers wish to see all Dis 'A' Books and will then issue Shore Passes which will have to be filled in by the ship. On departure, the officials ask for the passes but, if they have not been collected will only request that they be destroyed when the ship sails.

Berthage: Every foot of wharfage is used and space is at a premium. This ship lay at Berths 16 to 20 and in both cases had ships ahead and astern with very little room between.

Berth 16 has unequal but good fendering, Berth 20 has none at all. Both are concrete wharves. There are an adequate number of bollards.

Berths 16 and 20 are both at the Passenger Quay and the soundings obtained by hand lead are shown on the plan. In theory, telephones are available at both berths. Water is laid on but the pipe is of small bore and delivery is slow (about 8.5 t.p.h.). Arrangements should be made through the Agent.

Berthage is said to be under the sole control of the Harbour Master. Ships may be ordered to berth, shift or move out to anchor without any warning. It should be noted that the Pilots always insist that Agents are told of a move the day before. In no case did this ship receive official notice. It is wise to hand a written notice to the Agent informing him of the time required to prepare the main engine for a move. However, in our case, the Agent did not bother to forward the information to the Harbour Master.

Being at the Passenger Terminal means that a cargo vessel has to move out to anchor frequently to allow passenger ships to berth. Unfortunately there seems to be only one other berth with enough water alongside for a fully loaded ship such as our vessel.

Repairs: Repair firms are available. There is a shipbuilding yard and graving and floating docks. Radio and radar servicing as well as gyro are available. There is a Lloyds Register surveyor.

There is an abundance of small firms offering to do scaling and painting quite cheaply.

Medical: The Agent will arrange for a doctor to visit the ship if required. Unless special equipment and/or facilities are necessary, this is the best arrangement.

Repatriation: Apparently available via Cairo Airport.

Stores: Only small quantities of fresh fruit and vegetables were bought and these were good and cheap but the Catering Officer should be prepared to bargain.

Bunkers: The barges arrived alongside without any warning. There were seperate barges for D.O. and I.F.O. The pumping rate for D.O. was 75 t.p.h. and for I.F.O., 143 t.p.h. It is reported that it is advisable to check the viscosity of fuel.

Communications: While at anchor outside the port, the ship's radio station is available and is by far the best means of communication.

Port Control, Pilots and launches all use Channel 16 both for calling and working. Making contact with Port Control to report arrival or request information is a matter of perseverance.

Agents: Memphis Shipping Agencies.

There is a main office in the city (Sesostris St.) to which the Master must go to draw money. Two hours will be needed for this plus an hour for travelling. In addition there are two offices in the Main Hall of the Passenger Terminal between Berths 16 and 20.

The Agents will arrange for doctor, waterman and watchmen. They will advance cash to the Master.

Garbage: Subject to negotiations with a private company. An old lighter will be moored alongside while the ship is in port. All garbage should be thrown into it. It is completely uncovered and after a while, in Summer time, would probably become highly offensive.

Fresh Water: Although there was no reason to suspect the water supply, Stabochlor was added as a precaution. As the ship may be sent out to anchor without notice for an unspecified time, it is wise to keep the water tank topped up.

Watchmen: The civilian watchmen employed were obtained through the Agent.

Two uniformed guards are put aboard by one or other of the authorities. Both the official and civilian guards will stop and search stevedores and take from them the cargo they have taken.

Tugs: These are arranged by the Pilot. There are several ranging from old coal burners to fairly modern diesels and they are well handled and efficient.

Cargo Work: It is supposed to be against the law to work frozen cargo during daylight hours. Therefore work was mainly carried on between 1700 and 0500 hrs. with a break about 2300 hrs., the same labour working through.

A gang consists of a total of 20 men. There is a foreman, two winchmen and eight stevedores in the hatch. The rest work ashore and on the lorries. The men in the hatch 'spell' each other and this is a major cause of lost time.

The butter and cheese was loaded onto pallets which were landed on the lorries and the cargo transferred. There are three pallets per gang but shortages often occur and the gear is not very good, two of the pallets breaking under load.

Crane and Velle derrick drivers were generally competent.

Lloyds Agency was asked to appoint a surveyor to witness the opening of the hatches and later to conduct a continuous survey during discharge. The surveyor was particularly helpful at the commencement of discharge. His firm asked for and received an advance of one hundred Egyptian pounds in cash from the ship because payment through the Agent was said to be slow.

Miscellaneous: Photography is forbidden within the port area and a permit must be obtained to take a camera ashore.

It is important to fit rat guards. a fine of £20 may be imposed for each one not fitted.

There is at least one floating crane with a SWL of 150 tons.

The Port Surveyor will ask to see the Suez Canal Certificate. If this has been retained by the Canal Authorities, he will require a signed statement to that effect.

Departure: The Agent will inform the various authorities of the expected time of departure.

Immigration officers will board to check any changes in the crew.

The Agent will put aboard the clearance and the sanitary clearance and the senior official guard will demand a written statement that all crew are aboard.

The sea Pilot will board with the harbour Pilot. The latter disembarks into a motor boat as soon as the ship is clear of the berth, the former when she is clear of the Great Pass. If the weather is rough, a pilot ladder will be required outside instead of the accommodation ladder.

AUTHORITY: Alexandria Port Authority.

HAMRAWEIN: 26.15 N. 34.12 E.

APPROACHES: *Daytime Leading Marks:*

Front mark: 26° 15′ 05.984″ N. 34° 12′ 01.622″ E.

Rear mark: 26° 15′ 01.46″ N. 34° 11′ 54.95″ E.

BERTHING: Length of quay – 67 m. Max. draft 33 ft. Conveyor belt and mechanical apparatus available. Daily average loading rate 4,000 tons. In addition to mooring bollard on the quay there are four mooring buoys.

MARSA AL HAMRA (El Alamein): 30.59 N. 28.52 E.

WEPCO Terminal

The Mono Mooring Buoy is in an open and unsheltered roadstead. The mooring buoy is located at Lat. 30° 58.7′ N. Long. 28° 52.2′ E. It is 53 miles on a bearing of 255° from Ras-el-Tin lighthouse, Alexandria, and 3 miles off shore in approximately 66 ft. of water.

DOCUMENTS:

4 copies Crew List.

Deck log books showing date of last call at a U.A.R. port, completed up to the time of arrival.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

Deratisation Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate, showing rate of consumption of each.

PILOTAGE: The S.-S.W.-W. quandrant from the buoy is prohibited anchorage area, Gebisa Reef is at Lat. 30° 58′ 30″ N., Long. 28° 49′ 10″ E., at 2.7 miles on a bearing of 260° from the buoy.

The mooring buoy carries a light, flashing 6 times per minute, and visible all round to a distance of 4.5—5 miles in clear tropical weather.

Surface current sets East at 10 miles offshore at the rate of 1 knot.

Maximum rise and fall of tide in the mooring area is 2 ft.

Vessel arriving should approach to within 2 miles North of the buoy, where they will be met by the Harbour Master or Pilot who will advise the ship's Master on approaches to the mooring buoy, mooring and unmooring.

RESTRICTIONS: Normally vessels are moored during daylight hours only, but permission can be obtained to sail at night. arriving vessels should keep 50 miles off shore between sunset and sunrise.

HEALTH: Hoist International Code Quarantine signals when entering. Any sickness must be reported to local authorities.

RADIO: The commercial radio station at Alexandria will handle WEPCO radio traffic. Alexandria Coast Radio Station (call sign SUH) operates 24 hours a day on 444, 500 and 8,578-kHz, and between 0600 hrs. and 1800 hrs. GMT on 12,974 kHz.

Ships nearing Al Hamra Terminal may contact the terminal by FM/VHF radio on 156.70 mHz or 2182 kHz.

While at the mooring, ship-to-shore communication is by portable VHF radio-telephone units, under the direct charge of the Mooring Master.

TUGS: Not available and not required.

BERTHING: 2 good lines must be ready on the forecastle to be sent to the buoy plus a further 2 lines for use as messengers. Ship's lifting gear must be ready near the port manifold for lifting and connecting 2×12-in. hoses, with proper reducers if the manifold does not fit 12 in. hose with 150 ASA standard flanges. The total weight per hose assembly is approximately 5 tons. Maximum loading rate is 3,700 t.p.h.

A pilot ladder must be safely rigged for immediate use and long enough to reach the Mooring Master's launch. At night adequate lighting must be rigged overside to enable the Mooring Master to approach and board the ship safely, and searchlights should be rigged on both sides of the bridge to assist in running lines to the buoy.

BALLAST: No dirty ballast may be pumped overboard, and it is the ship's Master's responsibility to ensure that no oil – whether crude, diesel, bunker or bilge – is pumped or spilled into the waters of and surrounding the Terminal. Ballast can be pumped ashore through one or both of the floating hoses direct to disposal facilities on shore.

CUSTOMS ALLOWANCE: Present regulations at El Alamein allow each seaman to retain in his possession a maximum of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines. There must be no items aboard of Israeli origin.
FRESH WATER: Not available.
FUEL: Not available.
MEDICAL: Nearest hospital facilities are at Alexandria, at least 90 minutes drive from the terminal.
TIME: GMT plus 2 hours.
AUTHORITY: Western Desert Petroleum Company.

RAS GHARIB: 28.21 N. 33.06 E.

A natural port at the Western side of Suez Gulf sheltered by the Cape and a chain of reefs.

DOCUMENTS:

4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passengers' List in duplicate, showing rate of consumption of each.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International Pilot flag must be hoisted and Pilot will board vessel on arrival. Vessels should approach the anchorage from South-eastward and wait Southward of the prohibited anchorage until boarded by the Harbour Master who will pilot them either to moorings or to an anchorage clear of the prohibited area of the pipe-lines.

2 pairs of leading beacons stand about 4 and 5.5 cables, beside 3 others that stand about 12 cables Southward of Ras Gharib light-structure. About 2 cables further Southward are 2 leading beacons. All the above beacons are difficult to identify until close inshore.

ANCHORAGE: Ras Gharib anchorage, South-westward of the cape, affords some shelter, but a moderate swell round the cape is experienced on most days. Vessels can obtain anchorage in depths of about 5 fathoms.

During most of the year there are Northerly winds, force 3–5, but in December and January there are occasionally calms. On very rare occasions, there are Southerly gales of short duration which make the anchorage untenable.

The Northerly wind causes some swell in the anchorage, but it is not normally severe enough to interfere with the working of lighters or boats of moderate size. It is, however, unpleasant for small boats, except alongside the piers, which are well protected.

Except in the vicinity of the piers, there is usually some swell on the beaches. There is practically no rainfall and sand storms occur only very occasionally and they do not interfere with work in the anchorage.

Anchorage is prohibited, owing to the existence of pipe-lines, within an area indicated by pecked lines on the chart.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor, specially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

MAX. SIZE:

	Northern Pier No. 1	*Southern Pier No. 2*	*New pier No. 3*
Depth at the pier	27 ft.	36 ft.	78 ft.
Max. permissible draft	24 ft.	32 ft.	55 ft.
Max. length for tanker	450 ft.	600 ft.	980 ft.
Min. length for tanker	350 ft.	500 ft.	600 ft.
Diameter of crude hose	18 in.	18 in.	30 in.
Diameter of water hose	10 in.	12 in.	18 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity	650 t.p.h.	1200 t.p.h.	2000 t.p.h.
Max. permissible load	6,000 tons	30,000 tons	100,000 tons

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by the United Arab Contracting and Marine Supply Company.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCE: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines. There must be no items aboard of Israeli origin.
TIME: GMT plus 2 hours.
AGENCY: See "Suez Canal".

RAS SHUKHEIR: 28.08 N. 33.17 E. (See Plan Book)

ADVICE OF ARRIVAL: It is important that ships establish radio contact with "GUPCO" (Gulf of Suez Petroleum Co.) when 3 days distant from Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72-hour ETA message to "Panintoil Cairo" giving the best estimate of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to "Panintoil Cairo" when the vessel is 24 hours and 12 hours distant from Ras Shukheir and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival and the number of hours that will be required to discharge ballast after ship is berthed in mooring.

6 hours before arrival, tankers should call Ras Shukheir on VHF Channel 16 to be advised if berthing is available or not, also to be advised of the approximate time for berthing.

DOCUMENTS:

4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passengers' List in duplicate, showing rate of consumption of each.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Ras Shukheir lighthouse is located in Lat. 28° 08′ 15″ North, and Long. 33° 16′ 20″ East. It is a white flashing light, flashing every 3 seconds and visible for 10 miles.

Gebal Gharib, situated about 18 miles South-westward, 5,742 ft. high. It makes a nearly perfect equilateral triangle with Ras Shukheir and Ras Gharib Lighthouse. Ras Gharib Lighthouse is an excellent landmark whether by day or night for vessels approaching from North, but caution should be exercised since this Light is obscured from 308° to the Westward. The sea-berth buoys are unlighted.

The company's Mooring Master will meet all incoming tankers about 2 miles from Ras Shukheir Terminal on a bearing of 290/300° from Ras Shukheir Lighthouse and will advise ship's personnel in mooring and unmooring, raising and lowering of hoses.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side and climb the ladder safely.

ANCHORAGE: There are a number of oil well installations, structures and submarine pipelines located in the Gulf of Suez opposite to Ras Shukheir Terminal and approaching vessels are warned of these obstacles in manoeuvring and anchoring. Vessels should approach from the Eastward and if necessary anchor S.E. of the sea berth. *Never anchor North of the sea berth.*

Tankers should not anchor except in Ras Shukheir anchorage area which is located as follows:

Lat. 28° 04′ 30″ N.
Long. 33° 22′ 30″ E.

RESTRICTIONS: The Ras Shukheir Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however, an exception may be made at the discretion of the Terminal.

HEALTH: The vessel's personnel should carry international vaccination and/or inoculation certificates.

RADIO: The Alexandria or Port Said coast radio stations will handle GUPCO radio traffic. Ships may contact GUPCO through their cable address "Gupcoil Cairo". The message will be received on their Cairo Radio Telegraph Office local teleprinter circuit. Tape perforated and relayed to the Ras Shukheir Terminal.

Cables from Ras Shukheir Terminal to the ships would be handled in the same manner. The Alexandria or Port Said coast radio stations transmit traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. Thus any ship hearing its call sign in the traffic list of the coast station would call the coast station immediately after the traffic list.

VHF: When ships are near Ras Shukheir Terminal, they may use their FM/VHF radios to contact the Terminal using 160.70 mc/s or 160.80 mc/s.

MAX. SIZE:

	Pier No. 1	*Pier No. 2*	*Pier No. 3*
Depth at the pier	60 ft.	95 ft.	90 ft.
Max. permissible draft	45 ft.	55 ft.	58 ft.
Max. length for tanker	800 ft.	1200 ft.	800 ft.
Min. length for tanker	600 ft.	750 ft.	600 ft.
Diameter of crude hose	36 in.	36 in.	36 in.
Diameter of water hose	16 in.	16 in.	18 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity	4000 t.p.h.	4000 t.p.h.	4000 t.p.h.
Max. permissible load	60,000 tons	200,000 tons	70,000 tons

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by United Arab Contracting and Marine Supply Co.

SUBMARINE HOSE LOADING BERTH: Tanker is loaded by means of submarine pipelines to which are attached 2 hoses for oil loading and 1 hose for discharging ballast water. A 36 in. line transports the oil and a 16 in. line, the ballast water. The loading berth is located approx. 940 m. (3080 ft.) offshore in a water depth of approx. 60 feet (10 fathoms). The loading and ballast lines are laid in the same trench and run in a direction N. 55° 00′ E. The mooring buoys are numbered 1, 2, 3, 4 and 5 starting with No. 1 North of the mooring and running consecutively in a clockwise direction.

LOADING READINESS AND ARRIVAL TIME: The company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting. Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Mooring Master boards the vessel or the time that vessel anchors, whichever occurs first.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not recommended.

CUSTOMS ALLOWANCE: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

TIME: GMT plus 2 hours.

AGENCY: See "Suez Canal".

SAFAGA: 26.46 N. 34.00 E.

DOCUMENTS: The following documents are required on arrival Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of Passengers in Transit.
4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.

PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Masters should endeavour to arrive at the N. end of the island by sunrise, at Safaga Port by early morning; the light behind them will show up the reefs clearly. Wind, light in the morning, gains strength during the day, making tying up more difficult. A beacon (Morewood Beacon), visible a mile off, is erected on the Southern spit of the island. After rounding the spit, Masters keep 5 cables clear of visible reefs and enter the harbour keeping the 2 large beacons to the North of the pier in line. Anchorage is then indicated by a small red or white flag. The Manager or his representative, of the Safaga Phosphate Company will meet ships in launch with instructions on berthing.

MAX. SIZE: Safe draft in the fairway, over reefs and alongside pier: 27 ft. 6 in.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor especially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

BERTHING: There are 2 mooring buoys marked B and C and 2 mooring posts marked A and D.

(1) The anchor position is marked by a small red or white flag. When mooring, manilla ropes only should be used, as wire ropes can be run out afterwards when ship is alongside.

(2) Due to rocky nature of sea bottom, it is very desirable that ship in coming into berth, does not override her anchor, as, if this happens, chain is apt to foul coral bottom and cause trouble later on.

(3) Endeavour to have all way off ship when anchor position is reached. Drop anchor as close to flag as convenient and go astern. If necessary check cable when 2 shackles have been paid out.

(4) Run rope to Buoy C, run rope to Buoy B, run rope to Post D, then run rope to Post A. Run Spring to S1, S2, S3, and pull alongside. Company's launches will run all ropes.

(5) If wind is blowing strongly off shore, a Spring to S3, may be run immediately a good rope to Buoy B is made fast.

(6) The best way to reach the anchor position is to steer straight for same, keeping Buoy C on port side. This will keep vessel clear of Buoy C and when anchor is dropped, the stern should swing clear of this Buoy. If it does not, a rope can be run to S3 and the stern pulled in before falling back on pier.

(7) With anchor dropped as shown, 6 shackles should see No. 1 hatch at the pier, but if chain is slackened carelessly, it may foul bottom and be insufficient to reach pier.

If visibility is very good, a course can be made between the Hyndman and Cannon Reefs, and altered to bring the beacons referred to into line.

Rock phosphate and ground phosphate are loaded at this port for shipment all over the world. The mines are situated some 30 km. away and are connected by company's own railway. Rock phosphate loaded (1,000 metric tons per day) from elevator and phosphate in bags by ship's gear.

Cargo vessels can berth alongside a new quay of 600 m. with a draft of 27 ft. Quay used for loading and discharging general cargo. It can accommodate 2 medium size vessels and one large vessel. Part of the quay is used by vessels discharging aluminium.

STEVEDORES: Canal Stevedoring Co.

SERVICES: Water, deck and engine stores and provisions provided by Egyptian Contracting and Marine Supply Co.

TIME: GMT plus 2 hours.

HOLIDAYS: The following are the public holidays in the A.R.E.:

1st and 2nd day of Ramadan Bairam Courban Bairam Eve	} changeable dates
1st and end day of Courban Bairam Mohamedan New Year's day Prophet's Birthday (Mewlid El-Nabi)	} as based on Moslem Calendar

Eastern Monday (Sham El Nassim (changeable); Evacuation Day (18th June); Revolution Day (23rd July); Victory Day (23rd December). Friday is the Sabbath day.

AUTHORITY: Ports and Lights Administration.

AGENCY: See "Suez Canal"

SIDI KERIR: 31.06 N. 29.37 E. (See Plan Book)

DOCUMENTS: Free zone area, no entry documents to the offshore terminal are required.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker two miles North of buoy A1.

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and Night berthing and operation). Arrival draft should be indicated. Vessels should arrive with a trim of 8 ft. by the stern and appropriate ballast to ensure that propeller is completely submerged.

LOCATION OF BUOYFIELD: (SBM's)

A1:	31° 06′ 26″ N.	29° 36′ 46″ E.
A2:	31° 05′ 32″ N.	29° 35′ 38″ E.
A3:	31° 04′ 24″ N.	29° 35′ 37″ E.
A4:	31° 04′ 54″ N.	29° 37′ 39″ E.
A5:	31° 05′ 40″ N.	29° 38′ 24″ E.

ANCHORAGE: Tankers can anchor to the North and N.W. of the buoyfield.

MAX. SIZE: The five berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for A1 and A2 (accommodate vessels up to 285,000 d.w.t.); 320 m. for A3, A4 and A5 (accommodate vessels up to 130,000 d.w.t.); Manoeuvring Area Radius: For A1 and A2, 1220 m.; For A3, A4 and A5, 915 m.

Water Depth and Draft Limitations:

For A1 and A2: 85 ft. minimum water depth
75 ft. maximum draft
For A3, A4 and A5: 60 ft. minimum water depth
52 ft. maximum draft

RADIO: All messages to be sent via Alexandria/Port Said Radio. Sidi Kerir has a HF long range radio working on 2182 kHz and 4142.5 kHz.

VHF: Channels 16, 78 and 79.

TUGS: Tug "Kerir" 3100 hp with fire fighting and anti-pollution equipment is available as required.

Mooring Launches: 500 hp mooring launches assist in mooring and hose operations.

BERTHING: *Ship's Derrick:* The ship's derrick should be capable of lifting 10 tons and rigged on the port side ready on arrival to take the gear on board for berthing the ship and connecting the hoses.

Hoses: Each berth has two cargo hoses with a 16 in. connection (ASA 150). There is a ballast unloading facility with 16 in. connection. Connection of hoses to be performed by the vessel under the supervision of SUMED's Mooring Master. Vessels are required to arrive with clean ballast until deballasting unit at Sidi Kerir is in operation which is expected to be during second half of 1978.

SUPPLIES: No bunkers or supplies are available or permitted.

MEDICAL: Private doctors and hospitals are available in Alexandria.

SHORE LEAVE: There is no shore leave for personnel of vessels loading at Sidi Kerir Terminal (disembarkment from vessels is strictly forbidden except in emergencies).

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus two hours.

SHIPMASTER'S REPORT: *General:* Sidi Kerir is the northern end of the pipe-line from Sukhna in the Gulf of Suez. The pipe-line is owned by the Arab Petroleum Pipeline Co. and operated by SUMED Co. (Suez – Mediterranean).

The Sidi Kerir Terminal (Tankfarm) position is at 31° 03′ N., 29° 40′ E. There are at the moment 5 SBM's for loading vessels, more are planned for the future. The buoy field is marked by the following points: "A" 31° 08′ N. 29° 37′ E., "B" 31° 04′ N. 29° 31′ E., "C" 31° 01′ N. 29° 35′ E., "D" 31° 05′ N. 29° 41′ E.

The area within ABCD is a prohibited anchorage area and may not be entered without a pilot.

The position of the 5 SBM's is within the area:

1.	31° 06.7′ N.	29° 35.7′ E.	For loading Arabian Light & Kirkuk Crude
2.	31° 05.9′ N.	29° 36.9′ E.	For loading Arabian Light & Kirkuk Crude
3.	31° 04.6′ N.	29° 36.9′ E.	For loading Arabian Light & Kirkuk Crude
4.	31° 05.0′ N.	29° 37.9′ E.	For loading Arabian Light & Kirkuk Crude
5.	31° 05.1′ N.	29° 38.6′ E.	For loading Basrah Crude.

(a) The current sets usually from NW at about 0.5 knots but may increase during Summertime to 1 knot; there is no considerable tide.

(b) References: BA chart 3356; BA pilot book 49, 6th edition 1976.

Documents: One crew list, one ship's stores list and clearance from last port.

Pilotage: Pilot also acts as loading master and boards vessel at the anchorage. A pilot ladder/accommodation ladder combination is to be rigged on the starboard side. Vessels must give a lee for the pilot launch. Pilots work preferably during daylight hours.

Anchorage: The anchorage is one to two miles north of the buoyfield in 20 to 40 fathoms of water. There is good holding ground on sandy bottom; no shelter during northerly winds or swell. The port closes during strong winds and swell. An open sea approach; no dangers on the way to the anchorage. The coastline is low desert and gives a poor echo, the best radar echo during the approach was the tankfarm and the pipe-line.

Max. Size: Max. draft 70 ft. No limit on size of vessel.

Radio: ETA information to be given preferably via Alexandria Radio to telex number 4108 attention "SUMED operations — Alexandria" at 72, 48, 24 hours prior to arrival. Initial message should give call sign; Summer deadweight; Summer draft; cargo requirements with name of crude and approximate quantity required in cubic metres and long tons, also maximum loading rate required in cubic metres; last port; whether vessel carries 2 × 16 in. reducers.

Health: Free pratique is given by the pilot/loading master.

Tugs: One tugboat, 5000 h.p., is on standby at the buoyfield and will assist on request.

Berthing: The vessel moors to a SBM. the mooring equipment, 2 wire slings, 2 shackles and a toolbox, are taken from the launch.

SBM Loading Berth: The hoses are connected by the ship's crew under the supervision of the Loading Master. The (2 × 16 in.) hoses are of a floatable type with a Cramlock connection.

The maximum loading rate is given as 15.000 Cm/h or as requested by vessel. Before completion of cargo the pumps are stopped and the balance loaded by gravity. At the present time the dirty ballast facilities are under construction.

Repairs/Drydocks: At Alexandria about 12 miles to the east. No facilities at Sidi Kerir.

Time: GMT plus 2 hours.

Density: 1026.

Supplies/Services: None.

Authority: The Pilot/Mooring Master acts as Government Representative.

AUTHORITY: Arab Petroleum Pipeline Co. – SUMED.

SUEZ CANAL (including Port Said and Suez):

DOCUMENTS:

Also see "Restrictions".

The following documents are required on arrival:

The last Classification Certificate issued.

Information concerning a vessels transitting the canal.

4 copies Crew List.

Ship's Register and Suez Canal Special Tonnage Certificate.

General arrangement and capacity plans of the vessel, if transitting the Suez Canal for the first time, or, undergone any alterations.

Suez Canal Authority's double bottom tanks capacity form.

Navigability form.

Complete set of Manifests covering all cargo on board showing names of shippers and consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in the A.R.E. and for those landing in the A.R.E. in transit.

4 copies List of passengers finally landing in the A.R.E. (if any) together with their addresses in the A.R.E.

Deck Log Books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.

Mail Waybills for ports beyond Suez Canal ports and alternatively, a document from the Master is required (cargo and passenger ships only).

Quantity of bunkers, water and cargo on board.

Free Pratique Certificates issued by the local Quarantine Doctor.

In case of a Northbound vessel loading or discharging alongside quay staying more than 24 hours in Suez, the following documents should also be presented.

(1) Load Line Certificate.
(2) Safety Equipment Certificate.
(3) Radio Safety Certificate.
(4) Documents covering names and ratings of ship's officers and their certificates.

For Pilot's Use:

(1) Arrival form of the Suez Canal Authority.
(2) Declaration "E" form for dangerous cargo on board in transit.
(3) Any other documents relating to shipments of dangerous cargo, radio-active or fissile.

N.B. Plain Suez Canal Forms are normally handed to Master by Pilots or ship's Agents, to be filled on arrival and also for use on consequent voyages.

Quarantine Authorities:

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Deratisation Certificate should be handy for inspection.

Clearance from last port.

Passports:

For Immigration Officer the following documents are required on arrival:

Arrival Immigration form, duly completed.

1 Passenger List.

List of Passengers finally landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

(1) Bonded Store List, in duplicate.
(2) Crew List and Passengers' list in duplicate, showing rate of consumption of each.

PILOTAGE: *Port Said:* On arrival at the Pilot station at Port Said, vessels should contact the pilot boat announcing their arrival and to receive the necessary instructions for either: *(a)* to stop in order to receive a Pilot; *(b)* to anchor at the waiting area; *(c)* to proceed to the channel where the Pilot boards.

Vessels arriving from sea can contact the Canal Authority by wireless on the following frequencies:

Port Said: Port Office freq. 2182 kc/s. Calling Port Said 1; freq. 156.35 mc/s. Calling Port Said 7; VHF can also be used on Channel 16.

Pilot boat: freq. 156.3 mc/s. Calling Pilot boat at a range of 20 km. Call sign 4.

Vessels transitting canal can also contact S.U.Q. at Ismailia by wireless, on the following frequencies: freq. 454 kc/s., 425 kc/s., 468 kc/s.

Waiting area at Port Said:

The waiting area where vessels anchor waiting for Port Pilots, is situated to the West of a line joining the West buoy of the first pair of light buoys and the fairway buoy, and South of the parallel of latitude passing through the fairway buoys. All ships waiting to enter Port Said Channel, have to anchor at this area. It is of great importance that a vessel should announce its arrival immediately on reaching the Pilot station for 2 reasons:

(a) To avoid delay in entering the harbour, as vessels are piloted in accordance with their turn in contacting the pilot boat.
(b) The arrival of a vessel is immediately transmitted to the Suez Canal Authority's Office, thus enabling the Agent to declare the ship in time, even before she enters the harbour and ensure her transit with the appropriate convoy. Such registration cannot be done if the vessel does not adopt the above procedure. Passenger vessels are given priority in turn, in entering the harbour.

Notice is hereby given that the entrance channel to Port Said harbour is buoyed as follows:

(a) A Fairway light buoy painted with white vertical stripes showing a white flashing light every 5 seconds approx. fitted with radar reflector and surmounted by a top mark resembling St. Andrew's Cross.
(b) *Position of buoy:* 032° 40′ – 6.04 miles from Port Said lighthouse.
(c) The first pair of light buoys indicates the entrance of the channel. The West buoy is painted black and surmounted by a conical superstructure giving a flashing green light.
(d) *Position of buoys:* 037° 03′ at a distance of 5.13 miles from Port Said lighthouse.
(e) The East buoy is painted red and surmounted by a cylindrical superstructure giving a flashing red light.
(f) *Position of buoy:* 127° 40′ from the West buoy at a distance of 1,969 ft. from the West buoy.
(g) Several other pairs of lights indicate the limits of the channel to the East and West. The East buoys are painted red and show a fixed red light and the West buoys are painted black and show a fixed green light.
(h) A fixed red light on a pylon on the North quay of Abbas Basin in line with an occulting red light on a pylon West of the fuel oil tanks at Raswa, indicates the axis of the entrance channel to the harbour.

Pilotage is compulsory on entering or departing Port Said Harbour as well as in the Canal and it is free of charge for vessels transitting the Canal except when shifting or changing berth. Vessels not transitting the Canal are subject to the payment of these charges both at Port Said and Suez. Vessels under 300 tons Suez Canal net tonnage are allowed to transit the Canal from any direction with a *Patron* (instead of Pilot) without being compelled to attend to convoy timings and after authority had been granted by the Suez Canal Authority.

In view of the continuous expansion in the sizes of vessels, with the consequent increase in the height of the hull, it is becoming very difficult for the roads Pilot to board vessels by using the customary rope ladder without causing him considerable fatigue. Therefore, it is recommended that Owners and Masters of large size tankers instal on their vessels a mechanical hoist for Pilot, and that one of the ship's officers be present to ensure its correct use, for the safety of the Pilots and to avoid accidents.

It is also recommended that the Mechanical Hoist be installed at a convenient distance from the effect of the propeller and away from the vessel's stern.

Suez:

As regards Suez Bay, it is sheltered from all points except from South. Very occasionally during Southerly gales (period December to April) motor-launches and boats are unable to communicate with ships in the roads.

Newport Rock lighthouse marks the Southern extremity and ships usually anchor opposite the entrance to the Suez Canal. All ships entering the port of Suez have to anchor in the pilotage zone which is limited by the imaginary line which extends from Ras Adabiya to Eyoun Moussa and comprises the coastal zone North of this line up to the Suez Canal entrance.

The town stands on a spit of the desert projecting Eastward with the Bay of Suez on its Southern side, Lat. 29° 58′ N., Long. 32° 10′ E.

Pilotage in the port of Suez is compulsory for all vessels entering, moving within or leaving the port.

Naval ships and vessels whose Suez Canal net tonnage is less than 300 tons are exempted from pilotage, but they have to contact the Pilot boat for orders prior to making any movement. Vessels exempted from pilotage may have a Pilot if so required.

Pilotage Waiting Area at Suez: The boundaries of the pilotage waiting area for ships arriving at Suez from South have been limited as follows:

Northerly:	Lat. 29° 52.16′ N.
Southerly:	Lat. 29° 51.73′ N.
Easterly:	Long. 32° 34.5′ E.
Westerly:	Line joining Newport Rock and Buoy No. 3.

The area East to Long. 32° 33.93′ E. is allowed for ships drawing less than 25 ft. The area West 32° 33.93′ E. is for ships drawing more than 25 ft.

The Pilot boat is normally stationed at the proximity of green buoy No. 1 South of Newport Rock.

When entering the pilotage waiting area, the following signals should be hoisted: Pilot – Vessel's signal letters. Quarantine – Nature of dangerous cargo (if any).

Vessels have to contact the pilot boat for instructions, reduce speed and have the pilot ladder ready.

Vessels wishing to anchor in Suez roads on their exit from Canal for the purpose of carrying out repairs, cargo operations, replenishment of bunkers, water, etc., should when ready to sail hoist the pilot signal and send the following message to S.U.Q. *Ismailia:* "Vessel's Name in Suez Roads ready to sail Please send Pilot thanks". In case of rough weather, the pilot boat leaves its station.

ANCHORAGE: Anchorage in the Port of Suez.

RESTRICTIONS: We reproduce hereunder Suez Canal Authority Circular No. 1/3T1-425004 dated 1st October, 1976 and updated by Circular No. 4751/T76 dated 13th October, 1976.

FIRST: Convoy Times:

(1) **From North:**

First Convoy N 1 Starts at 0200 hrs. and ends at 0600 hrs., direct to Bitter Lakes.

Second Convoy N 2 Starts at 0930 hrs. and ends at 1130 hrs. This convoy is to be moored at El Ballah Western Cut.

Vessels permitted to Join the second convoy:

Vessels up to 15,000 tons

Maximum draft 8.85 m. (29 ft.)

Maximum breadth for ships and floating units 30 m. (98 ft.)

Slow or damaged ships are to join this convoy providing their dimensions are within the limit shown above.

Number of vessels in this convoy are limited to the number of mooring berths available in El Ballah.

(2) **From South:**

One convoy starts at 0600 hrs. and ends at 1000 hrs.

SECOND: Following details and documents are required to be submitted:

(1) Masters are requested to *wire* at least 48 hours before vessel's arrival giving the following details:

Gross and net tonnage with date of last Suez Canal Tonnage Certificate.

Gross and net tonnage and date of last Registry.

Nationality, Owner's name, previous name if any, and category of vessel according to its registry, i.e. Cargo, Containers Ship, Lash vessel, Ro/Ro.

Has the vessel transitted the Canal before.

Has there been any damages in the ship. If no alteration the following message is to be sent "PARTICULARS NO CHANGE". Documents must be submitted in any case.

N.B. – Huge vessels which their transit necessitate the employment of tug escort, Suez Canal Authority must be advised at least 4 days before their arrival by telex, No. Sucan UN 2153.

(2) *Documents*

(*a*) Suez Canal Special tonnage Certificate.

(*b*) Ship's Registry.

(c) Statistical Declaration.
(d) Information concerning a ship extracted from its official documents and its load of containers or barges.
(e) Declaration of Double Bottom Tanks.
(f) Declaration concerning vessels in ballast.
(g) Declaration of Navigability.

THIRD: Conditions for vessels to join the convoys, times for registration and submission of documents:

(1) **From Port Said:**

First South Bound Convoy N1

(a) Vessel *in Port* and requires to transit the Canal must adhere to the following:—
Called the Pilot (by hoisting the Pilot Signal)
Having registered for transitting at the measurement office.
The required documents were submitted latest at:
2200 hrs. for vessels not previously transitted or have previously transitted, but due to alteration must be remeasured.
2300 hrs. for vessels previously transitted.

(b) Vessels entering the Canal directly from Sea must:
Arrive at the waiting area at Port Said anchorage not later than 2000 hrs. for New V/L's., 2200 hrs. for vessels which have previously transitted.
Have called the Pilot.
It is permitted for these vessels to be registered preliminary in the Measurement Office without submitting the documents from the time of her arrival at Port Said anchorage till 2100 hrs. for new vessels or in such condition.
2300 hrs. for vessels which have previously transitted, provided that these documents are submitted before the vessel passes in front of the Suez Canal Authority's building.

(c) Latest permissible time to hoist the Pilot Signal:
Whenever the vessel is berthing is 2300 hrs.

Second Southbound Convoy N2

(a) (1) Vessel *in Port* must:–
Have called the Pilot,
Have been registered in the Measurement Office,
Have submitted the documents latest:
At 0530 hrs. for new vessels or in such condition
At 0630 hrs. for vessels which have previously transitted.

(2) Vessels are considered in Port and can join the convoy:
Vessels arrived at the waiting area at Port Said anchorage.
Before 0330 hrs. vessels which have not transitted the Canal before or in such condition.
Before 0530 hrs. for vessels transitted before.
These vessels will enter the Port when traffic permits.
It is permitted to register these vessels preliminary at the Measurement Office, without submitting the documents from the time of her anchoring at Port Said anchorage till the latest permissible time:
0330 hrs. for new vessels or such vessels.
0530 hrs. for vessels transitted before, provided that documents are submitted within one hour and half from the official time the vessel entered the outer harbour limited by Hectometer 22, otherwise the application for transitting will be cancelled and the vessel will be delayed from the convoy.

(b) Vessels which are allowed to enter the Canal from Sea direct without stopping in Port must:
Arrive at the waiting area at Port Said anchorage not later than
0330 hrs. for new vessels or in such condition.
0530 hrs. for vessels which have previously transitted.
Application for transitting the Canal should be registered not later than:
0430 hrs. for new vessels or in such condition.
0630 hrs. for vessels which have previously transitted and documents submitted before the vessel passes in front of the Suez Canal Authority's building.

(c) Latest time permitted to hoist the Pilot Signal wherever the vessel is berthed is 0630 hrs.

(2) **From Suez:**

Conditions to join the Northbound Convoy:

(a) Latest time permitted to arrive at the waiting area at Suez anchorage:
Tankers group, and the following are considered as such:
(1) Car carriers
(2) Ro/Ro
(3) Containers
(4) Lash vessels
(5) Ordinary vessels with 35 ft. draft.
By 0000 hrs. for tankers not transitted before,
0100 hrs. for tankers transitted before.

Other Vessels:
0130 hrs. for vessels not transitted before, 0230 hrs. for vessels transitted before.

(b) Registering of application of transit at the Measurement Office:
Submitting the documents: Short time after anchoring of the tankers or other vessels.
Without submitting the documents: As stated above in Para *(a)*.

(c) Latest time permitted to hoist the Pilot Signal: As stated above in Para *(a)*.

MAX. SIZE:

Maximum dimensions and conditions of ships authorized to transit the Canal:

General:

(a) Maximum length of ships authorized to transit 1100 ft. (by length of ship it is meant the underwater length including bulbous bow).
(b) Maximum breadth 160.5 ft.
(c) The enclosed tables indicate the maximum draft authorized relative to the breadth of ship, speed and direction of transit. (See below).
(d) Ships transitting the Canal according to the the terms of this circular are required to fulfill the following conditions:
(1) The ship's loadline for tropical zones must be apparent and in compliance with the provisions of International Convention regarding loadlines.
(2) The ship's draft marks fore, aft and amidships will be existent on port and starboard sides.
(e) All ships have to conform to the Suez Canal Rules of Navigation and its Appendix for dangerous cargo.
(f) This circular cancels and replaces previous circulars concerning the maximum dimensions of ships authorized to transit the Canal, and our circular No. 2/6B5 – 422174 issued 23.6.1975 concerning transit of ships at a draft of 38 ft.

Escorting by Suez Canal tugs:

(a) Ships with length less than 1000 ft. and breadth less than 147 ft. can transit the Canal without escort tugs.
(b) Ships with a draft not exceeding 37 ft. fore, aft and amidships can transit the Canal without escort tugs.
(c) Ships with length less than 1000 ft. but breadth from 147 ft. to the maximum of 160.5 ft. are to be escorted by 1 tug during the first transit of Canal. If this transit proves successful the following transits will be without escort tugs.
(d) If draft exceeds 37 ft. and up to the limit draft of 38 ft. (fore, aft and amidships), the ship will be escorted by 1 tug for her first transit. If this transit proves successful the following transits will be without escort tugs.
(e) Ships with length of 1000 ft. and up to the maximum limit of 1100 ft. are to be escorted during the first transit by 2 tugs. If this transit proves successful the ship will be escorted by 1 tug only during the following transits.
(f) Sisterships are not to get benefit of authorisation granted to a particular ship of the group.
(g) Ships which are to be escorted by 1 or 2 tugs according this circular have to notify Suez Canal Authority at least 4 days prior to arrival to Canal zone.
(h) LPG/LNG Tankers whose Suez Canal gross tonnage exceeds 80,000 tons, either laden or in ballast must be accompanied by a Port Authority tug on every transit. It is also requested that a steering light, to be lighted by night, be fitted on the extreme of the tanker's bows.
(i) Vessels whose breadth ranges from 128 ft. – 134 ft. are exceptionally permitted to transit the Canal from South escorted by tug during their first transit of the Canal.

Draft for large ships in ballast:

The recommended draft for large ships in ballast is to be 25 ft. forward and 29 ft. aft. This draft may be amended to give the best view from the bridge, or better steering, but must not depass the maximum authorized draft according to the attached tables, and transit will be effected in good weather conditions.

Tables indicating the maximum draft for different breadths and speeds for ships:

Speed not exceeding 14 Km./H (From North or South):

Breadth (ft.)	113	116	119	123	126	130	133	138	143	148	153
Draft (ft.)	38	37	36	35	34	33	32	31	30	29	28

Speed not exceeding 13 Km./h. (From North or South):

Breadth (ft.)	120	123	127	130	134	137	142	147	150	157	160.5
Draft (ft.)	38	37	36	35	34	33	32	31	30	29	28

Special Transit

Speed not exceeding 13 Km./H. (From South):

Breadth (ft.)	128	131	134
Draft (ft.)	38	37	36

Exceptional Transit

Speed not exceeding 12 Km./H.

Breadth (ft.)	160.5
Draft (ft.)	29

We reproduce hereunder Suez Canal Authority circular No. 2237/T76 dated 31st March, 1976.

Recommended drafts for tankers in ballast when transitting the Suez Canal are as shown below:—

Tonnage S.D.W.		Draft	
From	To	Forward (ft.)	Aft (ft.)
120,000	230.000	25	29
100,000	120,000	24	28
80,000	100,000	23	27
65,000	80,000	22	26
50,000	65,000	21	25
32,000	50,000	20	24
23,000	32,000	18	22
15,000	23,000	15	19

N.B. These drafts may be amended, when necessary, to give better steering.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor specially when it is presumed that the sick will be hospitalised. The Quarantine doctor meets the ships whilst entering the port and the ships are boarded in turn. To get a quick clearance and not to be left for later attendance, Masters are requested to receive the doctors as soon as they board and to have the following documents ready:

Quarantine Forms in Duplicate: When inserting the ship's register net tonnage special care should be taken in indicating same on the 2 quarantine forms (Form No. 15 Q.A.) as the dues are calculated on that tonnage, as incorrect information may cause complications.

Deratisation Certificate should be handy for inspection.

Clearance from Last Port should also be handy.

All ports at which the vessel has called as well as dates of sailings for the last 30 days should be inserted in the form.

Quarantine Signals:

By day: "Q" flag (signifying vessel healthy). *"Q" Over first substituted (QQ).* (Vessels have cases of infectious diseases more than 5 days ago, and there have been unusual mortality among the ratings or crew on board.) *"Q" over L flag (QL)* signifying (vessel is infected and has cases of infectious diseases less than 5 days ago.)

By night: red light over white: The flags and lights must remain hoisted until free pratique is granted. Ships in transit under Quarantine through the Suez Canal will use the same signals until they clear the other end of the Canal.

Important: In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at a U.A.R. port the vessel is put under compulsory Quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless, the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under Quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique granted by radio: Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

1. The vessel must be a regular liner to the Quarantine Authorities and has a doctor on board.
2. Details shown on the Quarantine Statement should be radioed to the Quarantine Authorities 24 hours prior to ship's arrival.
3. Captains of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.
4. The ship must not have called at any infected port.

RADIO: ETA messages can be transmitted to Agent and Suez Canal Authority through Port Said Radio and/or Alexandria Radio for vessels calling at Port Said. The same procedure can also be adopted for vessels calling at Suez through Kosseir Radio.

As a rule, Masters should send their ETA not less than 48 hours before ship's arrival. In addition to the ETA, all requirements should be included in the wireless message as well as detailed information regarding cargo operations, draft, number of passengers disembarking, details of their baggage and crew changes, if any. If the ship is operating a tour in the town and/or a quick trip to Cairo, numbers of participants must also be contained in the same wireless message. Number of bags of mail to be discharged, if any, should also be included.

This is to enable the ship's Agent to notify, in good time, the parties concerned, to prepare in advance the necessary custom permits, and to ensure all requirements to be supplied without delay.

Vessels transitting the Canal for the first time, should also include in the ETA message, whether fitted with a projector or not and if in the affirmative to state number electricians required, thus enabling the Agent to make the necessary arrangements and avoid any delay.

In accordance with the Suez Canal Authority's instructions and in order to avoid delaying vessels from joining the respective convoys, vessels transitting the Canal for the first time are required to include the following information in their ETA message:

Suez Canal gross and nett tonnages and date of last Suez Canal Special Tonnage Certificate.

Registered gross and net tonnages and date of last register. Ship's nationality and Owner's name.

If the ship has previously transitted the Canal, the following information should be included in the ETA message:

Whether there have been any constructional changes. If no changes have taken place, the following message should be sent: "Particulars no change navigable".

RADAR/VHF: There is no radar service at either Port Said or Suez, but VHF can be used with the Suez Canal Authority on Channel 16. Transit vessels can also contact S.U.Q. at Ismailia by wireless on the following frequencies: Freq. 454 kc/s., 425 kc/s., 468 kc/s.

TUGS: Highly qualified crew are available on board several tugs owned by the Suez Canal Authority in Port Said, Suez and in all Suez Canal stations. These tugs assist vessels to berth in Port Said harbour as well as in Canal if a case arises. It is left solely to the Canal Authority to decide whether more than 1 tug is needed (free of charge) to assist any ship to moor in the Port Said harbour, but if a Master of a vessel finds it necessary to employ an extra tug for berthing or if he needs a tug for any other reason, such an operation will then be charged against the vessel.

Salvage tug boats:

1. 3,000 h.p. *Mounir.*
2. From 3,500 to 5,000 h.p. *Antar.*
3. 6,500 h.p. *Mared, Shahm.*

Harbour tug boats:

1. 800 h.p. *Moein, Monkez, Montasser.*
2. 1,600 h.p. *Bori, Wakar, Chadid, Hout, Kirsh, Morgan.*

General conditions:

1. Hire is reckoned from the time of starting to raise steam and ceases when the tug returns to its depot.
2. The charges for "waiting" will not apply while the tug has to remain under full steam either for a long or short period, ready to proceed. These charges only apply while waiting for a long period and when the tug is able to bank fires while at the disposal of the client.
3. Fractions of hour will be reckoned as full hour.
4. Hire charges are increased by 10% when tug is used after official office hours, on Fridays or on public holidays.
5. Hire charges are increased by 50% when tug is used outside Canal waters.
6. Towing charges outside the territorial waters are agreed upon with the Authority.
7. This tariff may be revised every 3 months without notice.

		5 R	284	813	198	850	
		6 R	280	919	226	742	

Note: In good weather the length on buoys may be increased from 3 to 9 m. according to the length of the berth and height of the vessel.

Quays at Port Said: The Suez Canal Authority had built new quays to enable vessels to berth alongside at Cheriff and Abbas Basins. Length about 1300 m. Height about 2 m. from sea level. Also 14 cranes of 3 tons lifting capacity each, running on rails have been installed. Maximum draft allowed is 27 ft. The best part of these quays is ready and vessels with full cargo for discharge, are now berthing alongside. Vessels drawing more than 27 ft. have to lighten their cargo into lighters to that draft before berthing.

The distance between Bollards 23 and 24 South of deep Abbas Quay (30 m.) has been reserved for the berthing of one Ro/Ro vessel by the stern, within the present allowed draft (27 ft.).

Height of quay from sea level: 2 m.
Average tide all year: from 40 to 50 cms.
Thickness of fender: about 50 cms.
Breadth of quay edge: from 50 to 60 cms.

Suez:

Port Ibrahim: Port Ibrahim is the port of Suez. It consists of North and South basins.

North Quay: The North basin has, on the North side, a quay length of 2,415 ft. a total breadth of 975 ft. and depth of 26 ft. 06 in. at high tide. Quay is connected with the railway which runs the whole length of this quay and which can accommodate 4 large ships.

Berths 4 and 5 where stores are available are suitable for loading and discharging cement in big quantities.

Khedivial Quay: Berths Nos. 9, 10 and 11, length 119 ft., depth 24 ft. at high tide.

N.B. No cranes are allocated to these quays but mobile cranes (5-15 tons) only can be used.

Pilgrim's Quay: (Pontoon Berth) No. 6, 1 berth, length 500 ft., depth 24 ft. at high tide.

Adabiya Quay: This quay is situated on the Western shore of the Suez Bay, and is under the control of the Naval Authorities. The max. draft is 26 ft. 06 in. and can accommodate 4 large vessels. Quay is equipped with an electric crane, capacity 15 tons, max. length of vessel allowed to berth alongside quay 425 ft.

Marakib Quay: Situated at the entrance of the Canal depth 28 ft.; can accommodate passenger and cargo vessels.

Storage Capacity at Suez:

North Quay	40,150 sq. ft.
Pilgrims Quay	20,952 sq. ft.
Khedivial Quay	8,448 sq. ft.
	69,550 sq. ft.

While stacking spaces on the quays are: 332,050 sq. ft.

STEVEDORES: As stated in the ETA messages, Masters are advised to include in their messages details of cargo to be discharged in either Port Said or Suez, hatch by hatch and gangways required, if possible. All loading and discharging operations in Port Said harbour and Suez Roads are effected by lighters. There are steel lighters, wooden barges and self-propelled barges available for this purpose that will allow rapid work to be carried out. At Port Said several frozen cargo ships are provided with flat floating pontoons to facilitate discharge of cargo. At Port Said the draft of water does not allow ships to be berthed alongside quays to carry out cargo operations except in Cherif and Abbas Quays which accommodate vessels up to 27 ft. and consequently same are carried out also from and into lighters which are brought alongside the vessels whilst at anchor.

MEDICAL: It is very essential for Agent to receive advance notice of required medical attendance at least 24 hours prior to ship's arrival. All ordinary medical supplies are available and prescriptions are executed at any time at moderate prices and delivered during ship's stay in port. Medical assistance at Port Said and Suez is available. Consultations on board could be arranged through ship's Agent at any time by day or night. Reliable dentists are available at Port Said and could be consulted on board, if necessary, and during the following period at their clinics: From 0900 to 1300 hrs. and from 1600 to 1900 hrs.

Occulists are available for consultations at town clinics in Port Said during usual working hours. Opticians are also available at Port Said. The following hospitals are available with ample first, second and third class accommodation, accepting patients irrespective of nationality at reasonable charges:

At Port Said	*At Suez*
Al Mabarra Hospital	Al Helal Hospital
Notre Dame de la Deliverande Hospital	Abou El-Azayem Hospital
Two General Government Hospitals	General Government Hospital
T.B. Hospital	Isolation Hospital
Isolation Hospital	Ophthalmic Hospital
Ophthalmic Hospital	

Ship's personnel should carry international vaccination and/or inoculation certificates if a vessel is arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of arrival.

TANKERS: There is a bunkering station at Port Said harbour which can accommodate 4 tankers with not more than 38 ft. for the purpose of discharging their cargo of fuel or diesel oil to the different oil bunkering companies, but the petroleum basins for tankers at Port Said is as follows:

7 jetties can accommodate vessels with max. length of 555 ft., loaded with draft of 26 ft. 6 in.

If jetties 2 and 4 are occupied by large tankers, then No. 3 would have to be used by a small tanker.

Oil Storage: There is ample tank storage for bulk petroleum products.

New Suez Terminal: The terminal is situated in Suez Roads.

(1) Presently one berth has been reconstructed and is used by tankers chartered by EGPC.
(2) Minimum depth of water at L.W.O.S.T. in the approach Channel is 38 ft.
(3) Minimum depth of water at L.W.O.S.T. alongside each berth is 38 ft.
(4) Maximum safe length of tanker applicable 750 ft.
(5) Has six pipe lines each berth:–
    4 lines × 20 ins.
    2 lines × 16 ins.
    1 line × 4 ins. (fresh water)
(6) All types of oil products can be handled at this berth.
(7) No facilities are available at present for reception of ballast.

FRESH WATER: Is available for supply ex self-propelled barges to any quantity required at all times with a min. supply of 50 tons.

FUEL: Different grades of fuel oil are available from different firms. It is customary that the Master should advise in his ETA message of the vessel's requirements, fuel or diesel oil, at least 24 hours prior to ship's arrival into port. Bunkering is by contract between the Owners and the different bunkering firms, and nominations should be arranged for each vessel separately between the Owners and Head Office of the bunkering firm abroad, and for which payment is also effected abroad. Only the Compagnie Orientale des Petroles accepts payment in cash out of Shipping Account No. 2 for supplies effected by them and in which case a nomination is not required. Vessels can be berthed in the oil installation and thus can effect their bunkering requirements through pipe-lines. Tankers which are not gas-free, cargo vessels carrying dangerous materials and passenger vessels, which are moored opposite the town, can be supplied with requirements of fuel and diesel oil ex self-propelled barges with max. capacity of 700 tons.

FIRE PRECAUTIONS: In accordance with the Suez Canal Authority's regulations, tankers and vessels carrying dangerous materials must comply with their requirements, concerning fire regulations.

GANGWAY/DECK WATCHMEN: In both basins Cherif and Abbas at Port Said, where cargo vessels are normally berthed, ships' gangways can be used for disembarkation and embarkation. Passenger vessels are moored in special berths, i.e. Red Buoys, opposite the town, and can be supplied with 1 or 2 floating bridges (snake pontoon) which can connect the ship with the shore to enable the transit passengers and members of crew to proceed ashore. Cargo ships and other vessels mooring at the different buoys must lower their gangway to facilitate disembarkation and embarkation of ship's personnel as well as different officials. As far as Suez is concerned, all vessels must lower their gangway for the same purpose stated above. A deck watchman is recommended.

OPENING/CLOSING HATCHES: In accordance with Charter Parties, the opening and closing of hatches are dealt with as instructed in this Agreement, but for vessels carrying out minor cargo operations, it is customary that stevedores open and close ships' hatches against ships' account. To expedite vessel's transit, it is always recommended that ship's crew, during vessel's entering into the harbour should open the hatches and rig ship's derricks in order that they may be ready for cargo operations immediately upon ship's arrival at either Port Said or Suez.

CERTIFICATES:

Ship's Register.
Suez Canal Special Tonnage Certificate.
General Arrangement and Capacity Plans.
Load Line Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Documents covering names and ratings of ship's officer and their diplomas.

CUSTOMS ALLOWANCE: Every member of crew is entitled to have 1 carton of cigarettes, 8 ounces of tobacco, and 1 bottle of spirits for his own consumption during ship's stay in Port Said, Suez Canal transit, until vessel exits the Canal or vice-versa. Same applies to passengers, and a limited quantity of bonded stores can be permitted in public rooms and bars on passenger ships. Crew and passenger list, in duplicate, showing the amount in possession of each must be ready on vessel's arrival for submission to the Customs Representatives who normally proceed on board on arrival to seal up the Bonded Stores.

CARGO GEAR: These are normally supplied by the stevedores to comply with the nature of cargo discharged or loaded from cargo ships. Rope lengths and other cargo gear may be additionally required to expedite ship's discharge.

IDENTIFICATION CARDS: Every member of crew must have a seaman's book deposited with the Officer in charge for inspection, if so required by the Immigration Authorities. If a vessel is stopping in Port Said or Suez for a lengthy time, these seamen's books are normally taken off the ship by the said Authorities and kept in their departing office pending ship's sailing day when they are placed on board by the proper officer on a previous advice. Identity cards are also needed if a crew member wishes to proceed ashore for a short visit to the town or for proceeding to any excursion inland.

CONSULS: The following countries have Consulates or Consular Agencies in Port Said:

U.S.S.R.
U.S.A.
Italy
Greece
West Germany
Panama
Republic of China
Holland
Norway
Denmark
Finland
Sweden
Spain
U.K.
India

REPAIRS: Most types of repairs whether temporary or permanent can be carried out here by the Suez Canal Authority's shipyard or its subsidiary companies, under the supervision of the appropriate surveyors, if necessary. Suez workshops are well equipped for undertaking all kinds of marine repairs to hull, main and auxiliary engines, boilers, navigation aids, radar and cooling, and installations.

Vessels carrying explosives are not allowed to carry out repairs. Tankers loaded or in ballast but not gas free are not allowed to carry out repairs, except in cases of force majeure of which the Canal Authority is sole judge. Gas-free tankers must present Gas-free Certificate before they are allowed to carry out any repairs. If unavailable, a chemist approved by the Suez Canal Authority can be appointed for testing the tanks and issuing the Gas-free Certificate. The aforementioned restrictions are applicable at Port Said only and not at Suez where vessels anchor at roads and are of no danger.

Other Repairs Facilities: Exist at Port Said for air conditioning, wireless telegraphy, radar, course and rudder recorder, refrigerators, and refrigerating units.

All kinds of repairs to echo sounding devices are carried out at Port Said by experienced specialists at reasonable charge, for the different types and dealt with by the Port Said Engineering Works with the exception of Raytheon radar, B.T.H. radar and Cossor radar which are represented by the Eastern Electronics.

DRY DOCKS: A floating dock of 25,000 tons, capable of docking vessels up to 50,000 d.w.t., is available at Port Said as well as a dry dock at Suez. Sufficient notice is required to book the date for either the floating or the dry dock.

Repair facilities are available at Suez, where a dry dock is suitable to accommodate vessels up to 8,000 d.w.t.

Dimensions:

Extreme length to inner sill	464 ft.
Breadth at entrance	73 ft.
Height of water over keel blocks:	
at Spring tide	22 ft., for., 26 ft. 3 in. aft
at Neap tide	19 ft., for., 23 ft. 3 in. aft

The max. draft at which a vessel can use the dry dock is 17 ft. for. and 20 ft. aft. Deeper drafts may be arranged with the management.

The Suez Canal Authority's Floating Dock and Shipyard is situated at the Northern entrance of the Suez Canal, opposite to Port Said lighthouse.

Ships up to 50,000 d.w.t. may undergo all kind of repairs in the shortest possible time. Tankers, by gas-freeing during their voyage from their home harbour to Port Said, will save at least 4 days if they carry out their repairs in our dock.

REPATRIATION: It is quite common that crew changes can be effected without any hinderance. As regards "signing off" members of crew, necessary facilities are given by the Immigration Authorities for their landing by granting them emergency visas and thus their repatriation arrangement by sea or by air can be effected easily. The "signing on" of foreign seamen is subject to the following regulations:

(a) A seaman and/or officer (non-residents) must be of the same nationality of the ship when arriving from abroad for this purpose.

(b) If a ship requires any rating, priority to engage Egyptian crew is given, unless indicated otherwise by means of a telegram or a letter from the ship's Owners abroad.

AIRPORT: The distance between the international airport at Cairo and Port Said or Suez is normally 2.5 hours. International airlines serve this airport. Cairo Shipping Agency is on constant contact with Agent for the necessary instructions.

In the interest of all and in order not to lose any time and to avoid any restrictions when sending crew members by plane to join their respective vessels, it is essential that the Agent concerned should notify by cable in good time the flight number as well as the time and date of the arrival in Cairo, thus enabling the Agent to notify Cairo Shipping Agency for the necessary clearance and as to whether they should be sent to join their vessels.

TIME: GMT plus 2 hours.

HOLIDAYS:

General Holidays	Year: 1977
Date and Month	Name of Holiday
February 22	Unity Day
March 2	Mouled el Nabi (Birth of the Prophet)
March 8	Syria-Revolution Day
April 11	Sham el Nessim
May 1	Labour Day
June 18	Evacuation Day
July 23	Revolution Day
September 1	Libya – Revolution Day
September 14/17	Ramadan Bairam
October 6	Armed Forces Day
November 20/24	Courban Bairam
December 12	Mohammedan New Year

The Dates of the Islamic holidays are stated approximately. Working hours: 06.00–1800 hrs. Overtime: 18.00–06.00 hrs. Friday is the weekly day of rest but it does not affect labour.

If a holiday falls on a Friday it is possible that the following working day will be decreed a holiday also.

Ramadan: Thirty days' fast and how it affects labour; Cargo operations can be carried out at night and on Fridays and General Holidays against payment of overtime rates. Arrangements should be made on the previous working day to enable Customs to delegate the necessary personnel in time.

Local Holiday

Port Said:	
December 23	Port Said Day
Suez:	
October 24	Suez Day

POLICE/AMBULANCE/FIRE: Vessels which are moored in the harbour either in Port Said or Suez requiring assistance from the Port Police, should hoist the International Code Signal (Y.M.). There is always a police guard appointed by these Authorities on each ship in either Port Said or Suez harbour. First-aid assistance can provide ambulances at a request through the Agent. In case of fire on board when in port, the Captain must inform the Port Authorities (the Suez Canal Authority) immediately and at the same time give a general warning by means of a long blast of whistle or siren and be prepared to move his ship to another berth if so required. The Suez Canal Authority own 7 tugs and other craft distributed in various points of the Canal with individual output from 10 to 950 t.p.h. well equipped with fire-fighting appliances, ready for use at any moment.

TELEPHONES: There are no telephone facilities available in Port Said except at berth No. 4 Red where passenger ships are normally berthed, and this can be connected when snake pontoon is fixed with ship's gangway.

SERVICES: Port Said and Suez being situated at a middle point between the East and the West, have become an ideal centre for replenishing stores and provisions which can be obtained in bond or from town. The chandling firms attending to all ships calling at A.R.E. ports are:

(a) The United Arab Marine Contracting & Supply Co., (cable address: "Consup").

(b) The International Marine Services Co. (cable address: "Marinco").

Delivery of provisions and stores is effected 24 hours a day at Port Said and Suez.

It is recommended that Masters should order their requirements prior to their arrival with a view to avoiding any delay specially for ships joining the 0700 hours convoy Southbound.

Deck and engine stores are ample and are also available and sold at (in bond) prices.

Paints: All kinds (bottom, boot-top, topside, enamel, engine ready mixed, heat resisting, varnishes) are also available at "in bond" prices. Painting of ships or undertaking any maintenance work on board is permitted while ship is in port waiting to join the North or the Southbound convoys as well as while transitting the Suez Canal.

The following companies are represented here:

International Marine Paint	Represented by The United Arab Contracting Co. (cable address: "Consup")
Hemples Marine Paint Campex Marine Paint Wiederhol Marine Paint	Represented by The International Marine Services Co. (cable address: "Marinco")

Chemicals: The following chemical firms are represented in Port Said and Suez:

Gamlen & Co.	Represented by The United Arab Contracting Co. (cable address: "Consup")
Bird Archer/Norus (Tommons & Chartes) Chemicals. Drew Chemicals Cameroid Products. Paroline Chemicals Cameroid Products. Walker Bow.	Represented by The International Marine Services Co. (cable address: "Marinco")

Grease and lubrication oils. Available from:

Esso Petroleum Co.
Misr Petroleum Co. (ex Shell)
Mobil Oil Co.
Caltex Oil Co.
Ocean Oil Co.
Wisure Oil Co.
Fina Oil Co.
Gulf Oil Co.
Castrol Burma Oil.

An advance notice of 48 hours is necessary to arrange for lubricating oils and/or bunkers required.

Charts: Admiralty Charts are available at Port Said only from the United Arab Marine Contracting & Supply Co. If any order has to be supplied at Suez, arrangements can be made for the required charts to be sent there.

Cigarettes: American and British cigarettes are available "in bond".

Technical Gases: Technical gases are also available at Port Said and Suez, and empty containers can be exchanged.

Fish: Bream, prawns, crab, rock fish available throughout the year; Mullet available June/February; Slip soles available November/March.

Vegetables: Beans, beetroots, cauliflower, cabbages, carrots, eggplant, endive, garlic, herbs, lettuce, marrows, parsley, radishes, spinach, tomatoes, turnips, escarole, onions, potatoes: *available throughout the year.*

Green peas, celery, pumpkins: *available January/March.*
Artichokes: *available October/April.*
Parsnips, spring onions: *available November/May.*
Green pepper, mint, lady's finger: *available June/September.*
Capsicum: *available May/December.*
Cucumber: *available February/December.*
Lemons, limes: *available throughout the year.*
Fresh figs, fresh dates: *available August/October.*
Bananas: *available October/June.*
Grapefruits, oranges, tangerines, *available October/May.* (When out of season import citrus are available).
Apricots: available May/June.
Water melons, sweet melons: *available May/October.*
Grapes: *available June/October.*
Plums, peaches: *available June/October.*
Mangoes: *available August/September.*
Pears: *available August/October.*
Apples: *available November/February* (also imported the whole year).

Eggs: Eggs are available throughout the year.

Meat: Fresh meat is only supplied to vessels having a Mohammedan Crew after permission is obtained from the Customs. Other vessels are supplied with "frozen" in bond.

Laundry: Well equipped, reliable and fast services are available at Port Said, through the ship's contractor. Ship's laundry is usually delivered within 24 hours. For vessels remaining a few hours in Port Said and transitting the Canal, their laundry could be collected, washed and ironed and then transported to Suez by special car or lorry for delivery to them there.

Garbage: No refuse or ashes are allowed to be thrown whilst ships are moored in Port Said, transitting the Canal or in Suez Roads. Small barges are available in Port Said and Suez for disposal of garbage or ashes, which craft can be obtained at a reasonable hire.

Motor Launches and Tugs Hire: Motor launches and tugs required for extra service are charged for as under:

At Port Said:

Motor launches per hour at day time, pt. 60 each; night-time, pt. 75 each; motor launches per day, pt. 300 each; night, pt. 450 each.

At Suez:

Motor launches per hour, pt. 1,250 each; tugs per hour, pt. 5,000 each.

Divers: Suez Canal Authority's Divers as well as other Contractors' experienced divers are available, capable of carrying out any kind of underwater repairs including welding and fees are subject to the kind of job to be performed. Anchors and other articles left behind by any ship in Canal waters are retrieved on no cure no pay basis.

SHORE LEAVE: Crew members are allowed ashore provided that they obtain a shore leave pass issued by the Immigration Authorities through the local Agent. They can proceed ashore by means of motor launches or rowing boats at their own expense. For vessels mooring opposite the town and connected with the shore by snake pontoon. Crew, together with passengers, can proceed ashore free of charge.

REGULATIONS: As Port Said and Suez are considered the leading ports to the Suez Canal, the Suez Canal Authority has established a convoy system for vessels transitting the Suez Canal.

It is important that the timings indicated are to be complied with. However, it is recommended that Masters arrive half an hour earlier to eliminate the possibility of their vessels being delayed on account of alleged late arrival at the pilot station or being considered as having anchored at an area away from the pilot station.

Conditions of Transit: Each vessel must be provided with a projector, either its own which should be in compliance with the Canal Authority's regulations, or a hired one obtainable from the Suez Canal Light Company. In case of hire, 2 electricians will be provided and the vessel is to supply them with food and accommodation.

2 or more mooring boats will be provided with a crew consisting of 3 men for each, to assist the vessel in mooring in the Canal when required. A sheltered place or accommodation, as well as food has to be provided by the ship.

Connecting links made fast to bitts or clinched on board should be hung over the vessel's side.

Wireless watch should be kept in accordance with the indication of the Pilot. The Authority's station S.U.Q. transmits on a frequency of 420 kc/s. (714 m.) Vessels communicating with S.U.Q. must transmit on a frequency of 425 kc/s. (841 m.).

Canal Pilots will be supplied with a wireless telephone to facilitate the despatch or receipt of messages. These sets require a direct current of 6 volts and special sockets according to the dimensions stated below, and which should be installed on the bridge within reach of the Pilot. The potential difference at the socket must not be less than 6 volts. The socket must withstand a current of 5 amps.

The socket's dimensions are as follows:

Diameter of each female	4 mm.
Length of each female	18 mm.
Distance between the two females	12 mm.

In the event of such sockets and/or the required current not being available, the telephone will be accompanied by a battery, at vessel's expense. Each vessel should be equipped with: *(a)* Rudder Angle Indicator, *(b)* R.P.M. Indicator.

According to Article 15 para. 2a of the Suez Canal Rules of Navigation, the above appliances must be fitted on the bridge in such a position that the Pilot may read both, without having to move away from his situation. An exemption to the above requirements is granted to vessels having a Suez Canal gross tonnage of less than 2,500 tons (excluding spaces not permanently added to the gross tonnage) and to ships not passing through the Canal more than 3 times a year.

Pilot Signals:

By Day: International Code Flag "G" under a black ball, (for entrance in Suez Basin, only "G" flag).

By Night: 3 white lights vertically hoisted, which must be clearly visible from the watch tower of the Suez Canal Authority's offices.

DEVELOPMENTS: Since the nationalisation in 1956 of the former Suez Canal Company, several improvements have taken place to facilitate transit and to accommodate larger ships. A by-pass between Kantara and Ferdan of about 9 km. in length exists to enable Northbound vessels to pass Southbound ships. The max. draft allowed presently in the Canal is 38 ft. for Northbound vessels only. The Suez Canal Authority is undertaking a project to be accomplished by 1978 aiming at increasing the Canal cross sectional area to 2,500 sq. m., so as to allow the transit of vessels with a draft of 48/50 ft. and a beam of about 135 ft. Same draft will be applicable to both Port Said and Suez and at the same time, as the project is being accomplished.

Plans have been confirmed to extend the capacity of the Canal to accommodate tankers of up to 150,000 d.w.t. Completion date of the work involved is presently uncertain. Additional plans call for further extension allowing transit of loaded tankers up to 300,000 d.w.t.

SHIPMASTER'S REPORT No. 1: *Suez Canal Transit (South/North) (1976)*

C. Guardafui light was clearly seen and identified at a range of 39 miles.

There was an oil rig operating Southwards of the Cape in approximate position 11° 44′ N.: 51° 21′ E.

The Straits of Bab El Mandeb were congested but the traffic separation scheme seems to be satisfactory. The passage of the Red Sea does not seem to be any different from the past.

When passing Aden, a preliminary message was sent to the Suez Agent. This was of doubtful value but it is advisable to send a message addressed to 'Port Authorities Suez', via station SUK, giving the following information:–

Ship's name and flag.
Whether transit of canal is desired.
Destination.
Where from.
Cargo aboard.
Whether any dangerous cargo carried.
Draft
ETA at – 23° North, Straits of Gubal, Suez.

All radio messages through the Egyptian radio stations must have a signature, i.e. 'Master'.

The ETA's can be updated as necessary. The message to the Port Authorities is mandatory.

Approaches: The Gulf of Suez is congested by oil rigs – particularly in the vicinity of Ras Shukheir and the Ramadan and July oil fields where there are many rigs and flares and supply vessels crossing the Gulf. One oil rig was working in the middle of the fairway East of Ras Dib. With poor visibility, if a Southbound convoy were to be met in this region, it might be wise to proceed at manoeuvring speed.

Most of the lights in the Gulf are extinguished but Newport Rock lighthouse, the buoys and other lights in Suez Bay are working and are efficient.

A pilot cutter operates just South of the waiting area but an approaching ship will be called by signal lamp from ashore, asking for the ship's name and making "VHF". Contact is then established on Channel 16, changing to 6 when the ship will be told whether to anchor in the waiting area or remain under weigh until the Pilot boards.

Pilotage: The Pilot boards from a launch by means of the accommodation ladder (which should be lowered to within 3 ft. of the water) and takes the ship to her designated anchorage in Suez Bay.

Arrival Formalities: Quarantine and Customs authorities (about 8 people) board the ship at the anchorage together with the Agent. The accommodation ladder is used for all boarding and disembarkation within the canal. It should be raised when not actually in use otherwise the ship will be boarded by numerous "Businessmen".

A list of forms required is listed below but there are others which the various authorities bring with them and some are presented for filling in more than once and by different officials. This ship's transit was delayed because the Agents had not received funds from London. Deck log books for the past six months have to be landed.

The Suez Canal Cargo Declaration Form (in duplicate) is handed to the Pilot who disembarks at Ismailia.

At Anchor: With 3 shackles out, this ship lay comfortably at A8 berth. Some difficulty, however, was found in reconciling the various anchor bearings with the chart.

A bumboatman will seek permission to set up shop aboard. Care should be taken to agree methods of payment beforehand.

A listening watch should be kept for Suez Control on Channel 6. Water can be ordered through the Control and will be delivered in a large water boat carrying about 300–400 tonnes. Rate of delivery is about 50 t.p.h.

Convoy lists are made out at about 0300 hrs. and ships can call Suez Control soon after that to learn their convoy number and time of Pilot boarding. Convoys can start as early as 0500 hrs. This vessel was number 10 and hove up at 0830 hrs. Our searchlight was brought out at 1700 hrs. and the boats at 0500 hrs. We were asked to carry 4 extra boats but Pilots advise against this as the time taken to unload 6 boats can cause delay at the other end of the canal.

Transit: There seems to be no change in the transit of the canal. The Pilots change at Ismailia. The convoys cross in the Great Bitter Lake, anchoring as necessary. There is now one convoy from each end every day.

A Harbour Pilot takes over on reaching Port Said and, as soon as the searchlight and boats have been off-loaded and the ship has entered the approach channel, he disembarks.

The Agent will board at Port Said with yet another form to be filled in and he will return the log books.

Documentation:

2 Health Forms (Egyptian)
1 Passport Form (Egyptian)
1 D.B. Tank Statement (Egyptian)
1 Radio Frequencies Form
2 Cargo Declarations
*4 Cargo Manifests
8 Crew Lists

Plus several others which will be produced by the various officials.

* It was explained that our company's vessels do not carry cargo manifests but the Agent said that a typed statement of the amount of cargo aboard, destination and where loaded would suffice.

SHIPMASTER'S REPORT No. 2: *Suez Canal Transit (South/North) – (1976)*

After clearing Aden a radio message was sent to the Port

Authorities Suez via Port Said Radio advising them of the following:—

Ship's name and flag.
Whether desire transit.
Destination and last port.
Cargo aboard total tonnage and type of cargo.
Whether dangerous or explosive cargo carried.
Draft.
British tonnages gross and nett.
Date Suez Canal Certificate issued.
Tonnages gross and nett from Suez Canal Certificate.
Advice as to whether searchlight required.
ETA's 23° North Straits of Gubal Suez.

During the passage in the Red Sea both Port Authorities and Agents received up-dated ETA messages. When using SUK radio to give up-dated ETA this station advised that a cable was necessary to be sent to Port Authorities Port Safaga via SUK giving ETA Strait of Gubal.

Navigation in the Red Sea does not seem to be any different from the past. The Traffic separation scheme in the Straits of Bab El Mandeb seems satisfactory.

Straits of Gubal and passage in the Gulf of Suez was in daylight. Especially in the Straits of Gubal very few seem to adhere to any form of traffic separation scheme. There is no doubt that if it were night time or poor visibility then it would be advisable to be on 'Stand-by'. There is now an oil rig 27° 57′ N., 38° 41.2′ E., or 349°, 5.7 miles from Ashrafi Lt. Ho.

The Ramadan and July Oil Field area has many oil supply ships, most of the Southbound traffic was met in the Straits of Gubal thus further North it was very quiet.

The ship was anchored in the waiting area South of Newport Rock but alas this area shown as being to the East of the 2 green flash buoys is *now wrong!* The waiting area is to the S.E. of the most Southern Green flash buoy. About 1 mile South of the previous position. Evidently there is shoaling in the old area and ships have grounded.

On arrival at the waiting area the ship had to anchor as the Southbound convoy was clearing. A tug with Pilot Signal closed the ship to ask for information with regard to tonnages, cargo etc. After first vocal contact Channel 6 VHF was used. The ship was not called up by lamp nor did the Port Control answer any VHF requests etc. It would seem that if the Tug is on station advice is received from there. They did not, however, attempt to advise the ship that the waiting area had been altered.

As the ship anchored a boat came alongside with two watchmen but as I had not requested these and the visitors had not boarded they were sent ashore.

Later a Pilot boarded via the accommodation ladder to shift the ship from the waiting area to a designated anchorage, in our case '1B'. Ship was anchored in '1B' by 0030 hrs. on 12th, having arrived at the waiting area at 1947 hrs. on the 11th.

As the ship had some essential repairs to the main engine which would only take a short time, engines were immobilised. Pilot had advised that 0800 hrs. would be earliest time for transit. During the middle watch the area was hit by a fierce short lived blow from a Southerly direction. Although the vessel did not drag, ships close by did. It was necessary to pay out more cable to ensure a bulk carrier cleared us comfortably. During this time a ship called Port Control to say they had dragged some 3 to 5 cables.

As the weather for some 3 hours was considered bad for small boats the first of the visitors did not board until 0515 hrs.

The Canal Surveyor, who was the first to board was quite helpful and pleasant. He took the Suez Canal Tonnage Certificate for verification as the ship was making a first transit. This I have been informed will be returned to the Company in about 2 months.

Later other officials boarded about 0700 hrs. The Agent also came off with the mail. The 2 electricians for the searchlight insisted on being given a cabin or they would not remain on board. As there was no spare cabin, except one in the crew accommodation, I endeavoured to explain that a reasonable shelter had been built on the after end of No. 2 hatch. It transpired that in the end I moved a patient who had tonsilitis out of the hospital. Later the Canal Pilot informed me that the electricians can not be so demanding provided a reasonable shelter is provided.

Documentation was found to be as advised in the report above. One small difference is that the Cargo Declaration form is only required as 1 copy and is now in English with one form for South to North ship's and another for North to South ships.

At the moment there is only the 1 convoy each way per day. Hours of commencing transit seem a little doubtful. I gather that first Southbound ship leaves Port Said at 0200 hrs. while the first Northbound ship now leaves Suez at 0800 hrs.

Searchlight and 2 boats were brought alongside and loaded in ample time prior to the Canal Pilot boarding at 0909 hrs. I gather that because of the 'bad' weather for those few hours the delivery of searchlights and boats was delayed. Also no advice was obtainable on the VHF after 0300 hrs. with regard to convoy number or time of proceeding. About 20 minutes notice was given over the VHF.

The Transit was quite straight forward. Ship was anchored in the North Anchorage, Bitter Lakes for 3.5 hours, the Southbound convoy passing. Transit was commenced at 0947 hrs. At Ismailia the Pilot changed. He took the Cargo Declaration with him.

Port Said was reached at 0033 hrs. on the 13th. The Sea Pilot boarded here as did the Agents who returned the Ship's Register and Log Books which had been landed at Suez. The ship had to keep moving while the boats and searchlight and personnel were either off-loaded or disembarked. At night this is not easy and the whole crew are required to ensure a safe and quick operation. Once these matters were completed the Sea Pilot left well within the breakwater. Accommodation ladder was used at all times for Pilots, Officials and Agents boarding and disembarking. Fairway Buoy was abeam at 0148 hrs. on the 13th.

On the Eastern Banks of the Canal there is much work being done with levelling ground and widening the canal. Also in the Little Bitter Lake. *According to the Pilot 2 convoys from North will be put into operation in about 1 month.*

AUTHORITIES: The Suez Canal Authority is the Authority governing Port Said harbour as well as Suez Bay.

AGENCY: As far as reception of ships and their transit of the Suez Canal. The Suez Canal Shipping Agencies Company is responsible for shipping companies in Canal Zone, Suez Gulf and A.R.E. Red Sea ports, through 4 branches at Port Said for each of which there is a branch at Suez and 1 in Cairo. Their names are:

Canal Shipping Agencies Company, Port Said. 26 Palestine Street, P.O. Box 262. Telephones: 8164/65 – 8174–8602/4. Telegrams: CANASHIP. Telex: 92275 AGEN UN.

Branches:

Assiut Shipping Agency, Port Said. 9 Mostafa Kamel Street, P.O. Box 128, Telegrams: ASSIUSHIP. Telex: 54262 ASUT UN. Telephones: 2722, 8070.

Asswan Shipping Agency, Port Said. 7 El Goumhouria Street, P.O. Bag. Telegrams: SWANA. Telex: 54261 SWAN UN. Telephones: 3194, 3195, 3196, 3521/23.

Damanhour Shipping Agency, Port Said, 40 El Goumhouria Street, P.O. Box 126. Telegrams: DAMANSHIP. Telex: 54264 DAMA UN. Telephones: 2951/53–3014, 3024, 3027.

Assiut Shipping Agency, Suez, 1 Abdel Khalek Street, Abou Ghabban Building. Telegrams: ASSIUSHIP.Telex: 54187 SUAG UN (Attention ASSIUSHIP). Telephones: 2790, 3025.

Asswan Shipping Agency, Port Tewfik (Suez), 1 El Gueish Street, P.O. Box 4. Telegrams: SWANA. Telex: 54187 SUAG UN (Attention SWANA). Telephones: 2074, 2149, 3216.

Offices at Safaga, Kosseir and Ras Gharib:
Telegrams: CANASHIP. Telephones: Safaga 10, Kosseir 14, Ras Gharib 71.

N.B.: Safaga, Kosseir and Ras Gharib to be contacted via Kosseir Radio around the clock.

Port Said offices to be contacted via Alexandria or Port Said Radio around the clock.

Suez offices to be contacted via Alexandria or Port Said Radio around the clock.

WADI FIRAN: 28.44 N. 33.13 E.

An open anchorage on Sinai coast in the Gulf of Suez about 85 nautical miles South of Suez.

There are 6 large and conspicuous storage tanks in 2 parallel rows of 3 tanks each lined on shore near the pumping station and painted with aluminium.

PILOTAGE: Pilot boards each tanker at anchorage.

BERTHING: Tankers must approach berth from West, never from North, and must follow same track on their departure to be entirely clear of shallow water. Three berths: No.1, length 430 m., depth 17 m., for tankers of max. 47 ft. draft, 60,000 d.w.t., No. 2 length 430 m., depth 10.3 m. for tankers of max. 28 ft. (to be increased to 31 ft.) draft 25,000 d.w.t., No. 3 length 230 m., depth 6 m., for tankers (unloading only) of max. 17 ft., draft, 20,000 d.w.t. Tankers at berth will be connected to shore pumping station by submarine telephone cable. Mooring and unmooring operations normally take place in daylight.

AUTHORITY: Cie. Oriental des Petroles d'Egypt.

NOTES

Please also advise Shipping Guides Ltd.

El Salvador

ACAJUTLA: 13.35 N. 89.52 W. (See Plan Book)

DOCUMENTS:
1 Clearance from last port.
6 Voyage Memorandum.
6 Crew List.
6 Disembarking Passengers' List (local passengers list).
6 Transit Passenger List.
6 Store List.
1 L.P. International Health Certificate No. 1 and 2.
16 Copies of the Manifests.
2 Copies of Bill of Lading.
4 Cargo Distribution List.
16 Tally Books.
2 Mail List.

Agent distributes all papers. Agent also supplies list of papers for next port.

Bond sealed. Shop sealed.

PILOTAGE: Compulsory. *(a)* Vessels requiring Pilot use International Code Signals. *(b)* Pilot boards vessel at a distance between 1 and 2 km. from the port, where vessel should wait with engine running. *(c)* Pilot ladder required for boarding. *(d)* Gangway ladders should be raised and folded, derricks and cranes inside, anchors ready for berthing. Pilot is equipped with walkie-talkie for communicating with tugs.

ANCHORAGE: There is no specific anchorage area. Pilot meets vessel and immediately proceeds alongside. If there are no berths available, the vessel may anchor anywhere outside the dock.

MAX. SIZE:

Berth	*Max. Draft*	*Vessel Length*	*Depth at MLW*
A–1	9 m.	152 m.	10 m.
A–2	10 m.	183 m.	12 m.
B–3	9 m.	152 m.	10 m.
B–4	10 m.	198 m.	12 m.
B–5	9 m.	152 m.	10 m.
B–6	9 m.	152 m.	10 m.
C–7	12 m.	128 m.	13.7 m.
C–8	12 m.	128 m.	13.7 m.

Tankers: At the sea-line berth, max. draft 12 m. and max. length 213 m.

HEALTH: If there is any suspicion of illness aboard, Captain has to inform by radio 24 hours in advance, indicating nature of disease and all details. On arrival, vessel should anchor with yellow flag hoisted, to wait for the doctor of the port.

RADIO: There is no special key for calling. Port VHF service is open 24 hours a day. Contact through Channels 16 and 27.

Channel 27 receives on 157.35 mHz and transmits at 161.95 kHz. Business and operation.

Channel 16, 156.8 mHz ship calling and Safety. Channel 14, working.

TUGS: Tow lines not usually used; if necessary the tug lines will be used, and their charge included in the whole service.

Three tugs, available, one 800 h.p., one 1,200 h.p., one 1,800 h.p. Tugs meet the vessels off the dock.

BERTHING: Vessels can berth in safety at any time, day or night.

In the case of cargo vessels it should be stressed that the swell experienced alongside is sometimes a serious problem and Masters would be well advised to make use of the shore lines offered on hire to save undue wear and tear on their moorings.

There are 2 piers: the first one called "A" consists of a breakwater mole 763 m. long. The access mole runs for approximately 400 m. and has a free width of 7 m. The pierhead which is 37 m. wide and 310 m. long, includes a combined breakwater, a mooring dock (2 berth capacity) and a transit shed. This pier can handle general and liquid cargo.

At the end of this pier head is constructed a breakwater in a N.W. direction in line with the existing pier for a distance of 35 m., then direction is changed to the North with an angle of 30° and extend 270 m. with a width of 18 m. This breakwater offers 2 berths (C-7 & C-8) capable of handling liquid and general cargo.

The second pier called "B" (4 berth capacity) is 360 m. long and has a free width of 28 m. Products handled in this pier, general and bulk cargo.

MEDICAL: There are doctors in the port who attend normal cases and specialists and hospitals in Sonsonate City at 20 km. (by road) and in San Salvador, capital of the Republic, 85 km. from the port.

DEVELOPMENTS: CEPA intends to develop the port to provide adequate facilities for the handling of containers in order to attend the further increase in the country's foreign trade and particularly to make provisions for the development of containerised berths in Central America.

TANKERS: Moorings at RASA (Refineria de Acajutla Sociedad Anonima). This refinery is the property of Esso Standard Oil and Shell Petroleum Company.

Buoy Berth: Depth of water is about 15 m. Diameter of buoy lines, 2 of 25 cm. for clean products and one of 75 cm. for crude oil and fuel oil. There are no facilities for residue discharge.

STEVEDORES: Must be ordered 24 hours before arrival by Agent, confirmation by radio-telephone as to the number of gangs needed is always convenient.

A line handling gang is always standing by, this gang also attends gangway. No charge for this service.

Stevedores are available for nightwork.

DENSITY: Salt water.

FRESH WATER: Delivered by hoses. Rate approximately 40 t.p.h., cost US$1.20 per metric ton.

FUEL: Possible to supply diesel and Bunker "C" only in limited quantities, delivered by lorries. Viscosities: Bunker "C" 175 sec. Saybolt furol. Diesel 40 sec. Saybolt universal.

FIRE PRECAUTIONS: Inspection of hoses; no smoking; not allowed to solder or light any kind of fire; isolation of the place of loading and discharging operations; fire equipment to be ready.

GANGWAY/DECK WATCHMEN: This service is done by the port staff free of charge.

OPENING/CLOSING HATCHES: This work is carried out by stevedores.

SHIP CERTIFICATES:

Vessel has to carry the Ship's Register (showing the registered tonnage).

Derat. Certificate.

CUSTOMS ALLOWANCES: Customs allow to take out of the vessel only tobacco for personal use. Not allowed to take any wine or spirits out of the vessel.

CARGO GEAR: Ship's gear used, equipment has to be in good state with certificates showing capacity and safety.

IDENTIFICATION CARDS: Not required, but each member of crew has to be in possession of a valid passport.

CONSULS: British Consul. In Sonsonate City there is the Consul of Guatemala Republic, tel. 51-0739, and in San Salvador City are Consulates for most countries.

REPAIRS: Possible to do minor engine and deck repairs. Other repairs can be carried out in San Salvador City. Any repairs that will delay sailing of vessels cannot be done without previous and specific authorisation of the manager of the port.

REPATRIATION: There are facilities for repatriation.

AIRPORT: There is an airport served by regular airlines in San Salvador at 95 kms. from this port (by road).

TIME: No alterations in time during the year; local time is GMT minus 6 hours.

HOLIDAYS: 1st January, Maundy Thursday, Good Friday and Saturday, 1st May, 10th May, 6th August, 15th September, 2nd November, 25th December; the port stops working only on 1st January, Good Friday and 25th December.

POLICE/AMBULANCE/FIRE: National Police (Sonsonate) tel. 51-0838; Ambulance (Sonsonate) tel. 51-0589; Fire (CEPA, Acajutla) tel. 52-3000.

TELEPHONES: No possibilities to install telephones aboard.

GENERAL: Quarantine authorities pay strict attention to the meat on board and its residuum to prevent fever and it is forbidden to remove any kind of meat from the vessel. Berthed vessels need, in case of swell, special hawsers and wires provided by the port, and charged to vessel.

Hire of these lines is US$1.00 each one and for every 1,000 tons gross.

SERVICES: No facilities to discharge tank-washings.

SHORE LEAVE: Members of the crew are allowed to go ashore.

DELAYS: There are no delays for mooring, loading and discharging. Refuelling bunkers operates slower than normal loading and discharging.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA).

LA LIBERTAD: 13.29 N. 89.19 W.

CLOSED TO CARGO VESSELS SINCE MAY 1976

DOCUMENTS: Required:

By Port Captaincy
Clearance from last port called.
2 Crew Lists.
1 Store List.
1 Passengers List. In case passengers disembarking, passports to be countersigned by the migration delegate have to be shown.
1 Voyage Memorandum.
1 Manifest of Cargo from each port.

By doctor delegate of health
Health Certificate.
1 Voyage Memorandum.

By quarantine delegate
Voyage Memorandum.
Crew List.
Cargo Manifest, one for each port.

By CEPA delegate
Voyage Memorandum.
Crew List.
2 Store Lists.
Cargo Manifest (5 copies).
Tally Books for cargo.
Number of tons of diesel on board.
Number of tons of water.

By Customs delegate
Voyage Memorandum.
1 Crew List.
Passenger List.
Store List.
Cargo Manifests countersigned by the Consuls each port of origin and 7 more copies for each one.

PILOTAGE: Vessels requiring a Pilot use International Code signals. No official pilot service.

ANCHORAGE: Depths of 60 ft. available. Vessels can anchor at a minimum distance of 1 km. from the quay. All dry cargo vessels work cargo at the anchorage. No quay berths available.

HEALTH: On arrival vessel should anchor and wait visit of Port Authorities. Any suspected diseases should be notified 24 hours in advance.

RADIO: VHF Service with transmission and receiving frequency of 27.075 mHz. In the dock the set is 100 watts AM, transmitter/receiver by 3 Channels:

Channel 1, 2163 kHz calling the tugboats.
Channel 2, 2182 kHz calling and Safety.
Channel 3, 2196 kHz calling the ships.

In the tugs, the sets are 60 watts AM, transmitter/receiver by 5 Channels:

Channel 1, 2163 kHz calling the dock.
Channel 2, 2182 kHz calling and Safety.
Channel 3, 2196 kHz calling the ships.
Channel 4, 2638 kHz calling the ships.
Channel 5, 2738 kHz calling the ships.

The following set is a monitor to receive emergency calls: 2163 and 2196 kHz.

TUGS: No tugs required or available.

STEVEDORES: 24 hours notice required to arrange gangs and barges.

MEDICAL: Inform Agent as soon as possible to arrange a medical visit. The port has doctors to attend normal cases, and there are specialists and hospitals in San Salvador (capital of the Republic) at 35 kms. by road from this port.

TANKERS: At Esso Standard Oil, S.A. terminal, vessels anchor and moor to 3 buoys about 900 yards S.E. of the shore and about 1,000 yards S.S.W. of the pier. Pipe-line extends from La Puntilla in a S.E. direction. Two pipe-lines for discharging products to Esso Standard Oil, S.A, The end of each pipe-line is marked by a metallic buoy, the cargo hoses for No. 1 and No. 2 pipe-lines are connected by separate chain to a "Spreader" which by single chain is attached to a metallic marker buoy. On the "Spreader" there is marked, by welding, 1 and 11 where the chains are attached, indicating what pipe-line they are connected to. Ship's crew is used in connecting and disconnecting cargo hoses.

Vessels should moor only on high water during daylight hours; however, they may unmoor day or night. Launch available for mooring and running lines. Approach is made from the Eastward on a true course 270°, a marker buoy is placed temporarily at a distance of 700 ft. seaward from end of pipe-lines to guide vessel in mooring operations. The marker buoy should be passed on the inside at a distance of 50 ft. Port anchor should be dropped first when the end of the pier is in true bearing 006°. When about 7 shots of chain have run out, the starboard anchor should be dropped. The stern of vessel will swing or may be worked to Northward (starboard). A mooring line should be run to the port stern buoy from port side assisting in swinging the vessel into position. Vessel should tie up securely with 3 lines to each buoy, and anchor spread 60° with 60/76 fathoms of chain on each. The eyes of all lines to buoys should be well protected to prevent chafing on the buoys. When in position, the pipe-line hose buoy is taken on board at the starboard side.

DENSITY: Salt water.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: There is a service of watchmen provided by Customs.

OPENING/CLOSING HATCHES: Carried out by stevedores.

SHIP CERTIFICATES:

Ship's Register.
Deratisation Certificate.
International Health Certificates required.

CUSTOMS ALLOWANCES: Only tobacco for personal consumption may be taken ashore. No wine or spirits to be taken ashore.

CARGO GEAR: Vessels' cargo gear to be in good condition with certificates of capacity and safety.

IDENTIFICATION CARDS: Not required if crew members possess passports.

CONSULS: In the capital, San Salvador, 35 km. from the port, there are consulates for most countries.

REPAIRS: It is not possible to have repairs.

REPATRIATION: Facilities available.

AIRPORT: There is an International airport served by regular airlines in San Salvador, distance approximately 46 kms. from the port.

TIME: GMT minus 6 hours. No alteration.

HOLIDAYS: Festivals: Saturday of the Holy week, 14th April, 10th May, 22nd June, Corpus Christi, 5th August, 12th October, 24th October, 5th November, 7th December, 24th December, 31st December. Legal holidays: 1st January, Maundy Thursday and Good Friday, 1st May, 6th August, 15th September, 2nd November, 8th December, 25th December. The port is only completely out of work on the following days: 1st January, Good Friday and 25th December.

POLICE/AMBULANCE/FIRE: National Police (La Libertad), 35-3175; Ambulance (San Salvador), 21-9406; Fire (San Salvador), 21-8661.

TELEPHONE: It is not possible to place telephones on board.

GENERAL: Quarantine Authorities prohibit removal of meat from the vessel.

SHORE LEAVE: Crew is allowed to go ashore.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA).

LA UNION (Cutuco): 13.20 N. 87.51 W.

(See Plan Book)

DOCUMENTS: See "Acajutla".

PILOTAGE: Obtained usually through Agent, can be cable-requested to Port Captain-La Union.

ANCHORAGE: La Union Bay – up to 34 ft. Approximately 14 Class II and a large number of Class III anchorage berths are available in the harbour. 5 Class II berths are in the vincinity of the pier in depths of 33 ft. to 30 ft., and approximately 9 more, in depths of 70 to 30 ft., are just Westward of Isla Zacatillo. The first area has a mud bottom; the second is sandy and rocky. The large number of Class III berths are in an area Northward of the pier and in the area between the 2 anchorages providing Class II berths. The least depth in each of the areas is 25 ft. A large number of relatively unsheltered anchorage berths of all classes are available outside the harbour in the Gulf of Fonseca.

RESTRICTIONS: Enter any time – preferable on flood tide with draft over 24 ft.

MAX. SIZE: Largest vessel that can be accommodated in harbour would occupy an anchorage berth with a min. depth of 43 ft. and a diameter of 3,300 ft. Largest vessel that can be accommodated alongside wharf would occupy a berth with least depth of 25 ft.; length is not a limiting factor, although a max. 550 ft. is recommended due to strong currents, 3 knots, and pressure on part of any vessel extending for any greater distance beyond length of wharf.

HEALTH: Disease should be reported. Pratique necessary on each occasion.

RADIO: Direct to Agents or Guarailco, San Salvador.

TUGS: No tugs required.

BERTHING: Berthing usually carried out on slack tides due to cross currents, up to 3 knots. The estimated military port capacity is 1,800 tons of general cargo per day. Port can accommodate 2 standard-type ocean-going cargo vessels, and possibly one alternative class T/C (small ocean-type tanker under favourable conditions) alongside berths, and approximately 14 ocean-type cargo vessels, and a large number of Class III (coaster-type cargo vessels) at anchorage berths. Roll-on/roll-off pier, depth alongside 16 ft. LW.

STEVEDORES: Prior advice preferable. Stevedore force consists of 12 gangs of up to 16 men per gang for on-board work. Similar gangs are available on pier, and up to 300 labourers, crane and fork-lift operators comprise shore gangs.

MEDICAL: Services available – no special restrictions.

TANKERS: Drafts 25/34 ft. fore and aft. Tankers of up to 550 ft. in length can be accommodated at either side of pier, where adequate connections of 6–8 in. and 10 in. pipe-lines are located. Largest vessel that can be accommodated alongside would occupy a berth with a least depth of 25 ft.; length is not a limiting factor, except as noted previously.

FRESH WATER: Four 2 in. connections on each side; volume estimated at 10 t.p.h.

FUEL: Bunkers and diesel – can be delivered when berthed.

GANGWAY/DECK WATCHMEN: Not required – National Marines on guard.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCE: Not controlled, but restricted ashore.

IDENTIFICATION CARDS: Passes for leaving ship to have Captain's signature.

CONSULS: Only Nicaragua is represented.

REPAIRS: No facilities.

REPATRIATION: Can be arranged.

AIRPORT: San Salvador – 120 miles away – regular airlines.

TIME: GMT minus 6 hours. No alterations.

HOLIDAYS: Easter Thursday, Good Friday. Port not worked only on those dates.

POLICE/AMBULANCE/FIRE: In La Union – Close to the Port.

TELEPHONES: None available.

SHORE LEAVE: Allowed.

AUTHORITY: International Railways of Central America.

NOTES

Please also advise Shipping Guides Ltd.

Equatorial Guinea

BATA: 01.52 N. 09.46 E.

SHIPMASTER'S REPORT

Roadstead with single point mooring buoy connected to the shore with 6 in. pipe-line, 6 in. hose: (everything in a deplorable state). No tugs or Pilots available. Master should have local knowledge when approaching berth in hours of darkness. Vessels are moored with 2 anchors forward and 2 ship's lines (plus two 8 in. shore lines) to the single point mooring buoy. 5 lengths of 15 m. hose available. Preferable stern discharge connection to be used. Max. pressure: 4 kg/sq.cm. All grades through this line. Linewash of water in between the different grades. There is rubber ball for cargo separation.

Advice: 1. In view of the deplorable state of buoy, lines and hose, Master should be very careful in mooring his vessel – which has to be done by himself – in order not to damage same.

2. Master should have ship's motorboat ready to run ship's lines to the buoy because motor launch, which is supposed to do this is very old and liable to breakdown at a crucial moment.

3. Anchors should be dropped in a position S.W. of the buoy in order to stay well clear of the unmarked wrecks, in good holding ground with 4 to 5 lengths of chain.

4. Tidal currents move the ship relative to the mooring buoy – so it is necessary to heave anchors tight – bearing in mind that the construction, etc. of the buoy is very weak.

5. The buoy carries a light but the light does not work. Anyway mooring after dark is not advisable.

Documents: Only a small customs post available here:

1 Cargo Manifest.
1 Store Manifest.
1 Crew List.

Custom allowance: No restrictions – no sealing of bonded stores.

Shore leave: Allowed by ship's boat.

Radio communication: None. Though there are officially coast radio stations in this country, they do not operate on schedule. Telegrams should be sent via coastal radio stations of other countries. No VHF.

PUERTO MACIAS, (Puerto Nuevo): 01.49 N. 09.44 E.

Situated about 1 mile South of the mouth of the Rio Ekuku. This is quite a new jetty – developed in 1973 – shaped like the letter "L", where the long leg of this "L" is connected to the shore and 4 dry cargo vessels can moor alongside the short leg in about 14 m. of water. Every vessel has on her off-shore side 2 mooring buoys to assist in mooring and unmooring. No tugs available. Though it is stated that a Pilot is available, this information should be treated as unreliable. The pier is used for the discharge of general cargo and the loading of logs and sawn wood. According to information received this jetty will be made available to tankers for discharge of oil products.

Documents: See "Bata". This new jetty falls under the jurisdiction of Bata authorities.

Radio communication: See "Bata".

REY MALABO, (formerly Santa Isabel): 03.46 N. 08.48 E.

Situated on the Island of Macias Ngueme Biyogo (formerly Fernando Poo) Capital of the Republic of Equatorial Guinea.

Documents:

9 Crew Lists.
3 Stores Manifests.
3 Crew declarations.
2 Lists of Arms and Ammunition.
4 Lists of Ports of Call.
2 Passenger lists or negative.

General: No tugs.

Pilots: Effectively none. Only a locally informed inhabitant of this port comes on board to inform the Master, he is equipped with a large scale Spanish chart of this bay, but he has no nautical knowledge and he does not know how to handle a ship.

Note: 1. Masters should bear in mind that they have to manoeuvre and moor the vessel themselves.

2. In view of the continuous breakdowns (and insufficient power) of the mooring-launch it is absolutely necessary to have the ship's motor boat at stand by to run the ship's mooring-lines ashore.

Mooring procedure: Tanker berth: old jetty (muelle viejo). The ship should be moored stern-to to this jetty. On entering the port with the lights in line starboard anchor is dropped in the middle of the bay and the ship has then to manoeuvre around with her own engines, till in line with the berth.

N.B. Because there is very seldom anybody present at the jetty to accept the mooring lines (on arrival as well as on departure) the vessel's crew should be kept on stand by to do this job.

Arrival/Departure: Between 0600 and 1800 hrs.

Tankers: Preferably stern discharge into a 6 in. line with 6 in. hose. All grades through one line – Linewash with water in between – pressure 4 kg/sq.cm. max.

Dry cargo vessels: Berth at a new jetty on the West side of the bay. No cranes available.

Advice: 1. Masters should be very careful when dropping their anchors as some vessels (Man of war) moor with their sterns to the dry cargo jetty and have their anchors in the middle of the bay. These anchors are very easily fouled by incoming vessels anchors. A useful suggestion might be to put anchor buoys on the anchors in order to show another incoming ship their position.

2. Because it is quite difficult to manoeuvre a tanker around in this bay without any tug assistance, it should be borne in mind that when the wind is over Force 2 manoeuvring with a sizeable vessel is apt to falter, and no assistance can be expected from any quarter.

Departure: Vessels are free to leave within mentioned hours without Pilot.

Radio communication: See "Bata".

Custom allowance: No limit – no sealing of bonded stores.

Shore leave: No restrictions, but with own motor boat.

Currency: Eq. Guinea Peseta = Spanish Peseta.

PURSER'S REPORT:

Documents:

9 Crew Lists.
9 Passenger Lists (Marked "none" if no passengers on board).
3 Customs Declarations.
3 Stores and Provisions.
4 Arms and Ammunition.
1 Vaccination List (Smallpox, Cholera and Yellow Fever).
9 Cargo Manifests.

Stores: No stores were purchased at this port, advise top up prior to calling at this port.

Mail: Advisable to send to next big port.

Bata: Same papers as above. No officials come out to the ship at this port, however, papers should be kept ready. Vessels moor to a buoy for discharge.

NOTES

Please also advise Shipping Guides Ltd.

Ethiopia

ASSAB: 13.01 N. 42.44 E.

PORT LIMITS: A line drawn from Ras Gombo to the Northern point of Umm al Baher (Islands) to Southern point of Umm al Baher, then to Ras Marcanah.

DOCUMENTS:

5 Manifests for transit passengers and passports.
5 Manifests for landing passengers and passports.
5 Crew Lists.
1 Complete Crew Provisions List.
1 Crew Personal Effects List.
1 Store List.
6 Cargo Manifests.

PILOTAGE: Compulsory Pilots take tankers in and out of oil harbour only during daytime. Pilots embark about 1 mile N.N.E. from Northern extremity of breakwater. Commercial harbour gives 24 hour service. Vessels calling Assab must advise Agent through Assab Coastal Radio Station by call sign ETC. Assab Radio Signal Station is available.

ANCHORAGES: Assab Bay provides good anchorage in 42 to 48 ft. of sand and coral bottom, good holding ground. Generally weather in Assab can be divided into two: Summer time and Winter time weather, during Summer (May–September) Northerly wind blows with a maximum force of 3/4 BS. During Winter time (October-April) South-easterly local monsoon winds blow usually 5/6 BS but reaching force 7/8 BS during daytime and generally drop at night. This 7/8 BS force is mainly experienced about December to February.

RESTRICTIONS: There are 2 entrances, the North and the South entrance, the depth at the entrances is 38 ft. Least width 1,300 ft.

Vessels of any size enter or leave port during hours of darkness except tankers, and vessels carrying dangerous cargo. In these cases, where vessels are carrying explosives or other dangerous cargoes, Agents of calling vessels must notify the Port Office in advance of discharging and/or loading of explosives. Inflammable and other highly dangerous cargoes in commercial harbour are permitted from 0600 to 1800 hrs. local time.

MAX. SIZE: Largest vessels which can enter commercial harbour 200 m. LOA, 80 ft. beam, 34 ft. draft.

HEALTH: Quarantine and sanitation services available. Quarantine officer boards arriving vessels and necessary medical clearance given.

RADIO: Coastal radio station available *(a)* position Lat. 13° 01′ 24″ N. *(b)* Long. 42° 44′ 38″ E. Coastal radio station in service for 13 hours per day 0700 to 2200 hrs. Call sign ETC. Transmits traffic lists on 489 kc/s after a preliminary announcement on 500 kc/s, 30 minutes past each odd hour starting at 0500 and ending 1700 hrs. (0530, 0730, 0930, hrs. etc.).

(c) Transmit traffic lists on 6509 at 0500, 0900 and 1300 hrs. and searches 6265.5–6280.5 between 0515–0600, 0915–1000, and 1315–1400 hrs.

(d) Transmit traffic lists on 8618 at 0700, 1100 and 1500 hrs. and searches 8354–8374 between 0715–0800, 1115–1200 and 1515–1600 hrs.

(e) Rates shall include station charges and charge of transmission over telecommunication network within Ethiopia.

(f) Accepts ship letter telegrams (SLT) from ships for delivery in Assab.

(g) For radio telephone service. Station keeps watch and replaces on 2182 for radio telephone service at 0615–0700, 0815–0900, 1015–1100, 1215–1300, 1415–1500, 1615–1700 hrs. and transmits traffic same hours on 4379.3. Service hours will be extended to 24 hours.

VHF: VHF system will be installed in the port in the near future.

TUGS: Tug service compulsory for ships over 300 n.r.t. 2 tugs of 600 h.p. each, attend ships during arrival and departure.

BERTHING:

(a) North Half Jetty 1,620 ft. length, 36 ft. depth.
(b) South Half Jetty.
(i) 1115 ft. length and 33.8 ft. depth.
(ii) 459 ft. length and 29.5 ft. depth.
(iii) 164 ft. length and 19 ft. depth
(c) 2 coaster piers, each 260 ft. length 26 ft. depth. Temporarily out of use.

Fenders are excellent and protect ships from impact; harbour is modern and has modern breakwater 711 m. length. 7 big ships and 4 coasters can be accommodated at a time.

STEVEDORES: 14 stevedoring agencies, any kind of cargo can be discharged and loaded. Skilled labourers and loading/discharging capacity are respectively 30-15 per hour. Crane lift capacity 30 tons.

Normal working hours: 0700 to 1200 hrs., 1600 to 1800 hrs. Work can be performed 24 hours a day including holidays.

MEDICAL: 1 hospital in town and clinic in port. When sick person on board, hoist (by day) International code flag "W", (by night) 3 lights in vertical line upper one red, and middle and lower, white lights. Doctor may be called on board at any time to attend sick crew or passengers by arrangement with Agents.

TANKERS: Oil harbour about 1.5 miles S.E. of commercial harbour with draft 33 ft. Crude oil discharging terminal 500 m. from Southern end of breakwater open sea buoy berth – tankers of 800 ft. length, and 36 ft. draft can be accommodated. Diameter of pipe-line for loading and discharging black products – 12 in., white products 10 in.

Tankers at the Shell Berth are moored by dropping 2 anchors and tying up 2 ropes from each quarter to the buoys, and 1 rope from each quarter to the dolphins. All grades of oil in bulk discharged into shore storage tanks from this harbour, and fuel oil is discharged from the Commercial Harbour.

In Assab, the petroleum installations are of Shell Red Sea Co., and Mobil Oil East Africa Co.

SALT LOADING TERMINAL: Located 1.7 miles from the Commercial Harbour, salt loading ships drawing up to 33 ft. are berthed at this terminal using 2 anchors and mooring to buoys and dolphins.

DENSITY: At berths is 1.03 while the tides are negligible for all seasons; max. 1 ft.

FRESH WATER: Available. Supplied upon request by Agent and can be delivered at 60 t.p.h.

FUEL: All grades available, at commercial harbour. Advance notice necessary. Rate of 300 t.p.h.

FIRE PRECAUTIONS: Modern fire brigade.

GANGWAY/DECK WATCHMEN: Watchmen on deck necessary, and rate arranged as per agreement of employer and employee.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All ship's International Certificates should be on board.

CUSTOMS ALLOWANCES: Tobacco, 400 cigarettes. Wine and/or Spirits. 1 litre or bottle of spirit.

CARGO GEAR: Different types of certified cargo handling equipment available.

IDENTIFICATION CARDS: Needed.

CONSULS: Only Italian Consulate in Assab, others live in Asmara the capital city of Eritrea.

REPAIRS: Minor repairs can be carried out at Port Office workshop.

REPATRIATION: Possible.

AIRPORT: 15 km. from Assab. Ethiopian Airlines. 5 domestic flights per week.

TIME: GMT plus 3 hours.

HOLIDAYS: See "Massawa".

POLICE/AMBULANCE/FIRE: Port Police Tel. 60049; Hospital Tel. 60119; Port Office fire brigade Tel. 60102.

GENERAL: 1 modern hotel and 1 motel with full facilities available in town.

SHORE LEAVE: Crew allowed ashore, with boarding passes.

AUTHORITY: Ministry of Communication, Department of Marine.

MASSAWA: 15.37 N. 39.28 E.

PORT LIMITS: The coastline of Gurgussum Peninsula, at 15° 39′ N. to a point 15° 39′ N. 30° 30′ E. to 15° 35′ N. 39° 30′ E. to the coastline at 15° 35′ N. 39° 26′ 50″ E.

DOCUMENTS:

2 sets Manifests.
2 sets Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
2 Stores Lists.

APPROACHES: Through North channel and South channel. In channel, in direction of leading lights 243°, max. depth 31 ft. (but alongside 30 ft.) Marking buoy showing a wreck in position approximately 200 m. S.E. of North breakwater.

PILOTAGE: Pilotage is compulsory for all vessels over 100 n.r.t. Pilot section headed by a Chief Pilot and 2 other Pilots.

There are 2 pilot boats. ETA should be given to Agent who will inform Pilot 72 hours prior to arrival. Signal tower located in port area contacts vessel on arrival informing Agent and Pilot, and receiving or transmitting by Morse lamp messages to and from vessel.

ANCHORAGES: 8 cables East of main lighthouse. Anchorage North of leading light not recommended.

Tides. Normally the range of tide varies between 1.5 and 2.0 m., but during spring tide season the range varies up to 3 m.

MAX. SIZE: Length 520 ft., draft 30 ft.

HEALTH: Doctor normally boards with Pilot, but can be asked to board together with Customs and Immigration while vessel on roads. All crew members must be vaccinated against smallpox and yellow fever, and possess necessary certificates. Deratisation and other health certificates required. Deratisation cannot be effected at Massawa, but exemption certificate can be obtained.

RADIO: Assab Radio, call sign ETC, Djibouti Radio, or Aden Radio may be used. Asmara Radio, call sign ETC 2, working hours 0500 to 1700 GMT. Radio-telegraphy and radio-telephone services.

TUGS: Join vessel in port. Compulsory.

3 tugboats are available, two of 350 h.p. and the third 1,000 h.p. The smaller motor tugboats used for assistance mainly within the port limits, and the deep-sea salvage motor tugboat, for salvage operations, but whenever conditions demand, is also employed for assistance within the port.

BERTHING: Vessels normally drop anchor before berthing.

Commercial Harbour: 6 berths, namely 1 to 6, and the overall distance from Berth No. 1 to Berth No. 6 is 907 m. These berths normally used by vessels handling general cargo, bagged cargo and livestocks. Depth of water at mean low water springs (MLWS) is shown below:

Berth No. 1 – 16 ft. 6 in.
Berth No. 2 – 24 ft. 6 in.
Berth No. 3 – 28 ft. 6 in.
Berth No. 4 – 28 ft. 0 in.
Berth No. 5 – 27 ft. 0 in.
Berth No. 6 – 30 ft. 0 in.

Salt Berth: This is a single berth where vessels load salt in bulk. The depth at the berth is 32 ft. Max. draft 29 ft. Loading with the help of conveyor belt at the rate of about 300 t.p.h.

Cement Berth: Depth 18 ft.

American Jetty: Depth 18 ft.

However, dredging will be carried out to accommodate vessels of a greater draft in the near future.

STEVEDORES: Radio 24 hours' notice of ETA stating number of gangs required. Loading discharging rates 5 t.p.h. on general, 10/15 t.p.h. on bagged cargo.

DENSITY: 1025.

MEDICAL: Notice should be given to Agent only when specialist needed. Hospital treatment available. Dental facilities available at Asmara, 110 km. away.

TANKERS: AGIP, Arkiko oil station terminal: max. draft for entering channel 29 ft.

Total Pier, depth alongside 36 ft., max. draft 30 ft.

FRESH WATER: Supplied alongside, Max. rate 600 tons per day or by barge of 50 tons on roads. Barge can be loaded/discharged in 8 hours.

FUEL: Can be obtained alongside oil terminals and at Berths 5 and 6 for heavy fuel only. Diesel can be supplied by lorries alongside. No bunker barge available.

GANGWAY/DECK WATCHMEN: Compulsory when alongside.

OPENING/CLOSING HATCHES: Normally by labourers, but can be done by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. New allowance can be delivered after 1 week. Wine/Spirits: 1 bottle of wine/spirits (opened). Wine and beer quantity necessary for the stay in port allowed upon reasonable request on arrival.

IDENTIFICATION CARDS: Not needed. Immigration gives port entry card (without crew member's name) which must be given back prior to departure. In case of loss a fine is likely.

CONSULS: Italian Vice-consulate, Box 62. Tel. 52214. Other consulates at Asmara for Belgium, France, Gt. Britain, Italy, Sudan and U.S.A.

REPAIRS: Good workshops for minor engine repairs. Slipway for vessel up to 600 g.r.t.

REPATRIATION: Via Asmara. Daily flight Massawa-Asmara, then by international flights. Or Massawa-Asmara by road, 110 km., asphalt road.

AIRPORT: 7 km. from port with daily service to Asmara. International airport at Asmara 60 km. by air.

TIME: GMT plus 3 hours.

HOLIDAYS: January 7th (Christmas Day – Coptic); January 19th (Epiphany); March 2nd (Victory of the Battle of Adowa); March 13th (Prophet's Birthday); April 6th (Victory Day); April 23rd (Good Friday – Coptic); April 25th (Easter Sunday – Coptic); May 1st (Labour Day); September 11th (New Year's Day); September 12th (Abolition of Feudalism); September 27th (Finding of the True Cross); October 6–8th Id-al-Fatir; December 18th Id-al-Kebir and Sundays.

POLICE/AMBULANCE/FIRE: Police, tel. 52425; Ambulance, tel. 52234–5–6; Fire Brigade, tel. 52220.

TELEPHONES: Possible to place telephones on board. Arranged by Agent.

SERVICES: Radar and gyro compass technician available, but special spare parts not available.

SHORE LEAVE: Crew cannot leave vicinity of Massawa without special immigration permit.

AUTHORITY: Department of Marine.

Faroe Islands

KLAKKSVIK: 62.14 N. 06.35. W. (See Plan Book)

DOCUMENTS:
One of each:
Crew List.
Passenger List.
Custom Documents (one list crew's quantity of tobacco and spirits).
Health Document.
Manifest.
Bill of lading.

PILOTAGE: Not compulsory but available. Give ETA via Torshavn radio, OXJ, 1 or 2 hours before arrival, and Pilot will meet vessel in Roads. International signals can always be used. VHF Channels 16, 12, and 6 in use.

ANCHORAGE: In Roads in 12 to 20 fathoms; good anchorage.

RESTRICTIONS: No restrictions upon entry.

MAX. SIZE: Up to 450 ft. length, but draft must not exceed 20 ft.

HEALTH: Pratique usually automatic.

RADIO: Torshavn radio, OXJ, is only coast station in Faroe Isles.

TUGS: No tugs available.

BERTHING: Ships will be berthed on arrival, if ETA announced 12 hours before arrival.

STEVEDORES: Ships Agent will arrange stevedores.

MEDICAL: Inform doctors before arrival. Hospital facilities available.

TANKERS: Only small tankers, up to 2,000–3,000 tons can be handled.

FRESH WATER: Available from quay. 30 t.p.h.

FUEL: Diesel oil available, usually without notice (or short notice).

DEVELOPMENTS: Berthing place will be widened about 600 ft. on each side of bay and permissible draft will be increased.

GANGWAY/DECK WATCHMEN: Watchmen usually unnecessary, but available if desired.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes. Wine and/or Spirits, 1 bottle of wine and 1 of spirits.

IDENTIFICATION CARDS: Not needed.

CONSULS: British, tel. 5109 and 5489; Norwegian, tel. 55018 and 55353.

REPAIRS: All types of deck and engine repairs possible. Slipways for ships up to 200 ft. length.

REPATRIATION: Small changes in crew can usually be arranged and, for example, sick seamen/fishermen are often sent home, when recovered.

AIRPORT: Nearest airport on Vagoy, about 6 hours travelling. Regular flights, 6 a week.

TIME: GMT. Permanent.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 5348; Ambulance 5464; Fire 04.

TELEPHONES: Can be arranged on board at one berthing place, at about 50,00 kr plus dues for conversations.

SERVICES: Compass adjusting, day and night.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Normally there are none.

DEVELOPMENTS: 3 new quays under construction.

AUTHORITY: Harbour Master.

AGENT: Christen Joensen Stengavegur, P.O. Box 179, 3870 Klaksvik, Faroe Islands. Cables Christen Joensen. Tel. Klaksvik 55922.

SOERVAAG: 62.04 N. 07.18 W.

DOCUMENTS:
Bill of Lading.
Customs Documents (including Crew List).
Ship's Certificate (stating size of ship).

PILOTAGE: Ships can call Pilot via Torshavn Radio. Pilot has good knowledge of local conditions.

ANCHORAGES: Danish Chart No. 82 – on Soervaag fjord – can be recommended as good. Bottom gravel.

RESTRICTIONS: Difference between high and low water up to 2 m. on Spring tide and up to 1 m. on neap tide.

MAX. SIZE: Largest vessel reported in Soervaag was 12,000 d.w.t. tanker. Harbour about 150 m. long and formed with one long pier and another 1 stretching from it. Draft at pier 8 m. Pier runs N.E./S.W.

HEALTH: Ships coming from countries having epidemic-disease have to fly the flag "Q". No persons allowed connection with shore, before official doctor given free pratique. Doctor comes from Midvaag or Wesmannahavn and can be at Soervaag in half hour.

RADIO: Only civilian radio on Faroe Islands is Torshavn-Radio (Int. call sig.: OXJ) via this radio ships can call for medical assistance and weather forecast. These 2 services are free. All traffic to Faroe Islands via Torshavn-Radio.

TUGS: No actual tugs can be obtained, but many small vessels which can be used as tugs.

BERTHING: Captains should take care when berthing not to come on to East side of pier – owing to very low water.

STEVEDORES: Arranged through A/S Nl. Niclasen, Soervaag, or Harbour Master.

MEDICAL: Hospital in Torshavn with all facilities.

TANKERS: Ordinary pier also used by tankers (draft 8 m.) size of load/discharge-lines: 3 in. and 6 in.

FRESH WATER: Ships can obtain fresh water direct from pier.

FUEL: Marine diesel fuel; turbo-jet A1–100; gasoline-petroleum.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Captains have to make arrangements with stevedores, receivers or shippers.

CUSTOMS ALLOWANCE: Tobacco, each crew member is allowed to have 200 cigarettes or 250 gm. of tobacco. Wine and/or Spirit, crew members not allowed any wine or spirit. Captain allowed 2 bottles every second day.

IDENTIFICATION CARDS: Not required.

CONSULS: Belgium, Finland, Greece, Iceland, Norway, Spain, U.K., West Germany, Brazil, France, Holland, Italy, Portugal, Sweden.

REPAIRS: Small deck and engine repairs carried out.

DRY DOCKS: On Skaalefiord, dry dock up to 1,500 d.w.t.

REPATRIATION: Available.

AIRPORT: Faroe Island has 1 airport – only 3 km. from Soervaag. During Summertime daily services to Bergen, Norway and Copenhagen, and weekly services to Glasgow.
During Wintertime weekly services to above destinations.

TIME: GMT. Permanent.

HOLIDAYS: Same as Denmark.

POLICE/AMBULANCE/FIRE: Police 8; Ambulance 8; Fire 4 or 46.

TELEPHONE: Telephones can be placed on board.

SHORE LEAVE: Crew members are allowed ashore.

REGULATIONS: Per ordinary regulations in Danish Ports. Harbour dues to be paid before ship's departure.

DELAYS: Usually none.

AUTHORITY: Harbour Master.

TORSHAVN: 62.00 N. 06.45 W.

DOCUMENTS: See "Klakksvik".

PILOTAGE: Not compulsory. Can be obtained through Torshavn. Radio 2182 kHz. or Channel 16 VHF (Harbour Office).

ANCHORAGES: Due South of breakwater in depths about 30 fathoms.

MAX. SIZE: Max. draft 25 ft. This is only restriction.

HEALTH: Pratique usually automatic.

RADIO: Torshavn Radio, OXJ.

TUGS: No tugs available.

STEVEDORES: Must be arranged with the Agent.

FRESH WATER: 100 t.p.h., by pipe-line.

FUEL: All kinds of fuel at 100 t.p.h.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Tobacco (half carton); wine/spirit (1 bottle).

IDENTIFICATION CARDS: Not required.

REPAIRS: All kinds are possible.

DRY DOCKS: Slipway for vessels up to 1,000 tons.

REPATRIATION: Can be arranged.

AIRPORT: Regular airlines, 2 hours by car from Airport.

TIME: GMT Permanent.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 1448; Ambulance, 3540; Fire, 04.

TELEPHONES: No facilities.

SERVICES: Compass adjusting only.

SHORE LEAVE: Allowed.

AUTHORITY: Torshavnar Havn.

TRANGISVAAG: 61.33 N. 06.50 W.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Bill of Lading.
1 Bonded Store List.

PILOTAGE: When Pilot required pre-arrange with Agent by telegram or telephone, 2 hours notice ETA wanted. Pilot boat is local fishing-boat, usually boarding vessel at harbour entrance.

ANCHORAGE: Safe sheltered harbour up to 30 fathoms deep along the entrance transit bearing. Vessels anchor 1 cable offshore in 8 fathoms, clay bottom.

RESTRICTIONS: Vessels may enter harbour day and night.

MAX. SIZE: Vessels may berth with draft up to 7 m.

HEALTH: Pratique granted if no contagious illnesses aboard and all arrival formalities accomplished by the boarding officials.

RADIO: Torshavn Radio, call signal OXJ, 24 hours service, listens 2482 kHz, replies and transmits traffic on 1778 kHz, traffic lists on 1778 kHz 35 minutes past each even hour. VHF service: Channel 16 (156.80 mHz) Channel 26 (161.90 mHz). All ETA messages, etc. must be routed through Torshavn Radio.

TUGS: None; if required local fishing-boats are capable to act as tugs.

BERTHING: Tveraa at Northern side of fjord. Outer side of quay 280 m. length and 20/21 ft. alongside. Inner side length 170 m. and 15 ft. alongside. Quay is for general cargo, fish and salt.

Harbour basin length 58 m., depths 7 to 18 ft. alongside.

Drelnes on South side of fjord. Quay length 89 m. Depth alongside outer side 23 ft.; inner side length 43 m. depth 22 ft.

STEVEDORES: Enable Agent to arrange gang important obtain in good time accurate ETA from vessel. Work normally not carried out on Sundays.

MEDICAL: Advance notice to Agent preferable, good hospital facilities for both surgery and medicine.

DENSITY: 1024.

FRESH WATER: Water available at main quay, rate 50 t.p.h.

FUEL: Diesel gas oil available, 50 t.p.h., no advance notice required.

DEVELOPMENTS: New quay under construction in extension of existing quay.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes or 200 grams tobacco out of Bond. Limited quantity wine and spirits.

IDENTIFICATION CARDS: Not needed.

CONSULS: Spanish Vice-Consul.

REPAIRS: Local marine repair companies can undertake all repairs of general nature to deck, engines, hull, electric and radio equipment, etc. Slipway available for small vessels.

REPATRIATION: May be arranged by sea or air.

AIRPORT: (Vagar) Served by regular airlines, located 50 miles from Trangisvaag.

TIME: GMT, no alterations during the year.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Christmas Day; Second Christmas Day; work not carried out these days.

POLICE/AMBULANCE/FIRE: Police tel. 10 and 53; Ambulance 134; Fire 159.

TELEPHONES: Usually not placed aboard, but can be arranged.

SHORE LEAVE: Allowed.

AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Fiji Islands

LAUTOKA, (Vuda Point): 17.36 S. 177.26 E.

DOCUMENTS/HEALTH: Refer to "Suva".

PILOTAGE: Not compulsory at present. However, most vessels avail themselves of a Pilot, who boards at Navula Passage, 20 miles South of Lautoka. Masters should telegraph to their Agents ship's ETA at Navula and indicate whether they require a Pilot or not at least 24 hours in advance.

Note: Radio communications with Fiji can be difficult and Masters are advised that telephone or telex messages worked via New Zealand or Australia direct to their Agents are far more reliable.

The Pilot normally boards from a 26 ft. wooden launch, blue hull with white superstructure, buff cabin top with orange liferaft on forward cabin. The pilot vessel can be contacted on VHF 16/6. Listening watch only when vessels are expected. Pilot normally boards 1 mile seaward of the passage on the leads. In heavy weather it may be necessary for a vessel to enter the passage to embark the Pilot. There is no anchorage outside the passage.

Vessels requiring pratique should anchor approximately 1 mile to the Westward of Vio Island in Lautoka Harbour. If prior arrangements have been made through Agent, Health Officers may board inside Navula (The Health Officers inspect vessels only from 1 hour after sunrise to 1 hour prior to sunset). The Pilot for those vessels not employing one from Navula but requiring a Pilot for berthing will board at the quarantine anchorage off Vio Island.

ANCHORAGES: The whole of the area enclosed by a circle of diameter approximately 1 mile between Vio Island and Pinder Reefs is an acceptable anchorage with depths ranging from 9 to 13 fathoms.

MAX. SIZE: Minimum depth in approaches to wharf 32 ft., depth alongside 36 ft. Generally speaking, any vessel not exceeding 32 ft. draft can be accommodated. Main wharf is only 457 ft. long but overhangs are allowable, ("Oriana" LOA 804 ft., berths at Main Wharf), dolphins for mooring lines being situated off each end of the wharf. Range of tide approximately 5.5 ft. at springs and 3 ft. at neaps, but state of tide does not affect the foregoing.

At Vuda Point, the tanker berth of Lautoka, tankers in the 18,000 to 24,000 d.w.t. class can be handled. This is a submarine pipe-line installation, the ship mooring to 4 buoys, available depth being about 36 ft.

TUGS: No tugs available. Can be obtained from Suva if reasonable notice is given.

BERTHING: Berthing and unberthing at Vuda Point only in daylight. Berthing at Lautoka is at discretion of Harbour Master or Pilot, but in normal conditions is effected at any hour of day or night.

Berthing in Lautoka is generally effected port side to.

Wharf	*Length*	*Depth*
Queens West	457 ft.	36 ft.
Queens North	257 ft.	24 ft.
Queens East	400 ft.	12 ft.
SPSM	146 ft.	32 ft.
Kings	300 ft.	6 ft.

FUEL: Diesel fuel is available at the North and East berths on Queens Wharf.

FRESH WATER: Fresh water is available at all berths, there may be some restrictions in the dry season.

TANKERS: See "Max. Size". No slop discharge facilities. Discharge line 8 in. diameter.

DENSITY: 1025.

CONSULS: None.

REPAIRS: Only comparatively minor repairs can be effected such as welding jobs and repairs to pumps and other auxiliaries.

REPATRIATION: Repatriations can be effected through vessel's Agents.

AIRPORT: Nandi International Airport is 16 miles from Lautoka. Frequent flights to all parts of the world by several major airlines operating through Nandi.

TIME: GMT plus 12 hours. No alterations to clocks.

POLICE/AMBULANCE/FIRE: Dial 000 in emergency. Police, 60222; Ambulance, 60399; Fire, 60211.

SERVICES: Tank-cleaning labour and labour for painting, chipping, etc. can be provided, but no equipment. No facilities for discharge of slop tanks etc. Compass adjustments can be arranged.

AUTHORITY: Wharf Manager, Ports Authority of Fiji, Lautoka.

LEVUKA: 17.41 S. 178.51 E.

DOCUMENTS:

Goods carried in unregistered space (C.E. 148) (1 only).
List of articles in possession of Crew, Officers and Master (1 only).
Crew List (8 only).
Passenger List (8 only).
Parcel List (2 only).
Primary Health Report (1 only).
Special Malaria Forms (1 only).
Vaccination Certificates (1 for each person).
Derating Certificates (1 only).

PILOTAGE: Pilots are arranged through Agents.

MAX. SIZE: Length 560 ft. Max. draft 25 ft.

HEALTH: Radio pratique may be granted when any vessel has not visited any malarious port and Master declares that crew and passengers are healthy and vessel has not come from any area where internationally quarantinable diseases are endemic or in epidemic. Vessel may then enter port by day or night. On berthing, Master must immediately deliver to Quarantine Officer fully completed Primary Health Report and Derating or Derating Exemption Certificate. If there is any suspected case of disease or fever on board, vessel must be anchored at quarantine anchorage until cleared by port Medical Authority. Pratique is automatic if a vessel has been granted pratique at another port in Fiji.

TUGS: No tug service available.

BERTHING: Only 1 vessel berthing at a time.

Berthing in Levuka is generally effected starboard side to, outside Queens Wharf. Both dry cargo ships and tankers use the one berth available for overseas shipping at Levuka. Berth length 575 ft. Depth 18 to 34 ft. dependent on tide.

STEVEDORES: Estimated time of arrival of any vessel and tonnage of cargo to be discharged should be received at least 24 hours from time of arrival.

MEDICAL: Normal hospital facilities are available. Specialist services not available but can be arranged for within 24 hours. Smallpox, cholera and yellow fever valid Vaccination Certificates are required to be held by ship's crew and passengers except those coming from New Zealand, Australia, Gilbert and Ellice Islands, Tonga or Samoa.

TANKERS: Load and discharge lines 8 in. steel pipe. 1 berth only.

DENSITY: 1025.

FRESH WATER: Available only during normal working hours, which is from 0600 to 1600 from Monday to Thursday, and Friday up to 1500. Rate of delivery of water is about 15 t.p.h.

FUEL: Light marine diesel only – viscosity kin. at 100°F. = 3.4.

FIRE PRECAUTIONS: Bunkering only permitted during period between sunrise and sunset.

GANGWAY/DECK WATCHMEN: Services of watchman highly recommended to stop unauthorised persons from going on board.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: All crew and officers will be issued, with 25 cigarettes per day. A maximum of 4 days' allowance may be given at any one time. Cigars or tobacco may be taken in lieu of cigarettes. Masters and other officers may be allowed to keep in their possession small quantities of liquor.

Daily allowances: spirits, 1 reputed quart to Master; beer, 2 reputed quarts to other officers; spirits, 0.25 reputed quart to other officers; beer, 2 reputed quarts to Master.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Minor engine repairs are possible, but deck and major engine repairs could be carried out at Port of Suva, which is about 57 miles away.

REPATRIATION: Facilities exist for repatriation.

AIRPORT: Is situated on island of Viti Levu and the distance is about 200 miles. It is served by regular airlines (international). Connections twice daily from local airport, 12 miles from port.

TIME 12 hours ahead of GMT.

HOLIDAYS: Working of cargo is not permitted on Sundays, Good Friday and Christmas Day. Application to work on Sundays to be made to the Ports Authority of Fiji at Levuka.

POLICE/AMBULANCE/FIRE: Police, 44033; Ambulance, 44015; Fire, 44041.

TELEPHONES: Arrangements may be made with Postmaster for installing telephone on board.

GENERAL: Rat guards must be affixed to all shore moorings or cables greased when alongside to prevent the advent of rats.

SHORE LEAVE: All crew members are allowed shore leave unless there is a special restriction from any Government authorities.

DELAYS: No berthing at night (lines cleared by quarantine authorities). Bunkering from sunrise to sunset. No loading or discharge during rain.

AUTHORITY: Port Authority of Fiji.

SUVA: 18.08 S. 178.26 E. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived vessel" having passed the W. Reef Beacon at the entrance to Suva Harbour.

DOCUMENTS:

1 Last Port of Clearance Certificate.
2 Declaration of Nett and Unregistered Tonnage form.
8 Passenger Lists.
8 Crew Lists.
6 Stores Lists (for high duty goods).
Passenger liners are required to submit Transit Passenger Lists and also a letter of Guarantee from Master.
Vaccination Certificates for Passengers and Crew.
Deratisation Certificates.

PILOTAGE: Arranged through vessel's Agents. 24 hours notice of ETA with confirmation 12 hours before arrival. Suva Harbour Control should be contacted on Channel 16 and 20 VHF when within VHF range. Pilot vessel is a white clipper bow launch with word "Pilot" in black on each side and will leave wharf 30 minutes before signalled ETA of vessel. Pilots board on leads 5 miles from front lead. Vessels may stand in on leads to meet pilot vessel. Vessels are advised to provide 2 manropes for pilot ladder which will usually be required on the port side. No anchorage for vessels awaiting a Pilot.

ANCHORAGES: Safe anchorage may be found in depths of 10 to 20 fathoms within the harbour. Holding is good, mud bottom.

RESTRICTIONS: Vessels may enter at any time of day or night.
MAX. SIZE: No length or draft limitation for conventional vessels entering port. Largest vessel regularly entering is 42,000 tons.
HEALTH: Health authorities require that vessels cable details of ports visited within 50 days of ETA. Radio pratique will be granted to vessels which are healthy and have not visited a port in a malarial area within 50 days. Health authorities board and inspect any vessel which has visited a malarial port within 50 days and will spray any vessel which has visited a malarial port. Authorities board from a launch as vessel enters harbour. Quarantine officer will sight Maritime Declaration of Health and Deratisation Certificate on boarding. No further pratique formalities are required in Fiji ports other than first port of entry.
RADIO: Suva Radio, call sign 3 DP. 500 Khz., 24 hours listening watch.
TUGS: 2 tugs available, one of 680 h.p. and one of 340 h.p. on request.
BERTHING: Vessels berth port or starboard side to King's Wharf or port or starboard side to Walu Bay Wharf as may be necessary. King's Wharf is 1,600 ft. in length, having a least depth alongside of 42 ft. at MLWS at the North end and 35 ft. at the South end, whilst Walu Bay Wharf is 600 ft. in length, having a least depth alongside of 31 ft. MLWS.
Vegetable oil: Vessels loading vegetable oils berth at Walu Bay or North King's Wharf.
LPG carriers: Berth North King's Wharf or Walu Bay.
STEVEDORES: Arranged by ship's Agents.
MEDICAL: Advance notice of medical assistance is desirable. Hospital facilities available. Current international vaccination certificates required.
TANKERS: Discharge lines 8 ins. diameter. Tankers discharge at King's Wharf, North and South berths. Depths alongside 42 ft. No residue discharge facilities.
DENSITY: Salt water, density 1025 approx. No tide effect on density.
FRESH WATER: Available at all berths. Delivery rate 30 t.p.h. per hose.
FUEL: Furnace fuel oil, diesel fuel oil, gas oil available by prior arrangement through oil company.
GANGWAY/DECK WATCHMEN: Employment of deck/gangway watchmen is recommended and normally provided by ship's Agents.
OPENING/CLOSING HATCHES: Normally opened and closed by stevedore labour but crew may be employed at Master's discretion.
CERTIFICATES:
Load Line.
Certificate of Registry.
Safety Equipment Certificate.
Radio Certificate.
Deratisation Certificate.
Maritime Declaration of Health.
CUSTOMS ALLOWANCES: 1 oz. tobacco per man per day. No alcohol.
IDENTIFICATION CARDS: Not compulsory.
CONSULS: The following countries are represented: Belgium, United States of America, Netherlands, France, Norway, Denmark, Sweden, Federal Republic of Germany, Great Britain, New Zealand, Australia and India.
REPAIRS: Engine and deck repairs may be carried out at local machine shops.
REPATRIATION: Facilities exist for crew changes and repatriation.
AIRPORT: 15 miles to Nausori (Suva) Airport, serving Pacific Islands on weekly basis. Numerous daily flights to Nandi International Airport.
TIME: Local time is 12 hours ahead of GMT.
HOLIDAYS: New Year's Day; Christmas Day; Boxing Day (Dec. 26th); Fiji Day (Oct. 10th); Prince of Wales' Birthday (17th Nov.); Queen's Birthday (14th June); August Bank Holiday (4th August); Good Friday; Easter Monday. Prophet Mohammad's Birthday February 20th, (1978), Deepawali October 31st, (1978). Cargo is not worked on public holidays.
POLICE/AMBULANCE/FIRE: Police, 23811; Ambulance, 23071; Fire, 22688; Emergency, 000 for any of the above services.
TELEPHONES: Telephone connections to ships are provided.
SERVICES: Compass adjusting may be carried out.
SHORE LEAVE: Allowed.
DELAYS: Delays are not usual except for rain during hurricane season from November to April.
AUTHORITY: Ports Authority of Fiji.

OUT PORTS OF SUVA: Customs and Pilot are embarked at Suva or Lautoka.

Ellington: 17.20 S. 178.14 E. Private wharf for loading sugar and molasses from Raki Raki Mill.

Labasa; 16.26 S. 179.22 E. Open roadstead at mouth of Labasa River where vessels load from lighters, sugar from S.P.S.M. Sugar mill.

Naikorokoro: North Coast of Kadavu. Anchorage for loading sawn timber.

Savu Savu: 16.47 S. 179.21 E. Government wharf for local coast trade and anchorage for cruise vessels.

Vatia Point: 17.25 S. 177.46 E. Private wharf for discharging explosives and fuel to gold mines.

NOTES

Please also advise Shipping Guides Ltd.

Finland

EKENAS/TAMMISAARI: 59.58 N. 23.26 E.

DOCUMENTS:

International or Finnish Measurements Certificate.
1 Personal Effects List.
1 Ship's Provisions List.
2 Crew Lists (passengers to be included).
1 Customs Declaration (official forms supplied by the Customs Authorities).
4 Manifests.
2 Bills of Lading.

PILOTAGE: Pilots for Ekenas/Tammisaari applied for at Hango Pilot station by approaching Pilot station outside Hango/Hanko, where Pilot boat will meet vessel right outside Pilot station.

Telegram address: Hango Pilot.

MAX. SIZE: Max. draft 15.1 ft. (4.6 m.). No other restrictions. At Skogby, draft up to 24 ft. – No tide.

RADIO: Hanko Radio, Call sign OFI.

TUGS: Normally no tugs stationed at Ekenas but can be arranged from nearest port.

BERTHING: Two quays at Ekenas: "Trakajen", length about 160 ft.; "Stenkajen", length about 500 ft.

"Stenkajen" is equipped with one shore crane with a lifting capacity of 5,000 kg. The shore crane is equipped with grab for lifting bulk cargoes such as coal, coke, china-clay and ball-clay. 2 mobile cranes, capacities 27 and 36 tons.

Situated about 6 nautical miles from Ekenas is Skogby Sawmill Quay. Depth alongside 24 ft. Skogby Sawmill exports sawn goods, mainly to U.K., both packaged and loose.

STEVEDORES: ETA to be given to Agent 1400 hours Finnish time on the day before arrival in order to prepare loading/discharging.

MEDICAL: Hospital treatment can be arranged when needed.

DENSITY: 1001.

FRESH WATER: Fresh water is delivered to the ship's side by means of hose. No possibility of fresh water at Skogby.

FUEL: No bunkering available at Ekenas.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes permitted for each Crew member. 1 open bottle of 0.75 litre wine or spirit is allowed for each Crew member over 18 years of age.

IDENTIFICATION CARDS: Not needed.

REPAIRS: Minor electrical and deck repairs may be carried out.

AIRPORT: Nearest Airport is Helsinki Airport, situated about 100 kms. from Ekenas.

HOLIDAYS: On Saturdays and days preceding Church holidays, the eve of Independence Day, the day preceding May Day, on Whitsun Eve and on New Year's Eve the working day consists of four working hours, starting from 0700 or 0800 and lasting to 1100, 1200 hrs. resp. without break for meals. May Day, Independence Day, (6th December), Easter Saturday, Midsummer Eve and Christmas Eve are considered as labour free days.

POLICE/AMBULANCE/FIRE: Police, tel. 002; Ambulance, tel. 14100; Fire, tel. 005.

TELEPHONES: There are no arrangements for placing telephones on board the vessel but telephone calls can be made from the Harbour Constable's Office.

SUPPLIES: Ship stores and provisions can be ordered from Hango through Agent.

SHORE LEAVE: Shore leave allowed for crew members.

AUTHORITY: Harbour Master.

HAMINA: 60.34 N. 27.11 E. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when arrived at roads.

DOCUMENTS: Normally required:

1 Crew List.
1 Passenger List.
3 Manifests.
1 Bill of Lading of each consignment.

Customs documents:

1 Special List (personal effects).
1 Provision List (Ship's Articles).

Ship's papers required:

Safety Equipment Certificate.
Radio Safety Certificate.
Construction Certificate.
International Tonnage Certificate.
International Load Line Certificate.
Certificate of Registry.
Tonnage Dues and Ice Dues Certificates if vessel called earlier.

PILOTAGE: Sea Pilot boards at Orrengrund, 36 miles from Hamina. VHF radio telephone Channel 16; Pilot boat: hull red, superstructure yellow. Vessels coming from Eastward can take Pilot at Haapasaari (Aspo), but must order Pilot by radio via Coast Radio Station at least 6 hours before ETA Haapasaari.

Harbour Pilotage: Harbour Pilot takes over at Roads. Harbour Pilot boat: hull black, superstructure yellow, word "Pilot" painted with red letters. Harbour pilotage optional.

ANCHORAGE: 2 anchorages with good holding grounds at Roads.

RESTRICTIONS: Usually no restrictions. Draft 9.0 m. to oil harbour and 8.4 m. elsewhere. Port open throughout year.

MAX. SIZE: Draft is governing factor. No tide but prolonged Easterly winds can cause lower water level, which must be checked before entering berths.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, doctor to be contacted, preferably via Agent by radio before arrival.

RADIO: Vessels in Baltic Sea usually contact Helsinki radio/OHC, A1 and OHG, A3. VHF Channels 16 and 26. Vessels in Eastern part of Gulf of Finland contact Kotka radio/OHF, A1 and OFU, A3. VHF Channels 16, 25 and 27.

RADAR/VHF: There is no land radar service. Harbour is equipped with VHF radio telephone, Channels 16 and 12.

TUGS: Join vessels at Roads. Ship's lines usually used.

BERTHING:

Quay	*No.*	*Normal Landing Draft (m.)*	*Length (m.)*
Tervasaari	1–2	4.0	131
Hailikari		3.9	62
Coalquay		7.0	345
Kaukas	1–3	7.9	216
Kaukas-Hackman	1–5	5.2–5.5	365
Rauma-Repola	1–2	3.6	140
Enso-Gutzeit	1–2	7.9	240
Hiirenkari	1–2	7.9	158
	3–5	8.4	310
	Ro/Ro	7.0 & 8.4	
Roads		7.9	
Outer roads		9.0	
Oil harbour		9.0	

SPECIALISED CARGO HANDLING FACILITIES: Coal and bulk quay has a length of 345 m. and loading depth of 7 m.; 5 electric cranes, the lifting capacity from 5 to 6.5 tons.

Container crane 33 tons capacity. Sawn timber quays 3–6 m. draft.

Roll-on/roll-off berths 7 m. draft.

CRANES:

	No.	*Capacity/Tons*	*Type*
Coal quay	3	5	
	2	6.5	
	12	2–30	mobile
Hiirenkari quay	1	33	container

STEVEDORES: ETA is expected in good time before arrival.

MEDICAL: Advance notice helpful but not compulsory. Hospital facilities available at town.

TANKERS: Ocean-going tankers effect discharging through stern pipe-line. Mooring with both anchors, and stern to quay. Tankers up to 2,000 d.w.t. can discharge through side lines. Heavy oil and light products discharged into 10 in. line through hose of 8 in. No slop tank available. 1 tanker berth, draft 9 m.

DENSITY: 1003.

FRESH WATER: Available at majority of quays; elsewhere supplied by boat.

FUEL: Fuel and diesel oils available at short notice. Delivery by tank truck.

GANGWAY/DECK WATCHMEN: Shore watchmen available, Sundays and holidays 100% extra.

OPENING/CLOSING HATCHES: Crew close automatic hatch covers. Hatches to be covered manually are usually covered by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Master 200 cigarettes or 200 grams tobacco. Others, 100 cigarettes or 100 grams tobacco. Wine and/or Spirit: Master, 3 bottles wine or spirits. Others, one bottle.

CONSULS: Great Britain, Denmark, Holland, Norway, Sweden.

REPAIRS: Minor repairs effected.

REPATRIATION: There are facilities for repatriation.

AIRPORT: Helsinki Airport, distance 145 km. Regular flights.

TIME: Local time is GMT plus 2 hours. No alterations during year.

HOLIDAYS: New Year's Day (Jan. 1); Epiphany (Jan. 6); Good Friday; Easter Monday; Labour Day (May 1); Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (Dec. 6); Christmas (Dec. 25 and 26).

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 41304 and 43111; Fire 005.

TELEPHONES: None available for placing on board.

REGULATIONS: Regular terminal vessels have preference at certain berths.

AUTHORITY: Haminan Kaupungin Satamalaitos.

HANKO: 59.49 N. 22.58 E.

DOCUMENTS:

Ship's Register.
Crew List.
Manifests.
Bills of Lading.
Provisions List.
Health Certificate.

PILOTAGE: Compulsory, distance from sea to port is 6 miles. Pilot boat painted red, arriving outside Russaro called by radio via Hanko Radio or by flag, sound or Morse: "G".

ANCHORAGE: Inside Gustavsvarn.

RESTRICTIONS: Draft 26.5 ft., length/breadth no restriction; no tide.

RADIO: Cable Agents giving ETA via Hanko or Helsinki Radio.
RADAR: At Pilot station; service for ships entering port, contact by ship's radio.
TUGS: In Winter time harbour tug boat helps ships to and from the quay.
BERTHING: Advise Pilot. Depths at piers 19-29 ft. Quay height about 6 ft. above sea level. Shore fenders keep vessel about 2 ft. off quay. Special quays for roll-on/roll-off traffic.

Quay	*Permitted draft in feet*	*Length of quays metres*
Germany	22	150
Great Mole	25	704

	2	5	,,	1 with grabs
	1	40	,,	

Free harbour: One mobile crane, lifting capacity 40 tons. 21 fork lift trucks available.
STEVEDORES: Ordered by Agents.
FRESH WATER: Delivered from shore installations at daytime. Rate of delivery about 20 t.p.h.
FUEL: Delivered by rail cars only.
DENSITY: 1005.
WATCHMEN: Available but not compulsory.
HATCHES: Crew allowed to open and close hatches.
CUSTOMS ALLOWANCES: No restrictions in the Free Port, outside about 200 cigarettes and limited amount spirits per man.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Iceland, Netherlands, Norway, Spain, Sweden.
REPAIRS: Small repairs possible.
TIME: Local time GMT plus 2 hours.
TELEPHONE: Police 003; Fire 005; Ambulance 82228.
AUTHORITY: Harbour Master.

HELSINKI: 60.10 N. 24.57 E. (See Plan Book)

DOCUMENTS: See "Oulu".
PILOTAGE: Compulsory. ETA required 24 hours prior arrival. At present there are 2 different channels available for vessels approaching Helsinki.

1. Helsinki Lighthouse–Harmaja Lighthouse–Helsinki. Waterway leading from sea via Helsinki Lighthouse, situated in Gulf of Finland off the islets and shoals South of the port of Helsinki at a distance of about 12 miles may be considered as main approach. Channel navigable by vessels with a draft up to 9.6 m. (31 ft. 6 in.). Obtain Pilot from Pilot station at Harmaja. Vessels using main channel from Helsinki Lighthouse should keep Harmaja Lighthouse in line with church tower of Suomelinna, bearing about 7°. The Islet of Harmaja not navigable without a Pilot further in than 2 miles.
2. Porkkala-Helsinki. Fairway runs by Porkkala Lighthouse along the Eastern coast of Porkkala peninsula. Navigable by vessels with a max. draft of 9 m. (29 ft.). Pilots obtained from Porkkala-Ronnskar.

Harmaja Sea-Pilot station: Tel. 668 203. Harbour Pilots at Harbour Office: Tel. 634 308.
ANCHORAGE: Good anchorage available outside harbour, depth 26-32 ft. clay bottom.
MAX. SIZE: Draft 31 ft., length no limit.
HEALTH: See "Oulu".
DIRECTION FINDING: Harmaja Radio Beacon (frequency 298.8 kc/s Signal "HA") transmits:

Non-directional radio signals, with a modulation frequency of 395 c/s. By listening to these signals with a direction finding receiver, equipped with frame aerial, a ship can determine her bearing to the beacon.
DEPTH OF CHANNELS:
(1) From Porvoo via Kuggsund and Hevossalmi Canal 2.4 m.
(2) From Porvoo to outer roads via Kalvo and straits at Kustaanmiekka 7.3 m.
(3) From Pellinki to Helsinki 9.0 m.
(4) From Helsinki Lighthouse to Helsinki 9.6 m.
(5) From Barosund to Helsinki outer route 5.5 m.
(6) From sea South via Porkkala 9.0 m.
VHF: Harmaja Pilots and Porkkala Pilots call VHF Channel 16 or 13.
TUGS: Several available: charges based upon time when tug leaves station berth until moment of return to same station.
BERTHING: Port and equipment owned by Municipality of Helsinki. 5 principal parts of port are South and West Harbours, Sornainen Harbour, and Herttoniemi and Laajasalo Oil Harbours. North Harbour serves only passenger-launch traffic to surrounding islands.

Foreign passenger traffic is concentrated on the South Harbour. Piece-goods traffic is also handled on Katajanokka quay.

West Harbour handles main part of transoceanic traffic, heavy goods and bulk cargoes, also silos of 2 flour-milling plants (Vaasan Hoyrymylly Oy and State Granary), into which grain discharged by suction. On silo quay pneumatic grain unloader owned by State Granary travels along 71 m. long bridge alongside ship to be unloaded. Equipment is 30 m. above quay level and range of suction pipe 11 m. from edge of quay. Unloading equipment can handle 100 t.p.h. Mass export articles such as cellulose, paper and wood goods, loaded chiefly in this harbour. In West Harbour is free-zone warehouse, which offers same privileges as free port.

The Sornainen Harbour operates mainly as a North Sea piece-goods harbour. The area contains a coal harbour.

Herttoniemi and Laajasalo form the oil harbour, where the leading oil companies have oil storage tanks and own piers.

See Table below.
BULK HANDLING FACILITIES: Specially equipped berths for handling bulk cargoes in Sornainen Harbour. Berths equipped for containers or roll-on/roll-off traffic in West Harbour (40-ton container crane) and Sornainen Harbour.
STEVEDORES: 24 hours ETA required. 5 companies available of which 2 specialise in discharging timber and coal.

Working hours; Weekdays, 0700–1600 hrs. and 1600–2230 hrs. Saturdays, 0700–1500 hrs. Lunch break weekdays and Saturdays 1100–1130 hrs.
MEDICAL: Agents to be informed by radio if fever suspected.
TANKERS: Max. draft 31 ft.

Herttoniemi and Laajasalo form together the oil harbour of Helsinki, where the leading oil companies have oil tanks and their own piers.

Harbour	*Quay length (m)*	*Depth alongside (m)*	*Depth of channel (m)*
Herttoniemi Oil Harbour:			8.0
Oil pier	2×96	8.6	
Oljynpuristamo Co's pier	100		
Elo Co's pier	24		
Laajasalo Oil Harbour:			9.6
Shell Co's pier	32	10.0	
Esso Co's pier	30	10.6	
Neste Co's pier	58	10.2	

DENSITY: Fresh water.
FRESH WATER: Unlimited amount available by hoses from Hydrants at quays.
FUEL: All grades available; any amount of short notice.
GANGWAY/DECK WATCHMEN: Recommended but not necessary.
OPENING/CLOSING HATCHES: Crew/Stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle wine or spirits each man.
IDENTIFICATION CARDS: Not needed.
CONSULS: All maritime countries are represented in Helsinki.
REPAIRS: All types available.

REPATRIATION: Available.
AIRPORT: Distance to airport 25 km. Flights every day all over Europe.
TIME: GMT plus 2 hours. No alterations.
HOLIDAYS: New Year's Day (1st January); Epiphany; Good Friday; Easter Monday; Workers' Holidays (1st May); Ascension; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Eve; Christmas Day (25th December); Boxing Day (26th December).
POLICE/AMBULANCE/FIRE: Police 002; Ambulance 006; Fire 005. General alarm 000.
TELEPHONES: Facilities for linking up vessels to telephone network available on all of the most important quays. Apparatus handed over to vessel by port official on duty for purpose, who also gives its number. Charge for annual contract is 600 mks per vessel. For short-term use charge is 20 mks a day and 50 mks a month. Charge entitles to unlimited local calls. Trunk calls charged separately.
SERVICES: Compasses are adjusted by competent adjusters approved by the Board of Navigation. For compass adjustment the port has constructed piles or buoys with direction markings. These appliances can be used also for radio direction-finders.

Vessels using the compass-adjustment facilities must have on board a Harbour Pilot, who is entitled to the same compensation as for harbour pilotage.

CLASSIFICATION SURVEYORS: Lloyd's Register of Shipping, Bureau Veritas, American Bureau of Shipping, Germanischer Lloyd, Det Norskey Veritas.

ICEBREAKERS: *Teuvo*, length 39.9 m., breadth 12.9 m., fitted with 2 combined water/foam cannons for firefighting purposes, total capacity of 300 cu. m. per hour. VHF-telephone: call OIEV.

During ice seasons one of the following Government icebreakers assigned to assist ships from open water to harbour area and vice versa:

	Length (m.)	*Breadth (m.)*
Varma	86.5	21.2
Apu	86.5	21.2
Tarmo	84.0	20.5
Voima	83.5	18.7
Sampo	74.1	16.7
Murtaja	74.1	16.7
Karhu	74.1	16.7
Hanse	74.1	16.7
Sisu	104.7	23.8
Urho	104.7	23.8

Masters should communicate with icebreakers between January and March.

AUTHORITY: Port of Helsinki Authority.

INKOO: 60.01 N. 23.55 E.

PILOTAGE: Pilot boards off Ronnskar Lighthouse (Tel. Helsinki 294112, telephone and VHF). Distance to Coal Harbour 18 miles, Oil Harbour 17 miles.

MAX. DRAFT: *Approaches:* Fairway to Coal Harbour 29 ft. 6 in. Fairway to Oil Harbour 32 ft. 10 in.

TUGS: Available any time. 1 tug stationed at Inkoo.

BERTHING: Coal Quay length 175 m.; depth alongside 25 ft. 6 in.
Paper Quay length 140 m.; depth alongside 25 ft. 6 in.

CRANES: On the Coal Quay, one crane, 10 tons and one crane, 6 tons, by hook and half of the capacity by grab. Mobile cranes to hire of several capacities on Paper Quay.

DENSITY: 1004.

FRESH WATER: Available.

JAKOBSTAD (Alholmen): 63.42 N. 22.42 E.

(See Plan Book)

DOCUMENTS:

International Measurement Certificate.
3 Manifests.
2 Bills of Lading of each consignment.
Customs Documents:
1 Crew List.
1 Special List (personal effects).
1 Provision List (ship's articles).

Important: If the vessel is calling at two or more Finnish ports, 2 of each of these lists are to be produced at the first port of call.

PILOTAGE: VHF Channel 16, MF 2182 kHz. Anchorage for vessel awaiting a Pilot: outside the lighthouse "Kallan". Pilot boat equipped with radar.

ANCHORAGES: On inner roads called "Ado Roads", depth of water 28/30 ft.

MAX. SIZE: Max. draft in the inner harbour 24 ft. 3 in. No tide.

HEALTH: See "Oulu".

RADIO: Vasa Radio Station. Gamlakarleby/Kokkola VHF Channel 28.

TUGS: Tugs are normally stationed in the harbour. Ship's lines to be used.

BERTHING: Laukko Pier. Length 2×100 m., depth 24 ft. 3 in.
New Quay. Length 200 m., depth 24 ft. 3 in.
Old Quay. Length 300 m., depth 17 ft. (inside) 19 ft. (outside).
Kantlax, Oilport. Depth 7 m.
Busto Quay (roll-on/roll-off) length 160 m., depth 24 ft. 3 in.
Cranes: 8 mobile cranes available.

STEVEDORES: Working time: 1st shift Monday-Saturday 0700–1600 hrs. (meal hours 1100–1200); 2nd shift Monday-Friday 1600–2400 hrs. To commence loading at 0700 hrs. notice must be given latest at 1600 hrs. the day before, or before 1200 hrs. if commencing at 1600 hrs.

MEDICAL: Advance notice not required. All facilities available.

TANKERS: Vessel's draft must not exceed 24 ft. 3 in.

DENSITY: Fresh water.

FRESH WATER: From pipe-line alongside quay.

FUEL: Only gas oil available.

GANGWAY/DECK WATCHMEN: Watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Derat. Certificate to be kept on board.

CUSTOMS ALLOWANCES: Tobacco: 100 cigarettes per 3 days for each crew. Wine and/or Spirits: 1 bottle per 6 days for each man of 21 years age.

IDENTITY CARDS: Not needed.

CONSULS: Danish, Tel. 10144; Norwegian 10444; Swedish 10444.

REPAIRS: All types of repairs possible.

DRY DOCKS: Only a small slipway.

REPATRIATION: Crew changes can be effected.

AIRPORT: Kronoby Airport about 30 km. from Jakobstad. 2 flights daily.

TIME: The local time is 2 hours later than GMT.

HOLIDAYS: 1st and 6th January; Good Friday; Easter Eve; Easter Monday; Labour Day (1st May); Ascension Day; Midsummer Eve; Whit Monday; 6th December (Independence Day); 25/26th December All Saint's Day.

POLICE/AMBULANCE/FIRE: Police 10039; Ambulance and Fire 10055.

TELEPHONES: Connection for telephone on board available.

AUTHORITY: Harbour Master.

AGENT: Wilkman & Lenander Ab, POB 6, SF-68601 Jakobstad, Finland. Telex 7516 (answer back: 7516 wilkm sf). Tel. 10148, 10278. A.O.: 12171. Shipbrokers, Liner Agents, Forwarding Agents.

KASKO (KASKINEN): 62.23 N. 21.13 E.

DOCUMENTS:
2 Crew Lists.
2 Customs Lists.
2 Passenger Lists.
Manifest, Bill of Lading, etc.
Between 1st December/30th April Iceclass Certificate required (can be given in Kasko).

PILOTAGE: Pilot boards 4 miles outside Pilot station. Pilot boat or station can be called by radio telephone 2182 or VHF Channel 16. Notice is not required. Pilot can be called, daytime flag "G" or "PT", night-time by Morse "PT".

ANCHORAGE: Safe areas of anchorages, 3 miles W.S.W. of Pilot station Salgrund, depths 15–20 m.

MAX. SIZE: Max. draft 8 m.

HEALTH: Pratique automatic.

RADIO: Vasa Radio.

VHF: VHF Channel 16 (Salgrund Pilot).

TUGS: None.

BERTHING:

Deep Harbour Quay	Depth	27 ft.
Outer Harbour Quay	,,	22 ft.
Inner Harbour Quay	,,	23 ft.

Total length of quays 2,694 ft.

DENSITY: 1004.

STEVEDORES: Available; rates about 250-300 tons pulp per work gang.

MEDICAL: Hospital available.

FRESH WATER: Brought by truck Winter-time; Summer by pipeline.

FUEL: Available by tank truck.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle spirit.

CONSUL: Swedish Consul, Tel. 427.

REPAIRS: Only small repairs.

AIRPORT: Distance to Vasa Airport 100 km. Served by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 300; Fire 005.

TELEPHONE: Can be connected. No cost for connection.

GENERAL: Port is the most Northern in Finland which under reasonable conditions can be kept open throughout Winter.

AUTHORITY: Harbour Office.

KEMI: 65.44 N. 24.33 E. (See Plan Book)

PILOTAGE: Pilot boards from Lighthouse "Kemi I" or Lighthouse Nukkujanmatala. VHF and radio telephone watch maintained. Pilotage distance: Ajos 17 miles; Veitsiluoto 22 miles.

MAX. SIZE: Sea to Fairway at Ajos. Max. draft 10 m. Sea to Fairway at Veitsiluoto. Max. draft 7.3 m. Also see "Berthing".

TUGS: Icebreaker tugs of 3,500 h.p. and 900 h.p.

BERTHING:

Quays:	*Length (metres)*	*Depth (metres)*	*Permitted draft (metres)*
Oil Quay	90	10.5	10

- Ship's Register.
- Crew List.
- Manifests.
- Bills of Lading.
- Provisions List.
- Health Certificate.

PILOTAGE: Compulsory. There are 2 approaches: (1) Via Ajax, max. draft in fairway 33 ft. Pilot arrives from Pilot station at Hanko. Distance to port 11 miles.

(2) Via Hanko, max. draft in fairway is 28 ft. Pilot arrives from Pilot station at Hanko, Tullудden (Tel. Hanko 82246, radio-telephone, VHF). Station has radar. Distance to port 23 miles.

MAX. SIZE: Max. draft alongside quay 30 ft. Max. LOA 190 m. Max. Breadth 23 m. No tide.

RADIO: Cable Agents giving ETA via Hanko and Helsinki Radio.

TUGS:

Kurt 450 h.p.	*Wilpas* 400 h.p.
Ingrid 700 h.p.	*Waija* 1,850 h.p.

BERTHING: Length 250 m., depth 30 ft. Quay 6 ft. above sea level.

New berth, length 120 m., depth 30 ft. Quay 6 ft. above sea level.

CRANES: Two of 13 tons and one of 12.5 tons capacity.

STEVEDORES: Ordered by Agent.

FRESH WATER: Available rate 20 cbm./hr.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.

IDENTIFICATION CARDS: Not required.

REPAIRS: Small repairs possible.

TIME: GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 12660; Fire 43100.

AUTHORITY: Harbour Master.

KRISTINESTAD: 62.16 N. 21.23 E.

DOCUMENTS:
- Ship's Measurement Certificate.
- 2 Crew Lists.
- Cargo Manifest.
- Copy Bill of Lading.
- 2 Provision Lists and Tobacco Lists for Customs.
- Ice Certificate 1.12–3.4.

PILOTAGE: Pilot boards at Hojerstein light buoy. At least 2 hours ETA required. Pilot boat has red painted hull, white marking "L" on bow, and deck house yellow. Pilot station situated on Hoggklubb Island South of Kristinestad, International pilot call signals to be used, also radio telephone 2182 and VHF Channel 16.

ANCHORAGE: Good safe holding ground off Adgrund. Depth 10 m.

MAX. SIZE: For general cargo and timber, 20 ft. draft in old port. For tankers, 33 ft. in the oil port.

See also "Tankers".

RADIO: Messages through coastal stations. also Kristinestad VHF Channel 24.

TUGS: 1 tug available 240 h.p.

BERTHING: No special requirements. Pilot gives orders for berthing.

Inner Wooden Quay. Length 75 m., depth alongside 15 ft.

Outer Stone Quay. Length 250 m., depth alongside 20 ft.

There are 3 mobile cranes of 10 tons capacity.

SPECIALISED CARGO HANDLING FACILITIES: Bulk cargoes can be discharged at quay, 4 portable cranes available. There is one ramp for roll-on/roll-off ships in oil harbour at Bjorno.

STEVEDORES: Advise ETA and gangs required as stipulated in charter-party. Also when laytime will commence to count. Only timber cargoes loaded.

Normal working hours 0700-1600 hrs. Saturdays and days preceding holidays 0700-1300 hrs.

DENSITY: 1004.

MEDICAL: Hospital facilities available.

TANKERS: Oil harbour at Pohjolan Voima Oy, power station at Bjorno. Depth 33 ft.=10 m. alongside the oil pier. One berth for tankers. Discharge capacity with two 10 in. pipe-lines 2,500 t.p.h. Fresh water supply to tankers available from shore installation rate 30 t.p.h.

FRESH WATER: Fresh water supply by shore installation. Any amount available.

FUEL: Fuel available by tank cars of about 20 tons capacity at short notice.

GANGWAY/DECK WATCHMEN: Not compulsory at Timber Pier. Compulsory in oil harbour, according to rules of Board of Navigation.

OPENING/CLOSING HATCHES: Normally carried out by crew, but on request may be handled by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per 6 days, per man. Wine/Spirit allowance: One bottle per man.

CARGO GEAR: BOT Certificates. No additional requirements.

IDENTIFICATION CARDS: Not required.

CONSULS: Danish, tel. 11099.

REPAIRS: No shipyards, but welding pipe-line electric repairs possible.

AIRPORT: Nearest airports in Vaasa and Pori within 100 km., several flights per day.

TIME: Local time GMT plus 2 hours.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police Station of Kristinestad 12055 or 002; Ambulance 11626; Fire Brigade 005.

TELEPHONE: Public telephones on the pier.

GENERAL: Timber pier in Port of Kristinestad closed from the end of December to the middle of April owing to ice. Oil port will be kept open according to the general ice situation of Gulf of Bothnia.

SHORE LEAVE: Allowed.

AUTHORITY: Harbour Master.

MANTYLUOTO, Pori (including Reposaari and Tahkoluoto): 61.36 N. 21.29 E. **(See Plan Book)**

PORT LIMITS: The line between the lighthouses on Mantyluoto and Reposaari.

DOCUMENTS:
- Ship's Register.
- Crew List.
- Passenger List.
- Customs Documents.
- Manifests.
- Bills of Lading.

PILOTAGE: Pilot compulsory. Telegr. address: Luotsiasema, Mantyluoto (Pilotstation Mantyluoto), VHF Channel 16 or frequency 2182. 24-hr. service by pilot boats from Mantyluoto Pilot station, boats red-painted, international light or sound signals. Pilot to be taken 4 miles off Mantyluoto. In heavy fog, if required, Pilot station able to navigate vessels into harbour by radar, provided vessel has corresponding equipment.

ANCHORAGES: Reposaari Roads and outside the breakwater.

RESTRICTIONS: Depth in the channel 7.6 m.

MAX. SIZE: No other restrictions, but max. draft 25 ft. (7.6 m.).

Tahkoluoto Oil Harbour: Max. draft: 10.0 m.

Tahkoluoto Bulk Harbour: Max. draft: 10.0 m. Length of the quay 145 m. For self-discharging bulkships only.

Reposaari: Max. draft: 3.9 m.

RADIO: Inform Agents giving ETA via Helsinkiradio, Hankoradio, or Mariehamnradio, or VHF Channel 26, Pori.

TUGS: 5 tugs available from 200 h.p. up to 3,520 h.p. Tugs normally join the vessel near the quays. Tugs use ship's lines.

CARGO HANDLING FACILITIES: Three Ro/Ro berths, 30–ton crane able to handle containers.

STEVEDORES: The vessels receive workers in the order in which they enter the harbour. ETA advices appreciated in order to facilitate arranging gangs.

MEDICAL: No advance notice for medical attention required. Hospital facilities available.

DENSITY: 1004.5.

FRESH WATER: Supply by shore installation.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Load Line Certificate and during Winter season Ice Dues Certificate which issued by authorities for each season.

IDENTIFICATION CARDS. Not needed.

CONSULS: Vice-Consuls: Britain, tel. 939/43122; Denmark, tel. 939/43122; Netherlands, tel. 939/43222; Norway, tel. 939/43222; Sweden, tel. 939/11141.

REPAIRS: Most repairs possible.

AIRPORT: Distance from airport 22 kms. Served regularly by Finnair.
DEVELOPMENTS: Coal quay under construction at Tahkoluoto.
TIME: Local time 2 hours ahead of GMT. No seasonal alterations.
AUTHORITY: Porin Kaupungin Satamalaitos, Pori.

MARIEHAMN: 60.06 N. 19.56 E. (See Plan Book)

PORT LIMITS: The Southern boundary of the port is on a line between 60° 03.5′ N., 19° 56.1′ E. and 60° 04.2′ N., 19° 55′ E.
DOCUMENTS:
1 Crew List.
1 Passenger List.
3 Provision Lists.
2 Special Lists (in possession each crew member – cigarettes, tobacco, spirit, radios, etc.).
2 Bills of Lading.
Registered Tonnage Certificate.
PILOTAGE: Pilot arrives from station at Lotsberget in Westerhamn harbour, and meet entering vessels about 2 nautical miles southwest of Marhallan lighthouse. 3 hours notice of ETA is required. Pilot station and cutter are fitted with VHF-radio and keep watch on Channel 16, 24 hours a day. Working-Channel is 13. Pilot can also be ordered by cable via Mariehamn Radio.

Pilot can also be taken from Nyhamn pilot station 12 miles from the port. Nyhamn has VHF, Radio 2182 kc/s and Radar.
ANCHORAGES: Good anchorages North of Grano Island in 10 to 20 m. water.
MAX. SIZE: Ships of 130 m. length and 6 m. draft can enter the port.
RADIO: Mariehamn Radio, call/sign OHM on telegraphy and OFH for telephony. Connected to the public telegraph and telephone service.
VHF: Following stations keep watch on VHF Channel 16: Mariehamn Radio, Mariehamns Pilot, Mariehamns Hamn (Harbour Office), Sjobevakningen Mariehamn (The Coast Guard at Mariehamn).
TUGS: 1 tug of 320 h.p. available. The m/s *Gustaf Erikson* belonging to the Alands Lifeboat Society. Usually ships' lines are used.
BERTHING: Deep Water quay. Length 105 m., depth 20 ft. Total length of other quays 690 m. Average depth 18 ft.

Power Station Pier. Depth 16 ft. Oil Pier, depth 16 ft. 5 in., max. length of tanker, 80 m.
CRANES: 3 mobile cranes can be rented from Alands Kranservice. Maximum lift, one crane of 15 tons and two of 25 tons on the shortest radius.
SPECIALISED CARGO-HANDLING FACILITIES: 2 berths for roll-on roll-off traffic, used by car ferries.
STEVEDORES: Ordered by Agents. ETA in good time to obtain gangs.
DENSITY: 1005.
MEDICAL: All services available.
FRESH WATER: Most berths supplied by shore installations about 15 t.p.h., otherwise by truck.
FUEL: Only diesel oil, no heavy products.
GANGWAY/DECK WATCHMEN: Available but not necessary.
OPENING/CLOSING HATCHES: Normally done by crew.
CERTIFICATES: International Tonnage Certificate or National Tonnage Certificate.
CUSTOMS ALLOWANCES: 200 cigarettes and limited amount spirits for each crew member.
CREW IDENTIFICATION CARDS: Not needed for Scandinavian citizens. Passports for all others.
CONSULS: Denmark 11 454, Holland 12 070, Iceland 21 849, Norway 12 050, Sweden 11 624, U.S.S.R. 11 524, West Germany 11 410.
REPAIRS: Most repairs possible.
DRY DOCKS: Slipway for small vessels, max. about 3-400 d.w.t.
SURVEYORS: No permanent surveyors at Mariehamn.
REPATRIATION: Mariehamn is a good place for repatriation, with many connections to Sweden and to the Finnish mainland every day, with car-ferries and aeroplanes. About 1 million tourists are visiting Aland Island every year.
AIRPORT: About 5 km., daily traffic to Stockholm and Abo/Turku.
TIME: GMT plus 2 hours.
HOLIDAYS: See "Oulu".
POLICE/AMBULANCE/FIRE: Police 002 or 11 126; Ambulance 005, Fire 005 or 11 000.
TELEPHONES: Available at berths for passenger ships. Connection will cost 120 Fmk. year 1976.
AUTHORITY: Harbour Master, Port of Mariehamn.

NAANTALI: 60.28 N. 22.01 E. (See Plan Book)

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Dangerous Cargo List.
Ship's Register.
PILOTAGE: Pilot compulsory at Uto Pilot station. When approaching Uto communicate with VHF Channel 16. ETA, name of vessel, destination, draft. Change of Pilot takes place in Lohm. Harbour pilots available at the port. Distance Uto-Lohm, 25 miles. Lohm-Naantali, 28 miles.
ANCHORAGE: Good safe anchorage in harbour area. Max. draft for vessels 10 m.
MAX. SIZE: Maximum permissible length for tankers 210 m., Mainguay – maximum length for any vessel 150 m.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise ask Agent.
RADIO: Hanko Radio; Mariehamn Radio; VHF Turku 26; VHF Mariehamn 27; VHF Korppoo 23.
VHF: Communication on Channel 16, own working Channel 11.
RADAR: When Radar Service needed, ask Agent.
TUGS: Harbour icebreaker tug *Naantali* 1,200 h.p., equipped with bow steering propeller. Use ship's lines. Additional tugs on application from Turku.
BERTHING: No special requirements. Harbour/Drafts: No tide. Main quay, length 275 m., draft 10 m. Timber quay, length 80 m., draft 6.7 m. 3 car-ferry piers, length 80 m./80 m./95 m., drafts 9 m./6.4 m./6.6 m. Lubricating Oil pier, length 33 m., draft 6.5 m. Sugar quay, length 35 m., draft 4.5 m.
CRANES: 2 cranes owned by electric powerplant of 6 tons each and heavy-lift of 200 tons.
BULK CARGO FACILITIES: Grain handled by two pneumatic elevators and belt conveyor, Loading/Discharging 200 t.p.h., maximum reach for outlet/inlet 13 m. and 16 m., maximum height above quay level 8 m. and 9 m. when loading, discharging limits are 10 m. and 11 m., 135 m. of main quay intended to be for handling of grain, 120 m. for coal,, which is handled by 2 cranes of 6 tons each and belt conveyor, discharging rate about 300 t.p.h.
SPECIALISED CARGO-HANDLING FACILITIES; Roll-on/roll-off traffic possibility.
STEVEDORES: Available, ordered by Agent.
MEDICAL: Advise by radio prior arrival if medical attendance required aboard.
TANKERS: Oil Harbour, Neste Oy. Discharge lines ashore 10 in., 12 in., 18 in., Diameter of cargo hoses and respective draft of tanker berths:
Berth No. 1, 6 in., 5.7 m.
Berth No. 2, 10 in., 10.0 m.
Berth No. 3, 8 in., 10 in., 12 in., 11.5 m.
DENSITY: 1007.
FRESH WATER: Supplied by shore installations at most berths.
FUEL: All grades available.
FIRE PRECAUTIONS: Usual precautions.
GANGWAY/DECK WATCHMEN: Available. Tankers compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: 200 cigarettes/200 gr. tobacco and 1 bottle spirits/wine,
IDENTIFICATION CARDS: Not required.
CONSULS: In Turku 17 km. away.

REPAIRS: Small repairs can be carried out, ask Agent.
DRY DOCKS: None, See Turku. Naantali, Oy Navire Ab Navire yard, new buildings, main dimension of building dock 220 m. × 70 m., outfitting dock 180 m. × 125 m., sill depth 8.2 m.
SURVEYORS: Ask Agent.
CARGO GEAR: Heavy-lift crane of 200 tons, max. reach 9.1 m., max. lifting height 18 m. from quay level.
REPATRIATION: Good connections everywhere.
AIRPORTS: 20 km. distant. Regular service.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day, Epiphany, Good Friday, Easter Monday, Labour Day, Whit Monday, Midsummer, All Saints' Day, Independence Day, (6th December), Christmas.
TELEPHONES: A telephone connection available at Main quay.
SERVICES: Facilities for discharge of tank-washings, 10,000 cu. m. (Oil Harbour). Compass adjusting, ask Agent.
SHORE LEAVE: No restrictions for crew members.
IDENTIFICATION CARDS: Not required.
REGULATIONS: Oil pollution strictly prohibited, as well as all kind of dirt.
DELAYS: Usually no delays.
POLICE/AMBULANCE/FIRE: Police 751 133; Ambulance 751 123, Fire Brigade 005.
AUTHORITY: Harbour Manager, Naantalin Satamalaitos.

OULU: 65.01 N. 25.28 E. (See Plan Book)

PORT LIMITS: The seaward boundary of the port is drawn West of Oulu Roads. The arriving vessel passing the Hermanni Island is inside the boundaries and if necessary to anchor on the roads, is considered to be an "arrived vessel".

Port consists of four separate parts *(a)* Toppila – Main Harbour. *(b)* South Harbour – Nuottasaari Quay – Ore Harbour. *(c)* Oil Harbour (Vihreasaari). *(d)* Oritkari Quay, inc. roll-on/roll-off quay.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ships bond-store Lists.
Derating Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of tonnage.

PILOTAGE: Vessel requiring Pilot applies from Marjaniemi. Pilot station, Lat. 65° 02' 4" N., Long. 24° 34' E., near West point of Hailuoto Island. Pilots require 12 hours notice of ETA to Peltinmatala lightbuoy (Pilots) or to alternative position 3 miles North of Kemi lightbuoy. Pilot boat red coloured displaying usual international pilot signs. Pilot station equipped with HF (2182) and VHF, Channel 16, radar and RC. Morse signalling by light. No specific requirements on part of Pilots boarding, only safe pilot ladder according to rules. Anchorage near lightbuoy Peltinmatala, when awaiting for Pilot in fine weather; in bad weather advisable to ride against weather and wind. Pilot for Oulu can also be obtained near the "Kemi I" light-tower. Vessels with a draft more than 8.0 m. must use this fairway and apply for Pilot either from Marjaniemi or Kemi Pilot station, wireless 2182 or VHF 16.

ANCHORAGE: Safe anchorage on Oulu roads. There are no safe anchorages West of Hailuoto Island.

RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on HF (2182), or VHF Channel 16.

MAX. SIZE: *Marjaniemi Fairway:* 8.0 m. *Kemi Fairway:* 10.0 m.

Toppila Harbour: North Quay depth 6.1 m., Hietasaari Quay, depth 6.1 m.

South Harbour: Oritkari Deep Water Quay, depth 9 m. Nuottasaari Quay depth 6.4 m.

Oil Harbour: Depth 10 m.

Also see "Berthing".

HEALTH: No special rules existing in obtaining pratique. If disease or fever is suspected on board report to ship's Agent; will contact the Health Authority for necessary arrangements.

RADIO: Vaasa Radio (North Quarken). Close to Hailuoto Island call "Oulu Radio" VHF Channel 27 or Channel 24.

RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with HF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (16).

TUGS: Tug optional, but for vessels over 140 m. long use is advisable. Tug will meet on Oulu Roads according to agreement; customary to use ship's lines.

BERTHING: *Toppila Harbour:* Depth 5.0–6.1 m. North Quay length 1,000 m. South Quay length 2,200 m. Pulp factory Quay length 200 m.

South Harbour: Length 320 m.

Oritkari Quay: Length 270 m.

CRANES:

	No.	*Capacity (tons)*	*Reach of arm (m.)*	*Type*
South Harbour	1	5	12	Movable
Toppila	1	6	22	,,
	1	3	12	,,
	1	5	12	,,
	1	8	26	,,

CARGO HANDLING FACILITIES: *(a)* Toppila Harbour is equipped with 4 cranes to discharge bulk cargoes (coal, china-clay, potash, etc.) and with 2 pneumatic pipes to discharge grain.

(b) Roll-on/roll-off berth is adjacent to the Oritkari Quay in the South Harbour.

(c) Oritkari Quay is built to mechanically handle paper cargoes.

BRIDGES: No bridges. Electric cable across Toppila fairway, 50 m. above water.

STEVEDORES: 24 hours' notice of ETA to be given to Agent who arranges necessary gangs.

MEDICAL: Medical attention arranged through Agent, 2–4 hours notice required. Good hospital facilities available.

TANKERS: One principal tanker berth in Vihreasaari Oil Harbour, depth 10.0 m. Discharge lines of 12, 14 and 18 in. Pressure 10 Kp/Cm².

DENSITY: Fresh water.

FRESH WATER: Available at main berths and Oil Harbour from pipe-line, cost about 5.00 mk/ton. Elsewhere water is delivered by boat, cost about 8.00 mk/ton.

FUEL: Small quantities of all grades available, deliveried by lorries.

DEVELOPMENTS: The second stage of the Oritkari Deep Water Quay will be completed in 1980. The length of the new quay is 250 m. and allowed draft 10 m. The quay is specially designed for general cargo and there will be ro/ro and container facilities.

GANGWAY/DECK WATCHMEN: Watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as shipwork.

CERTIFICATES:
Nationality Certificate.
Measuring Certificate.
Load-line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Derating Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gr. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: One bottle wine or spirit allowed for each member of the crew.

CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board vessel.

IDENTIFICATION CARDS: Not needed.

CONSULS: Sweden, Norway, Denmark, Great Britain and Netherlands.

REPAIRS: Minor deck and engine repairs carried out. Docking only for small tug boats.

SERVICES: Compass adjusters and ship's cleaning.

DRY DOCKS: One small slipway. Max. vessels of 25 m. length and 8 ft. draft.

REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriation.

AIRPORT: Oulu Airport 15 km. from harbour served by regular airlines. Six daily flights to Helsinki and six flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.

TIME: Local time GMT plus 2 hours.

HOLIDAYS: General holidays in Finland: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (May 1st); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Fire 005, Reserve 006; Ambulance 006, Reserve 005; Police 002, Reserve 003.

TELEPHONES: A telephone connection available at Vihreasaari oil terminal.

AUTHORITY: Harbour Office of Oulu.

PARGAS: 60.18 N. 22.18 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
1-2 Custom Provision Lists.
1-2 Custom Special Lists.
2 Passenger Lists.
2 Copies each Bill of Loading.
Tonnage Certificate and in special instances other regular documents.

PILOTAGE: On arrival at Pargas, from Gulf of Finland, from Baltic via Uto, from Gulf of Bothnia via Enskar, information of ETA to be given in good time to respective Pilot stations. VHF Channel 16 for calling, 13 for further communication. Charge for piloting in accordance with official Finnish tariff. Harbour Pilot available, but not compulsory, and can be ordered through Sea Pilot.

ANCHORAGES: Well sheltered and safe anchorage, immediately outside harbour area.

MAX. SIZE: Maximum depth both in channel and along quay 6.70 m. As regards length of quay and possibilities for a quick dispatch, it is desirable (though not an absolute stipulation) that discharging vessel be a bulk carrier with the engines aft.

HEALTH: Free pratique automatic for all vessels, but temporary exceptions in and according to regulations issued by W.H.O. and Authorities may occur.

RADIO: Radio-telephone contact with Agent and consignee/shipper is obtained via Mariehamn, radio-call 2196 kHz, reply 1852 OHF; or via Hango, radio-call 1967 kHz, reply 2649 OFO. Contact with VHF is ordered via Abo, Channel 26.

TUGS: A small motor tug of 200 h.p. available.

BERTHING: Directions to berth via nearest Pilot station, Pargasport. Quay level above water 1-2 m., dependent on berth.

Length of quays, 800 m. 2 electric coal-discharging bucket cranes and one electric conveyor belt.

STEVEDORES: Arrangements will be made by Agent, who must be advised of ETA previous day to enable arrange men, trucks, etc.

MEDICAL: Medical officer available locally. Necessary examination and taking of tests usually done in Abo. Regular appointment with local physician can be arranged by telephone with Agent or doctor.

DENSITY: Brackish water 1002.

FRESH WATER: Delivery from installation on quay.

FUEL: No local supply. In case of need delivery by truck from Abo.

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Must always be performed by crew.

CERTIFICATES: Normally tonnage certificate only but in special instances other regular ship's documents may also be needed.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits. In accordance with the decision of Customs authorities.

IDENTIFICATION CARDS: Not required.

CONSULS: See "Turku".

REPAIRS: Facilities for arranging small repairs on deck and engine in Pargas, but usually carried out by reliable companies in Abo.

DRY DOCKS: No local docking facilities. See "Turku".

AIRPORT: Nearest airport in Abo. Distance about 25 km.

TIME: Local time/GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January), Epiphany (6th January), Good Friday, Easter Monday, Labour Day (1st May), Ascension Day, Whit Monday, Midsummer (2 days), All Saints' Day, Independence Day (6th December), Christmas (25th December). Work in harbour carried out during these days only under very pressing circumstances.

POLICE/AMBULANCE/FIRE: Police 744048; Ambulance 744064; Fire 005; Life-saving Corps 356595.

TELEPHONE: No facilities for placing telephone on board. Telephone available on quayside.

SHORE LEAVE: No restrictions for crew members.
DELAYS: Vessels dispatched in order of arrival. Usually no delays occur as work has generally been carried out within the time limit stipulated in C/P. Port activity aimed at good dispatch of vessels, and consequently work in 2 shifts has been arranged.
AUTHORITY: Port owned by Paraisten Kalkki Oy.

PATENIEMI: 65.06 N. 25.23 E. (See Plan Book)

OPERATORS: Oulu Osakeyhtio Sawmill. Port used for export of timber only, about 160,000 cu.m. per year. 12 km. North of Oulu.
DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ship's Bond Store Lists.
Derating Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of Tonnage.

PILOTAGE: Pilot station at Marjaniemi. Marjaniemi – Pateniemi 40 n. miles 23 ft. depth.
ANCHORAGES: Safe anchorage on Oulu roads. There are no safe anchorages West of the Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on HF (2182), or VHF Channel 16.
MAX. SIZE: Only dry-cargo vessels use this terminal. Max. draft 7 m. For length no restriction. Ship of 15,400 d.w.t. has entered.
HEALTH: No special rules existing in obtaining pratique. If fever or disease suspected on board to be reported to ship's Agent, he will contact Health Authority for necessary arrangements.
RADIO: "Vaasa Radio" (North Quarken). Approaching Oulu contact Agent through "Vaasa Radio". Close to Hailuoto Island call "Oulu Radio" VHF Station, Channel 27.
RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with HF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (16).
TUGS: Tug optional, but for vessels over 140 m. length the use is advisable. Tug will meet on Oulu Roads, according to agreement. Customary to use ship's lines.
BERTHING: Pier extends for 700 m. enabling 10 vessels of medium size to load simultaneously at quay. Depth at quays is from 20 to 23 ft.
STEVEDORES: 24 hours notice of ETA to be given to Agent, who arranges necessary gangs.
MEDICAL: Medical attention arranged through Agent. 2–4 hours notice required. Good hospital facilities available.
DENSITY: Fresh water.
FRESH WATER: Available at main berths delivered by boat and from pipe-line.
FUEL: Small quantities of all grades available, delivered by lorries.
FIRE PRECAUTIONS: Smoking prohibited in timberyards.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as ship work.
CERTIFICATES:

Nationality Certificate.
Measuring Certificate.
Load Line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Equipment.
Derating Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gr. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: 1 bottle wine or spirits is allowed for each member of the crew.
CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board.
IDENTIFICATION CARDS: Not needed.
CONSULS: British (Consul), Danish, French, Dutch, Norwegian and Swedish Vice-Consuls at Oulu.
SERVICES: Compass adjusters and ship's cleaning (no tank-washing).
REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriations.
AIRPORT: Oulu Airport 15 kms. from harbour served by regular airlines. 6 daily flights to Helsinki and 6 flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.
TIME: Local time GMT plus 2 hours.
HOLIDAYS: General Holidays in Finland: New Year's Day (January 1st); Epiphany (January 6th); Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day (May 23rd); Whit Monday; Midsummer Day (June 22nd); All Saints' Day (November 2nd); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire 005, Reserve 006; Ambulance 006, Reserve 005; Police tel. 002, Reserve 003.
REGULATIONS: Oil pollution strictly prohibited. Considerable timber lying in water and damages are ship's responsibility.
SHORE LEAVE: Crew members allowed ashore without restrictions.
AUTHORITY: Harbour Office of Oulu.

PORKKALA (Kantvik): 60.05 N. 24.23 E. (See Plan Book)

Documents and all general information, refer to "Helsinki".
PILOTAGE: A Pilot can be obtained from the Pilot Station of Porkkala, Tel. 90–2984 112 or VHF Channels 13 and 16. Distance to port about 14 miles. Pilotage in the harbour area may be carried out only by State-appointed Pilots. Pilotage in the harbour is not obligatory.
MAX. SIZE: Maximum draft 30 ft. 2 in. (9.2 m.).
APPROACHES: There are four official ship routes leading to the port of Porkkala (Kantvik) of Suomen Sokeri Osakeyhtio. The deepest one is 9.2 m. (30 ft.) and the shallowest one is 5.5 m. (18 ft.). The port does not have an ice-breaker of its own and the fairway is kept open by means of the State's ice-breakers.
CLEARANCE: The customs formalities of the port are attended to by the Custom House of Helsinki.
TUGS: A small motor tug of 200 h.p. available. Bigger tugboat, if needed can be ordered from Helsinki or from Inkoo.
BERTHING: The port of Porkkala (Kantvik) is owned by Suomen Sokeri and it is located at Kantvik. Directly in the vicinity of the port there is the factory of Suomen Sokeri Osakeyhtio (sugar mill). The port basin has 3 quays:

The outer quay is 110 m. long, draft 9.2 m. (30 ft. 2 in.).
The inner quay is 50 m. long, draft 5.3 m. (17 ft. 4 in.).
The fairway of the port basin is 120 m. wide, narrowing up at its end to 76.5 m. South quay (at the South bank of Kantvik Bay) is 60 m. long, draft 6.7 m. (21 ft. 11 in.).

DENSITY: 1004.
CRANES: Two cranes, capacity 8 tons. One crane is on the outer quay and one on the South quay. Also one 3-ton mobile crane.
FRESH WATER: Available at quays.
CONSULS: Nearest in Helsinki.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally by the crew.
AIRPORT: Nearest Helsinki, distance 45 kms.
TIME: Local time is GMT plus 2 hrs.
HOLIDAYS: On Saturdays, Sundays and General Holidays in Finland no cargo work is done.
POLICE/AMBULANCE/FIRE: Contact the Gatehouse of Factory.
TELEPHONES: Can be arranged on board. Telephone calls can be made from the Harbour Office during day-time.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not needed.
SHIPMASTER'S REPORT: The sugar discharging berth for Porkkala is at Kantvik, situated in Lat. 60° 05′ N., Long. 24° 23.25′ E., about 21 miles West of Helsinki.

The Pilot for the port is embarked at the position indicated on British Admiralty Chart No. 2331, 115° 3.5 miles from Porkkala lighthouse. From there to the berth is 12 miles and the passage presents no difficulties. It is well lit, and there is ample water. The least depth recorded was 31 ft. and that was alongside the berth. There is a powerful tug for assisting in berthing and unberthing.

The discharging berth, alongside which vessels lie port side to, is modern and well fendered. It is sheltered from most directions. Unfortunately, the berth is short for a 500 ft. vessel, and additional moorings have to be placed from amidships.

There is only 1 crane on the berth and to work either of the end hatches a shift would be necessary. Work was continuous while the vessel discharged her part cargo at Kantvik, and an out-turn rate of 100 t.p.h. was achieved.

Fresh water is readily available from the Jetty, and presumably, fuel could be obtained by lighter from Helsinki. Telephones in the dock offices are available for official use.

There is a bus service to and from Helsinki, the journey taking about 40 minutes.
AUTHORITY: Suomen Sokeri Oy, Harbour Master.

PORVOO (Skoldvik): 60.18 N. 25.33 E. (See Plan Book)

The harbour is a private oil harbour owned and managed by Neste Oy.

The harbour is located at Skoldvik in the municipal area of Porvoo about 45 km. (28 miles) East of Helsinki, Lat. 60° 18′ N., Long. 25° 33′ E. The area is shown on Finnish marine charts Nos. 17 and 902.

The distance from the Kallbadagrund lighthouse to the harbour is 20.5 nautical miles (38 km.). The minimum width of the harbour channel is 270 m. (885 ft.) and the approved depth is 15.3 m. (50 ft.).

The water level varies between +1.5 m. and −0.75 m. (+5 ft and −2.5 ft.) depending on the wind. There are no tides in the area.

The Winter period is from January to early May. During this time the channel from the open sea to the harbour is kept open by icebreakers owned by the State. The Finnish Board of Navigation determines the requirements for vessels allowed to enter various ports during this period.

Officially, the extra charges for the Winter period are collected from 1st December to 30th April.

DOCUMENTS: The following documents shall be handed over after berthing:

4 Crew Lists
2 Lists of Visitors
3 Passenger Lists
1 Provision List
1 Special List
Ship's Register, Certificate of Tonnage
the usual Cargo Documents

PILOTAGE: Pilotage is compulsory. The Pilots are Seapilots employed by the State. They also perform the pilotage inside the port area.

The Pilot station is at the outer end of Emsalo island. Vessels entering from the sea are boarded by the Pilot at Kallbadagrund, Lat. 59° 59.1′ N., Long. 25° 36.1′ E.

The Pilot shall be called by using the international code, VHF Channels are 13 and 16.

The Seapilots serve as Docking Masters berthing the vessel with or without the help of tugs.

RESTRICTIONS: Vessels can enter and leave the harbour 24 hours a day. However, vessels whose keel clearance is minimal are not allowed to berth in darkness or under unfavourable wind conditions.

In bad Winter, port may be closed by ice between January and April although normally kept open by ice-breakers.

MAX. SIZE: Up to about 150,000 d.w.t. Max. draft 45 ft. (13.5 m.).

HEALTH: Bill of Health not required. In case suspected disease or fever on board, radio Agent full details before arrival to advise Port Health Officer in advance.

RADIO: Notice of arrival shall be given 12 hours before the calculated time of arrival by the ship's Agent (Helsinki radio). Two hours before arrival at the boarding site for the Pilot, the same notice shall be sent, including

1) The name and the nationality of the vessel
2) Net registered tonnage
3) The time and date of the notice
4) The draft of the vessel
5) Time of arrival at the boarding site for the Pilot.

VHF: The harbour office is open 24 hours a day. It is provided with the VHF station "Neste". The following channels are available: 9, 13, 16 and 21. Telex connection is 17-46 neste sf.

TUGS: The harbour icebreaker "Into" and tug "Esta", owned by Neste are available to handle vessels. Respective capacities are:

"Into"	2,150 kW	(2,920 hp)
"Esta"	1,000 kW	(1,330 hp)

Vessels over 80,000 d.w.t. need additional tugs, which the ship's Agent shall order from Helsinki.

The ship's own lines shall be used for towing.

BERTHING: There are five berths available for discharging crude oil and loading of oil products. An additional berth is available for handling of petrochemical products.

Loading and discharging is possible around the clock. During the icefree period all berths are surrounded by oil booms.

Berth 1:	Face direction 023° 42′ Water depth 12.6 m. (41 ft.) Maximum vessel size about 50,000 d.w.t.
Berth 2:	Face direction 128° 42′ Water depth 17.6 m. (57 ft.) Maximum vessel length 325 m. (1,066 ft.) N.B. Vessel to be moored starboard side alongside Shore gangways Maximum reach of loading arms +21.5 m. (+70 ft.) from sea level
Berth 3:	Face direction 128° 42′ Water depth 17.6 m. (57 ft.) Maximum vessel length 280 m. (918 ft.) N.B. Vessel to be moored starboard side alongside Shore gangways Maximum reach of loading arms +19.5 m. (+64 ft.) from sea level
Berth 4:	Face direction 017° 56′ Water depth 15.9 m. (52 ft.) Maximum vessel size about 150,000 d.w.t.
Berth 5:	Face direction 002° 58′ Water depth 8 m. (26 ft.) Maximum vessel size about 8,000 d.w.t.
Berth 8:	Water depth 14 m. (46 ft.) Maximum vessel size about 40,000 d.w.t.

The water depths correspond to the normal water level.

All loading arm flanges are ANSI 150 lb. RF. For tugs and goods there are separate berths in the harbour.

DISCHARGING/LOADING: The usual methods are applied in discharging and loading. While discharging and loading the safety rules for Neste tank vessels and oil harbours shall be followed.

(A) Discharging capacities for crude oil (cu. m./h.)

Berth				
1	2	3	4	5
5,000	12,000	6,000	6,000	1,000

Crude oil can be discharged simultaneously at a maximum of three berths. However, at berths 2 and 3 only one ship at a time can be discharged because of a common pipe-line.

(B) Loading capacities (cu. m./h.)

Product	Berth				
	1	2	3	4	5
Heavy fuel oil	3,500	5,000	5,000	4,000	1,000
Gasoline	2,000			2,000	1,000
Diesel oil	2,000		2,500	2,000	1,000
Straight run naptha				1,500	
Jet fuel	500				
LNG	240				240

LNG is butane or propane. As there is one common pipe-line for LNG loading, only one ship at a time can be loaded.

Berth 8 is so far used for benzene loading only, capacity 550 cu. m./h.

During cargo handling sufficient crew shall be on board.

BALLAST: There are facilities for discharging ballast at oil berths. However, discharging can be effected simultaneously only from two berths.

The capacity of the ballast handling system of the refinery is 30,000 cu.m. and the maximum discharging rate at each berth is 1,000 cu.m./h. Ballasts over 5,000 cu.m. must be reported 48 hours prior to arrival.

The harbour office collects a charge to cover treatment costs for receiving ballast.

No ballast can be discharged at berth 8. However, flushing water for the tanks can be discharged provided that the pollutants can be handled in the Neste waste water treatment system. In that case the capacity is 100 cu. m./h.

MEDICAL: In emergency a doctor can be called on board. To call ambulance, dial 147700/2222. The nearest hospitals are in Porvoo and in Helsinki. Ship's Agent helps in other medical problems, such as providing medicines.

DENSITY: 1006.

FRESH WATER: Drinking water can be supplied from:

Berths 1, 4 and 5	25 cu. m./h.
Berths 2 and 3	50 cu. m./h.
Berth 8	20 cu. m./h.

FUEL: Bunkering facilities are installed at oil berths. Two grades are available, marine fuel oil and marine diesel oil.

The bunkering capacities:

Marine fuel oil	600 cu. m./h.
Marine diesel oil	up to 1,000 cu. m./h.

The diesel oil can be delivered through product lines. Bunkers must be ordered with 72 hours' notice addressed to Neste Marine Product Sales, telex Hki 12641.

GANGWAY/DECK WATCHMAN: Not required.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine or spirits for each man.

REPAIRS: Only minor repairs can be effected following the safety rules and with the permission of the harbour office.

REPATRIATION: Disembarking is possible. A foreigner needs a passport. Distance to Porvoo is 20 km. (12.5 miles) and to Helsinki 45 km. (28 miles).

AIRPORT: There are daily flights from Helsinki – Vantaa airport with good connections all over the world. Distance to the airport is about 50 km. (30 miles).

TIME: GMT plus 2 hours. No alteration during the year.

TELEPHONE NUMBERS: After berthing a telephone connected to the local automatic exchange will be placed on board all vessels, the respective dial numbers being:

Berth 1	23333
Berth 2	23334
Berth 3	23335
Berth 4	23336
Berth 5	23337
Important numbers:	
Harbour office	23339
	or 147700/2380 and 2381
Customs	23293
"Into"	23338
"Esta"	23350
Fire alarm/ ambulance	147700/2222

Bus connections, taxi:

Bus connection daily to Porvoo from 0700 to 2300 hrs.

Taxi 24 hours	tel. Nos.
Neste Oy taxi station	23245
Pekema Oy taxi station	23390
K-O Johansson	22252

GENERAL: *Inspections:*

To avoid oil accidents, an inspection based on the checking list is carried out before loading/discharging to find out the preparedness of the vessel to act in an emergency.

Vessels loading/discharging oil products are surrounded by oil booms.

Inspections are carried out and loading/discharging is supervised by the loading master, whose instructions must be followed. If he is not on board, he can be contacted by telephone, No. 23339 or 147700/2381.

REGULATIONS: In addition to the existing Finnish laws, statutes and other regulations the Port Regulations of Neste Oil Harbours must be followed.

Some excerpts:

Entering the Harbour: Vessels carrying explosives or flammable liquids or gases shall observe, what has been separately laid down concerning such cargo. The vessel shall show the prescribed caution sign in the harbour area.

Traffic in the Port Area: In the port area the speed of the vessel shall be according to the circumstances, so that no harm or danger shall be caused to anyone. Oil booms, underwater jobsites etc. shall be passed with special care. The maximum speed allowed in the port area is 6 (six) knots, unless otherwise stated by the harbour office.

Berthing of the Vessel: Without urgent need, anchorage is prohibited in the marked fairway, in the vicinity of the submarine pipe-lines or cables or in any place where the vessel may disturb the traffic.

The vessel shall be moored alongside the berth appointed by the harbour authorities and it shall not be removed without permission.

While berthing or unberthing or whilst moored at the berths the relevant safety precautions shall be taken to avoid any damage to the berths.

All ships' scuppers must be plugged or closed by mechanical means so that no water, steam or dirt comes into contact with the berth or its immediate vicinity.

A sufficient crew shall be maintained on board to ensure that the ship can be removed, if necessary.

Prevention of Shallowing and Contamination of the harbour:

In the port area it is prohibited to discharge oil or oil-emulsified water. In the Baltic Sea the existing restrictions must be observed.

The jettisoning of garbage and refuse is prohibited in the port area. The decoking of the chimneys and boilers of the ship while at the berth is prohibited.

AUTHORITY: Harbour Master.

RAAHE (LAPALUOTO): 64.41 N. 24.29 E.

(See Plan Book)

PORT LIMITS: Vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when passing breakwaters if not ordered to anchor near Raahe Lighthouse by Port Authority.

DOCUMENTS:
Crew Lists.
Passenger List.
Ship's Register.
Custom List.
Provisions List.

PILOTAGE: Masters to contact Pilot station and pilot boat, VHF Channel 16. Pilots board and disembark by pilot cutter (red) near Raahe Lighthouse (Lat. 64° 39′ N., Long. 24° 13′ 5″ E.). Day and night service.

ANCHORAGE: Vessels can anchor outside Raahe Lighthouse, depth 15-20 m. No anchorages inside breakwaters.

RESTRICTIONS: No restrictions night entry.

MAX. SIZE: Lapaluoto Harbour, draft inside 18 ft., outside 22 ft. Length up to 140 m.

Rautaruukki Oy Harbour; draft 24 ft. 8 in., length up to 360 m.

Ore Harbour, draft 22 ft.

RADIO: Helsinki Radio, 2182 kHz, call sign OHG, Mariehamn Radio, 2182 kHz, call sign OFH; Vaasa Radio 2182 kHz, call sign OFW.

RADAR/VHF: No port radar services. Pilot station. Radio, 2182 kHz, VHF Channel 16. Rautaruukki Oy Harbour Office, VHF, Channel 16 and tugboat "Rautalouto" VHF, Channel 16.

TUGS: Tug *Rautaluoto* 600 h.p.

STEVEDORES: Rautaruukki Oy, in Steelworks Harbour; other private firms.

SPECIALISED CARGO HANDLING FACILITIES: Lapaluoto Harbour, no shore cranes, Ore Harbour (Helmi), only conveyor. Rautaruukki Oy Harbour, import quay equipped with two 12.5-ton shore cranes and conveyor; export quay equipped with two 12.5-ton shore cranes, straddle carriers and equipment for handling steel and general goods. Max. lifting capacity 24 tons.

LIFEBOAT STATION: Lifeboat cutter "Niilo Saarinen", 360 h.p., 10 kts. Radio 2182 kHz, VHF Channel 16, Radar, fire and drainage pump 4,000 lit/min. Alarm through National Lifeboat Service, Pilot or Police Stations.

DENSITY: Average density 1002.

FRESH WATER: Available from Rautaruukki harbour.

FUEL: Small quantities available, one day's notice required.

FIRE PRECAUTIONS: No special precautions in Lapaluoto Harbour.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally by the crew.

CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.

IDENTIFICATION CARDS: Not required.

CONSULS:
Denmark 31146 – 37269
Norway 31146 – 37269
Sweden 37300 – 37007

REPAIRS: Raahe Oy, Mechanical Workshop. Slip for small ships.

DRY DOCKS: None.

AIRPORT: Oulunsalo Airport, about 60 kms. from Raahe.

TIME: Local time is GMT plus 2 hours.

HOLIDAYS: New Year's Day; Twelth Night; Good Friday; Easter Monday; Labour Day (1st May) holiday when no work takes place; Ascension Day; Whitsun Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police 38063; Ambulance; Fire and First Aid 005.

GENERAL: Government ice-breaker assistance available when needed.

AUTHORITY: Port of Rautaruukki Oy, Port of Raahe (Lapaluoto).

RAUMA: 61.08 N. 21.30 E.

PORT LIMITS: Southern entrance port limit when passing Tankar, northern entrance port limit when passing Riskonpoella.

DOCUMENTS: 2 Crew Lists and 1 Passenger List. Ship's Register, Customs Documents, Ship's Papers etc. (Ship's Agent will give the necessary advice).

PILOTAGE: Pilot station at Kylmapihlaja-island, Lat. 61° 08′ 7″ N. Long. 21° 18′ 4″ E. International Pilot signals, VHF Channels 16 and 13. Fairways Santakari 17 ft.; Valkeakari 24 ft.; deep passage 28 ft.

ANCHORAGE: Ample area for anchorage in Archipelago.

RESTRICTIONS: Entrance channel for 24 ft. maximum draft usable in all conditions, the 28 ft. channel to be used in daylight only. Harbour open all year round.

MAX. SIZE: Draft limit only.

HEALTH: Event any suspect contagious disease ask for orders by wireless. Port Regulations do not allow such a ship to come alongside or even closer than 350 yards. Pilot must not leave ship before allowed by the Doctor. Pilot does not board an infected ship but ship piloted to safe anchorage by pilot boat.

RADIO: Helsinki Radio, Hanko Radio, Mariehamn Radio.

VHF: Rauma VHF Channels 26 and 28, Channel 16 used for calling Pilot, tug etc. Channels 13 and 12 for further operations.

RADAR: When required pilot station radar used for advising Pilot onboard.'**TUGS:** 1 port owned tug 1,260 h.p. Usually one extra tug of 1,160 h.p. or 600 h.p. available but not guaranteed. An early notice recommended if more than 1 tug needed.

BERTHING: Hakuni outer quay 270 m., depth 22 ft. used for loading forest products. Central quay 410 m., depth 22-24 ft. used for forest products loading and discharging bulk cargoes. Laitsaari quay 300 m. 28 ft. paper loading.

Inner harbour 300 m. 13-16.75 ft. timber loading.
Chemical quay No. 1 16.75 ft. liquid produce load/discharge.
Chemical quay No. 2 23 ft. liquid produce load/discharge.
Oil quay one berth 24 ft. oil load/discharge.

CRANES: Central quay two 6 tons; one 5 tons; two 3 tons. Five mobile cranes 5-30 tons, available.

STEVEDORES: 24 hours notice to Agent recommended.

SPECIALISED CARGO HANDLING FACILITIES: 400 m. berth specially equipped for handling bulk cargoes, mainly china clay, sulphur, coal, etc.

No special equipment for containers, but smaller containers can be handled by harbour cranes.

Good berths for roll-on/roll-off traffic.

Different kinds of liquid chemicals can be handled in special berths.

MEDICAL: Advance notice recommended if possible. Hospital available (231 beds).

TANKERS: One berth, draft 24 ft. 15 in. cargoline 1,500 t.p.h. slop discharge facilities by tank-trucks.

DENSITY: 1004-1003.

FRESH WATER: Fresh water available on quay. Charges depending on amount taken.

FUEL: Fuel brought by tank-trucks.

GANGWAY/DECK WATCHMEN: Available if wanted. Watchmen supplied by private company.

OPENING/CLOSING HATCHES: Performed by ship's crew or by Stevedores at request of ship.

CUSTOMS ALLOWANCES: Tobacco: 6 day's ration (about 200 cigarettes or 200 gr. tobacco). Wine and/or Spirits: 1 opened bottle of wine or liquor, subject to Customs Regulations.

CARGO GEAR: Central quay shore gear available other quays mobile gear or ship's gear.

CONSULS: Denmark, Norway and Sweden.

REPAIRS: All types available.

DRY DOCKS: Rauma-Repola Oy: Dry dock 505 ft. 9 in. by 70 ft. 4 in. by 24 ft. 7 in. all sorts of repairs. Hollming Oy: Slipway for ships up to 600 d.w.t.

SURVEYORS: Ship's Agent will give advice.

REPATRIATION: Repatriation and signing on or off.

AIRPORT: Pori – airport 50 km. away. Regular connections.

TIME: Local time is 2 hours ahead of Greenwich (Long. 30° E.).

HOLIDAYS: See "Turku".

POLICE/AMBULANCE/FIRE: Police, 002 and 003; Ambulance, 006; Fire alarm, 005.

TELEPHONE: Oil quay only, connection Fmk 40.00.

SERVICES: Compass adjusting facilities and compass adjusters.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Normally no identification card needed but passport or seaman's book preferable.

DEVELOPMENTS: New 29.5 ft. entrance channel under construction, plans for new berths with equal depth made.

DELAYS: No delays in berthing, loading and discharging weather permitting.

AUTHORITY: Traffic Manager and Harbour Master.

SAIMAA CANAL AND PORTS IN LAKE AREA OF SAIMAA

(See Plan Book)

APPROACH CHANNELS: The canal can be reached from the international waters of the Gulf of Finland through an approach channel South of Someri. The channel passes the Island of Vihrevoi and continues, at the Island of Malyj Vysotski, as the Vysotski-Viipuri Channel, from which the approach channel departs at a distance of 10 km. from Malyj Vysotski. The length of the approach channel from the point of departure to the Brusnitchnoe Lock is 14 km. The distance from the international water area to the Island of Vihrevoi is 94.5 km. and the length of the section Vihrevoi-Malyj Vysotski 12 km. The total length of the channel from the territorial waters of the Soviet Union to the Brusnitchnoe Lock is thus 131 km.

From the territorial waters of Finland the canal may be reached through the so-called coastal channel starting from the Finnish border at the island of Santio and joining the above sea channel at the Island of Vihrevoi. The length of the channel from the border to Vihrevoi is 49 km. and the overall length of the Brusnitchnoe Lock is 85.5 km. The channel and its refuge harbours have been marked on the Soviet sea charts. Nos. 1131 and 1132 and on Finnish charts Nos. 11 and 12. The coastal channel may only be used by Finnish vessels while vessels of other nationalities must use the sea channel, except for foreign tugs.

Canal: The length of the canal on the Finnish side of the border is 23.3 km. and that of the part on the Soviet side 19.6 km. The overall length of the Saimaa Canal is thus 42.9 km. The average difference in the height between Lake Saimaa and the Gulf of Finland is 75.6 m. The canal has 8 locks, the heights of fall of which range between 5.54 m. and 12.69 m. Earth transports will use the 7 moving bascule bridges and the 6 stationary bridges across the canal.

SEASON AND HOURS: The natural open-water season of the Saimaa Canal lasts an average of 211 days. In mild Spring and Autumn seasons the open-water period lasts 225 days. Since most vessels using the canal have been strengthened for navigation in ice, a season of navigation of almost 8 months will probably be normal every year. The season begins at the turn of April-May and ends in mid-December. The locks of the canal are provided with ice-melting equipment and they will not form an obstacle for lengthening the season of navigation. On the other hand traffic will be obstructed by freezing of the water system of Saimaa and by pack ice formations in the bottom of the Gulf of Finland. As to the water system, the farther North one goes the earlier will the waters of Lake Saimaa freeze in Autumn and the later will the ice melt in Spring.

The opening and closing of the season of navigation on the canal are decided each year by the Finnish and Soviet Canal Delegates. The closing date of the canal will be announced in the daily papers of Helsinki and Lappeenranta not later than 7 days before the day of closing, but for the opening day 1 day's notice is given.

During the season of navigation the Saimaa Canal is kept open throughout the day. The administration centre of the canal will be on continuous duty.

PILOTAGE: Pilotage in the Soviet area on the sea channels between Vihrevoi-Brusnitchnoe and on the coastal channel between the border and Brusnitchnoe is carried out by the Soviet Pilot Service. All vessels must use a Pilot on these channel sections.

Pilotage on section Brusnitchnoe – mouth of the Saimaa Canal on Lake Saimaa (or Lock of Malkia) is carried out by canal Pilots submitted to the Canal Office. Pilotage is normally carried out in two parts, on section Brusnitchnoe – the Lock of Palli and on section the Lock of Palli – the mouth of the canal on Lake Saimaa. All vessels, excluding Finnish small vessels and floating objects less than 25 m. in length, shall use a Pilot when proceeding through the canal. The Canal Office may grant upon application a Master of a vessel the right to navigate his vessel on the canal without a Pilot provided that the Master of the vessel has passed an examination of the Canal Office. In navigation from the Gulf of Finland the Pilot must be ordered from the Viipuri Section of Inflot 12 hours before the arrival at the point where the Pilot is taken on board. The order must be checked 2 hours before the start of pilotage. To avoid excessive work by the Pilot Service and to eliminate delays special attention is to be given to the accuracy of the time the pilotage is to be started, particularly in the last notifications.

In navigation from Lake Saimaa the Pilot must be ordered from the Canal Office 12 hours before entrance into the canal. The order must be checked 2 hours before pilotage is to be started. In navigation from the Gulf of Finland a canal Pilot need not be ordered separately. Similarly, a Soviet Pilot for the approach channel need not be ordered separately when the vessel proceeds from Lake Saimaa. These orders will be placed by the Finnish and Soviet authorities concerned.

Pilotage in the water system of Saimaa is carried out by Pilots of the National Board of Navigation in Finland. The order for Pilots shall be made in good time to the Pilot station of Lauritsala.

MAX. SIZE: The canal can be used by vessels with dimensions not exceeding the following:

Length	82.0 m.
beam	11.8 m.
draft	4.35 m.
height of mast	24.5 m.

The draft of a vessel in tow, however, shall not exceed 4.5 m. For vessels larger than those mentioned above, a permit for navigation on the canal may be granted upon application by the Canal Office of the Saimaa Canal.

The permit may contain regulations concerning the structure or equipment of the vessel or special provisions pertaining to navigation of the vessel on the canal such as good manoeuvrability, liability to wait or speed restrictions.

The Canal Office of the Saimaa Canal may also grant a vessel or equipment with slightly larger dimensions, carrying exceptional cargo, a Trip Let Pass for one passage through the canal.

The Rules and Regulations for Traffic on the Saimaa Canal also contain more detailed directions – among others on the permissible dimensions of vessels in tow and timber rafts using the open canal sections.

NEW VESSELS: When designing new vessels, to be used also in traffic through the Saimaa Canal, the designers are advised to consult the main dimensions and the structure of the vessels with the canal authorities. The conditions of navigation in the canal depend, first of all, on manoeuvrability, though certain other factors are also important.

MAXIMUM PERMISSIBLE SPEED AND TIME OF PASSAGE: The highest permissible speed on the actual channel of the Saimaa Canal is 9 km./hr. for vessels with a draft greater than 3.9 m. For vessels navigating in lesser drafts the speed is graduated within the limits of 9–15 km./hr. depending on the draft. In the lake parts of the Canal the highest permissible speed varies between 15–18 km./hr. depending on the size of the vessel. Detailed regulations available from the Canal Office. The time of passage through the part of the Canal provided with locks (mouth of the Canal on Lake Saimaa–Lock of Brusnitchnoe) is 6–8 hours depending on waiting time at locks caused by heavy traffic volumes, and on size of vessels.

SIGNS AND SIGNAL LIGHTS: The sign system of the approach channel of the Saimaa Canal, the canal and the channels on Lake Saimaa is adequate to ensure safe navigation throughout the day, also at night and in poor visibility.

The approach channel is provided with beacons, light buoys and signs in accordance with the lateral system. The signs have been erected by Soviet authorities. The illumination and the signalisation systems of the Saimaa Canal are based on the same principles with beacons and signs, but in the signal system of the canal, sign lanterns, signboards, line markers, water traffic signs and radar reflectors have been used. The colour of sign lanterns is orange on the West bank and green on the East bank of the canal. In marking of the lake channels of Saimaa according to the cardinal system, leading and warning lights, light buoys, range beacons, landmarks and signs have been used. Information of the marking of the water system of Saimaa has been issued as a booklet by the National Board of Navigation in Finland: "Sisavesistojen loistot I 1971" – "Beacons of Inland Water Areas I 1971".

RADIO: There are two radiotelephone networks for marine use in the sphere of influence of the Saimaa Canal. On the frequency of 160 mHz reserved for actual marine radio communications there are also the Pilot radiotelephone and the public radiotelephone networks.

The Pilot radiotelephone network covers all stationary radiotelephone equipment at all locks, on the Kansola Bascule Bridge, at Pilot stations and in the traffic office in the administrative building at Mustola as well as portable radiotelephone apparatus used by canal Pilots. The radiotelephone equipment of the canal Pilots operate on Channel 11 of the international marine radio. The telephone of the Brusnitchnoe Lock and the radio telephone in the Administrative Centre of the canal are also provided with a general calling and safety Channel 16.

When approaching from the sea the vessel makes a radio contact with the Brusnitchnoe Lock by using Channel 11. After this all radio communications required by navigation on the canal also use Channel 11. On Lake Saimaa, radio communications move over to Channel 13 on which the traffic office of the Saimaa Canal and the Pilot station of Lauritsala are also able to operate.

The general radiotelephone network on Lake Saimaa (the so-called Saimaa Radio) uses Channels 23–28 of the international marine radio. The network covers the entire region of the water system of Saimaa extending from Lappeenranta to Iisalmi and Lake Pielinen. Channel 24 is the calling channel of the Saimaa Radio.

Two marine radio stations for general traffic have been built at Nuijamaa and Virolahti especially for navigation on the Saimaa Canal. Both radio stations are on duty and they are remote-controlled from the Coast Station of Kotka. The stations have the calling and safety Channel 16 and a calling Channel 24 for public traffic. The Nuijamaa Station operates on Channel 28 and the Virolahti Station on Channel 23. The range of the Nuijamaa Station extends from South of Viipuri to Southern Saimaa and the range of the Virolahti Station covers the entire Bay of Viipuri. The stations can be called either on Channel 16 or on the operating Channel. The Kotka Radio calls vessels either on Channel 16 or 24.

The principal purpose of both the Saimaa and the Kotka Radios is to ensure the communications of the safety service of navigation. These stations may also be used to transmit calls to the public telephone network – also to foreign countries – or vice versa, to receive calls from the public telephone network.

AUTHORITIES: Board of Management of the Saimaa Canal, Lappeenranta.

Viipuri section of Inflot. Vyborg, USSR.

National Board of Public Roads and Waterways in Finland. Waterways Department, Helsinki.

THE HARBOURS OF THE LAKE AREA OF SAIMAA:

Mustola Harbour: Situated between Mustola and Soskua locks in the Saimaa Canal:

4 quays, 80 m. each. Draft alongside 4.35 m. Roll-on/Roll-off facilities are provided. 1 Coles mobile diesel electric crane: arm 9.14 m., reach of arm 3.66 m., lifting capacity 35 tons. Arm 18.3 m., reach of arm 18.3 m., lifting capacity 4 tons. Grab of capacity 2,500 litres or 1,250 litres can be installed. Possibility to hire further mobile cranes.

Lappeenranta Passenger Harbour: Situated in Saimaa Lake at Lappeenranta town:

New concrete quay with passenger terminal. Draft alongside 4.35 m. Room for 2 ships with a draft of 4.35 m. and for 3 ships with a draft of 3.0 m. Pilotage distance from canal entrance 6 nautical miles.

Kaukas Oy Pulpmill Factory Discharging Place:

Draft alongside 4.35 m. (unofficial). Mobile crane for discharging wood into water. Pilotage distance from canal entrance 1.5 nautical miles.

Enso-Gutzeit Oy Paper Mill Quay: At Imatra Kaukopaa:

Length of quay 70 m., draft alongside 4.35 m. Pilotage distance from Canal entrance 25 nautical miles.

Joensuu Town Harbour (Ukonniemi):

Length of quay 140 m., draft alongside 4.35 m. Pilotage distance from canal entrance 38 nautical miles + 45 nautical miles + 60 nautical miles + 44 nautical miles.

Savonlinna Town Harbour (Haislahti):

Length of quay 80 m., draft 4.35 m. No cranes. Pilotage distance from canal entrance 38 nautical miles + 45 nautical miles.

Ristiina Harbour:

Quay can accommodate 1 ship. Permissible draft 4.2 m.

Oy Wilh. Schauman Ab Paaskylahti Harbour at Savonlinna is planned. Quay will be built to accommodate 1 vessel.

Kuopio Oil Harbour:

Harbour located at Kelloniemi in Kuopio Town close to Oy Esso Ab storage in rock. Harbour is owned and built by Oy Esso Ab.

One of the two planned berths for ships is completed. The harbour is provided with oil discharge equipment. Permissible draft 4.2 m.

Kuopio Town Harbour (Kumpusaari):

Berth for 1 dry cargo vessel and 1 tanker. Permissible draft 4.2 m.

Varkaus (Ahoniemi Oil Harbour):

Harbour is located on the East bank of the Southern entrance fairway about 6 km. from the centre of the town. There is room for 1 ship; permissible draft 4.2 m.

Varkaus:

Harbour located at the South end of Taipale canal at Westbank. The Harbour is not built for a harbour but as waiting berth for ships passing Taipale canal. 1 ship can be berthed and permissible draft is 4.2 m. There are no warehouse and loading equipment, but A. Ahlstrom Osakeyhtio is using the berth for shipping paper to England. Loading is effected by the factory's labour and machines. Goods are transported to the port by lorries.

Rapasaari Harbour:

Situated in Saimaa Lake at Lapeenranta town. One quay, length 80 m. Permissible draft 4.35 m. Railway to the quay. Possibility to hire mobile cranes. Pilotage distance from the Canal entrance 6 nautical miles.

Vuoksi Harbour:

Situated in Saimaa Lake at Imatra town. One quay, length 80 m. Permissible draft 4.35 m. Possibility to hire mobile cranes. Pilotage distance from the Canal entrance 24 nautical miles.

TOLKKINEN (Tolkis): 60.20 N. 25.35 E.

PILOTAGE: Pilot arrives from port station at Emsalo (tel. 911-27710). Station equipped with VHF, radiotelephone and radar. Pilotage distance to port 22 miles.

APPROACHES: Max. draft of fairway from sea, 23 ft. 8 in.

TUGS: One tug available, 350 h.p.

BERTHING: Tolkis Cellulose Quay, depth 23 ft. Tolkis New Quay, depth 17 ft. Oil Harbour (see "Skoldvik").

CRANES: Tolkis New Quay equipped with 2 movable cranes. Lifting capacity 2.5 tons. with grabs.

DENSITY: 1004.

FRESH WATER: Available by lorry. Minimum quantity 5 tons.

TORNIO: 65.51 N. 24.09 E. (See Plan Book)

The outharbour of Tornio is Roytta situated about 6 miles S.W. of Tornio.

DOCUMENTS:

2 Crew Lists.
2 Provisions Lists.
Passenger List.
One set of Bills of Lading, Ship's Papers, Health Documents.

PILOTAGE: AJOS pilot station VHF Channel 16. Pilot to be taken on board by lighthouse "Kemi 2" in position 65° 30.3′ N., 24° 22.5′ E., 10 miles from Ajos.

ANCHORAGE: In Roads, depth is 24 ft.

MAX. SIZE: At same time there can be 2 vessels of 100-120 m. length, draft 21 ft. 06 in.; 2 vessels of 50-60 m. length alongside Main Quay; and 2 vessels of 50-60 m. length, draft 14 ft. at Old Quay.

RADIO: Vaasa Radio/OHX or Harnosand Radio, Sweden/SAH.

TUGS: No tug available at Tornio. to be ordered from Kemi 12 hours before.

CRANES: Three 20 ton mobile cranes for general cargo and several cranes for discharging bulk cargo.

STEVEDORES: Ordered by Agent (Telex 35–12). Agent must be given 24 hours ETA. Normal working time 0700–1100, 1200–1600 hrs. Warning for overtime must be given before 1100 hrs., the final confirmation before 1400 hrs.

DENSITY: 1000.

FRESH WATER: Fresh water can be delivered by tank lorry (8 tons).

FUEL: Ordinary fuel by lorries from Kemi.

OPENING/CLOSING HATCHES: By the ship's crew.

CUSTOMS ALLOWANCE: 100 cigarettes or 100 grams tobacco and 1 bottle spirits.

CONSULS: France tel. 40473; Sweden tel. 41751; Norway 14411.

REPAIRS: No docks but accommodation for small repairs.

AIRPORT: At Kemi, 20 km. from Tornio; served by Finnair.

TIME: GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: Police 003; Fire 005; Ambulance 006 and 40428; Salvage 47472.

AUTHORITY: Tornion Satamakonttori.

TURKU (Abo): 60.27 N. 22.15 E.

DOCUMENTS: See "Oulu".

PILOTAGE: Telegram to Agent with 24 hours ETA to Sea Pilot station (State Pilots) Uto, contact Pilot station via Hango Radio or at shorter distance by VHF. Coastal Radar service available. When approaching port ETA by VHF to Port Information Centre, international Channel No. 12 for Harbour Pilot. Cutter whilst in action, same channel, but takes orders from Information Centre only.

Pilot cutters painted red with white circular field marked "L" on the bows. Flying flag in daylight, showing red and white lights vertically at night. Coming out when required to Pilot station 0.75 mile from Main Harbour. Call signals: International flag "G", at night 3 long blasts. No special boarding measures. All ships arriving from sea will get necessary information from Sea Pilot, whose service is compulsory. Harbour Pilot not compulsory.

ANCHORAGE: Outer anchorage at Bay of Airisto, 2 miles from Port, 15-18 m. In practice all ships taken into port without anchoring or waiting.

MAX. SIZE: Maximum draft in Commercial Harbour 30 ft. fresh water. In Oil Harbour 29 ft. 6 in. fresh water. Length and breadth of minor importance. No tides.

HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise, ask Agent.

RADIO: Hango (Hanko) radio and Mariehamn Radio. In addition these have telephone and VHF service. Local telephone network on VHF Channel 26.

TUGS: Off Harbour Pilot station Pikisaari/Beckholmen, further out on application. Advisable apply for tugs in advance. 4 tugs available.

BERTHING: Priority given to arriving and departing passenger ships on regular lines. 6 hydraulic stern loading roll-on/roll-off berths and 3 without hydraulics..

Total length of quays 4,896 m.

Canal Bank quay	Depth 27 ft.
West quay	Depth 30 ft.
Coal quay	Depth 18 ft.
Oy Wartsila A/B	Depth 18 ft.
Linnanselka/Slottsfjarden quay	Depth 27 ft.

Container facilities available.

CRANES:

Quay	*No.*	*Capacity (tons)*	*Reach of arm (m.)*	*Type*
Canal bank	7	5.0	15	Movable
	1	7.0-5.0	5.5-12	"
Linnanselka/ Slottsfjarden	7	5	20	"
	1	60-40	20-24	"
	9	6	20	"
Oy Wartsila Ab Crichton-Vulcan (only for dockwork)		80-40-10	17.5 35-36	Stationary
Valmet Oy Pansion Telakka	1	30-6	19-39	Floating for dockwork only

DENSITY: 1004.

STEVEDORES: Agent should be well informed about ETA and Master's Requirements. Normal working hours: 0700–2230 hrs.; Saturdays and days preceding public holidays 0700–1430 hrs. The Post Office: 0900–1600 hrs. Saturdays and days preceding public holidays 0900–1400 hrs.

MEDICAL: All medical and hospital facilities available. No special requirements regarding inoculations, etc.

TANKERS: No special requirements. Small slop discharge facilities. 1 berth, depth 29 ft. 6 in. for larger ships.

FRESH WATER: From pipe-lines along berths. Price approx. 5 fmk. per ton.

FUEL: Most grades available. No advance notice neccessary if ex. motor vehicles. In case of greater quantities: from Oil Harbour only. This requires advance notice to Agent.

DEVELOPMENTS: Entrance channel to Main Harbour is now dredged to 33 ft. Container Harbour being built. Outer Harbour planned. Recent acquirement: one 60-ton moveable electric quay crane. Draft alongside 30 ft.

GANGWAY/DECK WATCHMEN: Gangways to be rigged out so that they do not obstruct quay crane movements. Watchmen customary, but not necessarily hired.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

IDENTIFICATION CARDS: Not needed.

CONSULS: The following countries are represented by Consuls or

vice-consuls in Turku: Austria, Belgium, Denmark, France, Great Britain, Greece, Honduras, Iceland, Italy, Norway, Portugal, USSR, Spain and Sweden.
REPAIRS: All types of repairs possible.
DRY DOCKS: Graving dock: length 600 ft. (183 m.), width of sluice gate 85 ft. (26 m.), depth on sill 26 ft. 3 in. (8.0 m.).

Floating dock: lifting capacity 4,000 tons, max. length of ship 358 ft. (109 m.), inner width 59 ft. (18 m.) max. draft 16 ft. 6 in. (5.0 m.). By agreement the shipyard's 80-ton crane can be used in port traffic if such is needed. Tel. 359 500, Telegrams "Wartsila". Telex 62-228.
REPATRIATION: Yes, good connections everywhere.
AIRPORT: 4 miles from port, regular lines.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: New Year's Day (January 1st); Twelfth Night (January 6th); Good Friday; Easter Bank Holiday; Midsummer Day; All Saints' Day; Independence Day (December 6th); Christmas Day; (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire 005; Police 002; Ambulance 006.
GENERAL: Ice-breakers maintain Winter traffic. 2,000 and 800 h.p.
TELEPHONES: Ships' telephones available.
AUTHORITY: Kanavaniemi, Turko/Abo.

UUSIKAUPUNKI: 60.48 N. 21.24 E.

APPROACHES: 3 fairways lead to harbour through sheltering archipelago; Uto-Uusikaupunki, 78 miles; Isokari-Uusikaupunki, 13 miles; Kylmapihlaja-Uusikaupunki, 24 miles.

Good sheltered anchorage in the roads. Depth of fairways 9 m.
DOCUMENTS:

Agent will prepare during clearance:
2 Ship's Report.
1 Declaration List, arrival (Board of Navigation)
1 Declaration List, Departure (Board of Navigation)
To be prepared before Arrival:
2 Provision Lists (own provision of the ship)
2 Special Lists (must be signed by each member of the crew)
2 Crew Lists
Bill of Admeasurement
Certificate of Registry
Ice-class Certificate (during Winter months, 1st December-30th April, issued by hull surveyor)
Bill of Beaconage (issued by Customs).

PILOTAGE: Embark Pilot at Isokari or Uto Pilot stations. Distance through archipelago Isokari-Uusikaupunki 13 miles, Uto-Uusikaupunki 78 miles. Under normal circumstances first fairway recommended. During Winter months, if ice-situation difficult in Gulf of Bothnia, traffic goes via Uto.

Both pilot stations equipped with radio 2182 kHz, Channels 16 and 24, VHF duplex-Channels 18, 20 or 22 and radar. Pilot-boat red, with letter "L" and fitted with VHF Channels 13 and 16. Pilot boards usually between Sandback-Isokari, to where "Hauteri" light leads in line 134.5°–314.5° (T). Notice of ETA at least 4 hours prior reaching station.
ANCHORAGE: Many areas of safe anchorages in Archipelago. Pilot advises.
RESTRICTIONS: No entry restrictions. No tide. During North and East winds sea-level can fall about 40 cm. below normal, which may sometimes delay deep loaded vessels reaching port.
MAX. SIZE: Longest quay 180 m. depth alongside 9 m.
HEALTH: Pratique not necessary. In the event of any disease/fever on board or in last port of departure, vessel has to inform before arrival, hoist quarantine-flags, or in darkness 2 lights, red light above white, showing all round horizon.
RADIO: Mariehamn Radio OFH; Helsinki Radio OHG.
TUGS: 2 available; normally tugs join vessel at port, ship's lines used.
BERTHING: *Kemira Quay:* 180 m. long, owned by fertiliser factory Kemira Oy, has depth 9 m. alongside, two 8 ton cranes, two discharging pipes, one for discharging ammonia at minus 32° C. and one for sulphur acid. Discharging capacity depending material 140-170 tons/hour/crane and loading/discharging bags 45-50 tons/hour/crane.

Esso Quay: 40 m. long, owned by Oy Esso AB, depth in channel and alongside 5 m. Terminal is used for discharging LP gas.

Telakka Quay: 140 m. long, owned by Uudenkaupungin Telakka Oy, has depth alongside 5 m. Quay is only used for ship repairs, and fitting works for new buildings. There is also a floating dock with 5,000 ton capacity.

Hepokari Pier: 90 m. long and 18 m. breadth, owned by town. Channel and alongside depth 7 m. There is terminal on South side for Ro-Ro traffic.

Saunasilta Quay: 60 m. long and depth 3.5 m., owned by town. Used only by small coasters.
STEVEDORES: Available. Contact Agent.
MEDICAL: Hospital facilities, vaccination, certificates, etc., available. Contact Agent.
TANKERS: For discharging and loading liquid ammonia – Marine Loading arm "Luceat/Chiksan, Type RCMA" 8 in., ASA 300.
DENSITY: No tide, density 1004.
FRESH WATER: Water-hoses, about 20 t.p.h.
FUEL: Fuel available, contact Agent.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
SHIP CERTIFICATES: All certificates according to International Convention for the Safety of Life at Sea, Class Certificate, etc.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per each member of the crew. Wine and/or Spirit: 1 bottle wine or spirit per each member of the crew.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Uudenkaupungin Telakka Oy has a floating dock, lifting powers 5,000 tons, draft 6.1 m., breadth 19.6 m., and length 130 m.
REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.
AIRPORT: Distance to Turku Airport about 90 km. Airport is served by regular Airlines.
TIME: GMT plus 2 hours, no alterations during the year.
HOLIDAYS: Official Holidays are: New Year's Day (January 1st); May 1st; Midsummer Day (Saturday between June 20th and June 26th); Independence Day (December 6th). Usually no work on those days.
POLICE/AMBULANCE/FIRE: Police 002 or 3002; Ambulance 3005; Fire 005 or 3005.
TELEPHONES: Available.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Uudenkaupungin Satamatoimisto.

VAASA: 63.06 N. 21.36 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Customs Documents.
2 Health Documents.
5 Manifests.
5 Bills of Lading.

PILOTAGE: Compulsory for ships arriving from abroad. 3 Pilot stations: From S. = Ronnskar Pilot for ships draft 18 ft. to 26 ft. From S.W.-W. & N.W., Norrskar Pilot = 26 ft. From N. Ritgrund Pilot = 16 ft.

Pilot signals: Letter "G" as flag – light or sound. Radio telephone call: Pilots watching 24 hours on 2182 kHz, also VHF.

Pilot vessel: 30 ft. motor yacht with wheelhouse and radar. Hull red all over with letter "L" painted on bow.

Pilot vessel not cruising in open sea. Meets ship well outside Archipelago indicated on charts.

Harbour Pilot available in port from Vasklot Pilot Station. Tel. 12 496.
ANCHORAGE: In the area of port – outside breakwater about 2 miles W. of port of Vasklot. Elsewhere according to Pilot's advice.
RESTRICTIONS: No locks. Fairway lighted all the way.

No tide, but water level may be reduced by up to 20 in. in Spring and early Summer, or increased by 10 to 25 in. in Autumn.
MAX. SIZE: Depth alongside piers up to 26 ft. 3 in. At the Oil Harbour, max. recommended LOA is 610 ft.
HEALTH: See "Documents" – no restrictions. Hospital and Doctor for any purpose available.
RADIO: Vaasa Radio – OFW 2803 kc/s.
RADAR/VHF: No radar service in port area. Pilot vessels at sea Pilot stations equipped with radar; also Ronnskar Pilot station on same island. VHF radios on Pilot stations, harbour tug-boat and harbour office.
TUGS: Harbour tug-boat and ice-breaker m/s *Vaasa* available 24 hours round. 650 h.p. Radio telephone/VHF – call signs OGWE. Charge according to size.
BERTHING: 2 piers of 180 m. length and the Reins Quay of 240 m. length. Depth 26 ft. 3 in. There are three 5-ton cranes on the South Pier.

The Ferry Pier, 106 m. length, depth alongside 5.7 m. with berths for Ro-Ro traffic.

The Oil Harbour is at Vasklot. Depth alongside 26 ft. 3 in. Tankers discharge through three arms of 500 m/m and 400 m/m diameter.
STEVEDORES: ETA as usual according to C/P to Agent, etc.
MEDICAL: If serious illness advance notice to Agent necessary. Coastguard has an aeroplane stationed at Vaasa; coast radio station will advise and arrange.
DENSITY: Nearly fresh water 1002-1004. No tide.
FRESH WATER: Available, no limit. Direct from quay-side, through pipes, rate about 25 t.p.h.
FUEL: All grades of bunker fuel available – direct from oil jetty or by lorries to berth.
FIRE PRECAUTIONS: Dry-cargo ships; no smoking in holds. Tankers: usual restrictions. Tankers with petrol cargo not allowed to berth at dry-cargo piers.
GANGWAY/DECK WATCHMEN: Not compulsory, ship's own crew can be used. Police watchmen available.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES:
Safety Equipment Certificate.
Stability Certificate.
Load Line Certificate.
Derrick and Hoisting Gear Test Certificate.
Derating Certificate.
Nationality Certificate.
Measurement Certificate.
Ice-class Bill.

CUSTOMS ALLOWANCES: Tobacco: Max. 200 cigarettes per man or 50 gr. of tobacco. Wine/Spirit: Maximum 1 bottle of each per man to be opened and used on board only.
CARGO GEAR: Cargo gear test book to be in order – all gear to be tested within a year otherwise risks for breaks in discharging/loading.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Belgium
Denmark
France
Great Britain
Netherlands
Norway
Sweden
REPAIRS: Shipyard in Vaasa owned by Wartsila Oy. All deck and engine work can be carried out; slip for ships up to 1,500 d.w.t. Nearest dry dock Rauma. Harbour tug acting as salvage vessel, diver on board, all kinds of underwater cutting and welding, pumps, etc.
REPATRIATION: Can be carried out easily.
AIRPORT: Vaasa Airport (about 8 miles from town) served by regular airlines, domestic and abroad, Stockholm, U.K., Continent, etc.
TIME: Local time GMT plus 2 hours.
HOLIDAYS: Working hours in port: 0800–1200, 1300–1700 Monday–Friday, Saturday: 0800–1200. Sunday free. Working days in port: Monday–Saturday. Working days ashore: Usually Monday–Friday. All banks closed on Saturday. Shops open all weekdays. Other holidays: 6th December – Independence Day – Christmas, etc., as usual.
TELEPHONES: Can be arranged on board.
POLICE/AMBULANCE/FIRE: Tel. numbers Vaasa: Police 112 034, 112 374; Ambulance 005 112 641; Fire 005. Ambulance, aeroplane, coast guard: Vaasa 113 751, 114 859.
GENERAL: Ships approaching port of Vaasa in Winter time (January-May) when sea area icebound, have to call any of Government ice-breakers operating in area or to inform harbour authorities of exact ETA – engine power, size and nationality, and whether strengthened for ice or not. Call signs, etc., for Government ice-breaker can be obtained from nearest coast radio station.
SERVICES: Compass adjusting available.
DELAYS: Only Winter time when Government ice-breaker is arranging, waiting or assisting in outbound convoys of ships.
AUTHORITY: Harbour Master.

VALKO (Walkom): 60.25 N. 26.17 E.

PILOTAGE: Pilot arrives from Pilot station at Orrengrund (Tel. (915)–53334, radio telephone). Station equipped with radar. Distance to port 12 miles.
APPROACHES: Max. draft from sea to fairway 24 ft.
TUGS: 1 tug available, 200 h.p.
BERTHING: *Walkom Quay:*
New Quay, length 300 m., depth 24 ft. South Pier (outer side) length 140 m., depth 24 ft.
South Pier (inner side) length 105 m. depth 18 ft.
CRANES: 5 mobile cranes, lifting capacity 2–6 tons. 1 shore crane, lifting capacity 6 tons. 1 shore crane lifting capacity 5–25 tons.
DENSITY: 1003.

VEITSILUOTO: 65.42 N. 24.37 E. (See Plan Book)

DOCUMENTS: See "Oulu".
PILOTAGE: Inwards compulsory for vessel in foreign trade. Boarding about 8 miles before Ajos. Ajos Pilot Station may be contacted on VHF Channel 16.
ANCHORAGE: Good holding ground about 1 mile from Rautakallio and by Koivuhauta 2 miles from harbour entrance.
RESTRICTIONS: No tide. Entry by day or night.
MAX. SIZE: See "Berthing".
HEALTH: See "Oulu".
TUGS: Available when required, charges according to net tonnage. Use ship's lines.
BERTHING: Length of Quay 552 m. plus Roll-on/Roll-off berth, depth 8.2 m., permitted draft 7.3 m.
STEVEDORES: Ordered by Agent, no ETA to stevedores necessary.
MEDICAL: Hospital at Kemi. Masters to advise if medical attendance required aboard.
FRESH WATER: Berth supply by shore installations.
FUEL: Ordinary fuel, diesel and gas oil. Deliveries by lorries only.
FIRE PRECAUTIONS: No special precautions. Company's fire-fighting corps.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed open and close.
IDENTIFICATION CARDS: Not required.
CONSULS: Norway and Sweden, others at Kemi.
REPAIRS: Available at Kemi.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Not normally expected.
AUTHORITY: Harbour Master.

FUEL: Available in small amounts.

FIRE PRECUATIONS: General rules. One wharf reserved for tankers.

GANGWAY/DECK WATCHMEN: Night watchman supplied by Agent.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: None on entry, 10 packets cigarettes when leaving. Wine/spirits unlimited when leaving.

IDENTIFICATION CARDS: Required.

CONSULS: Nearest at Ajaccio.

REPATRIATION: No facilities exist.

AIRPORT: Bastia 20 km. from ports. Departures every day to continent.

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police, 1881; Ambulance, 2281 733–2686; Firemen, 018-088.

TELEPHONES: As a rule telephone is put only on naval ships.

SHORE LEAVE: Crew may go ashore.

AUTHORITY: Department of Civil Engineering.

BAYONNE: 43.30 N. 01.28 W. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Lists of Provisions on Board.
3 Individual Lists of Tobacco and Spirits.
3 Manifests of Cargo.
1 Set Bills of Lading.

PILOTAGE: Station extends 3 miles between the parallel of Ondres to the North and the limit of French territorial waters to the South. When weather permits, the pilot boat comes out of l'Adour and comes alongside ships near the light buoy situated W.N.W. of the port entrance. Contact Pilot at least 12 hours before arrival relaying through Bordeaux Arcachon Radio and stay on radio watch in the pilot zone.

ANCHORAGE: Ships must not anchor in the river.

RESTRICTIONS: In bad weather ships are led to take the Pilot at the pilot boat which is based on St. Jean-de-Luz and are led either towards l'Adour or to the anchorage of St. Jean-de-Luz.

MAX. SIZE: The Adour is accessible to ships of 160 m. length. Depth at the mouth varies with the seasons and are maintained by dredging. They are never less than 7 m. during Summer but during Winter can be reduced following Westerly storms. The height of the tide has to be added to these depths but the draft can never exceed 8.0 m.

HEALTH: A declaration of Health Form is lodged by the Customs Service on arrival; it must be completed by the Captain. In case of a suspect illness, advise Agent 24 hours in advance.

RADIO: Bordeaux – Arcachon Radio. The signal tower on the South side of the mouth, and the Harbour Master's Office, in the tower, has a VHF radio station, Channel 12.

TUGS: 1 tug available, 1,250 h.p., 10 tons bollard pull. Request for tug through the Agent. Tug waits at the entrance to the Adour.

BERTHING: When working berth is occupied, vessel is directed to a waiting berth. Large ships or those carrying dangerous cargo can be requested to wait outside the entrance.

Berth	*Max. Length Vessel*	*Recommended Draft*
Socadour	160 m.	25 ft.
Cement Wharf	160 m.	24 ft.
Satec Wharf	160 m.	24 ft.
Grain Silo	130 m.	24 ft.
SNPA Sulphur Quay	150 m.	25 ft.
Other berths	120 m.	22 ft.

STEVEDORES: Arrival must be notified to Agent 24 hours in advance.

MEDICAL: Medical attendance can be organised by the Agent without advance notice, Hospital and private clinic available. However, if medical attendance required as soon as the ship arrives, particularly at night, it is advisable to send a radio message 12–15 hours before the arrival of the ship.

TANKERS: No installation to receive residues. Two berths for unloading of refined products. Refinery de Midi: max. length 120 m., max. draft 6 m. Saint Gobain, length 150 m. max. draft. 24 ft.

FRESH WATER: Available at each berth, minimum supply 3 cu.m.

FUEL: Available by arrangements in advance through Agent or suppliers.

GANGWAY/DECK WATCHMEN: Not obligatory except for ships with dangerous merchandise on board.

OPENING/CLOSING HATCHES: Generally carried out by the crew.

CUSTOMS ALLOWANCES: 200 grammes or 250 grammes of tobacco for each crew member and for 8 days (must without fail be declared in the individual list of provisions). 1 bottle of wine or spirits (must without fail be declared in the individual list of provisions).

IDENTIFICATION CARDS: Not necessary – seaman's identity card sufficient.

CONSULATES:

Belgium
Brazil
Chile
Spain
Finland
Great Britain
Norway
Peru
Portugal
Sweden
Uruguay

REPAIRS: Running repairs to hull, machinery, radio and radar can be effected.

DRY DOCK: Usable length 98 m. Length on stocks 94.1 m. Width of entry 15 m. Depth above sill, neap tides 4.5 m., spring tides 6 m.

REPATRIATION: Possible for all countries as well as crew changes.

AIRPORT: At Biarritz: 7 km. away. Regular service with Paris. Two services per week to and from London.

TIME: European Standard Time: GMT plus 1 hour and GMT plus 2 hours from 2nd April to 1st October.

HOLIDAYS: 1st January; Easter Sunday/Monday; May 1st; Ascension Day; Whit Sunday/Monday; 14th July; 15th August; 1st November; 25th December.

POLICE/AMBULANCE/FIRE: Police, telephone 17 or 25.50.21., Anglet: 17 or 03.76.10 Boucau: 17 or 55.29.53. St. Leon Hospital: 55.84.04. Fire Station: 18 or 25.21.84.

TELEPHONES: Telephones on board not possible.

SHORE LEAVE: Crew are authorised to go ashore.

AUTHORITY: Harbour Master.

BORDEAUX (inc. Verdon, Bassens, Ambes, Pauillac, Blaye): 44.50 N. 00.34 W. **(See Plan Book)**

DOCUMENTS:

Tonnage Certificate.
2 copies Provisions List.
2 copies Personal Effects List.
2 copies Crew List.
Customs Clearance.
Crew Manifests.
Check List.

PILOTAGE: No Vessel may enter the waters of the Gironde Mouth without permission of the Harbour Master's Office.

Vessels should announce their arrival at BXA Buoy at least 24 hours in advance to the Commandant du Port de Bordeaux through Coast Station Arcachon – Bordeaux Port Radio. In addition they should contact the pilot boat and confirm their ETA and speed 12 hours in advance The ship will be able to keep in touch with the pilot boat where radio watches are kept as follows.

1. On 500 kc/s (radio) and 2.182 kc/s (radiotelephone): permanent watches from 0800 to 1000 hrs. GMT. 1200 to 1400 hrs. GMT. 1600 to 1800 hrs. GMT. 2000 to 2200 hrs. GMT.

2. On 2.182 kc/s, a general RT call (both in French and in English) at the end of each radio contact with the Pilots' station at Le Verdon.

These contacts are made on 1743 kc/s at the following hours (GMT) 0030 – 0300 – 0500 – 0630 – 0717 – 0915 – 1030 – 1230 – 1430 – 1600 – 1715 – 2000 – 2124.

Upon request a special radio contact can be obtained at any time.

Under normal weather conditions, the pilot boat remains near the landing buoy and the West Channel entrance. In bad weather the Pilot is sent on board as soon as boarding becomes possible, usually around buoy No. 10.

Vessels less than 70 m. long, for which pilotage from the sea to Verdon is not compulsory, may embark river Pilot at Le Verdon providing Masters have advised the Pilot station accordingly. Pilots can be contacted on VHF Channels 12 and 16.

ANCHORAGE: The normal waiting anchorage area is the roadstead of Le Verdon, depth 10 to 12 m. and sand silt bottom. The big tankers with more than 10 m. draft find a good anchoring area in the Saintonge roadstead with a depth of 15 to 20 m. (sand silt bottom).

MAX. SIZE: Verdon Petroleum Harbour. Tankers up to 350 m. length or approximately 250,000 d.w.t. can be accepted, with 75% load.

Bec d'Ambes: Tankers up to 32 ft. 6 in. draft, 225 m. length.
Pauillac: Tankers up to 32 ft. draft, 225 m. length.
Bassens: Vessels up to 32 ft. draft.
Blaye: Vessels up to 25 ft. draft.

RESTRICTIONS: The great entrance to the Gironde estuary (Western Entrance) is dredged to a depth of 13.50 m. under the zero of French sea charts. It permits the sailing in of ships with a draft of 15 m. (49 ft.) at practically all tides.

HEALTH: Vessel should ask for free pratique by radio at least 12 hours before arriving at port. Message should be addressed to Sanipor – Bordeaux routed via Bordeaux/Arcachonradio. Otherwise, pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADAR/VHF: Port radar is in operation in the Gironde Estuary and approaches. Vessels may contact this station for navigation information by calling Verdon Port Radio on VHF Channel 14.

RADIO: Arcachon Bordeaux Port Radio: Radiotelephony 1,862 kc/s. Radiotelegraphy 421 kc/s.

Port Authority by VHF: Calling band 156.8 mHz Channel 16. Traffic band 156.6 mHz Channel 12 (port). Traffic band 156.7 mHz Channel 14 (radar).

Pilots: Telegraphy: watch on 500 kc/s at the prescribed hours. Telephony: continuous watch on 2,182 kc/s. VHF: continuous watch on Channel 6.

TUGS: Tug assistance is available as ordered by the Pilot. Tugs will join vessels at the following places: In Verdon Roads for vessels mooring at Verdon. In Pauillac Roads for vessels mooring at Pauillac. At Buoy BA1 for vessels mooring at Ambes. Off the Harbour Basins for vessels mooring at Bordeaux Docks.

As a rule ship's tow-lines are used; when a tug line is required there will be an additional charge.

BERTHING: *Le Verdon Deep Water Terminal:* 2 containership berths depth alongside 13 m. at low water; slip for quarter ramp Ro/Ros. Floating Bridge berth for angle ramp vessels and combination. Ro/Ro/Lo-Lo vessels. (Handling operations carried out 24 hours a day 7 days a week). 100 power points for reefer containers. Two container gantry cranes of 36 tons and 44 tons hoisting capacity. Two 24 ton cranes.

Riverside Quays. 20 berths depth alongside 7.50 m.–9 m. at low water.

Enclosed Docks. 2 basins joined by a lock 25 m. wide. Entrance effected by two locks of the following dimensions: Large lock 146 m. long 22 m. wide. Small lock 100 m. long 14 m. wide. Depth of water in the basins is maintained at 7.50 m.

Queyries. 493 m. long, depths offered are 7–8 m. alongside.

Bassens-Amont. 770 m. long, depth alongside at LW. 11.0 m. (5 berths).

Bassens-Aval. 11 berths, total length 1,475 m. Depth alongside more than 9.50 m. at low water.

Blaye: Private berth for coasters. Public berth 8 m. draft, 170 m. long. Also private berth for tankers.

Pauillac: Public berth for vessels drawing up to 10 m. Total quay length 290 m.

TANKERS: *Verdon Terminal:* Main berth. The ship is berthed on elastic dolphins (steel pipes) with an available depth of 17 m. Ship makes fast with own hawsers on four mooring dolphins, two up and two down on the wharf and set back about 35 m. from the face. This mooring is strengthened by very flexible steel warp hawsers of 55 and 60 mm. diam. Five hawsers of this type may be placed at each end of vessel according to needs and weather conditions. Ships must have strong chain or claw-stoppers for turning on bitts.

For crude oil, the berths have following equipment: one 30 in. line connecting the main berth to storage; one 16 in. line connecting the coaster berth to the foresaid lines; 2 lines for bunkering.

Arms for connecting pipe-lines to ship. Connecting of the crude oil pipe-lines is made by ASA type, 16 in. Mannesmann arms (4 at main berth – 1 at the coaster berth). The Port Authority has a number of connecting collars in various dimensions and types. Ships are requested to inform before arrival on the type and data of their own collars. Connecting to the bunkering line is made by flexible hoses (ships must use their own handling gear).

Fire wire must be rigged on forecastle and poop, the eye 1 metre (3 ft.) above the water (all the time) when ship is light. Each fire wire must have a 10 m. (30 ft.) coil laying between bitts and fair lead.

If no other request, the ship is assisted by 2 tugs (with Kortnozzle 23 ton thrust) one of which stays at disposal during the call.

Secondary berth. This berth is for the use of shuttle-service ships, lighters and coasters, depth of 6.50 m. alongside.

Fire-fighting line. A 12 in. line supplies the wharf and the 2 berths with sea water under pressure. At each berth there are fire-fighting hydrants. The first help material for fire-fighting is ready to use at each call. It includes spray nozzles, water and foam hoses, emulsion liquid containers, powder extinguisher systems (movable and portable).

Bunkering. Supply is made by lighters mooring at the coaster berth. Tying lighters alongside tankers is forbidden, except with special permission of the Port Authority.

Telephone. Telephone is connected to every ship on arrival. In that way the ship is regularly connected to the French telephone network (tel. No. 596243 – Le Verdon).

Pauillac: Oil installation operated by Shell, 33 ft. alongside.

Ambes: Terminal for tankers up to 200 m. length, 32 ft. 6 in. draft. Operated by Societe Elf and Esso.

Blaye: Small tankers are accommodated at the private jetty of La Societe Total.

DENSITY: Verdon 1023 to 1015. Pauillac 1026 to 1000. Ambes approximately 1000. Bordeaux approximately 1000.

MEDICAL: All facilities available. Smallpox, malaria, and cholera vaccinations can be performed at the Military Hospital or at the Port Vaccination Centre.

CONSULS: Algeria 52.66.80, Brazil 52.83.57, Cambodia 44.27.41, Canada 52.36.89, Colombia 44.78.37, Denmark 29.24.10, Finland 29.35.88, Germany 08.60.20, Great Britain 52.28.35, Greece 29.43.13, Guatemala 08.22.49, Haiti 92.56.14, Honduras 92.93.01, Iceland 50.84.68, Italy 52.24.89, Ivory Coast 44.12.42, Dominican Republic 08.43.63, Liberia 29.22.10, Madagascar 52.13.92, Monaco 29.26.12, Morocco 29.57.95, Norway 52.52.41, Panama 91.46.92, Netherlands 29.16.75, Peru 08.25.35, Philippines 48.35.01, Portugal 52.10.50, Spain 52.80.20, Sweden 29.37.10, Switzerland 52.18.65, Tunisia 44.99.20, Venezuela 47.19.67, United States of America 52.65.95.

DRY DOCKS: There are 3 dry docks and 5 small covered docks. Dimensions of the largest graving dock are 247 m. length 34 m. width 13.40 m. depth.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of alcohol per man.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

AIRPORT: Situated 10 km. from Bordeaux. Frequent and Daily flights to most parts of Europe and North Africa. Good internal service.

POLICE/FIRE/AMBULANCE: Police 17; Ambulance 17; Fire 18.

TELEPHONES: Can be connected on board vessels moored at quays in Bordeaux, Bassens, Ambes, Pauillac, and Verdon.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

Le Verdon Container Terminal: Operational 24 hours per day, 365 days per year.

AUTHORITY: Port Autonome de Bordeaux.

AGENT: See "Paris".

BOULOGNE SUR MER: 50.43 N. 01.35 E. (See Plan Book)

DOCUMENTS: As for "Calais".

PILOTAGE: Compulsory for vessels over 60 m. length. Vessels can communicate with Pilot station, tel. 31.36.08, through Boulogne Radio. When pilot launch is at sea, contact by VHF Channel 12.

The most favourable boarding point is between the sea buoy and the wreck buoy situated 1.5 miles to the South, or slightly nearer the land if there are strong Westerly winds. In any event, the surf created by the Carnot breakwater must be avoided by keeping at least 1 mile off shore. If Pilot is not immediately available, vessel must wait in Outer Roads, if necessary at anchor, until further instructions received. On no account should vessel attempt to enter Carnot Roads without Pilot.

ANCHORAGE: The outer anchorage for large vessels is midway between Bassure de Baas and the Carnot breakwater. Anchorage prohibited in the main approach channel.

RESTRICTIONS: Entrance depends on tidal conditions. For larger vessels best to enter the breakwaters at slack water which occurs 2 hours before time of high tide. Arriving vessels are obliged to contact Harbour Master's office immediately by radio, or VHF Channel 12.

MAX. SIZE: For outer harbour: length, 240 m.; draft, 10.5 m. springs 11.00 m. neaps. Max. d.w.t., 35,000 (approx.). Bassin Loubet: length, 130 m.; draft, 7.5 m. springs, 7.75 m. neaps.

RADIO: Boulogne Radio, call sign FFB, also on VHF Channel 25.

HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease on board, Master should radio Agents prior arrival advising details.

TUGS: Will meet vessel as requested by Master on Pilot's advice.

BERTHING: Main berths situated inside Carnot breakwater. Mooring length of 775 m. available, depth 11 m.

A marine terminal in the inner harbour, for landing vehicles with passengers. This terminal has 2 mobile ship-to-shore ramps.

These ramps have a load capacity of 30 and 35 ton, and the availability of parking areas allows for development of roll-on/roll-off traffic. However, the characteristics of the inner port can just accommodate ships up to a max. length of 130 m. with a draft of 4.50 m. Plans are being studied for considerably improving these facilities.

CRANES: Floating cranes: 1×150 tons and 1×25 tons, 9 cranes 3–5 ton and 23 cranes 6–20 ton.

DEVELOPMENTS: A third ramp, being a car ferry terminal and for which the constructional works have been completed is located in the sheltered road on the West face of the Sarraz-Bournet dock mole.

The installation of a fourth ramp, for Roll-on/Roll-off, the location of which is close to that mentioned above is currently under construction.

The open land area available for these 2 ramps is approximately 100,000 sq.m.

The Hoverport, in order to be better adapted to the needs of the new hovercraft has been the subject of enlargement works.

A 400 m. quay could also be built along the West face of the mole when the increase in trafffic necessitates its building.

The port offers 93,010 sq.m. of sheds of which 7,900 sq.m. (i.e. 38,000 cu.m.) are quayside cold stores together with a wine vault with a capacity of 52,000 hectalitres. The open air areas now cover 83,590 sq.m.

Having a capacity of 42,500 tons, the clinker silo has a loading rate of 1,000 t.p.h.

FRESH WATER: Supplied by pipe-line to all berths.

FUEL: SMCL quay can supply marine fuel. Quay is limited to vessels less than 100 m. length and 5 m. draft, otherwise fuel obtainable by tanker lorry from Dunkirk.

OPENING/CLOSING HATCHES: Performed by crew.

REPAIRS: Only quick repairs may be effected because of congestion at the quays. Slipway for vessels up to 2,500 tons.

TIME: GMT plus 1 or 2 hour according to the time of the year.

HOLIDAYS: No work Sundays and legal holidays.

POLICE/AMBULANCE/FIRE: Police, tel. 30.12.34; Ambulance/Fire, tel. 18.

TELEPHONES: Can be connected on board vessels at Quay de L'Europe.

SHORE LEAVE: Permitted, no restrictions.

AUTHORITY: Direction du Port.

AGENT: See "Paris".

BREST: 48.24 N. 04.30 W. (See Plan Book)

DOCUMENTS: See "Dunkirk".

PILOTAGE: Pilots do not stay out at sea, but only go to meet ship at estimated time of arrival as sent by ship. Normally pilot boat positioned on the line Toulinguet lighthouse and Beuzec (or Charles Martel) buoy, about 2.5 miles N.W. Toulinguet lighthouse. If strong S.W. wind, pilot boat waits for ship at entrance of Camaret Bay, about 1.5 miles N.E. Toulinguet lighthouse. If sea too rough to allow pilot boat to sail out, boat waits for ship at entrance of Brest Roads, near Portzic lighthouse.

Ships proceeding Brest must send last message giving ETA Pilot station (stating if *local time or GMT*), about 5 hours before arrival. Message to be addressed *"Brest Pilot Office"* through Brest Le Conquet radio station (call sign FFU). Day and night watch at pilot office. Radio station phones message direct as soon as received. Any alteration in ETA should be passed pilot office immediately.

Pilot boat sails from Brest harbour about 1.5 hours before ship's ETA, and 0.5 hour later pilot boat takes radiotelephony watch on 2182 kc/s, calling ship from time to time on same frequency. Ships fitted with radiotelephony should listen and call on 2182 kc/s. Pilot boat also equipped VHF Channels 16, 9, 6, 12 and Pilot office Channel 9.

ANCHORAGE: At Pilot's discretion. Anchoring in main approaches restricted as indicated on charts.

RESTRICTIONS: Entry subject draft and height of tide on day in question. Two entrances to port, one dredged to 6 m. below zero of charts and the other 5.8 m. below zero. Depth at quays varies according berth from 6 m. to 11 m. below zero.

MAX. SIZE: Inside harbour, max. length 320 m. Draft up to 35 ft. subject to tide.

HEALTH: If from foreign port, cable Maritime Health Service 48 or 24 hours prior arrival requesting free pratique. If risk of contagious disease exists, vessel will be held in roads until cleared. If from another French port, free pratique automatic.

RADIO: Brest Le Conquet – FFU.

TUGS: Two port tugs of 1,250 h.p. Tugs join vessel at main entrance to port. Marine National places tugs at ship's disposal for all port movements. Generally, tow rope supplied by tug at additional charge.

The German salvage tug *Le Pacific*, or another tug of the German Bugsier Company, is stationed at the port, but only gives assistance for vessels requiring aid outside the port area.

BERTHING: According to draft, ships may have to wait in roads before berthing, depending on height of tide in fairways. Also see "Restrictions".

Commercial Harbour Facilities:

Dock	*Quay*	*Specialisation*	*Length*	*Sea level Chart*	*Lifting Power Equipment*
1	West	Wine, Wood, Railway, Others	170 m. 560 ft.	–8 to –7 m. –26 to –23 ft.	Mobile cranes 4 t at 22 m.
2	West	Wood, Railway Others	110 m. 360 ft.	–5 m. –16 ft.	Mobile cranes 4 t at 22 m.
3	Southwharf	Frigorific shelters, Others	140 m. 460 ft.	–6 m. –20 ft.	Mobile cranes 4 t at 22 m.
5	West	Frigorific shelters, Railway, Others	170 m. 560 ft.	–8 m. –26 ft.	2 cranes 3/6 t at 22 m.
5	North	Frigorific shelters, Railways, Others.	340 m. 1,120 ft.	–7.5 m. –25 ft.	
5	East	Cereals, Wood, Railway, Others.	300 m. 980 ft.	–10 to –8 m. –30 to –26 ft.	2 pneumatic suckers 2 × 100t/h 2 cranes 8 t at 30 m. (12 t at 20 m.) 1 crane 6 t at 22 m. 1 crane 12 t at 22 m.

6	East	Cereals, Coal, Others.	240 m. 790 ft.	–10 m. –30 ft.	2 cranes 8 t at 30 m. (12 t/20 m.) 1 gantry crane 900 t/h for bulk
6		Coal, Cement	120 m. 390 ft.	–6 m. –20 ft.	1 loading stoker 900 t/h.
6	South (1)	Containers, Cereals, Wood, Railway,	230 m. 765 ft.	–12 m. –40 ft.	1 crane 28 t at 33 m. (40 t at 24 m) 1 crane 8 t at 30 m. (12 t at 20 m.)

(1) This quay will be operational in February 1979.

STEVEDORES: Agent has responsibility of making all arrangements for unloading, and is in touch with stevedores who arrange necessary gangs.

MEDICAL: Hospitals and clinics available. In the case of ship needing medical assistance, request should be addressed to Maritime Health Service through Conquet Radio Station, advising ETA, where vessel coming from and state of patient.

TANKERS: One berth for receipt of refined products destined for local storage tanks. Berth length 142 m., dredged alongside to a depth of 10 m. below zero of charts over an area 250 m. long and 30 m. wide.

FRESH WATER: All berths have fresh water supply. Apply to Chamber of Commerce who make necessary arrangements. Loading rate 13-15 t.p.h.

FUEL: Bunkering station operated by Societe de Depots de Petrole Cotiers, on the South side of the East Mole. Loading rate up to 200 t.p.h.

TANK CLEANING: Station situated at the Southern extremity of the East Mole. Can operate 4 Victor Pyrate machines simultaneously. Equipped with 3 boilers to supply steam, 3 pumps, oily water separator and an extractor for solid residues.

The tank-cleaning station is connected by pipe-line to Repair Quay No. 2 where tankers of 100,000 to 250,000 d.w.t. may be accommodated.

DEVELOPMENTS: Two large projects are currently under construction:

The first consists of a new port industrial zone with an area of 100 hectares, and frontage of approx. 1,800 m. which will enable the construction of quays with depths of 10 – 12 m.

The second consists of the construction of a large dry dock able to receive vessels of 550,000 d.w.t. and 2 floating repair quays. The dry dock will have a length of 420 m. and width of 80 m. The quays will have a length of 418 m. each and will be dredged to 11 – 12 m.

These new developments will be put into service in 1979/1980, and will be equipped with the most modern means to repair large vessels.

Furthermore, the Port is studying a vast plan to develop the commercial port, so that the latter may adapt itself to the requirements of modern maritime transport.

WATCHMEN: Compulsory for ships carrying dangerous materials, non gas-free tankers, vessels with chemical products, munitions, etc.

CERTIFICATES:
Nationality.
Gross Tonnage.
Classification.
Deratisation.
Vaccination.

CUSTOMS ALLOWANCES: Tobacco, Wine/Spirit. Ship's provisions must be under seal.

CONSULS: The following countries are represented by Consuls at Brest:

Belgium
Chile
Denmark
Finland
German (Federal Republic)
Netherlands
Norway
Portugal
Spain
Sweden.

REPAIRS: Repair Quay No. 1 at the East Quay of Basin No. 5 can accommodate vessels up to 200 m. length. Dredged to depth of 10 m. over an area 300 m. long, 52 m. wide.

Repair Quay No. 2 can accommodate vessels up to 350,000 d.w.t. Quay is 320 m. long, dredged to depth from 10 m. at the bow to 12 m. at the stern.

Repair Quay No. 3 Adjacent to Repair Quay No. 2 Length 280 m. Depth 12 m.

Quays No. 2 and 3 are equipped with modern and complete plant necessary for tanker repairs.

Vessels may also be permitted to make repairs at other quays according to their availability.

DRY DOCKS: *No. 1:* Dimensions 225 m. by 26.77 m., entrance sill 4 m. below datum, situated at the Northeast angle of Basin No. 5. The entrance lock can receive 2 vessels simultaneously, 1 of 75 m. length and the other of 150 m. length, with some adjustments.

Max. draft, at Spring tides: 11.50 m.; at neap tides: 10 m.

No. 2: Dimensions 342 m. by 55 m. Can accept tankers of up to 250,000 d.w.t. Entrance sill 7.25 m. below datum. Dock situated in the Southeast of the Industrial Port Zone. Can accept vessels of the following dimensions.

At mean Spring tides: length 335 m.; beam 50 m.; draft 12.50 m.
At neap tides: length 335 m.; beam 50 m.; draft 10 m.
Also see "Developments".

AIRPORT: At Guipavas, 7 km. from Brest – 3 daily services to Paris.

TIME: Local time GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police 444850 and 445861; Police Secours 17; Ambulance and Fire Brigade 18 or 442766.

TELEPHONES: Can be placed aboard at certain berths.

SERVICES: Degassing station, tank-cleaning and slop discharge, adjustment of chronometers, chart and document department, weather forecasting, permanent daytime service for signing on crew, barometer adjustment. Also Compass and D/F adjusting.

Port Weather Service: Port Office, 30 Bis, Quai Commandant Malbert. Health Service: Quai Commandant Malbert.

AUTHORITY: Arrondissement de Brest, Direction Departmentale de l'Equipement.

AGENT: Jolasry (France), 6 Quai de la Douane. Telex 73080. Tel. 44.32.10

CAEN: 49.13 N. 00.21 W. (See Plan Book)

DOCUMENTS:
3 copies Crew List.
3 copies Provisions List.
3 copies Crew Personal Effects List.
Derat. Certificate or exemption.

PILOTAGE: Pilot boat is on station from 2.5 hours before high water until 3 hours after high water. Vessels can contact the Pilot by radio on 2182 kHz or by VHF Channels 12 and 16. The pilot boat is stationed in the outer port of Ouistreham and goes out to the roads on vessels approach. International code flag signals are used to call Pilot.

Caen Pilot boat has a black hull with white stripe. The words "Pilote Caen" are written in white letters on the hull. During the Summer months the pilot boat is replaced by a launch bearing the same markings. As soon as the Pilot boards he will hand the Master an Entry Declaration to be completed.

ANCHORAGE: While waiting the tide vessels may anchor in the vicinity of the light-buoy in Ouistreham roads. The position of this buoy is 49° 19′ 50″ N. 00° 14′ 18″ W. The buoy is positioned in depth of 10 m. Anchorage is open to winds from West through South to East; good holding ground. Currents do not exceed 2 knots at spring tides.

RESTRICTIONS: Dimensions of locks – East lock length 181 m., width 18 m. West lock length 225 m., width 28.45 m.

The locks are open to navigation from 2 hours before high water to 3 hours after high water. The locks can be used up to a maximum of 1 hour before/after these times by special permission of the Harbour Master and payment of additional dues.

Maritime Canal, length 14 km. The canal is dredged to 9.89 m. depth. Vessels proceeding to the docks at Herouville and Calix must pass 2 bridges: Herouville 30 m. wide and Colombelles 30 m. wide.

Ships proceeding to new dock must also pass the bridge at Calix, 21.76 m. wide. Maximum speed authorised in the Maritime Canal is 7 knots.

Maximum air draft for New Dock and St. Pierre Dock, 33 m.

MAX. SIZE: Daytime, length 205 m., beam 23 m., draft 28.8 ft. sea water.

Night-time:

Herouville	length 170 m.	Beam 17 m.	Draft 24 ft. SW.
Calix	length 150 m.	Beam 17 m.	Draft 24 ft. SW.
New Dock	length 140 m.	Beam 15.3 m.	Draft 21 ft. 2 in. SW.

HEALTH: Free pratique is automatic for all ships. Health control is carried out by customs officers under the direction of the Havre Port Health Office. For ships coming from ports in Africa, Asia, or Pacific Islands a Maritime Declaration of Health is required.

In case of suspected epidemic or fever on board Master must advise the port authorities who will instruct him to proceed to an appropriate anchorage to be boarded by the Port Health doctor.

RADIO: Nearest radio station Boulogne Radio, call sign FFB.

VHF: Vessels may communicate with the Harbour Master's Office by VHF Channel 12. This service only operates during the hours when the locks are operating.

TUGS: The use of 1 or 2 tugs is recommended for vessels over 16.50 m. beam.

BERTHING:

Dock	*Quay*	*Facilities*	*Length (m)*	*Sea level chart*
Saint Pierre	Vendeuvre de	1 crane 5 tons	280	4.5
	la Londe	1 apple silo of 250 t	250	4.3
	Cafarelli	unloading rate 50 t.p.h.

STEVEDORES: Arranged by Agent on basis of ETA provided by vessel before arrival.
MEDICAL: Doctors and hospital facilities available.
TANKERS: There is a tanker berth (D.P.C.) in Calix Dock, max. draft 8.60 m. Gas-freeing and discharge of residues is prohibited.
FRESH WATER: Available at all berths, rate about 5–10 t.p.h.
FUEL: Can only be supplied by tanker lorries.
WATCHMEN: Not compulsory during daylight hours from 0600 hrs. to 1800 hrs.
OPENING AND CLOSING HATCHES: This work is normally carried out by the crew.
CUSTOMS ALLOWANCES: Amount of tobacco and alcohol for crew consumption must be declared on the stores list. Quantities held out of bond are at Customs discretion.
IDENTIFICATION CARDS: Not required.
CONSULS: The following countries are represented locally:

Denmark tel. 82.00.67	Norway tel. 82.05.42
Finland tel. 83.33.27	Sweden tel. 82.21.76

REPAIRS: Deck and machinery repairs can be carried out by local workshops. Nearest dry docks at Havre or Cherbourg.
REPATRIATION: Can be arranged.
AIRPORT: Situated 12 km. from the port. There are no regular services, but an air taxi with 5 seats can arrange connections to International airports.
TIME: GMT plus 1 hour or GMT plus 2 hours.
HOLIDAYS: Work is carried out on legal holidays. No work on "Jours de Fetes".
POLICE/FIRE/AMBULANCE: Police tel. 17; Fire 18; Ambulance 18.
TELEPHONES: Can be connected on board ships. Quayside telephone situated in the Calix dock, Herouville and Blainville.
SHORE LEAVE: Allowed.
AUTHORITY: Ingenieur des Ponts et Chaussees, Chef de l'Exploitation, Direction Departmentale de l'Equipment.

AGENT: See "Paris".

CALAIS: 50.58 N. 01.50 E. (See Plan Book)

DOCUMENTS:

Ship Register.
Manifest of Cargo.
Bill of Lading
3 Lists of Provisions on board.
4 Lists of Articles held by Crew.
3 Lists of Crew.
List of open spaces.
Health Certificate, endorsed by Master on arrival.
Deratisation or Exemption.
For tankers, Certificate of Cargo Specification and Certificate of vessel's suitability to transport inflammable liquids in bulk.

PILOTAGE: Compulsory when entering or leaving harbour, except for ships less than 50 m. length. Pilotage area: 3 miles from piers. Ships required to give notice of their arrival 18 hours before, through Boulogne Radio. Pilot waits between buoys CA4 and CA6. Pilot boat: Black, white side stripe, bearing the inscription "Pilote Calais". She is equipped with VHF, Channel 6 and Channel 16.
ANCHORAGES: Between CA6 and CA8, 15 to 17 m. deep, sand and gravel. Good anchorage. When bad weather from North, ships are advised to stand out to sea or anchor in the roads of Les Dunes. Ship will receive instructions from Pilots or Harbour Captain's office when to enter roads of Calais.
RESTRICTIONS: Harbour channel 130 m. wide. In channel and outer harbour, depths are maintained at 8.40 m. MWL. Vessels should enter harbour preferably about 2.5 hours before high tide or half an hour after high tide. Because of the shape of sluice at the entrance larger vessels cannot have direct access to the Bassin Carnot at certain tides. These vessels may lighten in outer port, at "Quai Paul Devot", where depth is 9 m. LWOST.
MAX. SIZE: "Bassin Carnot", 150 m. max. length; "Bassin Ouest", (West Dock) 110 m. max. length; "Quai P. Devot" 175 m. max. length; "Bassin Carnot", 19 m. max. beam; "Bassin Ouest", 16 m. max. beam. Max. draft: 8.23 m. (27 ft.). Port accessible to vessels of 20,000 d.w.t.
HEALTH: Sanitation controls can arrange deratisations and exemptions. International Vaccination Certificates required for ships coming from an epidemic zone.
RADIO: Messages through Boulogne Radio. ETA must reach pilotage station or Harbour Captain's offices 18 hours before arrival. Near Calais, ships equipped with VHF can call Harbour Captain on Channel 12 or pilotage station on Channel 16.
TUGS: Generally join ships at end of the piers. Towing ropes are generally ships own but can be supplied by tug.
BERTHING: Max. height of tide 7.30 m. Depth on dock sills 2 m. LWOST.

At West dock, entrance between 1.5 hours before and half an hour after high tide. In Bassin Carnot, entrance between 3 hours before and 1 hour after high tide.

There are 2 berths equipped for handling roll-on/roll-off traffic, situated in Bassin Carnot.

CRANES:

Maritime Station Quay	Electric cranes – 6 tons	3
Paul Devot Quay	Electric crane – 6 tons with automatic scoop	1
	Electric crane – 12 tons with automatic scoop	1
	Electric cranes – 15 tons with automatic scoop	2
Transit Station	A block of 2 gantries able to handle a load of 40 tons (containers)	
West Basin		
South Quay of the	Electric cranes – 3 tons	3
West Basin	Electric cranes – 6 tons	2
Carnot Basin		
Vistule Quay	Electric cranes – 6 tons	2
Loire Quay	Electric cranes – 6 tons	3
	Electric cranes – 6 tons with automatic scoops	8
	Electric cranes – 12 tons with automatic scoop	2
	Electric gantries – 6 tons with raisable forepeak and equipped with weights and automatic scoops	2
Crespin Quay	Electric cranes – 6 tons with automatic scoops	3
Fournier Quay	Electric cranes – 6 tons	5
	Electric crane – 12 tons with automatic scoop	1
Volga Quay	Electric cranes – 6 tons	2
	Electric cranes – 6 tons with automatic scoops	2

Dry Dock: One electric crane – 15 tons. 2 mobile cranes of 1/9 tons complete the lifting machinery of the Public Equipment of the Port.
BRIDGES: Swing bridges (West Dock) and draw bridges (Bassin Carnot) are situated on sluices.
STEVEDORES: Informed by Shipbrokers of tonnage, nature and condition of cargo.
MEDICAL: All facilities available.
TANKERS: Two posts provided for tankers: "Quai Paul Devot" for middle-sized tankers. "Bassin Ouest" (West Dock) for small tankers. "White and black" products can be accepted at "Bassin Ouest". Only "black" products admitted at "Quai P. Devot". Tankers are allowed to enter harbour only by daytime. They must leave as soon as operations are finished. Hoses 10 in. and 12 in. in diameter. Barges discharged with a 10 in. hose.
DENSITY: Salt.
FRESH WATER: Supplied from hydrants on wharves.
FUEL: Any fuel can be supplied by tank lorry of large capacity.
GANGWAY/DECK WATCHMEN: Ships must be guarded.
OPENING/CLOSING HATCHES: As a rule hatches are manoeuvred by crew.
CUSTOMS ALLOWANCES: Tobacco: No limit for foreign ships, but the quantity must be declared on the lists of articles held by crew.
IDENTIFICATION CARDS: Identification cards and seamen's books are required.
CONSULS:

Consuls:
Netherlands, M. G. Dumont, 12 Bd. des Allies, Calais.
Vice-Consuls:
Denmark, M. J. Mulard Jr., Place de Suede.
Finland, M. H. Ravisse, 12 Bd. des Allies.
Great Britain, E. J. Evans, 9 Rue Felix Cadras.
Greece; M. H. Ravisse, 12 Bd. des Allies.
Norway, M. Y. Lefebvre, 12 Bd. des Allies.
Sweden, M. T. Pagviez, 198 Rue des Quatre Coins.

REPAIRS: Deck and engine repairs possible.
DRY DOCKS: One, 153 m. long, 21 m. wide. Depth at sill, 7.45 m.
REPATRIATION: Pilot boats and tugs may trans-ship equipment or hands in outer roads.
AIRPORT: Calais, Dunkirk (International), 7 km. away.
TIME: GMT plus 1 hour. Spring and Summer GMT plus 2 hours.
HOLIDAYS: 1st January; Easter Monday; 1st May; Ascension Day;

Whit Monday; Tuesday afternoon following 1st Sunday of July (local feast); 14th July; 15th August; 1st November; 11th November; afternoon of 24th December; 25th December; Sundays.
POLICE/AMBULANCE/FIRE: Police 17; Ambulance 34.39.24; Fire 18.
SHORE LEAVE: Crew are allowed ashore.
AUTHORITY: Directeur des Ports de Boulogne-sur-Mer et Calais.
AGENT: See "Paris"

CALVI: Corsica 42.34 N. 08.46 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List
1 Cargo List.
1 List of Articles (new and customs-barred) in possession each Crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.
PILOTAGE: Not compulsory.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 5 m.; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Not available.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour.

CANNES: 43.33 N. 07.01 E.

DOCUMENTS:
To be sent on departure from previous port.
3 copies of Passenger List.
1 copy of Crew List.
Required on arrival:
4 copies of List of Passengers, showing Christian name, surname, age, date and place of birth, nationality.
2 Crew Lists.
5 copies of a Special Arrival form (supplied on arrival).
PILOTAGE: No Pilot station at Cannes. A tender with Company's flag on top of its mast will meet the vessel: *(a)* If ship is proceeding to anchorage No. 1, in Golfe de la Napoule, about half a mile South of the lighthouse at end of Cannes port Pier (Quai Lauboeuf); *(b)* If ship is proceeding to either anchorage No. 2 or 3, in Golfe-Juan, half a mile North of Ile Ste Marguerite.

The tender will lead to anchorage and will give 1 blast of the siren when correct position has been reached. At night, tender has a fixed white light at top of its mast, which replaces the flag. Should it not be possible to advise by wireless before arrival at anchorage and weather conditions making it necessary for ship to anchor at either position No. 2 or 3, boat will meet ship in Golfe de la Napoule, 2 miles South of Cannes port lighthouse. In this event, ship must proceed to anchorage No. 2 or 3 as appropriate, steaming to South of Ile St. Honorat, whilst tender will proceed by channel between Ile Ste Marguerite and the mainland.
ANCHORAGE: Advice of anchorage is passed to Captain via Grasse Radio or Monaco Radio, VHF Channel 16 usually about 1 hour before arrival. There are 3 anchorages, any of which may be used according to the weather:

No. 1 off the port of Cannes, approximately half a mile South of end of breakwater, used by calm sea or by East or N.E. winds.

No. 2 is situated to North of Ile Ste Marguerite, used by S.E. or S.W. or South winds.

No. 3 to the East of Cap de la Croisette, used by West or N.W. winds.

It could happen during the call, winds may change direction and movement from anchorage No. 1 to No. 2 or No. 3 become necessary. Shift takes about 1 hour.
HEALTH: Port officials will embark immediately the ship anchors. Free pratique may be granted by wireless telephone 1 hour before arrival at ship's surgeon request stating: "no illness on board".
FRESH WATER: 3 tankers of respectively 65, 75, and 95 tons capacity are available with 72 hours' notice. Water can be pumped at an average of 1,500 tons per 24 hours, with 2 hoses of 2.5 in. diameter on each tender.
GANGWAY/DECK WATCHMEN: Watchmen for gangways should be provided by ship and passengers are requested to present their landing cards every time they use the gangways.

CHERBOURG: 49.38 N. 01.38 W. (See Plan Book)

DOCUMENTS:
Declaration of Health.
Manifest of Provisions on Board.
Manifest of Crew's Possessions.
Manifest of Cargo – in certain cases.
Manifest of Equipment.
DEEP SEA PILOTAGE: Pilots board off CH1. Buoy. Radio ETA to "HUTCHINSON GRAVESEND". (48 hours notice.) On approaching Cherbourg contact Cherbourg Signal Station on VHF Channel 16 confirming ETA.
PILOTAGE: Requests for pilotage must indicate arrival time at the buoy CH1. They may be addressed to Agent or direct to pilot station, telegraphic address "Pilotage Cherbourg" or through the Homet look-out station by means of the usual signals. To avoid delay it is well to warn the pilot station 4 hours in advance of arrival. As a general rule, the pilot boat always comes out, whatever the weather. In bad weather, it follows the vessel and Pilot boards as soon as shelter permits.
ANCHORAGE: Anchoring must be made strictly according to the instruments of the Pilot so as not to get in the way of movements and anchorage of steamers. Depths vary from 6 to 12 m. in safe anchorages.
RESTRICTIONS: In the wet dock, the bridge is opened one hour before until one hour after high water.
MAX. SIZE:

	Length (m.)	Breadth (m.)	Depth (m.) average tide Spring	Neap
In the Roads	No Limit	No Limit	11	12.50
Trans-Atlantic Dock	No Limit	No Limit	7.0–12.5	8.5–14.0
Mielles Dock	150		5.00	6.50
Oil berth at Querqueville	200	31	9.0	10.50
Berth Amiot	100		3.0	4.50
RO/RO No. 1	130	20	7.0	8.50
RO/RO No. 2	200	30	8.0	9.50

HEALTH: From French port to French port, no formalities. From foreign port to French port, request for free pratique (yellow flag). In case of sickness on board, warn the Agent in advance. No crew member may leave ship before consultation and agreement of Port Doctor.
RADIO: The stations which offer the best facilities are Boulogne Radio, Brest le Conquet Radio, and St. Lys for ships which are a long way off.
TUGS: Tugs generally join vessel in the main approaches. With regard to the tow rope, a charge is made.
BRIDGES: Only the swing bridge at the entrance to the wet dock, which is opened on request from 1 hr. before until 1 hr. after high tide for the entry and exit of ships.
STEVEDORES: Agent needs ETA, to arrange personnel and equipment to be used for handling cargo.
CRANES: 2 floating cranes, max. capacity 90 tons. 1 shore crane, max. capacity 25 tons. The French Navy have 2 floating cranes, 1 of 30 tons and 1 of 90 tons capacity.
MEDICAL: Warn Agent of any requirements at the same time as ETA. There are 2 hospitals, civil and military, both very well equipped.
TANKERS: There is only one discharge berth, max. draft 9 m.
WATER: Water points on all quays.
FUEL: Available from local suppliers – Esso, Shell, etc.
WATCHMEN: Every ship in port must have a watchman, usually a crew member.
OPENING/CLOSING HATCHES: At the discretion of Master, crew may perform this.
CUSTOMS ALLOWANCES: Free allowance for each crew member – 200 cigarettes or 50 cigars, and 1 litre of alcohol. Common Market Countries – Crew: 300 cigarettes, 75 cigars and 1.5 litres of alcohol.
IDENTIFICATION CARDS: Each crew member must carry his seaman's card.
CONSULS:

Belgium	Finland and Norway	Greece
Portugal	Haiti	Sweden
Denmark	Venezuela	Great Britain

REPAIRS: All types of hull and engine repairs are possible.
DRY DOCK: Commercial Port's dock: length 75 m., width 14 m.

Dry Dock Nos.	Sill Length (m.)	Max. dim. of vessel able to enter Length (m.)	Breadth (m.)
N. Drydocks			
1	90.00	97.85	18.50
2	100.00	107.85	18.50
3	100.00	107.85	18.50
4	90.00	97.85	18.50

7	69.30	75.75	17.30
Homet	235.00	248.00	35.00

REPATRIATION: Can be arranged.
AIRPORT: At Moupertuis, 12 kms. from Cherbourg. There are no regular services in the immediate vicinity.
TIME: Local time throughout the year is the time zone 1 hr. East., i.e. Central European Time.

HOLIDAYS: January 1st; Easter Sunday/Monday; May 1st; Ascension; Whitsun Sunday/Monday; July 14th; Assumption; 15th August; November 1st; Victory Day, November 11th; Christmas Day, December 25th.

POLICE/AMBULANCE/FIRE: Police: 53.14.50. Ambulance: 53.13.29. Fire: 53.01.23.

TELEPHONE: Generally, ships do not request the installation of a telephone line, unless for a prolonged stay. It is only possible on the steamer berth, price 15 F.

AUTHORITY: Ingenieur des Ponts et Chaussees, Department de la Manche.

AGENT: Jolasry (France), 9, Quai de l'Entrepot, Cherbourg. Telex: 77723, Telephone: 53.24.35.

CONCARNEAU: 47.52 N. 03.55 W. (See Plan Book)

DOCUMENTS:

Ship's Registration Certificate.
Cargo Manifest.
Stores List.
Crew Personal Effects List.
List of Crew and Passengers with dates of Vaccinations.

MAX. SIZE: *Tankers:* By day: 90 m. overall; by night: 80 m. overall. *Other vessels:* By day: 95 m. overall; by night: 90 m. overall.

RADIO: Contact Conquet Radio.

TUGS: Available on demand, meet vessels near Cochon Light.

CUSTOMS ALLOWANCES: *Tobacco:* Fixed at 30 grams per day, at sea, per person. *Alcohol:* The equivalent of 5 centilitres of rum at 42° per day, at sea, per person.

These allowances are free of tax for use on board, but may not be landed.

IDENTIFICATION CARDS: Any National Identity Documentation will suffice.

POLICE/AMBULANCE/FIRE: Police, tel. 970071; Ambulance, tel. 17; Fire Brigade, tel. 19.

FRESH WATER: Available.

DRY DOCKS: Synchrolift available. Max. capacity 2,000 tons; max. LOA 95 m.; max. keel length 77.5 m.; max. beam 14 m.; max. draft 5.50 m. Fresh water, electricity, compressed air and cranes available.

REPAIRS: There is a slipway which can accommodate 6 vessels of 350 metric tons.

AIRPORT: At Quimper – Pluguffan 30 km. from the town. Twice daily flights to Paris and flights to London during the Summer months.

AUTHORITY: Officier de Port.

DIEPPE: 49.55 N. 01.04 E. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
2 Lists of Stores.
1 Loading Manifest.
1 Passenger List.
1 Declaration (furnished by Agent) stating that ship possesses up-to-date Safety Certificates.
1 Health Declaration.

PILOTAGE: Pilot boards 4 miles from breakwaters. Pilotage is compulsory in this area except for vessels less than 50 m. long equipped with VHF (Channel 12). Pilot boat is ready to put to sea from 2.5 hours before to 1 hour after high tide when a vessel is expected. During this period maintains radio telephone watch. VHF Channel 12.

All vessels must send ETA to the pilotage authority of the Seine/Rouen/Dieppe at least 5 hours prior to arrival in the Dieppe roads, any delay greater than 2 hours or where a tide is missed must be signalled at least 3 hours before the initially ETA. Vessels not obliged to take on a Pilot must indicate in their ETA whether or not a Pilot is needed.

Address: PILSEINE – 21 rue du Mont Diboudet – Rouen, Telephone (35) 71 68 50; Telex 770575.

APPROACHES: Coming from the West, immediate landfall is Cap d'Ailly which is passed at 3 miles distance and then vessels proceed to the landfall buoy of Dieppe marked D.1. with black and white stripes, with a flashing light every 6 seconds and a bell:

Location: 49° 57′ 15″ N., 1° 01′ 40″ E., or 2.5 miles to the N.W. of the port entrance.

The cliffs which surround Dieppe give very good radar echoes.

ANCHORAGE: It is recommended to anchor in zone bounded by following points: *(a)* 49° 56′ 55″ N. 01° 04′ E.; *(b)* 49° 58′ 40″ N. 01° 02′ 45″ E.; *(c)* 49° 57′ 42″ N. 00° 59′ 20″ E.; *(d)* 49° 55′ 50″ N. 01° 00′ 30″ E.

This anchorage area includes buoy D.I and depths are from 6 to 12 m. with sand and broken shell bottom. Larger vessels anchor approximately half a mile to North of buoy D.I in depths of 10 to 12 m.

Forbidden anchorage: It is forbidden to anchor in the area defined by the following points: 49° 56′ 55″ N. 01° 05′ 29″ E. – 49° 56′ 25″ N. 01° 03′ 03″ E. – 49° 56′ 05″ N. 01° 04′ 50″ E.

RESTRICTIONS: The lock gates of the commercial basins are only open from two hours before to one hour after high tide. Vessels remain at anchorage in the roads until the gates are opened. Large vessels enter preferably at the time of high tide to benefit to the maximum from the level of water under the keel and the best conditions of navigation.

Entry and leaving: Vessels entering must arrive in the roads at the latest 25 minutes after high tide, except for large vessels which must be in the roads at the latest at high tide. Vessels leaving must be ready at the latest 30 minutes after high tide.

Entry and leaving signals: Entry and leaving signals are exhibited on the signal post on the West jetty and on the repeater post of the fore port (signals in accordance with the Lisbon Convention of 23rd October, 1930.) At the Colbert Sluice and at the various locks the signals are simplified.

MAX. SIZE: Colbert Lock: 230 m. length, 40 m. width, controls entrance to Inner harbour, where depth maintained about 7.50 m.

Canada Docks: length 154 m.; width, 21 m.; draft 8 m.
Paris Dock: length 154 m.; width 21 m.; draft 8 m.

Opening of Canada and Paris basins: 2 hours before to 1 hour after full tide, night or day. The port is accessible to vessels up to 10,000–12,000 d.w.t.

HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease, Master required to radio details to Agent in advance.

RADIO: Boulogne Radio (FFB). *Arrival advice.* Masters of vessels must send to the Port Authority, 24 hours in advance, or at the latest when leaving the previous port where this is located less than 24 hours away, the expected time of arrival in the roads, indicating the name of the vessel, tonnage, length, beam, the date and time of arrival, maximum draft of the vessel on arrival, the nature and tonnage of various items of its cargo and hazardous cargo (in transit or to be landed), possible damage to the ship, its equipment or to the cargo. A rectifying message must be sent in the event of a change. Address: Port Captaincy: 1 Quai Guynemer – Dieppe. Telephone (35) 84 10 55 – Telex: MARDIEP 180414F.

VHF: Dieppe Radio maintains continuous watch on Channels 21 and 24 and calls vessels on Channel 16. The Port Authority (Call sign "Dieppe Port") maintains watch on Channel 12.

TUGS: 3 tugs available (1,400 h.p., 750 h.p., 600 h.p.). Requests for use must be made to the Port Captaincy. Two tugs in service at all times.

BERTHING:

Dock	*Quay*	*Facilities*	*Length (m.)*	*Sea level chart*
Paris	Norvege	5 cranes 3 t; 2 cranes 3/6 t; 1 roll-on/roll-off ramp 1 crane 20 t.	715	7.5/9
	Maroc	1 crane 2.5 t; 1 cranes 5 t 5 gantry cranes 2.2 t. 6 noria conveyors for banana handling	600	7.5/9

	Quebec	4 cranes 3 t; grain silo (cap. 12,000 tons). Capacity 500 t.p.h.	160	7.5/9
Avant-Port	Henri IV	2 cranes 3 t; 2 cranes 3/8 t 1 Roll-on/roll-off ramp	380	4.5/5 minimum

Handling capacities:

	Loading:
Colza oil	200 t.p.h. (from the quay)
Colza grains	60 tons/man hour
Grain and wheat	500 t.p.h. (silo)
Rough timber	23 to 28 cu. m./man hour
	Unloading:
Colza oil	100 t.p.h. (taken from quay)
Colza grains	50 tons/man hour
Sand and gravel	100 to 150 tons/man hour
Bananas	about 3,000 cartons/man hour
Citrus fruit on pallets	55 to 65 pallets/man hour
Citrus fruits not palletised (cases, cartons, crates)	16 to 21 tons/man hour
Pre-slung timber	about 80 cu. m./man hour
Bulk timber	about 25 cu. m./man hour
Iron and steel	50 to 60 tons/man hour

CRANES: One 30-ton crane at Quay de Tonkin. Two 40-ton jib cranes.

BRIDGES: There are 3 bridges without vertical obstacles, and to request opening of the Colbert Bridge give 3 long blasts on the ship's whistle, to call for the opening of the Admiral Rolland Bridge give 3 long blasts on the whistle, and for the opening of the Jehan Ango Bridge give 2 long blasts on the whistle.

STEVEDORES: Normal hours are 0800–1200 and 1400–1800. Possible to work from 1800–2200 to complete operations. No work on Sundays or holidays.

MEDICAL: All medical facilities available.

FRESH WATER: Is supplied by pipe-line. There are a great number of outlets on the quay.

FUEL: Available in small quantities; delivered by tanker lorry.

GANGWAY/DECK WATCHMEN: Available if required.

IDENTIFICATION CARDS: Embarkation card or passport is sufficient.

CONSULS:

Norway
Sweden
Denmark
Holland

REPAIRS: Good facilities exist, all types carried out.

DRY DOCKS: Dry dock in the inner harbour, dimensions 130×18 m. It can receive ships 129×17 m.
SURVEYORS: Bureau Veritas at Dieppe; Lloyds at Le Havre and Rouen; American Bureau of Shipping at Le Havre; Det Norske Veritas at Le Havre.
OPENING/CLOSING HATCHES: According to agreement, either by crew or stevedores.
CUSTOMS ALLOWANCES: EEC countries – 300 cigarettes 1.5 litres of spirits and an exemption of 600 francs. Antilles: 400 cigarettes, 1 litre of spirits of more than 22°; Africa: 400 cigarettes and 1 litre of spirits of more than 22° and an exemption of 140 francs per passenger.
REPATRIATION: Good facilities.
AIRPORT: Dieppe Saint Aubin (3 kms.) has two daily connections with Shoreham, England. The nearest main airport is Paris.
TIME: GMT plus 1 hour, but during the period from beginning April to end September (six months) the legal time is advanced by 1 hour (GMT +2).
HOLIDAYS: 1st January; Good Friday; Easter Monday; Ascension Day; Whit Monday; 1st May; 14th July; 15th August; 1st November; 11th November; 25th December.
POLICE/AMBULANCE/FIRE: Police (Duquesne Quay) 84-87-32 or 17. Fire and Ambulance 18 or 84-33-00.
TELEPHONES: No connections on the quays.
SERVICES: Compass adjusting, etc. available.
SHORE LEAVE: Allowed.
AUTHORITY: Commandant du Port.
AGENT: Jolasry (France), 6, Quai de Norvege – Dieppe. Telex 77965. Tel. 84–24–40.

DONGES: Refer to Nantes. (See Plan Book)

DUNKIRK: 51.03 N. 02.24 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" is the Dyck lightship or the roads if the ship comes from the East.
DOCUMENTS:
Entry Bill (all information about ship), given by Pilot to Captain, who fills it in and gives it to Harbour Officer.
To be given to Customs:
3 Crew Lists.
3 Passenger Lists.
Manifest or copy.
Form for increase of tonnage.
Declaration of open spaces.
3 Lists of objects held by crew.
PILOTAGE: Pilotage station limits – there are 2 pilotage zones.
1. The outer zone which is limited:
To the West by the meridian of Calais lighthouse;
To the East, by the meridian of 2° 27′ of Long. East;
To the North, by the line situated 3 miles seawards of the low water mark;
To the South, by the Calais pilotage zone, the coast and the inner zone defined below.
2. The inner zone limited:
To the West by meridian 02° 08′ East;
To the North, by a continuous broken line constituted by the parallel 51° 03′ N., the line of the coast, the meridian 02° 2′ E., the parallel 51° 04′ 30″ N.;
To the East by the meridian of Dunkirk lighthouse;
To the South by the end of the water levels of the autonomous port of Dunkirk.

Pilotage is compulsory in inner zone for ships over 150 n.r.t. or ships of max. length 50 m, or with dangerous cargo.

Pilotage compulsory in outer zone for ships not fitted with VHF, or over 1,000 nett tons or max. length 100 m.

Vessels coming from the West should call Pilots 12 hours before arrival. Vessels coming from the East should call Pilots 2 hours before arrival. ETA based on time of arrival at Dyck lightship, should be given through Boulogne Radio (telegraphy) or by radiophone (2182 kHz). In vicinity of pilot boat, vessels may communicate with Pilots by VHF Channel 16, or by Aldis lamp or flag signals when pilot boat is in sight. Telegraphic address of Pilot: Piloduk. Telex 82902.

Pilot boat is about 50 m. long, black hull with white horizontal stripe, "Pilot Dunkerque" written on hull. Black funnel with white anchors insignia.

Pilot boat is positioned between Dyck lightship and buoy CA.2. In bad weather, pilot boat may heave to on a parallel South of wreck buoy (*British Liberty*) and buoy DC, or put into port.
ANCHORAGES: Large vessels waiting for entrance must anchor in the area West of Dyck Light vessel. In bad weather, ships may anchor off English coast, in the roads of Les Dunes, with good mooring ground of sand and mud 20 m. deep. On the Roads of Dunkirk, ships must anchor East of buoy E.11 so as not to disturb the entrance of ships.
RESTRICTIONS: Vessels more than 180 m. length, or of more than 10 m. of draft, normally enter only at slack water, i.e. between 3 hours before high water and 2 hours after high water.
MAX. SIZE: The Charles De Gaulle Lock can receive ships with a draft of 12 m. at slack water before high tide and ships with draft of 14.20 m. at slack water after high tide. At night these permissible drafts are reduced to 12.00 m. and 12.5 m. In normal conditions of work, max. length of ship 270 m. (Turbine), or 280 m. (Motor), max. width 42 m. For entry of larger ships, Director of Harbour should be consulted beforehand.

Entrance through Watier Lock: max. length 235 m., max. beam 33 m., max. draft 11.50 m.

Maximum salt water draft at Charles de Gaulle Lock is 14.20 m., for vessels berthing at public wharf appontement No. 1 and 2 and at private Usinor berth No. 5 and 6.

Outer Port West: V.L.C.C.s up to 470,000 d.w.t. on a max. draft of 22 m. can use the new access channel to the Flanders Oil Berth in the outer harbour.
HEALTH: For ships coming from *(a) All European countries:* Declaration of health is not obligatory but general international certificates are controlled. *(b) Other Harbours:* Admission subject to declaration of health and usual controls of certificates. Admissions in free pratique only in daytime except special cases (intervention of a physician). Request for free pratique may be made to Sani-Port, Dunkirk, through Boulogne Radio. In case of necessity, health service can – on request – intervene at night.
RADIO: Dunkirk Harbour Station (FFF) for messages about port service through VHF Channel 12 and 11. Communications other than in VHF made through Boulogne Radio (FFB).
RADAR: There is radar at the control tower of harbour. It is not a guiding radar.
TUGS: Tugs normally join vessel between buoys DW.28 to DW.30. and DW.16. Smaller vessels are joined by tugs in the outer port.
BERTHING: Berthing priority is decided by Port Captain's office. Ship is informed by radio of the location and priority given to her.

Mobile Cranes: 1 at 6/10 tons and 2 at 17/36 tons.

BRIDGES: Bridges of locks and wet docks are closed to navigation to allow trains or work hands to go. The maritime traffic is practically never disturbed.

BULK HANDLING FACILITIES: Bulk Quay No. 1, formerly known as the ore quay. Equipped with 3 gantry cranes. Principally used for iron ore destined for Usinor Dunkirk and Usinor Valenciennes.

Bulk Quay No. 2, a common quay with 2 berths belonging to the Dunkirk port authorities. Equipped with 2 polyvalent iron ore/coal gantry cranes. A third gantry crane is under construction. This quay is accessible for largest ships able to enter the port. Used to discharge coal destined for the Usinor coke mill, also receives coal for other operators, manganese ore and all iron ores for receivers other than Usinor.

Bulk Quay No. 3, an extension of the Usinor Quay for iron ore cargo. Equipped with 1 gantry of 50 tons capacity. Permissible draft at present 13.50 m. planned to be increased to 14.50 m. in the future.

Phosphate Quay, situated West of Bulk Quay No. 2. Berth is 600 m. long with a min. depth alongside of 14 m. Bulk carriers of 80,000 d.w.t. with a draft up to 41 ft. can be accommodated.

Unloading equipment consists of 3 cranes with grabs, each with a max. discharge capacity of 565 t.p.h.

Cereal berth is accessible to 80,000 d.w.t. ships. Along its internal face, coasters, lighters and 3,000 ton pushed convoys can be tied up. Handling operations are secured by 2 pneumatic gantries at a max. rate of 600 t.p.h.

CONTAINER FACILITIES: *Dunkirk-West:* Quai de Lorraine and Quai de Flandre. Total length 1,200 m. equipped with 4 container gantry cranes capable of lifting 45 tons on spreaders for 20–40 ft. units.

ROLL-ON/ROLL-OFF FACILITIES: *Dunkirk-West:* Quai d'Alsace is equipped for direct transhipment of vehicles, trailers and wagons. Quai de Lorraine and Quai de Flandre are provided with movable steel ramps for direct transhipment of vehicles and trailers.

Dunkirk-East: Quay Freycinet VII, the berth South of Freycinet VI, has been provided with a fixed ramp for roll-on/roll-off for ships up to 8 m. draft and 22 m. beam.

TANKERS: The following tanker berths are available:

Flanders Oil Berth: max. draft 22 m. Discharge lines to Total Refinery, and to the B.P. Refinery. The access channel has been dredged to a depth of 22 m. at L.W. The turning circle at the entrance to the Outer Port West has a diameter of 1,400 m. Max. discharge rate 20,000 cu.m./hr.

North wharf, max. draft 12.50 m. Loading/discharging pipes 26 in. diameter, bunker line 10 in. diameter.

Middle wharf North, max. draft 12.50 m. Loading/discharging lines 2 of 22 in. and 3 of 16 in. lines, bunker line 16 in. diameter.

Middle wharf South, max. draft 12 m. Dimensions of lines as for Middle wharf North.

Coasters Wharf, max. draft 7.50 m. Diameter of loading/discharge lines 6 in.

Bassin de Mardyck Oil Port, Appt C.F.R. – Poste Est. Max draft 12.50 m., Poste Ouest draft 14.20 m.

Facilities for discharge of dirty ballast are available at all main tanker berths.

STEVEDORES: Each captain will contact his consignee.

MEDICAL: Hospitals and all medical facilities.

DENSITY: Salt.

FRESH WATER: Available in unlimited quantities. Numerous hydrants on all wharves. Price of a ton of water for ships, 2.50 Fr.

FUEL: Supplied by barges or tank lorries if no connection at wharf. Fuel, diesel and gas oil available. Requests for bunkers must be made 48 hours in advance to Agents.

FIRE PRECAUTIONS: The following preventive measures are taken for tankers: Steel rope hung fore and aft along the side (a quick tow in case of hauling out the ship). Deck scuppers plugged. Hoods open on tanks with anti-fire device. Earth connection. Rounds of the port officers. Fire hose connected. Ship's captain is given instructions of the harbour concerning tankers. In case of storm, the Harbour Officer can stop loading or discharging.

GANGWAY/DECK WATCHMEN: Guarding is strongly advised.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES:

Certificate of Nationality.
International Certificate of Tonnage.
Certificates from the Classification Office where ship is registered, especially:
Certificate of Freeboard.
Classification Certificate, engine and boiler.
Classification Certificate, hull.
Classification Certificate, electric equipment for tankers.
List of Hoisting Apparatus.
Deratisation Certificate.
TOVALOP Certificate or similar for tankers.

CUSTOMS ALLOWANCE: Tobacco: Amount allowed for each member of crew: 200 cigarettes or 200 gramme tobacco. Wine and/or Spirits: 1 bottle.

IDENTIFICATION CARDS: An official identity certificate is compulsory ashore (passport, identification card, sailor's book, etc.).

DEVELOPMENTS: The new outer harbour covers 1,400 acres and is designed for vessels with drafts of up to 73 ft.

Unloading for tankers at Total Pier at a rate of 20,000 cu.m.p.h.

The new commercial port, "Rapid Transit Port" operational. The port is tidal. Facilities include a 260 m. quay for Load on/Load off and ro/ro berth. A container vessel of 400 ft. length and a ro/ro vessel of similar size can operate simultaneously. Also berth for ferry with rail sidings, parking and all other services.

CONSULS:

AIRPORT: Calais, Marck, 35 km.; Lille Lesquin, 80 km.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; Easter; Whitsuntide; 1st May; 14th July; 15th August; 1st November; 11th November; Christmas. On public holidays, handling operations can be carried out from 0600 to 1200 hrs.

POLICE/AMBULANCE/FIRE: Police 66.59.01; Ambulance, Firemen 18.

TELEPHONES: In wet dock 6, in the tankers' harbour, at the quay for minerals, at the wharf for cereals, a telephone on board can be obtained and connected to the general system.

SERVICES: No specific port equipment for gas-freeing. Dirty ballast can be received at terminal of Societe Francaise des Petroles B.P. Compass adjustment, radio repairs.

SHORE LEAVE: Crew are allowed ashore.

AUTHORITY: Port Autonome de Dunkerque.

AGENT: Jolasry (France), 11 Rue des Arbres. Telex 82911. Tel. 66-99-01.

FECAMP: 49.46 N. 00.21 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Custom Lists.
1 Health Form.
Ship's Register.
Cargo Manifest.
Bills of Lading.

PILOTAGE: Pilots informed of arrivals by Agents. Pilots wait at port station 2 hours before high water each tide. Inform Harbour Master by VHF Channel 16.

ANCHORAGE: Half mile West of jetties.
MAX. SIZE: 100 m. length, 16 m. breadth and 18 ft. draft, entry any tides.
HEALTH: Pratique obtained when Customs Officer boards few minutes after berthing.
RADIO: Boulogne Radio. VHF at Harbour Master's Office, Channel 16.
TUGS: None.
STEVEDORES: Informed by Agents (available).
MEDICAL: Notice not required for medical attention. Doctors and hospital always ready. But it is better in case of urgency.
FRESH WATER: Available from shore (pipes each 50 m. on quay).
FUEL: No fuel in port. Available only by lorries for bunkering.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: In accordance with international regulations:

Load Line.
Radio Equipment.
Safety Equipment.
Deratisation, etc.

CUSTOMS ALLOWANCES: About 200 cigarettes per man; wine/spirits at Customs Officer's discretion.
IDENTIFICATION CARDS: Not required.
CONSULS:

Vice-Consulate of Norway	tel. 28.00.08.
Vice-Consulate of Denmark	tel. 28.08.62.

REPAIRS: Possible.
DRY DOCKS: 1 slipway for vessels of maximum 1,500 tons displacement.
REPATRIATION: Agents carry out these operations.
AIRPORT: Paris is the nearest.
TIME: Local time is GMT plus 1 hour, no alterations during year.
HOLIDAYS: Arrangements for working during holidays can be made if necessary.
POLICE/AMBULANCE/FIRE: Police, tel. 0.17; Ambulance, tel. 28.31.91 and 28.09.59; Fire, tel. 0.18.
TELEPHONES: No arrangements for placing telephone on board.
SERVICES: No possibilities for tank cleaning, etc. Compass adjusting available if necessary.
SHORE LEAVE: Always possible for crew members to go ashore.
AUTHORITY: Ingenieur des Ponts et Chaussees.

GRANVILLE: 48.50 N. 01.35 W.

DOCUMENTS: See "Calais".
PILOTAGE: Pilotage not compulsory for ships of less than 45 m. length, except for those carrying dangerous cargo. Pilots board from fishing boats carrying regulation marks of a pilot boat, and maintain position at Videcoq buoy when a vessel is expected.

Limits of Granville pilotage are: 1. On entering, towards the West, the line joining "la Pierre d'Herpin", and Chausey lighthouse. To the North, alignment of Chausey lighthouse and "le Pignon". 2. On leaving, alignment of Mont. St. Michel through Champeaux Point. Ships bound Granville required notify ETA 24 hours in advance. Telegraphic address, "Telex 77777 Usaport Granville".

1.5 hours before to 1 hour after high tide contact with Port Officer (tel. 50.12.45 Granville) can be established by relay through "Marines" Stations. During same hours contact can be made with pilot boat and with Port Office by VHF Channel 12 (port wave band 156.6).
ANCHORAGE: At landfall buoy of Le Videcog.
RESTRICTIONS: Draft restrictions apply at slack water.
MAX. SIZE: Largest vessel admitted length 119.0 m. Draft 6.6 m. Depth of water in channel 8 m.
HEALTH: Pratique arranged by Customs.
RADIO: Boulogne Radio for ships coming from the North. Brest-Le Conquet Radio for ships coming from the South.
TUGS: Port not equipped with tugs. Pilot boats used as "pushers" for port manoeuvres, or for carrying hawsers to tying-up points.
BERTHING: Dependent nature of cargo and ETA. Depth of water at zero tide is between 4 m. and 5 m.
STEVEDORES: Work hours 0800/1200, 1400/1800.
HOLIDAYS: See "Calais". Local holiday, Mardi Gras afternoon.
MEDICAL: Hospital available. Tel. 50.11.37.
TANKERS: 2 berths for unloading domestic fuels through 8 in. pipes.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: No fuels readily available. 2 days notice required for tank lorry 200 km. distant.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes. Wines and spirits. 1 bottle spirits.
CONSULS: None.
DRY DOCKS/REPAIRS: None.
REPATRIATION: Paris, 3.5 hours by train.
AIRPORT: 10 km. from the port. Air-taxi and commercial fights.
TIME: Local Time GMT plus 1 hour in Winter and GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police Tel. 50.11.16; Fire Service 18; Ambulance 50.11.37.
AUTHORITY: Officer Du Port.

HONFLEUR: 49.25 N. 00.14 E.

DOCUMENTS: See "Rouen".
PILOTAGE: Served by "Pilotage de la Seine" (address 9 Chaussee Kennedy, 76 le Havre). Ships bound for Honfleur are received on the Carosse Roads (Rade de la Carosse) where the following signals should be made for summoning a Pilot. By day – flag "G" of the international code of signals. By night – in Morse by signalling lamp.

Complementary signals which can be used on arriving on the roads. By day – globe or ship's national flag hoisted at masthead. By night – red light at main masthead. At all times, sound signal of 5 long blasts.

Advice of ETA and draft in salt water is to be given to Rouen Port at least 5 hours prior arrival roads, as well as to Agent.

Similarly, vessels anticipating a delay of more than 2 hours after their reported ETA should notify Rouen Port or the pilot boat of this at least 3 hours before the time originally reported.
RESTRICTIONS: Access to port made through channel 100 m. wide, protected by 2 dykes about 500 m. long, which leads to outer harbour. A tidal port, Honfleur possesses 3 basins:

Dock	*Length*	*Width*	*Sluice width*
West Dock	128 m.	77 m.	10.50 m.
East Dock	295 m.	71 m.	16.50 m.
Carnot Dock	788 m.	108 m.	13.00 m.

East Dock joins outer harbour: ships of more than 70 m. long must anchor in Carnot Dock which spans from East.
MAX. SIZE: Port can receive ships 100 m. long and 15.50 m. wide berthing in East Dock; but with Carnot Dock, only ships less than 12.50 m. wide can enter. Drafts vary according to tides: 6.00 m. with average tide, 4.70 m. in average slack water, and subject to variations because of silting up of harbour which necessitates frequent dredging.
HEALTH: Bill of Health is under the jurisdiction of Customs office of Honfleur. Hospital nearby.
RADIO: Vessels may use radio telegraphy to communicate all necessary information to the Information Centre of the Port of Rouen (Rouen Port) or to the pilot boat (call sign: FORI) These two keep each other mutually informed of all information received. A permanent watch is maintained by Rouen Port on Channel 16. Disengagement frequency after call on Channel 16: Channel 11 or Channel 12.

A Pilot is obligatory for every ship of more than 55 m. length.
TUGS: If necessary are provided by "La Societe des Abeilles" of Le Havre.
TANKERS: Berth "Miroline" on dolphins in River Seine for tanker of 18,000 tons eventually after lightening according to the depth conditions.
FRESH WATER: Available. Supplies arranged through Agent.
FUEL: Supplies arranged through Agent.
AIRPORT: 12 km. from Port.
AUTHORITY: Directeur du Port.

ILE ROUSSE: Corsica 42.39 N. 08.56 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provision List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.

PILOTAGE: Not compulsory.
ANCHORAGE: Outside of port for cruise vessels.
RESTRICTIONS: None.
MAX. SIZE: Draft 5 m; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Not available.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour.

LA NOUVELLE: 43.01 N. 03.04 E. (See Plan Book)

DOCUMENTS:

1 Passenger List.
4 Crew Lists.
2 Stores Lists.
1 Cargo Manifest.
Bill of Health.
Safety Certificates.

PILOTAGE: Vessels call Pilot on VHF Channels 15 and 16. 3 pilot boats available. International Code pilot signals used.

MAX. SIZE: For port entry: length 135 m., beam 25 m., draft 6.50 m. Tanker sea line: max. draft 18m.

HEALTH: Pratique is given by Customs officers who board vessel on arrival. In case of suspected disease on board, Master should radio Agents advising details before arrival.

TUGS: Not available. There are several launches to assist in mooring.

BERTHING: Is effected in the order in which ships arrive. Specialised berth for Roll-on/Roll-off available.

STEVEDORES: Arranged by consignees.

MEDICAL: Doctors available at La Nouvelle. Nearest hospital is at Narbonne, 27 km. away.

TANKERS: 1 sea line berth at buoys in depth of water greater than 18 m. 4 dolphin berths in the oil dock, max. draft 6.50 m. One of these berths is used for LPG cargoes. No slop disposal facilities.

DENSITY: 1025.

FRESH WATER: Supplied at all town berths.

FUEL: Available from several suppliers.

FIRE PRECAUTIONS: Usual safety regulations strictly applied. A barrage can be positioned across the channel to contain burning oil.

OPENING/CLOSING HATCHES: Optional, performed by stevedores or crew.

CUSTOMS ALLOWANCES: Each crewman allowed to retain only sufficient for his own consumption while in port. It is forbidden to take alcohol ashore.

IDENTIFICATION CARDS: Any person going ashore should carry a passport or identity card.

CONSULS: No local representation.

REPAIRS: Not possible ashore, except very minor ones.

REPATRIATION: No difficulties.

TIME: GMT plus 1 hour. No changes.

HOLIDAYS: In principal, no work done on legal holidays.

POLICE/FIRE/AMBULANCE: Police, tel. 332011; Fire, 332017; Ambulance, 332011.

TELEPHONES: No connections can be made on board.

SHORE LEAVE: No restrictions.

AUTHORITY: Ponts et Chaussees, Service Maritime.

AGENT: See "Marseilles".

LA ROCHELLE/LA PALLICE: 46.10 N. 01.14 W.

(See Plan Book)

DOCUMENTS:
4 Cargo Manifests, or Manifest of Ballast.
Certificate of Cargo Space.
3 Bills of Lading.
Ship's Provisions List.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Certificate of Crew Personal Effects.

PILOTAGE: Access from sea is through Pertuis d'Antioche, the strait between Isle of Re and Isle of Oleron. Pilotage compulsory for all vessels over 55 m. length. Pilot launch named *Armeria*, meets vessels at Chauveau Buoy in position 46° 06′ 05″ N. 01° 16′ W. Contact Pilot via VHF Channel 16, 2 hours before arrival. ETA should be given to Agent 12 hours before arrival.

Vessels which do not receive berthing instructions on arrival should wait in the vicinity and South of Chauveau Buoy, keeping watch on VHF Channel 16.

ANCHORAGE: About 330 yds. South of the end of the outer mole in depths of 36 ft. Mud bottom, good holding ground. In Westerly winds may be preferable to shelter nearer Isle of Re where water depth is 59 ft.

RESTRICTIONS: Vessels in excess of 360 ft. length can enter Inner Basin only from 2 hours before to 1 hour after high water. Loaded tankers over 5,000 d.w.t. may enter tidal harbour in daylight hours only.

MAX. SIZE: Outer pier mole, draft 30-40 ft. Tidal harbour, length 560 ft., draft 29 ft. Wet dock (inner basin), max. beam 69 ft., draft 25 ft. 6 in. neaps, 30 ft. springs.

HEALTH: Pratique given by Customs officers who board on arrival. In case suspected disease on board, radio Agent in advance advising details.

RADIO: Bordeaux-Arcachon Radio.

TUGS: Join vessels either in outer roads or inner roads of La Pallice. Normally tugs' lines are used.

STEVEDORES: Normal working hours for stevedoring are: 0800 to 1200 hrs. and 1400 to 1800 hrs. 2 hours overtime may be worked from 1800 to 2000 hrs. When a quick despatch must be given to a vessel, an 8-hour shift can be arranged, from 0500 to 1300 hrs. and 1400 to 2200 hrs. during the week, and 0500 to 1300 hrs. on Sundays and holidays.

MEDICAL: All facilities available. Advance notice should be given if assistance required on arrival.

TANKERS: Only refined products are discharged at La Pallice.

1. Oil berths situated at West side of outer pier mole, in depths of 31 to 36 ft. low water.

Service Essence Aux Armees: flexible hoses 250 mm. diameter.

Petroles de L'Ouest: pipe-line of 200 mm. diameter. Metal loading arm of 200 mm. diameter.

Picoty: pipe-line of 200 mm. diameter.

2. Oil berths at North quay in tidal harbour in depths of 26 ft.

Raffineries du Midi: Pipe-line of 250 mm. diameter, hoses 200 mm. diameter.

Petroles de L'Ouest: Pipe-line of 300 mm. diameter, hoses 250 mm. diameter.

Total: Pipe-line of 200 mm. diameter, hoses of 150 mm. diameter.

Essence Aux Armees: Pipe-line and hoses of 200 mm. diameter.

FRESH WATER: Available from all wharves. No barges available. Loading rate from the quay 60-75 t.p.h.

FUEL: Available by pipe-line at North Quay in Tidal Harbour. Otherwise supplied by tank trucks only.

FIRE PRECAUTIONS: Tanker berths are enclosed or surrounded by a barrier system. Smoking is prohibited on the tanker berths. The presence of a fire guard or representative of the fire service is necessary while a tanker is alongside the quay.

OPENING/CLOSING HATCHES: Performed by ship's crew.

GANGWAY/DECK WATCHMEN: Available from shore if required. Necessary for tankers loading/discharging cargo.

CUSTOMS ALLOWANCES: 200 cigarettes and bottle wine/spirits per man.

IDENTIFICATION CARDS: Crewmen going ashore should carry passports or identity cards.

CONSULS: No local representatives.

REPAIRS: All kinds of deck, hull and engine repairs can be carried out by Ateliers et Chantiers de La Rochelle-Pallice.

Vessels not exceeding 21 m. beam may be repaired in the inner basin. Larger vessels are repaired at berths outside the inner basin.

DRY DOCKS: 2 dry docks in Inner Basin: 577 ft.×72 ft. and 351 ft.×41 ft.

REPATRIATION: Can be arranged without difficulty.

TIME: 1 hour ahead of GMT. No change.

HOLIDAYS: New Year (1st January), no labour available; Easter Sunday, possibility of labour with overtime; Easter Monday, no labour available; Labour Day (1st May), no labour available; Ascension Day, possibility of labour with overtime; Whit Sunday, possibility of labour with overtime; Whit Monday, no labour available; National Day (14th July), no labour available; Assumption Day (15th August), no labour available; All Saints' Day (1st November), no labour available; Armistice Day (11th November), possibility of labour with overtime; Christmas Day (25th December), no labour available.

N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100% extra.

POLICE/AMBULANCE/FIRE: Police Secours 17; Commisariat Central 41.22.44; Ambulance 18; Fire Service 18.

TELEPHONES: Telephones are available at all berths at the mole, and are obligatory for vessels handling dangerous cargo.

SHORE LEAVE: Allowed, no restrictions.

GENERAL: Old harbour at La Rochelle is used only by fishing vessels and pleasure craft.

AUTHORITY: Capitainerie du Port de La Rochelle-Pallice.

AGENT: See "Paris".

LE HAVRE (Including Antifer): 49.30 N. 00.07 W.

(See Plan Book)

DOCUMENTS: At arrival in-bound bill tendered by Pilot to be filled up and signed by Master specifying ship's data and more especially open spaces occupied (shelter) and dangerous cargo on board. After berthing:

For Custom's Officers
1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

For Health Officers
1 Crew List.
1 Health Declaration.
Deratisation Certificate.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
Individual international Certificates of Vaccination.

For Custom Broker
1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Certificate of open space occupied by cargo.
1 Passengers' Manifest (disembarking).
1 Baggage Manifest (non-accompanied).
Tonnage Certificate.

For Agents
1 Crew List.
2 Passengers' Manifests (disembarking).
2 Passengers' Manifests (in transit).
2 Baggage Manifests (accompanied).
2 Baggage Manifests (unaccompanied).
2 Dangerous Cargo Manifests and usual cargo documents.

For Immigration Office
1 Crew List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

PILOTAGE: ETA to be sent to Harbour Master (see "Radio"). Advisable then to confirm directly either to Pilot boat *Francoyse de Grace* (call sign FNZH) or to "Havreport" between 24 and 12 hours before arrival (see "Radio"). Pilot boats have black hull with "Pilote Havre" in white letters on both sides, white funnel with black top stripe, green flag with white anchor on fore-mast. Located off Le Havre channel entrance East of the intermediate landfall buoy (LH). Pilot boat on continuous service, a helicopter is also available.

Vessels may anchor near lighthouse South of entry alignment in good weather and further off in bad weather.

Light or sound signal to be made by vessels requiring a Pilot, letter "G" in morse code.

ANCHORAGES: Anchoring forbidden in the channel between both parallels 100 m. South and North of channel and in a zone 1 nautical mile long and 500 m. wide in prolongation of channel.

RESTRICTIONS: Depth in main channel 51 ft. LW. Depth in tidal basin 49 ft. LW.

Main lock entrance to enclosed basins, length 1,312 ft. width 220 ft., depth 49 ft.

Vessels berthing in tidal docks (Bassin Theophile Ducrocq) dependent on tide if draft in excess of 30 ft.

Quinette de Rochemont Lock open from 2 hours 20 min. before high tide until 40 min. after. During this period vessels of max. length 210 m. and max. breadth 26 m. may pass through. Otherwise max. length authorised is reduced to 180 m. In some circumstances some locks are completely closed around low tide.

CIM Berth No. 10 may receive tankers up to 300,000 d.w.t. with draft varying between 63 and 68 ft. depending upon tide. Such vessels enter only by daylight and must arrive at Lightvessel at least 3 hours before high water.

MAX. SIZE: Tankers: length 1,300 ft., draft (approx.) 65 ft. subject tide. Largest vessel recorded is a tanker, length 370 m., beam 64 m., draft 20.67 m. and deadweight 290,875 metric tons.

Bulk Carriers: Up to 90,000 tons.

Antifer: "See Tankers."

HEALTH: Free pratique automatic for vessels coming direct from Continent or Italy and "Q" flag not to be flown. From other countries including Spain and Portugal usual applies. Free pratique may be obtained by radio message to Sanipor Le Havre specifying name of vessel – where coming from – total number of Crew members, number of Crew members vaccinated (smallpox, yellow fever, cholera).

Tankers: For tankers it is advisable to ask free pratique by radio in order start operation as soon as vessel berths.

RADIO: Masters of ships are requested to send to Le Havre Harbour Master their expected time of arrival at Le Havre lightvessel.

The message will be sent through radio stations of: Boulogne-radio/FFB (working frequencies 1771 kHz and 2747 kHz) or Brest le-Conquet radio/FFU (1806/2726 kHz).

It will give the date and time GMT of ETA, and the maximum draft. It will be sent about 12 hours before arrival and corrected by another message if necessary. This service is free. Same stations of Boulogne and Brest to be used to contact Agent and in addition Saint Lys/FFL. This ETA must be confirmed to Le Havre Port by VHF, three hours before arrival in the roads.

Port operation radio service: The Havreportradio station keeps a permanent watch on the following frequencies: 156.6 mHz (Channel 12); 156.8 mHz (Channel 16); 157.0-161.6 mHz (Channel 20 duplex). This station sends and receives all messages for the port operations control.

Ships call Havreportradio directly on Channels 12 or 20. Ships arriving, leaving or moored on roads *must keep watch on Channel 16*.

Ships with Pilot on board must keep watch on Channels 12 or 20 from Pilot on board until arrival at berth, and from departure of berth until disembarking Pilot. Havreportradio/FFY keeps watch on 2.182 kc/s. This frequency will be used only in a radius of 22 miles from Havre lightship and only when it is not possible to use VHF.

RADAR/VHF: Radar assistance may be obtained by calling Le-Havre-Radar on Channel 16 (156.80 mHz). Then working frequencies are Channels 14 and 22.

TUGS: 19 tugs available, from 650 to 4,000 h.p. Normally join vessel inside the jetties in outer harbour. Ship's lines or tug's lines used at ship's option. Extra charge for use of tug's line.

BULK HANDLING FACILITIES: *Ore Berth:* Situated South side of Mole Centrale. Accessible to 90,000 d.w.t. ore carriers. Equipment includes 4 unloading gantries, each with max. capacity 500 t.p.h.

A second ore berth (Mole Central 6) is in operation. It is accessible to ore carriers of 120,000 d.w.t. It is equipped with 2 gantries each with a maximum capacity of 1200 t.p.h.

Grain: Quai Hermann du Pasquier for ships up to 30,000 d.w.t. 3 elevators capacity each 280 t.p.h.

Quai Joannes-Coubert: for ships up to 60,000 d.w.t., 2 elevators each 600 t.p.h. capacity.

Containers: Quai de l'Atlantique: Length 800 m., 3 berths for large vessels, one of which is also equipped to handle roll-on/roll-off traffic.

4 gantry cranes of 40 ton capacity with 35 m. extension, at quay's edge. 2 French Railway's gantries for handling on to wagons. 1 7,000 sq. m. shed under construction near to terminal for container groupage and breaking bulk. 16 hectares open air areas. Extensive parking facilities.

Quai de l'Europe: Length 1,800 m. 4 berths for large vessels, 3 of which are equipped to handle roll-on/roll-off traffic.

4 gantry cranes of 40 tons with 40 m. extension, at quay's edge. 1 shed 10,108 sq. m., 1 shed of 7,023 sq. m., already used for groupage and break-bulk of containers and 1 shed of 10,000 sq. m. under construction.

2 S.N.C.F. gantry cranes for loading and unloading of wagons. 45 hectares of open air areas. Extensive parking facilities.

Quai de Bougainville: Actual length 600 m. – will be extended to 1,200 m. end 1978. Equipped with 4 gantries for containers of 40 tons.

Methane: The Gaz de France Methane Terminal situated at Western end of tidal basin with one berth for vessels up to 755 ft. length.

Roll-on/roll-off: Three berthing places in the tidal basin, five berths in the wet dock, eight berthing places in the non-tidal docks.

Liquid Chemicals: at the berths of "Societe Normandie de L'Azote", "Sogestrol", and "Petrochimie" along the "Canal Central Maritime".

BERTHING: Agents generally inform Master by radio of berthing prospects, arrival time limits and any special requirements.

BRIDGES: No special restrictions. Opened upon request. Master will be informed as above in case any bridge stopped for repairs.

STEVEDORES: 2 Normal shifts (0700-1500 hrs. and 1500-2300 hrs.) every week-day including Saturday. Night shift in overtime 2300-0700 hrs. For fruits and reefer cargo and passenger ships possible working 2 hours overtime before morning shift to start at 0500 hrs. subject ordering gang the previous day at 0600 hrs., with 23 hours notice to stevedores. Night gang ordered the same day at 1400 hrs. with 9 hours notice to stevedores (same consequently involves 36 and 12 hours notice to Agents for morning and night overtime respectively).

For vessel completing loading/discharging may order 2 hours overtime from 1500 to 1700 hrs. after morning shift or only 1 hour overtime from 2300 to 2400 hrs. after afternoon shift. No possibility of dividing the shift of 8 hours. Consequently time lost between completion of work and end of shift is charged to the vessel at the cost of about Frs. 560.00 per hour (depending upon type of cargo).

No work possible on Sunday and legal holidays nor during night between Sunday or holiday and next working day. Necessary to give Agent soonest possible accurate ETA and hatch partition in order to enable his arranging work at the best, keeping in mind that shift cannot be split.

Work done with shore crane. Ship's derricks used only exceptionally. No hatch tents available from shore.

It is compulsory to put a net under the gangway before starting work, for lack of which stevedores refuse to go on board.

MEDICAL: It is not necessary for Agent to receive advance notice of required medical attention except when Master requests a doctor on board. The Master must after berthing inform Agent of number of patients and nature of disease, name of patient, rank, in order Agent may arrange corresponding appointment with doctors, dentists, specialists, etc. Hospital facilities available provided admission ordered by local doctor.

Inoculation. Yellow fever – effected only at the hospital once per week on Thursdays 1400 to 1500 hrs. Other inoculations may be effected by local doctors (with appointment) but smallpox may also be effected at the Town Hall sanitary office on Tuesday and Saturday from 0900 to 1200 hrs.

TANKERS: Berth at C.I.M. piers No. 1 to 10. Depths 9.5 – 21.0 m. Diameter of connections at different berths of C.I.M.: No. 3, 4 and 5, 10 in.; 6 and 7, 12 in.; 8 and 10, 16 in.

Tankers calling first time at Le Havre recommended to inform Agents of position of manifold connection. Slop reception facilities available up to 1,000 t.p.h.

Antifer:

The port of Le Havre – Antifer, attached to the port of Le Havre which covers it administratively, is a port on the coast, located 4 km. South of Cape Antifer, at Saint-Jouin-Bruneval.

It is an oil terminal, designed to accommodate during a first stage vessels of 540,000 d.w.t. and of 28.5 m. draft.

The port comprises: A breakwater 3,500 m. long protecting the port in its Northern area and starting at Groin Point, 3 km. South of Cape Antifer. A manoeuvring zone. A dry-land area of 35 hectares at the foot of the cliffs intended for hydrocarbon storage and for port operation installations. A 8 hectare service port. A mooring installation with 2 positions for tankers. The oil discharged into storage tanks is pumped away to installations in Le Havre port, by means of a pipe-line of 42 in. dia. and 25 km. long.

Tides and Currents: At Antifer, the influence of the Seine estuary is much less than at Le Havre. The tidal curve is of the sinusoid type, without, however, being perfectly symmetrical. Slack water only lasts a short while (about 20 minutes). With winds from the North to East, there is a drop of about 0.25 m. to 0.50 m. increasing with the amplitude of the swell.

With winds from the South to N.W., passing through a Westerly point, there is either a slight drop (0.15 m.) or a rise corresponding to the extent of swell and sometimes reaching 0.75 m.

Tidal currents are alternating in their direction and generally parallel to the coastline. With Spring tides they reach a speed of 3 knots.

The breakwater protects the port from the action of ebb currents.

Access: Vessels coming into the Port of Le Havre-Antifer will find 35 miles from the coast landfall buoys "A0", "A1" at the limit of the 50 m. depths.

Access is as follows: *An Approach Route* of a width of 3 miles and extending from the landfall buoys "A0" and "A1" on a bearing of 118.5° for 22.7 miles.

A Waiting Area which has the approach route on its Southern edge. It has the form of a trapezium 2 miles in length. The Western commencement of the large base of this area is marked by buoy "A3". It incorporates 2 anchoring areas: the N.W. area for vessels of more than 25 m. draft, and the S.E. area for vessels of less than 25 m. draft. The 2 areas are separated by buoy "A5".

A Connecting Area trapezoidal in shape and 2.5 miles in length, connecting the approach route to the approach channel.

An Approach Channel, 1,000 m. wide, marked on its Northern edge by buoys "A8", "A12", "A14", "A16", "A18", and on its Southern edge by buoys "A7", "A9", "A17". This channel is orientated in the same direction as the approach route on a bearing of 118.5°. Buoys "A7", "A8" and "A9" form at the entry of the channel a triangle easily identifiable by radar.

An Access Channel 3.5 miles long, 700 and then 550 m. wide and on a bearing of 127.5°. It is marked by 4 pairs of buoys: "A19/A20", "A21/A22", "A23/A24", "A25/A26". Its depth is 24 m.

A Separation Area adjacent to and to the South of the access channel, allowing vessels on entering to make a half-turn to come out of the channel and then come if necessary to the waiting area. The centre of this area is marked by buoy "DA".

A Swinging Area sheltered by the main breakwater, marked to the South by buoy "A27", and to the East by buoy "A29". This area is dredged to a depth of 25 m.

The conditions of current (direction and force) and the height of the tide determine, in terms of the drafts of vessels, the periods during which the port may be entered, and which are somewhere between full and low tides.

Vessels must, therefore, on leaving the separation area, follow entry instructions given to Captains by the Pilots, with the agreement of the Port Captaincy of Havre-Antifer.

Pilotage: The Pilot is taken onboard in the waiting area in the disengagement area by means of a pilot boat, a launch or the helicopter allocated to the Le Havre pilotage service.

Port: To the N. of the swinging area, is the mooring area dredged to 26 m. allowing access to 2 alongside berths which have depths of water of 29.80 m.

The service port is reserved for the mooring of tugs, pilot boats, anti-pollution equipment (barrages) and servicing equipment.

Arrival Advice: Captains of vessels destined for Antifer, as well as those whose vessels may enter either Le Havre or Antifer, must send to the Port Commandant of Le Havre a message stating the date and time GMT of their arrival at the Antifer landfall buoys or at the Le Havre lightship and stating the draft of their vessel.

This message must be sent via a coastal station at least 12 hours in advance and confirmed by a VHF message 3 hours prior to arrival at the landfall buoys of Antifer or at the lightship. In return, the vessel will receive from the Havre Port station all information and necessary instructions.

Radio: The Antifer port captaincy (call sign HAVRE-ANTIFER) listens out permanently on the following frequencies:

156.8 mHz.	(Channel 16)	VHF
157.10 – 161.7 mHz.	(Channel 22).	

If Channel 22 is not available on board the vessel, Channel 14 (156.7 mHz) can be used after having first called up on Channel 16.

Radio communications are used for: Port operations (movements of vessels) and guiding vessels during times of fog.

Radar Assistance: During times of fog, radar assistance is supplied to vessels by the radar located on La Heve lighthouse (guidance provided by the Semaphore Lookout of Le Havre) as well as by the radar of the Oil Terminal (guiding provided by the Captaincy of Antifer). Vessels requiring radar guidance must start by requesting it on the call-up frequency (Channel 16). Only after an affirmative reply can they switch in to the connections affected by radar, taking necessary precautions (listening out in advance) not to disturb a guiding process already taking place. Assistance is given in strict rotation of requests. Information is supplied free of charge in French and in no way renders the Port Authority responsible. Such information covers the following: route clear or not, vessels anchored or under way in the vicinity, successive positions in relation to the landfall buoys, possible position of the pilot vessel, then guidance in the channel as far as the swinging area and mooring area.

Syledis: A system of aid to navigation and to manoeuvring, covering the receipt on board the vessels of parameters covering in particular the position, the speed, is in the course of being tried out. It requires the Pilot bringing on board a small transmitter/receiver.

Aids to Manoeuvring: In order to facilitate swinging manoeuvres and mooring of large tankers, the port of Antifer has 3 lights of different colours, the positions and characteristics of which are as follows:

Access guiding light (on the open storage area at the foot of the cliffs) – light with red, white, green sectors, regularly flashing (4 s.) the red sector to the North the green to the South.

Guiding lights for coming alongside (on the breakwater).

West light (position 3) – light of red, white, green sectors, regularly flashing (4 s.) – Red sector to the East, green to the West.

East light (position 2), light of red, white, green sectors, flashing twice (6 s.), red sector to the West, green to the East.

Each quay berth is equipped with aids for mooring comprising luminated panels showing the distance to the berthing point of the bow and the stern of the vessel; the speed (in cm/sec.) of approach or pulling away of the bow and stern of the vessel in relation to the berthing point.

Fresh Water/Fuel: Supplied by pipe-lines on the berth (S.H.M.PP. depot).

Cranes: 2 cranes of 2.5 tons capacity on the berth (1 per position). Berth for heavy items in the service port – handling by mobile crane.

Floating Equipment: Pontoon for transporting heavy items.

Tugs: Stationed in the service port 1 or 2 tugs of 3,600 h.p. Other tugs required for manoeuvring come from Le Havre.

Pollution: Barrages laid on pontoons in the service port can be very quickly placed into service.

General Information:

The Port Captaincy is situated on the open land area of the Service Port.

Telephone: 22.81.40 Extension 886 or 987.

Pilot's office: In the C.I.M. operational office (2nd floor).

Customs: In the C.I.M. operational building (1st floor).

Towing: The Les Abeilles Company on the pontoon in the service port.

Pilotage: In the C.I.M. operational building (1st floor).

Police: In the C.I.M. operational building (1st floor).

C.I.M. Depot: 27.21.10 – 21.21.77.

S.H.M.PP. Depot: 27.20.73.

Communications: By buses from Saint Jouin. The airport of Le Havre – Octeville is 16 kms. to the South of Antifer.

Control tower: Tel. 46.38.02.

Operating: Tel. 46.09.81.

DENSITY: In outer port and tidal docks: salt water. In inside docks brackish. Density depending upon season and amount of fresh water brought in by river Seine and Canal de Tancarville.

FRESH WATER: Most berths supply by shore hydrants. Otherwise by barge minimum quantity invoiced then being 50 c.b.m. Overtime charged in addition. Late cancellation of barge invoiced.

FUEL: All grades available, viscosities from 200 sec. to 3000 sec. Redwood. Minimum 48 hours advance notice required to prepare barges.

FIRE PRECAUTIONS: Dangerous cargo must be declared on "Inbound Bill" and in order not to delay vessel's entry it is highly recommended to inform Agent of quantity and exact nature of dangerous cargo on board 48 hours prior to arrival, thus enabling Agent to get in touch with Harbour Master and take necessary steps which may go from a single smoking prohibition up to a fire-picket on the quay during all the call.

Tankers: A "notice to Master's of ships loading/unloading hydrocarbons" is handed to Master upon arrival. This notice specifies *inter alia:* repairs, ventilation/cleaning of tanks, handling of goods subject to Harbour Master's authorisation. All naked lights and fires prohibited, boiler furnaces and galley ranges excepted, such exception cancellable on simple order of Harbour Master or Depot Manager.

DEVELOPMENTS: The new oil terminal of Havre-Antifer, built to the South of Cape Antifer has installations enabling vessels of 550,000 d.w.t. to be received at all states of the tide. Shelter will be created by a protective mole 3,520 m. in length. At the foot of the cliff, there will be a service port and open-air work areas. An access channel 550 m. wide to a depth of 25 m. will be dredged.

A second stage will see the provision of 2 further installations after further deepening of the sea to 30 m. in order to take vessels of 1,000,000 d.w.t.

GANGWAY/DECK WATCHMEN: Not compulsory. Sworn watchmen in uniform and equipped with a VHF set may be obtained from the Port Authority per hour for day and night, working days and holidays. Some other companies may also supply watchmen (not sworn) at lower prices.

OPENING/CLOSING HATCHES: May be done by stevedores at the same price as shifting of cargo depending upon the type of cargo and consequent number of men included in the gang.

It is highly recommended to carry out opening by the crew before beginning of shift to avoid both loss of time and expensive charges and also risk of accident to stevedores who are sometimes not well aware of vessel's closing system.

It is emphasised that for reefer cargo stevedores wait for cold exhaust half an hour after opening hatches before getting down in the holds. Consequently it is strongly advised to stop ventilation and start opening hatches with crew about 1 hour before beginning of shift keeping in mind that for reefer cargo, the morning shift may commence at 0500 hrs.

CERTIFICATES:

Tonnage Certificate.
Safety Construction Certificate.
Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Deratisation Certificate.
Cargo Gear Register.
(Fresh water analysis certificate may also be requested.)

CUSTOM'S ALLOWANCES: 200 cigarettes or 200 grammes tobacco plus 1 bottle spirit (must be mentioned on crew declaration list). Crew members may obtain extra allowance but only after 5–6 days' call.

CARGO GEAR: Cargo handling usually carried out by means of shore cranes. Hatch-tents to be supplied by vessel.

CREW IDENTIFICATION CARDS: Not required. Recommended to have passport or seaman book to go ashore.

CONSULS: The following countries have representatives at Le Havre:

Brazil
Colombia
Dominica
Guatemala
Italy
Portugal
Sweden
Germany
Mexico
Great Britain
Ecuador
Venezuela
Haiti
Netherlands
Argentina
Switzerland
South Africa
Panama
Denmark
Belgium
Norway
Greece
Honduras
Peru
Salvador
Uruguay
Chile
Costa Rica
Ivory Coast
Spain
Finland
Japan
Liberia
Madagascar

REPAIRS: Several companies including Ateliers et Chantiers du Havre available to handle all types of hull and engine repairs. 5 berths available for repairs afloat.

DRY DOCKS: 7 dry docks available, largest of which is 1,095 ft. working length and 125 ft. width for vessels up to 80,000 d.w.t.

REPATRIATION: Except if airplane chartered by Owners, all crew have to pass through Paris.

AIRPORT: Le Havre airport 7 km. from the centre of the town, with a runway of 1800 m. × 40 may receive chartered planes up to 40 tons total weight (50 T. with special authorisation). Regular flights from and to Orly (Paris Airport) twice a day, holidays excepted.

TIME: GMT plus 1 hour from 26th September to 28th March and GMT plus 2 hours 28th March to 26th September.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Holiday (July 14th); Assumption B.V. Mary (August 15th); All Saint's Day (November 1st); Armistice Day (November 11th); Christmas Day (December 25th). No work possible except for passenger ships and tankers the latter being loaded/discharged round the clock every day.

POLICE/FIRE/AMBULANCE: Police 17 or 48.15.20; Fire Brigade 48.05.77 or 18; Ambulance 42.30.68 or 42.46.46; Hospital 42.77.83.

TELEPHONE ON BOARD: Possible at most berths.

SHORE LEAVE: Authorised within port and town area. Foreign seamen wishing to go further and more especially to Paris must obtain police authorisation and consequent pass.

REGULATIONS: Vessels carrying dangerous cargo must when on roads or in the entrance channel, show the red flag by daylight or 1 red light by night-time. When leaving the port they must keep their Pilot up to the end of the channel.

AUTHORITY: Port of Le Havre Authority.

AGENT: Jolasry (France), 45 rue Lord Kitchener, PO Box 846, 76060 – Le Havre. Telegraphic address "Jolasry". Tel. 42.18.32 and 42.12.05. Telex 19708.

LORIENT: 47.45 N. 03.21 W.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for all vessels over 60 m. length. Vessels must contact pilot station advising ETA at least 6 hours before arrival by radio to the pilot station. On arrival at the outer roads or Groix vessels should call Pilot by VHF Channel 16. The pilot launch will be standing by from 1 hour before to 1 hour after the ETA previously advised by the ship. The pilot station is manned 24 hours per day. Pilot station telephone number 210678.

ANCHORAGE: The outer roads of the port are open to winds from the Southeast to Southwest. Vessels waiting to enter the port may anchor in depths of 15–20 m., sand and shell bottom, good holding ground.

Mooring buoys are positioned off Port Tudy on the North coast of Ile de Groix. These buoys are reserved for the use of the French Navy. There are prohibited zones for anchoring due to presence of submarine cables, marked on chart.

RESTRICTIONS There are 2 entry channels to the port. The South channel, depth 3.6 m. is used exclusively by local fishing boats. The West channel is marked by the alignment of Kerbel Light and Lohic Light. The depth in this channel is 6.25 m. Both channels are very well marked.

Traffic signals are hoisted at Port Louis Citadel as follows: Red flag or red light – entry prohibited. Green flag or green light – exit prohibited. Red over green flags or lights – port closed.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessels should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Use local station Radio Conquet or Radio Saint-Nazaire.

TUGS: 2 tugs up to 700 h.p. – 3 tugs up to 200 h.p. They belong to the French Navy.

BERTHING: Kergroise Quays, 568 m. berthing length can accommodate vessel up to 220 m. length, draft 7.50 m. at the Northern part of the quays. Draft 7.2 m. at the Southern part of the Quays. Quays are being dredged to a projected draft of 9.0 m. in the Northern part.

7 cranes in service including 16-ton crane.

TANKERS: The oil jetty is 112 m. long and can accommodate tankers up to 180 m. length, max. draft 10 m.

FRESH WATER: Can be supplied from the quays at Kergroise and at the Oil Jetty. Rate 10 t.p.h.

REPAIRS: Minor deck and engine repairs can be carried out. Slipways can accommodate 4 fishing boats at the same time. There are 3 dry docks the largest of which is 186.20 m. long×26.33 m. wide.

MEDICAL: All facilities available. Local maritime and civil hospitals.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

CONSULS: Norway, Denmark, Netherlands and Sweden.

TIME: GMT plus 1 hour – no alterations.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May no labour available);

Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July no labour available); Assumption Day (15th August no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police 21 19 16; First Aid 17; Ambulance (97) 65.33.44; Fire 18.

AUTHORITY: Ingenieur des Travaux Publics de l'Etat, Ponts et Chaussees.

AGENT: See "Paris".

MARSEILLES: 43.18 N. 05.25 E. (See Plan Book)

(a) Old Port to Estaque *(b)* Port de Bouc/Lavera/Caronte/Etang-de-Berre *(c)* Fos

(a) OLD PORT TO ESTAQUE

DOCUMENTS:
- Ships Register.
- Declaration of Health.
- 3 Crew Lists.
- 2 Provisions Lists.
- 2 Lists of Passengers in Transit.
- 2 Lists of Passengers disembarking.
- 1 List of Ports where cargo is loaded for Marseilles.
- Cargo Manifests and Bills of lading.
- 1 List of Crew Personal Effects.

PILOTAGE: *Arrival:* Contact port authority by VHF on Channel 16, changing to Channel 12. M.W. Station, call on 2049 kHz. Station on 1933 kHz. ("Marseille Port") Compulsory. 21 pilot launches, mostly painted black, wooden hulls with white anchor insignia on the bow.

Contact pilot station and pilot boats by VHF Channel 8.

Southern Entrance: Pilot boards between "Le Frioul" and "Chateau d'If" island. Max. recommended draft 27 ft. in good weather.

Northern Entrance: Pilot boards at Estaque roads. In case of strong N.W. winds or for all deeper draft vessels the Northern entrance is preferred.

Vessels anchoring in roads without a Pilot will still incur full pilotage fee.

On departure, 15 to 30 minutes notice sufficient to order Pilot and tugs.

ANCHORAGE: Estaque Roads.

MAX. SIZE: Draft dependent on berth depth up to max. of 47 ft. 6 in.

HEALTH: Free pratique automatic vessels coming direct from continent or Italy and Q flag not to be flown. From other countries – including Spain and Portugal – usual procedure applies. Unless special arrangement for passenger liners free pratique not given by radio also practice issuing Health or Custom clearance on sailing now discontinued.

RADIO: Within 150 miles Marseilles Radio/FFM – otherwise St. Lys/FFL.

VHF: Port Authority on Channel 16, 6, 12 and 30.

TUGS: About 40 tugs available, from 250 to over 3,000 h.p. Ship's lines normally used.

BERTHING: When specific side alongside berth required. Agents radio Master prior arrival also advise Pilot. Otherwise side alongside at discretion Master after conferring with Pilot.

CRANES: Quayside cranes, including mobile cranes.

44 cranes – 3-5 tonne capacity.
87 cranes – 6 tonne capacity (4 of which are mobile).
14 cranes – 6-12 tonne capacity (8 of which are mobile)
4 cranes – 12 tonne capacity (1 of which is mobile).
1 cranes – 35 tonne capacity (mobile).

13 drydock cranes, largest has a lifting capacity of 50 tonnes. 2 floating cranes for public use, owned by the Port Authority, capacities 90 tonnes and 150 tonnes. Their are also 3 privately owned floating cranes, largest has a capacity of 70 tonnes.

BULK HANDLING FACILITIES: Cereals.

Pinede Dock: Berth No. 30. Storage: The Madrague Silo, owned by the Societe Fonciere et Commerciale du Silo de la Madrague, has a capacity of 30,000 tonnes in 143 cells. The Silo is connected to the berth by 420 m. (1,378 ft.) of covered conveyors. The silo is outside the port area.

Grande Joliette Dock: Berths No. 69 and 70. Storage: The silo, owned by the Marseilles Port Authority, is within the port area and has a capacity of 22,000 tonnes in 99 cells. it is equipped with 4 covered conveyors, 2 of which are reversible, thus allowing the export of cereals from the silo.

There is also a bulk warehouse here, within the port area and owned by the Port of Marseilles Authority, which has a total capacity of 14,000 tonnes, made up of 3 cells of 2,500 tonnes and 4 cells of 1,600 tonnes. The warehouse is connected to the silo at Arenc – which belongs to the port – by suction devices and conveyor belts.

Grain, Copra:

National Dock: Berth No. 43. Storage: Shed 6B has a capacity of between 12,000 and 18,000 tonnes for types of grain, on the first floor, and 6,000 tonnes on the ground floor. This shed is on the quayside.

Minerals in Bulk:

National Dock: Berths: No. 47 and 48. Specifically for bulk traffic, handled by bucket-cranes. Storage: 4,000 sq. m. (43,040 sq. ft.) in the open, beside the East Quay.

President Wilson Dock: Berth No. 14. Allocated specifically for Alumina. Storage: 2 silos, with a total capacity of 11,000 tonnes, constructed by and belonging to Pechiney Cie. and Ugine Cie., to facilitate the import/export of dehydrated alumina in bulk.

Leon-Gourret Dock: Berth No. 8. Allocated specifically for bulk traffic that can be handled by grab-bucket. Storage: An open area of 4,000 sq. m. (43,040 sq. ft.) at the quayside; suitable for import/export.

Liquids in Bulk:

Mourepiane Depot: Berth No. 156. For vegetable oils and chemicals. Storage: The private company, Marseille Vrac, which operates this depot, has 32 vats of 125 to 1,640 cu. m. (4,412 to 57,892 cu. ft.), with a total capacity of 24,500 cu. m. (864,850 cu. ft.). There are pipelines to the quay for discharging tankers.

Import and Export: The major import is vegetable oil; export is chemical products in bulk.

Sugar:

President Wilson Dock: Berths No. 19 and 20. Storage: The silo, which has a capacity of 30,000 cu. m. (1,059,000 cu. ft.) is within the port area and is owned by the Port of Marseilles Authority. Sugar is discharged by bucket-crane into hoppers which feed the conveyor belts to the silo. The total conveyor capacity is 250 tonnes per hour.

BRIDGES: Turning bridge near Southern end of port – Pont d'Arenc – opens on requests. Bridge further North – Pont de la Pinede – opens: 0600 to 2200 hrs. twice each hour between 5 minutes before the hour and 5 minutes afterwards, and between 5 minutes before half hour and 5 minutes afterwards. Open continuously 2200 to 0600 hrs.

STEVEDORES: Enable Agent order gangs important obtain in good time accurate ETA from vessels. Latest times to order gangs; normal and deferred shifts 0530 hrs. same morning – night shift 1600 hrs. same day – Saturday and Sunday, 1600 hrs. Friday. Failure give precise ETA may result in ship losing 12/24 hours also cost gang waiting time includes waiting vessel's arrival – free pratique – opening/closing hatches – rain – shifting cargo or dunnage – crane or derrick break-downs – time lost between finishing and end of shift. Work can be arranged on following official holidays – New Year's Day, Easter and Easter Monday, Whitsun, 14th July, 15th August, 1st November, Christmas Day, 1st May holiday when no work takes place, Stevedoring hours (normal shift) Monday to Saturday, 0630–1310 hrs. and 1320–2000 hrs. (Two shifts). Sunday, 0630–1310 hrs., if required one shift 0800–1130 hrs. and 1300–1620 hrs. Night work if required 2200–0400 hrs. One hour overtime may be worked before 0630 or after 0730 hrs. No work allowed Sunday night. All necessary gear supplied by stevedores except rain tents which vessel must supply.

MEDICAL: Yellow fever inoculations only in hospital. Tuesdays and Friday. Masters to advise by radio prior arrival if medical attendance required aboard.

TANKERS: See "Port de Bouc" and "Fos".

DENSITY: About 1028.

FRESH WATER: Can be obtained from hydrants or quays or from water-boats. When delivered by barge, min. quantity invoiced is 50 tons. Preferable order prior arrival to avoid delays. Min. pumping rate 50 t.p.h.

FUEL: Ordinary fuel, also fuel oil max. 1000 secs., Diesel and Gas oil. Deliveries by barge only.

FIRE PRECAUTIONS: Special harbour fire-fighting corps, with two fire-fighting Vessels.

DEVELOPMENTS: See "Fos".

WATCHMEN: Available but not compulsory.

HATCHES: Crew allowed open and close.

SHIP CERTIFICATES: On first call Registered Tonnage Certificate; thereafter not required unless Gross/Net tonnages changed.

CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.

CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented in Marseilles:

Algeria
Argentina
Austria
Belgium
Bolivia
Brazil
Canada
Colombia
Costa Rica
Cuba
Cyprus
Denmark
Dominica
Ecuador
Egypt
Finland
Great Britain
Greece
Guatemala
Haiti
Honduras
Iceland
Israel
Italy
Ivory coast
Japan
Lebanon
Liberia
Madagascar
Mauritania
Mexico
Morocco
Netherlands
Nicaragua
Norway
Panama
Peru
Philippines
Portugal
Senegal
Spain
Sweden
Switzerland
Thailand
Tunisia
Turkey
U.S.A.
U.S.S.R.
Uruguay
Venezuela
West Germany
Yugoslavia

REPAIRS: Most repairs and overhauls possible. Pre-advice recommended.

DRY DOCKS:	*Working lengths*	*Entry width*
No. 1	561 ft.	63 ft. 3 in.
2	441 ft. 6 in.	56 ft. 8 in.
3	326 ft.	51 ft.
4	262 ft. 8 in.	44 ft.

6	410 ft.	50 ft. 8 in.
7	656 ft.	80 ft. 8 in.
8	1,049 ft. 7 in.	164 ft.
9	820 ft. 6 in.	121 ft. 3 in.
10	1,525 ft.	276 ft. 11 in.

Depth 9.50 m. (31 ft. 2 in.)

POLICE/FIRE/AMBULANCE: Police 91 90 40; Ambulance 17; Fire Brigade 18; Special Port Fire Brigade 50 36 70 and 62 36 58.
GAS FREEING STATION: Suitable for tankers up to 28 ft. draft.
The Station is equipped with:

Boilers able to supply 34 tons of steam per hour.

A pumping station supplying hot water for cleaning, fresh water for ballast, and which is also used for transfers.

A separator for the discharge of dirty ballast able to work at 1,200 cu.m. per hour.

Two receiving tanks of 2,000 cu.m.

One tank of 500 cu.m. for treatment and 1 for subsequent storage with a capacity of 2,000 cu.m.

One extractor for removal of all traces of oil including sludge.

The Station can supply all the necessary fluids for cleaning and gas freeing (salt water, hot and cold water, fresh water, compressed air and electric current.)

From the vessels the installation receives dirty ballast and water which goes through separators.
AUTHORITY: Le Port Autonome de Marseille.

AGENTS: Jolasry (France), 6 Boulevard de Dunkerque. Tel. 91.90.86. Telex. 440821. Cables: Jolasry.

(b) PORT DE BOUC, including Port de Lavera 43.23 N. 05.00 E., Port de Berre 43.27 N. 05.10 E., Port de la Mede 43.24 N. 05.07 E. Caronte 43.24 N. 05.02 E.

DOCUMENTS: On arrival:
1 Cargo Manifest or manifest in ballast.
Certificate of open spaces occupied by cargo in cu. ft. or cu. m. or in registered form if shelter deck.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or U.S.S.R. ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Deratisation Certificate.
Bunker's Supply (3 forms).
1 Crew Declaration of Personal effects – cameras, binoculars, radios, cigarettes, tobacco, etc. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Call "Port de Bouc Control" on Channel 16. Channel 12 for traffic. Pilot must be taken to enter Port de Bouc, Fos and Port St. Louis du Rhone. Contact by Marseilles Radio or pilot boat VHF (Channel 16 for calling, Channel 14 for traffic). Pilot boards in the Roads between 2 and 2.5 miles S.W. of Bouc Tower or further out if required, for entering Port de Bouc and Fos. Motor launch black hull, white cabin, white anchor on bow, "H" flag.
ANCHORAGE: It is recommended to ask for Pilot before anchoring in outer Roads to avoid forbidden places for ships bound for Port de Bouc and Fos.
RESTRICTIONS: No entry restrictions for Lavera. Night transit of Caronte Canal to Etang de Berre forbidden to tankers above 6,000 g.r.t. Transit of Caronte Canal to Etang de Berre is forbidden for vessels over 180 m. (598 ft.) overall and over 24 ft. draft.
MAX. SIZE: (Coastal berths not included).

Lavera: *Berth*	*Max. draft*	*Max. LOA*
A4	36 ft. 09 in.	700 ft.

W	24 ft.	575 ft.
Berre:		
A	24 ft.	590 ft.
B	24 ft.	590 ft.
Salins	24 ft.	577 ft.

HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease on board, notify Agents by radio before arrival.
RADIO: Within 150 miles traffic through Marseille Radio/FFM, otherwise St. Lys (FFL).

Port de Bouc Radio (Harbour Office) VHF used for navigation purposes only – Channel 16 for call, Channel 12 for traffic.
TUGS: Eleven tugs available from 90 to 1,800 h.p. Normally join vessel in entrance channel off Port de Bouc. Only ship's lines used.
BERTHING: Lavera: 9 berths for ocean going ships in 4 docks. Length varying between 210 m. (689 ft.) and 325 m. (1,066 ft.). Dredged depth varying between −12.00 m. (39.36 ft.) and −13.50 m. (44.28 ft.). 8 berths for coasters and barges. Length varying between 210 m. (689 ft.) and 325 m. (1,066 ft.). Dredged depth varying between −4.00 m. (13.12 ft.) and −7.00 m. (22.97 ft.).

2×12 tonnes publicly-owned mobile cranes. Lavera harbour has been specifically designed to handle refinery products and the discharge of oil tankers.

Each berth has flexible pipe connections, with articulated metal arms, supported by special cranes. The type of pipework depends on the product handled (crude or refined) and is connected to the storage tanks of:—

C.F.R.
Esso and C.R.S.F.
S.F.P. Refinery – B.P. at Lavera
The maritime terminal of S.P.L.S.E., which supplies the Esso Refinery at Fos.

Berth H has been designed to handle the loading and unloading of propane and chemical products.
Port-de-Bouc:
Leque Quay (for tugs). Length 80 m. (262 ft.). Dredged depth – 6.00 m. (19.68 ft.).
Somecina Quay (for agglomerates). Length 300 m. (984 ft.). Dredged depth – 6.00 m. (19.68 ft.). 1×6-tonne crane.
Caronte: This harbour specialises in the import/export of phosphates, and is operated by a private company, the Et. Maritime de Caronte (E.M.C.).
Caronte Quay: (specifically for loading barges) – 5 berths: Length 650 m. (1,804 ft.). Dredged depth – 9.00 m. (29.52 ft.). 2×15-tonne gantry cranes; 3 tilting platforms; 2×5-tonne cranes; 3×8-tonne cranes; 2×12-tonne cranes. Warehouse for phosphates: capacity 32,000 tons. Open storage area of 12 ha. (29.64 acres).
Verminck Quay: Length 153 m. (502 ft.). Dredged depth – 8.00 m. (26.24 ft.).
Kuhlmann Quay: Length 140 m. (459 ft.). Dredged depth – 8.00 m. (26.24 ft.). 1×6.5-tonne crane, having a reach of 18.5 m. (60.7 ft.) Sheds with a capacity of 4,000 tonnes; open storage on the quay of 4,000 sq. m. (43,040 sq. ft.).
Etang de Berre:
Port of La Mede: This port is owned and operated by Cie. Francaise de Raffinage (C.F.R.). 2 berths for ocean-going ships. Dredged depth −8.00 m. (26.25 ft.). A berth of 50 m. (164 ft.) in the Etang de Berre, some distance from the shore, is suitable for mooring 2 ships. The total available length for mooring in this harbour is 240 m. (787 ft.). 2 berths for coasters: Dredged depth: −3.50 m. and −6.00 m. (11.48 ft. and 19.68 ft.). 2 berths for barges: Dredged depth −2.30 m. (7.54 ft.).

The berths are connected to the storage tanks of the Cie. Francaise de Raffinage (C.F.R.) by pipelines, of various diameters, laid under water.

The storage tank capacity of the refinery of the Cie. Francaise de Raffinage is 2,256,000 cu.m. (79,636,800 cu.ft.).
Port of La Pointe de Berre: This port is owned and operated by Cie. Shell Berre. 3 berths for ocean-going ships: 2 berths with a length 150 m. (492 ft.) Dredged depth −8.50 m. (27.83 ft.). 1 berth with a length 130 m. (426 ft.). Dredged depth −8.50 m. (27.83 ft.). 1 berth for coasters: Dredged depth −4.80 m. (15.74 ft.). 1 berth for barges: Dredged depth −3.80 m. (12.50 ft.).

Capacity of the depot at the Port of Pointe de Berre is 171,000 cu.m. (6,036,000 cu.ft.). Capacity of the storage Shell refinery is 2,084,000 cu.m. (73,565,200 cu.ft.). Total storage capacity at Berre=2,255,000 cu.m. (79,601,500 cu.ft.).

The berths are connected to the storage tanks of the Cie. de Raffinage Shell Francaise S.A. by pipelines, specifically designed for the products they handle.
BRIDGES: 1 railway bridge and 1 road bridge across Caronte Canal each having special times for opening. Ships of less than 21 m. height clearance may pass below the railway bridge. Motorway bridge over Caronte Canal with 44.60 m. clearance.
STEVEDORES: To enable Agent order gangs important obtain accurate ETA between 24 hours and 48 hours in advance. 2 shifts 0500 to 1300 hrs. and 1300 to 2100 hrs. normally 6 days a week. Confirmation to be made at 0900 hrs. for afternoon shift, and 1700 hrs. for next day morning.
MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio prior arrival if medical attendance is required on board.
TANKERS: Each of the large berths, North and South, A, B, C, D, E, F, G, is fitted with lines for crude oil and all refined products. Pipeline system leads to distributors (7 for refined products, 2 for crude oil) connected to neighbouring refineries, and to South European pipe-line (crude oil only).

Terminal hose handling: Each berth is fitted with metal gantries hanging up flexible hoses for ship's connection. They are handled with compressed-air winches and ship's boom which should be rigged before arrival.

Flexible hoses diameter: crude oil, four 12-in.; fuel oil (or crude), two 12-in.; white products, one 8-in.; ballast (or crude), one 12-in.; bunkers, one 8-in.; liquefied gas, one 4-in.; special products, one 4-in.

Deballasting installation: Tankers may pump out their ballast at all berths – except tank-washing water and slops.

Also see "Berthing".
DENSITY: About 1028. Variable in Canal de Caronte and Etang de Berre owing to discharge of hydraulic plant of St. Chamas.
FRESH WATER: Available generally by pipes and hoses at the berths. Water barges available from Marseille.
FUEL: By barges for cargo ships and vessels in the Roads. Tankers at Lavera refuel by pipe-line at the berths. All grades available.
FIRE PRECAUTIONS: Oil Harbour is fitted with a system of 203 mm. (8 in.) or 254 mm. (10 in.) sea water pipes at 5 bars permanent pressure. It may be increased by pumping station up to 9 bars, and supply 500 cu. m./h. Each wharf has 5 fire hydrants with first-aid equipment: fire hoses and spray nozzle, foam nozzle with powder

cans. If fire breaks out on a ship, the hose handling gantries are protected by a screen of sprayed water. All fire equipment and installation are painted red.

There is a special fire-fighting Corps with fire vessel. Call for firemen 06.21.29 or 26.28.37. In case of fire call Port de Bouc Control – phone 05.22.25 or 06.63.39 or VHF Channel 16.

GANGWAY/DECK WATCHMEN: Available but not essential.

OPENING/CLOSING HATCHES: Always by crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days; wine/spirit: limited amount per man.

IDENTIFICATION CARDS: Seamen going ashore should carry passport or identity card.

CONSULS: Norwegian, Swedish, Danish and Spanish consuls at Port de Bouc. Others at Marseille.

REPAIRS: Permission must be granted by Port de Bouc Harbour Master only.

DRY DOCKS: Nearest at Marseille.

REPATRIATION: All facilities for crew change and repatriation by railway or planes.

AIRPORT: Marignane Airport 40 km. and Nice Airport 230 km. (this last for SAS lines).

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Same as "Marseille".

POLICE/AMBULANCE/FIRE: Police, 06.23.74 or 07.03.31; Fire, 06.21.29 or 06.28.37.

TELEPHONE: On application can be connected on board at Lavera. Telephone ashore in other places.

SHORE LEAVE: Allowed.

AUTHORITIES: Port Autonome de Marseille (Director General and Managers). Capitainerie de Port de Bouc (Harbour Master).

(c) FOS: 43.24 N. 04.53 E.

DOCUMENTS:

- 1 Cargo Manifest or Manifest in Ballast.
- Certificate of open spaces occupied by cargo in cubic feet or cubic metres, or in registered form if shelter deck.
- Bill of Lading.
- Ship's Register (if required).
- 6 Crew Lists (8 if Spanish or U.S.S.R. ship or ship bound for these countries).
- 3 Passenger Lists.
- Health Declaration.
- Deratisation Certificate.
- 3 Bunker Supply Forms.
- Declaration of crew personal effects, cameras, binoculars, radios, cigarettes, tobacco, etc.

If on inspection, articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Compulsory. Contact by Marseilles radio or direct to Pilot boat by VHF Channel 16 for calling, Channel 9 for traffic. Pilot boards in the roads between 2 and 2.5 miles S.W. of Bouc tower or farther out if required. Motor launch, black hull, white cabin, white anchor on bow, flying "H" flag.

Port de Bouc Port Control, call on Channel 16, Channel 12 for traffic. Pilot boat on Channel 16 for calling and Channel 14 for traffic.

ANCHORAGE: It is recommended to ask for Pilot before anchoring in outer roads to avoid prohibited anchorages.

RESTRICTIONS: When large tankers are proceeding in the Fos channel, other vessels' entrance may be delayed.

Access channel for very large vessels dredged to 22 m. over a width of 250 m.

MAX. SIZE:

The depth of the access channel is 78 ft. 08 in.

Tankers:

Berth	Max. draft
0	42 ft.
0 Bis	42 ft.
1	67 ft. 05 in.
2	62 ft.
3	73 ft.
4	Not yet in service.

Bulk Carriers:

Berth at Dock No. 1	Max. draft 49 ft.
Solmer (Private Quay)	Max. draft 61 ft.
Solmer (Export Quay)	Max. draft 39 ft.

LNG:

Gaz de France	Max. draft 31 ft. 01 in.

Container:

Container berth at Dock No. 2	Max. draft 42 ft. 06 in.

HEALTH: Pratique given by customs officers who board on arrival. In case of suspected disease on board, notify Agent by radio before arrival.

RADIO: Within 150 miles, traffic should be routed through Marseilles radio, FFM, otherwise via St. Lys. FFL.

VHF: Channel 16 for calling. Channel 12 for traffic and Channel 14 for pilot.

TUGS: Tugs normally join vessel in the entrance channel. Ship's lines are used.

GENERAL CARGO FACILITIES: (Heavy loads, cars, etc.)

Dock No. 1: One berth, length 250 m. (820 ft.); Depth alongside 14.00 m. One 3-6 tonne gantry crane. Roll-on/Roll-off berth under construction at Dock No. 3.

BULK HANDLING FACILITIES: Heavy bulk products:

Ore Quay (owned by the Port of Marseille Authority)

On Dock 1:

1 berth for ships up to 100,000 d.w.t. Length 900 ft. Dredged depth 16.00 m. (52.48 ft.)

2 20-tonne gantry cranes with a reach of 25 m. (82 ft.) with a capacity of 800 tonnes/hour. 1 fixed conveyor-transporter, with a length of 350 m. (1,148 ft.), the belts of which can move in either direction.

7 conveyor-transporters, with an individual length of 25 m. (82 ft.) which feed the mobile stock-piler.

Open storage area of 15 ha. (37.05 acres). Holding area for cargo in transit of 10,000 sq. m. (107,600 sq. ft.).

Ore Quay (Solmer)

On Dock 1:

2 berths for ships up to 180,000 d.w.t. Length 2,116 ft. Dredged depth 20.00 m. (65.6 ft.)

2 gantry cranes of 40 tonnes capacity. Conveyors which have a maximum discharge capacity of 2,000 tonne/hr. for minerals and 1,500 tonne/hr. for coal.

Storage area for ore, coal, limestone, scrap: 800,000 tonnes.

Finished Products:

South Dock (Solmer)

2 berths for the export of finished products. Length 420 m. (1,348 ft.). Dredged depth 42 ft. 06 in.

2×12 tonne travelling cranes.

3 sheds (sea, road and rail) with a capacity of 15 to 18,000 tonnes.

LNG Facilities:

At Dock No. 1. (Owned by Gaz de France).

Length available for berthing 328 ft. Depth alongside 39 ft. 06 in.

2 storage tanks, for LNG in the liquid phase (−160° C.), each with a capacity of 35,000 cu. m. (1,235,500 cu. ft.).

The pumps on the LNG Carrier discharge through articulated pipes of 300 mm. diameter (11.8 in.), 3 are specifically for discharge; one is to return the methane, in the vapour phase to the carrier.

After warming up from the liquid phase, with the addition of nitrogen to conform with the value in the French Gas Grid, the gas, in the vapour phase, is despatched by pipeline to the underground storage at Tersanne, 214 km. from Fos (134 miles), and to Marseilles and the Cote d'Azur.

CONTAINER HANDLING FACILITIES: *Dock No. 2:* Length 3,000 ft. Depth alongside 46 ft.

4×40 tonne gantry cranes, specially designed to transport 20 ft., 35 ft. and 40 ft. containers, each having a capacity of 20 to 30 containers per hour.

2×40 tonne gantry cranes – SNCF owned for wagon loading.

Terminal operators equipment includes: Sideloaders, carrytainers and straddle-carriers.

Open storage area of 16 ha. (39.5 acres). Servicing zone of 3 ha. (7.4 acres).

TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipe-line. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.

Berth	*Length of Quay*	*Depth Alongside*
0	295 ft.	42 ft. 07 in.
0 Bis	295 ft.	42 ft. 07 in.
1	791 ft.	70 ft. 05 in.
2	443 ft.	64 ft. 07 in.
3	791 ft.	77 ft. 01 in.
4	492 ft.	55 ft. 08 in. (Not in service)

FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 05 04 40.

FRESH WATER: Available by pipe-line at all berths.

FUEL: Available by barge only.

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.

REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.

CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.

AIRPORT: Marseilles/Marignane Airport about 60 km. distance.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: On application, telephones can be connected on board.

AUTHORITY: Le Port Autonome de Marseilles. Capitainerie de Port de Bouc (Harbour Master).

NANTES: 47.14 N. 01.34 W., inc. Donges 47.18 N. 02.04 W. and Montoir 47.18 N. 02.08 W.

(See Plan Book)

DOCUMENTS: See "St. Nazaire".

PILOTAGE: Compulsory for vessels over 225 ft. length on river Loire. Starts about 4 miles North of lighthouse of Le Pillier, on lightbuoy SN 3. Pilot boat on station day and night, if weather conditions permit, West of a line drawn between SN 3 lightbuoy and lightbuoy of "La Couronnee" about 2 miles N.N.E. If Pilot unable to come aboard, he may invite ship to follow his boat until they have reached a better shelter. Ships heading for one of Loire estuary ports should give ETA at least 24 hours ahead to Port Captain of Saint-Nazaire. Approximate time of arrival at SN 3 buoy, the further destination and speed should be given. VHF contact can be made direct with St. Nazaire Pilot boat or "Estuaire de la Loire" Pilot station.

ANCHORAGE: When Pilot service withdrawn, anchor near SN 3 lightbuoy or in "Rade des Charpentiers". In rough sea ships heave to off harbour. In case of doubt contact pilot boat by VHF or phone. Sometimes Pilot taken aboard on SN 3 is relayed by another who will board near the outer port of Saint-Nazaire to bring ship upstream. It is not allowed to moor before and below quay Emile Cormerais and Chevire Power Station Embankment (cables).

MAX. SIZE: Nantes: max. length 600 ft., breadth not limited, draft 29 ft. 4 in.

Donges: max. length 760 ft., breadth 116 ft., draft 41 ft. 8 in.

RADIO: Stations at: Saint-Nazaire; Brest-le Conquet and Bordeaux; Arcachon.

RADAR/VHF: Radar, none. VHF, Donges Port Operations Network—European frequencies.

TUGS: Nantes: 3 "Abeille" tugs 500 to 700 cv. Donges and St. Nazaire: Tugs are provided by "Union des Remorqueurs de l'Ocean" at Saint-Nazaire (2,000 h.p.); also "Les Abeilles".

BERTHING: Nantes: Vessels may be moored with bow facing up or downstream. During heavy flood periods, however, bow to face upstream. Donges: Mooring of vessels to the docks No. 0, 1, 2, 3 is performed with ship's ropes. On docks No. 4, 5 and 6, Port Authority use own steel cables to which ship is fastened in supplement to her own ropes.

Montoir: Port Authority use own steel cables to supplement ship's ropes.

BRIDGES: The first bridge on the estuary is upstream of Nantes.

STEVEDORES: Available.

MEDICAL: Facilities available at any time.

BULK CARGO FACILITIES: Between St. Nazaire, Donges and Montoir, berths equipped to handle bulk carriers up to 40,000 tons, subject to channel draft.

TANKERS: Channel to Donges 41 ft. 8 in. Depths, Berth 0 and 1 less than 18 ft.; Berth 2, 21 to 24 ft; Berth 3, 28 to 31 ft.; Berth 4, 32 to 39 ft.; Berth 5 over 39 ft.; Berth 6 over 40 ft. Pipes: according to the berths and products, diameters from 100 m/m to over 850 m/m (crude — Berths 4, 5 and 6).

Berth No. 6 can accommodate tankers up to 200,000 d.w.t., part loaded subject to channel draft.

Donges: Berths Nos. 5 & 6: To reduce the time of mooring a special mooring gang can be put at Master's disposal for arrival and departure. Arrangements must be made 48 hours in advance of this service. Permanent watch on VHF Channel 16 is recommended.

Crude connections: No. 5 Berth 1×12 in. Chicksan arm, 12 holes type 150 pounds. No. 6 Berth 5×12 in. Chicksan arms, 12 holes type 150 pounds. Reducers available, notice required prior to arrival.

Bunkering Lines: No. 5 Berth 8 in. Chicksan arm with 6 in. connection. No. 6 Berth, 6 in., 8 in. or 12 in.

Drinking water available at both berths.

Telephone: Placed aboard as soon as vessel berths. The vessel is connected both to the Post Office and Elf France Refinery. No. 5 Berth – Tel. No. 45.71.99. No. 6 Berth – Tel. No. 45.70.79.

Mobile crane available for hire for loading stores, provisions and spares. Request to be made upon arrival by Agent to Harbour Master or Port Authority Workshop.

There is a Seaman's Club at No. 4 Berth for crew and families, equipped with restrooms and accommodation.

FRESH WATER: Available on docks in Donges, Montoir, Saint-Nazaire and Nantes.

FUEL: Available in any grade or viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.

FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries; no fire, no smoking. Ground wire for ship.

DEVELOPMENTS: A terminal for the reception of the largest liquified gas – carriers in the world (125,000 cu.m.) is foreseen at the Port of Montoir. Later a terminal for containers will complete these facilities.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Done by crew.

IDENTIFICATION CARDS: Not needed.

REPAIRS: Very good facilities exist for all types repair work.

DRY DOCKS: Dry docks at Nantes for vessels under 4,500 tons.

AIRPORT: Good connections with French internal network (Air Inter) and also international mainly with stop-over in Paris. 4 daily flights to the capital. Direct flights to Bordeaux, Lyon, Toulouse, Brest, Le Havre, Lille, Laval, Limoges, Clermont-Ferrand, London, Geneva, Frankfurt.

TIME: Paris time GMT plus 1 hour; seasonal alteration.

HOLIDAYS: Most firms close in August. National Days: May 1, July 14, August 15, Nov. 11

POLICE/AMBULANCE/FIRE: Nantes and St. Nazaire: Police 17; Ambulance 18; Fire 18.

TELEPHONE ON BOARD: Arrangements are possible.

SHORE LEAVE: No restriction.

AUTHORITY: Port Autonome de Nantes-St. Nazaire.

AGENT: See "St. Nazaire".

NICE: 43.42 N. 07.17 E. (See Plan Book)

DOCUMENTS: Master required make declaration of entry at Port Office, Harbour Master's Office, Quai Entrecosteaux, where he must present to Authority (Commissariat du Port) Crew List and Passenger List. If coming from foreign port he is also required to furnish a Customs Declaration.

PILOTAGE: Compulsory for Nice-Villefranche Station and applies to ships of more than 50 m. length. Pilot station extends 3 miles from coast between meridians of left bank of Var river (07.12.5 E.) and Cap Ferrat. Request for Pilot made by Regulation Signals day or night or through radio station Grasse on 2321 kc/s. and 2182 kc/s.

ANCHORAGES: Approaches have no practical anchorage zones and it is preferable to proceed Villefranche approaches 1 mile distant which can offer sheltered anchorage for ships of all sizes.

MAX. SIZE: Port accessible to ships of 137 m. length and 6.50 m. draft.

RADIO: Grasse Radio Station. Ships call on 2321 kc/s. and 2182 kc/s. Meteorological reports on 2649 kHz broadcast at 0833, 1330, and 1745 hrs. Port Office on VHF Channels 16, 12 and 9.

TUGS: None.

BERTHING: 9 berths for merchant vessels. Ocean-going yachts desiring berth before entering Admiral Infernet and Lympia docks must ask Harbour Master's Office about available positions. At night, a notice fixed at entrance to Harbour Master's Office indicates berths to be occupied on following day by steamers and cargo vessels. These berths must not be occupied by ocean-going yachts.

STEVEDORES: Require (if possible) 24 hours notice in advance of arrival.

MEDICAL: No port doctor. In case of emergency tel. no. 18. Ambulance and doctor on call.

FRESH WATER: Available on all quays.

FUEL: Distribution by tank lorries.

FIRE PRECAUTIONS: Town Fire Service, tel. 18 and 86.72.96.

REPAIRS: Minor engine repairs possible at local yards.

AIRPORT: 5 km. from port.

EMERGENCIES: Ambulance, tel. 18 and 86.06.06; Police, 17.

TELEPHONES: Two lines on Traverse and Commercial Quays can be connected on board on request.

AUTHORITY: Harbour Master.

AGENT: See "Paris".

PARIS

AGENTS: Enquiries relating to agency at French ports may be addressed to Jolasry (France) S.A., 26, Avenue de l'Opera, Paris, 1er. Tel. 296 14-15. Telex: 210905 Paris. Cables: "Jolasry Paris".

PORT-VENDRES: 42.31 N. 03.07 E.

DOCUMENTS:

3 Crew Lists.
5 Passenger Lists.
2 Store Lists.
1 Maritime Health Declaration.
4 Cargo Manifests.
2 Bills of Lading.

Ship's Papers: Nationality Act, International Tonnage Certificate.

PILOTAGE: Three long blasts. ETA required for Agent, Pilot usually taken on outside unless in very bad weather.

MAX. SIZE: Max. length 150 m. max. draft 25-26 ft.

HEALTH: Usually Customs give free pratique. In event of suspected disease or fever on board must advise naval doctor.

RADIO: Marseille Radio (or St. Lys Radio) or Perpignan Radio.

TUGS: None available.

CRANES: 1 shore crane available only of 20 tons.

SPECIALISED CARGO-HANDLING FACILITIES: 3 roll-on/roll-off berths and 1 refrigerated warehouse 11,000 cu.m.

STEVEDORES: ETA to be given to Agent in order to arrange gangs (usual rate per day. 8 normal working hours). 200 tonnes per gang.

MEDICAL: Perpignan Hospital (30 km. away).

TANKERS: Berth for wine tankers with pipe-line.

DENSITY: Salt water.

FRESH WATER: Supplied by Chambre de Commerce, Port-Vendres.

FUEL: For small craft only, otherwise delivery by trucks.

CONSULS: Sweden.

DRY DOCK: 1 travelift for craft up to 150 tons.

SURVEYORS: Lloyds Sub Agent and Vessel's and Cargo Surveyors.

OPENING/CLOSING HATCHES: Normally to be carried out by crew (or as per charter party if any).

CARGO GEAR: Load/discharge effected by ship's gear.

GANGWAY/DECK WATCHMEN: Recommended if loading dangerous cargo.

CERTIFICATES: Load Line Certificate.
International Tonnage Certificate.
Deratisation Certificate.

CUSTOMS ALLOWANCE: See "Calais".

IDENTIFICATION CARDS: Only seamans book required.

REPAIRS: Minor repairs only.

AIRPORT: Perpignan Rivesaltes (30 km.)

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: As for whole France – cargo work can be arranged on those days as overtime.

POLICE/AMBULANCE/FIRE: Tel. 38 00 40 or five long blasts.

SERVICES: Workshop for small repairs, radio/radar repairs available, ship chandler for bound stores, laundry.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: Directeur du Port.

AGENT: See "Paris".

PROPRIANO: Corsica, 41.40 N. 08.54 E.

(See Plan Book)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.

PILOTAGE: Not compulsory.

ANCHORAGE: Outside port for cruise vessels.

MAX. SIZE: Draft 5 m.; length 160 m.

RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.

TUGS: None available.

BERTHING: New Marina with 250 berths (June 1979) additional 200 berths (1980). Facilities include fresh water, electricity, telephone. Crane available for lifting pleasure craft. Engine repairs also possible.

STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.

CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.

FRESH WATER: Available at very slow pumping rate.

FUEL: Available.

REPAIRS/CONSULS: None.

TIME: GMT plus 1 hour.

AIRPORT: Propriano Tavaria 6 km. Direct flights to Marseilles, Nice and Lyons in Summer. Daily connections Airport Campo del Oro/Ajaccio.

POLICE/AMBULANCE/FIRE: Tel. Gendermarie Propriano 76.00.17.

QUIMPER-CORNIQUEL: 47.58 N. 04.07 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Port Health Documents.
Manifest of Cargo.
Stores on Board.
Ship's Papers.

PILOTAGE: Pilot Station, tel. 910640. Contact via Le Conquet Radio or St. Nazaire Radio.

If vessel's ETA changes, telephone either the Agent or the Pilot at least 3 hours before arrival.

The pilot boat is a small black launch, white bulwarks with anchor painted on bow of each side, white cabin at the stern, one mast.

Only one Pilot on duty, but will meet ship at the time given in their ETA. Pilot boards either on the bearing 346° with Lighthouse of Benodet and du Coq in alignment, or on the bearing 000° with Lighthouses of Benodet and Combrit in alignment. Vessel should come as near as possible to the entrance, Vessels are anchored at the port entrance, or in the river, and await the tide, or proceed directly to the port.

In case of bad weather, when the Pilot may not embark, vessel to follow the pilot launch on the bearing 346° up to Plage du Trez, where boarding is possible. Vessels at anchor awaiting Pilot should get under way to approach the pilot boat on the bearing 346° when they see the launch approaching.

ANCHORAGE: Depths of 11 m. in position with the Taro Tower, bearing 245°, distance 0.8 miles.

Depths of 6 m. in position with the Point of Combrit bearing 000°; distance half a mile.

Depth of 9 m., bottom sand and mud, in Du Trez anchorage at the mouth of the Odet.

RESTRICTIONS: Vessels arriving at night must anchor outside the port entrance. It is dangerous to enter the river at night as there are no lights, and the channel is restricted by yachts at anchor.

MAX. SIZE: At spring tides: length 78 m.; breadth 12 m.; draft 4.95 m. At neap tides: length 72 m.; breadth 12 m.; draft 3.40 m.

RADIO: The Port Superintendent requires 24 hours notice of arrival.

TUGS: No tugs available.

BERTHING: At one quay there is 226 m. length for coasters. One quay of 120 m. length for discharging sand. 3 cranes available.

TANKERS: There is a fuel/oil depot at Quimper-Corniquel supplied by coastal tankers from Donges. Max. draft for tankers at Quimper is 3.50 m. to 4.10 m.

FRESH WATER: 5 drinking-water hydrants situated on the quay, loading rate 12 t.p.h.

FUEL: Can be supplied by various companies from tanker lorries.

AIRPORT: Airport of Plugussan situated 5 km. from the port. 2 regular daily flights to Paris.

AUTHORITY: Ingenieur en Chef des Ponts Chaussees, Directeur Departemental de l'Equipement.

AGENT: See "Paris".

ROCHEFORT SUR MER: 45.56 N. 00.57 W.

For all general information refer to Tonnay-Charente.

MAX. SIZE: Max. permissible length: 115 m; breadth: 16 m. (ships must pass through a lock of 18 m. width).

Max. draft is 18 ft. at any tide, 21 ft. at Spring tides.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 99.40.69;

AUTHORITY: Bureau du Port.

ROUEN: 49.28 N. 01.04 E. **(See Plan Book)**

DOCUMENTS: Cargo Manifest or Manifest of Ballast, Certificate of Cargo Space. Bills of Lading. Ship's Register. 6 Crew Lists. 3 Passenger Lists. Health Declaration. Derat Certificate or Exemption. Declaration of Crew Personal Effects.

PILOTAGE: Vessels proceeding to the ports of Rouen and Honfleur are met by pilot boat on La Carosse Roads (Rade de La Carosse). Pilotage is compulsory between the mouth of the Seine and Rouen. Vessels of 55 m. length and less can be exempt from the obligation for the lower sector of the river, and vessels of 45 m. and less for the upper sector, on condition that such vessels be equipped with suitable radar, with VHF sets and able to speak French, and that they are not carrying dangerous goods. Each vessel taking a Pilot for the downriver stage between La Carosse Roads and Villequier, or vice-versa, and a Pilot for the upriver stage between Villequier and Rouen, or vice-versa.

The following signals should be made for summoning a Pilot on La Carosse Roads: By Day: flag "G" of the international code of signals. By Night: in morse by signalling lamp. Failing this, the vessel should hoist her national ensign at the foremasthead.

The following additional signal can be made when arriving on La Carosse Roads: 5 prolonged blasts (– – – – –) to call attention to pilot boat.

Vessels leaving harbour or shifting berth should apply for a Pilot to the Pilotage office, 21 Avenue du Mont-Riboudet, Rouen (tel: 71-68-50)

The Rouen pilot boat keeps a telephonic watch during the following period of all tides: from low water Le Havre until 4 hours after high water.

Since the pilot boat's watch is not permanent, Masters wishing to enter into direct contact with her are recommended to signal their position during the high water prior to that by which the vessel expects to enter the roads.

TUGS: Permanently available in the Port of Rouen. Tug assistance in the River Seine is available on request.

BERTHING: The main Maritime Port of Rouen extends from the Guillaume le Conquerant Bridge as far as La Bouille over a distance of 11 miles. Quays and wharves cover the length of both banks of the Seine. There are also 5 basins in direct connection with the river without the interposition of any locks;

On the Right Bank: St-Gervais docks; on the Left Bank: the Timber dock, the Rouen-Quevilly dock, the Floating Docks tidal basin, and the "Bassin aux hydrocarbures" at Petit-Couronne.

The extent of quayage in the Maritime Port is about 38,000 ft., and in the river docks 5,900 ft.

Between the downstream limits of the Port of Rouen and the sea are a number of maritime establishments serving local requirements. The most important of these, all of them managed by the Port Authority of Rouen, being the petroleum terminal at Port Jerome and the quays of St. Wandrille (2,000 ft.) and Radicatel (1,380 ft.).

Containers: One berth at the Quai de l'Ouest (St.-Gervais dock) with two 25 ton cranes, two berths at Rouen Quevilly dock with two 25 ton cranes and two 35 ton gantry cranes.

One private berth at Radicatel quay with a gantry crane.

Another container terminal will be built at Petit-Couronne quay for 1980.

Roll-on/roll-off: Five berths in service of which one roll-on roll-off berth at Petit Couronne able to load or unload rolling heavy lifts up to 400 tons (max. draft: 10 m.)

Dock	*Quay*	*Facilities*	*Length* (m)	*Depth at low water* (m)

St. Wandrille	St. Wandrille	To be fitted with 4 cranes and partly specialized for coal	645	9.5
Radicatel	Radicatel	20,000 d.w.t. ships	420	
Honfleur	Honfleur		122	

RESTRICTIONS: The height of water above chart datum at Le Havre is broadcast on Channel 11 every 10 minutes by Honfleur VHF port radar station starting 2.5 hours before, until 4 hours after, the initial point of stay tide.

PORT RADAR: Two radar stations are located respectively at the East of Honfleur and on the right bank of the river.

Both stations are operated from Honfleur and work as navigational aids between the first buoys of the channel and Aizier, from 2 hours after until 8 hours after low water Le Havre.

To obtain information call on VHF Channel 16 (156.800 MHz) or 11 (156.550 MHz).

Information given by this radar, at ship's option, is considered as an aid only and implies no responsibility either to the port authority or its agents in any subsequent recourse to such information, which is given free of charge.

ANCHORAGE: In the outer roads at La Carosse and at several places in the river.

Two waiting berths on buoys at Villequier and one at Mesnil-sous-Jumieges.

MAX. SIZE: Vessels over 230 m. length have entered. Draft approximately 2.40 m. more than height of tide at Le Havre. Maximum about 33 ft. Port accessible to vessels of 25,000 d.w.t. fully laden and 55,000 d.w.t. partly laden. The Port Authority's objective is to accommodate ships of 35,000 d.w.t. fully laden by 1980. Ships of 250 m. can be received.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Vessels are obliged to give their ETA and draft in salt water at least 5 hours before arrival to Rouen Information Centre via Brest – Le Conquet Radio or Boulogne Radio. The Port of Rouen Authority has introduced a VHF network of frequency modulation for port needs working on the following frequencies: Channel 16 (156,800 mHz); international safety and watch frequency. A permanent watch is maintained on this frequency at the Information Centre of the Port of Rouen.

Channel 11 (156.550 mHz) compulsory frequency to be used by all ships, boats, ferries . . . . in movement between the pilot boat station and Rouen.

Channel 71 (156.575 mHz) secondary working frequency.

Special process for tankers: For oil tankers it is compulsory, before entering the 12 miles limit, to have a VHF contact with Rouen-Pilot or with Rouen-Port, and to keep permanent VHF watch till the ship is back out of this limit.

Tankers over 250 m. length or 12 m. draft must wait for Pilot 7 miles from shore, others can come to La Carosse roads, passing half mile South of lightship Le Havre and remaining always South of a line marked by the buoys LH and RN.

They have obligation to announce every fault in engines, anchors or windlass, steering gear, radar, mooring gear, and their Masters must sign an inquiry paper given by the Pilot when coming on board.

STEVEDORES: From Monday to Friday:

General working schedule; 0700–1100, 1300–1700, 1700–2300, with possible overtime.

Special working schedule for bulk vessels (excluding cereals) and roll-on/roll-off vessels carrying cars: 0700–1100, 1300–1700, 2000–0600 with possible overtime.

On Saturday: for all ships 0700–1300 and 1300–1800.

MEDICAL: All facilities available. Vaccination certificates required if vessels coming from a North African port. Yellow fever inoculations required if vessel coming from South of parallel 30° N.

TANKERS: Petit Couronne, Shell, 3 berths for vessels up to 11 m. draft.

Port Jerome, Esso and Mobil Oil, 2 berths for vessels up to 11 m. draft.

Honfleur, 1 berth for vessels up to 9 m. draft.

Deballasting facilities available at all berths except at Honfleur.

DENSITY: Except at Honfleur, all berths are in fresh water.

FUEL: All grades available from berths or by barge.

CONSULS: The following countries are represented in Rouen: West Germany, Belgium, Denmark, Spain, Finland, Greece, Norway, Netherlands, Portugal, Algeria, Mauritania, Senegal, Sweden, Tunisia.

WATCHMEN: Recommended to employ watchmen on board tankers and vessels handling dangerous cargo.

HATCHES: Opening and closing hatches always performed by ship's crew.

REPAIRS: All deck, engine and radio repairs can be effected.

DRY DOCKS: Two floating docks, the largest of which is 180 m. long. 25 m. wide for vessels up to 14,000 tons.

SURVEYORS: Are represented: Bureau Veritas, Lloyd's Register.

AIRPORT: Nearest Rouen-Boos. Le Havre, Octeville, 80 km. away. Paris, Orly, 120 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 18.

TELEPHONES Can be connected on board.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

HOLIDAYS: No labour available on the following days; New Year (1st January); Easter Monday; Labour Day (1st May); Ascension Day; Whit Monday; National Day (14th July); Assumption Day (15th August); All Saints' Day (1st November); Armistice Day (11th November); Christmas Day (25th December).

DEVELOPMENTS:

Dredging and embankment operations in order to accommodate by 1980 vessels of 35,000 d.w.t. fully laden in Rouen and of 60,000 d.w.t. at Port Jerome and Honfleur.

Building of a 430 m. quay at the Rouen-Quevilly dock. (76-77).

Building of a 200 m. quay at Moulineaux (77).

Building of a new dredger for the maintenance of the channel in the Seine estuary.

AUTHORITY: Port Autonome de Rouen.

AGENT: Jolasry (France), 52 Quai Gaston Boulet, Rouen. Telex 77588. Tel. 70-87-27.

ST. LOUIS DU RHONE: 43.23 N. 04.48 E. (See Plan Book)

DOCUMENTS:

1 Cargo Manifest or Manifest in Ballast.
Ship's Register.
Bills of Lading.
6 Crew Lists (8 if Spanish or U.S.S.R. or ships bound to these countries).
3 Passenger Lists.
Health Declarations.
Deratisation Certificates.
3 Bunker Supply forms.
1 Declaration of Crew Personal Effects. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Compulsory for vessels exceeding 300 tons net. Contact Pilots by Marseilles Radio or by VHF Channel 16 for calling Port de Bouc Port Control, Channel 9 for traffic. Pilot boards 1 mile E.N.E. of the lighthouse on the jetty.

River Pilot required by vessels loading salt in the Rhone river, boards at the locks entrance to Port St. Louis basin.

ANCHORAGE: Suitable anchorage outside Port St. Louis keeping well clear of Fos channel.

RESTRICTIONS: The St. Louis Canal is 3,300 m. long and 63 m. wide, with a depth of 24 ft. 6 in. The lock has a length of 159 m., width 22 m., and depth 24 ft. 6 in.

No entrance allowed between 2100 and 0500 hrs. except in emergency, although entrance may be effected up to 2400 hrs. if ordered before 2100 hrs.

Entrance may be delayed when large tankers are proceeding in the Fos Channel.

HEALTH: Pratique given by Customs officers who board on arrival.

RADIO: Within 150 miles use Marseilles Radio FFM, otherwise St. Lys FFL.

TUGS: Four tugs available from 500 to 1,060 h.p. Ship's lines are normally used.

BERTHING:

Quays	*No. of Berths*	*Draft*
Quai Ouest	3	6.20 m.
,, Nord	2	6.50 m.
,, East	3	6.10 m.
,, Hardon	1	5.50 m.
,, de la Suisse	3	7.92 m.
,, Charles	1	7.92 m.

,, C.R.E.	1	4.50 m.
,, Petronaphte	1	—
,, Soterm	1	7.00 m.
,, S.A.G.A.	1	7.00 m.

Roll-on/Roll-off Facilities: Four berths: No. 41-44, draft 7.92 m.

STEVEDORES: Shifts are 0800–1200 hrs., 1300–1730 hrs. Saturday afternoon, Sunday and Holidays in overtime. Shifts of 0600–1200 hrs.and 1300–1900 hrs. count as a day each.

CRANES: 3×3/6 tonne cranes; 3×6-tonne cranes, with a reach of 18 m. (59 ft.); 2×6-tonne cranes, with a reach of 22 m. (72 ft.); 1 mobile 3-tonne, with a reach of 18 m. (59 ft.); 2 mobile 6-tonne, with a reach of 24 m. (78.7 ft); 1 derrick crane, with a reach of 20 m. (65.6 ft.).

FRESH WATER: Available from hydrants on the quays at a rate of 100 t.p.h.

FUEL: Available only by barge or railcar.

AIRPORT: Marignane Airport distant 70 km.

AUTHORITIES: Port Autonome de Marseille. Capitainerie de Port du Bouc (Harbour Master).

ST. MALO: 48.38 N. 02.02 W.; (See Plan Book)

DOCUMENTS:

Ship's Register.
Store List in duplicate (ship's stores).
Crew Declaration of Bonded Stores.
Health Declaration.
Manifests and B/Ls.
Crew List (duplicate).
Passenger List (duplicate, if necessary).

PILOTAGE: Compulsory for vessels over 150 NRT. (1) During tidal hours, 2 hours before and after high water, vessels may enter into direct contact with the Pilots on VHF Channel 12. Call Sign "Pilot St. Malo".

(2) Outside tidal hours and during working hours, vessels may call the Port Office on VHF Channel 12. Call sign "Pilot Office – St. Malo".

When waiting for the Pilot, vessels anchor near the land buoy and report their arrival to the Port Office.

In good weather, the Pilot boards near the "Shore-buoy". In bad weather when the wind is from N.E. or N.W. the Pilot may guide the vessel as far as Dinard Roads, where the Pilot will come aboard.

Pilot Cutters: One cutter 42 ft. 6 in. fitted with radar, relief cutter 36 ft. both fitted with radio-telephone and VHF Channels 8, 12 and 16.

ANCHORAGE: Large vessels with draft greater than 13 m. anchor by the land-buoy. Smaller vessels may anchor in St. Malo Roads, there is sufficient swinging room for vessels with draft of 7 m. It is recommended to use a Pilot to come into this anchorage.

RESTRICTIONS: Vessels are allowed to enter from 2 hours before to 2 hours after high water. To be certain of mooring, vessels should arrive at the lock at least 1 hour after high water.

Depth available 20 to 22 ft. at spring tides.

No movements during foggy weather. Large vessels (length greater than 100 m.) approach the lock at high-tide. Tankers lock in by themselves. Movements are carried out day and night.

MAX. SIZE: The height of the tide, the length of the lock and width of the channel must be taken into account.

Cargo Vessels. Length 150 m. (492 ft.), beam 20 m. (65 ft. 6 in.), draft for vessels length 135–150 m., height of tide less 2.5 m. (To be suppressed end of 1978). Less than 135 m. LOA: Rise of tide. 2 tugs required.

Tankers: Length 147.50 m. (443 ft.), beam 20 m. (65.6 ft.), draft see *"Cargo Vessels"*. 2 tugs required if vessel not fitted with bow-thrust.

HEALTH: Customs Officers are appointed as Health Officers and deliver pratique. In case of suspect disease, Masters must declare it at once by radio to their Agents who will contact authorities.

RADIO: Vessels coming from West use Brest le Conquest Radio, call letters FFU. Vessels coming from North should go through Boulogne Radio, call FFB.

VHF:

(a) Port Office – Channel 12; tidal hours and working days.
(b) Pilot – Channels 6, 12 and 16, when awaiting a vessel.
(c) Tugs – Channels 6, 12 and 16, at the time of high tide.

Vessels call Pilot and tugs on 12 or 16 and change to Channels 6 or 8 for working.

TUGS: Two tugs are available at St. Malo (650 and 600 h.p.). Usually joins vessel at the end of breakwater. Ship's lines are usually used.

BRIDGES: Can be passed during tide vacation, otherwise, notice required to open.

BERTHING: One berth outside lock for car ferries.

Basin Duguay Trouin, length 1,870 m. Bassin Vauban, length 1,100 m. Bassin Bouvet, length 750 m. Duguay Trouin and Bouvet Docks: 140 m. long, 16.50 m. breadth.

2 new quays in Vauban Dock, (1) Quai Des Corsaires, length 185 m. 2 cranes on rails. Capacity 12 tons at 14 m. Quay used for general cargo. (2) Tanker quay, extension of Quai Des Corsaires, length 130 m. Diameter of discharge pipe 200 mm., one mobile arm, vessels to supply reducers. Max. discharge rate, 650 cu.m./hour.

Grain silos: 1 of 6,000 tons capacity with loading possibilities of 130 t.p.h. and 2 of 6,500 tons capacity each with loading possibilities about 100 t.p.h. each are situated in Bassin "Duguay Trouin".

CRANES: 12 electric cranes, capacity 5–12 tons and 6 mobile cranes capacity 7–13 tons.

TANKERS: Also see "Berthing".

No deballasting facilities. Tankers wishing to effect repairs must leave port and wash out their tanks and obtain a gas-free certificate.

On completion of operations tankers must leave on the next tide. If a second tanker is waiting to berth she must wait in the roads.

Safety instructions are issued when the vessel passes through the locks.

BERTH ALLOCATION: Dependent upon goods to be discharged and characteristics of vessel. Bearing in mind the widths of the channels, their depth and dimensions at the foot of the quays, the height of the dock which varies on average between 11 m. and 12.5 m.

The largest vessels tie up at Quai Des Corsaires.

It is recommended that an advance notice be sent via agents to the Port Office 15 days prior to arrival, so that the vessel may be received under the best possible conditions.

STEVEDORES: In order to have workers ready on arrival, Masters are kindly requested to give as accurate as possible ETA the day before arrival, especially if there are many ships discharging at same time.

Normal working hours 0800-1200 and 1400-1800 from Monday to Saturday, except holidays. There is no night overtime. Dispensations may be made to finish a vessel so that she may catch the tide.

Rate of discharge dependent on type of goods involved.

MEDICAL: Notice is required to obtain an appointment with doctors or dentists. Hospital service is available.

DENSITY: Average density is 1010.

FRESH WATER: Can be delivered from quay.

FUEL: Bunkers delivered at St. Malo (with notice varying, depending on the Company – Shell 2 days, Esso 1 week, etc.) come from Donges by road lorries and cost of haulage is supported by the ship (expensive). D.O. can be obtained from local suppliers but out of contract.

FIRE PRECAUTIONS: Usual non-smoking precaution (a watchman is compulsory for tankers).

DEVELOPMENTS: A special discharging machine for bulk cargoes, capacity 1,000 t.p.h. will be in operation at Quai des Corsaires by end of 1978. A phosphoric acid terminal, capacity 11,288 tons, in Inner Basin, Basin Jacques Cartier, will be in operation end of 1978. The terminal will operate via the petrol tanker berth.

GANGWAY/DECK WATCHMEN: Watchmen are not compulsory except for tankers.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. Stevedores' cranes may help for the beams, but dockers will not touch them.

CERTIFICATES: As per International Conventions, all Safety Certificates, Load line, Radio, etc.

CUSTOMS ALLOWANCES: 200 cigarettes, or 200 grams of tobacco, and 1 bottle of spirit per crew member.

IDENTIFICATION CARDS: Crew members must have an identification card on their sailor's book when going ashore.

CONSULS:

Netherlands		(99) 56.07.21.
Denmark	(Vice-consul)	(99) 56.07.21.
Norway		(99) 56.07.21.
Finland	(Vice-consul)	(99) 56.31.57.

REPAIRS: Deck and engine repairs can be carried out by shipyard or workshops. Electricians are also available. RAMAC Agency can repair radars and radios, also Radio-Ocean agency.

DRY DOCKS: One dry dock. Max. length admissible 120 m., breadth 15.5 m. and draft 8.0 m. One slipway, 500 tons. Length admissible 45 m., breadth 9 m. With sufficient notice.

REPATRIATION: Can be effected from St. Malo by train or plane.

AIRPORTS: 8 miles from port. Wintertime, services to Jersey (C.I.), with correspondence to England and Wales. Summertime, several times per day to Jersey, London, and to Paris except week-ends.

TIME: Local time is GMT plus 1 hour. From April till September GMT+2.

HOLIDAYS: French legal holidays. Cargo work may be carried out, but arrangements must be made with stevedores.

POLICE/AMBULANCE/FIRE: Police, 40.85.80 and 17; Ambulance and Fire, 18.

TELEPHONES: No telephones on the quays.

DELAYS: Berthing delay will only be due to tide. For loading or discharging, it depends what kind of cargo is handled.

SERVICES: Compass adjusting, radar or radio adjusting can be carried out.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: Commandant du Port.

AGENT: See "Paris".

ST. NAZAIRE: 47.17 N. 02.12 W. (See Plan Book)

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo space.
Bills of Lading.
Ship's Register.
6 Crew lists.
3 Passenger lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of crew personal effects.

PILOTAGE: Compulsory for vessels longer than 225 ft. owning radar/VHF. Starts about 4 miles north of lighthouse of Le Pilier, on lightbuoy SN 3. Pilot boat on station day and night, if weather conditions permit, West of a line drawn between SN 3 lightbuoy and lightbuoy of "La Couronnee" about 2 miles N.N.E. If Pilot unable to come aboard he may invite ship to follow his boat until they have reached a better shelter. Ships heading for one of Loire estuary ports should give ETA at least 24 hours ahead to Port Captain of Saint-Nazaire. Approximate time of arrival at SN 3 buoy, the further destination and speed should be given. VHF contact can be made direct with St. Nazaire pilot boat or "Estuaire de la Loire" Pilot station.

ANCHORAGE: When pilot service withdrawn, anchor near SN 3 lightbuoy or in "Rade des Charpentiers". In rough sea ships heave to off-harbour. In case of doubt contact pilot boat by VHF or phone. Sometimes Pilot taken aboard on SN 3 is relayed by another who will board near the outer port of St. Nazaire to bring ship upstream.

MAX. SIZE: Entrance by L. Joubert lock. Length 11,610 ft., breadth 164 ft., draft 30 ft. 6 in. 2 other locks available – length of 173 ft. to 692 ft.

RADIO: Stations at: St. Nazaire; Brest-le Conquet, and Bordeaux-Arcachon.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

TUGS: Tugs are provided by "Union des Remorqueurs de l'Ocean" at St. Nazaire; also "Les Abeilles" at Nantes.

BERTHING: Tidal basin with 8,680 ft. of public docks.

STEVEDORES: Available.

MEDICAL: Facilities available at any time.

FRESH WATER: Available on docks.

FUEL: Available in any grade of viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.

FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries; no fire, no smoking. Ground wire for ship.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Done by crew.

IDENTIFICATION CARDS: Not needed.

CONSULS:

REPAIRS: Very good facilities exist for all types repair work.

DRY DOCKS: Shipyards for large vessels at St. Nazaire.

AIRPORT: Nantes: Good connections with French internal network (Air Interin and also international mainly with stop-over Paris). 5 daily flights to the capital. Direct flights to Bordeaux, Lorient, La Rochelle, Lyons, etc., St. Nazaire: 2 daily flights to Paris.

TIME: Paris time GMT plus 1 hour; seasonal alteration.

HOLIDAYS: New Year (1st January no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police, 17; Fire, 18; Ambulance, 18.

TELEPHONE: Arrangements are possible.

SHORE LEAVE: No restrictions.

AUTHORITY: Port Autonome de Nantes-St. Nazaire.

AGENT: Jolasry (France), 44, Boulevard Paul-Leferme, Saint Nazaire. Telex: 71931. Tel. 70-01-18.

SETE: 43.24 N. 03.42 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the Port within which a vessel is considered to be an "arrived vessel" are indicated as follows: To the South by a line with the red light of Eastward end of breakwater bearing 257°; to the East by a line with the church tower of Frontignan bearing 005°; to the North by coastline.

A second zone is a circle of 1 mile radius centered on a point located on the bearing 298° and at 3.2 nautical miles from Eastward end (Red Light) of breakwater. This zone is connected from a landing buoy by a channel 500 m. wide steering 326°. This area is only for big tankers from 100,000 tons up to 270,000 tons which operate at buoy IMODCO Single Point Mooring System.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration, eventually vaccination list.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.
2 Provision Lists.

PILOTAGE: Request Pilot by international signals (sound, flags, light signals) or telephone through Marseilles Radio or VHF by Sete Radio Channel 25, tel. 74.34.06 (or pilot boat VHF Channel 12). Description of pilot boats; motor launch with black hull, white band, white anchor on hull at bow. Pilot embarks between 1 and 2 miles South of breakwater in good weather. In bad weather he embarks in the shelter of l'Epi Delon. In this case make prior contact by radio or VHF (Marseille or Sete Radio) or Port Office VHF Channel 12. Provide a ladder on each side.

ANCHORAGE: In roads from 0.5 mile to 1 mile to South of breakwater. (See "Port Limits" and "Tankers").

RESTRICTIONS: *Commercial Harbour:* In the Canal Maritime, length max. 145 m., breadth 20 m., draft 22 ft. 06 in.

In the Bassin a Petroles, max. length 140 m., draft 33 ft. except to the new petroleum pier for tankers up to 30,000 d.w.t., max. length 225 m., draft 11 m. (36 ft.)

MAX. SIZE: *Sea Line Frontignan:* South Berth: S.B.M. Tankers 270,000 d.w.t. draft 21 m. (69 ft.).

North Berth: C.B.M. Tankers up to 100,000 d.w.t. lightened draft 13.1 m. (43 ft.).

Bassin a Petrole: New Berth Tankers 30,000 d.w.t. draft 11 m. (36 ft.).

New dock for ore carriers 210 m. length; 10.4 m. draft (34 ft.)

Commercial Harbour up to 8.5 m. draft (28 ft.).

Commercial Harbour in the Canal Maritime: max. length 140 m; breadth 20 m., draft 6.85 m. (22 ft. 06 in.).

HEALTH: Pratique given by Health Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

RADIO: Marseille or Sete Radio VHF Channel 21 or 25, Port Office Channel 12.

TUGS: Tow line to be furnished by ships. Vessels taken in tow near the breakwaters on the North side.

BERTHING: Commercial Harbour Avant-Port, Nouveau Bassin, Bassin Orsetti maximum draft 8.50 m. Canal Maritime, Bassin du Midi, Canal Lateral: max. draft 6.85 m. Dock No. 1: East Quay: 3 berths max. draft in approach channel and alongside the South berth (E1): 11 m. Central and North berth: (E2 and E3): 10.40 m. West Quay: 2 berths. Central berth (G2) and North berth (G3) max. draft: 11 m.

CARGO HANDLING FACILITIES: Dock 1 – East Quay: Berth E1 (Southward) and E2 (Central) specialise in ore. Berth E3 (Northward) specialises in general cargo and timber, also roll-on/roll-off berth with movable ramps for big ships. West Quay: Berth G2 and G3 for general cargo and one berth (G3) roll-on/roll-off with fixed ramp for big ships. Orsetti Dock South Quay (D) general cargo and a roll-on/roll-off berth for early fruit and general cargo (D3). North Quay (B) specialises in phosphate, also one roll-on/roll-off berth (B2).

TANKERS: Frontignan Sea Line Terminal North berth (C.B.M.) 1 berth for tankers up to 100,000 d.w.t. lightened draft 13.1 m. (43 ft.). Two 12-in. hoses for crude oil discharge. Submarine pipe-line 28 in. diameter. Commerial Port: 1 berth for tankers up to 30,000 d.w.t. draft 11 m. (36 ft.). 1 old berth for tankers up to 140 m. length or 10,000 d.w.t., draft 10.1 m. (33 ft.). Slop disposal facilities available up to 1,000 cu. m. per hour.

Frontignan Sea Line Terminal (South berth) Mobil SBM.

Operator: Mobil Oil Francaise.

Position: 43° 22′ 12″ N. 03° 46′ 49″ E.

Restrictions: Least depth of water 92.5 ft.

Max. Size: No limit on length and beam. Max. draft 69 ft.

Pipe-line: Length, 26,000 ft. Diameter 44 in.

Hoses: 2×16 in. Bow to manifold distance should not exceed 600 ft. Connections port-side.

Max. Pressure: 125 p.s.i. at rail.

Pumping Rates: 8,500 t.p.h.

Density: 1026.

Fresh water: Not available.

Fuel: Bunker "C" available by barge, capacity 900 tons. D.O. not available.

Ballast: No facilities for receiving dirty ballast.

Vessels up to 50,000 d.w.t. normally berth at spread mooring.

Regulations and Information: When scheduled to discharge at SBM Master will receive the following standard message from Mobiltrans Ny: "Your vessel will discharge at Frontignan SBM. located 43° 22′ 12″ N. 3° 46′ 49″ E. stop 4 days prior arrival radio your Agent your ETA SETE contact "Sete Port Office" on VHF Channel 12 approximately 30 miles range advising your ETA to entrance buoy located 43° 14′ 55″ N. 3° 53′ 40″ E. Only when authorisation is granted by "Sete Port Office" you may proceed to SBM on *compulsory* route on course 326° extending 500 m. each side of line joining approach buoy to SBM. When proceeding on compulsory route your vessel shall exhibit additional marks by day 3 black shapes in a vertical line the highest and lowest 1 ball the middle 1 diamond every one spaced by 1.5 m. stop by night 3 all-round lights in a vertical line the highest and lowest red the middle white every one spaced by 2 m. stop. Pilot will board approximately 3 miles seawards from SBM on compulsory route".

Your Agents will forward the following cable: "Advise ETA type size your manifold flanges whether suitable reducers available and Smit's Bracket fitted on forecastle stop Boom to lift 16 in. ID floating hose and two 16 in. 150 ANSI standard flanges ready on portside. On forecastle have 2 polypropylene 8 in. messengers 150 fathom ready. Accommodation ladder on starboard and boat ropes each side."

The "approach buoy" referred to in para 1, is located in 43° 14′ 55″ N. 3° 53′ 40″ E. having the following characteristics: 3 m. diameter – 7 m. height mast painted with vertical strip white and red with 2 crosswise shapes, with a white light 4 flashes every 12 seconds. Proceeding inshore of this buoy and inside the 12 mile line is not allowed without prior authorisation granted by "Sete Port Office" on VHF Channel 12.

An approach channel exists between the approach buoy and the SBM extending 500 m. each side of a line joining the approach buoy to SBM and must be used as a compulsory route on a course of 326°. Same compulsory route applies for outgoing tankers leaving the SBM.

When proceeding in the approach channel the vessel shall exhibit in addition to the normal navigation signals: *by day:* 3 black shapes in a vertical line the highest and lowest 1 ball, the middle one a diamond – every one spaced by 1.5 m. *By night:* 3 all-round lights in a vertical line, the highest and lowest red, the middle one white, every one spaced by 2 m.

The Pilot boards incoming tankers and leaves outgoing tankers approximately 3 miles seawards from SBM on the compulsory route. He will stay on board during the period the vessel remains secured to the SBM.

Vessels scheduled to discharge at the SBM or departing from it are only permitted to transit the channel between the SBM and approach buoy.

Every vessel proceeding to or departing from the SBM which requires to anchor should use the following anchorage areas:

Anchorage A – Vessels with less than 15 m. (49 ft.) draft should anchor in the area bounded in the North by a line 0.5 miles off the breakwater, and in the East and West by meridian passing through the extremities of the breakwater, and in the South by the 20 m. (65.7 ft.) contour.

Anchorage B – Vessels having a draft of greater than 15 m. (49 ft.) should anchor in the Southern semicircle around the SBM extending between 400 m. (1,310 ft.) and 1,850 m. (6,000 ft.) from the SBM.

When a vessel is proceeding to the SBM a Marine Superintendent and a mooring team will board. Then anchors should be secured and cable pawls in the down position, deck scuppers must be plugged tight and VHF on standby on Channel 12.

Throughout the period the vessel remains at the SBM the engine should be ready and power available on deck winches and windlass.

Adequate deck lighting must be available at night, and a constant fo'c'sle watch kept on the SBM.

Propeller r.p.m. must be kept to a minimum. Intermediate ballasting may be required in order to prevent excessive strain on moorings.

While weather operational limits will depend on circumstances port regulations specify the following criteria: Vessel must cease discharge when wind is 30 knots, significant wave height 8 ft. (assumed current 2 knots) vessel must leave berth when wind is 45 knots and significant wave height is 18 ft.

The Master of every oil tanker coming to Sete to load several refined products, some of which are heated, is required to give the Port Office, a cargo plan before loading.

Masters of oil tankers are invited to follow the terms of new French Law (Arrete Prefectoral No. 491 ADM du 24 Mai 1978) specially to send a message to the French Admiralty (Prefet Maritime de Toulon) six hours before entering the territorial waters and six hours before leaving the Port of Sete.

FRESH WATER: Available on most quays or by lighter of 140 tons capacity.

FUEL: All qualities available subject to advance notice given.

REPAIRS: Handled by Scotto et Repetto: 5 slipways for handling and repair of small vessels, Mechanical workshops, General repairs.

Claverie, Mechanical workshop for heavy repairs, and boiler repairs.

Di Biase, general repairs and Mechanical workshop.

Affre, General repairs.

CONSULS:

Denmark	tel. 74.30.20.	Norway	tel. 74.31.83.
Finland	tel. 74.25.72.	Sweden	tel. 74.25.72.
Netherlands	tel. 74.25.72.		

Others at Marseilles.

WATCHMEN: Service necessary for ships loading or unloading dangerous merchandise. Optional for other ships.

CUSTOMS ALLOWANCES: 40 grammes tobacco per day per man (calculated in accordance with the length of voyage undertaken by the ship). Amount of alcohol fixed by Customs in accordance with the crew, and length of ship's stay in port. It is a matter of tolerance and not of right.

REPATRIATION: Repatriation and crew changes are easily arranged.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TIME: GMT plus 1 hour – alteration from end of March to end of September to GMT plus 2 hours.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); St. Louis Day (Monday, no labour available); All Saints Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available).

N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

AUTHORITY: Commandant du Port de Sete.

AGENT: See "Paris."

STRASBOURG: 48.34 N. 07.42 E. **(See Plan Book)**

PORT LIMITS: In Strasbourg (Lat. 48° 34′ N., Long. 7° 42′ E.), the Port Autonome extends from the Km. 285 to the Km. 297 upon the Rhine, occupying an area of 1093ha., of which 234ha. are water areas including 14 docks (6 have a constant level, 8 a variable level), and 2 fore-harbours.

Out of these limits, the Port Automome de Strasbourg includes 8 branches designed for the handling of building materials, and 2 ports, Marckolsheim (at Km. 242) and Lauterbourg (at Km. 349), all the branches and ports being on the left bank of the Rhine.

DOCUMENTS: The ships must hold some documents, which they have to keep at disposal of the administration or the inspection authority when required, as following:

Certificate of Survey.
Certificate of Tonnage.
Certificate of Registration.
Log-Book.
Booklet of Verification of the used oils.
Attestation for Equipments of liquified gases.
Customs Documents for the carriage of goods.
Fluvial Bill of Lading.
Rhine Manifest.
Certificate of Ability to steer the ship.
Police Regulation for the Navigation on Rhine.
A.D.N.R., regulation for carriage of dangerous goods.
the documents relating to the boilers and other tanks under pression.

PILOTAGE: The pilotage is not compulsory on the Rhine and usually the Masters do not ask for a Pilot except for Gebirge and the Haut-Rhein. A Pilot can be obtained in the port of Kehl by dialling the number 19 — 49.7851.20.70.

ANCHORAGE: The ships have at disposal an area of about 10ha. in the North and South fore-harbours to take anchorage. Depth of water: at least 5.20 m.

RESTRICTIONS: Restrictions to navigation are to be published in the Advices to the Nautical Corporation of the Inland Water Transport.

MAX. SIZE: The max. sizes of ships allowed on the Rhine are as follows: Length: 110 m., — breadth: 11.4 m. The ships of Rhine do not exceed a draft of 4.0 m.

Dimensions of the locks: — North lock: length 125 m., breadth: 13.5 m., South lock: length 125 m., breadth: 13.5 m.

In the constant level docks, the water depth is 3.5 m., but only along the North—South axis of the port; if not there, the water depth is 2.5 m.

In the variable level docks, which are the docks with a direct communication with the Rhine, the minimum depth is 4.30 m.

These depths are given, the Rhine being supposed at its lowest bench-mark: 135 m.

HEALTH: There is no Health Service for the Rhine.

RADIO: All communications on the Rhine are performed by radio-link and radiotelephony:

VHF Channels 10 and 13: used for ship to ship communications.

VHF Channels 20 and 22: used for transmitting of nautical advice in the way shore-ship and in the reverse order.

VHF Channels 24, 25, 26 and 27: used for public communications.

RADAR: There is no radar station on shore.

TUGS: The Port Autonome de Strasbourg put at disposal of customers four tugs and one 600 C.V. pusher according to their needs.

BERTHING: 10 km. of quays can be used for mooring. Some of these quays are situated in the constant level docks (max. draft 2.5 m.), some are in the docks that link with the Rhine (max. draft 4.30 m.). Tankers berth only in the Oil Dock Harbour.

BULK CARGO FACILITIES: — with grain elevators: 2 berths for loading, and 2 berths for discharging.

Loading of gravel on the Rhine by belt-conveyors (8 facilities).

Loading and unloading of hydrocarbons in the Oil Dock Harbour by 14 facilities operating each at the rate of 300 cu.m./hr.

SPECIALISED CARGO-HANDLING FACILITIES: Containers up to 40 metric tons; heavy packages up to 300 metric tons..

The two operations are carried out at the mooring berth named "Colis Lourds" (heavy packages) and utilise a length of 180 m. of quay.

BRIDGES: The head room under the bridges reach 8.8 m. in the constant level docks.

MEDICAL: Civil Hospital, I, place de l'Hopital, 67000 Strasbourg, tel. 36.71.11.

DENSITY: The density of water is about 1000.

FRESH WATER: Fresh water is supplied by Ets. Koejac, tel. 61.26.78.

FUEL: Bunkering can be arranged with the m/s *Robertsau*, G.P.S., tel. 61.2821. or m/s *Jumbo*, Etakoejae, Tel 61.26.78.

CONSULATES:

West Germany:	(88)32.61.86
Belgium:	(88)35.43.63
Great Britain:	(88)36.64.91
U.S.A.:	(88)35.31.04
Netherlands:	(88)61.93.67
Switzerland:	(88)35.15.17
Austria:	(88)35.13.94
Poland:	(88)61.38.00

REPAIRS — SLIP: All the repairs can be carried out at: Forges de Strasbourg — Scar, tel. 34.68.00. 101, rue du Rhin Napoleon, 67100 Strasbourg.

Any vessel capable of using the port can use the Forge-de Strasbourg slip.

SURVEYORS: Surveyors of the Commission de Visite, named by the Commission Centrale pour la Navigation du Rhin, can be obtained by the Captain.

WATCHMEN: Ship's crew, if required.

OPENING/CLOSING OF HATCHES: Opening and closing of the hatches are performed by the crew or by the staff of the company freighting the ship, as any other handling. Dockers do not exist in the port of Strasbourg.

REPATRIATION: All the facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORTS: Distances from Strasbourg: Strasbourg-Entzheim: 15 km. Strasbourg-Mulhouse: 130 km. (airport Muljouse Bale). Strasbourg-Francfort: 220 km.

HOLIDAYS: Work is stopped during the weekends and the statutory holidays. Labour can be obtained on these days if necessary.

POLICE/AMBULANCE/FIRE: Police: 17 — Ambulance: 33.33.33 — Firemen: 18.

TELEPHONES: Office of the P et T, 5, rue du Port du Rhin, 67000 Strasbourg. In case of emergency: La Capitainerie du Port, 5, rue du Port du Rhin – North Lock of the Port, quai Jacoutot, can be contacted at any time. Tel. 32.49.15.

SERVICES: For the ship: Tank cleaning: SPIRSE, 14, rue de Rouen, 67000 Strasbourg, tel. 61.40.45

Supplying of material: Koejac, quai des Belges, 67000 Strasbourg, tel. 61.26.78.

Electronic repairs or supplies: Radio-Metzger, 17, rue de Dunkerque, 67000 Strasbourg, tel. 35.45.42.

For the crew and various formalities (customs): La Capitainerie du Port, 5 rue du Port-du-Rhin, 67000 Strasbourg, tel. 32.49.15.

SHORE LEAVE: The Master must introduce himself, within the 2 hours following his arrival, to the Commissariat Special du Port, 5 rue du Port du Rhin, 67000 Strasbourg, and produce the passports of the crew. The passenger ships have to comply with the regular supervision of authority. Each member of crew must be holder of an identification card or a passport when he is ashore.

REGULATION: The Reglement Particulier de Police du Port is very helpful to the Master and let him know the particulars of the Port of Strasbourg.

DELAYS: The commercial operations begin and finish at the dates and hours shown upon the fluvial bill of lading. Every delay is subject to the payment of penalties. Except for the passenger ships, ships do not give notice of their arrival to the authority, before they enter into the port.

AUTHORITY: Port Autonome de Strasbourg.

TONNAY CHARENTE: 45.57 N. 00.53 W.

DOCUMENTS:

2 copies Crew List.
2 copies Ship's Stores Lists.
2 copies Crew Manifests (Tobacco List).
2 copies Passenger List (if any).
1 Declaration of Ballast.
Manifest form Last Port.
1 copy Bill of Lading (in case of any cargo to be landed).
Ship Register to be shown.
Deratisation Certificate or Exemption.

PILOTAGE/ANCHORAGE: Vessels have to proceed to about half a mile S.S.W. Isle of Aix Lighthouse and to drop anchor in the No. 115 alignment when safe anchorage is open (lowest tides; minimum depth of water 26 ft.).

River Pilot joins ships there, about 3 to 1 hour before high water, depending on draft and size of vessel concerned.

Pilot boat is equipped with VHF.

RESTRICTIONS: As the River Charente is unlighted, movements are not possible at night. However, vessels may leave anchorage in dark and come up river at daybreak (anchorage area is about 5.5 miles from the mouth of the river).

MAX. SIZE: Max. permissible LOA about 378 ft.; max. permissible draft about 17 ft. 6 in. at any tide; max. permissible draft 21 ft. 6 in. at spring tides.

HEALTH: Free pratique is to be obtained on arrival at port. Usual yellow flag signal to be raised.

RADIO: Ships coming from South: Bordeaux-Arcachon Radio Station. Ships coming from North: Saint-Nazaire or Brest le Conquet Radio Stations.

VHF: No continuous listening out at the port. Nevertheless, vessels coming into the Roads can call up a correspondent by phone through Bordeaux – Radio – Channel 26.

TUGS: No tug is available. In case of need, tug may be obtained from La Rochelle-Pallice (about 20 miles).

BERTHING: 1 private berth for grain loading, which can take vessels up to 100 m. length. 1 berth 200 m. long for handling general cargo. 3 waiting berths. The central waiting berth can be used for handling small cargoes from 500 to 1,000 tonnes. Depth of water along the quays is an average of 6 m.

CRANES: 2 × 5 tonne cranes. 2 × 3 tonne cranes. 1 mobile crane of 5 tonnes. All the cranes are capable of working with hooks or scoops.

BRIDGES: The Rochefort Bridge clearance over highest water is about 98 ft. (30 m.).

STEVEDORES: A 24-hour notice is required in order to arrange loading/unloading operations.

Discharge rates: Coal – about 1,200 tons per day of 8 hours' work.
Phosphates – about 1,500 tons per day
Zinc concentrates – about 1,400 tons per day.

Loading rates: Grain 2,000/2,500 tons per day.

OPENING/CLOSING HATCHES: This work is the responsibility of the crew.

MEDICAL: The nearest hospital is at Rochefort (about 4 miles).

FRESH WATER: Fresh water may be obtained alongside, from hydrants, at the rate of about 10 t.p.h.

FUEL: Must be obtained from La Pallice (about 20 miles) by lorries.

REPAIRS: Small repairs may be carried out by local workshops. Nearest shipyard is at La Pallice.

REPATRIATION: Changing crew and necessary repatriation formalities may be effected.

AIRPORT: The nearest airport is La Rochelle (about 30 miles). Possible to reach Paris airports in a few hours by train.

POLICE/AMBULANCE/FIRE: Police: Rochefort H.Q. – Tel. 17; Tonnay-Charente Gendarmerie: Tel. 88.20.38; Ambulance: Tel. 99.30.69; Fire: Tel. 18 or 88.20.38.

AUTHORITY: Harbour Master.

AGENT: See "Paris."

TOULON: 43.07 N. 05.55 E.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Pilot station is situated on President Fournel Quay, telegraphic address; Capitainerie de Port de Commerce, Toulon. Pilotage compulsory for vessels over 150 g.r.t. Pilot boards 100 m. North of the semaphore station at Cap Cepet.

There are 3 mooring buoys in the Inner Harbour owned by the Navy. The buoys can be utilised by merchant ships on request and are able to accommodate vessels up to 30,000 tons displacement.

RESTRICTIONS: Entry can be made by day and night except for vessels loading with refined petroleum or dangerous cargoes which are not allowed to enter between sunset and sunrise.

MAX. SIZE: The port is approached by a channel 125 m. wide. The docks can accommodate without tug assistance ships up to 250 m. length and 8.80 m. draft.

Renovation and reconstruction work is being carried out, after which passenger vessels of over 300 m. length and cargo vessels of up to 11 m. draft will be accommodated.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

TUGS: Naval Tugs. There are many harbour tugs up to 1,000 h.p. and several deep sea tugs up to 2,000 h.p. controlled by the French Navy which may be called on for assistance by the Harbour Master or Pilots.

Commercial Tugs. 2 tugs of 180 h.p. owned by the Port Authority are used to assist smaller vessels.

BERTHING: President Fournel Quay, 335 m. length, depth alongside 9 m.

East Quay, 193 m. length, depth alongside 8.50 m.

Minerve Quay, length 147 m., depth alongside 7 m.

TANKERS: Tankers discharge at naval installations at Milhaud and Lazaret.

Total Terminal. 1 jetty berth for tankers up to 6 m. draft, and a buoy berth for vessels up to 15,000 tons displacement.

Societe de la Raffinerie du Midi. 1 dolphin berth for white oil cargo only.

STEVEDORES: There is a permanent working force of 40 dockers which can be increased by casual labour to 120 men if required. Shifts are available for 4 hours, 8 hours or 9 hours with possibilities for overtime.

FUEL: Only available by tanker lorries.

REPAIRS: Forges et Chantiers de la Mediterranee, Shipyard specialising in naval construction. Total length of repair quays 835 m. Heavy-lifting facilities available.

All types of repairs can be carried out at the Naval Dockyard.

DRY DOCKS: Several dry docks available in the Naval Dockyard, of which 3 can accommodate vessels in excess of 250 m. length.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

AUTHORITY: Direction Departmentale de l'Equipment, Etablissement Maritime de Toulon.

AGENT: See "Paris".

TROUVILLE-DEAUVILLE: 49.23 N. 00.05 E.

(See Plan Book)

The port situated on mouth of River Touques, is composed of 2 parts: Trouville for small fishing vessels, and Deauville including 2 docks for cargo ships and pleasure boats.

DOCUMENTS:

1 Crew List.
1 Passenger List.
Tonnage Certificate.
2 Cargo Manifests.
Bills of Lading.
1 Crew Manifest.

PILOTAGE: Pilotage on entry and leaving is carried out by the Seine Pilots. Request for a Pilot must be made 12 hours in advance by radio or telephone, either to the Port Captaincy of Trouville-Deauville or to the Pilotage Office for the Seine at Le Havre or at Rouen. Vessels bound for Trouville/Deauville anchor in the "Rouen Waiting Area" roads at Carosse where they take on the Pilot. It is recommended to anchor near the pilot boat of Rouen and contact her by VHF for instructions.

ANCHORAGE: The best one is Rade de la Carosse (49° 27′ 30″ N. 0° 01′ E.).

RESTRICTIONS: No restrictions at night time. Draft allowed 2.80 m. neap tides, 4.0 m. spring tides, Entrance is dangerous with wind from N.W. to N. over force 6.

Access channel has a depth of 2.80 m. and dries out (zero on French charts). Lock gates are opened about 2 hours before time of commencement of flood tide at Le Havre. Lock gates are closed 2.5 hours after time of commencement of flood tide at Le Havre. The fore port and river quays at Trouville are uncovered at low water. The Trouville fishing port is one where craft are beached.

MAX. SIZE: Length: 210 ft. (64 m. OA); breadth: 45 ft.

RADIO: Radio-Boulogne FFB.

TUGS: No tugs available.

STEVEDORES: Loading and discharge by shore crane.

MEDICAL: All hospital facilities available.

DENSITY: 1025.

FRESH WATER: Available from quay.

FUEL: Small quantity by tank-lorry on demand.

CONSULS: See "Caen" or "Le Havre".

REPAIRS: Small repairs only.

AIRPORT: Deuville St. Gaitien 3 miles away.

AUTHORITY: Commandant du Port.

AGENT: See "Paris."

NOTES

Please also advise Shipping Guides Ltd.

French Antilles

BASSE TERRE, Guadeloupe: 15.59 N. 61.44 W.

(See Plan Book)

SHIPMASTER'S REPORT: August 1978

DOCUMENTS:

6 Crew Lists
6 Manifests
Health Declaration Form
6 Lists of stores on board
Passenger List
Clearance from last port

PILOTAGE: Not available.

ANCHORAGE: On an 18 fathom bank North of the pier 2 cables from the shore.

RESTRICTIONS: Vessel can berth and unberth at any stage of the tide, but if vessel's first call, recommend berthing during daylight only.

MAX. SIZE: Max. LOA 155 m. Max. beam 22 m. There is 32–36 ft. alongside but an allowance should be made for a 3 ft. swell, therefore would suggest max. draft approx. 29 ft.

HEALTH: Authorities require 24 hours notice of the vessel's arrival.

RADIO: Fort-de-France call sign "FFP" (high frequency) and Destrellan call sign "FFQ" for medium wave.

VHF: Port Authority on VHF Channel 16.

TUGS: Not available, however a small boat will assist in running lines if the Port Authority is advised in sufficient time on VHF Channel 16.

BERTHING: Length of banana wharf is about 132 m. it is a concrete wharf and well fendered. The banana elevator is only 4 ft. in from the quay. Vessels berth port side alongside. One berth only available which is used for loading bananas. Distance from sea to berth 2 miles. Least depth of water in channel from sea to berth 40 ft. Mean tidal range at berth 6 in.–1 ft. Nature of the bottom at berth – shingle. There are 5 elevators available for loading bananas through the hatches and conveyor bands for loading through the side doors. No cranes available, 1 fork-lift available, capacity 25 tons, loading rate for bananas 550 to 700 cartons per gang per hour.

During the hurricane season (July-November) the banana elevators are removed from the vessel each night when cargo operations cease. There are 2 mooring buoys in line with the ends of the wharf, 200 m. offshore, to assist the vessel to leave the berth when strong onshore winds are blowing.

The 5 elevators run along a rail track and because they are only 4 ft. from the edge of the wharf, great care must be taken when berthing vessels with any sort of flare along the ship's side. Because of the swell and offshore winds make sure the vessel is well made fast with a good drift on all lines.

A shoal area exists ahead of the vessel when lying port side alongside, on leaving the wharf it is advisable to let go aft, heave away on the headlines, cant the bow in, and then move away from the wharf astern before attempting to steam ahead and to starboard away from the shoal area.

STEVEDORES: Each gang consists of 20 men. Working hours: 0700-1100 hrs. and 1300-2100 hrs.

FRESH WATER: Available.

MEDICAL: Doctors and hospital available.

DENSITY: 1025.

CONSUL: None, nearest consuls at Pointe-a-Pitre.

SERVICES: Fresh provisions, groceries and meats available. The following are not available: repair facilities, dry dock, machine shop, airport, surveyors, laundry services, bunker fuel oil, diesel oil, lubricating oil and slop tanks.

WEATHER: The swell is between 3 and 4 ft. from a S.E. direction. The wind is mainly from an Easterly direction.

DEVELOPMENTS: Work is in progress to lengthen the wharf by 200 m.

POINTE-A-PITRE, Guadeloupe: 16.13 N. 61.32 W.

DOCUMENTS:

6 Manifests. See (a).
6 Crew Lists.
3 Stores Lists.
3 Crew Declaration. See (b).
6 Passenger Lists.
4 Declaration of Health.
2 Bills of Lading.
1 Clearance from Last Port.
6 Entrance Declaration.

(a) In addition, 2 sets of Manifests must be airmailed to arrive 72 hours before arrival in Pointe-a-Pitre.

(b) This Declaration must indicate all new and used personal effects.

PILOTAGE: Pilot meets vessels at "Mouchoir Carre" buoys. Advance notice of ETA to be passed 72, 48 and 24 hours, and VHF Channel 16, 1 hour before arrival.

ANCHORAGE: Consult charts.

RESTRICTIONS: Max. length 210 m., max. tonnage 26,000 g.r.t. Max. draft 9 m.

MAX. SIZE: See "Restrictions".

HEALTH: Port Health board on arrival.

RADIO: Destrellan Radio, also on VHF.

TUGS: None available.

BERTHING: 9 berths available, 6 additional for petroleum, sugar, cement, flour mill and bananas.

Quay No. 1	150 m.	Quay No. 5	150 m.
,, ,, 2	180 m.	,, ,, 6	170 m.
,, ,, 3	145 m.	,, ,, 7	150 m.
,, ,, 4	145 m.	,, ,, 8	150 m.

STEVEDORES: 24 hours advance notice of ETA required (72 hours if vessel arrives on Monday). Working hours 0700–1100 and 1300–1700.

MEDICAL: Clinics and Hospital facilities available.

TANKERS: Only tankers having less than 9 m. draft can enter the harbour.

FRESH WATER: Available day and night if requested in advance.

FUEL: Available F.O. 350 seconds Redwood, D.O. for gas oil. Delivered by road tankers.

CONSULS:

Belgium
Denmark
Ecuador
Great Britain
Haiti
Italy
Lebanon
Netherlands
Norway
Spain
Sweden
Venezuela

REPAIRS: Workshops available.

GANGWAY/DECK WATCHMEN: Available on request.

HATCHES: Usually opened and closed by crew. Stevedores will at Master's request but at ship's expense.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle per man.

CARGO GEAR: Ship's gear used.

REPATRIATION: All facilities available.

AIRPORT: 3 miles from the harbour with daily flights to Paris, Miami and New York.

TIME: GMT minus 4 hours. No alterations during the year.

HOLIDAYS: New Year's Day; Shrove Tuesday; Ash Wednesday; Carnival; Good Friday; Easter Monday; Labour Day (1st May); Ascension Day; Whit Monday; National Day; (14th July); Souls' Day; Armistice; Christmas Day.

POLICE/AMBULANCE/FIRE: Police: 82.00.05 or 82.13.17; Ambulance: 82.03.96; Fire Department: 82.00.28.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: I/D or passport required.

REGULATIONS: No particular regulations.

DEVELOPMENTS: 1 deep-water berth length 300 m. for container terminal, 1 berth length 160 m.

AUTHORITY: Guadeloupe Port Authority.

NOTES

Please also advise Shipping Guides Ltd.

Gabon

CAPE LOPEZ: 00.38 S. 08.43 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
3 Lists of Ports of Call.
2 Manifest of Ship's Stores.
Clearance from Previous Port.

PILOTAGE: No official radio station. Pilotage not necessary to approach Port Gentil Roads.

For the private tanker ports at Pointe Clairette and Cape Lopez, pilotage is compulsory. On Cape Lopez Roads Pilot will board vessel in position 0° 37′ S. 8° 44′ E., in a launch carrying proper Pilot signals. The Mooring Master will stay on board throughout the vessel's time in port to assist in mooring, hose handling and loading operations.

ANCHORAGE: The whole of Baie du Prince is a good anchorage, sheltered from winds from S.S.E. through W. to N.W. Depths about 55 m., hard sand, good holding ground. 2 buoys mark the 10 m. line to the South. The waiting anchorage position is 2 nautical miles in a 075°. direction from Cape Lopez lighthouse. Depth of water 70 m.

It is necessary to guard against violent tornadoes occurring between December and May coming from the East or the North. These tornadoes occur very suddenly and are extremely strong.

MAX. SIZE: 250,000 d.w.t. and LOA 340 m. Max. draft 20.50 m. (67 ft.).

Minimum size of vessel: LOA: 215 m. (Approx. 35,000 d.w.t.).

RESTRICTIONS: Berthing is effected only in daylight hours. Vessels which arrive between 1730 hrs. and 0600 hrs. local time should anchor 2 miles – 075° from Cape Lopez lighthouse so as to facilitate moving to the moorings. Unberthing is effected by day or night.

Berthing is not effected in rough weather. At the berth mooring lines must be in good condition and well tended. In case of storm or tornado loading operations must cease and vessel be prepared to leave the berth if so directed by the Terminal Superintendent or Pilot.

RADIO: *Libreville Radio:* Call sign: "TRA" keeps watch on 500 kc/s. and 2182 kc/s. from 0600–1800 hrs. GMT.

Arrival advice: Advise Agent 48 hours and 24 hours before arrival, also if any appreciable alteration thereafter.

VHF: Before vessel's arrival watch is kept on Channel 16. During loading and mooring watch is kept on Channel 6.

TUGS: Owned by Elf-Gabon can be contacted on 2182 kHz. or VHF 16. Ship tow lines are not required, 4 tugs are available up to 1,800 h.p. There are 2 launches for handling mooring lines.

BERTHING: Anchors are not required for mooring operations but must be ready for emergency case. Vessel berths port side alongside. Depth of water along the berth is from 25 to 31 m. Mooring ropes used as follows: fore and aft 3 headlines, 2 breastlines, 2 springs. 2, 3, or 4 tugs are used for mooring operations, in accordance with the d.w.t. Vessel's engines must be ready for immediate operation all the time vessel is at the berth. 2 or 3 tugs will remain standing by. Ship's gangway is not required, an automatic one is supplied by Terminal.

Hose Handling: 5 arms. Diameter of load line 12 in. – 16 in. Loading rate: 12,000 cu.m.p.h.

Loading: Communication between ships and shore loading installations, in any case (loading, fire, etc.), will be effected on VHF Channel 6.

Notice of Readiness: To Elf-Gabon.

BALLAST: Vessels must arrive with clean ballast only. There are no facilities for discharging dirty ballast at the terminal. In no circumstances should dirty ballast be pumped overboard.

MEDICAL: Doctors and hospital facilities available. All vaccinations can be arranged.

DENSITY: Varies between 1021 and 1025.

FRESH WATER: Can only be provided in case of absolute necessity by barge on Port Gentil Roads.

FUEL: 1,500 secs. and 3,500 secs. fuel can be supplied by barge subject to 48 hours notice.

CUSTOMS ALLOWANCES: No restrictions for quantities tobacco and spirits held on board the ship. It is prohibited to allow dutiable articles to leave the ship.

CONSULS: France. Tel. 2086.

REPAIRS: There are facilities for hull and engine repairs for barges and river craft. Slipway for vesels up to 300 tons.

AIRPORT: Can be reached in 15 minutes by road. Regular services to Europe every day.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: Holidays do not affect tanker working.

POLICE/FIRE/AMBULANCE: Police tel. 17; Fire tel. 18; Ambulance tel. 23-33.

REPATRIATION: Facilities available. Contact ship's Agent.

SHORE LEAVE: Crew members are allowed ashore. There is no regular immigration control but identification papers should be carried.

SHIPMASTER'S REPORT: 1977

This vessel is an OBO carrier of 159,250 d.w.t. and called for a part cargo of 85,000 tons of Mandji Crude.

Mandji Crude has an API of between 30.0 and 30.4 and was on this occasion loaded at 97°F.

It appears to be wax free and has a slight suspended water content.

Vessel size: Accepts vessels from 35,000 d.w.t. to 250,000 d.w.t., max. sailing draft is 67 ft.

Berth: Berth face about 420 ft. long with connected mooring posts. "Floating" type fender piles. Pilots are cautious of impacts as berth is piled into very deep soft mud. Moorings on our visit were: Forward: 3 head lines, 2 breast ropes and 2 springs. Aft: 3 stern lines, 2 breast ropes, and 2 springs. (See Plan Book).

The springs were sent ashore first, fore and aft.

All lines are run, 1 at a time, by mooring boat, and there is no problem running wire rope moorings.

There is a shore gangway mounted on a tower.

Load Rate: Total max. rate of 12,000 t.p.h. using 4 chicksan loading arms. The connections are 16 in. and hydraulically coupled.

Berthing: Straight forward operation, no significant currents, vessels tie up bow out, port side to jetty.

Berthing Operations: From end of passage to all secure was accomplished in just over 3 hours, from Pilot aboard to secure took 2 hours.

Connection of the loading arms used by this vessel took 1 hour.

From commencement of singling up to Pilot away took 1.5 hours.

Tugs: There are 2 modern 3,000 h.p. Kort Nozzle tugs and 1 older tug of 2,000 h.p. stationed in the port. The larger tugs made fast fore and aft, and the smaller pushed midships. On sailing only one of the larger and the smaller tug were used. The tugs normally use their own lines and remain fast until mooring is completed.

Weather: Mild and pleasant apart from tornadoes which occur from October to May, but especially February, March and April.

These spring up without notice to very violent winds in minutes, and though it is understood loading may be suspended, the tugs are used to assist vessel to remain on the berth if required.

Bunkers: A bunker line is being installed on the jetty, a barge is used temporarily, but it is understood that delays can be expected in taking bunkers, and they must be ordered beforehand from Elf Paris.

Fresh Water: Said to be available by barge from Port Gentil.

Usage: According to the Pilot, about 12 ships a month use the berth.

Slop Reception: There are no facilities, vessels must arrive with clean pumps and clean lines.

Radio: Tugs and Pilot are on VHF 16 and Marine and Terminal Operations are on VHF 6.

Repairs: Doubtful if any repairs could be undertaken, possibly in emergency the refinery workshops would assist.

Communications: There are regular daily flights to Libreville, and connections from there worldwide with minimal delay. Flight time Cape Lopez to Paris is said to be 7 hours.

Crew Changes: Could be carried out easily from a point of transportation, but Port Gentil only has 1 hotel and 1 guest house and they are stated to be full to capacity at all times.

Medical Service: Could not be obtained because vessel berthed on Saturday. However, there is a hospital.

Chandler: The port has a chandler, but there is no local produce whatsoever, all vegetables, etc., being airlifted from France and prohibitively expensive.

Cargo: Mandji Crude at loading temperature 95° to 100°F., API 30.25, has slight percentage suspended water.

Shore Leave: Permitted, but walking through the installation is forbidden for security reasons, and transportation is apparently difficult to obtain.

General: I understood no clearing or formalities are completed until vessel is berthed.

Pilotage: Mooring Master now performs pilotage only and leaves after berthing.

Accommodation: No longer required to provide accommodation for shore people.

AUTHORITY: Elf Gabon, Port Gentil.

AGENT: Socopao-Gabon BP 560, Port Gentil. Tel. 52491. Cables: "Freight Portgentil". Telex: 8223.

GAMBA: 02.50 S. 09.59 E. (See Plan Book)

SEA TERMINAL: SBM.

DOCUMENTS:

Last Port Clearance.
2 lists of Last Ports (during last month).
2 Stores Lists.
2 Crew Lists.
2 Personnel Effects Lists (Not compulsory but advisable).
1 Notice of Readiness.

APPROACHES: The approaches to the terminal are open deep water. Gamba sea terminal fairway buoy is located in position 2° 50.1′ S. 9° 56.5′ E. Black buoy. Group Occ(2) 10 secs. Visibility 4 miles.

The single buoy mooring is located in position 2° 50.1′ S. 9° 58.9′ E. and exhibits a white flashing light, visible for 5 miles.

Gamba Lighthouse: Lattice tower. Red and white. Height 47 m. Green flash 2/10 secs. Visibility 21 miles. Position, Lat. 02° 47.0′ S. Long. 10° 01.4′ E.

READINESS: The notice of readiness will be received and accepted by the Berthing Master at the anchoring time if the ship is delayed on request of the Terminal (scheduled delays, awaiting cargo, awaiting orders, weather conditions, etc.) or at the time of mooring if the ship is berthed on arrival.

PILOTAGE: All tankers mooring at Gamba SBM must use the Shell Gabon Pilot who should also be used for unmooring.

Berthing Master boards tankers at the following position: Lat. 02° 50.0′ S., Long. 09° 57.0′ E.

The Berthing Master and his assistant will remain on board throughout loading. The Berthing Master also acts as ship's Agent and focal point for liaison with the shore; communications with the terminal by VHF (portable sets for ships not equipped with VHF are supplied).

The pilot boat/mooring launch which assist mooring/unmooring will stand by throughout loading. For this purpose a mooring rope will be provided aft, by the tanker.

ANCHORAGE: 1.5 miles N.W. from SBM in 60 ft. depth. Vessels anchor without assistance.

RESTRICTIONS: Heavy swell and tornadoes (October to May tornadoes can come from any direction and are always dangerous).

MAX. SIZE: Draft only factor, max. 44 ft.

HEALTH: When advising ETA include in message whether any sickness on board. In case of emergency vessels should call before or after loading at Port Gentil for medical attendance or for crew changes. For this purpose send separate message to "Marine Gamba" and to Agency.

RADIO: Established contact with Gamba Radio (call sign TRP 8) soon as possible. ETA should be sent at least 4 days before arrival in Gamba to "Marine Gamba" via Gamba Radio. Thereafter keep close contact on telephone with Gamba Radio MF (2182) and VHF Channel 16.

Gamba Radio (TRP 8) Service:

Telegraphy A1	500 W Watch on 0700 to 0900 hrs.
Telegraphy A1	2 kW

VHF 6 3	Maintains watch on 2182 kHz from 0800 to 0900 hrs. and from 1400 to 1500 hrs. Working frequencies 1877 kHz-2678 kHz. Range about 300 miles depending on atmospherics.
VHF F 3	50 W. Call sign "Marine Gamba". Watch on Channel 16. Working on Channel 16. Range about 50 miles.

24 hours service in French language. Watch in English language during office hours (0600 to 1100 hrs. and 1300 to 1515 hrs.).

Pilot Launch Service	
	20 W Watch on Channel 16 (when at sea). Range about 20 miles.
Terminal Gamba	
	20 W Watch on Channel 16. Working on Channel 11. Range about 20 miles, used only for loading operations.

Radio Beacon: Continuous airplane radio beacon call sign GZ, frequency 359 kHz. Position: Lat. 02° 46.8′ S. Long. 10° 02.3′ E.

N.B. All hours in GMT.

BERTHING: Berthing takes place both by day and by night. If a Shipmaster refuses to berth by night, delays will be charged to his vessel.

Depth and draft: Depth at berth: 59 ft. From this figure must be deducted the height of the manifold which is 5 ft., thus leaving a controlling depth of 54 ft. A nominal underkeel clearance of 10 ft. is allowed to take account of ship movement caused by swell. This leaves an approved safe draft of 44 ft.

SBM Description: The buoy is 8 m. in diameter, 4 m. high. A double 16 in. manifold is provided on the turntable (one pipe is blanked) 90° clockwise from the tanker securing point. The SBM is moored by means of 8 chains which are secured to the seabed by 120 tons holding power anchors.

MOORING: Recommended that vessel should be trimmed max. 8 ft. by the stern on arrival.

Ships must have ready on the forecastle, and before approaching the SBM, four synthetic mooring lines lashed two by two each side. These mooring lines will be connected to the pickup wires by the mooring launch by means of shackles and heaved up until the triangular plates are on board and are in turn connected to the mooring wires by means of forelock shackles. If vessel is not fitted with central fairlead, the most forward fairleads on either side will be used.

Vessels moor with two 12 in. nylon ropes (length 33 m.) from SBM secured on board ship by two 2.25 in. chain cables plus two 3.25 in. wires which provided by terminal. Berthing Master will advise in detail mooring procedure.

LOADING: A derrick should be rigged with double whip and topped on the port side for loading mooring equipment and hose lifting.

Shore Line System: SBM – 1×28 in. submarine pipe-line (total length to Terminal 7.3 km. (24,000 ft.)). Reduced to 12 in. for connection to ship's manifold (total length of floating hoses: 720 ft.).

Gamba Crude Characteristics:

Density at 15° C:	0.8663	Salinity:	20 to 35 Mg/Kg
API at 60° F:	31.75	Cloud point	39° C
BSW:	0.40%	Wax:	18%

Connection/Disconnection: Connection and disconnection are carried out by ship's crew with advice from Berthing Master. The hose is connected amidship on portside and is ended by a 12 ins. reducer having A.S.A.B. 165 flanges.

If there are no suitable reducers available on board, Gamba Terminal should be advised by radio giving size of ship's manifold and pitch of bolt holes.

Loading: During the loading the Berthing Master remains on board and acts as Loading Master. He is in permanent contact with terminal by VHF.

If necessary the pumping rate can be reduced at any moment. The Loading Master will be advised at least one hour before the completion of the loading. The average loading rate is 2,700 cu.m. per hour.

Papers: The Loading Master receives by VHF shore figures from the Terminal about one hour after the completion of the loading. All documents are completed before the departure of the ship. Two sets of documents are delivered to the Master: one for his own purpose and one for the Consignee.

Engines: Engine immobilisation is forbidden at the SBM. Engines should be kept ready for use at any time at the Berthing Master's request.

MEDICAL: No medical or dental facilities at Gamba (See "Health").

DENSITY: 1025.

FRESH WATER/FUEL: Not available.

REPAIRS: No facilities available.

BALLAST: There are no facilities for discharging ballast ashore. Vessels must arrive at the loading terminal with clean ballast only, apart from contents of the slop tank.

GANGWAY/DECK WATCHMEN: Not required.

CUSTOMS ALLOWANCES: No restrictions on Tobacco/Wine.

IDENTIFICATION CARDS: Not required.

CONSULS: None, French consul in Port Gentil.

REPATRIATION: Facilities available.

AIRPORT: Gamba airport is local airstrip and is connected to Port Gentil by daily service (Except Sunday). Port Gentil airport is connected to Libreville International airport by daily services. Mail reaches any European country within seven days.

TIME: GMT plus 1 hour throughout the year.

GENERAL: The use of Channel VHF 9 is forbidden.

SHORE LEAVE: Not allowed.

AUTHORITY: Shell Gabon, Port Gentil (Gabon).

AGENT: See "Port Gentil".

LIBREVILLE: 00.23 N. 09.26 E.

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" and (subject to C/P terms) laytime will commence is 2 miles off shore at Libreville harbour.

DOCUMENTS: See Port Gentil.

PILOTAGE: None available.

ANCHORAGES: Bottom of roads in Libreville slopes very gently down towards open sea. The greater the vessel's draft, the further out it must moor. E.g., ship of 7 to 8 m. draft will be moored approx. 1,500 m. from Harbour Pier. Ship 5-6 m. draft will be able to approach the Harbour Pier as near as 500 to 600 m. For reasons of safety, forbidden to come nearer, particularly during tornado season – February to May and September to December.

RESTRICTIONS: No restriction imposed on entering or leaving the Estuary. Channel marked by 5 buoys provided with radar reflectors and flashing lights. Sixth buoy, called a "landing buoy" moored in roads, where vessels moor.

HEALTH: If there is sickness on board, Health Service warned by Consignor of vessels. Health Service can go on board to check state of crew's health. Immigration Service can also board to check crew list and condition of passengers, if any.

RADIO: *Libreville Radio:* Radio-telephony from 0600 to 1800 hrs. GMT on 2182 kc/s, Radio-telegraphy from 0600 to 1800 hrs. GMT on 500 kc/s, call sign TRA 22; from 0800 to 0830 hrs.on 13101 kc/s, call sign TRA 8; from 1630 to 1700 hrs. GMT on 8722 kc/s, call sign TRA 8.

TUGS: Tugs intended only for towing lighters, horse power 150 to 250, unsuitable for any harbour towing.

BERTHING: Only for lighters and small coasters with a draft of less than 3 m. Crews working unloading or loading of vessels in roads supplied by Consignor of the ship. Harbour Services have no radio apparatus. Shipping companies all have radio-telephone extensions, which allows them to be in permanent contact with vessel moored in roads. Unloading or loading operations of goods carried out by lighters which, towed by small tugs, ensure rotation between vessel in operation and quay. All this equipment belongs to shipping companies dealing with consignment of vessels in the roads. Every vessel arriving in roads must have its consignor.

STEVEDORES: Available.

MEDICAL: Hospital available, and in case of necessity, patient or patients will be admitted.

FRESH WATER: Water supply real problem, as there is no tanker to transport it. Therefore strongly recommended that any ship touching Douala coming from the North or Pointe-Noire coming from South, should fill up at one of these ports.

FUEL: There are fuel-tankers belonging to shipping companies. The ship-tanker which provisions Libreville 2 or 3 times a week is brought alongside buoys in roads, at 1,650 m. (position: Lat. 0° 23′ 51″ North, Long. 9° 25′ 71″ East); fuel is transhipped by sea-line to tank on shore.

FIRE PRECAUTIONS: No special precautions.

GANGWAY/DECK WATCHMEN: Carried out by crew.

OPENING/CLOSING HATCHES: This is done with the tacit agreement of the ship's Officer and the Consignor.

CARGO GEAR: Ship's own gear used.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCKS: None.

REPATRIATION: No facilities.

AIRPORT: 9 km. from the harbour. Links with French-speaking Africa, Switzerland, and France, also Johannesburg.

TIME: GMT plus hour.

HOLIDAYS: 17th August, Independence of Gabon; 1st May, Labour Day – these are the only holidays in force.

SERVICES: None.

SHORE LEAVE: Allowed.

DELAYS: First come, first served method.

AUTHORITY: Capitainerie du Port.

AGENTS: Socopao-Gabon, B.P.4., Libreville. Tel. 72.21.40 and 72.21.53. Telex 5252. Cables "Freight Libreville".

LUCINA MARINE TERMINAL: 03.40 S. 10.46 E. (See Plan Book)

DOCUMENTS: See "Gamba".

APPROACHES: Navigation aids:

West buoy: Gp. Occ. (2) 10 secs. 03° 40.0′ S., 10° 44.3′ E. Black and white buoy showing West marker and radar reflector fitted.

North buoy: Gp. flashing (3) 10 secs. 03° 38.5′ S., 10° 45.7′ E. Black and white buoy showing North marker and radar reflector fitted.

East buoy: Gp. flashing red (3) 10 secs. 03° 40.0′ S., 10° 47.3′ E. Red and white buoy showing East marker and radar reflector fitted.

Platform LD 2: The beacon of this platform consist of two white Morse code lights: letter U.

Platform LD 1: One white Morse code light: letter U. The flare installed on the Production platform LP 1 is very conspicuous.

SBM light: Position: Lat. 03° 39.6′ S., Long. 10° 46.2′ E. One flash 0.3 secs. each sec. Visibility 5 miles.

Storage tanker: The storage tanker is showing the lights of a ship at anchor. During the hours of darkness all deck lights are switched on.

NOTICE OF READINESS: See "Gamba".

PILOTAGE: Berthing Master boards vessel in position Lat. 03° 39′ S., Long. 10° 44′ E. Also see "Gamba".

ANCHORAGE: Vessels must anchor without assistance. Recommended anchorage: in 19 fathoms about 1.5 miles North West of storage tanker.

RESTRICTIONS: No draft restrictions. Depth of water can be assumed to be 114 ft.

HEALTH: See "Gamba".

RADIO: All messages sent to "Marine Gamba" through Gamba Radio TRP 8 (see Gamba).

ETA: Should be sent to "Marine Gamba" via Gamba Radio. First ETA should be sent at least 4 days before arrival.

VHF: Vessels should call Marine Gamba on Channel 16 during office hours when passing Gamba area. Permanent watch on Channel 12, on the storage tanker and the mooring launch.

BERTHING:

Description and Location: The development consists of six oil producing wells, which are protected by two single four-pile platforms, LD 1 (03° 41′ S., 10° 44.3′ E.) and LD 2 (03° 41.8′ S., 10° 45′ E.). Production facilities are located on four-pile platform LP 1 which is connected by a bridge to the adjacent platform LD 1. A 35,000 TDWT tanker, s/s "Volvula", which serves as floating unit of storage, is moored by means of ten anchors in position 03° 40′ S., 10° 45.8′ E. The tanker is connected with a SBM via a submarine line, length 1 km.

SBM description: The buoy is 8.5 m. in diameter and 4 m. high. Connections for submarine lines from the FUS are provided on the bottom of the centre swivel section which is free to rotate. (Other details same as Gamba).

Nylon moorings: Vessels moor with two 15 in. nylon ropes from the SBM and are secured on board ship by two 56 mm. dia. stud link chains plus two 3.25 in. wires which are provided by the terminal. Both nylons are 45 m. long.

Floating hose and submarine line: 1×20 in. submarine pipe-line, length 1,100 m. from the FUS. SBM connected to 1×16 in. floating line reduced to 12 in. for connection to ship's manifold. Total length of floating hoses: 860 ft.

Mooring: See "Gamba".

LOADING: *Lucina Crude Characteristics:* Density at 15° C.=0.8258; API at 60° F.=39.8; B.S.W.=Nil; Salinity=3 to 5 mg/kg; Cloud point=27° C.; Wax=14%.

Loading rate: Average loading rate 2,400 cu.m.p.h.

Connection/Disconnection: See "Gamba".

DEBALLASTING: See "Gamba".

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities. Engines not to be immobilised whilst at the SBM.

REPATRIATION: Not possible.

TIME: GMT plus 1 hr. throughout the year.

SHORE LEAVE: Not allowed.

AUTHORITY: Shell Gabon, Port Gentil.

OVENDO: 00.17 N. 09.30 E. (See Plan Book)

SHIPMASTER'S REPORT

Vessel, length 156 m., breadth 22.0 m. Draft (at the time, 30 ft.).

APPROACHES: The channel buoys showed very well on radar on the 3 and 6 miles ranges, even during heavy rain, but the lights on the red buoys are poor and all buoys occasionally unlit.

ANCHORAGE: Depths in the channel and river were found to be as stated during low water with a depth of 33 ft. over all the anchorage. Maximum draft allowed at this time was 30 ft.

The holding ground is good, 4 shackles were used for a total ship weight of 19,000 tons plus a small coaster alongside.

The tides are regular with only a very short slack water period, and run at between 4 and 6 knots.

PILOTAGE: There are 2 French Pilots who may be contacted on VHF Channel 16 when in range, they are ordered by the Agent to berth vessels only, although they will pass on advice to vessels regarding anchoring.

TUGS: There is 1 tug of approximately 1,000 h.p. which assists in berthing, either towing or pushing.

BERTHING: Well fendered modern concrete quay, 450 m. in length, laid out as per plan in the Guide. The normal practice is for there to be 2 ships of around 150 m. and one smaller ship alongside at one time. The inshore side of this quay is for small craft only.

Depths alongside Berth No. 1, 23 ft.; No. 2, 18 ft. and No. 3, 22 ft.

FRESH WATER: This is obtainable while alongside the quay but only in a dire emergency at the anchorage from the tug which can supply up to 8 tons.

REPAIRS: Only very small repairs are possible and it is suggested that a receipt is obtained for any parts sent ashore.

REPATRIATION: There are 2 planes a week from Libreville to Paris and approximately 12 planes weekly to Abidjan.

SHIPCHANDLER: There is no chandler for any form of stores, the only possibility being self-purchase at the local (Libreville) supermarket. All goods are imported and therefore very expensive.

HOLIDAYS: 12th March. Gabonese independence.

MARINE CLUB: There is a marine club about 1 km. from Ovendo in the Libreville direction (swimming pool, etc.).

AGENT: See "Libreville".

PORT GENTIL: 00.43 S. 08.48 E.

On the coast of Lopez Island.

APPROACHES: Buoyed channel, lit at night. Min. depth 15 m.

DOCUMENTS:

Cargo Manifest.
Store List.
Crew's Personal Effects List.
Crew List.
List of Ports of Call (not compulsory).
Health Certificate.
Ship's Official Papers.

PILOTAGE: No Pilot necessary. However Port Authority will arrange Pilot if given 12 hours notice. Pilot boat is a tug. Pilot taken on board at bank buoy.

ROADS/ANCHORAGES: Ships having commercial operations carry them out at anchorage on a line with anchorage buoys (reserved for lighters and tugs) 1 mile S.E. of the Mole in depths 10 to 20 m. 1,500 acres (approx.) of safe shipping anchorage.

Anchorage for several ships of deep draft well sheltered from predominantly S.W. winds during months June, July, August and September. During season of tornadoes (January to end April) which blow from N.E. a fairly heavy sea quickly rises and vessels should anchor at least 600 m. from land.

Max. rise of tide 2 m. 2; average 1 m. 70; min. 0 m. 40.

RADIO: Libreville radio. R/T 2182 kc/s. – Harbour Master.

TUGS: Not required.

BERTHING: No berths. Loading and discharge at anchorage carried out by lighters and flat-bottomed boats. Boat Quay (Mole) has length of mooring quays (suitable only for flat-bottomed lighters and tugs) of 200 m. and depths of 2.50 m. at low tides. Total Mole area approx. 5 acres, comprises Customs Zone with warehouses, offices, wharves, etc.

MEDICAL: For attendance call Harbour Master R/T 2182 kc/s. Smallpox and yellow fever inoculations required.

TANKERS: To N.E. of Mole is petrol pipe-line unloading point for small tankers, tying up on buoys, max. length 70 m., 5 m. draft. Prince's Bay, loading point for unrefined petrol by sealine is available to North of Prince's Bay (see "Cape Lopez").

FRESH WATER: Delivery by lighters, capacity 200 tons. Loading time 2 hours.

FUEL: 3 days notice required. Fuel oil viscosity 1,500 and 3,500 seconds Redwood available. Delivery by 200-ton tankers, every 5 hours.

WATCHMEN: Not necessary.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No limitations on tobacco, wine or spirits.

CONSULS:

Switzerland		Tel. 20–19
Holland	BP. 792	Tel. 28–09
France	BP. 511	Tel. 20.86
Sweden	BP. 518	Tel. 21.71

REPAIRS/DRY DOCKS: Not available.

REPATRIATION: Obtainable on medical grounds. No facilities for crew changes.

AIRPORT: 4 km. distant. Regular services.
TIME: GMT plus 1 hour. No alterations.
HOLIDAYS: No work on Independence Day 17th August.
SHORE LEAVE: Permitted.
AUTHORITY: Capitainerie du Port.
AGENT: Socopao–Gabon, B.P. 560. Tel. 524–91. Telex 8223. Cables "Freight".

NOTES

Please also advise Shipping Guides Ltd.

Gambia, Republic of

BANJUL: 13.27 N. 16.34 W. (See Plan Book)

DOCUMENTS:
7 Crew Lists.
7 Passenger Lists.
7 Ports of Call Lists.
Health Documents.
Deratisation (or Exemption) Certificate.
Yellow Fever Innoculation Certificates.
Smallpox Vaccination Certificates, all valid.
Customs Crew Declaration.
2 signed copies of Manifest.
Bills of Lading (may be sent in advance of vessel).

PILOTAGE: ETA and draft to be communicated to "Harbour Master Banjul" 48 hours before ETA and confirmed 12 hours before. Vessel arriving Monday ETA preferably not later than Saturday morning.

Pilot station situated in Harbour Master's office has VHF station, calling Channel 16 (156.80 mHz) working Channels 12 (156.60 mHz) and 14 (156.70 mHz). Continuous listening watch kept 0800 – 1500 hrs. Monday – Friday. 0800 – 1300 hrs. on Saturday. Listening watch at weekends if vessels are expected. Reception generally good within 100 nautical miles radius. Pilot boat has grey hull and buff superstructure, exhibiting usual signals.

Pilotage from any point inwards from Fairway Buoy by request, but compulsory from No. 5 Buoy inwards.

ANCHORAGES: Good and spacious anchorages to the East and Southeast of Government wharf in depths of 8 to 15 fathoms.

RESTRICTIONS: Vessels may enter and proceed to anchorage at all times and states of tides. Minimum depth in sea approach channel is 28 ft. LWOS. Average rise of spring tides 6 ft., neap tides 4 ft.

MAX. SIZE: Maximum length 600 ft. maximum draft 27 ft. (Banjul Wharf) 20 ft. (Government Wharf). For vessels anchoring only, length unlimited.

HEALTH: Vessels exhibit the appropriate International Code signals. Port Health Officer usually boards the vessel at the harbour anchorage or alongside between 0800 and 1700 hrs. daily, at all times in case of emergency.

RADIO: Banjul Radio call sign C5G. Radio Telephone 2182 kHz (calling) 2756.4 kHz. 1100 – 1200 hrs., 1400 – 1500 hrs. (weekdays) Sundays – on demand.

RADAR/VHF: No port radar station. Port VHF. See "Pilotage".

TUGS: One tug of 1,000 h.p.

BERTHING: Maximum permissible draft alongside; Banjul Wharf 27 ft. Government Wharf 20 ft. Government Wharf berthing face 294 ft. with 1 dolphin in line 100 ft. from North end. Mooring bollards on foreshore. Banjul Wharf berthing face 400 ft. mooring dolphin each end, set back from wharf face. Inner berth of length 335 ft. suitable for small vessels up to 17.5 ft. draft. Public Jetty berthing face 196 ft. maximum draft 11 ft.

BRIDGES: No bridges.

STEVEDORES: Normally 48 hours notice addressed to Agent. If arriving Monday preferable agent notified requirements latest Friday. Normal working hours 0730 – 1900 hrs.

MEDICAL: Emergencies and cases requiring hospitalisation attended to at all times, giving as much advance notice and information as possible. Other cases attended to as convenient to ships after arrival. For certificates required see "Documents". Inoculation and vaccination yellow fever/smallpox given on request.

TANKERS: Tankers (discharging only) berth on Banjul Wharf. Maximum permissible draft 27 ft. Discharge of residue and bilge prohibited. Ballasting by permission of Harbour Master.

DENSITY: Normally salt water at Banjul, reducing to about 1020 ozs. per cu.ft. during River Gambia flood water period: August – February.

FRESH WATER: Fresh water available at both Government and Banjul wharves from hydrant. Notice of requirements should be sent with ETA. No water barge. D5.00 per 1,000 gallons.

FUEL: Bunkering facilities available at Banjul Wharf through pipeline and road tankers for reasonable quantities. Also available at Public Jetty for small craft (11 ft. draft). Advance notification required for all bunkers.

FIRE PRECAUTIONS: For tankers and vessels carrying explosives Fire Brigade will be in attendance.

DEVELOPMENTS: This envisages the commencement of Phase II of the Banjul Port Project as trade develops and ultimate embarkation of Phase III.

GANGWAY/DECK WATCHMEN: Recommended. By arrangement with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES: Registry, Articles of Agreement, Load Line, Safety, Safety Equipment Radio Licence/Certificate.

CUSTOMS ALLOWANCE: Reasonable allowance of wine/spirits and tobacco/cigarettes out of bond, as per Master's request.

CARGO GEAR: In accordance with UK Factories Act. Ship's lifting gear for loading and discharging, also 4×6 ton and 1×30 ton mobile cranes available.

CREWS IDENTIFICATION CARDS: Needed.

CONSULS: In Banjul: Belgium, Denmark, France, Lebanon, Norway, Spain, Sweden. U.S.A. has resident charge d' Affairs and U.K. has High Commissioner. Senegal has resident Ambassador.

REPAIRS: Minor hull, deck and engine repairs and welding undertaken by G.P.A. dockyard.

DRYDOCK: A slipway of capacity of 500 tons displacement is included in the dockyard facilities.

REPATRIATION: Possible.

AIRPORT: Airport 14 miles from Banjul. Regular services.

TIME: GMT kept throughout the year.

HOLIDAYS: New Year's Day (1st January); Independence Day (18th February); Good Friday, Christmas Day, Boxing Day, Islamic Festivals of Eid-El-Fitr (Ramadan) and Eid-El-Kabir. No cargo work on Islamic Holidays.

TELEPHONE: Telephones installed on board at ships/Agent's request.

GENERAL: The Ports Authority operates 3 lighters each of 9,900 cu.ft. capacity. Lighters may be hired for discharging ship at anchor and transhipments up river.

A private company operates a large fleet of lighters, mainly for transporting groundnut from river ports to Banjul. Ships stores: fresh vegetables, beef and fish, fruit (in season) and bonded stores are available.

Other Ports: River Ports: Kaur and Kuntaur at 118 and 150 miles upriver respectively from Banjul. River Pilots available at Banjul. Max. loaded draft 17 ft. 06 in.

SHORE LEAVE: No restriction on normal shore leave.

AUTHORITY: Gambia Ports Authority.

NOTES

2 Passenger Lists.
2 Money Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory. Contact by VHF Channel 16, working Channel 12. Pilot boards at Warnemunde light buoy. International code signals used.

ANCHORAGE: In Warnemunde Roads, off port entrance, in depths of 48 ft.

RESTRICTIONS: Entrance channel from Warnemunde light buoy to Overseas Port at mouth of River Warnow, depth 37 ft. LW.

MAX. SIZE: For Overseas Port: length 230 m., beam 32 m., draft 37 ft. For City Docks: 142 m. length, 21 ft. draft. Also see "Tankers".

HEALTH: Pratique given on arrival. In case suspected disease or fever on board, radio details to Agent before arrival. Complete declaration of health required.

TUGS: Available. Use of at least 1 tug is compulsory for vessels berthing and unberthing.

Sufficient number of tugs available, ranging from 300 to 1,200 h.p. Tugs normally join vessel in front of the mole.

BERTHING: *Overseas Port:* Situated in Lower Warnow River about 3.8 miles from Warnemunde sea buoy.

Pier No. 1: 6 berths General goods depth 30 ft. to 33 ft.
Pier No. 2: 7 berths General goods depth 30 ft. to 33 ft.
Pier No. 3: 4 berths Bulk cargoes depth 30 ft. to 33 ft.
Pier No. 4: 4 berths Bulk, General, Ro-Ro depth 25 ft. to 35 ft.
Oil Pier: 3 tanker berths depth 31 ft. to 37 ft.

City Docks: In Warnow River, about 6 miles from sea. Total quay length 1,600 m. depths alongside 21 ft and 18 ft. Grain elevators shooting capacity 42 t.p.h., suction capacity 33 t.p.h.

Warnemunde: Port for passenger service. Quay length 180 m. Depth alongside 25 ft. 06 in.

Port Control to be contacted through VHF Channel 14.

Roll-on/roll-off terminal with facilities for 20 ft. and 40 ft. containers. Max. draft 25 ft.

CRANES: *Overseas Port:* 64 cranes and crane-bridges with capacity from 3.2-20 tons. A self-propelled floating crane "Goliath", for heavy lifts not exceeding 100 tons is available.

City Docks: Crane capacities 2-10 tons.

BULK HANDLING FACILITIES: 3 berths, length of quay 720 m. Six bridges with 20 tons capacity and outreach of 40 m. Storage area 13,200 cu.m. for 90,000 tons of bulk cargo.

TANKERS: 3 berths available. Max. length 230 m., Max. draft 37 ft.
Berth No. 12, 33 ft. (max. LOA 215 m.)
Berth No. 13, 37 ft. (max. LOA 230 m.)
Berth No. 14, 31 ft. (max. LOA 215 m.)
Storage capacity of 120,000 cu.m. Max. discharge rate 2,900 cu.m. per hour.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

FRESH WATER: Available ex-shore hydrants or water-boat.

FUEL: Available all grades fuel and gas oil by barge. Vessels calling for bunkers only, pay no harbour dues, and other fees are reduced.

REPAIRS: All repairs possible. Floating crane available. Neptun Shipyard and other repair shops situated at City Docks. Warnow Shipyard and floating dock situated in Overseas Port.

DEVELOPMENTS: Plans to build a floating island in depth of 21 m. off Rostock to accommodate tankers up to 100,000 tons. Estimated discharge rates up to 3,000 t.p.h. into smaller vessels for transfer to existing oil terminal.

REPATRIATION: Can be arranged if identification papers in order.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

AIRPORT: Berlin.

TELEPHONES: Ship-to-shore connections available.

POLICE/AMBULANCE/FIRE: Ambulance 363-3500; Police 366/3333; Fire 366/2222.

SHORE LEAVE: Crew members permitted ashore.

AGENT: VEB Schiffsmaklerei, Rostock, Strandstr 86. Telex: 31265 (Head office). Port office, City Telex: 31265, Tel: 37081 (ext. 2267). Agency Overseas Port, Telex: 31286, Tel: 366-3962/65.

STRALSUND: 54.18 N. 13.06 E. (See Plan Book)

DOCUMENTS: Health Declaration.

2 Passenger Lists.
2 Money Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory. Contact Pilot by VHF Channel 14. Pilot stations are at Barhoeft and Thiessow. Pilot boards vessel at Gellen (North-West entrance) and Landtief (Eastern entrance).

Entry only possible from one hour before sunrise to one hour after sunset. (North-west entrance only).

ANCHORAGE: In the roads clear of the fairway, depths 26 to 30 ft.

RESTRICTIONS: Northern entrance between breakwaters is 11 ft. 06 in. depth used by smaller vessels only. Eastern entrance, depth 17 ft. MLW.

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

TUGS: Available and compulsory for vessels of over 1,000 g.r.t. berthing and unberthing.

MAX. SIZE: Vessels up to 17 ft. draft.

BERTHING: Depth alongside quays up to 17 ft. maximum. Length of quays 1,100 m.

CRANES:

2 cranes	10 tons capacity; reach 20 m.
2 cranes	2 tons capacity; reach 20 m.
1 crane	5 tons capacity; reach 22 m.
2 Elevators	capacity 25 t.p.h. each.

Also a conveyor system for handling of salt with a capacity of 60 t.p.h.

FRESH WATER: Available from shore ex pipe-line.

FUEL: Gas oil and lube oil available. By barge.

REPAIRS: All deck, hull and machinery repairs by local shipyards.

REPATRIATION: All facilities exist for changing crews.

AIRPORT: Berlin (Schonefeld).

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

AGENT: VEB Schiffsmaklerei Rostock. Agentur Stralsund 23 Stralsund. Hafen – Ballastkiste. Tel. 692362. Telex 0 31 85 24.

WISMAR: 53.54 N. 11.27 E. (See Plan Book)

DOCUMENTS:
Health Declaration.
6 Crew Lists.
2 Passenger Lists.
2 Money Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory from outer roads to harbour quays. Pilot boards at Wismar sea buoy. International code signals used. Contact by VHF Channel 12.

ANCHORAGE: In outer roads between Hannibal Shoal and Poel Island in depths of up to 40 ft. Protected anchorage in inner roads, depths up to 30 ft.

RESTRICTIONS: Entrance to the port is through a buoyed channel 15 miles long, depth 27 ft. LW. Vessels over 120 m. LOA. enter in daylight only, turning basin 250 m. diameter.

MAX. SIZE: Length up to 170 m. Max. draft 27 ft. Vessels over 165 m. LOA, max. draft 26 ft.

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

TUGS: Available and compulsory for berthing and unberthing.

2 tugs of 800 h.p. Tugs join vessel according to the Pilot's instruction.

BERTHING:

Grain Quay: Max. draft 27 ft., quay length 160 m., 2 grain elevators, grain silos for 20,000 tons.

Potash Port: Max. draft 27 ft., mechanical potash loading plant, quay length 360 m., 3 loaders.

Oil Port: Max. draft 27 ft., max. length 200 m.

Timber Port: Max. draft 25 ft., quay length 400 m., 2 gantry cranes of 3.2 tons, 1 mobile crane (30 tons).

Old Port: Max. draft 16 ft., quay length 140 m., no handling operations, fishing port, waiting berths.

Seaport, Northern Quay: Max. draft 27 ft., quay length 420 m., 5 gantry cranes with a capacity from 3.2 to 12 tons. One mobile crane of 30 tons capacity and one floating crane of 100 tons capacity.

Seaport, Southern Quay: Max. draft 27 ft., quay length 500 m., 3 semi-gantry cranes with a capacity from 3.2 to 10 tons.

FRESH WATER: Available from shore hydrants at all berths.

FUEL: All grades fuel and gas oil obtainable. Vessels calling for bunkers only, pay no harbour dues, and are allowed a reduction in pilotage and clearance fees. 7 days notice required for bunkers.

REPAIRS: All repairs can be effected at Mathias-Thesen Shipyard. Floating crane available, capacity up to 100 tons.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

AIRPORT: Berlin, 270 km. from Wismar.

TELEPHONES: No ship to shore communications.

AGENT: VEB Schiffsmaklerei Rostock, Agentur Wismar, 24 Wismar, Kopenhagener Strasse. Tel. 4208. Telex 0318841.

Germany, Federal Republic of

GENERAL:

RIVER ELBE:

GENERAL INFORMATION ON ELBE PILOTAGE, DEEP SEA PILOTAGE, HELICOPTER AND RADAR SERVICE, ANCHORAGE ON THE RIVER ELBE.

Elbe Pilots for all ports on the River Elbe, Cuxhaven, Brunsbuttel, Butsfleth, Stadersand, HEW-Wedel and Hamburg.

Pilot Vessels: For the inward bound vessels near Elbe 1 light-vessel stationed in approx. position 53° 59.5′ N., 08° 09.0′ E., 2-masted vessel painted black with yellow funnel and "Lotse" in white letters on hull. In bad weather Pilot vessels shift to East of light buoy "9".

Pilot vessel can be contacted on VHF Channel 13 or 16, by flag "G", sound or morse signals.

Land-based radar contact can be requested through radar station "Neuwerk Radar Radio 1", VHF Channel 20.

PILOTAGE: Vessels requiring Elbe Pilot must order same at least 12 hours prior to arrival at Elbe 1 light-vessel by cable to "Elbelotsen Brunsbuttel" (cable address Elblotse Brunsbuttel) via Norddeich Radio, call-sign DAN.

Message must include name of vessel, gross tons, ETA Elbe 1, date 2 figures, time of vessel's arrival 4 figures, draft, vessel's destination. (For example: Eleka 12854 ETA Elbe 1 02 1030 24 ft. 4 in. Kiel Canal). One hour before arrival at Elbe 1 light-vessel Masters are advised to contact the Pilot vessel by VHF Channel 13 or 16.

**Pilotage is compulsory* on the River Elbe to and from Elbe 1 light-vessel for all vessels over 1,000 g.r.t.

Pilotage is compulsory on the River Elbe to and from Elbe 1 light-vessel for vessels over 300 g.r.t. carrying particularly dangerous cargo and, in addition, for vessels over *10,000 g.r.t. carrying particularly dangerous cargo from and to Deutsche Bucht light-vessel. These vessels have to use the Western Approach Traffic Separation Scheme Deutsche Bucht. Pilots for these vessels will be embarked and disembarked at the Deutsche Bucht light-vessel.

*Obligatory pilotage on the River Elbe for vessels exceeding 1,000 g.r.t. and in addition, for vessels over 10,000 g.r.t. carrying particularly dangerous cargo from and to Deutsche Bucht light-vessel is under consideration and is expected to become effective in the course of 1979.

For vessels exceeding 70,000 g.r.t. or 300 m. length or 45 m. breadth the pilotage is generally compulsory on the River Elbe from and to Deutsche Bucht light-vessel, if these vessels use the Western Approach Traffic Separation Scheme Deutsche Bucht. In this case Pilots will embark and disembark at Deutsche Bucht light-vessel only.

Vessels exceeding 35,000 g.r.t. (except container, passenger and warships) have to take 2 Elbe Pilots, but in fog all vessels from 25,000 g.r.t. upwards.

Pilotage district divided into 3 areas: 1st district from Elbe 1 (Deutsche Bucht) light-vessel to Brunsbuttel (entrance of Kiel Canal) 40 miles; 2nd district from Brunsbuttel to Hamburg-Seemannshoft (entrance of Port of Hamburg) 40 miles; 3rd district covers the whole area of the Port of Hamburg. Change of Pilot takes place at Brunsbuttel and Hamburg-Seemannshoft.

Vessels expecting Pilot may wait in vicinity of Elbe 1 light-vessel. No restriction imposed on night entry for any vessels on the River Elbe.

Current velocity 2-3 knots; mean tidal range at outer bar light-buoy "9" 9 ft. 6 in.; Brunsbuttel 8 ft. 8 in. and Hamburg 9 ft. 2 in. nature of bottom, sand and mud.

River pilotage dues (Lotsgebuhr) have to be paid by all vessels exceeding 300 g.r.t., irrespective of whether they have used a river Pilot or not. Pilotage fee (Lotsgeld) will only be charged if a Pilot is employed.

DEVELOPMENTS — RIVER ELBE: Continuous dredging is in process along the River Elbe with a view to providing a depth of 13.5 m. below mean low tide level.

As from completion of these works in 1978, the maximum permissible draft for vessels approaching the ports on the River Elbe will be increased from time to time in small increments.

HELICOPTERS: Helicopter Pilot service is available for vessels exceeding 10,000 g.r.t. at Deutsche Bucht light-vessel. A twin-turbine powered amphibious Bell 212 S helicopter is available for this service.

Suitably equipped vessels may have Pilot transferred by helicopter. Please refer to Admiralty list of radio signals, give ETA 24 hours prior to arrival at helicopter rendezvous position in the vicinity of Deutsche Bucht light-vessel to "Elbetosen Brunsbuttel (cable address Elblotse Brunsbuttel) via Norddeich Radio, call-sign DAN. Message must include name of vessel, gross tons, ETA Deutsche Bucht, date 2 figures, time of vessel's arrival 4 figures, draft, vessel destination. (For example: Terra 104468 ETA Deutsche Bucht 11 1530 40 ft. 7 in. Brunsbuttel-Elbe Terminal).

In cases of defect of helicopter, poor visibility, icing conditions, or inadequacy of construction of ships the Sea-Pilots have to be embarked or disembarked by the Pilot boat at the same position. A sea-going Pilot boat is operating from Helgoland for embarking and disembarking the Pilots, if the helicopter is not available, or if the ship's construction is inadequate for helicopter transfer.

RADAR: A continuous chain of radar stations has been established to cover the traffic flow along the estuary of the River Elbe from Elbe 1 light-vessel as far as well into the port of Hamburg. If visibility drops below 3,000 m. and/or if particular situations arise (bad weather, ice, etc.), the Elbe Pilot will be assisted by his fellow Pilots at the shore-based radar stations. Where vessels carry no or inadequate VHF equipment, a transceiver set with calibrated duplex frequencies can be hired for the trip and should be ordered together with the request for a Pilot.

Contact radar stations Neuwerk Radar Radio 1, VHF Channel 20; Neuwerk Radar Radio 2, VHF Channel 5; Cuxhaven Radar Radio, VHF Channel 21; Belum Radar Radio, VHF Channel 3; Brunsbuttel Radar Radio, VHF Channel 18; Freiburg Radar Radio 1, VHF Channel 22; Freiburg Radar Radio 2, VHF Channel 20; Steindeich Radar Radio, VHF Channel 5; Hetlingen Radar Radio, VHF Channel 21; Hamburg Radar Radio, VHF Channel 19, 20 and 18.

ANCHORAGE: A deep-water anchorage for deep-draft vessels, very large crude carriers (VLCC's), and ultra large crude carriers (ULCC's) lies South of the light-vessel "Deutsche Bucht", approx. position 54° 01′ N., 07° 30′ E.

In vicinity of Elbe 1 light-vessel (5 miles inside) for large and deep-draft vessels, North of red radarline, approx. position 54° 01′ N., 08° 15′ E., depth of water about 14-21 m. below chart zero.

Neuwerk Roads, approx. position 53° 58′ N., 08° 30′ E., depth of water about 8-16 m. below chart zero;

Medem Roads, approx. position 53° 51.5′ N., 08° 46.5′ E., depth of water about 6-12 m. below chart zero;

Neufeld Roads, approx. position 53° 51.7′ N., 09° 00′ E., depth of water about 9-10 m. below chart zero;

N.E. Roads, off Brunsbuttel permission only for one tide, approx. position 53° 53′ N., 09° 12′ E., depth of water about 13-14 m. below chart zero;

Freiburg Roads, approx. position 53° 50.6′ N., 09° 19.5′ E., depth of water up to about 13 m. below chart zero;

There are further anchorages for small vessels at Sudreede (S. anchorage) off Brunsbuttel, Krautsand – and Twielenfleth Roads. The bottom at these anchorages consists of sand and mud.

DEEP SEA PILOTAGE: Elbe Pilots hold foreign-going Master mariner's Certificates and an additional government licence for North Sea pilotage, they are on call to board vessels in all North Sea ports of the Continent and the United Kingdom and in ports, along the coastlines of the English Channel. Vessels will be boarded on request by Elbe Pilots for approaching the River Elbe or by Elbe Pilots with additional North Sea licence for pilotage in the North Sea and English Channel. Please observe these periods of notice:

North Sea ports (Continent) 24 hours prior to sailing;

North Sea ports (United Kingdom) English Channel 48 hours prior to sailing or prior to passing local Pilot stations.

Request for services to be directed to "Elbelotsen Brunsbuttel", Tel: 04852/87295, cable address "Elblotse Brunsbuttel".

BRAKE: 53.20 N. 08.29 E. (See Plan Book)

PORT LIMITS: The government-owned piers are the commercial area of the port. A vessel is considered to be an "arrived ship" when she is moored alongside such piers, and the customs formalities are complete. Laytime will commence according to referring charter parties.

Port Authorities distribute the free berthing places in following the "Benutzungsordnung fur den Hafen Brake" which says briefly that a vessel will get a rank position in actual arriving times:

(a) for ships coming from sea: arrival "Weser lightvessel" plus 5 hours.

(b) for ships coming from Bremerhaven North Roads and Blexen Roads: departure plus 2 hours.

(c) for ships coming from Bremen: departure plus 3 hours.

DOCUMENTS:

2 Lists Ship's Stores.
2 Crew Lists.
2 Passenger Lists.
Health Certificate (forms obtainable from Pilot).
Ship's Register.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Carried out by Weser River Pilots. The river Pilots also act as docking Pilots. Also see "Bremen" and "Bremerhaven".

ANCHORAGE: No anchorage in vicinity of Harbour. Anchorage in "Blexen Roads". For further details see "Bremen".

RESTRICTIONS: Vessels proceeding to Brake with a draft in excess of 24 ft. will be restricted by the tide.

MAX. SIZE: Max. length 239 m. (784 ft.); no restriction on beam. Max. draft 37 ft. in fresh water.

PRATIQUE: Free pratique is given by health and immigration officer only. If a case of fever or disease is suspected on board radio the Agent with details before arrival.

RADIO: Cable Agent via Norddeich Radio (Call sign DAN) advising ETA and cash requirements.

RADAR/VHF: Stations from Weser lightvessel to Bremerhaven. Radar service between Bremerhaven and Bremen is planned. Radar stations have day and night service. If no fog every odd hour radar stations give on VHF or Pilot walkie-talkie report of visibility, defective buoys, anchoring ships, obstructions to navigation, and special occurrences. Direct contact between port and ship is possible on VHF.

TUGS: Available day and night in sufficient number. No extra charge for using tug's lines.

BERTHING:

New locks are being built at the inner harbour and are expected to be operating in 1980. Dimensions: Length 95 m. (311 ft.), width 16 m. (52 ft.) Max. size of vessel to be handled will be a fully loaded vessel of 3,000 d.w.t. with a max. draft of 6.0 m.

Inner Harbour with tidal lock: Length of dock 1,070 m. (3,500 ft.), width 110 m. (360 ft.), width of entrance 13.25 m. (43 ft. 5 in.); depth of water over sill at ordinary tides 19 ft. 6 in., depth of water over sill at highest Spring 21 ft. 6 in. (at lowest neap 17 ft. 6 in.). Length of canal 228 m. (750 ft.), width of canal 46 m. (150 ft.), length of quay in canal 228 m. (750 ft.).

Riverside Berth: Total length 1,852 m. (6,075 ft.), depth at pier 37 ft. at normal low water, tidal amplitude 11 ft. 6 in. Max. draft 35 ft. Max. length of ships not more than 239 m. (784 ft.).

This government-owned pier is divided into 2 areas. The Northern part is the crane-area with a length of 4,510 ft., the Southern part, 1,565 ft. long, is the grain-handling area.

Private Pier of the Fettraffinerie/Unimills has a length of 245 m. (804 ft.).

SPECIALISED CARGO HANDLING FACILITIES:

Inner Harbour: crane area

2 electric cranes to lift 1 to 5 tons.
2 bridge cranes, capacity 50 tons.
2 bridge cranes, capacity 20 tons.
1 bridge crane, capacity 15 tons. } Riverside Berth
2 whipping cranes, capacity 25 tons.
2 whipping cranes, capacity 15 tons.

Grain handling area (Riverside Berth)

4 pneumatic grain elevators (capacity from 120 to 600 t.p.h.) with a total discharge capacity of 1,600 t.p.h.

Fettraffinerie Pier

Tank installations with pumping arrangements of a capacity of 700 t.p.h. to vessel and 2,000 t.p.h. from vessel.

The government-owned pier is equipped for containers, but not for roll-on/roll-off traffic. The berth does not handle liquid chemicals.

STEVEDORES: ETA has to be reported to the Agent to arrange gangs. Stevedores are working 3 shifts around the clock on working days (Monday to Saturday); on Sundays and holidays 4 shifts are worked around the clock.

MEDICAL: Two hospitals and several doctors available at Brake. Advance notice to Agent required if medical assistance necessary.

TANKERS: Fettraffinerie Pier: Max. draft 33 ft. Discharging lines: molasses 6 in., fuel oil 8 in., diesel 10 in. and vegetable oil from 4 to 8 in.

DENSITY: Brake Port, Freshwater: salinity = 1002–1004.

FRESH WATER: Available both at Riverside Berth and Inner Harbour. Pumping capacity from 18 to 20 t.p.h.

FUEL: All grades available by bunker barges.

FIRE PRECAUTIONS: No smoking on deck. For tankers at Fettraffinerie Pier smoking only in saloon and/or messroom.

CONSULS: No Consuls; consulates at Bremen.

REPAIRS: All normal ship and engine repairs can be carried out during laytime on board.

DRY DOCKS: One dry dock at Luehring Werft, Brake, for ships with a length not in excess of 85 m. (279 ft.), nor broader than 16 m. (52 ft. 6 in.), and a max. draft of 13 ft. 1 in.

SURVEYORS: Classification Socieities not represented but several surveyors available at Brake Port.

GANGWAY/DECK WATCHMEN: Crew's watchmen necessary – strong tides, current-speed 3 knots.

HATCHES: Depends on the different charter parties.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and 2 bottles of wine.

CARGO GEAR: Load/discharge normally effected by shore-gear.

REPATRIATION: Any necessary repatriation and/or crew changes can be effected by Agents at Brake.

AIRPORT: International airport served by regular airlines at Bremen. Brake to Bremen, distance 57 km. (35 stat. miles).

TIME: Local time is GMT plus 1 hour. No alterations to clocks during the year.

HOLIDAYS: New Year, Good Friday, Easter Sunday and Monday; May 1, Ascension Day; Whitsunday and Monday, Penitentiary Day, 2 Christmas Days. Cargo work can be arranged on those days, except on New Year, Easter Sunday (1st Easter day), 1st May, Whitsunday, 1st Christmas Day, and on the days before such days till 1200 and/or 1400 hours.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 4060; Fire 112.

TELEPHONES: No arrangements to place telephones on board.

SHORE LEAVE: Shore passes are required according to customs regulations.

IDENTIFICATION CARDS: Crew members to have valid identity cards.

DEVELOPMENTS: Weser fairway depth will be increased to 12 m. (39 ft. 6 in.).

SEAMAN'S HOSTEL: Weserstr. 1A, tel. 4490.

AUTHORITY: Niedersachsisches Hafenamt Brake.

BREMEN (Including Farge): 53.07 N. 08.45 E.

(See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
Provision and Store Lists incl. fuel oil.
Dangerous Cargo Lists.
Health Declaration.
Ship's Register.
No Customs Papers if vessel laying in Freeports at Bremen.

DEEP SEA PILOTAGES: See "Brixham" or "Cherbourg" and "General" before first German port.

PILOTAGE: Compulsory only for ships with dangerous goods in bulk according to a special list of the Wasser-und Schiffahrtsdirektion, tankers and nuclear ships. But a portion of pilotage dues is charged in any case. Most vessels take a Pilot.

Distance from Bremen lightvessel to Bremerhaven 36 miles. Distance from Bremerhaven to Bremen 32 miles.

At least 12 hours before arrival at Weser lightvessel, Masters should cable ETA messages to "Lotsenbruderschaft Weser zwei Bremerhaven" via Norddeich Radio. Message to include name and g.r.t. of vessel, place where Pilot required to board, day and hour of vessel's arrival, vessel's destination and fresh-water draft in metres. Sea Pilots board at Weser lightvessel to Bremerhaven. River Pilots board at Bremerhaven to pilot vessels as far as Bremen.

Pilot station near Weser lightvessel 53° 52′ 16″ N., 07° 50′ 00″ E., black-painted motor vessel, black-topped funnel, white lettering "Lotse" on hull. In rough weather, pilot boat may be found inside near Rotesand lighthouse/buoy "G". Pilots may be contacted by Norddeich Radio, 2182 or 2614 kHz. Alternatively by VHF Channel 16.

River Pilots boarding at Bremerhaven also act as harbour Pilots to all ports above Bremerhaven.

ANCHORAGE:

1. About 1 mile South-West of Weser lightvessel 53° 52′ 16″ N., 07° 50′ 00″ E.
2. Near Hoheweg lighthouse between buoys "F" and "N". Depth about 12 m.
3. Tegeler Plate between buoys 10 and 12.
4. Bremerhaven Northroads between buoys "Y" and "A". For ships with dangerous cargo inside the red sector of Imsum Lt. F. Depth about 12 m. Blexen Roads (South Roads) depth about 10 m.

RESTRICTIONS: Vessels proceeding to Bremen, with a draft in excess of 22 ft. will be restricted by the tide.

MAX. SIZE: Bremen: length 220 m., draft 32 ft. in fresh water. Longer ships with special permission.

Locks: At the entrance of the Industriehafen max. length 170.0 m., max. breadth 23 m., tidal docking up to 190 m., max. draft up to 30 ft. 03 in. according to tide.

HEALTH: Master has to fill and sign Maritime Declaration of Health which is handed to health officer on arrival at Bremerhaven and Bremen. In case suspected disease or fever on board radio details to Port Health Bremerhaven via Norddeich Radio before arrival.

RADIO: Cable Agent via Norddeich Radio, call sign DAN, advising ETA and cash requirements.

Bremen Port Radio VHF station on Channels 3, 16, and 14 to be used for messages to all Port Authorities including Police and Fire Brigade and Port Health in case of emergency.

RADAR/VHF: Stations from Weser lightvessel to Bremerhaven. Radar service between Bremerhaven and Bremen is planned. Radar station has day and night service. If no fog, every odd hour radar station gives by VHF, or Pilot walkie-talkie, report of visibility, defective buoys, anchoring ships, obstructions to navigation and special occurrences. The new radar station at Bremen Port area is working day and night, call Bremen Radar Radio on Channel 12 or 16.

TUGS: Tugs available at all stations according to ships request. Tugs lines used (only) without charge.

BERTHING: Berthing at Bremen: The following harbours can be reached:

Harbour name:	*Max. draft subject to tide and berth* ft.	in.	*Safe draft in Harbours at any time up to* ft. in. – ft. in.	*Length* m.
Europahafen	31		23 06 – 29 00	2,760
Uberseehafen	32		27 06 – 32 00	3,240
Holz–und Fabrikenhafen	31		21 06 – 28 06	1,540
Getreidehafen	32		13 06 – 32 00	780
Neustadter Hafen	32		31 00 – 32 00	2,000
Kap Horn Hafen	32		30 03	800
Industriehafen	30	03	12 00 – 30 03	5,100

Max. draft is dependent on the prevailing winds

SPECIAL CARGO-HANDLING FACILITIES:

Container-Handling Facilities: The container terminal in the Neustadter Hafen is equipped with 2 container cranes, suitable for 40 ft. containers. Maximum lifting capacity: 45 tons. The terminal has 116 connections for reefer containers.

Roll-on/roll-off terminal: At the head of the Europahafen, 1 berth. Maximum carrying capacity 60 tons, width 8 m. Max. draft 28 ft. Two new terminals are planned at the Neustadter Hafen.

Lash Terminal: A lash terminal has been built at the head of the Uberseehafen. Further lash places: Lankenauer Hoft and Europahafen.

Bulk handling facilities (Industriehafen)
Bulk cargoes such as coal, coke, ore, phosphate, oil, logs, and potash are handled in the Industriehafen. To enter the Industriehafen, vessels have to pass through a lock which is 171 m. long, 23 m. wide and allows a max. draft of 30 ft. 03 in. fresh water at normal high water.

Gebr. Rochling (Kohlenhafen)
At this facility coal, ore, phosphate, and logs are handled. There are no restrictions regarding the vessel's length, beam, height or draft other than those imposed by the lock to the Industriehafen. The quay has a length of 850 m. and is equipped with four 18-ton cranes, each having a capacity of 1,500/2,000 tons per shift. In addition there is 1 gantry crane lifting a 20-ton wagon and loading this quantity within 3 minutes, and 4 cranes (two of 8 tons and two of 5 tons) which are mainly used for handling logs.

Storage facilities amount to 75,000 sq.ft.

Anker-Schiffahrt (Kalihafen)
At this facitilty salt and potash cargoes are handled. The quay has a length of 400 m. and is equipped with 5 conveyerbelt loaders and 3 crane bridges each with a lifting capacity of 6 tons. It is possible to store about 150,000 tons of cargo. Restrictions as above.

Klocknerhutte (Huttenhafen)
This facility mainly handles coal, ore, scrab, stones and sand. Export of steel sheets pipes and coils of Klockner iron mill are handled via this quay.

Quay length:	550 m.
3 Gantry cranes:	12.5 tons, 10 tons, 40 tons.
Ore discharging capacity	8,000 tons per 24 hours.
Storage capacity	300,000 tons

Restrictions as above

Kraftwerk-Hafen (Power Station) Kohlenhafen
At this berth only coal cargoes for use by the power station are handled. Discharging rate 2 cranes: 1,250 tons per shift.

Other bulk handling facilities:
Granary (Getreidehafen) *near the Uberseehafen*
No locks Max. draft 32 ft. Lighterage is possible.
Berth A 2 elevators with a capacity of 400 t.p.h. max. length 260 m. (853 ft.).
Berth B 6 elevators with a capacity of 170 t.p.h. max. length 176 m. (577 ft.).

Kraftwerk Farge (Power Station)
Location: 10 miles downstream from Bremen. Only coal cargoes for the power station are handled.

Max. draft	29 ft. 6 in.
Max. length	200 m. = 656 ft.
Max. beam	25 m. = 82 ft.

3 cranes, total discharging capacity 200 t.p.h.

Rolandmuhle: tidal basin Holz-und Fabrikenhafen. Grain facility with

Max. draft	21 ft. at low water.
Max. length	180 m. (591 ft.).
2 stationary elevators	3,000 tons per day

1 conveyer for loading bags only

J.H. Bachmann/J. Muller/Karl Gross (Holz-und Fabrikenhafen)
Facility for grain and occasionally, general cargo handling.

Max. draft	up to 23 ft. at normal low water.
Quay length	710 m. (2,330 ft.).
Cranes	13 Grain/General cargo
Elevators	4–250 t.p.h. each

Car and general cargo loading installations (Kap Horn) with two quays, one 320 m. long inside Industriehafen and the other 800 m. long (at the riverside). The storage area is 100,000 sq.m. and provides sufficient space for 7,000 cars. The loading of cars is done by ship's gear.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:

Regular period: 0630–1430 resp.	on Sundays: (overtime)
0600–1400	1st shift: 0600–1200
Free Port	2nd shift: 1200–1800
1st shift: 0600–1400	3rd shift: 1800–2400
2nd shift: 1430–2230	4th shift: 2400–0600
3rd shift: 2300–0600 (overtime)	
Industrieh/Grain Pier	Industrieh/Grain Pier
0630–1430	0630–1230
1430–2230 (overtime grain pier)	1230–1830
2230–0630 (overtime)	1830–2430
	0030–0630

On Saturdays:
Free Port
1st shift: 0600–1400
2nd shift: 1430–2030 (overtime)
3rd shift: 2100–0300 (overtime)
Industriehafen/Grain Pier
0630–1430
1430–2030 (overtime)
2030–0230 (overtime)

CRANES: All piers are fitted with cranes 3/7 tons. Floating cranes up to 250 tons available.

MEDICAL: All medical facilities available. Advance notice to Agent required if medical assistance necessary.

TANKERS: Draft in fresh water.

Holzhafen	one berth max. draft 28 ft. 10 in. at low water
Osterott I	one berth max. draft 33 ft. at low water
Osterott IV	one berth max. draft 36 ft. 09 in. at low water
Farge	two berths max. draft 31 ft. 06 in. at low water

For the following tanker berths see restrictions of the entrance lock Industriehafen

Oelhafen:	several berths max. draft 14 ft. to 23 ft.
Huttenhafen:	three berths max. draft 20 ft. to 24 ft.
Becken A	one berth max. 22 ft.
Kalihafen	one berth max. 30 ft. 03 in.

Fina Oil Einswarden. Max. draft 36 ft. 6 in. Discharging lines crude oil 12 in., fuel oil 10 in., diesel 8 in.

Frisia (Gulf Oil) Einswarden. Berth for tankers up to 250 m. length, max. draft 36 ft. fresh water.

DENSITY: Fresh water.
FRESH WATER: Available by hose and barge.
FUEL: All Grades available.
FIRE PRECAUTIONS: Smoking or use of open fire not allowed all over the Port area. No smoking on deck. Tankers, smoking in saloon or messroom only.
CONSULS: 31 countries represented.
REPAIRS: All repairs possible.
DRY DOCKS:

Vulkan-Gravity Dock	up to 240,000 d.w.t.
and one floating Dock	up to 22,000 d.w.t.
AG. "Weser" 2 Docks	up to 22,000 d.w.t.

SURVEYORS: Contact Schiffsbesichtiger: 38-52-84.
GANGWAY/DECK WATCHMEN: Not considered necessary. But available when ordered.
HATCHES: Opening and closing normally by crew with stevedores assisting.
CUSTOMS ALLOWANCE: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days further same quantities. Wine not restricted. Freeports in Bremen only Europahafen, Uberseehafen and Neustadter Hafen.
CARGO GEAR: No additional requirements. Preventers necessary.
REPATRIATION: Any time.
AIRPORT: Regular national and international flights.
HOLIDAYS: New Year's Day (no work performed); Good Friday; Easter Sunday (no work performed); Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.
POLICE/AMBULANCE/FIRE: Police help 110; Fire, First aid 112.
Pilot Station Bremerhaven: Sea Pilots 4-22-20; River Pilots 4-22-89.
Pilot Station Bremen: 38-52-08 or 38-13-26.
Port Administration Bremen: 397-1.
Waterway Police: 38-43-31.
Port Medical Services: 38-34-16.
Immigration: Call Water Police.
Foreign Calls: 0010.
TELEPHONES: It is possible to rent a telephone box from Mooring Company.
REGULATIONS: Usual Port Regulations. Special Regulations for dangerous goods and Tankers.
AUTHORITY: Hafenamt Bremen.
AGENT: Wm. H. Muller Co. (Bremen) GmbH. Birkenstrasse 37. Bremen 1.Tel.: (0421) 314910. Telex: 244704. Cables: "Batavier".

BREMERHAVEN: 53.33 N. 08.35 E. (See Plan Book)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
3 Provision and Store List incl. fuel oil.
3 Dangerous Cargo List.
Health Certificate (forms obtainable from Pilots).
Ship's Register.
No Customs Papers if vessel laying in Freeport at Bremerhaven.

DEEP SEA PILOTAGE: See Brixham or Cherbourg and "General" before first German Port.
PILOTAGE: See "Bremen".
Docking Pilots join vessels at Buoy "Z" if bound for Uberseehafen or near entrance of Geeste River if bound for Fischereihafen. Call sign is International Code flags PT with pennant below. Sound and flash signals are 3 long and 5 short.
ANCHORAGE: See "Bremen".
RESTRICTIONS: Vessels proceeding to Bremerhaven with draft in excess of 35 ft. will be restricted by tide.
MAX. SIZE: Length 340 m., draft 41 ft. in fresh water. Draft 42 ft. 8 in. in fresh water, special permission required.
HEALTH: See "Bremen".
RADIO: See "Bremen".
RADAR/VHF: See "Bremen".
TUGS: Tugs join vessel with docking Pilots. Tug's lines used at no extra charge.

BERTHING: There are two harbour-groups, Uberseehafen North of Geeste River and Fischereihafen South of it.

Uberseehafen:

Along Weser River:	*Depth at LW*
Columbus Quay	36 ft.
Stromkaje	46 ft.

Dock basins:	*Depth*
Neuer Hafen	21 ft.
Kaiserhafen I	28 ft.
Kaiserhafen II	36 ft.
Kaiserhafen III	36 ft.
Verbindungshafen	36 ft.
Nordhafen	46 ft.
Osthafen	46 ft.

The dock basins can be reached through 2 locks:

Kaiserschleuse: length 732 ft., gate width 88 ft. depth 23 ft. at LW.

Nordschleuse: length 1220 ft., gate width 147 ft. depth 36 ft. at LW. Max. size of vessel. length 265 m., beam 38 m. (124 ft. 07in.). Draft 42 ft. 08 in.

Fischereihafen:

Dock basins:	*Depth*
Fischereihafen I	24 ft.
Fischereihafen II	24 ft.
Handelshafen	22 ft.

Locks:

Fischereihafen-Doppelschleuse

Small lock: length 349 ft., gate width 39 ft. depth 21 ft. at LW.

Large lock: length 328 ft., gate width 98 ft. depth 21 ft. at LW.

SPECIAL CARGO HANDLING FACILITIES: All sheds are equipped with electric cranes.

With special permission of the port authorities the following maximum FW drafts are allowed.

42 ft. 8 in. = 13 m. – max. beam 40 m.
39 ft. 3 in. = 12 m. – max. beam 41 m.
35 ft. = 10.7 m. – max. beam 42 m.

The port is equipped with modern bulk, container, roll-on/roll-off and general cargo facilities.

3 floating cranes have lifting capacities of 100, 250 and 500 tons respectively.

Weserport (Osthafen) Ore transhipment installation, quay length 330 m.. Depth 14.6 m. 2 unloaders. Max. outreach 22.5 m. Total discharge capacity 2,000 t.p.h. Average rate 750 t.p.h.

Columbus Quay Passenger and general cargo facilities.

Quay length 1,020 m. Depth 30 – 36 ft.

9 cranes – 4 to 8 tons.

Terminal ferry service to Harwich.

Car loading installations

The car loading installation at Bremerhaven is situated in the Nordhafen. Quay length 750 m. Storage area 40,000 sq. m. for about 3,500 cars. The loading is done by ships' gear.

Container Terminals

2 container terminals, 1 at Stromkaje and 1 in the Nordhafen, are equipped with 10 container cranes. 7 cranes at 54 tons, 2 cranes at 45 tons and 1 crane at 52 tons.

Depth alongside in river 46 ft. at LW. Depth at Nordhafen 38 ft.

Kaiserhafen/Verbindungshafen offers 4 basins for general cargo handling. Quay length: 4.130 m. Storage capacity in modern sheds: 79,716 sq. m. 40 cranes with capacities from 3–8 tons. Various cranes for heavy lifts up to 30 tons. Shed B in the Kaiserhafen III is equipped with 2 conveyor belt loaders for bagged cargo, especially fertilizers. The installation is weather protected. A banana discharging installation, with 5 elevators, has a capacity of over 300,000 tons per year.

Lash Carriers: Special facilities are available.

MEDICAL: Hospital facilities at all Weserports. No vaccination normally required.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:
1st shift: 0600–1400
2nd shift: 1400–2200
3rd shift: 2200–0500 (overtime)
on Saturdays:
1st shift: 0600–1400
2nd shift: 1400–2000 (overtime)
3rd shift: 2000–0200 (overtime)
on Sundays:
as Bremen Freeport.

TANKERS: *Esso Bremerhaven*, Columbus-Kaje. Max. draft 36 ft.

There are several tank-cleaning boats available to receive slops at Bremerhaven.

DENSITY: 1008 – 1010.

FRESH WATER: Available by pipe-line at all berths.

FUEL: All grades available.

FIRE PRECAUTIONS: No smoking on deck. Tankers smoking only saloon or messroom.

GANGWAY/DECK WATCHMEN: Not considered necessary.

OPENING/CLOSING HATCHES: Normally by crew with stevedores assistance.

CUSTOMS ALLOWANCE: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days, further same quantities. Wine not restricted. Freeports only at Bremen (Europa, and Uberseehafen), and at Bremerhaven (Kaiserhafen, Columbus Kaje and Weserport).

CARGO GEAR: No additional requirements. Preventers necessary.

IDENTIFICATION CARDS: Not required.

CONSULATES: At Bremen only.

REPAIRS: All repairs possible.

DRY DOCKS: There are 2 graving docks and 10 floating docks with max. capacity 75,000 tons.

REPATRIATION: Any time.

AIRPORT: About 4 miles from Bremen. Regular airlines.

HOLIDAYS: New Year's Day (no work performed); Good Friday, Easter Sunday (no work performed), Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.

TELEPHONE: Accidents, Police 110; Fire 112; Harbour Master 481212; Docking Pilots 481 230; Sea Pilots 42220; River Pilots 42289; Waterway Police 47011; Port medical service 40031.

DEVELOPMENTS: 2 container cranes under construction, expected to be operational mid-1977.

AUTHORITY: Hansestadt Bremisches Amt-Der Hafen kapitan.

AGENT: Wm. H. Muller Co. (Bremen) GmbH, Neue Fahrgastanlage 11, Kaiserhafen, D-2850 Bremerhaven. Telegrams: "Batavier-Bremen". Telex: 238590. Telephone: (0471) 46123.

BRUNSBUTTEL (Including Ostermoor): 53.43 N. 09.09 E. (See Plan Book)

DOCUMENTS:

Health Certificate forms obtainable from river Pilot.
3 Crew lists.
3 Personal Effects Lists.
3 Stores Lists.
Bill of Lading.
Ship's Register.

For ships entering locks of Brunsbuttel for transit traffic through Kiel Canal, only ship's register required.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: *Anchorage River Elbe:* See "General" before first German port.

Pilotage Kiel Canal: Pilotage generally compulsory, vessels over 2,500 g.r.t. must employ a wheelman.

Pilot station, tel. 04852/8811, VHF Channel 9, ETA 6 hours prior arrival Brunsbuttel Roads by cable to "Kanallotse Brunsbuttel" via Norddeich Radio (DAN), requiring Canal or Harbour Pilot at Brunsbuttel, (for example: Brigitte 1249 ETA Brunsbuttel 29 1800 3.5 m.). Pilot will board ships off the entrance to Kiel Canal.

Pilot boats are painted black with "LOTSE" in white letters on hull. Signal for Pilots is flag "G" over numeral pennant 1, sound or morse signal, VHF Channel 9.

ANCHORAGE: Vessels waiting for entrance to the Canal may anchor in N.E. anchorage, South anchorage, or Neufeld anchorage, all with sufficient depth for vessels transiting Canal.

RESTRICTIONS: No restrictions imposed on night entry. If draft above 31 ft. 2 in. fresh water, vessels will be piloted to Brunsbuttel with flood-tide.

Dimensions of lock: length 310 m., beam 40 m.

The Canal can be navigated by vessels up to 235 m. LOA and 32.5 m. beam and draft in accordance with table below.

Length in (m.)	*Beam in metres* 20	21	22	23	24	25	26	27	28	29	30	31	32	32.50
	Draft on (m.)

Height above water-line transitting Canal must not exceed 40 m.

For Binnenhafen, as far as km. 6.00, vessels not requiring to transit Canal may enter with draft up to 10.40 m.

Elbe Terminal: Elbe Terminal situated outside of locks, quay length 1,100 m.

No restrictions imposed on night entry. Vessels may berth and unberth day or night.

MAX. SIZE:
Oil Harbour: Max. draft 34 ft. 2 in. fresh-water max. length 235 m.
Ships passing canal: See "Restrictions" above.

Elbe Terminal:
Pilotage Elbe Terminal: Elbe Pilots also act as docking pilots.
Inward bound: Vessels allowed draft to max. 42 ft. 06 in. in saltwater, on arrival Elbe 1 lightvessel, may enter only on rising tide under normal weather and tide conditions.

Tankers exceeding 15,000 g.r.t. and max. draft 35 ft. in saltwater, on arrival Elbe No. 1 lightvessel, may berth at any time against the ebb-tide.

Tankers and vessels up to 15,000 g.r.t. and 35 ft. draft in saltwater, on arrival Elbe No. 1 lightvessel, allowed to berth at any time.

Outward bound: Vessels exceeding 35 ft. draft in freshwater, on departure from Elbe Terminal, may leave 2 hours after low water.

Vessels up to 35 ft. draft in freshwater, on departure from Elbe Terminal, may unberth at any time.

Inward bound: Vessels exceeding 300 m. length or 45 m. breadth allowed draft to max. 41 ft. in saltwater, on arrival Elbe 1 lightvessel, may enter only on rising tide.

No restrictions as to length, beam, or height of vessel.

Outward bound: Vessels allowed draft to max. 35 ft. in freshwater, on departure from Elbe Terminal, may leave 2 hours after low water.

Keel clearance of 10% of draft required.

Ostermoor:

Max. draft	*Max. gross tonnage*	*Max. beam*
10.40 m. (34 ft. 02 in.)	20,000 g.r.t.	27.00 m. (88 ft. 07 in.)
9.50 m. (31 ft. 02 in.)	25,000 g.r.t.	29.00 m. (95 ft. 02 in.)
8.00 m. (26 ft. 03 in.)	35,000 g.r.t.	32.50 m. (106 ft. 08 in.)

Max. allowed length (LOA) 235.00 m. (771 ft. 00 in.)

HEALTH: Pratique automatic for vessels entering harbour for loading or discharging, and ships passing through Canal if required. Health Certificate form does not show any infectious diseases.

RADIO: All messages to Agents and Pilots etc., through Norddeich Radio, call sign "DAN". Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Brunsbuttel, VHF Channel 14, safety and calling Channel 16.

RADAR: Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Brunsbuttel. Radar Service in the area of Brunsbuttel available, can be contacted through VHF Channel 18, "Brunsbuttel Radar Radio".

TUGS: 6 tugs available at Brunsbuttel. Vessel's lines used. Tugs normally join vessels bound for the Elbe Harbour on river in vicinity of Canal locks.

From the approach limit up to entry into the lock, tug assistance is mandatory for vessels in Group 6 and also such vessels which manoeuvre only with difficulty. Tugs assisting ships entering locks join vessels on canal-roads.

BERTHING: Ships lying at terminals situated on Canal bank in Inner Harbour should take into consideration that vessels must moor safely, as suction of passing ships may cause breaking of lines.

Binnenhafen: Comprises the area between lock entrance and km. 5.27.

Also see "Tankers" and "Fuel" below.

BRIDGES: Ships transitting canal must have bridge clearance of 40 m. Otherwise no impediments.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary.

MEDICAL: Port Medical Service by Harbour Doctors. Day and night service. Inoculations have to be ordered 24 hours prior arrival. Hospital available at Brunsbuttel.

TANKERS: *Elbe Terminal:* Crude oil discharge berth situated outside of locks. One 30-in. pipe-line to DEA Tanker Storage. Two 12 in. hoses and 2×16 in. hoses available for discharge. Pumping rate 10,000 cu.m/h.

Oil Harbour. Situated on North side of Canal with entrance in location of km. 3.5. 5 berths suitable for tankers up to 10.40 m. (fresh water) draft. Hoses of 6 in., 8 in. and 10 in. for handling crude oil, diesel oil, gas oil, gasoline, tuluol, xylol and lube oil. No slop facilities available.

Ostermoor:
Operator: Veba-Chemie A.G. (VC) Veba-Chemie (PO) Port Authority.

Immigration clearance: Will be carried out on board.
Customs clearance: No freeport. Customs clearance will be carried out on board.
Tug assistance: According to assignment of Port Authority.
Mooring: The use of constant tension winches is prohibited (berth 2 and 4 only). Port Authority will allocate berth where as the exact position alongside berth will be advised by VC. The Master is responsible for safe mooring. Additional mooring may be requested by Port Authority responsible VC. Stem of vessel at berth in direction Kiel Canal. Exception regulation by Port Authority.
Drinking water: Available at berth 1, 2 and 4 against payment (PO).
Steam and nitrogen: Not available from ashore.
Bunkers supply: By barges only. The Port safety regulation must be observed (Northern Basin).
Ship repairs: Permission of VC required.
Electricity supply: No connections available.
Garbage disposal: Available (PO).
Dirty ballast disposal: Not possible in the Port. Available only at Elbe – Port jetty and Kiel Canal (Inner harbour) by Elbe – Slop – Ex GmbH.
Navigating into the North Basin: (direction by VC) – only after stop of cargo operations at berth 4.
Gangways: At berth 2 and 4 gangways are at hand (VC). At berth 4 and at waiting place a lifeboat has to be ready at the accommodation ladder at the offside during cargo operations.
Stop of cargo operations in case of emergency: At the sound of the signal "stay away" (· —) and fire (— — —) by loudspeaker; at the instructions given by telephone or loudspeaker; when the flashing light is in operation; at the release of the disconnection couplings; in case of fire on board.

Loading and Discharging Installations	*Berth/Products*		
	Berth 1 *Urea bulk-bagged*	*Berth 2* *Heavy Fuel Oil*	*Berth 4* *Anhydrous Ammonia*
Loading/discharge rate with vapour return line (max.)	—	—	*800 t/h (at −33° C) 250 t/h (at ambient temp.)

Further equipment at berths: Service limits of installed own gangways (Height refers to normal water level/top edge deck)	—	+1.0 to +12.5 m.	+1.5 to +14.5 m.
Public telephone connection against payment/number	compulsory/87211	compulsory/87212	compulsory/87213
Public telephone of harbour: 8066, 8067, 8068, 8069 (PO)	during loading/discharging at berth 4		
Branch line of VC telephone system (free of charge)/telephone number of ship. Telephone No. Portmaster 2171.	—	compulsory/2180	compulsory/2181
Delivery of goods from ashore	by ship's gear	by ship's gear	with jetty-crane against payment

Remarks: *reduced discharge rate at higher cargo temperature; †only possible in exceptional cases (discharge); ‡at following conditions: P min=3 bar, T min=+55° C. Viscosity max.=35° E/+55° C.

Also see "Fuel".

Fire on board: The Port Supervisor of VC has to be informed immediately. Cargo operations have to be stopped immediately. Ship has to give usual Thyphon – Firesignal ("F").

Cargo stop in case of bad weather: Berth 1: rainfall, windspeed 22 m/sec.; berth 2 and 4: windspeed 26 m./sec.

ETA messages: 72 hours prior to arrival to VC via Agent with the following informations: (1) Ship's name and call sign; (2) Arrival time; (3) Cargo (product and quantity); (4) Tankers: number and diameter of cargo manifold connections; (5) Any damage to hull, tanks or overboard valves. Vessels are dispatched according to accepted ETA. In any case ETA has to be repeated 48 and 24 hours before arrival.

Ships with dangerous cargoes or tankers which are not gas-free have to be reported to the Port Authority 48 hours before arrival.

As of January 1, 1979, gas tankers for ammonia are obliged to carry on board an IMCO Certificate and a certificate from a recognised classification society confirming certain water police pre-requisites for navigating the Kiel Canal.

Oil tankers of more than 2,000 d.w.t. must be in possession of a valid Oil Liability Certificate.

Cargo handling at berth 2 and 4: Before starting cargo operations following measures are to be taken:

Confirmation of Checklist by vessel's command.
Tank-resp. cargo inspection by VC.
Referring to "Operation plan" by VC.
Connection of ground-wire.
Emergency towing wires (steel) must be provided at water level (berth 4 only).
Installation of telephones.
Gas detectors handed on board (berth 4 only).
Fire hoses must be laid out and connected to fireline, which has to be under pressure during all cargo operations (berth 4 only).

Connection and disconnection of loading arms will be done by VC personnel.

Watchmen: During cargo operations a watchman has to be on stand-by at manifold. In case of an emergency, vessel's pumps must be able to be shut down immediately.

Minimum cargo crew during cargo transfer operation at berth 4:

1 Deck Officer } fully qualified in cargo
1 Ass. Eng. Officer } transfer operations
2 deckhands
1 watch officer for duties other than cargo transfer.

DENSITY: Brackish at Elbe Harbour and inside locks. Average density 3% NaCL.

FRESH WATER: Most berths supply by shore installations.

FUEL: All grades available. Vessels in Elbe Harbour supplied by barge.

Bunker stations on South side of Canal are:

Shell – 2 berths, no gas oil.
BP – 3 berths.
Elf (See Ostermoor) 4 berths.
Elbe-Slop-Ex – 2 berths.

and on the North side of Canal:

Norddeutsche Bunkergesellschaft – 1 berth no gas oil.
Brunsbuttel Bunker Service. – 3 berths.

FIRE PRECAUTIONS: No specific precautions except in Oil Harbour where anchors may not be used. Fire safety-lines must be ready fore and aft.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary but available day and night if required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ships entering canal and using terminals mentioned under "Max. Size" must have international ship's register. All other certificates should be valid but are normally not used.

CUSTOMS ALLOWANCES: Tobacco, each Crew member 200 cigarettes or 50 cigars or 250 grams of tobacco. Surplus will be sealed up by customs. Wine and/or spirits 1 bottle of spirits and 1 bottle of wine permitted for each Crew member. Beer unlimited. Ships transitting canal are not affected.

IDENTIFICATION CARDS: Normally not needed. If necessary in special cases identification Cards will be issued by Immigration.

CONSULS: All consulates available at Hamburg. Swedish Vice-Consul at Brunsbuttel.

REPAIRS: Only minor repairs can be effected. Big yards and dry docks available at Hamburg.

REPATRIATION: Crew changes can be arranged in connection with local immigration Office.

AIRPORT: Nearest Airport Hamburg. 90 km. away.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: Cargo work can be arranged on every day.

POLICE/AMBULANCE/FIRE: Police 110 and 3041; Waterway Guard Police 1012 and 8444; Passport Control 87.262; Customs 8555; Hospital 601; Fire 112.

TELEPHONES: No facilities for placing telephone on board.

AUTHORITY: Canal Authority – Wasser-und Schiffakrtsamt Kiel-Holtenau, Aubenstelle Kanalamt, Hafenkapitan Brunsbuttel.

BUTZFLETH: 53.39 N. 09.32 E.

DOCUMENTS:

3 Crew Lists.
3 Bonded Stores Lists.
3 Crew Manifests.
Maritime Health Declaration.
Ship's Register.
Discharge Books.
Passports of Crew.

Butzfleth is not a free-port. Customs, Immigration and River Police board on arrival at berth.

DEEP SEA PILOTAGE: See "General" before first German Port.

PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.

Pilotage River Terminal: Elbe Pilots also act as docking Pilots.

ANCHORAGE: Freiburg Anchorage, approx. position Lat. 53° 50.6′ N., Long. 09° 19.5′ E., depth of water up to 13 m. below chart zero; there are further anchorages for small vessels at Krautsand – and Twielenfleth Roads. (see "General" before first German Port.)

RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port, but no special Port Radar Service for Butzfleth. Radar Service in the area of Butzfleth available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio" and/or VHF Channel 5, "Steindeich Radar Radio".

RADIO: All messages to Agents and Pilots, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.

TUGS: 4 tugs compulsory for mooring and unmooring. To be ordered from Hamburg and Brunsbuttel through Agent.

BERTHING: *Aluminium Oxid Stade GmbH. (AOS):* This bauxite/oxide plant, situated on the Westbank of the River Elbe, can be reached by vessels with max. drafts of 43 ft. F.W.

Quay length		*Depth at normal Low water*
Quay outside in total	325 m.	15 m. (49 ft.)
Within reach of crane............	205 m.	
Quay inside	200 m.	7 m. (23 ft.)

When the depth of the River Elbe has been increased, (end 1978), it is expected that larger vessels will be handled at this installation. (Max. draft approx. 46–47 ft.).

The oxide produced at this plant, apart from being exported, is used for the mills of V.A.W. Elbewerk GmbH., Stade-Butzfleth and of Hamburger Aluminium Werk GmbH., Hamburg Finkenwerder.

Average discharging/loading rate	
West African bauxite..	500 m. t.p.h.
Australian bauxite:	
from Gove..	550–600 m. t.p.h.
from Weipa..	750 m. t.p.h.
Oxide ("Spout" loading)..	500 m. t.p.h.

Ship's telephone connection (4146-1453) at AOS pier.

Dow Chemicals GmbH: This industry, situated close to the AOS plant, offers 2 berths for gas and chemical tankers.

	Products	
Restrictions	*Inflammable*	*Non inflammable*
Length at quay outside	149 m.	250 m.
Length at quay inside	125 m.	
Draft at quay outside	43 ft.	43 ft.
Draft at quay inside	26 ft. 3 in.	
Discharging rate liquid gas		approx 150 t.p.h.
Loading rate chemical products		200-650 t.p.h.

MEDICAL: Hospital and doctor available.

FRESH WATER: Available.

FUEL: Supplied by barge from Brunsbuttel or Hamburg.

REPAIRS: Minor repairs can be carried out.

AGENT: Sartori Berger, PO Box 1140, 2212 Brunsbuttel, tel. (code 4852) 8091 (5 lines), telex 28324.

CUXHAVEN: 53.52 N. 08.42 E. (See Plan Book)

DOCUMENTS:

Stores List.
Crew List.
Customs Manifest.
Derat. Certificate.

Amerikahafen is a Customs free port.

DEEP SEA PILOTAGE: See "General" before first German Port.

PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.

PILOTAGE: Pilot station situated in Old Harbour (Alten Hafen). To obtain Pilot call "Cuxhaven Post", VHF Channel 12. Pilot signal is flag "G" of International Code, or sound signal – 2 long and 2 short blasts.

ANCHORAGE: Available off Cuxhaven Medem Roads, approx. position Lat. 53° 51.5′ N., Long. 08° 46.5′ E., depth of water about 6 – 12 m. below chart zero; further anchorages see "General" before first German Port.

RESTRICTIONS: Vessels can enter by day or night. No tidal restrictions.

HEALTH: Quarantine clearance effected at Cuxhaven. Only vessels with suspected infectious disease on board are detained.

RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Cuxhaven. Radar Service in the area of Cuxhaven available, can be contacted through VHF Channel 21, "Cuxhaven Radar Radio".

RADIO: For ETA, etc., use Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Cuxhaven, VHF Channel 12, safety and calling Channel 16.

TUGS: Tugs available and used depending on ship size and weather conditions. Cost of tugs is Hamburg Tariff plus 20%.

MEDICAL: Doctors and hospitals obtainable day and night.

FRESH WATER: Available from shore pipe-line up to 50 t.p.h. Small quantities up to 15 tons may be obtained in Roads from bunker barge. There are no water barges.

FUEL: Bunker and gas oil available. Small quantities, up to 150 tons, may be obtained anytime. Otherwise according to conditions of supplying oil company.

FIRE PRECAUTIONS: No special restrictions. Ships with explosive cargo and liquid cargoes of danger class K1 and K2 not allowed in Cuxhaven Harbour.

CARGO HANDLING: A harbour for overseas ferries up to 150 m. length with roll-on/roll-off and container equipment.

GANGWAY/DECK WATCHMEN: Not obligatory, at Master's discretion.

OPENING/CLOSING HATCHES: Normally performed by crew. Stevedores must be paid if required to do this work.

CUSTOMS ALLOWANCES: 40 cigarettes, 1 bottle spirits and 2 bottles wine.

IDENTIFICATION CARDS: If no passport, shore pass required.

CONSULS:

Iceland, tel. 36036/37.
Sweden, tel. 36011/12.
Others at Hamburg/Bremen.

REPAIRS: All deck and engine repairs possible.

DRY DOCKS: Floating dock for vessels up to 110 m. length, and slipway for vessels up to 75 m. long and 13 m. beam.

REPATRIATION: All facilities available.

AIRPORT: Hamburg-Fuhlsbuttel, 130 km. away; Bremen, 110 km. away.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day. Loading/unloading can be arranged on these holidays.

POLICE/FIRE/AMBULANCE: Police, tel. 110; Harbour Police, tel. 22072; Ambulance, tel 23125; Fire, tel. 112.

TELEPHONES: At Steubenhoft and in the ferry harbour, telephones can be put on board.

SERVICES: Compass adjusting and radio overhaul.

SHORE LEAVE: Allowed.

DEVELOPMENTS: A new Ferry Terminal with roll-on/roll-off and load-on/load-off facilities completed May 1978.

AUTHORITY: Niedersachsisches Hafenamt Cuxhaven.

AGENT: See "Hamburg".

ECKERNFORDE: 54.29 N. 09.51 E.

DOCUMENTS:

Stores List.
Customs Documents.
Cargo Documents.
Crew List.

PILOTAGE: No Pilot station. No tide. In East winds, water level can increase to 1.50 m. above normal.

ANCHORAGE: Good anchorage in the Roads between N.W. to N.W. by W. bearing from the port, distance 1 to 1.5 miles. Depths 18–21 m. Anchorage not allowed in harbour area.

CLEARANCE: Customs clearance at any time subject prior notice given. If suspected diseases on board inform Health Authorities.

MAX. SIZE. In outer harbour, up to 5 m. draft; in inner harbour up to 3 m. draft.

RADIO: Radio Kiel, call sign DAO, tel. 39011.

TUGS: No tugs.

BRIDGES: Outer and Inner Harbours separated by bascule bridge, opening to 12 m. width.

MEDICAL: Doctors and hospitals available.

FRESH WATER: Available.

FUEL: Diesel oil available. No coal.

WATCHMEN: Not available.

OPENING/CLOSING HATCHES: By ship's crew.

IDENTIFICATION CARDS: Required, if no passport.

REPAIRS: Available for fishing boats or coasters. Slipway for vessels up to 200 tons.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: Work allowed on Sundays and official holidays subject to Harbour Master's permission.

POLICE/FIRE/AMBULANCE: Police, tel. 110; Hospital, tel. 9011; Fire, tel. 112.

TELEPHONES: Public telephones in harbour area. No installation on board.

SERVICES: Other services available from Kiel.

SHORE LEAVE: Permitted.

AUTHORITY: Stadtwerke Erkernforde GmbH.

ELSFLETH: 53.14 N. 08.28 E.

PORT LIMITS: The seaward boundary of the port is the entrance of River Hunte, vessels are considered to be arrived when alongside the berth or waiting berth, and customs formalities are completed.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
2 Provision and Store Lists.
1 Ship's Certificate.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Pilotage is carried out by Weser River Pilots, no harbour Pilot available.

ANCHORAGE: No anchorage in vicinity of the harbour, see Blexen Roads.

RESTRICTIONS: Max. draft in the entrance at low water is 3.20 m.

MAX. SIZE: Max. size in daytime, length 80 m. Max. size at night-time, length 60 m., draft depends on the tide.

PRATIQUE: Pratique is given on arrival by the health officer. If disease or fever is suspected on board it has to be reported to the Agent.

RADIO: Cable Norddeich (call sign DAN) advising ETA and cash requirements.

RADAR/VHF: No port radar service but river radar can be used for approaching port from Weser lightvessel to Bremerhaven. VHF Channel 6 from Bremerhaven to Elsfleth.

TUGS: Tugs have to be ordered from Bremen or Brake, they join the vessel at River Hunte estuary. If tug lines are used there are no extra charges.

BERTHING: 1 quay with a length of 260 m., depth alongside 150 m.=5 m., and 110 m.=4 m., 1 waiting berth for small vessel 2 m., 1 private berth (Omni-Pac).

SPECIALISED CARGO-HANDLING FACILITIES: 2 cranes with 5 tons and 1 crane with 3 tons. Bulk cargo can be handled with grabs, no other special facilities.

BRIDGES: No bridges to reach the port, but all ships bound for Oldenburg are waiting at Elsfleth for opening bridges.

STEVEDORES: ETA has to be cabled to the Agents to arrange gangs. Port works 3 shifts around the clock, including Sunday and holidays.

MEDICAL: Medical service is available day and night. Hospital is available at Brake.

TANKERS: No tanker berth.

DENSITY: Fresh water.

FRESH WATER: Delivered from the quay by hose.

FUEL: Fuel is delivered by bunker-barges stationed in port.

FIRE PRECAUTIONS: No fire precautions.

CONSUL: No Consuls.

REPAIRS: 1 dockyard, all ship and engine repairs can be carried out.

DRY DOCKS: 2 slipways can be used.

SURVEYORS: Classification Societies have to be ordered from Bremen, surveyors available at Elsfleth.

GANGWAY/DECK WATCHMEN: A crews' watchman is necessary because of strong tidal streams, 2—3 knots.

HATCHES: Hatch-opening/closing to be carried out by crew.

CUSTOMS ALLOWANCES: Quantity permitted for each crew member: 100 cigarettes, 1 bottle of spirits.

CARGO GEAR: Loading/discharging is carried out by shore cranes.

REPATRIATION: Any time. Inform agent.

AIRPORT: Airport at Bremen (50 km). Regular airlines.

TIME: Local time: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police: Station 2263, River 2377. Ambulance: Brake Hospital 04401–4060. Fire 2333.

TELEPHONES: No ship-to-shore communications.

SHORE LEAVE: Crew members are allowed ashore with valid passports.

IDENTIFICATION CARDS: No shore pass issued.

REGULATIONS: No unusual regulations for the port.

DEVELOPMENTS: A new private berth is under construction for the distillery "Pabst & Richards".

GENERAL: All ships bound for Oldenburg have to do clearance in port.

AUTHORITY: Niedersachsisches Hafenamt Brake.

EMDEN: 53.23 N. 07.13 E. (See Plan Book)

DOCUMENTS: Health Certificate: form obtainable from River Pilot and to be completed before arrival Emden locks, where it is collected by Port Health Authorities. Crew Lists. Ship's Register. Slop-chest List.

DEEP SEA PILOTAGE: See "General" before first German Port.

PILOTAGE: Compulsory. At least 12 hours prior arrival at Pilot station, vessel to radio "Emslotse Emden" indicating vessel's name, ETA, destination and draft. Contact pilot vessel on VHF Channel 16 or MW 500 kHz or LW 2023 kHz (daytime) and 2182 kHz (night-time).

Pilot vessel located near Wester Ems Light Buoy in approx. position 53° 37′ N. 06° 24′ E.

ANCHORAGE: Vessels may anchor in vicinity of pilot vessel 9.5 fathoms depth. Sandy bottom.

RESTRICTIONS: Vessels drawing in excess of 26 ft. salt water have to wait for high tide to proceed to Emden proper. Tide rise about 10 ft.
MAX. SIZE: Under normal tide conditions, vessels drawing 38 ft. can enter Emden directly. Vessels up to 47 ft. can be discharged at the berth "Fischerbalje" on the South of Isle of Borkum. Vessel drawing up to 45 ft. salt water can be lightened in river inside Isle of Borkum at the unloading berth "Moewensteert" by floating cranes until appropriate draft achieved. Capacity of floating crane 1,000 t.p.h., 2 cranes available.

Length and beam restrictions imposed by locks at Emden: max. 255 m. length and 35.50 m. width. Vessels exceeding these dimensions require prior permission.
HEALTH: Pratique granted immediately on arrival at locks by Doctor or Health official.
RADIO: Cables should be despatched via Norddeich Radio (DAN).
RADAR: Radar service on the river "Ems" from approx. position 53° 37.5′ N. 06° 23′ E. (Westerems) or 53° 35′ N. 06° 23′ E. (Hubertgat) up to port entrance. The other range (Borkumradar) works on VHF Channel 18. Further information on this Channel.
TUGS: Sufficient tugs available, stationed at Emden locks, ranging from 790 to 3,900 h.p.
BERTHING: *Outer Harbour* quay length 1,539 m. – tidal harbour.

New Inner Harbour accessible through sea lock and Nesserlander Sea lock only for vessels up to 111 m. in length and 14.50 m. width.

New Inner Harbour South quay 932 m. in length. New Inner Harbour North quay 485 m. length, depth about 46 ft. alongside. New Inner Harbour includes Industry Harbour, Quay length 380 m., depth about 25 ft. alongside. Roll on/roll off terminal depth about 20 ft. minimum.
STEVEDORES: Since main commodities consist of bulk cargoes, such as iron-ore, coal, coke, bauxite, no specific requirements.
MEDICAL: Advance notice only required in urgent cases; hospital available.
BULK HANDLING FACILITIES: *Outer Harbour.* Facilities on Western part of quay include 3 stationary grain elevators with capacities of up to 250 t.p.h. and 2 floating elevators each of 250 t.p.h. capacity.

New grain silo, with 11,500 tons capacity equipped with 2 telescopic loading pipes. Handling capacity – 400 t.p.h. seawards, 100 t.p.h.

Inner Harbour. South quay equipped with 8 transporters, 1 of 7 tons, 4 of 15 tons, 2 of 25 tons and 1 of 40 tons lifting capacity each and 2 conveyor belt systems handling about 4,000 t.p.h. each.

North quay equipped with 4 transporters each of 15 tons lifting capacity and an ore conveyor belt system handling 1,000 t.p.h., max. 1,400 t.p.h.
TANKERS: Olhafen situated in Inner Harbour. Tankers up to 36 ft. draft discharge to Frisia Refinery.

Slops may only be discharged at the Tank Cleaning installation of Thyssen Nordseewerke GmbH.

Berth No. 1 is equipped with two 12-in. Woodfield type loading arms used for receiving crudes and loading fuel oils. There is one 8-in. loading arm for bunkering. The average discharge rate is 3,000 t.p.h. Oil Harbour contains 3 further berthing places for smaller vessels.
DENSITY: Average density in Port 1005–1010.
FRESH WATER: Available, supplied by barge, and alongside Outer Harbour Quay.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Neither compulsory nor necessary.
OPENING/CLOSING HATCHES: To be performed by crew.
CUSTOMS ALLOWANCE: New Inner Harbour: Freeport. No restrictions on board vessels. Outer Harbour and Old Inner Harbour restrictions on bonded store. Some every 3rd day.
IDENTIFICATION CARDS: Not required.
CONSULS: Finnish (Vice-Consul), tel. 22084, Norwegian, tel. 20118, Swedish, tel. 21904, Netherlands, tel. 21404.
REPAIRS: All kinds of repairs possible.
DRY DOCKS: Schulte & Bruns (floating dock) length 281 ft., width 52 ft. 6 in., lifting capacity 1,300 tons.

Thyssen Nordseewerke GmbH (floating dock) length 426 ft., width 51 ft. 8 in., lifting capacity 3,500 tons. (Floating dock) length 579 ft., width 88 ft. 7 in. lifting capacity 11,300 tons (Dry dock) length 715 ft., width 97 ft. 8 in.

C. Cassens Schiffswerft (floating dock) length 220 ft. width 33 ft. lifting capacity 1,000 tons. (Floating dock) length 308 ft. width 52 ft. 5 in., lifting capacity 1,780 tons.
AIRPORT: Nearest airports Bremen and Hamburg, about 2–3 hours drive from Emden. World-wide connections. Flight Emden to Bremen or Hamburg possible by air-taxi.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday (June 17th); Prayer Day; Christmas Day; Second Christmas Day (December 26th). No work on New Year's Day, Easter Sunday, Whit Sunday, May 1st and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 23 311; Fire 112.
TELEPHONES: Telephones can be placed on board if vessel berthed Northquay, Southquay or Thyssen Nordseewerke shipyard.
AUTHORITY: Port Captain, Wasser und Schiffahrtamt, Emden.
AGENT: Fritzen Schiffsagentur und Berederungs-GmbH, Neptunhaus, PO Box 109, Emden. Tel 04921 20011 (also after office hours).Telex 027821. Cables "Fritzenagent".

FLENSBURG: 54.48 N. 09.26 E.

PORT LIMITS: The seaward boundary is the line between a special boundary-stone on the Westside and the South corner of the Bluecher-Bridge on the Eastside of the port entrance.
DOCUMENTS: 2 crew lists, 2 passenger lists, 2 stores lists (bonded stores), EG cargo lists, bills of lading, general declaration, ship's certificates.
PILOTAGE: Pilot Station Flensburg, Schiffbrucke 12, D-2390 Flensburg, tel; (0461) 25150. Advance notice 5 hours before arriving Buoy 7 by Kiel Radio or agent (3 hours before leaving port). Pilot boards at Kalkgrund beacon near Buoy 7. Pilot will board in all weather if possible, otherwise pilot-boat will lead vessel to that position where pilot can board. Not necessary to anchor. Pilot-boat is a fishing-boat with "Lotse" written in white letters on both sides. Boat will show lights prescribed by international regulations and is fitted out with VHF Channel 6, 10, 16, 25, 26, 27.
ANCHORAGES: Just outside harbour entrance, N.E. of Mittelgrund and West of Kielseng leading lights. Depths of water between 12 and 19 m. muddy ground; same position for quarantine anchorage.
RESTRICTIONS: No specific restrictions; no tide, water-level variations depending only on the wind.
MAX. SIZE: Vessels up to 21 ft. draft can enter without hindrance, maximum draft 23 ft. Beam and length has to be in normal proportion to the draft of a seagoing vessel.
HEALTH: Generally free pratique for ships in the North Sea and Baltic Sea trade, ships coming from overseas ports pratique granted on arrival. Inform pilot if any suspected diseases on board. He will make necessary arrangements. A valid Deratting Exemption Certificate has to be on board.
RADIO: Kiel Radio, call sign DAO, tel. (0431) 39011, telex 02-0081.
VHF: None in Flensburg Port.
RADAR: There is no Port Radar Service.
TUGS: Harbour tugs are not available. If required, Flensburger Schiffsbau-Gesellschaft can supply one tug 470 hp, provided at least 3 hours notice given, ship's lines are used.
BERTHING: Powerstation-Quay length 170 m. depth of water 7.30 m. Harnis-Quay length 470 m. depth of water 6.00 m. Schiffbruck-Quay length 210 m. depth of water 6.50 m. Ballast-Quay length 140 m. depth of water 6.00 m. Depths of water refer to normal water-level.
CRANES: Powerstation-Quay 1 crane 5 tons and 1 crane 10 tons lifting capacity; Harnis-Quay 4 cranes 1 – 5 tons lifting capacity; all cranes are usable for general and bulk cargo.
BULK CARGO FACILITIES: No extra bulk cargo facilities available.
SPECIALISED CARGO-HANDLING FACILITIES: Not available.
BRIDGES: There are no bridges at Flensburg port.
STEVEDORES: Agents make all arrangements. Unloading rates depend on type of cargo. Bulk cargo discharge up to 160 t.p.h. per gang.
MEDICAL: Doctors, hospitals, ambulances available day and night.
TANKERS: 3 berths for tankers up to 1000 GRT with depths of water 5.70 m. and 5.00 m.; diameter of discharge lines are NW 200 and NW 80; average discharge of fuel and gasoil 300 cu. m. per hour.
DENSITY: Winter-time 1015; Summer-time 1012.
FRESH WATER: Available at all berths, delivery rate about 20 cbm/h from shore hydrants.
FUEL: Diesel available in any quantity. Fuel oil subject to 5 hours advance notice from 2 bunker stations and tank lorries.
FIRE PRECAUTIONS: No specific precautions.
CONSULS: Denmark, Nordergraben 19; others at Hamburg.
REPAIRS: Flensburger Schiffsbau-Gesellschaft carry out all ship repairs; outfit section equipped with one crane of 42 tons lifting capacity.
DRY DOCKS: One floating dock with 1,500 tons lifting capacity.
SURVEYORS: All main Classification Societies are present at Hamburg.
GANGWAY/DECK WATCHMEN: No watchman service available.
HATCHES: Opening/closing normally done by crew. Stevedores will perform this for additional payment.
CUSTOMS ALLOWANCES: For consumption on board merchant vessels for each crew member and per day 40 cigarettes or 20 whiffs or 10 cigars or 50 grams tobacco *and* 0.25 litre spirits *and* 3 litres wine are duty-free. If the ship stays for 3 days or longer it is usual to allow three-fold of the mentioned quantity. For shore leave 20 cigarettes are permitted for each person only. If a crew member leaves the ship for at least 3 days the regulations for tourists are applicable.
CARGO GEAR: All loading and discharging done by shore cranes, except elevator-work.
REPATRIATION: Possible at any time without difficulties.
AIRPORT: Hamburg-Fuhlsbuttel, 175 km. distant; 2.5 hours by train.
TIME: GMT plus 1 hour, permanent.
HOLIDAYS: See "Hamburg". No work on official holidays.
POLICE/AMBULANCE/FIRE: Police tel. 110, Fire/Ambulance tel. 112.
TELEPHONES: No installation on board ships.
SERVICES: No tank cleaning and slop disposal services. Compass adjusting possible, advance notice necessary.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No particular or unusual regulations.
DELAYS: Normally no delays.
DEVELOPMENTS: One dredger is at work from time to time.
AUTHORITY: Stadtwerke Flensburg.

HAMBURG: 53.33 N. 09.59 E. (including Altona, Harburg and Wilhelmsburg) (See Plan Book)

DOCUMENTS:
6 Crew Lists
6 Passenger Lists.
2 Provisions and Stores Lists including Fuel Oil.
3 Dangerous Cargo Lists.
Health Certificates (forms obtainable from Pilot).
General Cargo Declaration.
Ship's Register.
Oil Liability Certificate for more than 2,000 tons of oil.

DEEP SEA PILOTAGE: See Brixham or Cherbourg and "General" before first German port.

PILOTAGE:

Pilotage–Anchorage River Elbe: See "General" before first German port.

Pilotage Port of Hamburg: Harbour pilots board the ships close to the Seemannshoft station. Harbour pilots can be called by VHF, Channel 9, morse or sound signal "G" (2 long and 1 short) or flag "G". Pilotage is not compulsory, but advisable to use Pilots in port.

Inward and outward harbour pilotage free for vessels loading and/or unloading at Hamburg.

ANCHORAGE: Available at several places between Elbe 1 and Hamburg. See "General" before first German port.

RESTRICTIONS: No restrictions imposed on night entry for any vessels.

MAX. SIZE: *Inward bound:* Vessels allowed draft of max. 42 ft. in saltwater on arrival Elbe 1 lightvessel, may enter only on rising tide under normal weather and tide conditions.

Container ships exceeding 35 ft. draft in salt water on arrival Elbe 1 lightvessel may enter only on rising tide.

Outward bound: Vessels up to 33 ft. draft in fresh water on departure from Hamburg may leave at any time.

Vessels exceeding 33 ft. draft in fresh water and up to 36 ft. on departure from Hamburg-Finkerwerder port pilot station may leave 1 hour after low water until 2 hours before next following high water.

Container ships up to 36 ft. draft in fresh water on departure from Hamburg may leave at any time.

Container ships exceeding 36 ft. draft in fresh water and up to 39 ft. on departure from Hamburg-Finkerwerder port pilot station may leave 1 hour to 2 hours after low water, but required to anchor at Brunsbuttel N.E. anchorage depending on tide.

Inward bound: Vessels exceeding 300 m. length or 45 m. breadth allowed draft to max. 38 ft. in salt water on arrival Elbe 1 lightvessel may enter only on rising tide.

Outward bound: Vessels allowed draft to max. 33 ft. in fresh water on departure from Hamburg-Finkerwerder port pilot station may leave 1 hour after low water until 2 hours before next following high water. Keel clearance of 10% of draft required.

Vessels over 30 ft. draft will proceed according to tidal conditions in order to reach Finkerwerder pilot station 1 hour before high-water.

The following Harbours can be reached: Also see "Shipmasters Report".

Harburg 1	26–34	26
Kraftwerk Wedel	32–42.5	32
Rethe-Kruse	31–42	31
Blumensandhafen	35–43	35

The maximum draft is dependent on the prevailing Easterly or Westerly winds.

ETA: Master's telegrams via Norddeich Radio, call sign DAN, are passed on to Agent 24 hours a day, week-ends and holidays inclusive. For this reason it is advisable that Masters communicate with Agent via Norddeich Radio.

In order to avoid delay and extra charges Masters should cable their ETA at least 12 hours prior to arrival at Pilot station Elbe I to "Elbelotse Brunsbuttelkoog" via Norddeich Radio, stating the following details:

1. Name of vessel.
2. Gross register tons.
3. Date (2 figures).
4. Time (4 figures).
5. Place where Pilot is required.
6. Place of destination.
7. Draft in metres (4 figures).

For example:

Eta Fjordaas	41079	12	1600	Elbeone	Hamburg	1214
(1)	(2)	(3)	(4)	(5)	(6)	(7)

1 hour before arrival at Elbe I lightvessel Masters are advised to contact the pilot cutter by VHF Channel 13 or 16.

BRIDGES: To be passed by vessels bound for basins South of Kohlbrand.

	Situated	*Max. breadth (ft.)*	*Height above normal H.T. (ft.)*	*Depth at normal H.T. (ft.)*
Kohlbrand Brucke (a high-bridge)	across the Kohlbrand near Neuhof	558	175.5	48
Kattwyk Brucke (a drawbridge)	across the Suder Elbe, before Harburg	328	168	43.6
Rethe Brucke (a drawbridge)	across the Rethe, near Reiherstieg	164	130.3	41

HEALTH: Master required complete health certificate when Pilot boards. Only vessels with infectious diseases are subject to detention.

RADIO: All mesages to Agents, etc., through Norddeich Radio, call sign "DAN". Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16. Ships reporting stations are on permanent duty at Cuxhaven: VHF Channel 12, safety and calling Channel 16; Brunsbuttel: VHF Channel 14, safety and calling Channel 16; Stadersand: VHF Channel 11, safety and calling Channel 16; Hamburg: VHF Channel 12, safety and calling Channel 16.

Hamburg Port Radio: VHF Channel 14 and 16.

All stations are on duty 24 hours.

RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port.

Harbour Radar Service at the lower end of Seemannshoft, VHF Channel 19, "Hamburg I Radar Radio"; at the upper part of Seemannshoft, VHF Channel 20, "Hamburg II Radar Radio"; at the upper part of Lotsenhoft, VHF Channel 18, "Hamburg III Radar Radio".

TUGS: Normally join incoming vessels at Harbour Pilot station at Finkerwerder. Vessels' lines usually used. If tugs lines required, an extra charge is made.

BULK HANDLING FACILITIES:

Grain	*Maximum Draft*	*Length*	*Number of elevators*	*Capacity total/hour*
Hamburg–Kuhwerder Hafen	34 ft.	656 ft.	5	800 tons
Hamburg–Rethe/Stroh	37 ft.	753 ft.	3	750 tons
Hamburg–Rethe/Kruse	40 ft.	820 ft.	3	900 tons
Hamburg–Rethe/Makprang	36 ft.	753 ft.	11	1,300 tons
Hamburg–Neuhof	43 ft.	902 ft.	4	1,300 tons

There are 15 floating elevators with a capacity of 350/450 t.p.h.

	Quay length (feet)	*Max. safe draft (F.W.)*	*Max. height discharging gear above high water level (feet)*
Coal and Minerals:			
Hamburg–Tollerort	900	33 ft.	80
Hamburg–Harburg II	1,720	40 ft.	66
Elbehafen Brunsbuttelkoog Gmbh	1,968	37 ft.	98
Coal:			
Hamburg–Kattwyk	1,200	43 ft.	50
Hamburg–Strandhafen	560	36 ft. 6 in.	No restriction
Hamburg–Wedel	1,050	42 ft. 6 in.	No restriction
Fertilisers:			
Neuhof–Kalikai	1,215	40 ft.	60
Minerals:			
Hamburger–Stahlwerke	1,340	36 ft.	82
Hansaport	1,850	43 ft.	No restriction
Petcoke/Oxide:			
Hamburger Aluminium Werk Gmbh	600 ft.	36 ft.	No restrictions
Bauxite/Oxide:			
Aluminium Oxid Stad Gmbh (AOS)	1,080 ft.	43 ft.	62

CONTAINER HANDLING FACILITIES:

Terminal		*Length (m.)*	*Depth (m.)*	*No. berths*
Burchard–Kai		2,235	8–13	9 (2 Ro-Ro)
Tollerort Container 508 m.	total:	1,000	10–11	7 (2 cont.)
Africa Multi-purpose		1,600	9–11	11
Euro-Kai KG aA Griesenw. Damm		735	12–13	5 (2 cont.)
Unikai Shed 73–74		1,675	10–11	11 (1 cont.)

CRANES:
Abbreviations: B (Bridges), C (Cranes), MC (Mobile Cranes), FC (Floating Cranes).
Burchard-Kai: 4 B at 53 t, 3 B at 42 t, 1 B at 38 t, 12 C up to 25 t, 2 MC at 30 t.
Tollerort: 2 B at 48 t, 2 Cargo-Tainer Twin-Cranes up to 50 t, 6 C at 15 t, 12 C at 3–5 t.
Africa: 7 C at 33 t, 1 C at 8 t, 10 C at 3 t, 1 MC at 20 t.
Euro-Kai: 4 B at 45–53 t, 4 C at 25 t, 5 C at 6 t, 1 MC at 12.5 t.
Shed 73: 2B at 50 t, 8 C at 3 t, 1 MC at 60 t, 2 FC at 25–30 t.

STEVEDORES: Ordered by Agents, no additional ETA's required.

Working hours	
Monday to Friday	First shift 0650 to 1500 hrs.
	Second shift 1500 to 2310 hrs.
	Third shift 2310 to 0650 hrs.
Saturdays, Sundays and holidays	First shift 0700 to 1300 hrs.
	Second shift 1300 to 1900 hrs.
	Third shift 1900 to 0100 hrs.
	Fourth shift 0100 to 0700 hrs.

Work performed after 1500 hrs. Monday to Friday, on Saturdays after 1300 hrs., on Sundays and holidays is at overtime rates.

TANKERS:

	No. of berths	Max. Draft (FW)
Kohlfleethafen (Esso/B.P.)	2	43 ft.
Petroleumhafen	10	34 ft.
Kattwyk/Shell	2	43 ft.
Kattwyk/Petronord	1	43 ft.
Blumensandshafen	1	43 ft.
Neuhof/Hansamatex	4	37 ft.
Neuhof/Schindler	2	37 ft.
Harburg IV/Esso	2	34 ft.
Tankerlager Moorburg	1	40 ft.
Stadersand	1	35 ft.

Tanker cleaning and gas freeing facilities at Hansamatex, Shell-Kattwyk/Hog and some dolphin berths by boats.

DENSITY: Fresh water.

FRESH WATER: Available from shore at most berths. Also supplied by barge.

FUEL: All grades available from oil berths, or supplied by barge.

DEVELOPMENTS: Silo capacity for bulk cargo handled by pneumatic elevators is increased up to 500,000 tons at deep water. Capacity of further 500,000 tons is available. Maximum depth for bulk cargo vessels 46 ft.

Dredging of the Lower Elbe by a further 1.5 m. to 16 m. at mean high tide is underway. This depth will be sufficient for fully loaded 100/120,000 d.w.t. vessels, completion expected end 1978.

Port Extension Area. An industrial port area of 4,600 ha. with access for large sea-going vessels up to 120,000 d.w.t. is under development.

Hansaport: The new ore/coal terminal at Sandauhafen (operational from 1977) has a capacity of 15 millions tons p.a. Length of the two berths: 560 m; depth of water: 15 m. (MLW). Vessels up to 160,000 d.w.t. (partially lightened) will be able to berth.

WATCHMEN: Can be hired for all purposes. Normally arranged by Agent.

OPENING/CLOSING HATCHES: Normally by crew with the assistance of stevedores; otherwise, according to charter party.

CUSTOMS ALLOWANCES: No restrictions in the freeport area on board a ship. While not on board the ship in the freeport area or outside the freeport during shore leave or temporary leaving the ship up to 3 days, each Crew member allowed 20 cigarettes, 5 cigars and 50 grams tobacco. These quantities change when paying off.

CONSULS: All Maritime countries are represented by Consuls in Hamburg.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyards at Hamburg. Underwater repairs and cleaning can be effected by divers with special equipment.

DRY DOCKS: *Blohm and Voss*, tel. 3061: 6 floating docks with lifting capacities up to 50,000 tons. Graving dock, capacity up to 320,000 d.w.t.

Howaldtswerke Deutsche Werft, tel. 7411: 9 floating docks, with lifting capacities up to 53,000 tons.

Norderweft, tel. 311471: 2 docks, for vessels up to 4,000 tons d.w.t. and slipway for vessels up to 60 m. length.

There are other slipyards providing floating docks with lifting capacities of up to 5,000 tons.

TIME: GMT plus 1 hour all year round.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Day (June 17th); Prayer Day; Christmas Day; Boxing Day. No work on New Year's Day, Easter Sunday, May 1st, Whit Sunday and Christmas Day.

POLICE/FIRE/AMBULANCE: Police 110; Fire 112; Ambulance 110; Port Medical Service 321021.

SHIPMASTER'S REPORT: August 1978.

Recently vessel called at Hamburg to load a full load of steel beams for Iran under Time Charter. Originally charterers had asked me to calculate the full load with maximum S.W. draft of 38 ft. 00.875 in. with 10.5 in. F.W.A. and the weight came to more than 39,000 long tons. But later when we arrived at Hamburg, while checking with Port Authorities it was learnt that though vessels are allowed to come in with 42-43 ft. drafts fresh water, no vessels excepting, at times fast container vessels are allowed draft more than 36 ft. fresh water. This is generally not known to many operators even in Hamburg.

AUTHORITY: Hafendirektion.

AGENT: Wm. H. Muller & Co., Schiffahrts-Agentur G.m.b.H., Monckebergstrasse 31, D-2000 Hamburg 1. Tel. (040) 33.54.76. Telegrams "Batavier". Telex 2162926.

HOLTENAU, Kiel Canal: 54.22 N. 10.09 E. (See Plan Book)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

LOCATION: Holtenau is a part of the town of Kiel, it is located on the Northern side of the entrance to the North Sea – Baltic Canal.

MAX. SIZE: The max. draft for the port of Kiel-Holtenau is 9.7 m.

BERTHING: The outer harbour of Kiel-Holtenau (Lat. 54° 22.2′ N. Long. 10° 09.2′ E.) in the N.E. part of the old lock fore port, with water depths of 3.5 to 4.5 m. and 280 m. long quay location serves vessels up to 3.5 m. draft, 85 m. long and 13 m. beam as a berthing point. At the quay not more than 3 ships with a total beam of 30 m. can lie next to each other. To the West of this, is a 125 m. long berthing pier, known as Kumobrucke, with 4.5 m. draft alongside for vessels up to 3 m. draft, 45 m. long and 8.5 m. beam. No more than 2 vessels may lie alongside each other.

Between this pier and the shore is a yacht harbour and a further anchorage for pleasure craft.

The inner harbour, to the East of the Holtenau main pier, can only be reached through the lock of the North Sea – Baltic Canal. From the anchorages in the inner harbour, vessels may not enter the locks without a Pilot where they are obliged to take on a Pilot for the North Sea to Baltic Canal.

The Gasworks quay, just to the West of the New Locks, has a length of approx. 210 m. and a nominal depth of 10.4 m. The quay has cranes with a lifting capacity up to 8.5 tons. Vessels up to 15,000 g.r.t. and up to 9.7 m draft can tie up at the Gasworks quay. To the West of it, is an approx. 94 m. long quay with piers for Wik-Holtenau passenger ferries.

To the East of the Holtenau main pier, is an approx. 536 m. long quay belonging to Zerssen and Co. This location is used mainly for fitting out and bunkering of vessels. On the North side of the inner harbour ships with dimensions permissible for the North Sea to Baltic Canal are accommodated at appropriate berths.

SERVICES: In Holtenau are a Service Station of the German Hydrographic Institute, a pilot station, an area Police contingent, Customs control, Port Doctor, Sailors' Central Control, Sailors' engagement office, and a sailors' hostel.

An office for marine charts and nautical publications is located at the lock; good facilities exist for the quick supply of ships' equipment, victuals and fuels. Repairs to machinery installations, radar and wireless apparatus, supply of spare parts, and also the exchange of crews can be arranged without long voyage delay virtually whilst a vessel is passing through the canal. Shipbrokers' services are available.

KIEL: 54.19 N. 10.10 E. (See Plan Book)

DOCUMENTS:

Stores List.
Bills of Lading.
Manifest.
Crew List.
Health Declaration.
Derat. Certificate.
If loading/unloading cargo, following also required:
Ship's Stores List.
Crew Possessions List.
Cargo Manifest.
Bills of Lading.
Customs Declaration.

Local Agents will advise Master on board regarding these Clearance Documents.

PILOTAGE: Not compulsory for Kiel Harbour. For Kiel Canal, vessels over 50 g.r.t. must take a Pilot, and vessels over 2,500 g.r.t. must employ a steersman. Pilot station, tel. 362858. ETA required in advance. Pilot boat can be found near Kiel Lighthouse and also off the entrance to Kiel Canal. Pilot boats are yellow with "Lotse" painted on both sides. Signal for Pilot is flag "G" over numeral pennant 1. Pilots for Kiel Harbour also available and recommended if port is not familiar.

ANCHORAGE: Safe anchorages at Kanalreede in 13 m. depth, and at Heikendorferbucht in 11 m. depth.

RESTRICTIONS: Non gas-free tankers must give advance notice of arrival and will require chemist's certificate before entering harbour area.

Speed limit 10 knots South of line Bulk/Ehrenmal Laboe.

MAX. SIZE: For Nordhafen and ships passing Canal, 315 m. length, 40 m. beam, 9.50 m. draft; fresh water. Depth at harbour quays: Binnenhafen, 10 m.; Scheerhafen, 10.50 m. A bulk carrier of 35,000 d.w.t., draft 35 ft. has discharged at Scheerhafen.

HEALTH: If suspected infectious disease on board, inform harbour authorities by radio in advance.

RADIO: Kiel Radio, call sign DAO. Tel. 39011.

TUGS: If required tugs normally join vessel just off berth. Can be ordered by Kiel Radio or through Agents.

BERTHING: No particular restrictions except for vessels in distress, or carrying explosives or tankers not gas-free. In these cases special permission of Harbour Authorities required for berthing.

Binnenhafen: Length of quay 2,500 m. Depths up to 10 m. 6 cranes with capacity up to 24 tons, also 2 mobile cranes.

There is a mobile roll-on/roll-off bridge, 18 m. wide. Max. axle pressure 70 tons.

At Sartori-Kai there is a silo with a capacity of 16,000 tons, and at mouth of the River Schwentine another with capacity of 17,000 tons and discharge rate of 80 t.p.h.

Oslo-Kai: The terminal is for the exclusive use of passenger and car ferries. Depth of water 7.5 m!

Scheerhafen: Length of quay 300 m. Depth 10.3 m. There are 2 modern high capacity cranes capable of lifting up to 10 tons. There is also a privately owned tanker unloading facility with storage capacity of about 70,000 cu. m. and facilities for receiving dirty ballast.

Nordhafen: Situated in the Kiel Canal. Length of quay 2,000 m. depth 11 m. Facilities available include a floating roll-on/roll-off bridge with permissible axle pressure of 60 tons, 6 cranes with capacities up to 25 tons, a 70,000 ton silo with drying capacity of 70 t.p.h. and 2 elevators each with capacity 125 t.p.h.

MEDICAL: Doctors, hospitals, ambulances available. Advance notice to Agents recommended if medical assistance required. Vessels coming from European ports need Derat. Cert. Vessels from other ports need in addition International Vaccination Certificates.

For all cases of poisoning needing special and urgent treatment telephone 597 3268, Medical University Clinic, Schittenhelmstrasse.

TANKERS: Unloading/Loading/Bunkering berths operated by private companies; slop discharge facilities available.

FRESH WATER: Available at all quays.

FUEL: All grades available. Preferable to order in advance through Agents.

FIRE PRECAUTIONS: Tankers should be prepared to leave port at any time. To be berthed with bow heading seaward. A valid Gas-free Certificate given by chemist in Kiel district is required before entering harbour area.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally by ship's crew. Can be arranged by stevedores if required.

CUSTOMS ALLOWANCES: 20 cigarettes per man per day. No alcohol.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	tel. 75079	Netherlands	tel. 3017235
Chile	tel. 30932	Norway	tel. 706600
Finland	tel. 3011601	Panama	tel. 51296
Liberia	tel. 63060	Sweden	tel. 3017/235

REPAIRS: All types of repairs possible.

DRY DOCKS: *Floating Docks.* No. 1, 1,500 tons; No. 2, 22,500 tons; No. 3, 3,500 tons; No. 4, 6,000 tons; No. 20, 1,700 tons. *Dry Docks:* No.. 5, 794 ft. long, 95 ft. wide; No. 6, 661 ft. long, 95 ft. wide; No. 7, 1,018 ft. long, 164 ft. wide; No. 8, 951 ft. long, 144 ft. wide. No. 8A, 1,395 ft. long, 292 ft. wide.

REPATRIATION: No restrictions. Can also be arranged in the locks of Kiel Canal by local Agents. Valid passports required.

AIRPORT: At Kiel, local flights to Hamburg. Nearest international airport at Hamburg, about 100 km. away.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day, Good Friday, Easter (2 days), Ascension Day, Whitsun (2 days), 17th June, Atonement Day, Christmas (2 days). Work can be arranged on above holidays except Good Friday and Christmas Eve.

POLICE/FIRE/AMBULANCE: Police, te!. 110, alternatively 51171; Ambulance, tel. 44112, alternatively 61036; Fire, tel. 112.

TELEPHONES: Installed on wharves and Oslo quay (ferries to Scandinavia). Public phones near quays.

SERVICES: All services available.

SHORE LEAVE: Allowed.

AUTHORITY: Hafenkapitan, Hafenamt der Stadt Kiel and Hafen unt Verkehrsbetriebe der Stadt Kiel.

KIEL CANAL: (See Plan Book)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

LUBECK (including Travemunde): 53.52 N. 10.40 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
1 Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
1 Ship's Particulars form.
Crew Manifest.
Bills of Lading.
Customs Declaration.
Derat. Certificate.

PILOTAGE: Compulsory for vessels over 300 g.r.t. Pilot station situated at Travemunde, near foot of Nordermole. Pilots board vessels in anchorage area. International signals used by Pilots and by vessels requiring a Pilot. Contact by VHF Channel 13 and 20.

RESTRICTIONS: Channel from Lubeck "A" buoy to Stadthafen is well lit and navigable by vessels fitted with radar in all weathers.

Depths: from "A" buoy to Travemunde (Nordermole) 10.5 m.; from Nordermole to Siechenbucht, 10 m.; channel to NWK power station, 9.5 m.; channel to Stadthafen 8.5 m. The river Trave narrows from 130 m. at seaward end to 90 m. at Stadthafen.

MAX. SIZE: Dependent on berth depth and approaches. Vessels up to 14,000 d.w.t. can reach Stadthafen. Also see "Restrictions".

HEALTH: Radio pratique possible. Pilot will ask Master to complete Health Declaration.

RADIO: Lubeck Radio, VHF Channel 27. Harbour Radio service used by Pilots, tugs, and other vessels.

TUGS: At Stadhafen vessels over 1,600 B.R.T. require 1 tug and vessels over 2,500 B.R.T. require 2 tugs.

BRIDGE: Herrenbrucke is 56 m. wide and 22 m. above water level. Can be opened for vessels requiring higher clearance.

MEDICAL: All facilities available. Hospital near docks at Travemunde, and at Lubeck.

BERTHING:

Travemunde: Passenger ferry harbour. North side river berths I and II, 10 m. depth; Kaiserbrucke, 100 m. length, 10 m. depth; Ostpreussen, 190 m. length, 8 m. depth; Prival (South side), 180 m. length, 5 m. depth. 8 berths for roll-on/roll-off and passenger traffic each 140–220 m. length, 7 m.–9.5 m. depth.

1 berth with railway connection. (Berth No. 6.)

Industriehafen: depth alongside, 7.8 m.

N.W.K. Power Station: depth alongside, 9.5 m.

Stadthafen: 27 km. from sea. Total length of quays 7.6 km. The harbour depth is 6 m.–8.5 m.

Elbe Lubeck Canal: navigable by barges up to 1,000 tons.

CRANES: 1 – 40 ton, 1 – 25 ton, 1 – 12 ton, also 3 ton cranes.

TANKERS: Two berths, length 150 m. Max. draft 8 m.

FRESH WATER: Available by barge at any location.

FUEL: All grades of bunker oil.

CONSULS: Denmark, Norway, Austria, Sweden, Iceland and Finland.

REPAIRS: Several shipyards available for deck and engine repairs.

DRY DOCKS: Floating docks for vessels up to 7,500 tons.

SURVEYORS: German Lloyd, others at Hamburg.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: All facilities available.

AIRPORT: Hamburg, 1.5 hours by bus or train.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day.

POLICE: Lubeck River Police, tel. 3 34 40; Travemunde River Police, tel. 5025.

TELEPHONES: Ship telephone connections at ro/ro berths.

SHORE LEAVE: Allowed.

AUTHORITY: Port Captain Lubeck.

NORDENHAM: 53.29 N. 08.29 E. (see also Bremen and Bremerhaven) (See Plan Book)

DOCUMENTS:

Cargo Papers & Ship's Certificate.
3 Stores Lists.
3 Crew Lists.
2 Personal Manifests.
Derat Certificate.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Pilot boards off the Weser Light Vessel. Docking Pilot will board off Bremerhaven.

ANCHORAGE: Sea anchorage off Weser lightvessel or the Hoheweg Light. Max. draft 30 ft. River anchorage for vessels with a draft of 20 ft. off Blexen, 1 mile above Bremerhaven.

RESTRICTIONS: No restriction on night entry except vessels with a draft exceeding 38 ft. Vessels with a draft exceeding 32 ft. will be controlled by tidal conditions. Controlling depth in channel 11 m. MLW. In the port 9 m. to 12 m. at MLW (Midgard Pier).

MAX. SIZE: (The max. drafts are estimated). *Midgard Pier: (a)* Bulk cargo berth, total length 1,068 ft. max. beam 120 ft., max. draft 42 ft. 08 in.

(b) Oil berth No. 1 (combined with Southern part of 'a'), max. length 850 ft., beam 120 ft., draft 42 ft. 08 in.

(c) Oil berth No. 2, max. draft 32 ft.

(d) Granary, max. length 690 ft., beam 80 ft., draft 38–40 ft. (FW).

Guanowerk, max. length 550 ft., max. draft 29 ft. 6 in. (approx.).

Preussag, max. length 550 ft., draft 27 ft.

Asbestos wharf: Max. length 820 ft. (250 m.) up to a draft of 40 ft. at MLW.

Also see "Tankers".

HEALTH: Pratique granted immediately on arrival in port by Health Official.

RADIO: Norddeich Radio Dan or Elbe Weser Radio (VHF Channel 16).

RADAR: No port radar available. Radar for entrance see Bremerhaven.

TUGS: Ample available from Bremerhaven. Tug's lines used.

BERTHING: The following industrial works and companies within the port area of Nordenham possess a berth each for sea-going vessels which serve only their private supplies and requirements. These berths are situated North of Midgard Pier.

1. Norddeutsche Seekabelwerke Aktiengesekkschaft, (production of cables).
2. Felten & Guilleaume Schsltanlagen GmbH (production of electric appliances, motors, etc.).
3. Preussag Aktiengesellschaft (s.a.) (production of lead, zinc). Length of quay 230 m., depth of water 32 ft. 10 in. (approx.) 2 cranes of 5 and 3 tons. Capacity 80 and 50 t.p.h. respectively. Storage capacity, 50,000 tons (coal or ore). 10,000 tons (Metal blocks), 5,000 cu.m. (Sulphuric acid).
4. Guano-Werke Aktiengesellschaft (s.a.) (production of fertilisers). Length of quay 100.0 m. One gantry crane.
5. Erdolwerke Frisia Aktiengesellschaft (tanks for the storage of mineral oils).
6. Vereinigte Flugtechnische Werke GmbH (production of airplanes).
7. Asbestos Corporation GmbH (production of asbestos).
8. Weser Tanklager Gesellschaft mbH (storage of mineral oils, bunker oil station of BP).

Connections: Gas oil 2×8″, fuel 1×8″.

9. Titangesellschaft mbH (production of titandioxide).

Asbestos Wharf: Length 210 m. Extra mooring dolphins North and South of wharf 50 m. from each end of wharf. Depth alongside 12.5 m. at MLW. 1 grab crane for discharge of asbestos minerals into conveyor system of factory.

SPECIAL CARGO HANDLING FACILITIES:
Midgard Pier:

No. 1. Bulk cargo berth for discharging and loading, 5 bridges with a lifting capacity of 22 tons each. Max. outreach 24.5 m. Total capacity of ore per shift 10,000 tons.

No. 2. Oil berth. 3 pipe-lines 10 to 12 in. diameter for fuel oil, diesel oil and gas oil. No shore steam or facilities for dirty ballast available.

No. 3. Granary. 2 elevators with a total capacity of 700 t.p.h. Storage capacity of 46,000 tons.

STEVEDORES: 24 hours' notice required. Notice required Friday morning for week-end work.
1st shift: 0600–1400 hrs.
2nd shift: 1400–2200 hrs.
3rd shift: 2200–0600 hrs. (overtime).
on Saturdays: (grain and other bulk cargoes).
1st shift: 0600–1400 hrs.
2nd shift: 1400–2200 hrs. (overtime).
3rd shift: 2200–0600 hrs. (overtime).

MEDICAL: Hospital available; advance notice only required if urgent cases.

TANKERS: Diameter of lines 8 in.

Shell Berth: Max. size 34 ft.

Weser Tankerlager: Max. size 200 m., length 32 ft. draft at L.W. T-shaped mooring lines attached to pontoons fore and aft, middle lines are attached to the shore. Length of lines 100 m.

DENSITY: Average density of water 1005–1012.

FRESH WATER: Fresh water available at a rate of 15 t.p.h. per hose price 2 DM. per ton.

FUEL: All grades available; delivery by barge; 2 days' notice required.

FIRE PRECAUTIONS: Special regulations for vessels loading or discharging explosives.

CONSULS: See "Bremerhaven".

REPAIRS: Minor repairs can be carried out. Ample facilities for major repairs at Bremerhaven.

DRY DOCKS SURVEYORS: See "Bremerhaven" or "Bremen".

WATCHMEN: Not necessary but available if required by Master.

OPENING/CLOSING HATCHES: Normally by crew but if by stevedores extra charges will apply.

CUSTOMS ALLOWANCE: Each crew member 200 cigarettes or 30 cigars or 30 grammes of tobacco and 1 bottle of spirits for a running period of 3 days.

CARGO GEAR: In most cases loading and discharging is effected with shore gear. Special equipment can be ordered from Bremerhaven.

REPATRIATION: Possible by air via Bremen or Hamburg.

AIRPORT: Bremen, distance 70 km., 1 hour by car. Hamburg, 200 km., 3 hours by car.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 2052; Fire 112.

TELEPHONES: Available on request.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Are not issued.

REGULATIONS: Port regulations for the Midgard Pier including special regulations for handling of explosives.

DELAYS: None except waiting for high tide (see restrictions).

AUTHORITIES: Asbestos Corporation, GmbH., Nordenham, "Midgard" Deutsche Seeverkehrs-Aktiengesellschaft, Nordenham. And others.

STADERSAND: 53.37 N. 09.32 E.

Oil Terminal in Elbe River operated by Hamburger Mineralolwerke.

DOCUMENTS:
3 Crew Lists.
3 Personal Effects Lists.
3 Stores Lists.
Cargo Documents.
Ship's Register.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: See "General" before first German Port.

RESTRICTIONS: Draft calculated by adding 31 ft. to height of tide and allowing 3 ft. keel clearance.

MAX. SIZE: Length up to 600 ft.

HEALTH: Health Certificate brought on board by River Pilot for Master to complete.

RADIO: All messages to Agents, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships' reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.

RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German Port, but no special Port Radar Service for Stadersand. Radar Service in the area of Stadersand available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio".

TUGS: Available. Meets vessel off the berth.

BERTHING: 1 tanker berth at T-head jetty.

DENSITY: Brackish.

FRESH WATER: Only obtainable by barge from Hamburg. Minimum quantity supplied is 200 tons.

FUEL: Only obtainable by barge.

CUSTOMS ALLOWANCES: 100 cigarettes and 1 bottle wine/spirits per man.

CONSULS AND GENERAL INFORMATION: Refer to "Hamburg".

AGENT: See "Hamburg".

WILHELMSHAVEN: 53.31 N. 08.10 E. (See Plan Book)

DOCUMENTS:

Oil Port	2 Crew Lists. 1 Health Declaration (Form supplied by Pilot). Derat Exemption Certificate. Passports/Seamen's Books. Vaccination List.
Harbour Docks	2 Crew Lists. 1 Health Declaration. 2 Cargo Manifests. 2 Stores Lists.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Jade pilot boats are 2-masted and have yellow funnels with black tops; the black hull has white inscription "Lotse" on both sides. By day flag "1" below flag "G" of international code is flown; by night, signal is to be given by morse signals, in bad weather by whistle or morse signals.

Pilot vessel stationed at mouth of Weser. To call Pilot for Jade, in addition to International Code signals the signal "J" is hoisted by day or flashed by Morse lamp at night. The same signal can be made on whistle in bad visibility. In bad weather pilot vessel may retire to Roten Sand (Weser River), near the light-buoy "G".

ETA required 12 hours prior arrival at Pilot station. Pilot vessel transmits and receives on VHF Channel 16.

Pilotage compulsory for vessels with dangerous goods. Vessels up to 60,000 d.w.t. take 1 Pilot at "Weser" lightvessel. Vessels exceeding 60,000 d.w.t. take 2 Pilots at "Deutsche Bucht" lightvessel.

Helicopter pilot service is available for vessels above 50,000 g.r.t. at "Deutsche Bucht" lightvessel.

ANCHORAGE: A deep-water mooring for large tankers lies South of the lightvessel "Deutsche Bucht". Ships which are waiting for a Pilot may anchor for a short while by the "Weser" lightship.

2 further anchorages for large and deep-draft vessels, the "North" and "South roads", have been made available to the N.E. and the S.E. of the "Weser" lightship.

Quarantine anchorage, and tanker lightening at Schillig Roads. Vessels waiting for a berth and with max. draft not exceeding 41 ft., may anchor at Wilhelmshaven North Roads. Vessels with draft exceeding 41 ft. must anchor near the tanker anchorage Schillig where the depth is at least 45 ft.

Vessels must report at the beginning of the area-way Jade River to radio station "Jade Revier Radio" on Channel 18 VHF. The area station will give information about movements. "Wilhelmshaven – Port Radio" on Channel 11, gives information about tugs, harbour Pilots and mooring/unmooring etc.

RESTRICTIONS: No restrictions on night entry. Vessels draft exceeding 55 ft., will be controlled by tidal conditions.

The lock opening times for No. 4 dock are announced in daily maritime bulletins.

Dock No. 4, dimensions of lock: 390 m. long, 57 m. wide and depth of 11.47 m. MLW. However, only smaller vessels use dock harbour as bollards for mooring larger ships not yet available.

MAX. SIZE: Max. LOA, 1,150 ft. Max. draft 65 ft. 07 in. Keel clearance of at least 8.5% of draft required. Also see "Tankers".

HEALTH: Radio pratique possible. Sea Pilot will hand Health Declaration to Master. If one of the questions is answered "Yes", Pilot will advise Port Health Officer. A valid derat. exemption must be produced.

RADIO: Norddeich Radio, call sign DAN. Elbe-Weser Radio can be contacted by VHF Channel 16.

TUGS: Compulsory. Tankers normally require at least 4 tugs of minimum 1,500 h.p. for berthing. Tugs meet tankers at anchorage near buoy "43". Only tug lines are used, charge inclusive. Tugs join vessels at buoy "35" when proceeding to Mobil Oil Terminal.

VLCC's meet the tugs at buoy "33" (Mobil Oil) or at buoy "39", when they are bound for NWO.

BERTHING: *Wilhelmshaven Dock Harbour:*

The following dock harbours can be reached:

Harbour Name	*Max. draft*		*Quay length*
Handelshafen	16 ft. 05 in.		600 m.
Grosser Hafen	20 ft. – 26 ft.	Bontekai about	500 m.
Verbindungshafen	18 ft.	Sudwestkai about	200 m.

SPECIAL CARGO HANDLING FACILITIES: There is no Container or Roll-on/Roll-off-traffic at Wilhelmshaven.

BULK HANDLING FACILITIES: The Rhenus-WTAG is the operator of cargo handling in the Handelshafen with its connection to railway, road and canal-system.

Equipment: Two modern gantry cranes of 8–15 tons and efficient mobile cranes. Storage facilities for bulk cargo to an amount of 70,000 tons, 1 silo with a capacity of 720 cu.m. and 2,000 sq.m. storage sheds for bulk and general cargo.

CRANES: Bontekai and Sudwestkai without shore cranes, but mobile cranes available. One floating crane for heavy lifts up to 100 tons is also available.

TANKERS: *Nord-West Oelleitung Terminal:* Position 53° 33′ N, 08° 08′ E. Distance from Weser lightvessel, 24 miles. Type of Berth, Finger Pier "T" head. Density 1025. Current velocity, 3-4 knots. Mean tidal range, 11 ft. 09 in. Nature of bottom, sand and mud. Vessels may berth and unberth day or night. Vessels exceeding 55 ft. draft enter only on rising tide. Fresh water available, Diesel and Fuel "C" available. When discharging, full capacity of ship's pumps required. Normal residues and sediments are acceptable without any water. Shore gangway available. Vessels berth port or starboard side alongside. No limit on length or beam. Max. draft, Berth No. 1 and No. 2 – 61 ft. Berth No. 3 – 51 ft. and Berth No. 4 – 66 ft.

Berth Number	*Grades Handled*	*Pipe-lines No/Dia.*	*Length*	*Load – Discharge Rate Tons/Hour*	*Maximum Pressure*	*Hoses*

Mobil Oil Terminal: Berth No. 1 and 1A. Position 53° 37′ 28″ N, 08° 08′ 30″ E. Distance from Weser lightvessel, 20 miles. Type of berth, Sea Island. Density, 1025. Current Velocity, 3-4 knots. Mean tidal range 10 ft. 6 in. Nature of bottom, sand and mud. Least depth of water from port entrance to berth, 18.5 m. (60 ft. 09 in.) at MLW. Vessels may berth or unberth day or night. Vessels exceeding 55 ft. draft enter only on rising tide. Fresh water available by barge. Fuel "C" and Diesel available. Dirty ballast facilities available, capacity 29,000 cu. m. seawater, 17,900 cu. m. fresh/brackish water, discharge rate, 2,400 cu. m./h. Vessels berth port or starboard side alongside. All ballast, including clean ballast, to be discharged ashore.

Shore gangway available. An under keel clearance of 1 m. is required at Berth No. 1A at MLW.

Berth No. 1. Max. LOA, 1,150 ft. Min. length, 800 ft. Max. draft, 65 ft. Depth at MLW 68 ft. 11 in.

Berth No. 1A. Max. LOA, 650 ft. Min. length, 500 ft. Max. draft at HW, 48 ft. 2 in. Depth at MLW, 41 ft.

Berth Number	*Grades Handled*	*Pipe-lines No/Dia.*	*Length*	*Load – Discharge Rate cu.m/h*	*Hoses*

Niedersachsenbrucke: (Lower Saxony Bridge) The "Niedersachsen Bridge" which belongs to the state of Lower Saxony is equipped with a fuel oil discharge unit for supplying a large nearby plant. Small ships can be discharged by a portal crane of 15–18 tons. The land-side berth of the loading pontoon running parallel to the Ufer is about 12 m. depth, so that loaded tankers up to a size of 35,000 d.w.t. can come alongside this pontoon. Furthermore, on this pontoon a loading installation for caustic soda is available. A bulk discharger unit with a hourly capacity of 1,200 tons serves coal to a large nearby plant. Vessels of 80,000 d.w.t. and a draft up to 13.5 m. can be accommodated.

Drinking water in adequate quantities is available at all shipment pontoons in the Jade.

Bunker and diesel oil is available in adequate quantities from Nord-West Ollleitung and Mobil Oil A.G. At the "Niedersachsen Bridge" it is necessary to order a bunker vessel in advance.

DENSITY: Brackish water.

BRIDGES: 3 swing bridges affect entering dock harbour; these are opened to coincide with lock opening times.

STEVEDORES: 24 hours notice required. Bulk cargo discharge rate about 150 t.p.h.

MEDICAL: All medical facilities available.

FRESH WATER: Available by pipe-line.

FUEL: All grades available. 2 days notice required.

REPAIRS: Jadewerft Wilhelmshaven Dockyard (Handelshafen) for small repairs and a floating dock with a capacity of 1,100 tons.

GANGWAY/DECK WATCHMEN: Shore watchman recommended to attend telephone.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: Oil port is Customs free port. In dock harbour each man allowed 5 cigars or 40 cigarettes, or 50 grams tobacco and 50 pieces of cigarette paper; 1 unopened bottle wine/spirits.

DEVELOPMENTS: *Liquid gas berth:* To the North of Mobil Oil A.G. a liquid gas jetty together with another jetty for loading and discharging of liquid chemicals, liquid petroleum, gas and fuel oil is to be installed. The L.N.G. jetty will take gas tankers up to a capacity of 125,000 cu.m.

"Lower Saxony Bridge" (Niedersachsen Bridge): The "Niedersachsen Bridge" is to be extended. It is planned to provide facilities for the loading and discharge of large vessels up to 250,000 d.w.t. with dry and liquid bulk cargoes.

IDENTIFICATION CARDS: Required in oil port.

CONSULS: Denmark tel. 41061. Sweden tel. 26266. Finland tel. 8021.

REPAIRS: Facilities available for all deck and engine repairs. Repairs affecting main engine or steering gear intended to be carried out at the berths or at Wilhelmshaven anchorage, must be authorised by NWO, Mobil Oil A.G. and Port Authorities, when sufficient security tugs will be ordered to stand by. No additional charge for tugs if ordered before arrival. Permission for repairs depends on prevailing weather conditions and should be requested before arrival.

DRY DOCKS: Floating docks for vessels of 8,000 and 1,000 tons respectively. 1 small dry dock 50 m. by 10 m. by 2.8 m.

REPATRIATION: All facilities available.

AIRPORT: Nearest international airport at Bremen, distance 102 km.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: Not observed in oil ports. 1st January; Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whit Sunday; Whit Monday; 17th June; Atonement Day; Christmas Day; Boxing Day. Work may be arranged on Easter Monday, Ascension Day, Whit Monday and Boxing Day.

POLICE/AMBULANCE/FIRE:
Police: 52400.
NWO Oil Port: Fire/Ambulance 621.
Mobil Oil AG.: Fire/Ambulance 551328
Niedersachsen Bridge: Fire/Ambulance 50308 or 26121.
Dock Harbour: 112 or 26121.

TELEPHONES: May be placed on board all tankers in oil port. At some locations in dock harbour, installation by Post Office, which require 2 days notice.

SERVICES: All services available including tank-cleaning, diving, compass adjusting, etc.

SHORE LEAVE: Allowed.

SHIPMASTERS REPORT: Mobil Sea Island (Platform):

Position: Between Jade River buoys Nos. 18 and 19.

Pilotage: Sea Pilots (2) board/leave at Deutsch Bucht Light Vessel by helicopter.

Berthing Pilots (2) board/leave about 2 to 3 miles North of Sea Island by launch.

Pilotage straightforward to Weser Light Vessel where river passage begins.

Two bad bends here make strict attention to steering and helmsman necessary.

Passage Time:

Inward (VLCC – half cargo)	
Sea Pilotage	3 hrs 50 mins
Berth Pilotage	54 mins
Mooring	57 mins
Pilotage distance	41 miles
Outward (VLCC – Ballast)	
Berthing Pilotage	39 mins
Sea Pilotage (to 8 miles South of Light Vessel)	2 hrs 24 mins
Pilotage distance	31 miles

Helicopters: Base for the 3 German rivers at Wilhelmsport.

First contact one to two hours before arrival at Deutsch Light Vessel via Norddeich Radio Channel 16-27 when ETA confirmed and that vessel is familiar with helicopter procedures.

Thereafter continuous watch on Channel 16 VHF until helicopter contact will require continuous calling on 410 kcs and listening out on Channel 9 VHF until operation completed.

Berthing/Unberthing: Carried out at slack water only. Deep laden VLCCs on high water only. Ballast or half-loaded VLCCs on either slack water. Deep laden VLCCs can only proceed inward on flood tide.

Tugs: Six tugs used for any VLCC movement, 1 forward, 1 aft and 4 "pushers".

Moorings: Standard VLCC mooring arrangement. Springs run out first.

Cargo: 4×16 in. Chicksan booms available. Discharge rates compatible with modern VLCC facility. Official outturn figures average 1.5% less than ship figures.

Crude Oil Washing: Subject prior permission this is allowed.

Air Pollution: Monitoring of gas emission from tank venting system carried out during ballastings. If readings high, ballasting rate must be adjusted to keep readings within set parameters (parameters not known).

Documentation: As per "Guide". *Important that Certificate of Financial Responsibility is on board otherwise vessel fined (up to a maximum of D.M. 10,000).*

Shore Leave: Permitted. Ferry is on call when required from Island to mainland berth. Refinery jeep is then on call from Gate House. It is forbidden to walk in Refinery area. Taxis can be called from Gatehouse.

General: The Sea Island is in the "free port" area, therefore, no personal effects lists or other customs problems. Authorities inflexible if certification problems arise (Certificate of Financial Responsibility).

AUTHORITY: Wasser und Schiffahrtsamt Wilhelmshaven.

NOTES

Please also advise Shipping Guides Ltd.

GENERAL:

HEALTH: *Pratique procedure:*

1. The Port Health Officer or authorised officer shall grant to a ship as soon as the following conditions shall have been properly complied with:—

(a) The Master shall complete accurately to the best of his knowledge and belief a Maritime Declaration of Health Form.

The Declaration shall be countersigned by a ship's surgeon if one is carried and shall be delivered to the Port Health Officer or authorised officer.

(b) The answers to the questions in the Declaration shall clearly indicate the absence of any infectious disease on board during the voyage or on arrival of the ship, and that the ship has not called at any infected area or had direct contact during the voyage with any ship from any infected area or having on board any case of infectious disease, and shall satisfy that Port Health Officer or authorised officer that the granting of pratique shall not be attended by any danger.

(c) The Master or any other person on board including a ship's surgeon, if one is carried, shall accurately and, completely answer any other questions put to him by the Port Health Officer or authorised officer in regard to the sanitary condition of the ship, the health of the passengers and crew or of any ship with which there has been direct contact during the voyage, and shall furnish any such officer with all such information and assistance as he may reasonably require.

2. In the event of any suspected disease or fever on board a ship before arrival at the port and any other circumstances requiring the attention of the Port Health Officer, the Master shall:—

(a) If the ship is equipped with a suitable radio transmitting apparatus and is due to arrive at a radio receiving port, send before arrival, either directly to the Port Health Officer or through an Agent approved by him, a radio message to that effect.

(b) If the ship is not so equipped or is due to arrive elsewhere than at a radio receiving port, notify the Port Health Officer immediately on arrival of the presence on board of such infectious disease, or suspected conditions.

Any radio message sent shall:—

(a) embody such of the items of information as are applicable;

(b) be sent so as to reach the Port Health Officer not more than 12 hours, and not less than 4 hours, before the expected arrival of the ship;

(c) if it is in code, conform with the section relating to standard quarantine messages of the 1931 International Code of Signals.

3. Any ship arriving at its first port of call in Ghana from a foreign port shall be deemed to have come from an infected local area, and shall be required to comply with the provisions as to flags and signal lights as prescribed until granted free pratique by the Port Health Officer or authorised officer.

The following signals are to be shown on arrival within 3 miles of land, by vessels requiring or required to show their state of health:—

(a) in the daytime i.e. during the whole of the time between sunrise and sunset.

(i) "Q" flag signifying "my ship is 'healthy' and I request free pratique" or;

(ii) "Q" flag over first substitute ("QQ") signifying "my ship is 'suspect', i.e. I have had a case or cases of infectious disease more than 5 days ago, or there has been unusual mortality among the rodents on board my ship" or;

(iii) "Q" flag over 'L' flag ("QL") signifying "my ship is infected" i.e. I have had a case or cases of infectious disease less than 5 days ago!

(b) by night i.e. during the whole of the time between sunset and sunrise, a red light over a white light, the lights being not more than 6 ft. apart shown at the peak or where the signal can best be seen from the shore, and exhibited only when the ship is within the presence of a port signifying "I have not received free pratique".

(c) Any ship displaying the appropriate signal in accordance with the provisions of paragraph (3) above shall, as soon as practicable, be visited by the Port Health Officer or authorised officer, who shall grant pratique or take such other steps as may be necessary before granting pratique.

4. A ship which has been granted free pratique at its first port of call in Ghana which has not been declared an infected area shall not be required to obtain further pratique at another port in Ghana.

Vaccination requirements in respect of persons arriving in Ghana

All officers, crew and passengers of every ship arriving at any port in Ghana shall be in possession of valid Certificates of vaccinations against smallpox, yellow fever and cholera.

Where a person arrives at any port in Ghana and is unable to produce a valid Certificate as required, the Port Health Officer or the authorised officer shall require such person to be vaccinated on the spot or to present himself at a place or places for the purposes of being vaccinated.

Under no circumstances should any officer, crew or passenger disembark if he is not in possession of any valid Certificate against smallpox, yellow fever and cholera.

TAKORADI: 04.53 N. 01.45 W. (See Plan Book)

PORT LIMITS: Are shown on Admiralty Chart 3102 and covers an area of about 1.5 to 2 miles outside harbour entrance.

DOCUMENTS:

Customs:

2 Stores Lists.
2 Lists Crew Personal Effects.
1 Bill of Health.
6 Crew Lists with dates smallpox and yellow fever inoculations.
6 Passengers Lists or 'Negative'.
6 Vessel's Itinerary Lists.
1 Freighted Cargo List.
1 Unfreighted Cargo List.
1 Set Bills of Lading.
Clearance from last Port.

Immigration Officer:

Crew List.
1 List Port of Call.
1 List of Passengers, if any.
All crew and Passengers Passports.
Advice to Immigration of any stowaway.

PILOTAGE: Pilotage compulsory for ships berthing alongside or on the moorings. Pilot boards within port limits. International code signals used. Pilotage for entering vessels from 0600–1800 hrs. and for leaving vessels from 0600–2300 hrs.

ANCHORAGE: Vessels may anchor outside the harbour without Pilot. Depth at moorings 22 ft. to 35 ft.

RESTRICTIONS: Depth at harbour entrance 35 ft. MLW.

MAX. SIZE: Up to 28 ft. draft for berthing alongside. Up to 33 ft. at buoys. Also see "Tankers".

HEALTH: See "General" before first Ghana port.

RADIO: Radio Takoradi. The station is a Coast Station and only operates on H.F. and M.F. equipment. The call sign for this station is 9GA.

VHF: Signal station Channel 14. 24 hour service for all information with regard to Pilots, berthing, etc.

RADAR: No radar services available.

TUGS: Tugs normally join the vessel outside port entrance. Tugs assistance is compulsory to be ordered through Signal Station. 2 tugs of 1,350 h.p. and 1 of 850 h.p. available.

BERTHING: Additional coir springs from shore required at all berths.

Cargo discharging and/or loading at the buoy berths is by ships' own gear.

Berth	*Max. Length Vessel*	*Max. Draft*
Manganese	520	28 ft. 0 in.
2 Wharf	550	26 ft. 0 in.
3 Wharf	500	28 ft. 6 in.
4 Wharf	600	28 ft. 0 in.
5 Wharf	270	28 ft. 0 in.
6 Wharf	500	29 ft. 0 in.
Bauxite	505	32 ft. 0 in.
Coal Wharf	250	14 ft. 0 in.
Oil Wharf	600	29 ft. 3 in.
1 Buoys	550/610	F.32 ft. 6 in. A.34 ft. 0 in. (If ship 610 ft. max. 27 ft. 6 in.)
2 Buoys	550	F.30 ft. 6 in. A.31 ft. 0 in.
3 Buoys	570	27 ft. 0 in.
4 Buoys	520	F.27 ft. 0 in. A.30 ft. 0 in.
5 Buoys	510	F.24 ft. 0 in. A.27 ft. 0 in.
6 Buoys	480	F.24 ft. 0 in. A.26 ft. 0 in.
7 Buoys	450	F.23 ft. 0 in. A.25 ft. 0 in.
8 Buoys	400	F.21 ft. 0 in. A.22 ft. 0 in.
9 Buoys	340	18 ft. 0 in.

CRANES: There are 35 Portal Cranes at the Port. Of these 15 cranes of 3 tons each and 1 crane of 15 tons lifting capacity are at the wharf berths for loading and discharging vessels. The remaining 19 cranes – 6 of 10 tons, 1 of 7 tons, 1 Butters crane of 15 tons and 9 of 3 tons are placed at the West Wharf to cater for the loading and discharging of logs and other commodities. Two of 5 tons are at the Cargo Platform to load and discharge other commodities. In addition there are 20 gantries for loading and discharging sawn timber.

There are no cranes at the buoy berths and ships are expected to use their own gear. Also, there are no floating cranes at this Port.

BULK CARGO FACILITIES: There are 2 berths for the loading of dry-bulk cargo – manganese ore and bauxite. In the case of grain, coal, fertilisers, sulphurs, copra, etc., discharge can be done at any of the wharf berths. The loading rate of manganese ore is approximately 333 long tons per hour; and the loading rate of bauxite is 330 long tons per hour.

SPECIALISED CARGO HANDLING FACILITIES: The port does not have container or ro/ro handling facilities.

BRIDGES: There are no bridges at the port.

STEVEDORES: Berthing meetings are held daily between the Port Authority and all Port Operators with the view to determining ETA and EDD of vessels to enable the stevedoring companies to arrange for gangs and determine the relevant rates and charges.

Normal working hours: weekdays 0700 hrs. to 1200 hrs. and 1400 hrs. to 1700 hrs. Saturdays 0700 hrs. to 1200 hrs.

Gangs required for Sunday work should be ordered before 1130 hrs. previous day. For weekday work, gangs should be ordered before 1500 hrs. previous day.

MEDICAL: It is absolutely necessary for the Agents to be notified in advance of the required medical attention so that necessary arrangements for medical exercise be carried out immediately on the vessel's arrival. Also see "General – Health".

TANKERS: Oil tankers moor on the North side of Lee breakwater. 1 berth suitable for ships of 600 ft. length, draft 29 ft.

Pipe-line: 805 m. long, pipe size 8 in. for all grades of petroleum and Bitumen.

Discharge Rate:

Petroleum	–	Premium Mogas	150 t.p.h.
		Regular Mogas	150 t.p.h.
		A.G.O.	200 t.p.h.
		Kerosene	200 t.p.h.
Bitumen		80/110–142 cu.m. per hour	
		60/70 –154 cu.m. per hour	
		12/18 –337 cu.m. per hour	

DENSITY: Salt water.

FRESH WATER: There is fresh water at all wharf berths and delivery is by means of water hydrant and/or water barge of 448,000 gallons capacity. Fresh water is also delivered at the buoy berths by 2 water barges (capacity 200 tons). The rate of delivery is as follows:–

By hydrant – 11,000 gallons per hour.
By barge – 11,000 gallons per hour.

FUEL: 2 grades available, Fuel and Gas Oil. Advance notice is necessary.

Fuel – 1,500 gallons per second through pipe-lines.
Gas Oil – 37.8 gallons per second through mobile tanker.

FIRE PRECAUTIONS: 6 firemen ordered to standby with fire engine. "No Smoking" notices are posted at considerable distances from the tankers.

CONSULS: There are no consuls in this Port. High Commissioners and Ambassadors are in Accra.

REPAIRS: Minor repairs can be effected, slipway for vessels up to 500 tons. Small drydock for vessels up to 100 ft. length.

DRY DOCK: There is no large drydock in this port but there is 1 small drydock capable of accommodating vessel of 100 ft. long, 25 ft. wide and 8.5 ft. draft.

SURVEYOR: Lloyds representation only operates in this Port.

GANGWAY/DECK WATCHMEN: Provision of Gangway, Deck and Hatch Watchmen is absolutely necessary to prevent stealing, pilferage and smuggling on board ships.

HATCHES: Hatches are normally opened and closed by the stevedoring gangs or, at times, by the ship's crew.

CUSTOMS ALLOWANCE: Quantity permitted for each member of the crew to be held Out of Bond is as follows: Tobacco 100 grammes; Spirit 0.75 litres; Wine 0.75 litres.

CARGO GEAR: Load/discharge is affected by the Port Authority's shore gear. There is 1 heavy lift crane of 15 tons capacity which is used for heavy lifts. Where the cargo exceeds the lifting capacity of the shore crane, the ship's jumbo derrick is sometimes used.

REPATRIATION: The Immigration Department is responsible for signing on and off on the advice of the shipping company.

AIRPORT: The distance of the airport from the Port is approximately 2 miles. It is served by regular airline to and from the capital city of Accra; and the number of flights is 2 per week.

TIME: The Greenwich Meridian Time is applied to this Port as the Greenwich Meridian passes through this country.

HOLIDAYS: The holidays at the Port are as follows; New Year's Day (1st January); Redemption Day (13th January); Independence Day (6th March); Good Friday (non-working day); Holy Saturday; Easter Monday; Republic Day (1st July); Christmas Day (25th December) (non-working day); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Telephone 999 for all 3 services.

TELEPHONES: Presently no arrangements exist for installing telephone on board ships.

SERVICE: There is no special service for tank cleaning, tank-washing or compass adjustment.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes to that effect on the ship's arrival.

IDENTIFICATION: Seamen's Book or Passport is sufficient to identify any seaman.

REGULATION: Ship's are not allowed to discharge on board explosives or petroleum without prior approval of the Port Manager. Ships are not allowed to berth after 1800 hrs.

DELAY: Delays in berthing a ship occur when all berths are occupied; delays also occur when repairs are being carried out on any of the berths.

AUTHORITY: Ghana Railway and Ports Authority.

AGENT: Scanship (Ghana) Limited, P.O. Box 329, Takoradi. Tel: 35.31. Telex: 2181 Accra. Cables: "Scanship Takoradi".

TEMA: 05.38 N. 00.01 E. (See Plan Book)

DOCUMENTS: *Arrival.*

2 copies List of Stores.
2 copies Crew Declaration Forms.
1 Bill of Health.
6 Crew Lists with vaccinations lists for smallpox and yellow fever.
6 copies of Passenger List (or "nil" pass. list).
Valid certificates for smallpox, cholera and yellow fever vaccinations.
6 lists of Ports of Call.
2 Freighted Cargo Manifest.
7 Unfreighted Cargo Manifest.
1 B/L's set.
Port clearance from Last Port.

Departure – Port clearance visaed by customs.

PILOTAGE: For Main Harbour pilotage for all vessels of more than 100 net tonnage, when arriving or leaving harbour, or shifting berth, but for both Fishing Harbours obtainable on request.

Time of pilotage as follows: for Main Harbour:

(*a*) Dry cargo vessels: arrivals 0600–1800 hrs.; departure 0600–2300 hrs.
(*b*) Tankers: arrivals daylight only; sailings 0600 to 2300 hrs.
(*c*) Valco-carriers: all handling, during daylight only.

For fishing harbours: during daylight only.

Vessels arriving or wishing to enter harbour must await Pilot between E. and S.W. off outer water light, about 1 mile distance. Ships embarked by Pilots from 0600 hrs., according to time of arrival Quarantine Anchorage.

ANCHORAGES: Good anchorage, three-quarters to two miles from E.N.E. to S.W. off main entrance with depth 30 to 60 ft., with good holding ground. Eastern area of anchorage is more comfortable, without additional swell reflected from main breakwater.

RESTRICTIONS: Ships Arrival – 0600-1800 hrs. (on special request to 2000 hrs.). Ships Departure – 0600-2300 hrs.

MAX. SIZE: Ships up to 650 ft. and draft of 32 ft.

HEALTH: All crew require valid certificates of vaccination against smallpox and yellow fever which are inspected by Port Health Authorities. In case of any suspected disease or fever on board. Agent of the vessel should be notified in advance by radio. Also see "General" before first Ghana Port.

RADIO: All messages to Agents through their own VHF radio – Channels 6, 12 and 20.

VHF: The ports are equipped with VHF radio telephones, Channels 13, 14 and 16. Channel 16 is the international listening channel and Channel 14 is the port working channel. Channel 13 can be used if required, or if the other channels are not available. Signal station request LOA and draft in feet and last port of call.

TIDES: Maximal tides rise 6 ft. 2 in., minimal tides rise 3 ft.

PREVAILING WINDS: Light to fresh breeze from W. and S.W. during all year, except December to February when N.E. Harmathan is dominating with poor visibility. Dangerous winds are tornados from East, May to July, but occasionally isolated tornados are to be expected from January to December. There is a swell in harbour, especially after tornados, when lying alongside the berths.

HARBOUR: Harbour consists of 3 basins:

(*a*) The large basin of Main Harbour, formed by Main Breakwater 6,250 ft. long, and Lee Breakwater, 3,650 ft. long.
(*b*) Outer Fishing Harbour, East of Lee Breakwater.
(*c*) Inner Fishing Harbour on Northern side of former one.

Entrance to Main Harbour 800 ft. wide and together with the approaches has minimal depth of 35 ft. (Admiralty Chart Datum to which all depths refer).

Ships entering Harbour 2–3 cables before entrance roll heavily, up to 4–8° during some seasons. Ship's deeper than 30 ft. enter only during high tide with maximum possible draft limit 32 ft. during neap tide. Bottom of harbour consists of sand and mud, with frequent hard rocky ground. Depth increases in direction of Main Breakwater. Two pairs of mooring buoys in depth of 34–36 ft. Inside harbour, alongside Lee Breakwater is an Oil Wharf for tankers with depth of 34 ft.

TUGS: Use of 1 tug compulsory for all ships over 2,000 g.r.t. and 2 tugs over 5,000 g.r.t. (but at Pilot's option), and 2 tugs compulsory for tankers and Valco-carriers. 2 Diesel Tugs 1,300 h.p. and 2 Steam Tugs 850 h.p. in service. 2 tugs available for duty between 0600 and 2100 hrs., otherwise 1 tug. Tug's wires to be used.

BERTHING: Quay No. 1 – 4,300 ft.; Quay No. 2 – 2,900 ft.

Berths	*Length*	*Max. Draft*
1	600 ft.	31 ft. 6 in.
2	600 ft.	28 ft. 6 in.
3	485 ft.	24 ft. 6 in.
4	600 ft.	25 ft. 9 in.
5	600 ft.	25 ft. 6 in.
6	600 ft.	24 ft. 6 in.
7	600 ft.	26 ft. 6 in.
8	600 ft.	24 ft. 9 in.
9	600 ft.	25 ft. 0 in.
10	600 ft.	24 ft. 6 in.
11	600 ft.	24 ft. 6 in.
12	600 ft.	25 ft. 6 in.
Oil Berth	Ships up to 650 ft.	32 ft. 0 in.
Valco Berth	Ships up to 600 ft.	31 ft. 6 in.

Berths No. 6 and 7 for loading cocoa-beans, equipped with 4 high-speed conveyers, transporting bags directly to ship's hold, from 4 cocoa sheds (totalling 2,400,000 cu. ft.) situated at Westerly corner of harbour.

Usually ships moor starboard side to berths No. 1, 2, 6–9 and portside to berths No. 3, 4, 5, 10–12.

SPECIALISED CARGO HANDLING FACILITIES: 3 special berths for bulk cargoes only: Berth No. 10 for grain only. It is equipped with 1 elevator for sucking/discharging.

Valco Berth for handling bulk cargoes such as alumina, pitch/coke and aluminium fluoride. It is also equipped with 2 elevators for sucking/discharging.

Berth No. 8 is partly meant for pumping/discharging of liquid/bulk chemicals such as tallow and alicane.

Cranes, Outloaders:

Quay No. 1	10 Portal Cranes	Cap.	(2) 5 ton	(2) 7.5 ton	(6) 3 ton
Quay No. 2	8 ,, ,,	,,	(2) 5 ton		(6) 3 ton
	3 Mobile Cranes	,,	(1) 5 ton	(1) 10 ton	(1) 25 ton

Cocoa Conveyor System: 4 Outloaders, each 30-35 t.p.h.
or : 2 Outloaders on high speed =70 t.p.h.

STEVEDORES: Available. Dry cargo is handled from 0730 hrs. to 1230 hrs. and from 1400 hrs. to 1700 hrs. on normal working hours, and overtime after 1700 hrs. to 2000 hrs. (for finishing ships 2030 hrs.) and on Saturdays p.m., Sundays and holidays. Oil Wharf and Valco Berth are working around the clock.

Gangs required for Sunday work should be arranged before 1130 hrs. previous day. For weekday work, gangs should be arranged before 1500 hrs. previous day.

Stevedores provided by Ghana Handling Company Ltd., Atlantic Port Services and Speedline Stevedoring Company Ltd.

TANKERS: Tankers always moored starboard side to dolphins, and ropes to breakwater and bow-buoys. Crude oil pumped to refinery, by ships pumps, a distance of 18,000 ft.

North of Oil Wharf about 2 cables on same breakwater is Valco Berth for discharging of bulk materials for "Valco" aluminium smelter (mostly alumina). Narrow channel 250 ft. wide leads to berth with depth 33 ft. 6 in.

FRESH WATER: Water pipes alongside all wharves, and under State's sanitary control. Rate of supply 50 t.p.h.

FUEL: Fuel and diesel-oils available by tanker-trucks only. No coal-bunkers available.

DENSITY: About 1024.

FIRE PRECAUTIONS: Oil tankers when moored alongside must have "Fire Wires" hanging over the bow and stern on the outboard side of the vessel. These must be lowered to the water's edge and securely made fast on board so that they can be used to tow the ships away if necessary in an emergency. Two large fire fighting pumps and "snorkels" are mounted at the oil wharf. A floating boom to prevent the spread of oil spillage must be put in position around tankers loading and discharging. The Master of the ship should be warned to lower the guy ropes securing the boom to the ship, so that the boom is afloat at all times and not lifted up as the vessel's draft changes.

REPAIRS: Good marine-workshop.

DRY DOCKS: There are two (2) drydocks.

Drydock No. 1: Serviced by 60 tonnes and 20 tonnes travelling cranes. Capacity: 100,000 d.w.t. Length: 910 ft. (277.4 m.). Width (entrance): 149 ft. (45.4 m.) Width (inside wall): 155 ft. (47.2 m.). Draft (entrance): 22 ft. (6.7 m.) (to be deepened in future). Flooding time empty dock: 2 hrs. (approx.). Dewatering time: 4 hrs. (approx.).

Drydock No. 2: Serviced by 45 tonnes and 25 tonnes mobile cranes. Length: 350 ft. (106.7 m.). Width: 44 ft. (13.4 m.). Draft (entrance): 18 ft. (5.5 m.). Flooding time of empty dock: 4 hrs. (approx.). Dewatering time: 4 hrs. (approx.).

Also there is one slipway with length 127 ft. (38.7 m.); width: 41 ft. (12.5 m.) and hauling capacity: 150 tonnes.

Fitting out quay: 600 ft. (182.9 m.). Draft: 14 ft. (4.3 m.) to be deepened. Crane: 15 ton travelling crane.

SURVEYORS: Lloyds and Bureau Veritas are represented at the port.

GANGWAY/DECK: WATCHMEN: Services of watchmen necessary and compulsory.

HATCHES: Opening/closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCES: Per crew member: Tobacco: 100 grammes; wine: 0.75 litres; Others: 0.75 litres.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Situated 18 miles from the port.

TIME: GMT. No alterations during the year.

HOLIDAYS: New Year's Day (January 1st); Redemption Day (January 13th); Independence Day (March 6th); Good Friday; Holy Saturday; Easter Monday; Republic Day (July 1st); Christmas Day (December 25th); Boxing Day (December 26th). Cargo work can be arranged on those days on request.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes to that effect after clearing inwards.

IDENTIFICATION CARDS: Shore passes issued are sufficient.

REGULATIONS: No unusual regulations for the port.

POLICE/AMBULANCE/FIRE: Telephone Nos: Police: 999 and 2936; Ambulance: 999; Fire: 999 and 2822.

DEVELOPMENTS: Provision of Container Depot.

Extensions to Quay No. 2. and construction of Quay No. 3. (These are under consideration).

GENERAL: Recommended to send ETA message at least 24 hours in advance. Essential that ETA message reaches Agent's office before 1430 hrs. Monday-Thursday or before 1000 hrs. Friday for weekends because of booking of gangs. Ships from Abidjan should also send 48 hours ETA message.

SHIPMASTER'S REPORT: (1976)

Good W/T. D.F. signals are obtained from Accra and Lome and with this vessel's equipment Marconi Type 758E will give a reliable position to within 2 miles. The 100 fathom contour line was accurate to within 1 mile where we crossed it. Within 20 miles the land definition is excellent on Radar. There is now an Oil Rig 137° 3.2 miles from the eastern end of the main breakwater. This is an excellent seamark and is well lit at night. Native fishing craft are met with from about 10 miles offshore and show lights when fishing at night but reliability regarding these lights is doubtful.

VHF contact with the port Signal Station is good, although there was very heavy traffic during our stay outside waiting to berth 5.5 days, but I was allowed to use the main transmitter when berthed to inform Owners that we were alongside, at anchor no restrictions are placed on vessels using their wireless transmitters.

The pilotage is efficient although the tug was late in attending us when berthing this caused no difficulty.

The entrance to the Harbour is good, plenty of water all about if you have to wait for the Pilot, which we did. (He was moving a fishing vessel, and we had to cruise for about twenty minutes, after having come to the entrance on instructions that he would board there).

There were never less than 18 ships waiting for berthing.

W/T. contact with Portishead was good.

SHIPMASTER'S REPORT: (1977)

From Southwards – a strong Easterly set experienced 24 hours prior to arrival and along the coast to Cape Palmas after departure.

Radar (in our case) of the land poor until 15 miles off when ships at anchor off the port gave the first and the best targets. Breaksea Point light good and sighted at full range.

Ship really needs to be on "standby" with engines ready on approach to the 100 fathom line, when the first of the many mainly unlit and poor radar target fisherman are encountered, and really are in dense packs all along the coast in the shallower waters. There is no point in adjusting speed for a daylight arrival, the earlier the better as port operates on a mainly first-come basis. Equally of little point to try and pick a selected anchorage, ships are to be found anchored over quite a wide area – avoid as per pilot book the "prohibited anchorage" and the 10 fathom rocky shoulder that runs parallel with the coast. There are invariably 12 ships or more at anchor even some large ships completely unlit and possibly unmanned.

The port as other Masters have reported is well run, Pilots, tugs etc., well trained and competent under normal conditions. The port is overbusy and accommodating and handling far more tonnage than ever designed for and commonplace to have ships double-berthed. Essential to be well moored and precautions taken against the scend and surge that enters the harbour under certain conditions.

Communication: W/T HF poor and ship unable to make direct radio contact with Ghana until well within M/F range.

VHF: All port signals are given on Channel 14, and VHF discipline on this frequency poor when local ships are at anchor or in the near vicinity. Liner Agencies reputedly keep watch on Channel 16, but we were unable to raise them or make any contact before berthing.

Stevedores: Worked well throughout, though some delay initially experienced whilst fork-lift trucks small enough to work in our hatches and under the coamings were obtained, some pallets having to be broken down in stow to be discharged. Hours of work – actual – this is without the ship being consulted in any way, but seemingly common practice throughout the port, were 0730 hrs. non-stop through to 1930 hrs. Some pilferage – mainly of split milk powder, no visible signs of any security control as such. Discharge rate overall (crane and ships gear) milk powder 13 tons per gang per hour; frozen meat 8.64 tons per gang hour.

Stevedores toilets: Essential that ship arrives with overside latrines bow and stern ready and rigged.

Noting Protest: It might well be wise to include need to note protest in arrival message. We berthed late Friday to find Consulate in Accra closed as from midday for the weekend.

Stores: The point cannot be over emphasised (and all ships must be given prior warning to pre-store accordingly) that ordinary every day stores are virtually non-available and the fresh provisions (vegetables, salads, eggs and even much of the fruit) that are available are highly priced.

Shore leave: Ship was warned by other ships, the Agents, Mission Staff etc. not to go ashore at all with muggings and robberies commonplace even in daylight (wrist watches prime targets). The Agency lays on a minibus seemingly as a matter of course, to run ships' staff to and fro. We in fact with use of the above bus and local taxis did not experience any problems and found local people friendly and hard working.

AUTHORITY: Ghana Ports Authority, Tema.

AGENT: Scanship (Ghana) Ltd., PO Box 64 Tema. Tel. 26.51 and 25.71. Cables "Scanship Tema". Telex 2181 Accra.

NOTES

Please also advise Shipping Guides Ltd.

Gibraltar

GIBRALTAR: 36.08 N. 05.22 W.

DOCUMENTS:
3 Crew Lists.
4 Passenger Lists.
Arrival Report, to be completed when receiving Pratique.
International Maritime Declaration of Health.
Ship's Register.
Load Line Certificate.
Deratisation Certificate.
Ship's Articles.
Certificate of insurance in respect of Civil Liability for Oil Pollution Damage.

PILOTAGE: Pilotage compulsory for all navigation (except direct *departure* from anchorage). Give notice of arrival through Agents 24 hours in advance furnishing maximum draft. Ships approach off Rosia Bay where Pilot (available day and night) boards vessel. Pilot boat painted black and flies international Pilot flag. To call Pilot: sound, and fly flag "G" or call Gibraltar Port on VHF Channel 16 and pass message on Channel 12.

ANCHORAGES: In open bay, good safe anchorage, depths vary from 5 to 40 fathoms. Vessels normally anchor in area West of Harbour Moles.

RESTRICTIONS: *Note:* British waters in the Bay of Gibraltar extend to the Median Line drawn in accordance with the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone (see Admiralty Chart D 1448). However, part of those waters, lying North of 3 Qk. fl. buoys, are considered by the Spanish authorities to be within the limits of the Port of Algeciras/La Linea (Spanish Notice to Mariners 49/1563/67 of 9 December 1967), and the Spanish authorities have claimed Spanish port dues in respect of vessels anchoring between the Median Line and the line of buoys.

The waters in dispute form only a small part of the anchorages available to shipping calling at Gibraltar.

MAX. SIZE: If anchoring in bay, any size. Max. draft alongside, 31 ft. 6 in.

HEALTH: Vessels are usually boarded by Port Authorities off the Southern end of the detached Mole: if everything found satisfactory Pratique is granted immediately. Masters should advise Agents by radio before arrival of any illness on board so that Port Doctor may board vessel with Port Authorities.

RADIO: Gibraltar Radio, call sign ZDK.

VHF: Communicate with Port Authorities by VHF international calling Channel 16, pass message on Channel 12 (24 hour service).

TUGS: When required for berthing alongside, tugs meet vessels off Mole. Ship's ropes used.

BERTHING: Berths alongside are normally limited to 31 ft. 6 in. Deeper drafts may be accommodated for short durations of stay on a half-tide basis. Masters required to advise ship's draft when giving ETA. Cruise ships are only charged 25% of normal berthing charge.

Ships calling for bunkers and/or fresh water and not conducting operations involving passengers or cargo are only required to pay 12.5% of the normal berthing charges providing the stay alongside does not exceed 8 hours in addition to the bunkering/water period.

CARGO HANDLING: Container berth at No. 2 Jetty available for vessels up to 385 ft. in length, max. draft 28 ft. At other berths containers may be discharged by ship's equipment. 1 berth, for use by ships up to 28 ft. draft, has a fixed concrete stern landing ramp. Height of ramp above water level varies from 9 to 13 ft. according to tide. This is available for use in conjunction with ship's own stern ramp for roll-on/roll-off traffic.

Reclamation between No. 2 and 3 Jetties being carried out 1978/79 to provide space which will enable container handling to be expedited.

STEVEDORES: Agents automatically advise stevedoring company on receipt of ETA from ship.

MEDICAL: Masters should advise Agents when giving ETA if medical attention is required on board. Adequate hospital treatment available.

TANKERS: Max. draft at discharging berths 31 ft. Diameter of discharging lines 14 in. fuel oil, 10 in. diesel oil and gas oil.

DENSITY: 1025.

FRESH WATER: Available at Mole from pipe-lines, delivery rate 60/80 t.p.h. Water can also be delivered at anchorage from barge, delivery rate 40/50 t.p.h.

FUEL: Fuel available any time day or night. All grades available.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: Normally effected by stevedores.

CUSTOMS ALLOWANCES: No restriction whilst on board. Crew members may bring ashore small quantity for their immediate personal use.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	Tel. 3288	Netherlands	Tel. 5968
Denmark	,, 2151	Norway	,, 4352
France	,, 4830	Portugal	,, 5330
Greece	,, 2956	Sweden	,, 2151
Italy	,, 3053	Venezuela	,, 3509
Israel	,, 5955	Finland	,, 3113
Liberia	,, 4312		

REPAIRS: Deck and engine repairs possible. Underwater operations including repairs and cleaning of vessel's hull.

DRY DOCKS: 4 dry docks (Admiralty) available subject Naval requirements. Largest 871 ft.×125 ft., smallest 260 ft.×46 ft.

REPATRIATION: Facilities exist for repatriating Crew members.

AIRPORT: Daily regular flights to London. Distance to airport about half mile.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Commonwealth Day (24th May); Spring Bank Holiday; Summer Bank Holiday; Queen's Birthday; Christmas Day; Boxing Day. Cargo work can be effected at overtime rates on these holidays except on Good Friday and Christmas Day when no cargo work is carried out. Bunkering is effected on any of these holidays without any extra charge except on Good Friday and Christmas Day when a surcharge is made.

POLICE/AMBULANCE/FIRE: Police and Ambulance 3434; Fire 2000.

TELEPHONES: Telephone can be placed onboard at cruise ship berth. Telephones can also be placed on vessels under repair at the Detached Mole, through Admiralty Telephone Exchange, cost about £10.

GENERAL: Advisable that vessels calling for bunkers and only stopping in port for few hours should radio their requirements prior to arrival to ensure avoiding delay.

AUTHORITY: Captain of the Port.

AGENT: Lambert Brothers (Gibraltar) Ltd., 47 Irish Place. Tel. address "Lambert-Gibraltar". Tel. 4373; Telex 72685 2222. Ship's Agents, Insurance Agents, Travel Agents 72685.

AIRPORT: 0.25 mile from jetty, fortnightly service. Special charters by arrangement.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year (1st January); Public Holiday (3rd January); Good Friday (8th April); Easter Friday (9th April); Easter Monday (11th April); Queen's Birthday (11th June); Public Holiday (13th June); Bank Holiday (1st August); Tuvalu Day (1st October); Public Holiday (3rd October); Prince of Wales Birthday (31st October); Christmas Day (25th December); Boxing Day (26th December); Public Holiday (27th December).

POLICE/AMBULANCE/FIRE: No telephone. By messenger.

TELEPHONE: None.

SERVICES: None.

SHORE LEAVE: Allowed after clearance.

IDENTIFICATION CARDS: Not required.

REGULATION: No sullage, ballast, tank residue, etc., to be discharged in lagoon.

DELAYS: Unpredictable, depending on whether other ships in port.

DEVELOPMENTS: Plans to construct a new deep sea wharf is under consideration but largely dependent on the availability of grant in aid funds.

AUTHORITY: No independent Port Authority. All enquiries should be made to *Ministry of Home Affairs.*

TARAWA: 01.21 N. 172.55 E.

Tarawa is the main port of entry for the Gilbert & Ellice Islands Colony. Other entry ports are Ocean Island, Christmas Island, and Funafuti.

The Atoll is roughly triangular in shape, being 19 miles in length North and South and 16 miles broad along the southern side. A number of islets, separated by shallow passages, dry at low water, from the southern and eastern sides of the Atoll.

Causeways link up the islets along the southern sides and part of the eastern side. On the western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26 ft. at LWOST and 30 ft. at HW.

The Governor and Main Government Offices are at Bairiki Islet which is connected by causeway to the Colony Central Hospital and Government Schools at Bikenibeu.

PILOTAGE: Not compulsory, but advisable as sometimes especially after strong winds, some of the navigation marks may be out of position.

APPROACHES: The ship passage into the lagoon is 3.25 north of Betio and is usually well marked by buoys, as depicted on chart B.A. 3269. An occulting white light with a range of 8 miles, exhibited from a 105 ft. tower at the western end of Betio Islet marks the southwestern corner of the Atoll.

ANCHORAGE: Inside the lagoon, safe in all weather although in strong winds it may not be possible to work craft in the lagoon.

RESTRICTIONS: At present navigation and pilotage of the lagoon is restricted to daylight and vessels arriving at night should stand off the southwest of Betio light. A vessel approaching in daylight and having to wait for high tide or other reasons may anchor anywhere on the western reef in 8–10 fathoms. Bottom, coral and sand.

RADIO: Tarawa Marine Radio maintains continuous watch on 500 k/cs., 2182 and 6204 k/cs.

TUGS: Available.

CARGO HANDLING FACILITIES: Tugs and lighters capable of working cargo up to 29 t.p.h. A 20-ton crane on Betio Wharf is capable of working containers from the lighters.

MEDICAL: Attendance can be obtained.

FRESH WATER: Available in limited quantities in an emergency.

FUEL: Stocks of light diesel fuel, petrol and kerosene available.

REPAIRS: Boat repairs and most minor ship repairs can be undertaken at Betio, where the Development Authority employs engineers, electricians, boilermaker and a shipwright. Radio and Radar repairs can be undertaken by the Posts and Telegraph Department. Aqualung and skin divers available.

AIRPORT: Bonriki International Airport.

AUTHORITY: Gilbert & Ellice Islands Development Authority.

NOTES

Please also advise Shipping Guides Ltd.

Greece

AGHIOS NIKOLAOS (St. Nikolo-St. Nicholas), Crete: 35.12 N. 25.43 E.

DOCUMENTS:
4 Crew Lists.
2 Passenger Lists.
1 Cargo Manifest.
1 Spares List.
1 Stores List.
1 List Crew Personal Effects.
Maritime Health Declaration.
1 Provisions List.

PILOTAGE: Not compulsory. No Pilot station. Private Pilot who can be used if needed. However, not always available. Area of Pilot's boarding is N.E. or S.E. of Aghioi Pandes Islet, depending weather conditions. Anchorage waiting place in same area. Call Pilot with signal "G". Small fishing vessels (length 13.0 m.) fitted with VHF can indicate position of anchorage if advised by Agent.

ANCHORAGE: (a) Harbour of St. Nikolaos, depth 3 – 5 fathoms. (b) Usual anchorage for vessels over 500 tons gross, S or SE of Nikolo Islet (Admiralty Chart No. 2536 B) and at a distance of 0.5 – 1.0 m. from the mainland, depth 10 – 40 fathoms respectively. (c) Poros Bay for small and large vessels, only when N and NW fresh gales, depth 16 – 27 fathoms.

RESTRICTIONS: Care to be taken off North entrance to port owing to rocky shoals, depth 5 m. Entrance from the S.W. is free of obstructions.

MAX. SIZE: Vessels of up to 100 m. length and 9.0 m. draft can enter the port. At oil bunkering installation outside the port, vessels of any size can be accommodated.

HEALTH: If from another Greek port free pratique is automatic and access to and from vessel granted on permission of Port Authorities. Port doctor visits all other vessels.

RADIO: No local radio station. Cables to Agent or Port Authority through "Athinai Radio", "Heraklion Radio" or Rhodes Radio".

TUGS: None.

BERTHING: Berthing position designated by Port Authority.

STEVEDORES: 10 permanent port stevedores available, but further 5 men can be engaged. Cargo worked by vessel's own gear.

MEDICAL: No advance notice of medical attendance required. Medical attention by town doctors available. Government hospital with all facilities.

TANKERS: No tanker berths. Vessels moor to buoys. Oil line 6 in. diameter.

DENSITY: 1025.

FRESH WATER: At new pier 3 hydrants, hose dia. 25 ins. for supplying water. At the bunkering installation at Katsini Bay there is water storage tank capacity 500 cu. m. for supply to deep-sea vessels. Loading rate about 49 t.p.h. Delivery by flexible hose connection from the mooring buoys. Fresh water not available at the present time at the bunkering installation as they have ceased operating.

FUEL: Unlimited supply of bunker fuel but from 1974 the bunkering installations have ceased operating due to the tourist area. Operations are to be moved to another part of Crete.

Small quantities transported by tank truck are available from the pier.

DEVELOPMENTS: During next 5 years *(a)* deepening of Port Basin, *(b)* Provision of 1 shore crane, *(c)* construction of breakwater — length 200 m.

HATCHES: Opened/closed by stevedores.

CUSTOMS ALLOWANCES: 2 packets cigarettes per crew member per day.

CARGO GEAR: No shore facilities. All cargo worked with ship's own gear.

CONSULS: None.

REPAIRS: Only minor repairs.

REPATRIATION: Crew replacement and repatriation available.

AIRPORT: At Iraklion distance 66 km. 2 or 3 flights per day to Athens.

TIME: GMT plus 2 hours, permanent.

HOLIDAYS: In addition to standard Greek holidays, local holidays are Ascension Day (date not fixed), and St. Nicholas Day (6th December).

POLICE/AMBULANCE/FIRE: St. Nicholas Police tel. 100. State Hospital, 22369. Fire — none. Port Police 22312. Area code for St. Nicholas 0841.

TELEPHONES: None.

SERVICES: Tank cleaning and hold cleaning.

SHORE LEAVE: Permitted with Port Authority pass.

REGULATIONS: *(A)* Vessels are not allowed to approach Aghioi Pandes (goat reserve). *(b)* No refuse or other waste matter of any description allowed to be thrown overboard from vessel. *(c)* No visitors permitted without Port Authority permission.

AUTHORITY: Port Authority of Aghios Nikolaos.

AGIOI THEODOROI: 37.55 N. 23.05 E.

DOCUMENTS:
7 copies Crew Lists (European and Asian).
2 copies Dates of Vaccinations/Inoculations.
1 copy Cargo Manifest.
2 copies List of Provisions and Stores (these are supplied on forms issued by Agent printed in Greek/English).
2 copies Officers'/Crews' personal declaration, on forms supplied by Agent in Greek/English, covering all high duty items, radios cameras, etc.
1 copy declaration of ships' cash on board, form supplied by Agent in Greek but made out in front of Master.
2 copies of Masters' declaration that all high duty goods have not been put under seal, and that he is responsible for any loss or landing of same without proper authority.
All passports and/or Seamen's books to be produced *if* requested by Immigration.

On completion of loading, documentation takes about 2 hours.

PILOTAGE: Compulsory. Pilot boards S.S.E. of port, about 1 mile off the outer jetty. No pilot boat as such; uses either a tug or mooring boat. Pilot is arranged by Agents who are based in Piraeus (1 hour by car). No means of radio contact between vessel and Pilot station.

ANCHORAGE: A reasonably safe anchorage can be obtained in position 0.5 mile off the outer jetty in a depth of 20 to 25 fathoms with a sandy bottom.

TUGS: 2 tugs used for berthing, and 1 on sailing.

BERTHS: There are 3 main berths with 2 smaller berths for coastal vessels. The largest and outermost berth can accommodate vessels of 250,000 tons fully loaded, a max. discharge/loading rate at this berth being 5,000 t.p.h. The other berths can accommodate vessels of up to 50,000 tons fully loaded with a max. discharge/loading rate of 3,000 t.p.h. All berths are equipped with four 10 in. Chicksans. They are situated in an open position for winds from the South and West but provided ample moorings are put out, there should be no cause for concern.

Vessels can berth at any time day or night.

MOORINGS: Standard moorings on to dolphins which are well fended and hold the vessel about 4 feet clear of the manifold complex. Vessels require their gangway but no derricks are required. 1 or 2 anchors are used depending on the berth used.

FRESH WATER: Fresh water for other than drinking purposes is available from the jetty, but drinking water has to come by barge from Piraeus for which 2 days' notice is required.

FUEL: Bunkers can be obtained from one of the coastal tankers based here, capacity approx. 5,000 tons.

CUSTOMS: Bonded locker is sealed. Allowance 200 cigarettes or equivalent in tobacco or cigars per man (7 days) and a part bottle of wine and spirits is permitted per man (7 days). All Tobacco/cigars/cigarettes placed under seal. Crew excess must be declared on provision list in separate column for same.

SHORE LEAVE: Shore leave is allowed, passes being issued on arrival which must be handed in prior to sailing.

REPAIRS: No facilities. Nearest port for repairs is Piraeus.

ALEXANDROUPOULIS: 40.51 N. 25.54 E.

DOCUMENTS:
Port Authority:
2 Crew Lists.
1 Passenger List (if any).

If from abroad Maritime Declaration of Health. If Greek flag, articles and log book, and declaration of foreign exchange.

Customs:
3 Lists of Stores and Provisions.
1 Crew List.

Master's personal declaration that all stores not held in bond will remain on board.

PILOTAGE: No pilot service. If Master requires pilotage assistance an experienced local boatman is available, but Agent must be advised of ETA in advance order to arrange for this Pilot to await vessel about 1 mile outside port.

ANCHORAGES: Depth inside port 18 ft. 06 in., mud bottom. Depth increases outside port to about 10 m. at distance of 1 nautioal mile.

Area around port subject to strong S.E./S. winds especially during Winter. During strong winds vessels can seek shelter off Samothraki Island. In strong winds port is considered safe but because of occasional large waves loading is stopped. Winds from other directions do not affect port work.

MAX. SIZE: Vessels with draft not exceeding 18 ft. 06 in. can enter safely.

HEALTH: Vessels from foreign countries can enter harbour and obtain free pratique during the period from sunrise until 2200 hrs. Vessels having suspected contagious disease on board should remain outside harbour until visit of medical officer, and await further instructions.

TUGS: None.

BERTHING: At least 24 hours notice of ETA to be passed to Agent in order to obtain allocation of berth from Port Authority.

STEVEDORES: Prior notice to be passed to Agent order arrange gangs. Rate of cargo working: General cargo about 100 tons per gang every 8 hours. Bagged cargo about 100 tons per gang every 8 hours. Coal about 80 tons per gang every 8 hours. Timber about 120 cu.m. per gang every 8 hours. Vessels must use own gear for loading/discharging.

MEDICAL: No advance notice required. 1 Government General Hospital, 3 clinics. Doctors' services readily available.

TANKERS: There is a floating pipe-line. Tankers with a draft of 17 ft. can discharge diesel oil only.

FRESH WATER: Hydrants on West side of breakwater. Delivery rate about 5 t.p.h. (each), but delivery rate reduced when 2 or more hydrants in use.

FUEL: No bunker C fuel available. Supplies of diesel oil possible from road tankers.
FIRE PRECAUTIONS: No port fire brigade. In emergency fire brigades must be called from Alexandroupolis.
DEVELOPMENTS:
(a) The Main Pier is finished, total length 450 m.
(b) The pier East of Main Pier is finished, total length 231 m.
(c) The Western Breakwater has recently been finished. It has been extended for 108 m. Work on extending the breakwater for a further 97 m. has already begun.
WATCHMEN: Not available, and if required must be supplied by vessel.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 1 packet of cigarettes allowed out of bond for each crew member, for each day in port. Wine/beer no restrictions. Spirits, Master allowed one bottle.
CARGO GEAR: Load/discharge by ship's own gear.
IDENTIFICATION CARDS: Shore pass issued against crew list and seamen's book. Passes obtainable from Port Authorities.
CONSUL: Consul-Agent of France. Tel. 26-720.
REPAIRS: Only minor repairs available.
REPATRIATION: Facilities for crew changes and repatriation.
AIRPORT: 5 km. distant. Daily flights to Athens. Flights to Thessaloniki Tuesday, Thursday and Saturday.
TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.
HOLIDAYS: 1st January; 6th January; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; 14th May (local); 15th August; 28th October; 6th December; 25th December; 26th December, and all Sundays. Cargo work can be arranged on these days, subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Police station. Tel. 26352; Security Police, 26220; Ambulance 25272; Fire 26222.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: Permitted.
AUTHORITY: Port Authority of Alexandroupolis.

ARGOSTOLI, Cephalonia: 38.12 N. 20.29 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Customs Clearance.
2 Cargo Manifests.
Bills of Lading (copy)
4 Ship's Stores List.
4 Lists of Crew's Personal Effects.
Ship's Papers.
Crew Vaccination List.
PILOTAGE: No Pilot station.
ANCHORAGE: Vessels anchor in roads 0.5 miles N.N.W. from Entrance light. Max. channel draft 19 ft.
MAX. SIZE: Up to 19 ft. draft.
HEALTH: Free pratique given by Port Health doctor.
RADIO: Patras Radio. No VHF.
TUGS: None available.
MEDICAL: Advance notice not required except in urgent cases. For vessels arriving from foreign countries crew require vaccination certificates.
TANKERS: Small tankers discharge at DEH Power Terminal.
FRESH WATER: Can be supplied from the pier using ship's hoses.
FUEL: Small quantities available, but only for yachts.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCE: 50 cigarettes allowed for each crew member.
CONSULS: No local representation.
REPAIRS: Only minor machinery repairs can be carried out.
REPATRIATION: By air to Athens (once daily) or by ferry-boat.
TIME: GMT plus 2 hours, Summertime may be kept.
HOLIDAYS: Local holidays are 21st May, 16th August and 20th October, in addition to national holidays. Work may be arranged at double rates.
POLICE/FIRE/AMBULANCE: Police tel. 22200; Ambulance 22515; Fire service available.
TELEPHONES: Can be connected on board vessels without charge.
SHORE LEAVE: Allowed.
AUTHORITY: Cephalonia Harbour Office.

CHALKIS: 38.27 N. 23.36 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores and Spares Lists.
2 Crew Personal Effects Lists.
Health Certificate.
PILOTAGE: Pilotage is compulsory.

Application for Pilot to be made by radio through Agent to Chalkis Port Authority. ETA required at least 8 hours before arrival.

Apply for Pilot through VHF Channel 12, or through radio/telephone on 2364 kc/s calling Harbour Master, Chalkis.

Pilot boards from black motor-boat with white horizontal stripes, about 10 m. length, in a position about 1-1.5 miles North of the light buoys of the Northern Port.

The pilotage area extends from 1 mile North of red and green light buoys, North of Evripos Bridge, and to the South of Euboea, 2.5 miles from Bourtzi Point.

The anchorage for vessels coming from the North of Euboea and awaiting Pilot is at the centre of the Euboean coast off Lighthouse Kakokefali, North of the 2 light buoys and outside the bearing 020/200° which is the axis of vessels passing in and out of Evripos Strait.

Safe anchorage for vessels coming from South of Euboea and awaiting Pilot is 1 nautical mile South of Bourtzi Point.
ANCHORAGES: *(a)* In the basin of South Port clear of vessels passing in the Straits. Depths over 21 ft.
(b) In North Port between the light buoys and Kakokefalis lighthouse and outside the axis of course 020/200°. In depths of 10–15 fathoms.
(c) Anchorage mentioned in "Pilotage" above, depths of 10 fathoms.
RESTRICTIONS: Entry restricted only by depth. Max. draft 21 ft. For vessels intending to pass Evripos Strait having draft 19 ft., passage possible only at slack tide or with following tide. Full details in Evripos Straits Operations Regulations.

There is also a restriction in Steno Straits where there is an overhead cable 38 m. above sea-level.
MAX. SIZE: Max. draft 21 ft. in daytime and 19 ft. at night for vessels entering port. For vessels navigating Evripos Strait max. length 110 m., max. draft 19 ft., breadth 20 m. and subject to local regulations.
HEALTH: Pratique not required if coming from another Greek port. Otherwise international pratique regulations are applied.
RADIO: No local radio, all messages should be passed through Athinai Radio.
TUGS: 1 tug available, joins vessel off the berth. Ship's tow lines used. Tug is compulsory for vessels over 1,000 g.r.t. Tug used only for berthing and unberthing.
BERTHING: Berthing in both the North Port and the South Port can only be effected at slack water subject to available tide.
BRIDGES: Passage above Evripos Bridge can only be effected at slack water or with following tide.
STEVEDORES: Loading, discharging, carried out with ships gear. Notice must be given by Agent to stevedores not less than 6 hours before vessel's arrival.

Cargo working rates: General cargo 80–100 tons every 8 hours. Bagged cargo 100–150 tons every 8 hours. Timber 70 cu. m.–90 cu. m. every 8 hours.
MEDICAL: Agent should be advised beforehand if medical assistance required on arrival. Clinic facilities available. Vaccination certificates required.
DENSITY: Average 1025.
FRESH WATER: Drinking water can only be supplied in small quantities by tanker lorry.
FUEL: Can be supplied in small quantities by tanker lorry.
DEVELOPMENT: A pier 240 m. is under construction at Vourkos in the South Port; depth alongside 26 ft.
WATCHMEN: Not required.
HATCHES: Opening and closing hatches can be effected by ships crew or by workers if requested.
CUSTOMS ALLOWANCES: Crew members each allowed 1 packet of cigarettes per day. Only the master is allowed 1 or 2 bottles of alcohol while vessel in port.
IDENTIFICATION CARDS: Shore passes are issued by port authorities.
CONSUL: France, tel. 2574.
REPAIRS: Only minor repairs can be effected by technicians from Piraeus.
REPATRIATION: No difficulties as there are excellent communications with Piraeus.
AIRPORT: Nearest is Athens International Airport.
TIME: GMT plus 2 hours all the year round.
HOLIDAYS: 1st January; 6th January; 25th March; 21st April; Good Friday; Easter Monday; Easter Sunday; 21st May; 15th August; 28th October; 6th December; 25th and 26th December. Local holiday 26th July.
POLICE/FIRE/AMBULANCE: Port police, tel. 22580; Fire 23333; Ambulance 22282.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Allowed.
DELAYS: Only waiting for suitable tides.
AUTHORITY: Chalkis Port Authority.

CORFU (Kerkyra): 39.37 N. 19.56 E.
(Including Kalifoka and Kefalomandouko)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Maritime Declaration of Health.
3 Stores Lists.
3 Spares Lists.
PILOTAGE: At least 24 hours before arrival ETA should be passed to Port Authority on 2182 kc/s, answering on 2830 kc/s. Vessels requiring Pilot during daytime should hoist letter "G" of international code, and sound letter "G" in the morse code on ships whistle at intervals. Whistle signal may also be used at night. Vessels should await Pilot in position 39° 38′ N., 19° 57′ E. nearest to the coast of Ptychia Island (Vido) and Corfu, depending on weather conditions.
ANCHORAGE: Safe anchorages in the area between Ptychia Island

and coasts of Corfu, depth about 30 m. During strong N.W. winds there is safe anchorage in the roadstead at Goritsa Bay or at Kastrades at a distance of half mile from the shore where depth in excess of 20 m.
RESTRICTIONS: Only during unfavourable weather conditions or lack of berthing space.
MAX. SIZE: Draft 7.5 m.
HEALTH: Port Health Officer boards vessel on arrival and examines health declaration. In cases of suspected disease or fever on board the health officer will examine entire crew and passengers.
RADIO: Radio Kerkyra. 2182 and 2830 kc/s.
TUGS: None.
BERTHING: Vessels should prepare fenders prior going alongside berth.
STEVEDORES: At least 24 hours advance notice of ETA required order arrange gangs. There are 3 silos for the discharge of bulk grain at Kalifoka (Mandoukion). Discharge rate about 60 t.p.h.
MEDICAL: Agent should be advised in advance of any medical requirements. Medical clinics available.
DENSITY: 1025. Max. height of tide 0.6 m.
FRESH WATER: Available through 2 in. hoses. Cost 25 drachmas per ton (approx.).
FUEL: For yachts in the new harbour there is a diesel-oil tank, capacity 10 tons. Also available from road tanker for all vessels alongside. At Kefalomandouko there is a permanently anchored oil barge capacity 24 tons. There are plans to provide permanent shore facilities.
FIRE PRECAUTIONS: Loading/discharging of inflammable liquids and explosives generally forbidden at night. The anchorage for vessels carrying inflammable liquids or explosives is between Lazaretos Islet and N.W. of breakwater point.
WATCHMEN: Not required.
HATCHES: Opened and closed by stevedores. Hold cleaning service available.
CUSTOMS ALLOWANCES: Crew of Greek vessels are not allowed more than immediate requirements out of bond. Seamen signing off and passengers leaving the vessel are allowed 200 cigarettes.
IDENTIFICATION CARDS: Required.
CONSULS:

France: Botis George, 1, Romanou St. Tel. 30067.
W. Germany: Aspiotis Gerasimos, Isermeti St. Tel. 31755.
Denmark: Damaskinou, 33 A.G. Spiridonos St. Tel. 29481.
Italy: Pitsino Juzepina, 10 Alexandras Avenue. Tel. 22351.
Netherlands: Aris Bogdanos, Skondrou-Pyrgi-Ypsos. Tel. 23870–29642.
U. Kingdom: Tsatsopoulou-Brouks, 1 Zambeai St. Tel. 30055.

Sweden: Adam Bogdanos, 5 Donzelot St. Tel. 29469.

REPAIRS: Facilities for minor repairs only.
DRY DOCK: Largest dry dock 20 m. length 2 m. depth.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: 2 km. from port. During winter 1 flight daily to Athens. During summer frequent daily flights to Athens.
TIME: GMT plus 2 hours permanent.
HOLIDAYS: Local holidays are 21st May, 11th August and 12th December. In addition Corfu observes standard Greek holidays.
POLICE/AMBULANCE/FIRE: Police, tel. 23661; Ambulance, tel. 30062; Fire, tel. 29255.
TELEPHONES: No facilities for placing on board.
GENERAL: Prevailing wind is from the N.W. Anchorage in the new harbour unsatisfactory due to mud bottom.
SHORE LEAVE: Allowed.
REGULATIONS: Forbidden to approach Lazaretos Islet.
AUTHORITY: Port Authority of Corfu.

ELEUSIS (including Skaramanga): 38.02 N. 23.33 E.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Bill of Lading.
2 Lists of Stores and Provisions.

PILOTAGE: Piraeus Pilct station regulations are operative.
ANCHORAGE: Port offers safe anchorage. Bottom mud and sand.
RESTRICTIONS: After sunset and for vessels intending to enter Eleusis port through Salamis channel, it is imperative to give 6 hours notice of expected time of arrival to Port Authorities of Eleusis, in order to obtain special permission from the naval yard of Salamis.
MAX. SIZE: No limitations to length and breadth at the installations or at the main port. Max. permissible draft of vessel entering Eleusis Bay is 35 ft. Max. draft at berths is 33 ft. Also see "Tankers".
HEALTH: For vessels arriving from other Greek ports, pratique is automatic. Vessels arriving from foreign ports boarded by Health Officer who grants free pratique.
RADIO: Athinai, 2182 kc/s.
TUGS: Join vessel outside Piraeus Harbour and formalities much same as Piraeus.
BERTHING: Overall length of jetties and quay at Eleusis 715 m. Max. depth over 80 m. of jetty length is 33 ft. with depths of 26 ft. elsewhere.
SPECIALISED CARGO HANDLING: Loading/discharging of iron ore is carried out by *(a)* Holivourgiki Co., which owns a pier of 180 m. long and from 26 ft. to 36 ft. depth, equipped with 4 cranes, and *(b)* by Metallia Voxitou Elefsinos Co., which offer a special anchorage with buoys. Loading is effected by means of silo.

Loading/discharging of fluid chemicals or liquid gas are carried out by Petrogas Co. to their private pier of 35 m. long and 15 ft. depth.
MEDICAL: Advance notice not required. Clinic available in town of Eleusis if required.
TANKERS: Operating companies supply reducing pieces. No facilities for residue discharge. *(a)* Esso Pappas: length 160 m.; breadth 30 m.; depth at pier 30 ft. *(b)* Greek refineries: length 93 m.; breadth 12.70 m.; depth 7 m. *(c)* Texaco: length 80 m.; breadth 6 m.; draft 4.50 m. *(d)* Mamidakis: length 40 m.; breadth 5 m.; draft 27 ft.
FRESH WATER: Barge delivery available.
FUEL: Available ex-wharf at tanker installations subject advance notice. Can be supplied by barge at other locations.
FIRE PRECAUTIONS: The usual precautions applicable to oil installations. During operations of white liquid (petrol, spirits, etc.) regulations require a tug to be standing by.
HATCHES: Usually opened and closed by crew and subject additional payment by stevedores.
DEVELOPMENTS: Hellenic shipyards, Skaramanga, plans to build a new graving dock for 300,000 d.w.t.

Eleusis Shipyards have built a third floating dock which takes vessels up to 115,000 d.w.t. At the building dock, a crane of 400 tons lifting capacity has been constructed.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle wine/spirits allowed per Crew member out of bond.
CONSULS: None.
REPAIRS: All grades of repairs can be carried out at Eleusis shipyard, and also at Skaramanga (see "Dry Docks").
DRY DOCKS: Skaramanga shipyard situated on the coast between the Port of Piraeus and Eleusis Bay. Shipyard is 8 miles by road from Athens and 7 miles from Piraeus; driving time 25 and 20 minutes respectively.

Mailing address: Hellenic Shipyards Co., PO Box, 480, Athens, Greece. Cables: Shipyard, Athens. Telex: 215293 HSYS GR, 215396 HSYS GR, 215567 HSYS GR. Telephones 8073.471, 8073.351, 8073.610. Office hours at Skaramanga: 0815 hrs. to 1715 hrs. (weekdays), 0815 hrs. to 1345 hrs. (Saturdays).

Floating Docks

Main Particulars	*Dock No. 1*	*Dock No. 2*	*Dock No. 3*
Lifting capacity	30,000 tons	22,000 tons	25,500 tons
Docking capacity (d.w.t.)	72,000 ,,	37,000 ,,	60,000 ,,
Length overall	826 ft.	673 ft.	760 ft.
Length on keel blocks	760 ,,	605 ,,	693 ,,
Breadth inside banks	121 ,,	105 ,,	111 ,,
Breadth outside banks	147 ,,	129 ,,	136 ,,
Ht. of WL above keel blocks	28 ,,	28 ,,	28 ,,
Pumping time	120 min.	80 min.	100 min.

Skaramanga Yard's three floating docks have been designed in such a way as to eliminate delays of any kind in the raising of large vessels and to ensure that the work is carried out in minimum time and with the least possible inconvenience to the crew living on board.

The basic equipment of the docks is the following; Two 5-ton cranes, 2 fire extinguishing pumps 120 cu.m. per hour at 90 m. WC, DC current supply to ships 1200 A 220 V, AC current supply to ships 600 A 440 V 60 cycles, multipoint welding rectifier 2500 A, 2 oil pumps for supply of fuel oil from the dock to the vessel 60 cu.m. per hour at 50 m., 2 compressors 17 cu.m. per minute at 7 atu, emergency diesel generator set 200 KVA, foam fire extinguishing system, steam boiler and water distilling plants.

Shipmaster's Report: 1978.

Tankers may discharge residue at the deballasting station of Hellenic Shipyards, max. output 500 cu.m./hour.

Graving Dock

The Graving Dock is 327 m. (1,100 ft.) long, 53.6 m. (176 ft.) wide and 9.25 m. (30 ft.) deep at the entrance. It can take ships in the 240,000 ton range.

Ships are manoeuvred at the dock entrance with the assistance of two 5-ton capstans situated on each side of the entrance gate. They are then shifted inside the docks by two 15-ton auto-tensioning winches and hauling-in trolleys (mules) running on tracks on each side along the dock subway.

The dock floor is fitted with specially designed keel blocks for easy fitting and removal and with electrically, operated side blocks.

The Graving Dock is served by two 100-ton cranes, one 50-ton crane and a small 5-ton crane.

A fleet of 5 powerful tugs is on hand at Skaramanga Yard to assist docking and undocking operations of all vessels calling at the yard.

Eleusis Shipyards S.A. is located 27 km. outside Athens. The site was chosen on account of the several advantages it presents. The bay is well protected from strong winds, sources of raw materials are available in the vicinity of the ward, and adequate transportation, power, and telecommunication facilities can service the needs of yard.

Athens Office: 67 Athinas Street, Athens 112. Tel. 349 053. Cables "Helnafel Athinia". Telex 215215 ESC GR.

Yard: Eleusinia, Eleusis. Tel. 55351. Cables "Helfafel Eleusis". Telex 215684 YARD GR and 215690 YARD DR.

Floating Docks: Two floating docks are available with the following specifications:

	No. 1	*No. 2*	*No. 3*
Length	162 m.	227.5 m.	252 m.
Breadth at entrance	23 m.	33 m.	41 m.
Draft over keel blocks	6.30 m.	8 m.	9.40 m.
Lifting capacity	11,500 m. tons	20,000 m. tons	30,000 m. tons
Cranage	5 t at 15 m.	12 t at 20.6 m.	12 t at 20 m.

Quay Wall; The 640 m. long quay wall is equipped with 40 and 15 ton cranes; range 30 m. power 220 volts DC 100 amp. – 42 volts DC 25 amp. – 280 volts AC 630 amp. Floating crane, 50 tons capacity.

Tugs: Available for manoeuvring purposes at all times.

AIRPORT: Athens Airport. Regular international flights.

HOLIDAYS: Cargo operations can be effected during usual Greek holidays, following submission of application to Harbour Workers' Union and subject cost increase of 75% above normal.

POLICE/AMBULANCE/FIRE: Eleusis Police Station 46674; Ambulance 46503; Fire Brigade 0199.

SPECIAL PRECAUTIONS: See "Piraeus".

AUTHORITY: Eleusis Port Authority.

IRAKLION (Heraklion), Crete: 35.20 N. 25.10 E. (See Plan Book)

DOCUMENTS:

4 Cargo Manifests.
4 Crew Lists.
4 Passenger Lists.
Declaration of Crew's Personal Effects.
List of Stores and Provisions.
Maritime Declaration of Health.
Vaccination Certificates.

PILOTAGE: Pilotage area extends 0.5 to 1 mile N.E. of breakwater. Advance notice of ETA should be passed to Agents order arrange Pilot. Contact may be made with Pilot station on VHF Channel 12 during daylight, also when within distance of 3–12 miles, and subject prior agreement of calling time, communication can be effected by radio-telephone via Radio Iraklion – Pilot station telephone 286133. International pilotage signals apply. Pilot boat is wooden boat 12 m. length, hull colour black, with white deckhouse, carrying black board with word "Pilot" in white letters. In bad weather vessels should proceed close to entrance of port for Pilots boarding.

A cement pillar has been installed on the end of the extension of the N. breakwater. Fl. Gr. every 3 seconds, visible 9 miles. The pilot boat is equipped with VHF. range 50 miles.

ANCHORAGE: Anchorage East of port entrance is forbidden owing to numerous underwater cables. In good weather conditions anchorage to be found 0.75 mile Northwards of N. breakwater with Enetic Castle bearing 180°. In bad weather conditions, best anchorage is at a distance of about 5 nautical miles to the W. of the North breakwater and at a distance of 3 miles from the coast (Ellinoperamaton Haven); depth of water requires a big scope of anchor chain.

MAX. SIZE: Max. length 250 m., draft 29 ft.–29ft. 6 in. Usual rise and fall of tide 1 ft. but increasing with South winds and decreasing with North winds.

HEALTH: International regulations apply for obtaining free pratique. In the event of suspected disease vessel will remain under quarantine until cleared. Pratique is automatic if arriving from another Greek port.

RADIO: Radio Iraklion – SUH 2128 kc/s.

TUGS: Port authority has 1 tug of 1,000 h.p. and periodically (during the tourist season), 1 tug of 650 h.p. When tugs required they await vessel at port entrance. Ship's lines used.

BERTHING: Pilot will advise Master of berthing position.

STEVEDORES: Port authority owns 3 cranes but they are seldom used. Cargo operations usually conducted by use of ship's own gear. Discharge rates per gang in 8 hours: bulk cargo 100 tons, bagged cargo 140 tons, liquid cargo subject ship's equipment – transportation by barges, timber 100 cu. m.

MEDICAL: Advance notice should be passed to Agents if requiring medical attention. Clinics and medical treatment available.

TANKERS: Only very small tankers discharge in Iraklion Port and Ellinoperamaton Haven. At Iraklion, tankers discharging liquid fuel are required to berth at East breakwater (fuel pier). Attendance of fire brigade and 1 tug standing by is compulsory.

DENSITY: 1020.

FRESH WATER: Available ex-berth or ex-barge. Rate of delivery ex-berth about 500 tons per 24 hours.

HATCHES: Opened and closed by crew.

CUSTOMS: 2 packets of cigarettes per day per crew member allowed out of bond, and one 500 gr. bottle wine/spirits for whole time of vessel's stay in port.

IDENTIFICATION CARDS: Shore passes issued by Port Authorities.

CONSULS:

Finland	tel. 284860 and 283860
Norway	tel. 282667
Netherlands	tel. 282615
Belgium	tel. 282520 and 282296
Sweden	tel. 282476 and 285859
Denmark	tel. 282253
France	tel. 282347
Germany	tel. 282266 and 285400

REPAIRS: Minor repairs available by machine shops in town of Iraklion. No facilities for deck repairs.

AIRPORT: Distance 5 km. Now an international airport with numerous flights.

TIME: GMT plus 2 hours, permanent.

HOLIDAYS: Usual Greek holidays plus local holidays of 25th August and 11th November. Cargo work can be arranged on holidays subject additional costs.

POLICE/AMBULANCE/FIRE: Police, tel. 282241, 282430, 282316; Ambulance, tel, 282894, 282638; Fire, tel. 283555, 282333.

AUTHORITY: Central Port Authority of Iraklion.

ISTHMIA, Corinth Canal (incl. Sousakion): 37.55 N. 23.00 E.

DOCUMENTS:

Port Authorities
Crew List.
Passenger List.
Ship's Certificates.
Health Certificates.
Certificate of Anchorage Dues.
Customs
Customs papers and declarations.
Cargo Papers.
List of Stores and Provisions.
List of Crew's Personal Effects.

PILOTAGE: There are 11 Pilots for the Corinth Canal. Telegraphic address of Canal is "Corinth Canal", tel. 0741-24452. Master of vessel must give at least 4 hours notice of ETA in order to avoid delay. For Pilot signals, etc., see article 7 of the New Company of the Corinth Canal "Regulation of Navigation and Tonnage".

ANCHORAGES: Open anchorage in Isthmia Bay.

RESTRICTIONS: Corinth Canal closed every Tuesday from 0600 hrs. to 2000 hrs. in order for maintenance work to be effected.

MAX. SIZE: The max. draft of ships negotiating the Canal, in relation to their width, is defined as below, assuming normal water level and normal weather conditions.

Width	*Maximum draft*
16.0 to 16.5 m.	6.2 m.
15.5 to 16.0 m.	6.2 m.
15.0 to 15.5 m.	6.6 m.
14.5 to 15.0 m.	6.8 m.
14.0 to 14.5 m.	7.0 m.

The max. draft for vessels of less than 14.0 m. width is 7.2 m. The max. width must not anyhow exceed 18.3 m. (60 ft.).

Special instances will be examined by the Master and the Canal Service in collaboration.

HEALTH: Pratique effected by health department of the Port Authority assisted by temporarily engaged doctor. In cases of suspected contagious disease vessel will be held under quarantine and if necessary fumigation will be conducted at Piraeus.

VHF: Corinth Canal Pilots on VHF Channel 11.

TUGS: Join vessel near Canal entrance at Isthmia and Possidonia. Ship's lines always used.

BERTHING: In Sousakion at private factory pier. No berths at Isthmia.

MEDICAL: Agent should be advised in advance of number of crew needing medical assistance, also information of any vaccination required.

FRESH WATER: Not available either at Sousakion or in the Canal.

FUEL: No fuel available at Corinth.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes out bond and 1 bottle wine/spirits.

CARGO GEAR: Loading/discharging by ship's gear.

AIRPORT: 100 km. distance.

TIME: GMT plus 2 hours, permanent.

POLICE/FIRE/AMBULANCE: Police, tel. 22129.

DELAYS: Possible delay up to 1.5 hours in transitting Canal if another vessel already transitting canal from opposite direction.

SHIPMASTER'S REPORT: 1977

Vessel: 5,700 g.r.t., 9,200 d.w.t., Summer draft 24 ft. 07 in., LOA 409 ft. 05 in.

Documents: No special entry papers required and if anchoring to await the berth Customs and Immigration will usually board at anchorage.

Port of Corinth: The port has no VHF communications but messages can be passed through the Corinth Canal Pilot Station on Channel 11. Pilot will then telephone Agents.

Anchoring off the port in the case of delay is possible but cannot be described as safe due to the close proximity of land or shoal water. Holding ground, however, is good. This vessel anchored with Corinth Breakwater light bearing 248° in about 16 fathoms of water using 6 shackles of cable. Vessel rode out a force 7/8 gale from the North without dragging but with the cable fully stretched the bridge was only 2.3 cables from the breakwater and too close for comfort. A second anchorage was used with the breakwater light bearing 232° and the ship's bridge 5.6 cables from the breakwater in about 18 fathoms of water. Again with the cable fully stretched this gave a clearance off the nearest shoal water of 3 cables, 6 shackles of cable being used. This is a slightly more comfortable position and again gale force winds were experienced without dragging. The vessel did drag in this position but not until winds were gusting to force 9 as a prelude to very severe storm conditions in which no anchorage of this nature would have been satisfactory. The bottom is stiff grey mud and care must be taken when anchoring not to impede the traffic approaching the canal entrance. Anchoring further to the Westward in order to increase the clearance from shoal water, etc., is not recommended as in addition to the much greater depth of water the holding ground deteriorates, becoming crumbly mud.

A boat can be provided by the Agents for use as a liberty boat when at anchor and there is no objection on the part of the Authorities to using the ship's boats for runs ashore.

A first examination of the chart (B.A. Chart No. 1600) will not indicate anywhere to berth a vessel of this size. However, dredging work has been carried out and the berth is on the S.E. side of the breakwater where there is room for a vessel of this size and for one small coaster in addition. The breakwater itself is slightly different in shape from that shown on the chart and building and dredging work are still in progress at its seaward end. The green flashing buoy shown on the chart is no longer in position but a light of similar characteristics is now shown from a structure on the breakwater end.

Maximum draft for berthing is 6.7 m. (22 ft.) and on this vessel's first call soundings between ship and quay when alongside indicated depths of between 24 and 26 ft., depths outside the ship being some 5 ft. greater.

A Pilot is available, and is of great assistance. He is an experienced shipmaster and has very good local knowledge. A small tug is presently employed shifting barges and cranes employed in harbour works and it is sometimes possible to use his services. This is dependent upon the tugmaster. He is particularly useful when undocking to hold the stern off the quay.

Initial approach to the berth is bow on until the starboard anchor has been let go which should be done at such a distance from the berth so as to allow 4 shackles of cable in the water when the vessel is alongside. Vessel is gradually swung on the anchor, long head and stern ropes are run by boat, and vessel is so brought alongside port side to.

The undocking operation is straightforward, the bow being pulled off the quay by means of the anchor. The only danger is that of the propeller coming into contact with the quay and here the services of the tug are valuable.

Docking and undocking in strong winds from any direction would be hazardous and in many cases impossible. Docking is always done in daylight and I do not recommend undocking at night either although this would be possible under calm conditions. An added disadvantage of undocking in evening time would be that the vessel would arrive at the Narrows ferry crossing in dark hours.

The Pilot agrees with this appraisal of the situation.

The quay itself is smooth concrete usually well fendered with rubber tyres and with good mooring posts. Vessel should be well secured as strong winds from a Northerly direction are experienced particularly in Winter.

There is a concrete apron some 3 metres wide alongside the ship and clear of this a considerable unsurfaced area on to which cargo is discharged. This area is very wet and dirty during rain.

Fresh water is available but 7 lengths of ship's hose are necessary to reach the outlet. A permanent water main is in the process of being laid alongside the ship.

Cargo operation: This is controlled by the 'Carton Pack' plant manager, there being no stevedore as such. Ship's gear is used and normally 3 gangs of stevedores.

The working day is from 0800 to 1700 hrs., evening overtime being unusual. Seven day working is possible but all overtime is subject to the plant working to receive the cargo.

Stevedores can discharge rapidly from the ship lifting 2 rolls of linerboard at a time but there are frequent stoppages due to congestion on the quay which reduces the overall discharge rate to about 25–27 rolls per gang hour. Although head and end clamps are provided by Charterers (carried on board) stevedores refuse to use these and all discharge is by rope sling. Rolls are landed on wooden platforms (timber supplied by Charterers) and then rolled by hand clear of the concrete apron. Two or possibly 3 fork lifts are used to load rolls from here onto lorries for transportation to the plant a short distance away.

Damage rate is high due to rolls becoming wet and dirty on the unsurfaced quay with bands being broken and outer layers torn. Further damage is caused by the fork lifts when loading the lorries.

No improvement in discharging conditions can be seen unless the quay is surfaced with proper drainage and unless Charterers are prepared to provide clamp machines for handling the rolls on the quay. Care should be taken when signing final outturn report as of course damages are written up to make it appear that they took place before discharge.

Weyerhaeuser are fully conversant with the situation.

Agents: Situated in Piraeus which is some 90 kms. away. They use sub-Agents in Corinth.

The sub-Agents are not geared for handling a foreign-going ship. To obtain action on major items it is best to telephone Agent in Piraeus direct.

Bunkers: Basically not available but diesel oil has been taken, having been brought from Piraeus by road tanker and with ten days ordering notice.

Repairs: These cannot be carried out except by bringing repairers from Piraeus at very high cost.

Lloyds' surveyor is obtainable from Piraeus, this being best arranged directly by the ship.

Provisions: These can be obtained locally and are of acceptable quality. There is no ship chandler as such and the system is for the Catering Officer to visit various suppliers with the Agents, pick his purchases and then leave Agents to collect and deliver to the ship.

Shore Leave: Passes are required and are renewed each visit. They should be available for return to Immigration on departure.

Corinth Canal: This vessel passed through the canal on the 4th November, 1977 on a draft of 3.6 m. forward and 4.74 m. aft.

Application should be made in advance to the Canal Authority quoting the minimum draft obtainable.

The transit presented no difficulties.

AUTHORITY: Port Authority of Isthmia.

ITEA: 38.26 N. 22.25 E.

DOCUMENTS:
- 2 Crew Lists.
- 2 Passenger Lists.
- Cargo Manifest.
- Bills of Lading.
- List of Ship's Stores and Spares.
- Health Declaration.
- Ship's Certificates.

PILOTAGE: Vessel should advise ETA at least 24 hours before arrival through the telegraphic office of Itea. Pilots are called by international code flag "G" or sound signal 2 long and 1 short blast.

Pilot boards 1 mile S.E. jetty lighthouse. Pilot boat painted black with white deckhouse, the word "Pilot" is painted in white letters on both sides. On the bow is painted "PY21".

In bad weather vessel should enter harbour without Pilot and anchor using both anchors.

ANCHORAGE: Available inside the harbour and in Aggolis Gulf. Safe anchorage in the vicinity of the jetty head in depths of 8–10 m.

RESTRICTIONS: Vessel may enter harbour day or night. Harbour anchorage suitable for vessels up to 60 ft. draft.

HEALTH: Pratique is given on arrival by the port medical officer.

TUGS: None available.

STEVEDORES: Gangs should be ordered in advance by Agents on basis of Masters ETA. Loading and discharging is effected by ship's gear.

MEDICAL: 24 hours notice preferred if any medical requirements. Hospital facilities available. Vaccination can be arranged within 24 hours.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

DEVELOPMENTS: Extension and widening of the existing breakwater and the construction of a second breakwater.

HATCHES: Hatches are opened and closed by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of alcohol is allowed each man.

IDENTIFICATION CARDS: Needed for crew men going ashore.

CONSULS: No local representation.

REPAIRS: No facilities for repairs.

REPATRIATION: Can be arranged.

TIME: GMT plus 2 hours all through the year.

HOLIDAYS: Cargo work can be effected on all holidays on payment of overtime.

POLICE: Tel. 222.

AUTHORITY: Port Authority of Itea.

KALAMATA: 37.02 N. 22.07 E.

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived vessel" and (subject to Charter-Party Terms) laytime commences to count are 0.5 mile from the breakwater red light, where Pilot boards.

DOCUMENTS:
- 5 Crew Lists (Greek flag vessels).
- 3 Crew Lists (foreign flag vessels).
- 2 Passenger Lists.
- Customs documents.
- Bill of Health.
- Bill of Lading.
- All ship's papers.

PILOTAGE: Notice of ETA required 48 hours before arrival. No VHF. Call Pilot by international code signals on arrival. Pilot boards by motor boat about 0.5 mile from the breakwater red light, weather permitting.

ANCHORAGE: Vessels waiting Pilot may anchor half-a-mile East of the breakwater red light.

MAX. SIZE: Vessels up to 29 ft. draft may enter harbour. For berthing alongside the West mole, max. length 382 m., max. draft 24 ft.

For berthing alongside the North mole, max. length 158 m., max. draft 13 ft.

For berthing alongside the East mole, max. length 170 m., max. draft 29 ft.

For berthing alongside the North-east mole, max., length 161 m., max. draft 29 ft.

A new dock under Construction max. length 145 m., max. draft 29 ft.

HEALTH: Port Health doctor boards vessel on arrival or alongside the berth. Master required to produce Fumigation Certificate and Declaration of Health. Health visit not necessary for vessels coming from a Greek port.

RADIO: Athens Radio, call sign SVA.

TUGS: No tugs available.

BERTHING: Agents require details of vessel's draft in advance to

get berthing permission from Harbour Authorities. West Mole, length 430 m.
SPECIALISED CARGO HANDLING FACILITIES: There is a silo for grain. The other special cargoes discharging equipped by ship's gear. No facilities for containers or roll-on/roll-off traffic. For liquid chemical carriers there are 2 pumps with electric system. There are 2 cranes on vehicle, 3 and 40 tons capacity. Also there is 1 lifting machine. No other facilities.
STEVEDORES: Number of gangs required to be advised Agent in good time.
MEDICAL: Doctors and medical assistance available.
FRESH WATER: Can be supplied from the berth at about 15 t.p.h.
FUEL: Can only be supplied by road tankers – subject to advance notice.
DEVELOPMENTS: New berths under construction to accommodate vessels up to 30 ft. draft.

It is planned to build a shipyard at Kalamata. During the first phase the yard is likely to concentrate on the building of bulk carriers and tankers up to 75,000 tons d.w.t.
WATCHMEN: If required watchmen available from shore.
HATCHES: Can be opened and closed either by crew or by stevedores subject to regulation payments for this work.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
CONSULS:
Sweden tel. 22479
Netherlands tel. 22881
REPAIRS: Minor repairs can be effected in shore machine shops. No dry docks.
REPATRIATION: Can be arranged.
AIRPORT: Situated 6 miles away. Flights to Athens 2 times a day.
TIME: GMT plus 2 hours all the year round.
HOLIDAYS: Additional local holidays are Ascension Day and St. Dionysio's Day.
POLICE/FIRE/AMBULANCE: Police tel. 22622; Fire tel. 28273; Ambulance tel. 25555.
SHORE LEAVE: Allowed. Shore passes issued by Harbour Authorities.
AUTHORITY: Kalamata Harbour Master's Office.

KALI LIMENES, Crete: 34.56 N. 24.50 E.

DOCUMENTS: Vessels may arrive for bunkering without obtaining free pratique. However, if pratique is effected, vessels should have ship's papers ready for inspection, also 4 Crew Lists, 4 Passenger Lists, Cargo Manifest and a List of Stores and Provisions.
PILOTAGE: 1 private Pilot employed by the bunkering company SEKA who undertakes pilotage for vessels calling for bunkers. Pilot boat is a small boat equipped with signal lamp. Pilot boards about 5 miles East of Aghios Pavlos (St. Paul) Islet. Vessels awaiting Pilot may anchor 15 miles East of Aghios Pavlos Islet.
ANCHORAGES: (See "Pilotage") Vessels may anchor in area between Aghios Pavlos Islet and Mavronissi, which is a safe anchorage.
MAX. SIZE: Vessels in ballast of up to 80,000 d.w.t. and max. draft 14 m. can enter port.
HEALTH: Vessels arriving from foreign ports wishing to obtain free pratique should cable Agents to arrange for boarding of Health Inspector. Free pratique automatic if arriving from another Greek port.
TUGS: There is 1 tug, but it is seldom used.
MEDICAL: Agent should be advised well in advance if medical assistance required. There are no hospitals or other local facilities and doctor has to be called from nearest town.
TANKERS: 3 berths North of Aghios Pavlos Islet, max. draft 14 m.
FRESH WATER: Unlimited supplies available.
FUEL: Unlimited supplies available subject adequate advance notice. Supplied by Mobil only.
FIRE PRECAUTIONS: Portable foam-fire extinguishers.
CUSTOMS ALLOWANCES: 200 cigarettes permitted to each crew member to be held out of bond, and 1 bottle of wine/spirits.
CONSULS: None.
REPAIRS: None.
AIRPORT: At Iraklion, 75 km. distant.
TIME: GMT plus 2 hours, permanent.
SHORE LEAVE: Permitted if free pratique requested and granted.
SHIPMASTERS REPORT: 1976

Pilotage: Pilot boards about 1 mile South of Aghios Pavlos.

Anchorage: Half a mile E.N.E. of Mavronissi, depth of water 30 ft.

Max. Size: According to Pilot; 100,000 d.w.t. in ballast and max. draft 44 ft.

Pumping Rate: Fuel – 1,000 t.p.h., diesel – 200 t.p.h.

ETA: Send ETA 48 hours in advance through Radio Athens. The bunker station can be reached direct on 2320 kHz.
AUTHORITY: Port Authority Station.

KATAKOLON: 37.39 N. 21.20 E. (See Plan Book)

DOCUMENTS:
Maritime Health Declaration.
Usual Ship's Certificates.
3 Crew Lists.
3 Passenger Lists.
2 Lists of Stores and Provisions.
2 Lists of Crew's Personal Effects.

PILOTAGE: Not compulsory. Port has 1 private Pilot whom vessel may use provided sufficient advance notice passed through Agent.
ANCHORAGES: Vessels can anchor at a distance of 2 cables from the head of the breakwater (bearing 300°). Safe anchorage for vessels of up to 30 ft. draft between positions 37.40 N. 21.19 E. and 37.40 N. 21.20 E.
MAX. SIZE: Max. safe draft 24 ft. Depth inside port 8 m. Length of pier 204 m.
STEVEDORES: No advance notice required. No shore facilities. Vessels load/discharge with own gear.
MEDICAL: No medical assistance in Katakolon, but facilities exist at the town of Pyrgos 13 kms. distant.
FUEL: Not available ex-berth, but can be delivered by tank truck from Patras or Kalamata.
FRESH WATER: Available. Capacity 20 cu. m. per hour.
HATCHES: Usually opened and closed by crew but this work can be carried out by stevedores subject consent of Port Authority. Cost as agreed between Master and stevedores.
IDENTIFICATION CARDS: Passes issued by Port Authority.
CONSULS: None.
REPAIRS: Not available in Katakolon. Small quantities of engine spares available in Pyrgos.
AIRPORT: Andravis Airport 26 kms. distant. Flights to Athens twice weekly.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: Usual Greek holidays plus local holidays of 6th December and 17th December.
POLICE/AMBULANCE/FIRE: Police and Immigration, tel. 41202; Fire brigade (Pyrgos), tel. 22633; Ambulance (Pyrgos), tel. 22344.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Permitted.
AUTHORITY: Port Authority of Katakolon.

KAVALLA: 40.55 N. 24.25 E.

DOCUMENTS:
5 Crew Lists.
2 Lists of Foreign Exchange.
4 Passenger Lists.
2 Cargo Manifests.
2 Lists of Crew Personal Effects.
Copies of Bills of Lading and usual Ship's Certificates.

PILOTAGE: 24 hours notice of ETA to be passed to Agents or direct to Port Authorities. Vessels requiring Pilot should indicate with light and sound signals code letter "G" on arrival 5 miles from Kavalla lighthouse. Pilot boat is a tug 9 m. length. Pilot usually boards about 0.5 mile from breakwater light. In event bad weather, Pilot does not board, and vessel may take refuge N.W. of Cape Prinos at the head of Thasos Island. If strong South or S.W. winds prevailing, vessels recommended take refuge Eleftheron Bay. Vessels awaiting a Pilot may anchor 0.5 mile South of Kavalla lighthouse.
ANCHORAGE: 0.5 to 2 miles South of Kavalla lighthouse, depth 30 to 40 m. Bottom sand and mud.
MAX. SIZE: Max. length 150 m. with proportionate breadth. Max. draft 27 ft. Tidal range 2 ft.
HEALTH: Doctor boards vessel with Port Officer. Maritime Declaration of Health and Deratisation Certificate required. In case suspected disease or fever on board, Master should radio Port Authorities in advance. Pratique is automatic if arriving from another Greek port.
RADIO: No local radio station. Cables may be routed through Athinai Radio.
MEDICAL: Advance notice of medical requirements necessary. General hospital in Kavalla and numerous private clinics.
DENSITY: 1025.
FRESH WATER: Available at berth.
FUEL: None.
HATCHES: Opened and closed by crew.
CARGO GEAR: Vessel should have cargo gear ready on arrival in order to avoid delay.
CONSULS:
France Tel. 3163
Netherlands Tel. 3265
Finland Tel. 3467
Sweden Tel. 3669
REPAIRS: Minor repairs available.
AIRPORT: Distance 7 km. One flight daily to Athens.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: Standard Greek holidays. Local holiday 29th June.
POLICE/AMBULANCE/FIRE: Police, Tel. 3291; Fire, Tel. 1999.
AUTHORITY: Kavalla Port Authority.

LAVRION: 37.42 N. 24.04 E.

DOCUMENTS:
Maritime Declaration of Health with Crew's Vaccination Cards.
Cargo Manifests.
4 Crew Lists.

PILOTAGE: Address of Pilot station, Port Authority of Lavrion. Pilot boat is a motor launch 8 m. long, black hull with white stripe flying code flag "H". Vessels requiring Pilot should flash or sound letter "G". Pilot boards about half a mile from Green Light (AK. Ergastiria). In event of bad weather, boarding position is inside the buoy. Vessels awaiting Pilot should anchor close to the Green Light depending on vessel's size.

ANCHORAGE: See "Pilotage".
MAX. SIZE: Max. length about 130 m., max. draft 21 ft.
HEALTH: Health Officer and Port Officer board vessel on arrival. Maritime Declaration of Health should be submitted to Health Officer who examines any sick crew. Free pratique is not automatic.
BERTHING: Harbour open to S.E. winds, but otherwise sheltered and safe. There are two quays: one 330 ft. length, depth alongside 20 ft., and one of 260 ft. length, depth alongside 13 ft.

Mining company owns bridge elevator with capacity of 700 tons per day.
STEVEDORES: Advance notice required in order to arrange gangs. No shore cargo equipment, and cargo operations effected by ship's gear.
MEDICAL: Medical assistance available.
FRESH WATER: Can be supplied to vessels alongside berth from tanker trucks.
FUEL: Only small quantities available as existing fuel tank only 10 tons capacity. Can be supplied by tank trucks from Piraeus.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes per crew member allowed out of bond.
REPAIRS: Minor repairs only.
AIRPORT: Athens Airport, distance 45 km.
TIME: GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police, tel. 25218; Ambulance, tel. 25340; Fire, tel. 25249.
HOLIDAYS: Local holiday 26th July.
AUTHORITY: Port Authority of Lavrion.

MEGARA: 38.00 N. 23.20 E. (See Plan Book)

Pier owned by Hellenic Refinery. Berth depth 42 ft. 6 in. at S.W. end, 44 ft. at N.E. end. 46–50 ft. available 1 m. from the berth. With suitable fendering berth can accommodate vessels up to 85,000 d.w.t. 3 tugs required for berthing/unberthing. Tide about 1 ft. plus or minus depending wind direction.
also see "Piraeus".
SHIPMASTER'S REPORT: Vessel 255,090 d.w.t. Discharged part cargo of approximately 115,000 tons. (See Shipmaster's Plan). Pilot boarded from a tug in position 1 mile South of Pakhi Island. Forward moorings consisted of 2 "first line ashore" 9 in. nylons in a long drift to the shore. This distance was estimated at about 300 m. 3×10 in. synthetic hawsers to buoys (2 to 1st buoy and 1 to 2nd buoy) with drifts of only 100 to 150 ft., the Pilot did not appear to have a lot of faith in the holding ability of the buoys. 3 × 5 in. wires led to the concrete jetty, and the 2 which were true backsprings, were very good with normal drift, but the wire from the after end of the foc's'le head to the stem of the jetty was very long and required a tug boat to carry it out as the boatmen could not handle it at the length. The starboard anchor, which was used for berthing was left out at 4 shackles.

Aft, the mooring consisted of 2 "first line ashore" 9 in. nylons in a long drift, exactly the same as forward. Then 2 × 10 in. synthetics to a buoy just clear of the quarter and 4 × 5 in. wires to the jetty. The 3 shown to the stem of the jetty all had to be carried out by a tug boat as forward.

My distrust of this berth is because of the lack of any wire breast lines and the main reliance being placed on the 4 nylons (two each end) which can stretch considerably if the breeze were to blow strongly offshore. There was only about 44 ft. of water alongside giving us a high freeboard.

At this berth it is necessary to use ship's gear to hold discharge hoses, 3 × 8 in. hoses being used.

According to the Pilot, it is preferable to use only ropes for mooring as they can be easily doubled up for length. His suggestion was that we should carry about 14 mooring ropes, with which I disagreed. He also advised that large tankers always berthed port side to, and I presume this is for V.L.C.C.'s as the next ship on berth came in starboard side alongside. She was about 50,000 tons.

With this ship there were 7 tugs in attendance berthing and 8 unberthing; at the most, 3 of them have sufficient power, the others were very weak when assisting us.

MILOS ISLAND: (Adamas, Voudia Bay) (See Plan Book)

DOCUMENTS:
4 Crew Lists.
3 Passenger Lists.
2 Provisions Lists.
2 Personal Effects Lists.
Vaccination Certificates.
Deratisation Certificate.
Manifest (in duplicate)
Certificate of Registry.
Load-line Certificate.
Safety Equipment Certificate.
Radio-telegraphy Certificate.
Certificate of Measurement.
PILOTAGE: No Pilot station. Vessels requiring a Pilot should sound 3 blasts on ship's siren. Pilot boards from small motor-boat. Agents may contact Pilot in advance of requirement by telephone.
ANCHORAGE: Safe anchorage in all parts of Milos Bay, where Adamas port is situated. Main anchorage in Milos Bay is on East side of Bombardos Cape, which has a lighthouse showing a fixed green light.
MAX. SIZE: Any size vessel may enter Adamas Port but berthing alongside is restricted to vessels of 16 ft. draft.

Ore loading berth at Voudia Bay (Privately owned by Messrs. Silver and Baryte Ore Mining Co.). No facilities for tankers. Ore loading Berth at Kanaba (Privately owned by Micobar Ore Mining Co.).
HEALTH: Authorities require 24 hours notice of arrival in order to grant free pratique to vessels arriving from a non-infectious country. Free pratique cannot be granted at Milos to vessels having disease on board nor to those arriving from an infected area. Such vessels are required to proceed to a main Greek port (Piraeus, Syros, etc.) to obtain health clearance.
RADIO: Athens Radio and Heraklion Radio.
TUGS: Not available.
STEVEDORES: Loading/discharging at Adamas is by means of ship's gear. Bagged cargo loading rate is 250 t.p.h. At Voudia Bay and Kanaba, bulk ore is loaded at a rate of 500 to 800 t.p.h. (Conveyor Belt).
MEDICAL: No hospitals, nor private clinics available. There are 3 doctors and 1 dentist resident on the Island. There is an airport on the Island with regular services to Athens. Also in case of illness, the possibility of an emergency service.
FRESH WATER: Available to vessels alongside using ship's hoses. Delivery alongside up to 30 cu. m. in 12 hours.
FUEL: Small quantities lubricants available.
DEVELOPMENTS: Intentions to extend existing wharf up to 70 m. with depth increases up to 30 ft. (This development has been delayed for economic reasons).
OPENING/CLOSING HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of spirits per person.
REPAIRS: Minor oxy-acetylene repairs available.
TIME: GMT plus 2 hours.
HOLIDAYS: Sundays and customary holidays. Cargo work can be arranged on these days at 75% increase on tariff rates.
TELEPHONES: Police 21-204; Port Authority 41-607.
SHORE LEAVE: Permitted.
DELAYS: Strong Southerly winds may delay berthing, or force vessel to leave loading berth at Voudia Bay.
SHIPMASTER'S REPORT No. 1: *Voudia Bay:* Fresh water is available using vessels own hoses. Limited quantity of provisions are available. Hire of polypropylene ropes of 150 m. length is possible.

It is advisable to close ventilators before loading due to excessive dust.

Pilot remains on board during loading.
Cargo: Perlite.
Loading rate for bulk: 250 t.p.h.
Loading rate for bags: 18–20 t.p.h.

SHIPMASTERS REPORT No. 2: *Voudia Bay and Milos Island:* Situated on the N.E. corner of the island of Milos. When approaching from the S.E. the most prominent features are the scarred terrain, the factory building and the silo which is situated just above the berth. The loading gantry has both fixed red and white lights on it and is conspicuous.

Anchorage: The vessel anchored in a position with the loader bearing 302° T. distance 7.5 cables in 48.5 m. of water using 5 shackles of cable, the holding appeared to be good. The recommended anchorage is in a position with the loader bearing 328° distance 5 cables where holding is reported to be good. There was another vessel in that position at the time.

Caution: This anchorage is not recommended in strong South to S.E. winds due to the seas that build up in the Bay. Vessels are recommended to go to the North of Pilonisi Island and anchor in a position N.W. of the North West point, a distance of not less than 3 cables. This island is now joined to the main island by rubble from the factory, this is not shown on the Chart (1832).

Method of Berthing: (See Plans). Approach to the berth is made heading in a N.W.'ly direction, keeping the Northern most buoy (A) close to the starboard side and when the bow is passed about a third of the ship's length, the starboard anchor is let go and let run until about 4 shackles on deck, then it is checked, in the meantime a boat will take a breastrope from for'd, run from the port shoulder lead (1). Once this is ashore and the vessel begins to cant to starboard, the bow is worked into position by heaving on the breastrope and slacking the cable until there is about 6 shackles on the latter. Meanwhile, a line is run from the starboard quarter (2) to buoy (B). A word of caution here, the berth is designee to take vessels up to 23,000 tons, so for a small vessel it will be necessary to have 2 ropes joined together for moorings (2), (4) and (5). The next line sent away is one from the Port Quarter to ashore as a breastrope (3), the stern is then brought into position in a similar manner to the bow. As the prevailing wind is from ahead usually, the next rope sent away is the head line (4) and finally the stern line (5). The latter two are used for shifting the vessel under the loader. Directly under the loading gantry, there is a dolphin arrangement to keep the vessel off the cliff, but on completion of mooring, the vessel should end up about 6 to 10 ft. off this.

Caution: In strong South to S.E. winds, the berth becomes dangerous and vessels have to leave and go to anchor and it is often necessary to leave the ropes on the buoys etc. as it is not possible to let them go. It is also advisable to retain some ballast on board for berthing.

There are 2 Pilots, both speaking English, the younger, an ex-

Chief Officer has the better command of English and was the source of a lot of this information.

On leaving the berth, the last rope to be let go is (2) and with a smaller vessel, this can safely let go while weighing anchor. Vessel will then proceed to another anchorage close to, to secure, obtain clearance and clean up.

Loading Procedure: Loading is done by a chute and at an approximate rate of 300 tonnes per hour. The cargo is very dusty and everything should be securely battened down and it is strongly advisable to wear goggles and protective masks on deck as the dust is choking and if it gets in the eyes, they should not be rubbed as it is abrasive and can cause permanent damage. Eyes should be washed out. The ship will advise what weight she can take, and as the weighing procedure ashore is liable to break down after the first 500 tonnes, vessel is loaded according to draft, which has to be carefully checked, as when stipulating amounts required per hatch, they will not necessarily keep to this unless told. A boat is available for checking the draft, 1 blast on the whistle will summon it. Only method of getting ashore is by boat, so it is necessary to have the starboard gangway down. Both foreman and boatman have a fair knowledge of English, but foreman does not come aboard but stays on the loader, so it is necessary to shout instructions etc. The foreman will advise on shifting for position required, this is done with the aid of frequent blasts on a pocket whistle. Only one man comes aboard and that is to tend the chute.

There appears to be a continual short swell which makes draft reading a little difficult.

Entry and Clearance: Agent, Doctor, Customs and Harbour Master boarded the vessel at anchor and entered her there. Forms on board were not acceptable, but they transferred them to their own. I understand that the only acceptable forms are the standard IMCO ones, and if there are any of these on board they should be used.

Forms required:
2 Crew Declarations.
3 Crew Lists.
2 Bonded Stores List.
2 Stores Lists.
1 Vaccination list (Including Cholera).

There are various other forms to sign, but these are prepared by the Agent. The Health Declaration is made out by the doctor in his book. The Agent, who is from the Mining Company, spoke very good English.

Weather: Northerly winds predominate during the Summer and can become quite strong during September, mainly from midnight to noon.

AUTHORITY: Port Authority of Milos.

MITYLENE (incl. Geras Bay and Pamfyllon): 39.06 N. 26.35 E.

DOCUMENTS:
4 Crew Lists.
2 Cargo Manifests.
2 Passenger Lists.
2 Stores Lists.

PILOTAGE: No official Pilot, but if required the services of 2 experienced Mercantile Marine officers having knowledge of the port may be used.

ANCHORAGE: Before town of Mitylene, in depths of about 18 m., extreme East of Kastro Peninsula or Fokiotrypa light, bearing due North.

MAX. SIZE: Length 120 m. draft 17 ft. at Inner Port. Length 160 m., draft 28 ft. at Outer Port.

HEALTH: On arrival from foreign port, Port Officer, Customs Officer and Medical Officer board vessel for pratique. Pratique automatic if arriving from another Greek port.

BERTHING: At least 24 hours notice of ETA required for berthing allocation.

STEVEDORES: At least 8 hours notice of number of stevedores required to be given.

MEDICAL: In event of illness on board, Master should cable details prior arrival. Medical clinics and hospital available.

TANKERS: Geras Bay (Mamidakis) and Pamfila (Purfina).

FRESH WATER: Available. Supply rate 40/50 tons per vessel every 24 hours.

FUEL: Available at Purfina and Mamidakis installations. Supplies to Mitylene port by tanker trucks only, and advance notice required.

DEVELOPMENTS: A pier to be constructed in the Outer port, with depth of 15 ft. alongside.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member out of bond.

CONSULS:

Sweden	Tel. 28494	Belgium	Tel. 28494
Netherlands	,, 28760	France	,, 28151

REPAIRS: Two local machine shops undertake very minor repairs.

AIRPORT: 8 km/s from the port. 2 daily flights to Athens.

TIME: GMT plus 2 hours, permanent. From 15th April until 10th October there is Summertime.

HOLIDAYS: In addition to usual Greek holidays, local holiday on 6th December. Cargo work can be arranged subject additional charge.

POLICE/AMBULANCE/FIRE: Police, Tel. 100 and 22021; Fire Brigade, Tel. 199; Hospital, Tel. 28412 and 22005.

AUTHORITY: Mitylene Port Authority.

MYKONOS: 37.27 N. 25.20 E.

Vessels in excess of 22,000 d.w.t. have been accommodated. Loading of Barytes ore at rates up to 5,000 tons per day. In Winter when North winds prevail conditions are satisfactory for loading: however, loading position considered unsafe when S.W. or West winds prevailing. When sufficient cargo is available vessels can load in 2 days.

PATRAS (including Rio): 38.14 N. 21.45 E.

(See Plan Book)

DOCUMENTS: Port Authorities: 2 Crew Lists, Customs: Declaration of Cargo and Passengers.

PILOTAGES: Advance notice of ETA to be passed to Agents who arrange Pilot. Vessels without Agents should advise authority of ETA through Athens Radio, or on arrival outside harbour make International Code sounds and signals for vessels requiring a Pilot. Pilot boat is small boat carrying pilot flag. Pilot usually boards less than 1 mile outside harbour entrance. VHF contact possible with Port Authority and Pilot on Channel 12.

ANCHORAGES: Patras Roads are safe enough, when very strong W/NW winds blow, vessels may anchor at Nafpaktos Roads.

RESTRICTIONS: Port entrance has depth of 32 ft. At main harbour vessels having draft in excess of 28 ft. cannot berth. The limit at the new berth is 32 ft. draft. There is 1 red and 1 green light buoy in position of the intended line of extension to Northern part of breakwater (extension of 250 m.) where work is in progress. Buoys are about 600 m. from permanent lights marking North entrance to the harbour, and indicate shallow water.

MAX. SIZE: Vessels of less than 34 ft. draft. No restrictions on length or breadth. Height of tide, max. 0.55 m., does not affect size of vessel.

HEALTH: Pratique in accordance with International Regulations.

RADIO: Athens Radio.

TUGS: Two tugs, 1,000 h.p. and 1,120 h.p. Use of tug compulsory for all vessels over 1,000 tons gross. Joins vessel at entrance to harbour. Ship's lines used.

BERTHING: In accordance with allocation given by Port Authority.

STEVEDORES: Advance notice of ETA required in order to arrange berth and order number of gangs to commence work immediately. General cargo rate about 80–100 t.p.h./gang, and bulk cargoes 75–90 tons. 7 shore cranes, capacity up to 25 tons available. One shore crane capacity 118 tonnes with container handling facilities.

TANKERS: No facilities at Patras, but Texaco-Restis berth at Rio for vessels up to 18 ft. and 2,500 tons alongside. No residue discharge facilities.

FRESH WATER: Supply line connected to all berths.

FUEL: Deliveries by tank trucks at Patras. Available at Texaco-Restis berth at Rio.

FIRE PRECAUTIONS: Vessels refuelling or discharging explosives or inflammable materials must apply to Port Fire Brigade to stand by.

DEVELOPMENTS: *(a)* Outer breakwater to be extended 600 m. in total.

(b) 4.7 m. is the depth along the newly constructed quay between Custom's House and fish steps.

(c) St. Nicolas pier – length: 200 m. – is now available for berthing ships on both sides. Depths alongside are equal to those in North and South basins.

(d) Astingos pier is reconstructed now having a 160 m. length on the South side and a 180 m. length on the North side. Depths alongside are same as in the basins.

WATCHMEN: Advisable to employ night-watchmen on large vessels.

HATCHES: Usually opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed out of bond for each Crew member.

IDENTIFICATION CARDS: Crew are supplied with passes by Port Authority.

CONSULS:
Belgium
Germany
Denmark
Italy
Netherlands
Sweden
Finland
France
Switzerland

REPAIRS: Very minor repairs only.

REPATRIATION: All facilities for crew changes and repatriation.

AIRPORT: None.

TIME: Summertime – GMT plus 3 hours – from April 10 to end of September.

HOLIDAYS: In addition to general Greek holidays and Sundays, local holidays are 8th September, 30th November. Work can be arranged on these days subject to payment of additional charges.

POLICE/AMBULANCE/FIRE: Port Police, tel. 277–622; Patras Police Station, tel. 277–261; Ambulance, tel. 274–444; Fire Brigade, tel. 199.

TELEPHONES: Facilities for connecting on board.

SHORE LEAVE: Permitted.

AUTHORITY: Central Port Authority of Patras.

PIRAEUS: 37.56 N. 23.40 E. (See Plan Book)

Incl. AGHIOS GEORGIOS 37.57 N. 23.36 E.; KERATSINI: DRAPETZONA 37.56.30 N. 23.37 E., and PERAMA 37.58 N. 23.35 E.)

DOCUMENTS: All usual certificates including Registry, Measurement, Inspection, Load-line, Fumigation, Passenger Safety, Cargo Gear, and Radio.

9 Crew Lists.
2 Vaccination Certificates.
Cargo Manifest.
List of Provisions and Stores.
List of Spares.
Maritime Declaration of Health.
1 List Vaccination Dates.
1 Crew Effects Declaration.

Customs:

2 Special Forms in Triplicate.
1 Stores List.
Master's Declaration of typewriters and adding machines, etc.
Crew Passports, or Seamen's Books.
Passenger Passports.

PILOTAGE: Cable Agent well in advance advising ETA. Agent informs pilot office of vessel's arrival time.

Pilots can be contacted on VHF Channel 16 for calling, Channels 7 and 12 for communication. Pilot boat is a wooden vessel about 10 m. length with black-painted hull, word "Pilot" painted in white.

Vessels requiring Pilot should signal letter "G" by morse light or by ships whistle. Pilot boards vessel about 1.5 miles off entrance to harbour, except when very strong South winds prevailing, in which case vessel advised by VHF or by signal light that conditions impossible for Pilot boarding, and whether vessel permitted enter harbour at Master's risk.

If awaiting Pilot, anchorage is possible inside pilotage area of Piraeus – Aghios Kosmos – Piraeus Anchorage – Perama Anchorage – Megara Anchorage (Pachi).

ANCHORAGES: As above. Depths between 9 and 35 fathoms.

RESTRICTIONS: No restrictions for Aghios Georgios Harbour or Drapetzona excepting draft. Harbours open throughout 24 hours for entry and departure subject prevailing weather conditions. No tidal restrictions.

MAX. SIZE: (also see "Tankers") Aghios Georgios max. draft 32 ft. Drapetzona max. draft 38 ft. Piraeus max. draft 36 ft.

RADIO: Athinai Radio – SVA.

TUGS: Usually join vessel outside harbour, always using ship's lines. Over 30 tugs available. 10 of less than 1,000 h.p. and remainder over 1,000 h.p.

BERTHING: Agent must advise Piraeus Harbour Authorities in order to secure berth allocation.

CRANES: One gantry crane lifting capacity 10 tons, used for coal and bulk cargoes installed at Hercules Port. Hourly output of 160 tons.

63 electric wharf cranes with capacities of 2 to 15 tons installed along the wharf of the main port and at the dry and floating docks.

67 mobile cranes with capacities of 3 to 40 tons.

9 Straddle-carriers for containers, capacity 30 tons each.

4 floating cranes with capacities of 15, 30 and 100 tons.

BULK HANDLING FACILITIES: Silo suction-duct installations capable of moving grain at up to 150 t.p.h. and storage facility for 40,800 tons, as well as 2 mobile suction-duct units for bulk grain-cargoes.

STEVEDORES: Agent must submit letter of application to Piraeus Port Authorities for number of gangs required also time required to commence cargo work. Discharge usually effected with ship's own gear.

Normal work on loading/discharge of goods in the port is carried out by 2 regular shifts, the morning shift (0730 hrs. to 1430 hrs.) and the afternoon shift (1430 hrs. to 2130 hrs.). Likewise, upon application of the interested parties (ship-owners, Agents, consignees, shippers, etc.), and provided approval of the competent P.P.A. Service is obtained, a third, night shift can be assigned to the job if the necessary workers and operators are available. This shift is again of 7-hour duration, from 2030 hrs. to 0330 hrs. or can be extended to the morning hours if necessary. Exceptionally in the case of work on refrigerator vessels, on which work during the Summer period is limited to the afternoon hours, the Service can assign workers and operators of loading/discharge machinery, starting from 1630 hrs., for a 7-hour period which can be extended, if conditions warrant, to the morning of the next day. Loading/discharge work may also be undertaken on Sundays and other non-working days (holidays) such work being considered as totally extra, being burdened with extra charges accordingly.

MEDICAL: All medical and hospital facilities available. No advance notice required except in special cases.

TANKERS: Discharging effected at private installations.

Shell	max. draft 32 ft.	Petrolles	max. draft 29 ft.
B.P.	max. draft 36 ft.	Purfina	max. draft 28 ft.
Elvyn	max. draft 26 ft.	Mobil	max. draft 48 ft.

D.E.H. max. draft 36 ft. (outside steam generator factory, no facilities for going alongside).

DENSITY: 1025.

FRESH WATER: Available alongside berths. For vessels at anchor, water can be delivered by barges belonging to Piraeus Harbour authority at 50% additional cost.

FUEL: Gas oil, fuel oil and mixtures of both to a certain viscosity available. Advance notice of requirements should be sent to Agent order complete customer's requirements.

WATCHMEN: Required.

HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per crew member allowed out of bond. Wine/spirits, one bottle.

CARGO GEAR: Before commencement of loading or discharge, cargo gear is examined by Piraeus Harbour Authorities.

IDENTIFICATION CARDS: Passes required for seamen going ashore.

CONSULS: The following countries maintain Consuls at Piraeus:

Denmark Italy Netherlands
Finland Norway Sweden

Other countries maintain Consulates resident in Athens.

REPAIRS: Facilities available for all kinds of deck and engine repairs.

DRY DOCKS: (A) Two permanent drydocks at Piraeus (a) Length 134.4 m., depth 9.27 m.; (b) Length 93.3 m., depth 8.0 m. (B) Two floating docks at Perama. *(a)* Length 202 m., depth 40 m., capacity 15,000 tons. *(b)* Length 113.6 m., depth 27.4 m., capacity 3,000 tons. Also see Eleusis and Syros.

REPATRIATION: All facilities for crew changes and repatriation.

AIRPORT: Athens Airport 10 km. distant from main harbour. Regular international flights.

TIME: GMT plus 2 hours. Permanent.

HOLIDAYS: In addition to Sundays, local holidays are: 1st January; Epiphany; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; Holy Trinity; 15th August; 28th October; 12th December; 25th December; Boxing Day.

Cargo work can be arranged on these days subject extra payment of 75%.

POLICE/AMBULANCE/FIRE: In emergency telephone Harbour office 188 or 4511-311. Subsidiary Harbour Department tel. 4612-876. Harbour Guard Aghios Georgios tel. 4612-876 or 4511-311/139. Harbour Guard Drapetzona tel. 4511-311/140. Police tel. 100. Fire service tel. 199.

TELEPHONES: Telephone connection on board can be made.

SERVICES: Compass adjusting, tank cleaning. No facilities for discharge of tank residues.

SHORE LEAVE: Permitted.

SPECIAL PRECAUTIONS: *Ship's Speed in Port:* Incoming or outgoing vessels must keep speed steady, provided weather conditions and vessel's manoeuvrability allow to do so, but never to exceed 5 knots.

Pollution in the Harbour: Throwing overboard of ballast, objects of any kind, oil, food rejects, and dirt in general is strictly prohibited. All such rejects can be jettisoned after ship's exit from the harbour and at a distance not less than 16 miles from the nearest coast. Alternatively, all such rubbish can be thrown in a special rubbish-collecting vessel in the port.

Sea Pollution by bunker oil or sediments: The jettisoning of oil products generally in any port or roadsteads less than 50 miles from the coast is strictly prohibited. Similarly prohibited is the pollution of the sea by jettisoning of oil-sediments during dry-docking or repairs of vessels.

Pollution of the Air: Strictly forbidden is the de-sooting of boilers of all vessels at Greek ports. Similarly prohibited is the exit of gases in the form of smoke, which poisons the atmosphere and endangers public health.

Overloading: If upon arrival or sailing the port authorities ascertain overloading of the vessel, heavy fines are imposed.

AUTHORITY: Central Piraeus Harbour Office, Second Harbour Department.

PYLOS: 36.55 N. 21.42 E.

(Including Sfaktiria and Navarino Bay)

DOCUMENTS:

For Port Authorities.

1. For ships under the Greek flag and foreign flag vessels of Greek ownership.
   Inspection of all Ship's Papers.
   7 Crew Lists with full details of crew members' home addresses.
   For passenger vessels – 6 Passenger Lists including passport details, that is, number, date of issue and nationality.
2. Foreign Flag Vessels.
   Inspection of all Ship's Papers.
   3 Crew Lists.

For Customs

Crew Personal Effects List.
1 Crew List.
Passenger List.
Lists of goods or effects to be sent ashore.
3 Lists of Stores and Spares.
Bills of Lading.
Cargo Manifest.

PILOTAGE: No Pilot station. There is a private Pilot employed by the bunkering company named G. Mamidakis Limited. Agent and/or bunkering company should be advised in advance of vessel's ETA order arrange Pilot to meet vessel at entrance of Navarino Bay and take vessel to oil installations at Sfaktiria Bay. ETA should be passed by radio telephone at least 48 hours before arrival and thereafter confirming ETA within 24 hours of arrival. If ETA has not been passed by radio, vessel should wait at entrance to Navarino Bay, and request Pilot by signalling letter "G" by flashing light or ship's whistle.

ANCHORAGES: Safe anchorage may be made in all areas of Navarino Bay except within red sector of Helonaki Islet light.

MAX. SIZE: Any size vessel can enter and anchor in Navarino Bay. The small harbour of Pylos is only suitable for small vessels.
HEALTH: Doctor visits vessels that require free pratique, and those coming from infected ports. Master and Health Officer together sign Maritime Declaration of Health. Free pratique continues when vessel arrives from another Greek port. A vessel in transit must have free pratique if remaining in port more than 24 hours. Infected vessels or suspected vessels remain under quarantine in accordance with existing health regulations.
RADIO: Athinai Radio – OTE.
TUGS: No tugs available.
STEVEDORES: Labour requirements passed by radio at least 24 hours prior arrival. No shore loading/discharging facilities and this work effected by ship's gear. Average rate load/discharge 100 tons per gang every 8 hours.
MEDICAL: Agent should be advised by cable prior arrival of medical and medicant requirements. There are two chemists and a Red Cross hospital. Yellow-fever, cholera and smallpox vaccination certificates required.
TANKERS: Sfaktiria Island Installation (ESAPP. G. Mamidakis Limited). 2 flexible hoses diameter 6 in. and 1 gas oil hose diameter 2.5 in. No facilities for residue discharge. At Pylos small harbour there is jetty 100 m. length, the head of which is reserved for small tankers carrying wine and spirits, which moor stern to quay. At head of pier, depth of water about 4 m., but within short distance from pier, depth increases to 10 m. Only 1 vessel of 12 ft. to 15 ft., draft can moor stern to quay at any time. Loading/discharging is effected through flexible and portable pipe-lines belonging to Gialovi Wine Factory at Pylos, and cargo is transported by special tank trucks.
DENSITY: 1023 in harbour basin and whole of Navarino Bay.
FRESH WATER: Master or Agent must apply in writing to Customs Authority, and application is to include notice from water supplier giving quantity to be supplied and cost of supply. Water barge capacity 200 tons. Rate of supply 160 t.p.h. by canvas hoses. Barge belongs to Maritime Agency I. Vrettakos, Pylos. Water also available alongside Pylos harbour quay.
FUEL: Mamidakis Fuel Installations at Sfaktiria Island. Vessels should give 48 hours notice to Mamidakis (Athens Office, address: Eleftheriou Venizelou 56; Tel. 622543 Tel. 284) Pylos Tel. 22282.
FIRE PRECAUTIONS: No unusual fire precautions at Sfaktiria Installations, but at main port of Pylos authorities do not allow loading/discharging of 2 vessels at same time, as the only 2 berths available are very close to each other.
DEVELOPMENTS: Work in progress to extend existing Pylos harbour pier to 215 m. length, 20 m. width, and 15 m. depth at head of pier. Depth inside pier to be 10 m.
WATCHMEN: Usually not necessary to employ watchmen, but if required, available.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 2 packets of cigarettes per crew member/day allowed out of bond according to duration in port and this quantity to be declared on Stores List. Store orders for supply of additional quantities are allowed on the basis of the number of crew and the length of voyage, basis 2 packets per day per crew member. 1 opened bottle wine/spirits allowed out of bond.
IDENTIFICATION CARDS: Shore passes issued against submission of seamen's books.
REPAIRS: 3 workshops for minor repairs.
REPATRIATION: Crew changes and repatriation facilities available.
AIRPORT: Kalamata Airport, 40 km. from Pylos. Kalamata/Athens flights every day at 17.50 hrs. Athens/Kalamata every day flights at 19.10 hrs.
TIME: GMT plus 2 hours permanent.
HOLIDAYS: *(a)* Standard Government Holidays; *(b)* Local holidays: 9th May (St. Nicholas) holiday for port workers; 24th September; 20th October (Anniversary of Battle of Navarino). During these holidays, cargo work can be arranged subject overtime payment.
POLICE/AMBULANCE/FIRE: Police (Pylos) 223-16; Greek Red Cross Hospital Pylos 223-15; Kalamata Fire Brigade 28373.
TELEPHONES: No facilities for placing on board.
GENERAL: Very severe fines imposed on oil pollution.
SHORE LEAVE: Allowed.
AUTHORITY: Port Authority of Pylos.

RHODES (including Akantias): 36.25 N. 28.17 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Cargo Manifest.
1 Stores and Provisions List.
Usual Ship's Documents.
PILOTAGE: 24 hours notice required by Rhodes Port Authority. Pilot boards 1 mile from port.
ANCHORAGE: Suitable anchorage up to a distance of 300 m. from the port East of the pier extension.
RESTRICTIONS: Port entry can be difficult and sometimes impossible with strong North or N.E. winds.
MAX. SIZE: Up to 24 ft. draft.
RADIO: Rodos Radio, 2182 kc/s.
BERTHING: Pilot will advise Master of berthing place in accordance with Port Authority instructions.

2 diesel motor-driven cranes capacity 2 and 3 tons available for discharging. No facilities for containers.
STEVEDORES: 24 hours advance notice required in order to arrange gangs.
MEDICAL: General hospital and private clinics available.
FRESH WATER: Available – supplied by canvas hoses.
FUEL: Deliveries only by tank trucks.
DEVELOPMENTS: Extension of the Merchant Port Pier by 110 m. to North and 140 m. to S.E. Also an extension of the new harbour (Akantias) pier, to the East of the Marine Harbour. Length to be 480 m. with a depth of 6.5 m. alongside.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 60 cigarettes per day per crew member and 1 bottle wine/spirits per crew member allowed out of bond.
CONSULS:

Germany	Tel. 7479	France	Tel. 2318
Italy	,, 7432	Turkey	,, 3362
Sweden	,, 3379		

REPAIRS: Minor repairs only.
AIRPORT: Distance 15 km/s. During Winter, flights twice daily to Athens, and during Summer, flights 5 times daily.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: 1st January, 6th January, 7th March, 25th March, Good Friday, Easter Monday, 21st May, 15th August, 28th October, 8th November, Christmas Day, Boxing Day.
POLICE/AMBULANCE/FIRE: Police, tel. 7690 or 2220; Ambulance, tel. 2555; Fire Brigade, tel. 3333.
DELAYS: Sometimes necessary to remain outside harbour up to 3 hours to allow coastal passenger vessels to berth if other berths are full.
AUTHORITY: Central Port Authority of Rhodes.

SUDA BAY, Crete: 35.29 N. 24.09 E.

PILOTAGE: Compulsory. Naval Pilot boards West of N. Soudha Island.
ANCHORAGE: Good anchorage for any size vessels.
TANKERS: Marathe POL Depot has wooden-faced concrete jetty. 10 in. discharge lines. No bunkers. No slop discharge facilities.
FRESH WATER: Available by barge.
GENERAL: Cargo pier depth up to 32 ft. alongside, also grain silo with similar depth alongside.

SYROS: 37.26 N. 24.56 E.

DOCUMENTS: *Ships under the Greek flag* – documents required are:
Ship's Register.
Seaworthiness Certificate.
Log Books and Ship's Papers.
Load-line Certificate.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
2 Passenger Lists.
Ships under foreign flag, Greek owned – documents required are:
Ship's Articles.
Load-line Certificate.
Seaworthiness Certificate.
Ship's Papers.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
1 Passenger List.
Ships under foreign flag – documents required are:
Seaworthiness Certificate.
Fumigation Certificate.
Load-line Certificate.
Radio Station Licence.
2 Crew Lists.
1 Passenger List.
PILOTAGE: Pilot to be ordered by ship's Agent at least 24 hours before arrival notifying approximate ETA. Pilot boards from private motor launch, about 0.5 miles off the port, weather permitting. In bad weather Pilot boards in harbour entrance.
ANCHORAGE: Vessels awaiting Pilot anchor outside the harbour South of a line between the green breakwater light and the North end of Gaidaros Island. Anchorage in the Southern part of the harbour in depths of 20–30 m.
MAX. SIZE: Length 200 m. Vessels of small draft may go alongside the Neorion Pier or moor stern to the pier. Deeper-draft vessels remain at anchor in the harbour.
HEALTH: Free pratique is given when ship's declaration of health has been endorsed by a Health Officer.
RADIO: Loutsa Radio.
TUGS: 2 tugs available. Tugs usually join vessel 1 mile from harbour entrance. Payment for use of tug-line is obligatory.
STEVEDORES: At least 1 day's notice required to arrange gangs.
MEDICAL: No advance notice required if medical assistance needed. Hospital and general clinic available.
TANKERS: Discharge alongside terminal of A. E. Seica at Lazareta, near the entrance to the harbour.
DENSITY: 1026.
FRESH WATER: Limited quantity can be supplied by private company. Delivered by barge.

FUEL: Can be supplied by A. E. Seica, by barge or pipe-line.
WATCHMEN: Not required.
HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCE: Each man allowed 40 cigarettes per day for period not exceeding 5 days. Each man allowed 1 opened bottle of spirits. No restrictions for wine.
IDENTIFICATION CARDS: Shore passes are issued on production of seamens books or passports.
CONSULS: France – tel. 3–62. Netherlands – tel. 7–20.
REPAIRS: Neorion Syros Shipyards can undertake any kind of engine and hull repairs and alterations. Holds LTC licence for piston reconditioning.
DRY DOCKS: Two floating docks, one for ships up to 20,000 d.w.t., and one for vessels up to 75,000 d.w.t.

Dimensions of larger dock; 210 m. length over keel blocks; 36.20 m. inner width; 17.40 m. moulded depth.

DEVELOPMENTS: Port being dredged to permit entry of larger vessels. Shipyard installing facilities for building vessels up to 15,000 tons.
REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours all the year round.
REGULATIONS: Port Captain should be contacted for any queries not covered by lists of regulations provided on arrival.
HOLIDAYS: Work may be arranged on all holidays on payment of 75% additional to tariff.
POLICE/FIRE/AMBULANCE: Police tel. 6–10; Fire 3–33; Ambulance 5–55.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew may go ashore after pratique is given, carrying shore leave passes issued by Port Authority.
AUTHORITY: The Harbour Office of Syros.

THESSALONIKI (Salonica); 40.38 N. 22.56 E. (See Plan Book)

PORT LIMITS: A vessel is considered as an "arrived vessel" when she has passed the line connecting the Small Kara Point and Paliomanna light buoy.
DOCUMENTS: For Greek flag and Greek-owned vessels:

List of Foreign Exchange.
Crew list (additional for Port Authority).

All vessels:

4 Crew Lists (Port Authority, Customs, Immigration and Health).
1 List of Stores.
1 List of Personal Effects.
Copies of Bills of Lading and Cargo Manifest.

PILOTAGE: Apply for Pilot through VHF Channel 12 or by international code signals. Pilot meets vessel about 1,000 m. S.E. of breakwater light (white). Pilot boat is small motor-boat carrying pilot flag.
ANCHORAGES: Area from 500 to 1,000 m. S.E. of port offers safe anchorage.
MAX. SIZE: Average safe depth of water 10 m. 2 berths of 35 ft. depth. Also see "Tankers".
HEALTH: Health Officer boards vessels from foreign ports to grant free pratique.
RADIO: Radio Thessalonika. 24 hours notice of ETA required to obtain berth and stevedores.
VHF: Operative throughout 24 hours on Channel 12, Central Port Authority.
TUGS: Available from private company.
MEDICAL: Advance notice not required – all facilities available.
SPECIALISED CARGO HANDLING FACILITIES: The port has silos of capacity 20,000 tons.

AGET Installation: 1 berth for discharging cement in bulk by special constructed ships equipped with automatic discharging gear. Max. draft 30 ft.

CRANES: 36 electrically driven berth cranes of 3–27 tons capacity. 20 mobile cranes of 9–30 tons capacity. 1 floating crane of 70 tons capacity.
TANKERS: 1. *Esso-Pappas installation. (a)* Sea Island berth capable of accommodating 2 vessels of 24,000 tons and 14,000 tons respectively. Max. draft 32 ft. 8 lines, diameter 16 in. (1). 10 in. (3), 4 in. (3), 6 in. (1). *(b)* 7 buoy mooring for vessel of up to 80,000 tons. Max. Draft 44 ft. Submarine 34 in. pipe-line for crude oil discharge. 2 flexible discharge lines 10 in. diameter.

2. *Mamidakis' Installation.* Stern discharge berth. Max. draft 32 ft. 2 submarine lines enable 2 grades of cargo to be discharged through 8 in. line at 200 t.p.h. and 6 in. line at 160 t.p.h.

3. *Ethyl Oil Berth,* length 320 m., depth alongside 10m.

DIRTY BALLAST: 2 tanks of 600 tons each and 1 of 6,000 tons are available for the reception of dirty ballast at Esso-Pappas installation.

The discharge overboard of any oil or oil contaminated water is strictly forbidden and every precaution must be taken to avoid pollution.

DENSITY: 1025.
FRESH WATER: Unlimited supplies available.
FUEL: Unlimited quantities available. Usual notices required. Suppliers B.P., Shell, Esso-Pappas, Mamidakis.
FIRE PRECAUTIONS: Safety tug in position at tanker installations.
DEVELOPMENTS: *(a)* Channel. Dredging in progress to enable any size vessel to enter port. *(b)* Construction of sixth jetty, length 1,000 m., width 600 m. Will be used as a container terminal. Expected to be completed in 1978.
WATCHMEN: If required, cost by private negotiation.
HATCHES: Opened/closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed out of bond for each Crew member.
CARGO GEAR: Adequate shore gear available.
IDENTIFICATION CARDS: Passes issued to Crew members of foreign vessels.
CONSULS:

U.S.A.
France
Denmark
Italy
S. Africa
Turkey
Austria
Germany
Switzerland
U.K.
Netherlands
Finland
Belgium
Yugoslavia
Japan
Norway
Sweden

REPAIRS: Only minor repairs.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: Distant 12 km/s. S.E. of town. 6 flights daily to Athens.
TIME: GMT plus 2 hours. Permanent.
HOLIDAYS: (National): 1st January, 6th January, 25th March, Good Friday, Easter Monday, 21st April, 1st May, 15th August, 28th October, Christmas Day, Boxing Day. (Local): 26th October. Work may be arranged on holidays at double costs.
POLICE/AMBULANCE/FIRE: Port Police, tel. 531-502; Ambulance, tel. 531-531; Fire, tel. 199.
TELEPHONES: Facilities available for placing on board.
SHORE LEAVE: Permitted without restriction. For tankers, the Master should arrange transport with Agent for seamen to the landing pier in Thessaloniki Harbour. Seamen will not be permitted to pass through refinery area.
AUTHORITY: Port Authority of Thessaloniki.

VOLOS: 39.21 N. 22.56 E. (See Plan Book)

DOCUMENTS: See Piraeus.
PILOTAGE: Pilot boards about 1 mile outside port. Pilot boat is small launch coloured grey and black.
ANCHORAGE: Suitable anchorage situated 1–2 miles outside harbour in depths of 14 to 20 m.
RESTRICTIONS: Vessels in excess of 10,000 tons unable enter at night.
MAX. SIZE: Max. draft 36 ft., no limitation on length or breadth.
HEALTH: Port Officer acts as Health Officer and pratique effected on doctor's advice. If arriving from another Greek port, pratique automatic.
TUGS: Join vessel at entrance to harbour. 3 tugs, 150 h.p., 240 h.p., 1,080 h.p.
BERTHING:

Dock	*Length*	*Depth*
K	600 m.	8.0 m.
1	1,000 m.	11.0 m.
11	980 m.	11.0 m. (under construction)
R	270 m.	7.0 m. (under construction)

CRANES:

1 Mobile crane	— Capacity 35 tons
3 Mobile cranes	— Capacity 10 tons
3 Crawler cranes	— Capacity 4 tons
1 Rail mounted crane at Dock 1	— Capacity 27 tons at 17 m. and 16 tons at 30 m.
Cranes under construction:	
Dock 1 4 cranes	— Capacity 8 tons at 20 m. and 6 tons at 25 m.
Dock 11 2 cranes	— Same capacity as Dock 1

BULK HANDLING FACILITIES: 2 silos, capacity 15,000 tons, loading ability 370 t.p.h. Discharging ability 250 t.p.h.
STEVEDORES: Advance notice required order arrange gangs. No shore gear and all cargo operations handled with ship's gear.
MEDICAL: Advance notice of required medical attention is necessary. Hospital and medical facilities available.
TANKERS: One berth; depth alongside 27 ft.
FRESH WATER: Only available at main pier and silos pier.
DEVELOPMENTS: New piers under construction.
HATCHES: Usually opened and closed by crew, but if by stevedores, additional costs apply.
CUSTOMS ALLOWANCES: 1 to 2 packets cigarettes allowed per crew member per day. 1 bottle wine/spirits allowed out of bond.
CONSULS: Germany, tel. 25379, France, tel. 25870, Sweden, tel. 27662.
REPAIRS: Minor repairs can be effected.
AIRPORT: Situated at Anchialou. 2 weekly flights to Athens.
TIME: GMT plus 2 hours, Winter. GMT plus 3 hrs. in Summer.
HOLIDAYS: Usual Greek holidays. Local holiday 6th December; cargo work can be arranged subject to additional cost with the exception of 6th December.
POLICE/AMBULANCE/FIRE: Police, tel. 24500; Ambulance, tel. 27531; Fire, tel. 5000.
SHIPMASTER'S REPORT: 1977.

Restrictions: Draft restrictions on new quays subject to maximum depth of water of 32 ft. and on the original town quays a maximum depth of water of 28 ft. East side, 26 ft. West side, 24 ft. Head. (Thus draft will have to be about 2 ft. less than depth.)

Stevedores: Working hours 0730 – 1400 hrs. and 1400 – 2100 hrs. on overtime.

Berths: Town quay with approx. 750 ft. frontage on each side and cross berth approx. 385 ft. on end. New 'L' shaped berths with base to the shore with approx. 1,525 ft. East, 1,230 ft. West, 500 ft. End of frontage on South side, 500 ft. on end, two of approx. 500 ft. on inside of L.

Pollution: Port regulations prohibit the scraping and scaling of ships side and the pollution of sea or port area by painting.

AUTHORITY: Port Authority of Volos.

YALI ISLAND: 36.38 N. 27.07 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Cargo Manifest.
Bills of Lading.
List of Ship's stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: A Mooring Master is available from Piraeus. Mooring Master boards at the anchorage.

ANCHORAGE: Safe anchorage in the roads except in strong Southerly winds.

MAX. SIZE: Length 250 m., draft 33 ft.

HEALTH: Port authorities will board by launch from Nissyros to arrange free pratique. Any sick crew members will be disembarked to Nissyros by the same launch.

TUGS: Not available.

BERTHING: The vessel is moored at loading berth on 8 buoys in addition to port anchor. During loading operations the vessels have to be shifted from hatch to hatch.

The facilities of loading consist of a cement pylon holding a horizontal chute-conveyor belt of about 50 ft. length. This chute-conveyor belt is fed from ashore by rotating buckets of 1.3 tons each. The vessel has to be at a distance of about 40 to 50 ft. from the cement pylon in order to load the holds.

STEVEDORES: Workers are employed by private loading company.

MEDICAL: Nearest medical and hospital facilities are at the island of Kos, 7 miles north of Yali.

FRESH WATER: None available.

FUEL: Not available.

HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of spirits are allowed each man.

CONSULS: No local representation.

REPAIRS: No facilities exist.

AIRPORT: Nearest at Kos with daily flights to Athens during the Summer. 4 flights a week during the Winter.

HOLIDAYS: Do not affect vessels loading.

SHORE LEAVE: Allowed.

AUTHORITY: Clerk of Mandraki, Port of Nissyros. Yali Quarry Manager.

NOTES

Please also advise Shipping Guides Ltd.

Greenland

GENERAL:

CUSTOMS: The Master is not allowed to distribute tax-free cigarettes or other tax-free tobacco in a Greenland port.

DOCUMENTS: Following documents must be on board:

Speed Certificate.
Crew List.
Radio Station Certificate.
Safety Equipment Certificate.
Clearance Certificate.
Health Declaration.
Tonnage Certificate.
Certificate of Registry.
Deratisation Certificate.
Sailing Orders.

RESTRICTIONS: Foreign-flag vessels do not normally have access to Greenland ports unless they have special permission. If such vessels have this permission, the crew may go ashore subject approval of Port Authorities and following presentation of Health Certificate or a medical check on board.

ICE INFORMATION: Ice Centre Narssarssuaq is transmitting daily at 1200 hrs. GMT and 2200 hrs. GMT the latest information of the ice in Southern Greenland Waters. Information is transmitted in Faximile (Mufax) on frequency 2780 and 6970 kc/s drum speed 120. Ships can, free of charge, request telegraphic ice information from following coastal radio stations:

OZL—Angmagssalik
OZN—Prins Christian Sound
OXF—Julianehab
OZA—Frederikshab.

WATCHMEN: Ship is required to appoint a crew member as ship's guard on board.

TIME: GMT minus 3 hours. Permanent.

HOLIDAYS: As applicable to Denmark.

CONSULS: None.

WORKING HOURS: Normally from 0600 hrs. to 1800 hrs. with 2 meal breaks.

RADIO: In ports where there is a local radio station, vessels are prohibited from using ship's station for sending messages.

HEALTH: Before commencing voyage to Greenland, at the port of departure, Master is required to obtain a Health Certificate from an authorised medical practitioner, stating that there are no dangerous or contagious diseases on board, such as pest, cholera, yellow-fever, smallpox, or typhus. The crew list is to be included in this certificate stating that there are no venereal or other contagious diseases amongst the crew members. The Health Certificate is only valid if it has the stamp and signature of the Royal Danish Consul or Vice-Consul of the district in which the port of departure is situated. On arrival at the first Greenlandic port, the Master is to present the Health Certificate to the Port Authorities. Health Certificate may also be issued by a doctor in the first Greenland port of call.

REPORT: Immediately upon arrival of a vessel in Greenland, the Master must report to the Port Authorities.

WASTE DISPOSAL: It is forbidden to throw waste material of any description overboard into port waters.

EGEDESMINDE: 68.43 N. 52.53 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Roadstead, Inner Port (inside Bay), Anchorage, Boat Port, and Atlantic quay.

DAYLIGHT: Polar darkness from 2nd December to 11th January, and midnight sun from 22nd May to 23rd July.

CONDITIONS: *(a)* Current: flows Eastwards between the islands at Egedesminde from 3 hours before, to 3 hours after high water, following which, current flows Westwards for 6 hours. *(b)* Ice: Winter ice normally occurs from mid-December to early May, but can occur earlier, in November. New ice in the port can be up to 60 cm thick; 1st January covering ice up to 30 cm and by 1st February about 45 cm. Icebergs sometimes enter port area and stop all shipping movement. *(c)* Tide: high tide height 2.6 m. (max. 3.1 m.). Low tide height 1.5 m. Direct West wind causes 0.3 m. rise above tidal height, and South or S.E. wind about 0.5 m. below.

PILOTAGE: No official port Pilot, but assistance arriving and sailing may be obtained from a local seafarer having good knowledge of the area. This local assistance should be ordered if required in ETA cable to Port Authority at least 24 hours prior arrival. The Port Manager usually acts as local expert as part of his normal duties.

There is VHF radio installation in office of Port Authority and it is usually possible to obtain VHF contact within 30 miles of Egedesminde.

Local area expert will board vessel from port boat at meeting place usually arranged just outside entrance to port.

No special pilotage regulations and no Outer Anchorage where Pilot may be taken on board. However, in waters North and N.E. of port entrance vessels may stop or proceed at very slow speed in order to embark local expert.

ANCHORAGES: No special anchorages, and vessel is only allowed to anchor for a short period at the entrance to port subject permission of Port Authority.

MAX. SIZE: Largest vessel to berth alongside Atlantic quay was length 136 m., breadth 20 m., draft 6.2 m.

ENTRY: Day or night.

TUGS: None. 2 port boats to take lines and assist mooring.

RADIO: Godhavn Radio. RDF station beacon East of the town. Radio link between Egedesminde and Transitoen, and between Transitoen and Roeveo.

BERTHING: Atlantic quay. Length 70m., depth alongside 8.1 m., at medium low tide and 10.7 m., at medium high tide. Height of quay at medium tide about 1.5 m., above w/l. One 5-ton mobile crane and some fork-lift trucks used in discharging.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available at Atlantic quay and at tank-station.

FUEL: Only gas-oil available for local fishing vessels from the tank-station.

REPAIRS: Minor repairs possible. Slip for small vessels (250 tons).

AIRPORT: Heliport.

SALVAGE: Salvage-station in the area.

SERVICES: Radar and radio technicians available.

AUTHORITY: Director of Commerce.

FAERINGEHAVN: 63.41 N. 51.34 W.

(Also see "General Information" at beginning of Greenland Section).

DOCUMENTS: Bill of Health: Doctor's certificate mentioning each member of crew by name to be free of contagious diseases. This document to be signed by Consulate in the port of delivery to be prepared by competent authority, passengers excluded. One Manifest with Bill of Lading. Ordinary Ship's Papers.

PILOTAGE: As a rule Pilot can be ordered in the months May–October, notice 12 hours before arrival is required.

ANCHORAGE: Inside fjord area.

RESTRICTIONS: None.

MAX. SIZE: Oil-carriers about 26,000 d.w.t., draft 40 ft. Ordinary cargo-ships 20 ft.

HEALTH: Captain to apply with documents at harbour office for free pratique.

RADIO: Faeringehavn Radio: OYU, or Godthab Radio: OXI, connected Faeringehavn by Telex and Telephone.

VHF: Oil company and fishing company are listening on VHF during working hours.

TUGS: Salvage tug stationed on West coast of Greenland. Stationed at Faeringehavn May–October, no fixed rates.

BERTHING: Natural port, anchorage for the largest vessels. Wharf, 225 m. with 5 m. at L.W.

STEVEDORES: None, but fishing and service company "Nordafar" may act as stevedores.

MEDICAL: Local sick room and nurse available in Summer. For medical service, apply Godthab.

TANKERS: Load/discharge lines 6 and 8 in. Smaller diameters for bunkering when necessary.

FRESH WATER: Only available May to November.

FUEL: Available. Light fuel, gas oil, aviation turbine fuel A1, gas oil, oct. 97.

GANGWAY/DECK WATCHMEN: Not required (ship's crew).

OPENING/CLOSING HATCHES: Must be carried out by ship's crew.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Small repairs only. Workshop available May to November.

REPATRIATION: Available, via Godthab by air to Copenhagen.

AIRPORT: Nearest airport is Godthab, distance 35 miles regular airlines.

TIME: GMT minus 3 hours.

HOLIDAYS: Danish holidays.

POLICE/AMBULANCE/FIRE: Police tel. Faeringehavn 34; Ambulance Faeringehavn 25.

TELEPHONES: Not available on board.

GENERAL: Bunker station open all year; during Winter-time sometimes difficulties caused by ice.

SHORE LEAVE: Allowed.

DELAYS: Bunker station closes for arrivals between 2200 hrs. and 0600 hrs. local time.

AUTHORITY: Kontrolloren, (Harbour Master).

FREDERIKSHAB: 61.59.7 N. 49.40.8 W.

(Also see "General Information" at beginning of Greenland Section)

LOCATION: The port is in the inner part of a small bay.

DESCRIPTION: Atlantic quay; fishing quay; anchorage.

CONDITIONS: *(a)* Current: none. *(b)* Ice: big ice reaches to the North of the port; smaller ice reaches the port especially to the North, but South of the port it is usually ice-free. The best period of finding the port ice-free is between March and April, and from the end of August. *(c)* Tide: height of average high water is 3.8 m., low water 2.0 m. (max. 2.4 m).

PILOTAGE: Pilot should be requested in ETA cable via Frederikshab radio. Pilot will meet vessel at Satuarssugssuaq (Fyroen).

ANCHORAGE: S.E. of Skarvo. Holding ground is not good and anchoring should be carried out at very slow speed.

MAX. SIZE: Length 100 m., draft about 6 m.
ENTRY: Day or night.
TUGS: None. Port boats assist in mooring.
RADIO: Local radio station. RDF station beacon East of the town.
BERTHING: Atlantic quay. Length 90 m., depth alongside at average low tide, 7 m., depth in harbour about 10 m. Cranes up to 5 tons capacity and fork-lifts trucks used in discharging.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available alongside Atlantic quay.
FUEL: Refuelling quay, depth about 5 m., Gas-oil and diesel oil available.
AIRPORT: Heliport.
REPAIRS: Workshop for minor repairs available. Slip for small vessels (250 tons).
GENERAL: Police Station, Fire Brigade, radar and radio technicians, and service for IFD rubber dinghies: Cable address "Fladeservice FRH".
AUTHORITY: Director of Commerce.

GODHAVN: 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port consists of a mooring inside a bay.
DAYLIGHT: Polar darkness from 25th November to 15th January, and midnight sun between 19th May and 26th July.
CONDITIONS: Ice: Winter ice is fast from November–December until end May or beginning of June. Thickest observed Winter ice is about 100 cm.
ENTRY: Day or night. Port is open from May to November. Between mid-April until May the port can only be used by specialised tonnage.
PILOTAGE: Boarding point arranged with Port Authority in ETA advices.
ANCHORAGE: Good anchorage in the bay – outer port.
MAX. SIZE: Largest vessel to date length 100 m., draft 6.5 m.
TUGS: None. Port boats assist with mooring.
RADIO: Local radio station. RDF Station beacon.
BERTHING: Quay length 12 m. depth alongside 4.0 m. at MLWS. Vessel moors to 2 anchors and stern-lines to the shore. Mobile cranes on shore capacity up to 5 tons. Depths in bay about 6.82 m.
MEDICAL: Hospital. Doctors and dentist available.
GENERAL: Arctic Scientific Station, Fire Brigade, Cable Office.
AUTHORITY: Director of Commerce.

GODTHAB: 64.10 N. 51.44 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Narrow entry to port, but well protected, with good modern berths and anchorages.
CONDITIONS: *(a)* Current: sometimes strong between anchorage and the berths. *(b)* Ice: only very occasional large quantities of ice reach the port and into the fjord. If ice in area South of Godthab, S.W. storms force drift ice into the fjord. In recent years the port has begun to freeze over in Winter, and small vessels have at times become icebound. *(c)* Wind: S. and S.W. storms spring up suddenly but only last for brief periods. *(d)* Tide: height of high water 4.4 m. (max. 5.1 m.); low water 2.1 m.
ENTRY: Port open day and night all year round.
DAYLIGHT: Godthab situated South of the border for midnight sun and Polar darkness.
PILOTAGE: Port Manager normally acts as Pilot for ships, but is not an authorised Pilot. Pilotage may be arranged by VHF contact with Authority during normal working hours.
ANCHORAGES: Good anchorages available inside fjord. Larger vessels should anchor close to Rypeo and in Malene Bugt.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 135 m., breadth 17 m., and draft 7 m.
TUGS: None. 2 port boats to take lines and assist mooring.
RADIO: 24 hours notice of ETA should be passed to Authority, cable address "Handelschefen Gothab". Radio beacon at Kookoerne.
BERTHING: Larger vessels should contact Port Authority before approaching port at night-time. Atlantic quay, length 170 m., has a depth alongside 7 m., approx. for the most Northerly 120 m., and between 4.5 – 5 m. at MLWS for the most Southerly 50 m.

Vessels normally berth starboard side alongside, unless fitted with bow thrusters, when a port side berthing is feasible. Mobile cranes capacity 5 tons.

Schooner Quay is 52 m. long, with a depth of 4.7 m., approx. Vessels normally berth bow Westward.

On the Coastal Passenger Quay length 30 m., depth 5.4 m., vessels usually berth with bow to the North.

There are several other small quays for the use of trawlers, and cutters, and a sand discharging berth length 30 m., depth 5 m.
TANKERS: Tankers can anchor and stern moor out from the gas installations, using an oil pipe-line connection. A mooring arrangement has been established for tankers of 25,000 – 30,000 d.w.t. below the tank and gas farm on the hillside.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Available at Atlantic quay.
FUEL: Small quantities gas-oil available at Atlantic quay.
REPAIRS: Slip for small vessels (40 tons) and minor repairs. Slip for vessels up to 1,860 tons, repairs possible.
AIRPORT: Heliport.
GENERAL: Police, Fire Brigade, radar and radio technicians, radio station post, and cable office.
AUTHORITY: Director of Commerce who also acts as Port Manager.

HOLSTEINSBORG: 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour is situated on Northern side of Tommermandsoen.
CONDITIONS: *(a)* Tide: average height of high tide 3.5 m. (max. 4.4 m). low tide 2 m. *(b)* Ice: Winter ice up to 1 m. thick. Ice normally occurs from December to March or April.
ENTRY: Port open day and night, and normally all year round.
PILOTAGE: Arrange with Authority through Holsteinsborg's radio, cable address "Director of Commerce Holsteinsborg". Pilot meets vessel at Jakobs Skaer, 2 miles S.W. of Mollersoe.
ANCHORAGE: Large vessels can anchor outside port and discharge into barges.
MAX. SIZE: Largest vessel that can berth alongside Atlantic quay, length 136 m., breadth 20 m., draft 6.2 m.
TUGS: None. Port boats take lines and assist mooring.
RADIO: Local radio station. VHF connection in Port Director's office. Radio technicians available, cable address "Polar Radio".
BERTHING: Atlantic quay, length 60 m., depth alongside 6 m., at average low water. Height of quay 2 m. above w/l. If berth occupied, loading/discharging of larger vessels at anchorage with barges. At Atlantic quay there is a mobile crane with capacity of 3 tons and fork-lift trucks. Belt conveyor for coal.

Offshore Quay: Length 20 m. with depth of 6 m. at LW.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable at Atlantic quay.
REPAIRS: Slip for small vessels (250 tons) and minor repairs.
AIRPORT: Heliport.
GENERAL: Post and cable offices. Telephones not normally available for connection on board, but vessels at anchor can call Port Director's office on VHF during daytime.
AUTHORITY: Director of Commerce who acts as Port Master and Harbour Master.

IVIGTUT: 61.12 N. 48.10 W.

(Also see "General Information" at beginning of Greenland Section)
OPERATORS: A/S Kryolitselskabet Oresund.
CONDITIONS: *(a)* Current: strongest about 3 hours before and 3 hours after high water, and vessels arriving and sailing should take this into consideration. *(b)* Tide: height of average high tide 3 m. (max. 3.4 m.), low tide 1.6 m. *(c)* Wind: calm for about half the year otherwise winds are usually from South or S.E. The dangerous winds for moored ships are the infrequent storms from North or N.E.; these storms seldom occur but if they do occur they do so in the Autumn. *(d)* Ice: Winter ice usually occurs from December onwards in the fjord outside Ivigtut and disappears in the beginning of April. Outside Ivigtut Winter ice always occurs, sometimes reaching a thickness of about 1 m. Information concerning ice conditions always obtainable on telegraphic request to GLK.
ENTRY: Day and night and usually all year round.
PILOTAGE: No official Pilot but an acting Pilot can be arranged through connection with Port Authority, cable address "Manager Ivigtut", at least 24 hours prior arrival.
MAX. SIZE: Largest vessel to have berthed at Kryolit pier was length 102 m., breadth 14 m., draft 6.2 m.
TUGS: None. Motor-boat will assist mooring.
BERTHING: Kryolit quay, depth alongside about 7 m. height of pier about 2 m. above w/l. Berthing during daylight only. Kryolit not exported from mid-December to end March. Crane capacity 3 tons.
RADIO: The radio station at Ivigtut is closed but telephone connection to radio station at Gronnedal.
FRESH WATER: Available.
FUEL: Deliveries of small quantities of gas-oil.
REPAIRS: Machine tool workshop. Diver assistance obtainable.
MEDICAL: Hospital in Ivigtut, but doctors and dentists are in Gronnedal.
AUTHORITY: Ivigtut Cryolite Mines.

JAKOBSHAVN: 69.13 N. 51.06 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Port is a narrow open bay, entrance to the N.W., having outer port and inner port. In outer port is Atlantic quay and bunkering station, and inner port has another quay and a fishing harbour.
CONDITIONS: *(a)* Tide: height of average high tide 2.8 m. (max. 3.3 m.) low tide 1.6 m. *(b)* Wind: usually East to N.E. In Autumn winds are strong especially in the morning. *(c)* Ice: impression can be gained when approaching port that port is closed due to icebergs. On closer approach channels between icebergs will be found but if these openings appear too narrow a wider passage should always be found to the North. *(d)* "Kanele": a natural phenomenon that occurs at this port causing regular and heavy swell, height up to 2 m. Wave characteristic, long and flat, frequency about 6 minutes. Pilot should be consulted for full information.
ENTRY: Port usually open day and night, from mid May to end November.
DAYLIGHT: Polar darkness between 1st December and 12th January and midnight sun between 21st May and 24th July.
PILOTAGE: A Pilot should always be used by larger vessels and request made to Port Authority in ETA cable. Pilot boarding place to be agreed with Authority.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 93 m., draft 6.8 m.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Outer port depth 6.5/7 m., inner port 5.5/6 m. Atlantic quay length 40 m. Depth alongside Atlantic quay 7 m. at average low tide. Height of quay about 1.1 m. above w/l. Permission to enter port should be obtained prior arrival from Port Authority. Mobile crane capacity 5 tons, also fork-lift trucks.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable alongside Atlantic quay.
AIRPORT: Heliport.
REPAIRS: Machine workshop. Crane for lifting small vessels, capacity 50 tons.
GENERAL: Police, Fire Brigade, Port and cable office.
AUTHORITY: Director of Commerce who acts as Port Manager.

JULIANEHAB: 60.43 N. 46.02 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Port is an open bay, facing South with Atlantic quay.
CONDITIONS: *(a)* Current: flows N.W., but in Southern part of port from little current effect. *(b)* Tide: average height of high tide 2.8 m. (max. 3.2 m.); low tide 1.4 m. *(c)* Ice: drift ice between January and July occasionally fills whole port. *(d)* Wind: the most frequent wind is from East or N.E., normally occurring as storms during Winter months and as strong winds in Summer. Winds can be violent and cause rapid rise in temperature. Very secure moorings are advisable.
PILOTAGE: Port office is equipped with VHF which should always be used to contact Port Authorities before arrival, and to arrange Pilot's boarding position.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 100 m. and draft 6 m.
ENTRY: Port open day and night normally throughout year, but from 1st January to 1st August, only available to specially constructed tonnage.
TUGS: None. Port boats take lines and assist mooring.
RADIO: Local radio station. Radio beacon station at Simiutaq about 10 miles West of entrance to Julianehab Fjord.
BERTHING: Atlantic quay – length 60 m., depth alongside between 7/9 m. on average high tide and 1 quay, length 60 m., depth alongside 4.8–7.2 m. for small vessels. Height of quay is 1.3 m. above w/l. Mobile cranes, lifting capacity up to 5 tons.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available from Atlantic pier during Summer months.
FUEL: Gas-oil available at Atlantic pier.
REPAIRS: At repair quay there is a stationary crane lifting capacity 35 tons. Slip for small vessels (250 tons) and minor repairs.
AIRPORT: Heliport.
AUTHORITY: Director of Commerce – acting as Port Manager.

MARMORILIK: 71.07 N. 51.17 W. (See Plan Book)

DOCUMENTS:
International Load Line Certificate.
Safety Raid Certificate.
PILOTAGE: Optional for coastal vessels entering Davis Strait. Agents are to make arrangements if Pilot required.
GENERAL DESCRIPTION: The berth is located at the North end of the West side of Agfardlikavsa Fjord.

Agfardlikavsa Fjord, West Greenland, (entrance approximately 51° 18′ W. and 71° 08′ N.) is located at the end of the larger Qaumarujuk Fjord.

Qaumarujuk Fjord, the Northeastern arm of Ingnerit, has its entrance between Qegertanguit and the Western extremity of Akuliarusikavsak, a mainland projection about 2.5 nautical miles S.E. Ingnerit is one of the largest of the branch fjords and flows into Umanak Fjord. It is entered between Tuperssuatsiait, the S.E. extremity of the Alfred Wegener Peninsula, and Akuliaruseq, a point about 4 miles S.S.E. The waters of the Umanak Fjord flow into the Nordost Bay.

The Agfardlikavsa Fjord is separated from the Qaumarujuk Fjord by a shallow, narrow bar. Depth at the centre of the sill is approximately 30 m.

There is a considerable surface water run-off along the Fjord walls including occasional rock slides. The bottom of the Fjord is filled with 6 to 8ft. of fine silty materal.

Marmorilik (71° 08′ N., 51° 18′ W.) lies on the S.E. side of the Qaumarujuk Fjord at the Western entrance point of the Agfardlikavsa Fjord.

The larger fjords and Nordost Bay are encumbered with islets and rocks requiring extreme care in navigation. In particular, a shoal is known to exist some 350 m. N.W. of Marmorilik Point and extra care is required in this vicinity.
ANCHORAGE: There is an anchorage at Agfordlikowsa in depths of 20 to 35 m. Tankers can anchor near the berth in depths of 24 to 50 m., but must be aware of an unmarked 6m. shoal about 300°True, and 375 m. (approx.) from the discharge point.
MAX. SIZE: Max. d.w.t. 36,500. Min. depth alongside ore terminal is 12.5 m. at LW.
RADIO: Ship-to-shore communications will be maintained using the following frequencies: 2182 kHz, 2210 kHz and 2738 kHz.

Information on ice conditions in the fjord can be obtained from shore personnel. During loading operations, Greenex will supply the vessel with 2 portable radio transceivers for communications between the carrier and the loading control station.
TUGS: 1 tug available, 720 h.p. The tug will assist with berthing and unberthing if required, and will break up any thin ice in the vicinity of the berth and entrance to the fjord.
BERTHING: The Marine Terminal is used for loading ore carriers up to 36,500 d.w.t. The berth consists of 4 breasting dolphins with bollards for springs and breast-lines. On the shore are 7 bollards for head and stern lines spread over a distance of 366 m. The min. depth of water alongside is 12.5 m. at LW.

Vessels normally berth port-side alongside and use the starboard anchor to assist in berthing. No. 1 hatch is lined up under the loader as it is the first hatch to be loaded.

Initially the headlines go to the Northernmost dolphin and stern lines to the Southernmost bollard on the shore.

Loading: Zinc and lead are loaded with a luffing and slewing ship-loader. The ship-loader is fitted with a 20 ft. conveyor to distribute the cargo in the hold. Communication is maintained between the vessel and control room by portable radios. The average loading rate is 500 metric t.p.h.

Notice of readiness will not be accepted at time of arrival at the dock unless the vessel is in all respects ready to load.

General Cargo: Unloaded into barges with vessel's gear and towed ashore to a separate lightering dock located about 500 m. N.E. of the ore terminal.
MEDICAL: Emergency medical and dental treatment can be arranged and should, when possible, be requested by the vessel's Master in his ETA message to the mine site office.
TANKERS: Diesel fuel oil and turbo-fuel are stored in a tank farm located on-shore about 500 m. West of the point at Marmorilik on Qaumarujuk Fjord, at an elevation of 50 m.

Vessels usually berth using both anchors, 5 shackles on the port anchor, and about 4.5 shackles on the starboard anchor, using a heavy chain from the stern to the S.E. point of the oil installation. The chain is available from the shore. Tankers can also moor to the N.N.W. of the oil installation, but must remain outside the 6 m. line.

The tanker hoses are connected to an 8-inch flange connection for diesel oil or a 4-inch hose adaptor with dust-cap for turbo-fuel. The static head on the lines is about 70 m when the tanks are full. An anti-static cable is provided.

On the shore, there are two 50-ton bollards and one 20-ton stock. No breasting or mooring dolphins are provided.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: No facilities.
TIME: Standard time is GMT minus 3 hours.
GENERAL: *Repairs:* While alongside the dock, no repairs are to be undertaken that will prevent the main propulsion machinery from being activated at very short notice.

Vessel's Whistle: The vessel's whistle shall be operational during operations. One long blast on the whistle means "Emergency – stop operations".
AUTHORITY: Greenex A/S.

NARSSARSSUAQ (Isrecognosceringsstation): 61.08 N. 45.26 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Ice outlook station, with quay.
CONDITIONS: *(a)* Current: occasional strong N.W. current. *(b)* Tide: average height of high water 3 m. (max. 3.6 m.) low water 1.6 m. *(c)* Wind: S.E. wind sometimes reaches typhoon strength. *(d)* Ice: in Winter ice thickness sometimes reaches 1 m. Ice breaker not available.
PILOTAGE: Not available. Base representative should be advised of ETA well in advance of arrival.
TUGS: None. Port boats assist mooring.

MAX. SIZE: Largest vessel to berth at quay was length 130 m., draft 8 m.
ENTRY: Open season from mid-May to mid-October. During season, port open day and night.
BERTHING: Quay length 140 m., depth alongside (West) 6–11 m. (East) 5–8 m. Height of pier 2 m. above w/l. 2 vessels may berth, 1 on either side of quay. Heavy mooring equipment on the quay, and should be used by larger vessels. Mobile cranes capacity up to 4 tons, and fork-lift trucks.
WATER: Obtainable at quay, about 80 tons per single off-take.
AIRPORT: Landing-strip for aircraft. Ice station usually uses DC.4 aircraft and S61 Helicopter.
RADIO: Local radio station supplying ice information.
AUTHORITY: Representative of Ministry for Greenland.

NORTH STAR BUGT (Thule Air Force Base): 76.36 N. 68.52 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Supply port for the Thule Air Force Base. Port is operated by and belongs to the U.S. Air Force.
DAYLIGHT: Polar darkness from 1st November to 10th February and midnight sun from 23rd April to 20th August.
CONDITIONS: *(a)* Ice: port is frozen over from end October to beginning July. From beginning of November, large areas of compact ice appear, and these can sometimes be up to 20 miles wide. During May, compact ice areas commence breaking up; however, large quantities of drift ice remain along the coast until end July. Winter ice is normally about 180 cm. thick. *(b)* Temperature: in January and February average temperature is 29° below zero. In July, June and August, average temperature is usually above freezing-point, but for the rest of the year it is below freezing. *(c)* Tide: mean Spring tide is 3 m. (max. 3.4 m.). Mean neaptide 1.7 m.
ENTRY: Normally, port is open early July depending upon ice situation.
PILOTAGE: No authorised Pilot, but American Port Authority assists in mooring and should be advised of ETA well in advance.
TUGS: None. Port boats assist mooring.
ANCHORAGE: Good holding ground in depth between 20 and 40 m., but anchoring should only be carried out following advice of Port Authority.
MAX. SIZE: Largest vessel to berth alongside quay was length 130 m., and draft 7 m.
BERTHING: 2 vessels may berth at the quay. Depth alongside about 7 m. Height of pier about 2 m. above MHW. Mobile cranes and fork-lift trucks; however, equipment varies from year to year and Port Authorities should be contacted well in advance. 3 amphibious craft for vessels discharging in the roadstead.
FRESH WATER: Available alongside quay.
AIRPORT: Two rescue helicopters stationed at this base.
REGULATIONS: The area is a Military Defence area and special permission is necessary to enter the port. Shore leave is prohibited.
MEDICAL: Hospital, doctor and dentist available.
AUTHORITY: U.S. Air Force.

SONDRE STROMFJORD (Camp Lloyd): 66.00 N. 53.35 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is used for the supply of an American base, transit port for passenger carriage, and for air communication to Copenhagen. Port has a quay and a sea terminal for tankers.
DAYLIGHT: Camp Lloyd is situated South of the border for polar darkness but has a midnight sun from 15th June to 1st July.
CONDITIONS: *(a)* Current: the current at entrance and at the West of Sondre Stromfjord is N.E. at flood tide, and S.W. at ebb tide, and can reach a speed of 7 knots. *(b)* Tide: high water at Camp Lloyd is about 3 hours later than at the entrance of Sondre Stromfjord. Height of average high tide 3 m. (max. 3.6 m.). Low tide 1.6 m. *(c)* Ice: Sondre Stromfjord is frozen during winter throughout whole of inner harbour, but about 55 miles from Camp Lloyd, ice thickness varies from 5 cm to 90 cm. *(d)* Winds: strong winds can occur from East and S.E.
ENTRY: On account of ice, the fjord is closed from beginning of January to end-June, but can be used day or night from beginning of July to end-October.
PILOTAGE: No authorised Pilot, but Harbour Master will assist berthing.
ANCHORAGES: Good anchorages about 2 miles S.E. of Emmons Pynt in depth of about 40 m. Great care should be taken in anchoring, since sea bottom is shelving.
BERTHING: *(a)* A quay which is located North of Emmons Pynt, depth alongside only 3 m. *(b)* Tanker sea terminal about 700 m. S.S.E. of Emmons Pynt where there is mooring with discharge lines. Depth of water 24–26 m. on the South side of the mooring position; 15 m. at the mooring, and 10 m. on Northern side of mooring with rapid shelving to the North.

The Port Authorities should be contacted before mooring at the sea terminal. There are mobile cranes with lifting capacity up to 5 tons, and fork-lift trucks.

RADIO: ETA should be given well in advance of arrival to the Royal Greenlandic Commercial Representative and also to the Port Authority. The arrival should be reported at least 24 hours in advance through GLK. The Harbour Master can be contacted on 2716 kc/s. and this contact should be established at least 1 hour before vessels arrival.
MEDICAL: Hospital, doctor and dentist available.
REGULATIONS: Camp Lloyd is an American Defence Area and is restricted. American supply ships have preference in mooring at all installations.
AIRPORT: Heliport.
AUTHORITY: The Royal Greenlandic Commercial Representative – Harbour Master.

SUKKERTOPPEN: 65.25 N. 52.54 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour situated on S.E. side of Manitsoq island, and has Atlantic quay.
CONDITIONS: *(a)* Tide: height of average high water 4.2 m. (max. 4.8 m.), low water 2 m. *(b)* Ice: Winter ice occurs from December to April. *(c)* Wind: advisable not to enter harbour area if winds are strong. Most obstructive winds are storms from South or S.W.
ENTRY: Port open day and night, normally all year round.
PILOTAGE: Pilot is arranged by cable to Sukkertoppen radio when giving ETA, which should be sent well in advance. Pilot will meet vessel as arranged outside the harbour, or at Faltings Skoer.
TUGS: None. Port motor-boats assist mooring.
MAX. SIZE: Largest vessel that can berth at Atlantic quay is length 100 m., draft 6 m. Vessels up to 4,000 tons have used the port.
BERTHING: Depth in harbour is about 27 m. and alongside Atlantic quay. Length 60 m. with depth of about 6.2 m. Height of quay is about 2 m. above w/l. Cranes up to 5 tons capacity and fork-lift trucks.
WATER: Available at quay.
REPAIRS: Repair workshop for minor repairs. Slip for small vessels (250 tons) and minor repairs.
MEDICAL: Hospitals, doctors and dentist available.
AIRPORT: Heliport.
GENERAL: Telex, telephones, Police, Fire Brigade.
AUTHORITY: Director of Commerce.

NOTES

Please also advise Shipping Guides Ltd.

Guatemala

CHAMPERICO: 91.55 W. 14.17 N.

DOCUMENTS:
Clearance from Last Port.
Travel Memorondum (original and 4 copies).
Declaration of Maritime Health.
Exemption Certificate of Deratisation.
5 Crew Lists.
5 Passenger Lists or "no passengers" Declaration.
5 Provision Lists.
5 Dangerous Cargo, inflammable or explosives, declaration,
5 Mail Lists or "no Mail" Declaration.
Manifests of Cargo from each port (original and 11 copies).
Bills of Lading from each port.
Vaccination Certificates for whole crew.
12 Ballast Manifests, if no cargo on board.

PILOTAGE: None.
ANCHORAGES: Without limit but recommended *not to anchor* less than 1 km. from beach.
MAX. SIZE: Vessels work cargo at anchorage in depth consistent with vessel's draft.
HEALTH: Give notice of any suspicious illness or fever on board when the doctor comes for official visit.
RADIO: ETA cables through Cristobal CZ.
TUGS: No tugs required.
STEVEDORES: No advance notice necessary. Possible to arrange gangs within an hour.
MEDICAL: Adequate advance notice required depending on gravity of case. Hospital half an hour away and possible to arrange transport for patient, also to arrange for doctor on board. Crew must have current International Vaccination Certificates.
TANKERS: No facilities for tankers.
DENSITY: Changes from 1.0226 gr./cu.cm. in October to 1.0270 gr./cu.cm. in April. Percentage of salt: Changes from 30.5 parts per thousand in October to 36.4 parts per thousand in April. Temperatures: an annual average of 28.5° C.
FRESH WATER: Free within port limits.
FUEL: No facilities.
DEVELOPMENTS: Project to build a modern port with an entrance channel, artificial bay and capacity for 8 merchant vessels and facilities for fishing ships and tourist ships.
GANGWAY/DECK WATCHMEN: When requested cost 5 dollars per person per day.
OPENING/CLOSING HATCHES: Either by crew or by stevedores.
CUSTOMS ALLOWANCES: Without limit on board. Prohibited to take tobacco, wine or spirits ashore.
CARGO GEAR: Ship's gear used for loading/discharging.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Minor repairs only.
REPATRIATION: All facilities available.
AIRPORT: International airport 3 hours distant with regular airlines all over world.
TIME: GMT minus 6 hours. No alterations to clock during year.
HOLIDAYS: No work on 1st January, Maundy Thursday and Good Friday, 1st May and 25th December. The rest of the year work day and night.
POLICE/AMBULANCE/FIRE: All available.
TELEPHONES: Cannot be placed on the vessels.
GENERAL: Possible to supply provisions, especially vegetables and shell-fish at good prices.
SHORE LEAVE: No restrictions.
DELAYS: Some days in April and October the surge is very strong and work has to be suspended.
AUTHORITY: Capitan del Puerto.

PUERTO BARRIOS: 15.44 N. 88.36 W.

DOCUMENTS:
Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List 1 legalised and 7 copies or negatives.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List 3 copies.
Voyage Memorandum 4 copies.
Bills of Lading, 2 sets.
Declaration of Health.

PILOTAGE: Pilot boards 2 miles off Puerto Barrios, from small unmarked launch. If awaiting Pilot, vessel may anchor about three miles North of Puerto Barrios, keeping port entrance clear. No VHF.
ANCHORAGE: In Santo Tomas Bay, depths up to 6 fathoms.
MAX. SIZE: length 600 ft., draft 30 ft.
HEALTH: Advise Agent in advance if any fever or contagious disease suspected on board. Otherwise pratique granted on arrival. Officials board only between 0600 hrs. and 1800 hrs.
RADIO: Coastal radio in Costa Rica, call sign TIM operating on 8485 kc/s.
TUGS: No tugs available.
BERTHING: One pier owned by International Railway used to discharge fuel oil. 1,000 ft. berthing length on each side. A flag is shown on the pier to indicate where vessel will berth. Berthing recommended during daylight hours only. Tankers discharge on South side of the pier.
See Shipmasters Report for Santo Tomas de Castilla.

FRESH WATER: Available at the pier.
FUEL: Not available.
MEDICAL: Doctor available. All crew require International Vaccination Certificates.
CUSTOMS ALLOWANCES: Normal daily consumption on board. No tobacco, wine or spirits to be taken ashore.
IDENTIFICATION CARDS: Required.
TIME: GMT minus 6 hours; no alterations during the year.
SHORE LEAVE: Allowed.
AUTHORITY: Commandante del Puerto.

SAN JOSE: 13.55 N. 90.50 W.

DOCUMENTS:
Clearance from Last Port.
Crew List, 1 legalised and 4 copies.
Passenger List, 1 legalised and 7 copies.
Passengers in Transit List, 4 copies.
Cargo manifest, 1 legalised and 19 copies.
Stores/Provisions List, 3 copies.
Voyage Memorandum, 4 copies.
Cargo Check Lists, 18 copies.
Mail List, 7 copies.
Bills of Lading, 2 sets.
Baggage Declaration, per passenger, 4 copies.
Declaration of Health.

PILOTAGE: Not required and no resident Pilots available, except for Tankers where services of a Pilot could be made available upon request.
ANCHORAGE: San Jose is a lighter port (open roadstead). Vessels anchor about 0.25 mile from pierhead in 8–9 fathoms of water.
RESTRICTIONS: Normally no pratique granted after 1900 hrs., although in some instances and if prior arrangements made, vessels could be received by Port Authorities up to 2300 hrs. Tankers moor in daylight only.
MAX. SIZE: Size immaterial since no docking facilities. Cargo transported from vessel to pier and vice-versa by means of steel lighters or barges of 35 tons capacity each. This applies to dry cargo only. Bulk, liquid cargo at respective terminals (oil and oil by-products, imports, and molasses export), where vessels proceed after pratique.
HEALTH: Pratique automatic (0700 hrs. to 1900 hrs.), irrespective of previous port of call. Master's obligation to notify Authorities on arrival of any suspected disease and/or fever on board, in order that adequate precautions taken.
RADIO: Messages should be routed via Guatel.
TUGS: None available or required for manoeuvring vessels.
STEVEDORES: No gangs available after 2100 hrs., unless another vessel is working in port. Rate of discharge/loading: dry cargo: 15–20 tons per gang hour. Max. gangs available: 3. Bulk cargo handled ten times faster.
MEDICAL: Hospital available. No vaccination/fever certificates required.
TANKERS: 2 buoy berths for tankers. Discharging: 8 in. diameter lines. ESSO Terminal: Mooring Master assists berthing. IRCA Terminal: Stern discharge.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None required or necessary.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: On board, no restrictions, but no crew member allowed to bring ashore more than amount required for personal use.
CARGO GEAR: Ship's gear used for loading and discharging dry cargo. Vessels must bring own lines to tie lighters alongside.
IDENTIFICATION CARDS: Necessary for those on shore leave.
CONSULS: All Consulates located in Guatemala City, where vessels' Agents, when and if required, have special documents legalised. Normally, however, Agents can take care of regular certifications required, through port officials, who are authorised to certify documents in absence of a consul of a particular nation.
REPAIRS: No facilities available.
REPATRIATION: Possible. Usually arranged by Agents in cooperation with vessel's Agent in Guatemala City.
AIRPORT: Nearest airport Guatemala City, 108 km. due North of San Jose. Daily flights to and from all parts of world.
TIME: Central Standard Time, GMT minus 6 hours. No changes during year.
HOLIDAYS: January 1st; Holy Thursday; Good Friday; Easter Saturday; March 19th; May 1st; June 30th; July 25th; September 15th; October 20th; November 1st; December 24th; December 25th; December 31st.
POLICE/AMBULANCE/FIRE: These can be contacted through Agent at San Jose and/or Guatemala City.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed.
DELAYS: Only 2 dry-cargo vessels can work simultaneously. A third vessel must await departure of 1 of the first 2. Only 1 tanker can work at each bulk liquid cargo terminal.
SHIPMASTERS REPORT: September, 1978.
Approach was direct from the Pacific. A good landfall was made. San Jose main Light was observed to be Isophase, rather than Occulting, every 20 seconds.
Anchorage: Vessel anchored in a position with the head of the Iron Wharf bearing 011°(T) – 8 cables. We lay to 4 shackles of cable on the starboard anchor, in 13 fathoms of water. Despite a

considerable swell at times, the vessel did not drag her anchor. If anchoring, vessels do not take a Pilot.

Berthing: Ocean-going vessels and at times, due to the swell, almost any vessel, cannot berth alongside the wharf. While we were at San Jose a tanker of about 20,000 d.w.t. berthed stern-on with both anchors down, to load molasses.

I understand that, if no tanker is expected, general cargo ships are sometimes berthed in this manner. The tanker employed a Pilot.

Communications; If at anchor, it is best to keep radio watches and maintain long-range communications in this way. When working cargo, the Supervisor is in VHF communication with the Agents, but this facility is not available outside of working days.

Charterer's Agents: Transmares S.A., of Guatemala City, who send a respresentative to San Jose while a ship is there. They are efficient and helpful.

Documents: As per "Guide to Port Entry". It was not possible to get any documents legalised prior to arrival, but this was arranged by Agents, as also was legalisation of documents for subsequent Central American ports.

Cargo Work: Continuous, weather and the supply of lighters permitting. There are only 3 general cargo gangs in the port and only 2 ships can be worked at a time. The first ship gets 2 gangs, the second ship 1 gang.

Many delays were experienced waiting for lighters, and 2 full days discharging time were lost due to the size of the swell.

This is not a very serious problem alongside the ship, but makes discharge of the lighters at the wharf impossible.

Rate of discharge of coiled steel rods was 55 tons per gang-hour, net of delays awaiting barges.

Pratique: Granted on arrival.

Provisions: Not purchased.

Fresh Water: Unobtainable at the anchorage.

Shore Leave: Permitted, but one has to take one's chances of getting a ride to and fro on the lighters. Not many people went ashore and fortunately none were stranded when work was suspended.

SANTO TOMAS DE CASTILLA: 15.42 N. 88.37 W.

DOCUMENTS:

Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List, 1 legalised and 7 copies.
Passengers in Transit List, 4 copies.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List, 3 copies.
Voyage Memorandum, 4 copies.
Cargo Check List, 18 copies.
Mail List, 7 copies.
Bills of Lading, 2 sets.
Baggage Declaration, per passenger 4 copies.
Declaration of Health.

PILOTAGE: Pilot can be taken on board at 2 stations on ship's request, 1 at Manabique Point and the other 1 mile distant from the Villedo lighthouse.

The pilot station and the Control Office of Maritime Traffic of the Navy maintains listening on R.T. frequencies 2738 k/cs., and 156.8 mHz.

ANCHORAGE: Outside of access channel to Santo Tomas de Castilla the whole N.W. side, approximately area of 2 miles with depth between 4 and 5.5 fathoms.

MAX. SIZE: Max. length 600 ft. Currently the port entrance channel is dredged to enable passage of vessel up to a max. draft of 32 ft.

HEALTH: In case of any contagious illness or fever on board the Sanitary Authority will be informed through respective Agent and vessel will moor to be examined by doctor in charge whether to subject vessel to quarantine or not. No automatic pratique.

RADIO: ETA cables to Agent and Receiver made through Coastal Station in Costa Rica; Signal: TIM on 8485 kc/s. or 8/12 mc/s.

TUGS: Tugs' service not compulsory. Use of tug lines, charge is included in tug service.

BERTHING: Possible to arrive at any time. Vessels work cargo alongside quay 2980 ft. berthing length available.

STEVEDORES: Arrangements made between Agent and ship owner. Agent requests services.

MEDICAL: No advance notice necessary. Hospital facilities available. International vaccination certificate required.

TANKERS: Diameter of pipe-lines 16 in. and load/discharge lines 14 in. No slop discharge facilities. Only 1 mooring berth for tankers and max. draft permitted 30 ft. Also see "Shipmasters Report".

DENSITY: 1015.

FRESH WATER: Pipe-lines alongside quay. Delivered by hoses belonging to port, Rate 15 t.p.h.

FUEL: Available, no advance notice required. (Bunker: 60°, and diesel: 38°).

FIRE PRECAUTIONS: No specific precautions for tankers. Hydrants available to combat fires, besides tug's services and Coast Guard ships of Navy.

GANGWAY/DECK WATCHMEN: Not essential. If necessary provided free by port.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No definite quantity and usually regulated by Captain.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Italy
Holland
Sweden
Germany
Mexico
Honduras
El Salvador

REPAIRS: Only minor deck and engine repairs.

REPATRIATION: Possible.

AIRPORT: 10 km. distance. Aviateca has daily flights to the capital and to Flores Peten.

TIME: GMT minus 6 hours.

HOLIDAYS: 1st January; 7th March; Maundy Thursday and Good Friday; 1st May; 30th June; 15th September; 1st November; 25th December.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Possible.

SHIPMASTER'S REPORT: 1976

Approaches: No difficulty once position is ascertained approaching the Gulf of Honduras. The Pilot boarded 3 miles North of the Villedo Shoal Beacon. Pilots have VHF Channel 16 call Porto Barrios Pilots. Only 1 pilot speaks English so if he is on duty there is no difficulty in communications.

The lights on the approach beacons are said to be unreliable but all were found to be good radar targets.

At the present time a dredger is working on a new approach channel to give a 32 ft. buoyed channel past Puerto Barrios up to Santo Tomas de Castilla.

General: There is no tug supplied by the Port Authorities but there is a tug working with the dredger which can be hired on request through the Port Authorities. The Pilot advised that this vessel have the tug for berthing as the ship has a 220 degree turn to make in a restricted turning basin off the berth. The same case applied at unberthing where the Pilot considered it necessary to have the tug to swing the vessel out into the departure channel.

The area is still recovering from the severe earthquake some 8 months ago in which the finger pier at Puerto Barrios was destroyed. This now constitutes a submerged hazard while in the channel on the approaches to Santo Tomas de Castilla. The channel is poorly marked and at present there are numerous survey buoys which can be confusing.

The berth is stern to at the Eastern end of the cargo jetty at Santo Tomas using 2 anchors and backing up to 10 ft. off the jetty from where the hose is passed up to the stern line by a mobile crane. The connection is made by the ship's crew. There is a 1 × 8 in. hose for all grades into a 10 in. shore line which is approximately 5 km. long. The requested back pressure of 8.5 kg. was easily maintained using 2 pumps.

AUTHORITY: Port Commander.

NOTES

Please also advise Shipping Guides Ltd.

Guinea, Republic of

CONAKRY: 09.30 N. 13.44 W.

DOCUMENTS:

7 Crew Lists – Crew list with vaccination date for health service.
5 Passenger Lists.
5 Lists Port of Call (the last ports).
3 Stores Lists.
3 Lists Crew Declaration (personal effects).
5 Manifests of Cargo (if any).
2 Copies of Bills of Lading.

PILOTAGE: Telegraphic address Pilot station: "Harbour Master's Office, Conakry". Pilot meets vessels N.E. of sea buoy Tonnelier.
ANCHORAGE: Safe deep anchorage.
RESTRICTIONS: No entry at night. Channel depth 8 m. MLW.
MAX. SIZE: 600 ft. long. Max. draft for tankers 31–32 ft. high water.
HEALTH: Valid yellow fever and smallpox inoculation Certificates.
RADIO: Conakry Radio 2182-2586 kc/s.
TUGS: Tugs normally connect to starboard side. Ship's lines used.
BERTHING: All tankers berth according to high water. No berthing at night. Berthing 0700 hrs. to 1900 hrs. 10 berths, max. depth 11.5 m.
STEVEDORES: ETA to "Navalguinee" in order arrange gangs.
MEDICAL: Advance notice required for medical service, hospital facilities available.
TANKERS: Pipe-line 5,280 ft. long, 10 in. diameter. 2 tanker berths, 31/32 ft. high-water max. draft at these berths.
DENSITY: 1016 in the port with particular relation to state of tide.
FRESH WATER: Available by connection from pier. Rate of delivery with good pressure 30 t.p.h.
FUEL: Not available.
FIRE PRECAUTIONS: Special fire service for tankers.
GANGWAY/DECK WATCHMEN: Compulsory, particularly for tankers.
OPENING/CLOSING HATCHES: Normally by crew. Stevedores if requested by Master.
CERTIFICATES: Certificate of Deratisation; Log Book.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes out of bond. Wine and/or Spirit, 1 litre of spirit and 1 litre of wine per day out of bond.
IDENTIFICATION CARDS: Necessary.
CONSULS: All major maritime nations.
REPAIRS: None available.
REPATRIATION: All facilities exist for effecting crew changes and arranging repatriation to Europe.
AIRPORT: International airport distant 15 km. served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day (1st January); Women's National Day (9th February); Labour Day (1st May); 1958 Referendum Day (28th September); Independence Day (2nd October); All Saint's Day and Guinea Army's Day (1st November); Anniversary of the Basic Law of 8th November 1964 (8th November); Assumption (15th August); Anniversary of Youth's Creation (J.R.D.A.) (26th March); Christmas (25th December).

Varying holidays which depend on the position of moon: Ramadan – End of fasting; Tabaski – Pilgrimage day at Mecca; Mahouloud – Day after Prophet Mahomet's Birthday.

Work available during holidays, except Labour Day, Independence Day, Ramadan and Tabaski.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 16; Fire 18.
TELEPHONES: Not possible to place telephones on board.
SERVICES: None.
SHORE LEAVE: Crew allowed ashore.
SHIPMASTER'S REPORT: 1974.

There are no shore or harbour lights in operation. The Tonnelier Buoy is off station together with all channel buoys other than Nos. 3, 6 and 9 all of which are unlit. There is no plan to replace or re-light these navigation marks.

Only 1 tug is available.

Fresh water can only be obtained by Fire Brigade Tanker truck of 4 tonnes capacity at a cost of £1.60 per tonne. This water if received needs chlorination and boiling before use.

Consuls – There is no British Consular Officer resident in this port. The nearest is located at Dakar in Senegal.

Repatriation of crew members by air is possible but difficult. Procedure is as follows;

Air ticket must be purchased outside Guinea. Airline then advises their office at Conakry that purchase has been made. Airline office at Conakry in turn advise ship's agents when ticket and flight are available. Only then can Immigration formalities be commenced. Entry and exit visas are required and the overall operation may take up to one week.

Time – GMT is kept.

In the rainy season vessels should be prepared for the African Tornado. This usually occurs at night and produces winds reaching 90/100 knots from calm in a matter of minutes. It is as quickly over. The best indication of approach of this weather is a steep rise in the barometer, the highest winds usually Northerly being experienced during the rise.

Vessels berthed at the banana berth should be well fendered as they are subject to considerable movement due to invisible ground swell. A slight starboard list when alongside is an advantage.

SHIPMASTER'S REPORT: 1975.

Radio: Conakry Radio not working on radio telephony as stated, although same information given in List of Coast Stations. (Freetown Radio helped me with the relaying of my messages to Conakry and Europe).

Fresh Water: Only available by truck loads and after written application to Harbour Master, stating exact amount required. (Water is very expensive).

Identification Cards: Seamen's Books or passports used. (No landing permits issued).

Time: GMT.

AUTHORITY: Harbour Master.

PORT KAMSAR: 10.39 N. 14.37 W. (See Plan Book)

DOCUMENTS:

1 Vaccination List.
5 Crew Lists.
5 Passenger Lists.
1 Crew Declaration (Personal effects) List.
1 Stores List.
5 Last Ports of Call Lists.
7 Manifests of Cargo.
5 Copies Bills of Lading.

To ensure the best possible turn-round for general cargo vessels complete sets of the required cargo documents should be made available to the authorities by hand of the Master. Delays have been occasioned by the late arrival of documents sent by post. It would be of help for the Master to send hatch distribution and the amount of refrigerated cargo, if any, at the same time as ETA.

Quarantine, Immigration and Customs: Representatives of the departments board after the vessel has been made fast alongside. The normal "Q" flag should be flown by arriving vessels.

ARRIVAL ADVICE: Masters are required to send ships ETA, addressed to Shipping Superintendent C.B.G., through Port Kamsar Radio Station, 7 days, 5 days, 3 days and 1 day before arrival at Port Kamsar.

APPROACHES:

Approaches to Rio Nunez: Port Kamsar formerly known as Kakande is located on the East bank of the Rio Nunez river and is approximately 17 km. from the sea.

Vessels bound for Port Kamsar will find there are few natural features to aid a landfall. The most prominent feature is Cape Verga situated to the eastward of the Rio Nunez entrance. This cape can be observed by radar at a distance of approximately thirty miles. At present the light on Cape Verga is extinguished.

To the westward of the Rio Nunez entrance are the Compony shoals and Conflict reef. These are screened by a series of light buoys and vessels approaching from the West should keep them well on the port hand.

Another prominent feature is Gonzales Rock on the starboard side close to the entrance to Rio Nunez. During daylight the hull and superstructure of a wreck stranded six cables North East of the old Gonzales light structure is visible and may be picked up by radar at a distance of between ten and fifteen miles. A light buoy is positioned screening the rocks and is identified as buoy No. VII.

Vessels proceeding to Port Kamsar should anchor and await the arrival of the Pilot in the area bounded by Latitudes 10° 26′ N and 10° 28′ N. and Longitudes 14° 44′ W. and 14° 46′ W. Vessels must not proceed beyond 10° 28′ N.

Kamsar Buoyage System: Approaches to Rio Nunez Sea-Buoys

No.	*Shape–Colour*	*Position* *N.*	*W.*	*Characteristic*	*Visibility (miles)*
I	Red cylindrical	10° 20.0′	15° 28.5′	GP. FL. 3 Ev. 15 sec.	5
II	Red cylindrical	10° 12.3′	15° 25.5′	FL. 10 secs	5

VII	Black conical	10° 23.5′	14° 44.5′	GP. FL. G 4 Ev. 10 secs	2.6
VIII	Red cylindrical	10° 29.5′	14° 43.9′	FL. 10 secs	5

Charts of the area are as follows:

British Admiralty:
600 Cacheo River to Iles de los.
1562 Rio Nunez and Riviere Compony.

United States Naval Oceanic Office:
51580 Ponta Caid to Cap Verga.

Service Hydrographique de la Marine (These charts are recommended by the Port Captain):
6148 Embouchure du Rio Nunez.
6228 Acces au Rio Nunez.
6288 Abords du Port Kakande.

Rio Nunez Transit: The channel from the mouth of Rio Nunez to the bauxite loading wharf at Port Kamsar is 17 km. in length and 120 m. wide and is well marked by 21 light buoys. The channel is subdivided into an inner and outer channel. The bottom of which consists of mud and sand.

The inner channel extends from the bauxite wharf to point "F" and is dredged to between 8.25 and 8.50 m. below Reference Datum Level (R.D.L.) which is defined at +0.15 m. above the lowest water registered (British Admiralty Tide Tables L.L.W.S. = 0.00).

The outer channel extending from point "F" seaward is dredged to a depth of 9.00 m. below R.D.L. increasing to a depth of – 12.00 m. from km. 15.3 to the sea.

The turning, waiting basin for inbound vessels is dredged to –7.75 m. below R.D.L. the bottom of which is mainly mud and it is good holding ground.

PILOTAGE: Pilotage service is compulsory for all vessels over 150 ft. OAL. Vessels under 150 ft. OAL will also be required to have a pilot aboard on their first calls, but may be exempt thereafter by consent of the Harbour Master and approval of the Port Director.

Pilots are supplied from the Director's Office. Pilots board vessels in the designated waiting area, the pilot will pass instructions by VHF radio, aldis lamp or loud hailer from the pilot boat, and when conditions are too unfavourable for a pilot to board the vessel at the designated area the vessel will follow the pilot boat in until conditions are suitable for boarding.

Pilot boats are fitted with VHF radio can be contacted on Channel 16 or 12

ANCHORAGE: See "Approaches".

MAX. SIZE: Max. LOA 225 m. Shipmaster reported max. draft at LW 42 ft. 8 in.

HEALTH: Authorities board when vessel is alongside the berth. Smallpox, yellow fever and Cholera vaccination certificates required.

RADIO: The Port Radio Station is operated by the Post, Telegraph and Telecommunications Department. The equipment includes a 5 kW. transmitter (both voice and telegraph) with the following frequencies.

A. *Frequency*	*Power*	*Mode*	*Call Letters*
6383 kHz	5,000 Watts	A 1	3X0 27
8702 kHz	5,000 Watts	A 3	3X0 28
12885 kHz	5,000 Watts	A 3	3X0 29
484 kHz	1,000 Watts	A 1	3X0 30
500 kHz	1,000 Watts	A 1	3X0

NOTE: *Watchhours are at the GMT times shown below:*

0800 – 0850	500 kc/s.
0850 – 0950	6383 kc/s.
0950 – 1100	500 kc/s.
1100 – 1200	6383 kc/s.
1600 – 1700	500 kc/s.
1700 – 1800	6383 kc/s.
2000 – 2100	500 kc/s.
2100 – 2200	6383 kc/s.

B. *Port Operations:* VHF Channel 16 and 12. Watchkeeping hours: 0800–1200; 1400–1700 and as required.

C. A further means of communication is through Port Kamsar Post Office through which international connections may be made.

Telegraphic address: BCTR KAMSAR.
Telex : 817 Kamsar.

TUGS: One 825 h.p. tug is on station and will assist vessels in docking and undocking. It is anticipated that a further more powerful tug will eventually be stationed at Port Kamsar.

BERTHING: Located 17 km. from the channel entrance is the bauxite wharf.

The area alongside the wharf has been dredged to a depth of 13.5 m. below R.D.L. Fendering is separate from the wharf proper, and consists of 12 flexible steel dolphins spaced 21.6 m. apart and protruding 4 m. from the face of the wharf.

A vessel proceeding to the bauxite wharf will normally swing off the berth and make fast port side to, heading seaward, during the flood tide. If the berth is occupied the vessel will be anchored in the turning basin to await the berth.

There is a single loading berth at the wharf. The longest vessel berthed had a LOA of 225 m., which is considered to be the maximum length permissible.

The mobile shiploader has a travel of 165 m., and an outreach of 21 m. from the outside face of the fendering. It is rated at about 4,000 tonnes/hour.

A vessel's air draft, i.e. distance from the waterline to the top of the hatch coaming, must not exceed 11.28 m. at Highest High Water.

Weight of bauxite loaded is determined by a formula using deadweight survey and weightometer. The weightometer is used for loading runs.

Stowage factor of the dried bauxite is 28.

Bauxite vessels sail from Port Kamsar during the flood tide. Maximum departure draft is regulated according to tidal conditions.

Facilities for the discharge of petroleum products are also available on the bauxite wharf. Attached to the shiploader is a chicksan arm with an eight inch connection. This feeds 2 main lines, one 16 in. line for Bunker "C", and one 8 in. line for Diesel. Discharge rates average about 450 tonnes/hour at 100 lbs. per sq. in. back pressure at the ships pumps.

Storage facilities are three 10,000 tonnes Bunker "C" tanks, and two 3,000 tonnes diesel tanks.

There are 2 small general cargo wharves located at the entrance to the Dougoufissa Creek, where vessels of up to 100 m. LOA with a maximum draft of 6 m., may berth. As there is only 3.5 m. at Lowest Low Water, these vessels will be aground at low water periods.

One of these wharves is equipped with a heavy lift crane – derrick with a maximum S.W.L. of 110 tonnes. Safe Working Loads are as follows:-

Radius of derrick (metres)	*Lifting capacity (tonnes)*	*Height under hook (metres)*
16.5	110	29
26	75	23
32 (max.)	45	11

The derrick is also equipped with a secondary hook with a capacity of 20 tonnes.

At the same wharf there is a 4 inch line for the discharge of petrol (gasoline) by coastal tankers. Discharge rates average 50,000 litres/hour. The storage capacity is 850,000 litres.

Two 400 tonnes and two 200 tonnes barges are available for loading and discharging midstream.

WIND/WEATHER/TIDE: In the Rio Nunez approach area waves up to 4 m. can be encountered. At the entrance to the fairway or channel they are generally less than 1 m. high during the rainy season, and less than 0.5 m. high in the dry season. Waves and swell in the inner channel and harbour area are generally very moderate.

The tide, in the the proximity of the buoyed channel, runs N.N.E. and S.S.W. at 2.5 knots under normal conditions, but can reach 6 knots during spring tides in the rainy season.

The flood tide runs parallel with the line of the bauxite loading wharf at a speed of up to 4 knots. The ebb tide, augmented by water coming out of the Dougoufissa Creek, runs through the bauxite wharf at an angle of approximately 20° at a speed of up to 6 knots on spring tides in the rainy season, tending to set the vessel off the wharf. It is therefore absolutely essential to tend moorings continuously, particularly on the stern of a loading vessel.

The salinity of the Rio Nunez at the bauxite loading wharf varies between 1013 (rainy season) and 1028 (dry season) at high water.

Port Kamsar has a typical tropical climate, which is characterised by two separate seasons.

Rainy season from June to October

Maximum rainfall	is during July and August mainly at night.
Relative humidity	is 70 to 80% during the day and 90 to 95% at night.
Temperatures	range from 17 to 38° C, with an average of between 22 to 28° C.
Wind conditions	Variable from between South and West, Force 3 to 6 Beaufort Scale. Possible tornados from between North and N.E. with wind reaching force 10 Beaufort Scale for short periods.

Dry season from November to May
Little rainfall.

Relative humidity	is 30 to 50% during the day, and 80 to 90% at night. There is often coastal fog in the mornings.
Temperatures	range from 15 to 42° C, with an average of between 20 to 35° C.
Wind conditions	Light breezes from the Southwest to West, force 1 to 3 Beaufort Scale.

MEDICAL: Hospital facilities at Port Kamsar are available only on an emergency basis.

TANKERS: See "Berthings"

TIME: GMT.

HOLIDAYS: New Year's Day (1st January); Labour Day (1st May); Anniversary P.D.C. (14th May); Independence Day (2nd October); Victory Day (22nd November); Christmas Day (25th December); Tabaski (Variable date); Ramadan (Id il Fitri) (Variable date).

All Sundays are also declared Public Holidays. The President may also, at his discretion, declare any other day to be a Public Holiday.

The loading of bauxite is generally continued without stoppage for Public Holidays.

General cargo will not, except in special circumstances, be worked on Victory Day, Tabaski and Ramadan (Id il Fitri). All other Public Holidays are normally worked.

SHORE LEAVE: Crew members are not granted shore leave at present.

GENERAL: *Stores:* Provisions are scarce and therefore not available to calling vessels.

Gangways: Vessels must provide and attend their own gangways. A vessel berthing at the bauxite wharf should have its gangway swung out and ready to lower.

Normal practice of the port is for the foot of the gangway to be heaved out and landed on the wharf after the vessel is fast alongside.

Port Directors Office: The office of the Port Director is solely responsible for the operation of Port Kamsar, which includes the provision of Pilotage, tugs and launches.

The Office acts as sole agent for all vessels calling at Port Kamsar, including the normal ships business functions performed by ships agents.

SHIPMASTER'S REPORT: 1974.

Density: Varies from 1013–1028 according to season.

Fresh Water: Available, rate 20 t.p.h. Not recommended as drinking water.

Repairs: Small repairs can be carried out in an emergency.

Airport: Nearest airport is Conakry which is 8 hours away by car.

AUTHORITY: Port Captain.

Please also advise Shipping Guides Ltd.

Guyana

ESSEQUIBO RIVER (Bartica): 06.24 N. 58.37 W.

DOCUMENTS: See "Georgetown".

PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

Essequibo light (steel framework tower with red and white horizontal bands) marks seaward end of Essequibo main ship channel. Vessels in vicinity of Demerara Pilot station should listen for pilot boat on VHF Channel 16.

RESTRICTIONS: The Essequibo Bar is composed of hard mud and sand. The least depth of water is 3 ft. less than for Demerara Bar. Vessels should not attempt to cross the Essequibo Bar drawing more than 3 ft. less than that predicted for the Demerara Bar.

MAX. SIZE: Controlled by Bar draft predictions.

HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.

RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s. 24 hours a day. Also SSB 8281.2 kHz.

TUGS: Not available.

MEDICAL: Hospital at Georgetown and Bartica. All crew members need valid smallpox vaccination certificates.

DENSITY: 1000, fresh water.

FRESH WATER: Not available.

FUEL: Not available.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.

CONSULS: At Georgetown.

REPAIRS: Government dry dock situated at Mazaruni, approximately 40 miles up river at junction of Essequibo and Mazaruni rivers. Extreme dimensions; 160 ft. by 35 ft.

AUTHORITY: Transport and Harbours Department.

GEORGETOWN: 06.49 N. 58.10 W. (See Plan Book)

PORT LIMITS: Seaward by an arc of a circle with radius 1 nautical mile, with the Georgetown lighthouse as centre.

DOCUMENTS:

Certificate of Registry.
8 Crew Lists.
8 Provisions and Stores Lists.
4 Passenger Lists.

Customs Documents:

2 Reports of Ships Stores (Form C1).
2 Lists of Crew Personal Effects (Form C2).
1 List of Unmanifested Cargo (Form C3).
12 Health Declaration Forms (W.H.O.2)
Health Documents for Crew (1 copy for each Crew member).
5 Cargo Manifests.
5 Bills of Lading

PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at Pilot station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in North-Western quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 50 ft. in length.

ANCHORAGE: There are 5 with a least depth of approximately 20 ft. MLWS named A to D from North to South. Vessels are safely anchored at any of the above anchorages 1.5 to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.

RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.

MAX. SIZE: Draft 21 ft. 6 in.

HEALTH: Radio Pratique is not given, and pratique is only given at Georgetown. This does not normally involve a visit from the Health Authorities if the vessel is clear. Pilot may grant pratique if vessel has just arrived from a British port, and if vessel has not been to a Central or South American Spanish-speaking port or French-speaking port (West Indian or otherwise) or any of the ports of New Orleans, Mobile or Tampa within 4 weeks of its arrival at the Pilot station. If a vessel is "suspect" or "infected" Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Beacon as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.

RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kc/s., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF on Channel 16, HF 2738 and SSB 8281.21 kHz.

TUGS: At present, vessels dock stem on to the tide without aid of tugs.

BERTHING: There are 14 main wharves all privately owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 to 20 ft. at low water springs, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.

BULK HANDLING FACILITIES: The sugar berth is 416 ft. in length with least depth alongside of 18 ft. MLWS and can accommodate vessels up to 530 ft. in length. Loading rate is 500 t.p.h. using 2 chutes. Vessels should not be more than 63 ft. beam.

STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 1600 and 1900 and they earn time-and-a-half or double time on public holidays according to which one of the 12 public holidays they work.

MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available. All crew members need to have valid smallpox vaccinations certificates on entry.

TANKERS: There are no residue discharge facilities at this port. There are 4 tanker berths in the Georgetown area.

Rome Terminal (Shell) – depth alongside is 15 ft.
Ramsburg Terminal (Esso) – depth alongside 16 ft.
Ramsburg Terminal (Texaco) – depth alongside 8.5 ft.
Providence (Guyoil) – depth alongside 9 ft.

DENSITY: Average density in port is 1015, though during the rainy season (March-May; October-December) density of water may be as low as 1000 at low water in the harbour.

FRESH WATER: Fresh water is available, and is delivered alongside. The ship is required to pay for labour, overtime, etc., involved in the delivery.

FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before high water and leave not later than 1 hour after high water at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.

CONSULS: (and Embassies)

Belgium
Brazil
Canada
Colombia
Costa Rica
Cuba
Denmark
Egypt
France
Germany (F.R.)
India
Italy
Jamaica
Japan
Korea
Libya
Mexico
Netherlands
Norway
Panama
China (People's Republic)
Sweden
Trinidad & Tobago
United Kingdom
U.S.A.
Venezuela
Yugoslavia

FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload.

GANGWAY/DECK WATCHMEN: Services of watchmen are necessary and can be obtained through a watchman's pool by ships' Agent.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of half-a-pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*

IDENTIFICATION CARDS: Not required.

REPAIRS: Every type of deck or engine repair is undertaken at Guyana National Engineering Corporation (GNEC) dry dock. Above waterline and engine-room repairs of any type are undertaken on vessels exceeding the dimensions mentioned below while vessel is anchored in the stream.

DRY DOCKS: GNEC Dry dock: A graving dock 210 ft. × 37 ft. 9 in. at entrance situated South of GNEC No. 2 Wharf, which is State owned and operated on normal commercial lines. 198 ft. length of dry dock is on blocks. Breadth: top 46 ft. 4 in., bottom 40 ft. 9 in., depth on sill at HWOST 92 ft.

Government Dry dock: Situated at Mazaruni approx. 40 miles upriver at junction of Essequibo and Mazaruni rivers is a graving dock and has extreme dimensions of approx. 160 ft.×35 ft.

REPATRIATION: Can be arranged.

AIRPORT: Timehri International Airport is situated approx. 30 miles South of Georgetown with highway connection and is served by many intercontinental airlines.

TIME: 3 hours behind GMT. No alterations made to clocks during the year.

HOLIDAYS: New Year (January 1st); *Eid-ul-Ahza; *Phagwah; Republic Day (February 23rd); Good Friday (April 12th); Easter Monday (April 15th); Labour Day (May 1st); *Youman Naubi; Caribbean Day (July 5th); Commonwealth Day (First Monday in August); *Deepavali; Christmas Day (December 25th); Boxing Day (December 26th). *Religious holidays are variable.

POLICE/AMBULANCE/FIRE: Tel. 63211, Emergency 999; Ambulance 62411, Emergency 999; There are Police/ Ambulance/Fire Stations on the waterfront.
TELEPHONES: Only connected to naval vessels.
SHORE LEAVE: Allowed.
AUTHORITY: Transport and Harbours Department.

LINDEN: 06.00 N. 58.17 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 12 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

From Georgetown to Linden, Pilot not compulsory, but advisable to use Sprostons Pilot.
RESTRICTIONS: Governed by depth of water at Demerara River Bar. Entrance normally at HW. Max. speed limit on the river is 10 knots.
ANCHORAGE: Vessels proceeding to Linden in ballast and drawing less than 15 ft. may anchor at Southern limit of Georgetown in depth of 20 ft. MLWS.
MAX. SIZE: Draft 21 ft. 6 in.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s., 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: There are 2 bauxite berths accommodating vessels of up to 570 ft. One loader for metal grades has an airdraft of 29 ft. 8 in. and a loading rate of 800 t.p.h. The second loader for calcined bauxite has an airdraft of 34 ft. and a loading rate of 350 t.p.h.

The Alumina berth has a travelling tower with an airdraft of 64 ft. and a loading rate of 400 t.p.h. Max. beam of vessel 85 ft.
MEDICAL: Hospital at Georgetown, 59 miles distant. All crew members need valid smallpox vaccination certificates.
DENSITY: 1000, fresh water.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS/REPAIRS: At Georgetown.
AUTHORITY: Transport and Harbours Department.

NEW AMSTERDAM (Everton, Berbice): 06.14 N. 57.31 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light. Pilots may also board ships bound for New Amsterdam within 5 cables Westward of Berbice Light. This beacon marks the seaward end of the channel and is to be passed on the port hand when entering.
RESTRICTIONS: The Berbice Bar is composed of fairly hard mud. Vessels may cross the Berbice Bar on even keel loaded to 3 ft. less than the Demerara Bar predictions.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s., 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: The Bauxite berth is about 1,500 ft. long, and has a fixed loading arm with an average loading rate of 500 t.p.h. The airdraft is 36 ft. Vessels berth starboard side alongside.

There is a strong ebb current of about 4–5 knots, although the flood runs at about 1 knot.
MEDICAL: Hospital at Georgetown. All crew members need valid smallpox vaccination certificates.
DENSITY: 1000, freshwater.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
DEVELOPMENTS: Proposals in hand for dredging Berbice Bar.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS/REPAIRS: At Georgetown.
AUTHORITY: Transport and Harbours Department.

NOTES

Please also advise Shipping Guides Ltd.

Haiti

CAP HAITIEN: 19.46 N. 72.12 W.

GENERAL: For all general information refer to "Port-au-Prince".
APPROACHES: The current is about 3 knots in the entrance to the port when the river is in flood.
ANCHORAGE: Vessels which are unable to moor alongside because of deeper draft are anchored off the wharf.
BERTHING: The wharf at Cap Haitien was constructed by the Compania Industrial Maritima. The construction is in reinforced concrete. It extends for a length of 900 ft. in an Easterly direction and comprises 3 sections. The most important section is 600 ft. long and has berths for deep sea vessels on the South side in depths of 30 ft. The Western section, nearest the shore, is 300 ft. long with variable depths of 7 to 9 ft. alongside, with berths for motor vessels of small tonnage and sailing ships. The central section accommodates the customs offices. 2 metal warehouses border the East and West ends of the wharf. Between the warehouses is 1 fixed crane of 30 tons capacity.
FRESH WATER: Fresh water is available at Cap Haitien.
FUEL: Available, only in drums.

MIRAGOANE: 18.25 N. 73.04 W.

GENERAL: For all general information refer to "Port-au-Prince".
BERTHING: The facilities at Miragoane are 1 small jetty for loading and discharging general cargo with a depth alongside of 18 ft. max.

There is a wharf for loading bauxite, belonging to the Reynolds Company, with a depth alongside of 34 ft. Total annual export about 350,000 tons.

PORT-AU-PRINCE: 18.33 N. 72.21 W.

APPROACHES: The port of Port-au-Prince is situated at the extreme S.E. of the bay. It can be approached from the North and from the South by 2 channels.

One may approach from the N.E. by the Saint-Marc channel or from the West by the Gonave channel, between Trou-Forban Point and the village of Ca-Ira. The bay extends between Trou-Forban Point in the North and the village of Ca-Ira about 20 miles to the South. The position of Ca-Ira is 18° 32′ N. 72° 39′ W. From Ca-Ira the South coast of the bay extends about 2 miles N.E. and about 12 miles East to Pointe Lamentin.
PILOTAGE: Pilotage is compulsory for all movements of ships in the port. The Pilot boards to the West of the fairway buoy and is accompanied by port officials, i.e. Port Doctor and Representatives of Immigration, Police and Customs. These officials insist on using the accommodation ladder to board the vessel. Masters must arrange with their respective Agents the time which they will require a Pilot to leave the port. If they are ready to depart before the hour arranged they may call the Pilot by 3 blasts of the ship's whistle.
ANCHORAGE: Vessels must anchor to the West of the large red buoy number 29 or at the quarantine buoy, situated about 0.5 mile N.N.W. of buoy number 29. A bottom of sand over coral is to be found all over this region in depths of 10 to 18 fathoms.

Vessels may anchor or depart at any hour of the day or night.

In order to facilitate the rapid movement of vessels, these are normally anchored in order of arrival.
WEATHER: The Bay of Port-au-Prince is nearly always calm except at certain times of the year; for example, during the months from May to November, occasional strong winds may interrupt normal loading and discharging movements.

A light breeze from the East or N.E. blows after dawn, but in the afternoon a breeze 3 times stronger blows in the opposite direction.

The height of the tide is only 1.5 ft. Currents in the port are almost negligible, except that, when mooring or unmooring a vessel, one should pay attention to a Northerly current of about a quarter of a knot.
RADIO: All deep-sea vessels which enter the territorial waters of Haiti are obliged to advise the Port Radio Station.

The radio station is situated at the Bureau de Port. It is in operation 24 hours a day.

Visual light signalling may also be carried out as far as it is possible to do this.

The following apparatus is used at the radio station:

1. VHF calls to be on Channel 16. Channel 12 is also monitored continuously. Channel 6 and 18 are also available on request to the radio operator (Channel 16) Power 50 watts, range 40 miles.
2. Medium frequency, SSB compatible frequencies 2182 kHz, 2738 kHz. Power 150 watts, range about 250 miles.

In addition to the VHF Channels, the Pilots may use radio-telephone on the following frequencies: 2182 and 2738 kHz.

The general call and distress frequency 2182 kHz is monitored continuously.

All messages addressed to the Port Authorities and messages concerning pilotage must be handled at this radio station.

Masters are particularly required to give the radio station, as soon as they arrive, the following information:

Vessel's draft and net tonnage, amount of cargo for discharge, number of gangs required.

The telephone number of the radio station is 24773.

TUGS: The port has at present a tug of 2,000 h.p. available at all times. The tug is compulsory for ship from 990 tons gross and upwards. At all times 2 wooden mooring launches, each 32 ft. long, are available for Pilot's use.
BERTHING: For passenger cruise liners there is a concrete finger pier, length 888 ft., with berths on both sides, with depth alongside of 30 ft.

The old commercial quay is under reconstruction and is expected to be available by January 1979.

The New Port facilities are presently in service, located 600 ft. North of and parallel to the existing pier.

Prime features of new facilities are:

Length of berthing space: 1,400 ft.
Width of apron 93 ft.
Container crane on rails on the apron with 30 tons capacity.
Depth alongside 33 ft.

1 additional ro/ro platform. 2 metal and concrete, clear span transit sheds, each 6,000 sq. ft. Paved open storage and roadways approximately 25 acres.

There is an angular portion of 100 ft. between Quays No. 1 and 2 which may not be used for mooring, but which the bow of the ship may overhang. Vessels must be secured by at least 2 mooring cables at the bow and at the stern.

The Port Authorities require for vessels manoeuvring in the port a minimum of 2 ft. of water under the keel. This regulation may be modified by special authorisation of the Chef de Port.

In addition to the public pier, there are 5 jetties belonging to private companies used for handling products in bulk. These jetties belong to the following companies:

A. La Hasco, sugar refinery established at Port-au-Prince.
B. La Minoterie, flour mill situated at Laffiteau.
C. Le Ciment d'Haiti SA, cement factory situated at Fonds Mombin.
D. Jean Ackmed, fuel installation situated at Simonette.
The above jetties are established on the North side of the bay.
E. Installations of Shell Company and Tropigas on the South side of the bay, equipped with their own mooring buoys for tankers.

CARGO HANDLING: For vessels loading and discharging at the public pier, cargo is transported on railway trucks of 25 tons max. capacity.

1 quay is equipped for container ships. 1 quay is equipped to handle roll-on/roll-off traffic.
STEVEDORES: Loading and discharging of ships is carried out by gangs of private workers who are engaged by the ship's Agents under the supervision of a chief stevedore. The working gangs use the ship's own equipment for loading and discharge.

Handling rates are normally about 15 t.p.h. for general cargo, or about 25 t.p.h. for heavy articles, such as drums, planks, bundles of steel rods, etc.

Normal working hours in the port are from 0700 hrs. to 1900 hrs. from Monday through Saturday. Overtime is payable for work required at other than these hours and also for work required on Sundays and holidays.
FRESH WATER: Drinking water is available in the port; however, the ship must provide its own connections. Rate of loading varies from 4 to 10 t.p.h.
FUEL: There is no service for coal bunkers. Fuel oil may be supplied by tanker truck.
REPAIRS: There are no proper facilities for ship's repairs although minor repairs may be effected by small private workshops ashore. There is a small dry dock at Bizoton about 1 mile from the port, with a capacity of about 1,000 tons and able to receive vessels up to 175 ft. in length. This yard is managed by the Haitian Army Coast Guard.
MEDICAL: There are adequate medical facilities, pharmacies and hospitals.
AIRPORT: An international airport for jet planes connects Haiti with Principle U.S. and Carribean points. A local air service connects Port-au-Prince with principal towns of the Republic.
FIRE-FIGHTING EQUIPMENT: The Port Authority does not own any equipment for fire-fighting or assisting vessels in need. However, there is a town fire service organised by the Army.
HOLIDAYS: *Legal Holidays:*

Independence Day (1st and 2nd January); Labour Day (1st May); Flag Day (18th May); Ascension Day; Assumption (15th August); All Saints (1st November); Commemoration Day (13th November); Discovery of Haiti (5th December).

Authorised Holidays:

Lundi-Gras (half-day); Mardi-Gras; Good Thursday; Good Friday; Pan-American Day (14th April); President's Day (22nd June); Dessaline's Anniversary (17th October); United Nations Day (24th October); Fete des Morts (2nd November).
SERVICES: Fresh provisions are obtainable locally.

There are no facilities for refuse collection, but nevertheless it is forbidden to throw refuse, cinders or any other polluting material overboard.

Launches used for the transport of tourists are available at Port-au-Prince and these are operated by private companies. The Port Authority does not take an active part in the traffic of tourist passengers. Those who disembark on the wharf from cargo vessels or cruising liners must make their way on foot to the taxi station to take part in excursion tours. However, the majority of tourists coming on passenger liners anchored in the roads disembark by launches belonging to the Department of Tourism. They disembark at the Quai Colomb, which is under the authority of the Department of Tourism.

DEVELOPMENTS: New port facilities are presently under construction, located 800 ft. North of and parallel to the existing pier.

SHIPMASTER'S REPORT: 1975.

Documents:

Clearance from last port.
4 Crew Lists.
4 Passenger Lists
2 Cargo Manifests
18 Cargo Check lists
International Declaration of Health
Vaccination/Inoculation List (1) with valid dates.
International Vaccination Cards, these may be examined by Port Health.

Pilotage: Compulsory, 24 hour service arriving/departing. Require ETA to Agent 24 hours in advance. Pilot Station may be contacted on voice radio 2182 kHz, 2738 kHz and VHF Channels 16 and 12. Pilots board at quarantine anchorage buoy. Pilot boat has yellow hull and superstructure, 2 ft. freeboard. "Pilot" clearly painted on hull.

Anchorages: The harbour affords good anchorage in depths of 5 to 14 fathoms, clear of the entrance ranges southward. The Quarantine Anchorage is located about 2.5 miles East-northeastward of Pointe Lamintin.

Restrictions: See Sailing Directions for Prohibited Anchorages.

Max. Size: This ship is 495 ft. in length, with 69 ft. beam, we were accommodated easily. Passengers ships of 620 ft. in length are regular callers at the port. Maximum depths at the pier is 30 ft. Mean High Water Interval at the port is 08H 23M. Spring tides rise 1.5 ft. Currents in the approach set East in the Canal de la Gonave, and Northwest in the Canal de Saint Marc. All buoys, lights, and navigation aids are unreliable.

Health: Pratique is now granted at the dock. Ship displays "Q" flag until cleared.

Radio: ETAs to Agents/receivers are best sent through WNU (Tropical Radio) at New Orleans, Louisiana or ITT station at Lantana, Florida, these stations then telex direct. Port Pilots will relay messages to Agents on voice radio 2738 kHz. Short range reception on voice radio has been experienced.

Berthing: Main pier, has 1,700 ft. of berthing space on its Southern side with depths of 18 to 29.5 ft. Ship's always berth port side to, using the starboard anchor to assist in docking and undocking. A T-head pier with a pipe-line is located 2 miles Westward of the city. Mooring buoys lie off the end of this pier. It has been reported, (unverified) that this pier accommodated a tanker 560 ft. long, with a draft of 31.5 ft. in 1957.

Stevedores: Advise Agent tons per hatch at least 24 hours prior to arrival. Maximum amount of labour is available. Rate of discharging/loading is approximately 18 to 30 tons per gang hour on sacks, bales, cases, general cargo. Work after midnight is overtime with charges quite high.

Medical: Give Agent prior notice for any required medical attention. 3 hospitals available. Minor dental work can be accomplished. International Certificates with Cholera and Smallpox are required.

Density: 1025 as per this ship's test.

Fresh Water: None available at this time.

Fuel: None available at this time.

Developments: A 25 million dollar port expansion and construction project commenced October 1975 and should be completed October 1978. This new area is located 800 ft. North of the general cargo pier. From the shore in a Westerly direction the new pier shall extend 1,685 ft. in length, 469 ft. in width, with a working apron on the South side 81 ft. from the end of the ship's side. The pier will contain 2 warehouses; one 207 by 1,101 ft., and the other 180 by 447 ft. The Eastern end shall have 2 separate roll-on/roll-off sections. A container crane on rails shall traverse the entire South side working apron, capable of loads not to exceed 30 long tons. Dredging and filling has commenced and they are working towards a 30 ft. maximum depth at completion.

Gangway/Deck Watchmen: Cost unknown, supplied by Agent. Gangway watchman is recommended. If transit cargo is pilferable, I recommend using crew members for cargo hold security.

Hatches: (Automatic hatches) opening/closing normally carried out by stevedores with crew member supervision.

Customs Allowances: Bonded stores were not sealed, store lists were not required. Ship allowed each crew member 200 cigarettes. Local Customs Officials make no special requirements.

Cargo Gear: All loading/discharging by ship's gear. Fork lifts are available. There is a shortage of pallets and railroad flat cars which are used to accept cargo direct from the ship's gear on the dock. Warehouse space is limited.

Identification Cards: Shore passes not required, none issued by local authorities.

Consuls: United States of America; Panama; Lebanon; Republic of China, France.

Repairs: No facilities available.

Dry Docks: None available.

Repatriation: Possible.

Airport: 1 major airport. Located 40 minutes from the port area. Daily flights to North America. (Miami and New York)

Time: GMT plus 5 hours. No alterations to clocks during the year.

Holidays: December 5th Columbus Exploration Day; Christmas, New Year's Eve, New Year's Day. Cargo work can be arranged on most holidays at overtime rates.

Police/Ambulance/Fire: Utilise Agent for emergencies of this type, or have watchman make use of telephone from dock. "Fire". There are no international hose fittings on the dock, and limited means of handling shipboard fires from ashore.

Telephones: None available for placement on board the ship.

Services: Special services non-existent.

Shore Leave: Crew members are allowed ashore. No curfews, no passes required.

Port Regulations: Nothing unusual or out of the ordinary.

Delays: Possible berthing delays exist due to ship congestion. Delays in discharging may occur due to lack of warehouse space, pallets, or rail cars.

Agents: Agents and most officials including watchmen and stevedore supervisors speak English. All official documents and ship's clearance papers are written in French. The language spoken is predominately French (patois) with inflections that are easy on the ears, but difficult to utilise operationally.

AUTHORITY: Administration Portuaire de Port-au-Prince.

NOTES

Please also advise Shipping Guides Ltd.

Honduras

AMAPALA: 13.18 N. 87.39 W.

DOCUMENTS:

Maritime Declaration of Health.
Crew List, 3 legalised and 7 copies.
Provisions List, 3 legalised and 7 copies.
Passengers Disembarking List, 3 legalised and 7 copies.
Passengers in Transit List, 3 legalised and 7 copies.
Voyage Memorandum, 6 copies.
Cargo Manifest, 2 legalised and 14 copies.
Cargo Tally Books, 15 copies.
Mail List, 4 copies.

Documents are legalised at loading port by Honduran Consul or consul of friendly nation. If no consul, then by the Port Captain. 2 copies of Cargo Manifest, Freight List, Bills of Lading, and Stowage Plan should be airmailed to Agent in advance.

If documents legalised by the Port Captain, 1 copy of each manifest should be sent by airmail to "Secretaria Economia y Hacienda Tegucigalpa", and "Custom House, Amapala".

Shipmaster's report: Papers required for entering as follows:
10 Spanish Crew Lists with I.D. Nos.
10 Passenger Lists.
10 Store Lists.
3 Memorandum of Voyage.
1 Maritime Declaration of Health.
5 Mail Reports (only if carrying mail).

I.D. books asked for and checked with crew list. Bond not sealed. Shop not sealed.

PILOTAGE: Pilot available, to be ordered by Agent in advance.

ANCHORAGE: Open anchorage area in depths up to 32 ft.

RESTRICTIONS: Vessels enter and leave at high water only, max. recommended draft 28 ft.

MAX. SIZE: Vessels up to 10,000 g.r.t. have entered, with 30 ft. draft.

HEALTH: Vessels are cleared by Health Inspector on arrival. International Health regulations apply.

RADIO: Contact via "Tropical Radio".

TUGS: None available.

VHF: Agents on Channel 10.

STEVEDORES: Arranged by Agent. Working hours 0700–1200 hrs. and 1300–0700 hrs.

MEDICAL: No hospital facilities. Only minor cases can be dealt with locally.

FRESH WATER: Not available.

FUEL: Not available.

IDENTIFICATION CARDS: Not required.

CONSULS: Nicaragua, represented locally.

REPAIRS: Not possible.

TIME: GMT minus 6 hours, no alterations during year.

SHORE LEAVE: Allowed, no restrictions.

SHIPMASTER'S REPORT:

(1) I found that the safest approach is through the passage between Isla Conchaguita and Isla Jeanguera. It is also the best place to anchor and wait for a Pilot.

(2) The Charts covering this port do not appear accurate, and no further approach towards Amapala should be made without the guidance of a Pilot or a boat.

(3) There are no buoys.

(4) The passage from anchorage towards Amapala along the West Coast of Isla Del Tigre is very narrow and water depth recorded by ship's soundings gave only 24 ft. in places, with a maximum of 30 ft. There is room only to swing the ship on her axis.

(5) Pilot is available, or otherwise there is a boat guiding vessel into Amapala.

(6) Cargo operations are performed at anchorage about 3 cables from Amapala. Cargo is discharged into barges. Stevedores are not very professional and cargo damage may be expected. Many stevedores work in bare feet and thus accidents on board may be expected.

AUTHORITY: Port Commander.

AGENT: Servicios Portuarios S.A. de C.V. Cables "Seposa Amapala."

HENECAN: (Under construction)

New pier port at Henecan, (Gulf of Fonseca) Pacific Coast of Honduras with following details:

Location: On the mainland of the Pacific Coast of Honduras at a distance of about 20 nautical miles from Amapala and at a distance of about 3 nautical miles from San Lorenzo.

Draft limit: Only vessels with a maximum sailing draft of up to 22 ft. (high tide) can call Henecan for loading. However, port authorities are expected to dredge the entrance channel up to 28 ft. (low tide).

New pier: (under construction). T-shape with an overall length of 300 m. Actual draft at pier 22 ft. However, this too is subject to dredging up to 28 ft. (low tide).

The new port is expected to be finished in 1978. Then all vessels with a draft of less than 22 ft. have to call Henecan for loading/unloading. Vessels with a draft over 22 ft. will be operated as usual at Amapala. However this is subject to change after dredging is completed (which so far is unknown). Then all vessels have to call Henecan.

At this moment a Pilot (private) is available. The Port Authorities will, however, place a licensed Pilot at the port upon completion of dredging and when all buoys have been placed. Then the Pilot will be obligatory for the entrance channel to Henecan as well as for arriving and leaving the pier.

PUERTO CORTES: 15.50 N. 87.55 W. (See Plan Book)

DOCUMENTS:

Health Declaration. 2 copies.
Zarpe or Clearance Permit from the Last Port.
General Cargo Manifest (in ballast if that is the case) of all the cargo to be discharged in Puerto Cortes, and 14 copies.
Crew List and 10 copies.
Passengers in transit, or no passenger declaration and 10 copies.
Deratisation Certificate, only in first call.
Stores List and 8 copies.
Mail Sacks declaration (negative or positive).
Bills of Ladings (if some cargo is coming) 3 complete sets.
Hatch list and 5 copies.

All the original documents must be signed and stamped by the Honduran Consul at the port before calling Honduras and should be made in Spanish.

If no consul of Honduras available, documents to be legalised by consul of a friendly nation or by the Chamber of Commerce, stating the facts.

PILOTAGE: Compulsory for vessels over 300 g.r.t. ETA to the Agent, 72, 48 and 24 hours ahead of arrival required. Pilot on VHF Channels 16 and 6.

ANCHORAGES: Once the ship enters the bay, *if no berth space has been notified to the Master*, she should anchor at a distance beyond 0.5 miles from the nearest pier, and wait for the boarding of the official party to be granted free pratique.

RESTRICTIONS: Vessels may enter the port day or night but not visited by Port Authorities between 2000 hrs. to 0600 hrs., only in special cases.

MAX. SIZE: Dry cargo vessels up to 30 ft. draft. Tankers up to 43 ft. draft.

HEALTH: Pratique granted after Port Authorities (including doctor) board vessel between 0600–2000 hrs. Pratique granted if no contagious illnesses aboard, otherwise quarantine restrictions imposed. No automatic free pratique when arriving from another port of Honduras.

RADIO: Lantana Radio WOE. New Orleans Radio WNU. Limon TIM. Balboa Radio NBA. Miami Radio WAX. Messages routed via Tropical Radio.

Port Authority operates a VHF station HQSU, monitoring on 2738 kHz, but by appointment can reply in any other position. Telegrams to be routed via Tropical Radio. Lantana WOE. New Orleans WNU. Limon TIM. Balbao BNA. Miami WAX.

Ship's radio not to be used in port except for communication with the port authority. Vessel is fined if there is a violation. Also see "VHF".

VHF: Puerto Cortes Radio: Call sign "Cortes Radio". Channel 16. *Hours:* Weekdays 0600–2200; Saturdays 0800–1200 and Sundays Nil.

BERTHING: The Agent to supply information as to berth, and time of docking. Pilot will board the vessel and berth it, assisted by a launch to hold ropes. Departure should be effected when the despatch documents are on board and operations finished.

Pier No. (Texaco Pier), for tankers or ships loading diesel or lub-oil; depth 45 ft.
Pier No. 2 (Banana Pier) length is 810 ft.
Pier No. 3 630 ft.
Pier No. 4 1,020 ft.

STEVEDORES: Vessels must give accurate ETA at least 24 hours in advance to enable Agents order necessary gangs. Gangs ordered 0700 and 2100 hrs. working 12 hours (daytime) and 9 hours (night-time) excluding the meal hours (0600–0700; 1200–1300; 1700–1800 and 2300–2330). No work on Holy Friday, May 1st (Labour Day), other holidays work is possible with double payment.

MEDICAL: No advance notice necessary for medical attention, except in very urgent cases. At San Pedro Sula (35 miles by road) you can obtain very good medical service but several medical clinics are serving this Port. No inoculations required but Master should possess International Health Cards for each member of crew.

TANKERS: Discharge at Texaco Oil Refinery, cable address "Reftexa".

DENSITY: 1028/1030.

FRESH WATER: Water available at wharf face at 100 ft. intervals. Rate, approx. 8–10 t.p.h.

FUEL: All grades available. 24 hours notice is required for good service.

GANGWAY/DECK WATCHMEN: Shore watchmen not usually required and this service left to discretion of the Master.

OPENING/CLOSING HATCHES: On liners normally by crew with assistance stevedores, otherwise according Charter Party.

CERTIFICATES: On first call, Registered Tonnage Certificate; thereafter not required unless gross/net tonnage be changed.

CUSTOMS ALLOWANCE: No restrictions, free use on board. Customs officials check no sales shore without special permit.

IDENTIFICATION CARDS: New port regulations includes identification card must be shown to gate watchman when crew members come back aboard.

CONSULS: None in the port. American Consulate at Tegucigalpa, 200 miles by road.

REPAIRS: Local marine repair companies can undertake limited repairs of general nature; pre-advice recommended.
REPATRIATION: All facilities available for effecting crew change and repatriation by sea or air.
AIRPORT: International Airport Ramon Villeda Morales served by regular airlines. 35 miles by road.
TIME: GMT minus 6 hours, no changes during year.
HOLIDAYS: January 1st; April 14th; May 1st; Thursday, Friday and Saturday in Easter week; August 15th; September 15th; October 3rd, 12th and 21st; and December 25th. Cargo work can be arranged on those days, except on Good Friday, and May 1st (Labour Day).
TELEPHONES: Not customary except in United Fruit Co. pier (Tela Railroad Company, concessionary of banana pier) where telephones connected on board. Overseas calls may be arranged by Agent.
SHORE LEAVE: Permitted without restrictions.
SHIPMASTER'S REPORT: September 1978.
Pilotage: Pilotage compulsory. Pilot boards 2-4 cables off the berth, advance notice of 72, 48, and 24 hours required.
Restrictions: Vessels can enter and leave at any stage of the tide day and night. Vessels are able to leave the berth in an emergency without use of Pilot if the Ro-Ro berth is vacant and a tug available. Least depth of water in channel from sea to berth about 50 ft.
Max. Size: LOA 600 ft. Depth of water at banana berth is 33 ft. forward and 38 ft. aft. Max. draft 30 ft. There is a shoal patch about 150 ft. ahead of the berth.
Health: Authorities require 72, 48 and 24 hours notice of arrival.
Radio: Radio stations used when approaching the port were "WNU" and "TIM".
VHF: Port Authority, Pilot and Agent on Channel 16. Channel 14 also available.
Tugs: There are 2 tugs available, each 1,250 h.p. Vessels are able to dock and undock without the use of tugs.
Berthing: Banana Pier – position 15° 50.05′ N., 87° 57.35′ W. Distance from berth to entrance 2 miles. The nature of bottom at the berth is coral, mud and sand. Prior to arrival it is an advantage to have all derricks up as various equipment has to be brought on board.

Always starboard side alongside, starboard side banana lids can be opened on all decks prior to arrival.

The banana elevators are extremely close to the quay side and usually moved to the East end of the berth for docking purposes, but as vessel is making fast they are moved into position. Leave starboard gangway turned in until alongside and elevators moved. It is a good idea to turn in overside light fittings and on no account have a starboard list. The bollards are situated on the edge of the quay. The quay is concrete with wooden face, only about 1.5 ft. above the water.

Fresh water was limited due to recent hurricane and repairs to the water line, however 100 tons was obtained.

Four elevators used for loading. Work carried out around the clock, best hatch rate 48 t.p,h,

Ro-Ro facilities available, vessel moors with 2 anchors and stern to the quay. There are facilities for handling containers. Presently the container area is being expanded.
Currency: Lempiras. Two to the U.S. Dollar. If cable sent in advance U.S. Dollars can be obtained.
Diversion: Agents request, if diverted to a Honduran port, a diversion cable must be sent to the Agents of that port giving time/date/nationality/port of departure/and ETA. (This helps Agents with the documentation).
Medical: Doctor and hospital available.
Tankers: The Texaco Pier accepts tankers with a draft of 43 ft.
Fresh Water: Available.
Fuel: Bunker fuel, diesel oil and lubrication oils available.
Density: 1025.
Repairs: Facilities available for small repairs.
Surveyors: Available.
Services: Fresh provisions, groceries, meats and laundry services available. Contract work such as deck and engine room cleaning and painting can be undertaken, however, prices of contractors should be compared.

TELA: 15.47 N. 87.30 W.

DOCUMENTS:

1 original clearance
1 ,, Health Certificate.
1 ,, 16 copies Manifest.
1 ,, 11 ,, Cargo Book.
1 ,, 9 ,, Store List.
1 ,, 9 ,, Crew List.
1 ,, 9 ,, Passenger List.
1 ,, Baggage.
1 ,, Voyage Memorandum.

All documents must be in Spanish; Cargo Book should be in alphabetical order.
PILOTAGE: Pilot available if requested. There is a small boat that assists docking by handling mooring lines from vessel to wharf. 48 hours advance notice of ETA required.
ANCHORAGES: 1 mile out from wharf, 100 ft. or more; no boundaries.
MAX. SIZE: Max. permissible length 485 ft., breadth no restrictions, draft 30 ft.
HEALTH: Agents arrange pratique; in case of disease or fever aboard, the vessel will be placed in quarantine for a minimum of 5 days.
RADIO: WNU New Orleans and TIM Puerto Limon via Tropical Radio.
TUG: No tug available.
BERTHING: Time for berthing is from 0600 to 2000 hrs.
General Cargo Berth: East side of pier, starboard side alongside.
Banana Berth: West side of pier, port or starboard side alongside, depending on which side elevator space is required. 4 elevators available, type camel back. Rate per elevator 3,500 boxes per hour.
STEVEDORES: ETA advice should be given 48 hours prior to arrival in order to arrange gangs. Labour rates are subject to surcharge of 25%, 50%, 75% and 100% to cover overtime, depending on hour or day worked.

Gangs: For bananas: 180 men, 3 gangs. General cargo: No restrictions.
MEDICAL: Hospital facilities available, also inoculation, vaccination and certificates.
TANKERS: Discharging lines only, crude 12 in., diesel 6 in., spray oil 6 in. Berth available for 1 tanker, max. permitted draft 30 ft.
DENSITY: Average density in port is 1029.
FRESH WATER: Delivered by hoses at rate of 100 gallons per minute.
FUEL: Available, rate 250 t.p.h.
FIRE PRECAUTIONS: Extinguishers and water hoses available.
GANGWAY/DECK WATCHMEN: Watchmen can be obtained at day-time rates plus 25%, 50%, 75% and 100% to cover overtime, depending on the hour or day worked.
OPENING/CLOSING HATCHES: Work done by stevedores.
CERTIFICATES: Health and deratisation certificates needed.
CUSTOMS ALLOWANCES: 1 carton cigarettes and 1 bottle wine or spirits for each man.
CARGO GEAR: Must have current valid certificate for ship's gear.
IDENTIFICATION CARDS: Cards needed.
CONSULS: None.
REPAIRS: Only minor repairs.
REPATRIATION: Repatriation can be made on request by Master.
AIRPORT: Distance from wharf to airport is about 80 km. served by regular airlines; 4 flights per day which connect with Panamerican every day.
TIME: GMT minus 6 hours.
HOLIDAYS: January 1st, work possible; April 14th, work possible; May 1st, work possible; September 15th, work possible; October 3rd, work possible; October 12th, work possible; October 21st, work possible; December 25th, work possible. Thursday, Friday and Saturday of Holy Week – work possible except Friday.
POLICE/AMBULANCE/FIRE: Contact telephone operator.
TELEPHONES: No facilities for placing telephones on board.
GENERAL: Ships must have Honduran flag on board.
SHORE LEAVE: Crew members allowed ashore, providing they do not have any diseases.
DELAYS: Delays can be expected any time there are 2 ships docked.
AUTHORITY: Port Commandant – Chief of Customs.

NOTES

Please also advise Shipping Guides Ltd.

Hong Kong

HONG KONG: 22.18 N. 114.10 E. (See Plan Book)

HARBOUR LIMITS (Approximately): Western Entrance – the N.S. line between S.E. extremity of Tsing Yi Rock and the flashing light at S.W. corner of Green Island. Eastern Entrance – the N.E./S.W. line between the on-shore FL.W and the FL.R lights either side of the Lei Yue Mun Pass.

DOCUMENTS:

Marine Department (arrival)

Marine Department Shipping Report (Form MO. 144).
Certificate of Registry.
Passenger ship: Safety Certificate.
Passenger or cargo ship: Load Line Certificate.
Cargo ship: Radio Certificate.
Cargo ship: Safety Equipment Certificate.
Cargo ship: Safety Construction Certificate.
Ship's Articles of Agreement with the crew (if the ship is British, or is a foreign ship belonging to a nation not represented by a consul in Hong Kong).
Derating Certificate or Derating Exemption Certificate.
1 copy of the ship's Passenger List (if specifically requested).
Clearance Certificate from the Last Port.
1 copy of the Import Cargo Manifest (if specifically requested).
5 copies of the Dangerous Goods Manifest (if applicable).
Compulsory Insurance Certificate (Tankers).

Note: All the above documents/forms must be submitted to the Ocean Shipping Control Section of the Marine Department within 24 hours of a ship's arrival with the exception of the Dangerous Goods Manifest which should be submitted at least 48 hours prior to the vessel's arrival.

Marine Department (departure)

Application for Port Clearance (Form MO. 7).
5 copies of the ship's export Dangerous Goods Manifest (if specifically requested).
1 copy of the ship's Export Cargo Manifest (if specifically requested).

Port Health Officer (arrival only)

Maritime Declaration of Health.
1 copy of the ship's Passenger List.
1 copy of the Crew List.
Derating Certificate or Derating Exemption Certificate (whichever is applicable).
International Vaccination Certificate against smallpox for each passenger and Crew member on board who has, within the preceeding 14 days visited a smallpox infected country.

Note: The above documents/forms must be produced for the inspection of the Port Health Officer on boarding at the quarantine anchorage.

Department of Commerce and Industry (arrival and departure)

2 copies of the ship's Import/Export Cargo Manifest. 1 copy for Manifest Check Section, Trade Licensing Branch, 14th Floor, Ocean Centre and the other 1 copy for Manifest Section, Industry and Economic Division, Census and Statistics Department, 20th Floor, Kai Tak Commercial Building.
1 copy of Import/Export Statement in respect of dutiable goods (Forms TIC 309 and TIC 309A).
2 copies of the declaration in respect of dutiable stores required during a vessel's stay in port (Form TIC 303).

Immigration Officer (arrival)

2 Transit-Passenger Lists.
2 Landing-Passenger Lists.
3 Crew Lists.

Note: The above forms must be produced for the inspection of the Immigration Officer on boarding after the ship has been 'cleared' by the Port Health Officer.

(departure)

2 Lists Passengers boarding.
2 Lists Transit Passengers.
2 Crew Lists.

Post Office (arrival only)

1 copy of the Ship's Mail Manifest.

Hong Kong Police

1 copy of The List of Arms and Ammunition on board (Nil return required) to be handed in at the Entry and Clearance Office with Marine Department papers.

ARRIVAL ADVICE: On entering Hong Kong waters shipmasters should contact MARDEP on VHF Channel 12, and report their position, ETA at Pilot station, final berth, and intended route inwards, East or West. If entering from the East then the vessels mast height above the water should also be reported. (This is needed for information to the airport where the runway extends close North of the Hung Hom fairway). Shipmasters are also asked to report any other relevant information such as dangerous goods on board. If the vessel is taking a Pilot, reference should be made to the 'Sailing Directions' in the China Sea Pilot Vol. I, with regard to the positions of the Pilot stations, and Pilots should only be embarked or disembarked at these points. Additional radio reports to MARDEP during the vessels inward or outward passage aid in the safe movement of all vessels in the port and approaches.

APPROACHES: A. (Dry-cargo vessels): The approaches are reasonably free from hazards and are well marked by day and night. Vessels working at buoys with drafts up to 36 ft. are requested to enter port via the Western Entrance. Other vessels with drafts up to 36 ft. by Lei Yue Mun entrance.

B. (Tankers): The tankers which berth at the Esso Company installation at Tsing Yi, and at the Mobil installation, also at Tsing Yi enter the harbour, but with the exception of the approaches to the Esso Terminal which was specially dredged for the purposes of accommodating vessels at 42 ft. draft, there is no limitation on depth save that at the individual berth.

C. Buoyage. The system of buoyage used in Hong Kong harbour conforms to the uniform system of maritime buoyage adopted by the lighthouse authorities in Britain. The main stream of flood tide within the harbour limits is from East to West and buoyage is laid accordingly. Several terrestrial navigational beacons within the waters of Hong Kong are also painted to conform with the uniform system of maritime buoyage.

Compulsory traffic separation lanes are in force for both the East and West approaches. Up-to-date Admiralty charts should be consulted for details.

PILOTAGE: Although pilotage is not compulsory in the port, Pilots licensed by the Pilotage Board are available to board ships at either entrance on request. The Hong Kong Pilotage Association, provide pilotage services. Pilots generally board in-bound ships using the Eastern entrance in the vicinity of the Lei Yue Mun turning buoy (Lat. 22° 16.4′ N. Long. 114° 16.3′ E.) and disembark at the same point from outward-bound ships. At the Western entrance, Pilots embark and disembark to the West of Green Island. It is a contravention of regulation 3(1) of the Merchant Shipping (Control of Ports) Regulations, for any vessel to pick up or discharge a Pilot within a distance of 7.5 cables from the centre of either the Lei Yue Mun Pass or Sulphur Channel. Maximum speed inside harbour, 8 knots.

ANCHORAGES: Examination anchorages (quarantine and immigration) for clearance inwards are situated within the harbour limits to cover the entry of shipping from East and West. The principal dangerous goods anchorages are situated at the Western end of the harbour and at Pun Shan Sek (tankers), whilst there are others at Junk Bay, Tsuen Wan and Rocky Harbour.

An anchorage for the discharge of logs has been designated. This was necessary because logs, which were being discharged and stored within harbour limits were endangering small craft, waterside installations and navigation.

The Western examination anchorage works 24 hours a day whereas the Eastern examination anchorage works from 0700–1800 hrs.

See also "Shipmaster's Report"

MAX. SIZE: Largest vessels calling regularly have been, dry-cargo: container vessels, length 965 ft., with drafts up to 40 ft.; tankers length 776 ft., draft 42 ft. Maximum size governed by draft of vessel. No limit as to length and beam. Draft in harbour: "A" class buoys 22 ft. to 37 ft. "B" class buoys 19 ft. to 28 ft.

PRATIQUE: *Conditions under which a vessel may be granted radio pratique:*

(a) The vessel must not have called at a smallpox and/or plague infected port within 14 days prior to arrival at Hong Kong.

(b) If the vessel has called at a cholera-infected port within 5 days prior to arrival at Hong Kong, the Chief Port Health Officer or his delegated officer has full discretion in the granting of radio pratique.

(c) There are not more than 24 passengers on board at the time of arrival.

(d) A vessel carrying more than 24 passengers may be granted radio pratique if there is a ship's surgeon on board.

(e) The Master must furnish, through his shipping company or Agent, the following cabled information to the Port Health Office not more than 30 hours and not less than 8 hours before his expected time of arrival at Hong Kong:

(i) ports of call with dates of departures during the 14 days prior to arrival;
(ii) numbers of passengers and crew members on board;
(iii) a statement that all persons on board are healthy and in possession of valid International Certificates of Vaccination against smallpox for those who, within the preceeding 14 days have visited a smallpox infected country;
(iv) a statement indicating whether any case of infectious disease has occurred on board during the voyage;
(v) whether any person on board is sick;
(vi) the date of issue of the Deratting or Deratting Exemption Certificate;
(vii) whether the ship is an oil tanker, a cargo ship, a container ship or a LASH ship; and
(viii) whether foodstuffs are carried as cargo on board ship.

Notes:

1. Applications for radio pratique must be made by shipping companies or Agents. Application forms should be sent to Port Health Office, Li Po Chun Chambers, First Floor, Des Voeux Road, Central, during normal office hours (0900 to 1700 hrs. on Mondays to Fridays and 0900 to 1300 hrs. on Saturdays).

2. For urgent cases outside normal office hours, shipping companies or Agents may apply for radio pratique by telephone to the Port Health Office, Hong Kong Airport (Tel. 3-829284) during the following hours:

Mondays to Fridays	1700 to 2300 hrs.
Saturdays	1300 to 2300 hrs.
Sundays and Public Holidays	0900 to 2300 hrs.

All necessary information together with supporting documents must be submitted later in writing to Port Health Office, Li Po Chun Chambers.

3. No radio pratique will be granted between 2300 and 0900 hrs.

4. When radio pratique is granted, shipping companies or Agents will be responsible for notifying the Master concerned.

5. The granted radio pratique will automatically expire 24 hours after the stated expected time of arrival at Hong Kong.

6. The granted radio pratique will no longer be valid if there is any change in the health status on board the vessel concerned during the period from the submission of the application to the actual time of arrival of the vessel at Hong Kong. This means that the Master of the vessel concerned will have either to re-apply through his shipping company or Agent, giving the additional information, or to display the appropriate signal when approaching the Quarantine Anchorages:

Day: International Code flag "Q"

Night: A red light over a white light in a vertical line, 6 ft. apart.

7. Ships granted radio pratique will be required to display the following signal when entering Hong Kong waters:

Day: International Code flag "T.O."

Night: 3 white lights in a vertical line, 6 ft. apart.

8. Maritime Declaration of Health and Passengers and Crew list will have to be collected by the shipping companies or Agents and delivered during office hours to the Port Health Office, Li Po Chun Chambers within 24 hours of the ship's arrival.

IMMIGRATION: Immigration formalities take place at the Eastern or Western examination anchorages after clearance by the Port Health Authorities. Immigration launches are on duty 24 hours a day in the Western anchorage and from 0630 to 1800 hrs. in the Eastern anchorage throughout the year.

RADIO: Cable Agent via Radio Hong Kong call sign "VPS".

Signal Stations. 4 signal stations operated by the Marine Department are situated in the Eastern and Western approaches to, or within, the harbour limits as follows:

Eastern approaches: Waglan Island, (Lat. 22° 11′ N., Long. 114° 18.1′ E.). Western approaches: Green Island (Lat. 22° 17.2′ N., Long. 114° 06.6′ E.).

Marine Department Port Communications Centre, Lat. 22° 17.4′ N. Long. 114° 9.0′ E. North Point Signal Station, Lat. 22° 17.7′ N., Long. 114° 11.9′ E.

These stations are manned 24 hours a day throughout the year and contact can be made by means of international code flags or by signal lamp. In addition, the Marine Department Headquarters Signals Station can be contacted by VHF radio-telephone on Hague Plan Channel 12. Communication between the stations is provided by radio, land-line telephone and a teleprinter circuit. Telex: Marine Department Port Communication Centre is equipped with telex No. 63607. Answerback MARDEP HX.

It is mandatory for the Master of every ship arriving within signalling distance of any of the above signal stations to hoist the national colours and (if one shall exist) the house flag and the signal letters of the ship, and to identify the vessel to the signal station by visual signals if requested. On recognition of a ship in the approaches to Hong Kong, the name is immediately relayed to the Port Control Office of the Marine Department, and the ship's owners or Agents can be notified on request.

Wireless Telegraphy: Radio communication apparatus on board a merchant vessel is not permitted to be used while the vessel is within Hong Kong territorial waters except in the following circumstances:

When a vessel is proceeding through Hong Kong territorial waters such apparatus may be used to communicate on minimum power with the nearest coast station or, if communication with the nearest coast station is impracticable and the safe navigation of the vessel so requires, with a more distant coast station or another vessel;

For the purpose of summoning assistance on an occasion of danger to the life of any person or to the vessel;

For the purpose of carrying out experimental tests for which permission in writing must first be obtained.

During the period when tropical cyclone signals 8, 9 or 10 are in force, radio and television stations will extend their hours of operation around the clock, and will undertake broadcasting of tropical cyclone warnings in English and Chinese, at two minutes to the hour and half past the hour. Should the expected local conditions so warrant, warnings will be broadcast at quarter to and quarter past the hour. Warnings in English will be broadcast by individual announcers at each station. Radio Television Hong Kong and Commercial Radio will provide a Chinese announcer to broadcast warnings in Chinese from the broadcasting studio at the Royal Observatory.

If conditions are expected to worsen, tropical cyclone warnings may continue after the normal close down time of the stations, or commence before the usual starting time in the morning even though only the No. 1 signal is in force at that time. After consulting the Director, Royal Observatory, the Director of Broadcasting will decide whether or not to adopt either of these courses. He will inform Commercial Radio, HK-TVB, RTV and CTV of his intentions as early as possible.

Frequencies: Radio Television Hong Kong – Radio 1 (Chinese) 640 kHz: Radio 2 (Chinese) 94 mHz, 103.5 mHz, 103.1 mHz; Radio 3 (English) 545 kHz; Radio 4 (English) 91 mHz, 100.5 mHz, 100.9 mHz; Radio 5 (English) 96 mHz, 105.5 mHz. Commercial Radio – English Service 1050 kHz; Chinese Services Channel 1, 850 kHz, Channel 2, 610 kHz."

VHF: Control Station, Hong Kong Port Radio call sign "Mardep" Channel 12, 24 hours listening watch. Range up to 35 miles.

Maritime VHF Radio-telephone Service (Hague Plan): This service operates in Hong Kong on 2 international channels, Nos. 16 and 26. Channel 16 (156.8 mc/s) is the simplex distress and calling frequency on which contact is made between shore and ship before changing over to the public correspondence channel, No. 26. The latter is a duplex channel and Hong Kong transmits on 161.9 mc/s and receives from ships on 157.3 mc/s.

Local connection to the service is *via* the Hong Kong Telephone Company and is made in the same way as for overseas radio-telephone calls by dialling "100". The local operator should then be informed that a telephone call is required on "the Maritime VHF Hague Plan Service". The operator will ask for details of the call, such as the name of the ship and the person required, and will then connect the call *via* Cable Wireless. Calls can also be sent from ship to shore. The range is about 50 miles and the service is available at all times of the day and night.

Harbour phones: If requested the Hong Kong Telephone Company will install and maintain VHF radio telephones on ships at buoys in the harbour for the duration of the ships stay in port. Calls may be made between any two ships so equipped and between a ship and any telephone number on the Hong Kong Telephone Company network.

Ship to shore service: Hong Kong Telephone Company will also provide ship to shore telephone service by means of land lines at selected wharf locations. The Container Port is included.

Shipmaster's Report: VHF Channel 6 is used for search and rescue.

TUGS: Available for berthing and unberthing. Advance booking is required. See Table B.

WHARVES: *China Merchants S.N. Co. Limited* – berths suitable for coastal shipping:

		Length (ft.)	Depth (ft.)
West Point	Berth No. (1) E.	320	35
	Berth No. (2) W.	320	35
H. K. and Kowloon Wharf Co.			
	Ocean Terminal	1,250	35
	Pier No. (3) S.	600	32
	Pier No. (3) N.	600	34
	Pier No. (4) S.	700	32
	Pier No. (4) N.	700	33
	Pier No. (5) S.	800	34
	Pier No. (5) N.	800	36
North Point Wharves			
	No. (1) E.	700	30
	No. (2) W.	530	30
Kwai Chung Container Terminal			
	6 berths	1,000	40
Whampoa Terminal Ltd.		600	30

BERTHING: Berthing of dry-cargo vessels alongside wharf can be performed any time during day and night. Berthing at tanker wharf not permissible after sunset. Ships carrying explosives must obtain permission from the Marine Department before berthing is allotted.

When berthing at Kowloon Wharf signals will be exhibited on the signal station on top of the Kowloon Star Ferry pier. Code flag Y by day and 1 red light over green light at night indicates anchor and await instructions. Crossed bamboo poles on which are displayed code flags N and B, when sited at the end of a pier denotes that the vessel is required to berth stern to the praya wall.

Boatmen. Labour to handle ships' moorings lines when berthing and unberthing at any of the wharves in Hong Kong waters is supplied by the owners of the wharf concerned, the cost being included in the berthing fee. For berthing at a Marine Department mooring buoy it is usual for the ship's Agent to arrange for boatmen to handle the ship's slip wire and anchor cable, unless the ship's crew undertake this task. The services of boatmen are generally obtained through the Hong Kong Pilotage Association. For night berthing 2 boats are normally required – one to handle the wire and cable and the other to provide a lighted marker for the mooring buoy.

Mooring Buoys. See "Max. size" All ships are required to secure to Marine Department mooring buoys by their chain cable. The maximum length of a ship permitted to berth at an "A" class mooring is 600 ft., the swing circle encompassing each buoy having a radius of 700 ft. The maximum length of a ship permitted to berth at a "B" class mooring is 450 ft., the radius of swing circle around such buoys being 550 ft. It is therefore within the limits of safety for a vessel, when secured to a Marine Department mooring, to slack out to "1 shackle on the windlass" and still clear ships berthed at adjacent buoys, except in exceptional circumstances. As all Marine Department moorings are of the 1-legged type, it is permissible, should circumstances make it necessary, for a ship, when attempting to secure to a mooring, to drop an anchor at not less than 50 feet from the buoy without fouling the mooring chain. It should be noted, however, that moorings sited within the man-of-war anchorage and the Hongkong and Whampoa Dock Company's private mooring H.W.D. No. 1 in Hung Hom Bay are either of the 2 or 3-legged type, and it is therefore not permissible to use an anchor when berthing.

44 "A" class mooring buoys and 26 "B" class mooring buoys for ocean going vessels. Additionally 2 "B" class mooring buoys available at Yam O Bay, Lantan Island, for vessels with cargoes of logs.

TANKERS: Any leaking of oil to water will be subjected to heavy fines. If not gas-freed, not allowed through harbour. Max. draft for berthing 42 ft. See Table A.

Table A. OIL INSTALLATIONS

Company	*Location*	*Length of berth*	*Depth alongside (Chart Datum)*	*Grade of oil*	*Capacity (water tons)*	*Delivery rate*	*Hose connection*
(i) Shell Co. (H.K.) Ltd.	Kwun Tong	670′	34′	Boiler fuel	4,500	120	6″

	M.V. Esso Hok Un	Boiler fuel or Marine diesel	1,600	500

STEVEDORES: The following table shows the average handling rates per gang hour:

Cargo	*Place*	*Loads tons per gang hour*	*Discharge tons per gang hour*
General	Wharf	12	15
General	Stream	10	12
Bale or bag	Wharf	20	25
Bale or bag	Stream	15	20

Stevedores work 24 hours per day except Mid-Autumn Festival and Chinese New Year Holidays.

DENSITY: 1017.

FRESH WATER: Available but the supply is sometimes limited, depending on the storage levels in Hong Kong's reservoirs. The supply to ships is made at commercial wharves and from water boats. See Table C.

FUEL: Excellent facilities exist for bunkering vessels with fuel oil and coal. Fuel oil can be obtained either at the wharves adjacent to the oil installation, or from harbour oilers owned and operated by the oil companies. Fuel oil from these vessels can be pumped on board without impeding cargo operations. Adequate stocks of good quality bunker coal suitable for coal-fired marine boilers are maintained in the port. Fuel oil available with viscosity up to 1,000 sec. Redwood. 24 hours notice for supply is required. Also gas oil and marine diesel available. See Table D.

FIRE PRECAUTIONS: The Fire Services Department operates six fire boats, the largest being the 350 ton "Alexander Grantham". It has an output capacity of 45,000 litres of water and 32,850 litres of foam a minute through a battery of monitors. This vessel is equipped to deal with any type of fire on any size vessel, and is designed to operate both in port and at sea.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: Following certificates to be presented to the Marine Office before clearance could be granted:

Ship's Register and/or Tonnage Certificate.
Load Line Certificate.
Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Derating Certificate or Derat Exempt Certificate.
Last Port Clearance.

CARGO GEAR: Normal routine gear, wire and rope slings, nets, grabs, boardtrays and floating cranes up to 100 tons available. Vessel's cargo gear must be used for working cargo at all alongside berths.

IDENTIFICATION CARDS: No identification card is required for crew or passengers going ashore. When the vessel has exceeded a stay of 14 days in port, all crew members must deliver to the Harbour Control Office, Immigration Department through the agents a signed copy of the "Immigration Arrival Card."

CONSULS: The following countries maintain consular offices in Hong Kong:

Argentina
Australia
Austria
Belgium
Brazil
Burma
Canada
Colombia
Costa Rica
Cuba
Denmark
Dominican Republic
Ecuador
Egypt
El Salvador
Finland
France
Germany
Great Britain
Greece
Guatemala
Honduras
India
Indonesia
Iran
Irish Republic
Israel
Italy
Japan
Jordan
Khmer Republic
Korea
Lebanon
Mexico
Nauru
Netherlands
New Zealand
Nicaragua
Nigeria
Norway
Pakistan
Panama
Peru
Phillipines
Portugal
Singapore
South Africa
Spain
Sweden
Switzerland
Thailand
U.S.A.
Uruguay
Venezuela
Vietnam

REPAIRS: In addition to ship and engine maintenance and repair work, the dockyards have facilities for many miscellaneous services such as are provided by modern dockyards. These include physical tests on materials such as anchors and cables, for which test certificates can be supplied, chemical analysis, drawing office requirements, chemical cleaning of engines and boilers, shot and sand blasting, zinc spraying to name but a few.

DRY DOCKS:

Hong Kong United Dockyards Ltd. (Taikoo Yard): Drydock at Quarry Bay, length 787 ft., width 87 ft. Floating dock, length over platforms 572 ft., width 78 ft., net lifting capacity 11,500 tonnes (Termination of operations at Taikoo are scheduled for the end of 1978, after which floating drydock and yard facilities will be transferred to Tsing Yi.)

Hong Kong United Dockyards Ltd. (Kowloon Yard): 3 drydocks of which the largest has a length of 700 ft., width of 87 ft.

Hong Kong United Dockyards Ltd. (New yard at Tsing Yi): Floating dock, length over platforms 788 ft., width 108 ft., net lifting capacity 20,000 tonnes.

Island Navigation Corporation: S.W. Tsing Yi Island. Floating dock present maximum capacity 30,000 tonnes.

REPATRIATION: All formalities connected with engagement and discharge on board British ships, and on foreign ships whose flag is not represented by a consular officer resident in Hong Kong, are required by law to be conducted at the Crew Division Office. Hong Kong continues to be one of the main recruitment centres of Asian seamen and a Seamen's Registry Office, which is an adjunct to the Seaman's Recruiting Office, under the same division, maintains records of all Hong Kong seamen. The Seamen's Recruiting Office controls the recruitment, selection and supply of Chinese seamen to ships requiring them, and is situated at the Rumsey Street Reclamation, adjacent to the Headquarters.

Seamen's Travel Documents. The Hong Kong Government Seaman's Service Record Book (Seaman's Discharge Book) is issued by the Marine Department and is a record of employment. The Hong Kong Government Seaman's Identity Book is issued by the Immigration Department and enables the holder to return to Hong Kong without a visa during the validity of the book (initially 3 years, with 3-year renewals), and also within 12 months after the expiry of the validity of the book.

A Seaman's Certificate of Nationality and Identity is issued at the Immigration Department only to seamen of British nationality, whereas the Seaman's Discharge Book and the Seaman's Identity Book may also be issued to alien seamen. It is the equivalent of a British passport and no visa is required for return to Hong Kong.

All Crew members signing-off for repatriation must first obtain permission from the Director of Immigration. All crew arriving to join vessel must produce a guarantee letter through the Agents responsible for all maintenances and other eventual expenses.

AIRPORT: Regular International flights. Airstrip capable of any size of jet planes. Transportation from port to airport terminal about 40 minutes bus drive.

TELEPHONES: Are available at all alongside berths for connection on board ship.

TIME: Standard time kept in the colony is 8 hours in advance of GMT. Summer Time, which is 1 hour in advance of Standard Time, is kept from 0330 hrs. on the first Sunday after 15th April to 0330 hrs. on the first Sunday after 15th October, each year.

HOLIDAYS: Public holidays in Hong Kong occur mainly on festivals whose date is governed by the lunar calendar.

Every Sunday; First week-day in January; Chinese New Year's Day; Second day of Chinese New Year; Third day of Chinese New Year; General holiday in lieu of that for the Ching Ming Festival; Good Friday; Day following Good Friday (Ching Ming Festival); Easter Monday; Birthday of Her Majesty the Queen; Tuen Ng Festival; First week-day in July; First Monday in August; Last Monday in August, which shall be Liberation Day; Day following Chinese Mid-Autumn Festival Day; Day following Chung Yeung Festival: Christmas Day; First week-day after Christmas Day.

POLICE/AMBULANCE/FIRE: When the services of the fire brigade, immigration, port health or police are required, appropriate signals should be made in accordance with the list of "Hong Kong Port Signals". The Marine Division of the Police is responsible for internal port security. Its fleet of launches maintain constant patrols in Hong Kong's territorial waters.

GENERAL: No waste to be disposed into harbour. A free refuse disposal service is available for domestic refuse. Ships agents can arrange this through Marine Department. Chain required for mooring to buoy. Unnecessary use of ship's sirens prohibited.

SERVICES: Services available including tank cleaning, painting, washing, compass adjusting, calibration of direction finder, radar repairs, 24 hours service laundry, supply of stores and provisions, motor-boats service between ship and shore.

SHORE LEAVE: Crew members are usually allowed ashore.

CLASSIFICATION SOCIETIES: The following Classification Societies with British technical committees are represented by their own exclusive officers in Hong Kong: Lloyds Register of Shipping, 1908-09, Hutchinson House, 10, Harcourt Road, Hong Kong; The American Bureau of Shipping, 1203-4 Wah Kwong Building, 48-66 Hennessy Road, 12/F., Wanchai, Hong Kong; Bureau Veritas, 2107 International Building, Des Voeux Road, Central, Hong Kong; Det Norske Veritas, 3407, Gammon House, 12, Harcourt Road, Hong Kong; Germanischer Lloyds, c/o Carmichael & Clarke Ltd., 828-831, Swire House, Hong Kong.

WEATHER: 1st May to 31st October usually considered as typhoon season. No operation of cargo when typhoon signal No. 3 or upward is hoisted. Also see "Radio".

DEVELOPMENT: The central fairway has been dredged to – 36 ft. Reclamation continues in various areas within the harbour. Additional 'Public Cargo Working Areas' are near completion and others planned.

AUTHORITY: Director of Marine.

AGENT: Shipping & Transport Services Ltd., Room 704 Hang Chong Bldg., 5 Queen's Rd. Central HK, Hong Kong. Telephone: 249069-74. Cables: Mainstay HX. Telex: 83173 Mstay HX.

ISAFJORD: 66.05 N. 23.06 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: TFZ Isafjord Radio 2182 kc/s. To call Pilot use morse lamps or whistle "G".
ANCHORAGE: In Fjord, depth of 6 fathoms.
MAX. SIZE: Dry cargo vessels up to 4,000 g.r.t. Tankers up to 30 ft. draft.
HEALTH: Inform Agent.
RADIO: TFZ 2182 kc/s.
TUGS: Not required.
MEDICAL: Inform Agent 1 hour in advance. Hospital available.
FRESH WATER: Always available through hose-pipes.
FUEL: All grades available advance notice required is 2 hours.
GANGWAY/DECK WATCHMEN: Necessary. Carried out by crew.
OPENING/CLOSING HATCHES: Performed by crew.
CERTIFICATES: All relevant certificates required.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes each crew member, 600 for Master; Wine/Spirits: 2 bottles for each crew member, 6 bottles for Master.
IDENTIFICATION CARDS: Not required.
CONSULS: British, German, Norwegian, Swedish, Danish.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 small dry dock available.
REPATRIATION: No facilities exist.
AIRPORT: Distance from port 2 miles, regular flights.
TIME: GMT. No change.
HOLIDAYS: Work carried out every day.
POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, tel. 3258.
TELEPHONES: None available.
SERVICES: Compass adjusting, radar, echomaster, specialists.
SHORE LEAVE: Allowed.
AUTHORITY: Captain of the Port.

KEFLAVIK-NJAROVIK: 64.00 N. 22.33 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilotage is compulsory for vessels over 100 tons net. Pilot is available for all vessels 24 hours per day and is reached via Reykjavik Radio. Pilot boards vessel 1 mile outside Vatnsnes.
ANCHORAGE: Outside the harbour in depths of 27 m. with good holding ground.
TUGS: Use of tug is not necessary.
BERTHING: Port has concrete pier which will be extended for a length of 110 m., and a wooden quay 45 m. in length. Depth of water in harbour and alongside wharves is 20 to 45 ft. Entrance is easy for access.
STEVEDORES: Working hours: 8 hours per day 0800 to 1700 hrs.
FRESH WATER: Available through hose connection on the quay.
FUEL: Available.
REPAIRS: 2 shipyards available.
AIRPORT: Keflavik International Airport is only 4 km. away.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All Tel. 2222.
TELEPHONES: None available on board.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

NESKAUPSTADUR, Nordfjordur: 65.09 N. 13.41 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Provision List.
Manifests and Ship's Papers.
PILOTAGE: No Pilots. Road clear, keep in middle of fjord.
ANCHORAGES: Depending wind. With North or N.W. winds anchor towards South coast and well in the fjord. When N.E. off town towards North coast, but keep clear of small boat moorings.
MAX. SIZE: Length/breadth no restriction. Main quay is 70 m. long and it is built right out to the steep bank at the coast. Depth close to jetty 7 m. but increases quickly.
HEALTH: Free pratique automatic from Customs Officer. Radio for doctor if illness on board.
RADIO: Neskaupstadur Radio 2182 kc/s. (TFM) 24 hour watch. VHF, Channels 16 and 26. Range approximately 40 miles.
TUGS: No tugs but large motor-boats are normally obtainable if necessary.
BERTHING: No specific requirements unless over 7 m. draft, when fendering required.
STEVEDORES: If possible 24 hours ETA. Preferably before 1600 hrs. for commencing next morning. Load or discharge rates according to goods.
MEDICAL: Always send advance notice of required medical attention. Hospital available, also 3 doctors and dentist.
TANKERS: Diameters of lines 4 in. and 6 in. Oil companies BP and Shell have their own small quays. The third company Esso uses BP jetty.
DENSITY: Normal.
FRESH WATER: Shore line on jetty. No barge.
FUEL: Diesel oil only.
DEVELOPMENTS: No expected draft increases. New berths are under construction but will take unforeseen time.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCE: 200 cigarettes a week while in Iceland. Only 1 allowance of spirit, i.e. on arrival 1 to 3 bottles according to occupation.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark tel. 199 or 330. France tel. 14 and 19.
REPAIRS: Limited repairs to engines, hull and deck. Good repairs to radars, sounders, tiller pilots, etc.
DRY DOCKS: None. 1 slipway, 450 tons.
REPATRIATION: Winter flights twice a week or more. Summer every day.
AIRPORT: Distance 3 km.
TIME: GMT, no alterations.
HOLIDAYS: Last Thursday April; 17th June; 1st May; 25th and 26th Dec.; New Year, etc. If work is carried out 31st Dec., 24th Dec., Saturday before Easter and Whitsun double pay is claimed.
POLICE/AMBULANCE/FIRE: Telephone office at shore end jetty.
TELEPHONES: No arrangement to place telephones on board.
SERVICES: No tank-cleaning equipment. No discharge of tank-washings. Compass adjusting available.
SHORE LEAVE: Allowed.
DELAYS: None except if berth not available.

PATREKSFJORDUR: 65.35 N. 23.59 W.

DOCUMENTS: 8 Crew Lists, Passenger Lists, Custom Documents, Health Documents, Manifests, Bills of Lading, Ship's Papers.
PILOTAGE: Pilotage not compulsory, but if needed then contact Radio Patreksfjordur on 2182 M.F.
ANCHORAGE: Anchorage is sheltered by the peninsula.
MAX. SIZE: See "Berthing".
RADIO: Radio Patreksfjordur on 2182 M.F.
TUGS: Available.
BERTHING: The entrance has a depth of 4.7 m. to 4.9 m. (15.5 to 16 ft.) at LLWST. The harbour has a depth of 6.4 m. (21 ft.) at LW, and 10 m. (33 ft.) at HW. 320 m. of quayage with depths from 5.5 m. to 5.8 m. (18 to 19 ft.) alongside. The harbour can be entered by day and night.
STEVEDORES: Working hours 0800 to 1900 hrs.
MEDICAL: Hospital available, contact through radio.
FRESH WATER: Available. No notice required.
FUEL: Available. No advance notice required.
REPAIRS: Machine-shop. General repairs can be effected. Diver obtainable.
AIRPORT: About 26 km. distance from harbour. Regular service, by airlines.
TIME: GMT. No change.
SHORE LEAVE: Allowed.
AUTHORITY: Patrekshofn, Patreksfiroi.

REYKJAVIK: 64.09 N. 21.50 W. (See Plan Book)

DOCUMENTS:
For the Immigration Office
1 Crew List.
1 Passenger List.
For Customs Authority
Master's Report on vessel's arrival from abroad.
Master's Certificate with Manifests of all goods.
Master's Certificate with Manifests of goods to each port of discharge.
Health Declaration.
List of Provisions and other Stores in ship.
Ordinary procedure at least 5 copies of each manifest (3 for customs).
PILOTAGE: Pilotage compulsory. Telegraphic address: Harbour Master, Harbour Office, Reykjavik. Desirable advance notice of ETA 24 hours and again notice 3 hours before expected time of arrival. VHF working Channel 12 at Pilot station and pilot boats. All day round watch.

Pilot boat: Grey hull with red and white deckhouse. International signals used if necessary. Pilot boat leaves harbour on request and meets vessel up to 1 naut. mile off Grotta (East of buoy 6): Most frequent boarding place is buoy 7 Kollafjordur.
ANCHORAGE: Good anchorage at Kollafjordur in 30 to 35 m. water 1.5 miles North of Engey lighthouse. Anchorage prohibited in neighbourhood of harbour entrance.
RESTRICTIONS: All day service. Draft in old harbour restricted at MLWST to 18 ft. In Sundahofn to 26 ft. No other restriction.
MAX. SIZE: Longest straight quay 244 m. (800 ft.). Breadth unrestricted. Depth 26 ft. at MLWST (29 ft. at MLWNT). At present 3 installations for oil carriers to discharge through submerged pipelines. Moorings for about 20,000 d.w.t. ships and draft restriction to 21 ft. in the approach to one of these installations.
HEALTH: Pratique obtained through customs authorities. In case of suspected disease notify port office or Agent in advance.
RADIO: Reykjavik Radio TFA.

RADAR/VHF: No harbour radar. Pilot office can be contacted by VHF Channel 16. Working Channels 12 and 14.

TUGS: Tugs meet vessels on roadstead. Ship's lines used.

BERTHING: Bigger vessels preferably handled at high water.

STEVEDORES: Stevedoring must be arranged in advance preferably by Agent.

MEDICAL: Medical attention available without notice. For hospital stay or surgical operation advance notice desirable, either through Agent or port office.

TANKERS: Pipe-lines diameter for discharging is 8 in.

DENSITY: Salinity varies from 33.6% to 35.0% giving sea water density about 1027 in average.

FRESH WATER: Water delivered from taps at quay at rate of 20–30 t.p.h, on the roadstead delivered by tug with 50 cu. m. water-tank.

FUEL: Grade of fuel oil 200–400 per second. Supplied by oil-pipe or by barge. If supplied by barge then 1 day's notice required.

FIRE PRECAUTIONS: Ordinary precautions for handling of dangerous goods applied.

DEVELOPMENTS: In a new harbour area – Sundahofn – quay construction, dredging and reclamation just finished. Length of quay 480 m. and 70 acres storage area under development. Discussion is taking place on new oil landing facilities to accommodate up to 70,000 t. tankers.

GANGWAY/DECK WATCHMEN: Ship's gangway to be used. Watchmen services from ashore not necessary but can be arranged if asked for.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CERTIFICATES:

1. Certificate of Nationality.
2. International Tonnage Certificate.
3. Certificate of Seaworthiness.
4. Cargo Ship Safety Construction Certificate.
5. Cargo Ship Safety Equipment Certificate.
6. Cargo Ship Safety Radiotelegraphy Certificate or Cargo Ship Safety Radiotelephony Certificate.
7. International Load Line Certificate.

Passenger ships must have certificates No. 1, 2, 3, 7 and in addition Passenger Ship Safety Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent. 0.75 litre beverage, 24 bottles beer.

IDENTIFICATION CARDS: Identification card must be carried.

DRY DOCKS: Only slipways available up to 2,000 metric tons weight. Dimensions: Length 85 m., breadth 13.6 m.

REPATRIATION: Can be arranged.

AIRPORTS: Reykjavik Airport within 10 minutes drive. Mostly for local routes. Keflavik Airport 50 km. distance, served regularly by airlines both to Europe and America.

TIME: Icelandic summertime used all year round and is same as GMT.

HOLIDAYS: January 1 (New Year's Day); Maundy Thursday; Good Friday; Easter Monday; May 1; Ascension Day; Whit Monday; June 17 (National Day); First Monday in August (Bank Holiday); Christmas Day and Second Christmas Day. On Christmas Eve and New Year's Eve work stops at noon. Dock work goes on on Bank Holiday and by Labour Union permission work may be carried out on Saturday against overtime payment and exceptionally at night until 2200 hrs.

POLICE/AMBULANCE/FIRE: Police 11166, Ambulance 11100; Fire 11100.

TELEPHONES: Telephone connection can be arranged at some berths in the old harbour and in Sundahofn telephone connections will be at the quay.

GENERAL: Engines may not be run while ship is berthed.

SERVICES: Compass adjusting carried out by private firm as well as tank cleaning.

SHORE LEAVE: Crew members are allowed ashore.

DELAYS: Normally no delay is to be expected beyond that caused by normal customs clearance.

AUTHORITY: Reykjavik Port Authority.

SIGLUFJORD: 66.10 N. 18.50 W.

DOCUMENTS: As for "Reykjavik".

PILOTAGE: Compulsory. Pilot meets vessel about 200 m. from harbour entrance.

ANCHORAGE: East of harbour in depths according to draft 25 m. to 30 m. good holding ground. Gales from North set heavy sea, vessels then seek anchorage in small bay S.W. of Siglunes.

RADIO: Siglufjordur Radio TFX.

TUGS: None available.

BERTHING: There are several piers and wharves inside the North Mole, 3 quays used by larger vessels have depths up to 23 ft. at LW.

Quays: Hafnagardur, on the South side of North Mole, has a length of about 125 m., with a depth of 6.5 m. (21.3 ft.) alongside. Londunarbryggja has a length of 100 m., with a depth of 7 m. (23 ft.) alongside. Baejarbryggjan (Town Quay) has a length of about 100 m. with a depth of 6 m. (19.7 ft.) alongside.

STEVEDORES: Available. Working hours 0700 to 1200 hrs. and 1300 to 1700 hrs; overtime can be arranged.

MEDICAL: All facilities available.

FRESH WATER: Available.

FUEL: Available in general grades only.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Stevedores normally perform this work.

CARGO GEAR: Ship's gear (no cranes).

IDENTIFICATION CARDS: Not required.

CONSULS:

Denmark Tel. 71232 Norway Tel. 71160 Sweden Tel. 71421

REPAIRS: For moderate size vessels can be obtained. Diver available.

TIME: GMT. No change.

POLICE/AMBULANCE/FIRE: All tel. 71170.

SHORE LEAVE: Allowed.

AUTHORITY: Captain of the Port.

SKAGASTROND: 65.50 N. 20.20 W.

DOCUMENTS: As for "Reykjavik".

PILOTAGE: Pilots are available. When approaching port, order Pilot through Agent if required.

MAX. SIZE: Draft max. 19 ft.

MEDICAL: Doctor available but located in Blonduos 20 km. away, doctor visits Skagastrond 3 days a week.

FRESH WATER: Available.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

REPAIRS: Small repairs available.

AIRPORT: Nearest 20 km. away in Blonduos.

TIME: GMT. No change.

POLICE/AMBULANCE/FIRE: Police Station and Firemen in the port.

TELEPHONES: Available.

SHORE LEAVE: Allowed.

AUTHORITY: Captain of the Port.

VESTMANNAEYJAR: 63.30 N. 20.14 W.

(See Plan Book)

DOCUMENTS:

Health Certificate.
Crew List.
Passenger List.
Manifest.
Ship's Register.

PILOTAGE: Pilotage compulsory, day and night service. Ship to advise over Vestmannaeyjar Radio ETA. Pilot always available but 1 hour's advance ETA is required.

ANCHORAGE: There are anchorages with depths from 24 m. to 34 m., good holding ground about 0.5 miles North of harbour and on North side of peninsula in depths of 28 m. to 34 m.; this anchorage is exposed to winds between West and North.

RESTRICTIONS: No restrictions except for largest vessels. They must enter at high tide.

MAX. SIZE: 5,000 g.r.t.

RADIO: Vestmannaeyjar Radio. VHF available.

TUGS: Normally join in-coming vessels at anchorage. The use of tug is optional. 1 Tug, 500 hp.

STEVEDORES: Available. Ordered by Agent. Working hours: 0800-1700 hrs., Monday–Friday.

CRANES: 2 mobile cranes, capacity up to 15 tons.

MEDICAL: Not necessary to receive advance notice. Hospital facilities and doctors available.

TANKERS: Discharge lines, 7 in. No deballasting facilities available.

FRESH WATER: Shore installations on every berth.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: For each crew member; 100 cigarettes or 20 cigars or 100 grm. tobacco, and 1 bottle spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: Denmark, Germany, Great Britain, Norway, Sweden. To be called through Vestmannaeyjar Radio.
REPAIRS: All repairs possible.
AIRPORT: Local airport. Daily connection to Reykjavik.
TIME: Local time GMT.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1 May); Ascension Day; Whit Monday; National Festival Day (17 June); Prayer Day; Christmas Day (25 December). No work on New Year's Day, Good Friday, Easter Sunday, Whit Sunday, 17 June, Christmas Day.
POLICE/AMBULANCE/FIRE: All tel. 1666.
SERVICES: Radio, radar services etc. Divers available.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Depth of entrance to harbour to be increased to 6.5 m. New Quays on North Side of harbour to be built in the near future.
AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

COURTESY FLAG: Correct flag to be flown by foreign ships visiting Indian ports is Indian Merchant Navy Ensign (a red flag with a length of one and one half times the width and with National Flag of India superimposed in top quarter next to staff) and not Indian National flag.

SHIP'S OFFICER'S REPORT: Apart from the various forms and Crew Lists, etc., the Customs Boarding Officer also requires a List of Private Property in the possession of the Master, officers and crew on Form No. IV in duplicate and the local Agents need 2 more copies of the same for clearing the vessel inward. This procedure is followed when a vessel arrives from abroad or even when she is arriving from an Indian Port. It is common in both the cases.

ALLEPPEY: 09.29 N. 76.23 E.

PORT LIMITS: On the North by a line drawn from the North boundary pillar (white masonry structure) to 7 fathoms of water. On the South by a line drawn from the South boundary pillar, S. W. to 5 fathoms of water and thereon West to 7 fathoms of water. On the West by a line running North to South joining the Northern and Southern boundary lines. On the East by the beach road from the North boundary pillar to a stone on the beach road 220 ft. East of South boundary pillar.

DOCUMENTS:

(*a*) For Port Office:

Last port clearance (original for verification and return). Ships' Registry (original for verification and return). Load Line Certificate (for perusal and return). Safety Radio Telegraphy Certificate (for perusal and return). Safety Equipment Certificate (for perusal and return). Passenger List (1). Crew List (1). Deck Cargo Certificate (1).

(*b*) For Customs:

Application for entry inwards. Last Port clearance. Port Office Entry Certificate. Arrival report. Particulars required by customs in approved form. Favour Parcel Certificate. Gift Parcel Certificate. Health Report. Opium Certificate. Arms and Ammunition Certificate. Import manifest. Passengers list. Storelist, crew list, and private property declaration. Ship's currency declaration. ILH receipt.

PILOTAGE: None. Open roadstead port.

ANCHORAGES: Approach to port free from navigational dangers. Anchorage provides good holding ground.

MAX. SIZE: Being open roadstead, vessels of any size can anchor according to draft.

HEALTH: Port Health Officer may be contacted by telegram addressed CYCLONE ALLEPPEY for issue of pratique certificate. Procedure to be followed in Indian Port Health Rules.

RADIO: Morse system of signalling by light and signalling by International Code flags alone are available. Steamers code can be used as call sign.

TUGS: 2 tugs owned by Port Department render services per requisitions from Agents. Tugs usually approach vessels after anchoring.

BERTHING: No Berths.

MEDICAL: Government hospitals available.

DENSITY: 1025.

FRESH WATER: Only available in very small quantities.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Necessary only when crew land ashore.

CONSULS: Nil.

REPAIRS/DRY DOCKS: None.

REPATRIATION: Crew changes are effected subject undertaking by Owners through Agents.

AIRPORT: Cochin, 62 km. North of Alleppey.

TIME: GMT plus 5.5 hours.

HOLIDAYS: For work on approved closed port holidays and national holidays labourers have to be paid extra in addition to wages.

POLICE/AMBULANCE/FIRE: Emergency (Fire and Police) 100 Alleppey Exchange.

SHORE LEAVE: Crew allowed to land. Foreigners required obtain prior permission of Police authority through Agents.

AUTHORITY: Senior Port Conservator.

BEDI BUNDER: 22.31 N. 70.02 E.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Last Port Clearance.
6 Crew Lists.
6 Passengers' Lists.
4 Stores Lists.
4 Private Property List of crew and officers.
4 Certificates of Currency, Arms and Ammunition and Deck Cargo.
1 Same Bottom cargo list.
1 Hazardous Cargo List with categories.

PILOTAGE: Vessels anchor at roads as pilotage not compulsory; however, if requested in advance by Master to PORTAL BEDI, ship may be piloted from Pirotan Lighthouse to Rozi Anchorage about 7 miles from port by local Pilot Guide. Pilot boards vessel off Pirotan Island Light (Lat. 22° 36′ N. Long. 69° 57′ E.).

ANCHORAGE: Lighterage port. Steamers anchor at Rozi anchorage about 7 miles from port, where good anchorage up to 7 fathoms at low water.

HEALTH: Pratique granted on delivering Maritime Declaration of Health to Customs officer on boarding. Vessels having touched yellow fever area prior to arrival granted free pratique by Mosquito Party to be deputed from Kandla, which can only be arranged by prior notice failing which vessel has to proceed either Kandla or Bombay for Free Pratique.

RADIO: Call sign VUK5. Working hours:

0930–1130 hrs. 1730–1930 hrs.
1330–1530 hrs. 2130–2330 hrs.

Frequency 600 m. or 500 kc/s., working at 429 m. and calling at 500 m.

TUGS: Port tug available for use at anchorage.

BERTHING: No berths.

STEVEDORES: Agents and stevedores require advance ETA of 24 hours for preparing labour gangs. Daily loading is 400/500 tons for bagged cargo.

MEDICAL: 24 hours notice required for medical service. Government hospital at Jamnagar where vaccination/fever injection services available.

DENSITY: 1025.

FRESH WATER: Supplies by barge capacity 50 tons. Possible supply about 50 tons every alternate tide subject adequate supply of water in port area.

FUEL: None.

GANGWAY/DECK WATCHMEN: The services of watchmen are recommended.

OPENING/CLOSING HATCHES: By ship's crew.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat. Exemption Certificate.
Gear Certificate.

CONSULS: None.

REPAIRS: No facilities for repairs to ships.

DRY DOCKS: None.

AIRPORT: Jamnagar – 7 miles from city. Daily flight Jamnagar-Bombay.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Non-working days and work not permitted even on payment of overtime charges: Indian Republic Day; Bakri-Id; Holi; Muharram; Gokulastami; Dasehra; Diwali; Ramzan-Id.

POLICE/AMBULANCE/FIRE: District Superintendent of Police 100 and 3795; Ambulance/Casualty Department 4444; Fire 101.

GENERAL: Tidal port and barges loaded and sent out to ship during tide time only. Loading of barges carried out manually.

SHORE LEAVE: Crew members allowed ashore in emergency or for medical treatment. Necessary police permits take 48 hours.

REGULATIONS: No launch services available for crew. Only 5 ships allowed to work at time at anchorage. Further arrivals wait turn.

DELAYS: Delay expected for loading and discharging in monsoon due to limited number of barges available.

DEVELOPMENTS: The scheme of creating additional facilities, road connection, transit godowns, electrification and water supply and cranes, etc. near mouth of creek. This newly developed area is completed and connected by good all weather road with city of Jamnagar.

AUTHORITY: Port Officer.

BELEKERI: 14.43 N. 74.15 E. (See Plan Book)

PORT LIMITS: *North.* A line drawn due West from Kawada Guda peak into the sea up to 7 fathoms of water starting from a point 50 yards above high-water mark of the shore.

East. Seashore of Belekeri Bay 50 yards above high-water mark from North Boundary Mark to rocky promontory in Lat. 14° 40′ N. including the Belekeri creek and all branches thereof, as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including Islands. All patta lands and other private sites excluded.

South. A line drawn due West from a point 50 yards above high-water mark of rocky promontory in Lat. 14° 40′ N. into the sea up to 7 fathoms of water.

West. A line joining the two 7 fathoms points in the sea.

DOCUMENTS:

8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists.
4 Import Manifests.
Last Port Clearance.

PILOTAGE: Not necessary. Vessels anchor in stream and in open sea. Ships can be manoeuvred under guidance of Port Officer.

ANCHORAGE: The anchorage for shallow draft steamers in open roadstead is with Kukra Island bearing 080° (T) distance about 1.5 miles in depth of 27 to 29 ft. Anchorage for deep drafted vessels is with Kukra Island bearing 080° (T) distance about 2.5 miles in depth 34 to 37 ft.

HEALTH: Medical Officer, Ankola acts as Port Health Officer. Free pratique to incoming vessels granted by radio. All vessels calling from foreign destination must send radio message addressed "Medical Officer, Ankola", at least 48 hours before entering, giving last port of call, number of crew, health conditions, ETA and requesting pratique; same message must be repeated to Agents also, on which pratique granted on shore. Anchoring time is pratique time. For vessels from Indian ports pratique not required. Vessels which have taken on board passengers or crew from yellow fever areas within 30 days of departure from such ports will be under quarantine. Free pratique will not be granted until Mosquito Search Party, from nearest major port (i.e. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship fit for granting pratique. Master to inform Agent well in advance if arriving from yellow fever area to enable arrange Mosquito Search Party for quick pratique.

RADIO: Recommended to give ETA or pratique messages via Goa or Bombay Radio.

BERTHING: No berths.

STEVEDORES: ETA required at least 48 hours prior arrival order Agents advise Shippers and stevedores.

MEDICAL: No hospital but good medical aid given at Karwar, 20 miles distant. In case of inoculations and vaccination at least 2 days advance notice to be given for vaccines to be brought from Hubli or Belgaum distance 100 and 150 miles respectively.

DENSITY: 1025.

FRESH WATER: Can be supplied from Karwar by water barge.

FUEL: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Generally done by ship's crew.

CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derating Certificate.
Vaccination and Inoculation Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member. Wine and/or Spirit: 1 bottle of light spirit and 1 bottle of hard spirit per crew member.

CARGO GEAR: Valid International cargo gear certificate not more than 12 months old. Validity shall cover whole period of loading and discharging.

IDENTIFICATION CARDS: Not required.

CONSULS/REPAIRS/DRY DOCKS: None.

REPATRIATION: Arranged from Goa or Bombay.

AIRPORT: Nearest airports Goa or Belgaumi Bombay.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Port Authorities. Non-working days when work not permitted even on payment of overtime: Republic Day (26th Jan.) and Gandhi Jayanti (2nd October).

POLICE: Tel. 49.

SHORE LEAVE: Permission may be obtained (Chinese personnel not allowed to land on shore).

AUTHORITY: Port Officer, Karwar.

BHAVNAGAR: 21.47 N. 72.08 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Certificate.
Manifest on prescribed form (3 copies).
Declaration of private and personal property.
Crew List.
Customs circulation copy issued by Boarding Officer of last Indian Port of call.
Place and date of deratisation certificate.

PILOTAGE: Pilotage should be arranged in advance through ship's local Agent who may be contacted via the port radio, call-sign VUJ-9. An ETA should be sent at least 48 hours in advance in order to arrange Pilot. Pilotage is compulsory. Pilot boat does not have VHF, but may be contacted by light or flag signals. Pilot station is 4.5 miles N.N.E. of Piram Island Lighthouse and Pilot boat will only be on station when the vessel is scheduled to arrive. Vessels should arrive at Pilot station about 2 hours prior to time of high-water and are advised not to anchor awaiting a Pilot but to make a reciprocal course until arrival of the pilot boat.

ANCHORAGE: Vessels up to 31 ft. draft are advised at anchorage Eastward of perigee light vessel. Maximum limit of draft for vessels working at anchorage is 32 ft. at present. If, however, at future date it becomes necessary to find suitable anchorages for vessels more than 32 ft., this area is likely to be farther Eastward (about 3 to 4 miles) from present anchorage area and this is likely to raise fresh problem of operation of lighters due to increase in distance involved. At present the issue has not arisen as the maximum limit of draft of 32 ft. is fixed for vessels at anchorage. All vessels at anchorage are loaded and discharged by means of lighters.

MAX. SIZE: Up to 500 ft. length, and up to 65 ft. breadth may berth alongside.

Permissible draft for a particular tide is arrived at by subtracting 13 ft. from predicted height of high-water for that particular tide.

HEALTH: Healthy ships are granted pratique by the Pilot. International health regulations are applicable to vessels arriving from yellow-fever areas.

RADIO: Bhavnagar Port Radio, call sign VUJ-9 should be used for routing ETA messages, and is also used by Agents in cables to shipping.

TUGS: Tug assistance is available for berthing and unberthing vessels in inner harbour. Position where tugs join the vessel is dependent upon prevailing weather conditions. Usually ship's lines are used in connections to tug.

BERTHING: Berthings are as per tides and according to permissible drafts.

STEVEDORES: The stevedoring gangs are arranged directly by Agents through approved stevedores.

MEDICAL: Medical facilities can be arranged by Master through Agent. Hospital facilities available in city of Bhavnagar which is 13 km. from port.

TANKERS: No facility for oil tankers.

DENSITY: 1025.

FRESH WATER: Fresh water supplied alongside jetty as well as at anchorage.

Shipmasters Report: Water is often in short supply, and ships may be unable to obtain any at all at the anchorage. Ships should not rely upon an evaporator to make water at the anchorage, due to the high mud content of the sea water.

FUEL: Oil bunkering available in limited quantity.

FIRE PRECAUTIONS: Alongside jetty fire-fighting facilities available. At anchorage fire-fighting facility is provided by the tug. Usual fire precautions applicable.

DEVELOPMENTS: Intensified dredging operations are proposed to be undertaken for increase in drafts of the steamers berthing.

GANGWAY/DECK WATCHMAN: Gangway and deck watchman are recommended.

OPENING/CLOSING HATCHES: As arranged between the Master and stevedores.

SHIP'S CERTIFICATES: Registration; Safety equipment; Safety Radio and Telegraphy; International Load Line.

CUSTOMS ALLOWANCES: As per Customs regulations in force from time to time at Indian ports.

CARGO GEAR: Ships should possess valid Cargo Gear Certificate.

CREW IDENTIFICATION CARD: Valid international passport or identification card necessary.

CONSULS: No consulates at port. Nearest consulates are at Bombay.

REPAIRS: No repair facilities exist for the ship except repairs of minor nature which could be undertaken by private repair firms.

DRY DOCKS: Small dry dock available for repairs of vessel of up to 200 ft. length.

REPATRIATION: Possible.

AIRPORT: Bhavnagar city is served by an airport situated about 7 km. from the Port. Regular flights to Bombay are available daily.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays in all 8 in a year declared by Port Authorities on which working of the ship can be attended at the option of the port.

POLICE/AMBULANCE/FIRE: Police force and ambulance and fire facility available from Bhavnagar city. Limited fire-fighting facility available at port.

TELEPHONES: No facility is available for providing telephones on board the ships.

GENERAL: Port equipped with 3 berths having 6 cranes with 3-ton capacity. Cranes available for loading or discharging ship's cargo.

SHORE LEAVE: Citizens of The Peoples Republic of China and Pakistan not allowed ashore. All other nationals are allowed to go to Bhavnagar city which is 13 km. from port for which shore passes are issued by Customs Dept.

REGULATIONS: Photography in port prohibited. No crew member allowed to take liquor ashore.

DELAYS: Delays in berthing depend upon number of ships working on berth and awaiting if any. At anchorage generally not more than 2 ships are worked at a time.

AUTHORITY: Port Officer.

BOMBAY: 18.56 N. 72.49 E. (See Plan Book)

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked and/or when vessel is required to anchor outside pilotage area awaiting a suitable tide, as in the case of large tankers.

DOCUMENTS: See "Calcutta".

PILOTAGE: Motor pilot vessel *"Venu"* stationed 18° 51′ N. 72° 49.5′ E. White, buff-coloured funnel, "Pilot" painted black capitals, exhibiting International Signals by day/night. Call sign "ATDZ".

Minimum advance notice 24 hours to Agents and Harbour Master through Bombay Radio (VWB) and 12 hours to pilot vessel on WT. Pilot vessel contacted VHF Channels 12, 14 and 16. In case pilot vessel not on station, vessels advised anchor at Pilot station, draft permitting, and wait instructions.

ANCHORAGES: More than 60 anchorage berths radius 1,000 ft. with depths from 38 ft. to 14 ft.; of these two 38 ft.; 30 between 30 ft. and 35 ft.; 22 between 20 and 30 ft.; remainder below 20 ft. All anchorages safe.

RESTRICTIONS: According to state of tide and draft.

MAX. SIZE: For Butcher Island Marine Oil Terminal: Normally max. length 700 ft. However, tankers 800 ft. length can be berthed provided adjacent berth occupied by medium-size tanker. Draft restrictions as follows: (depth of water at low tide.)

No. 1 Bl	37 ft.-09 in.	Subject variation.
No. 2 Bl	36 ft.-06 in.	
No. 3 Bl	38 ft.-05 in.	

Pir Pau Oil Berth: max. length 525 ft. Depth at low tide 28 ft. (subject variation). Buoy fixed for berthing 560 ft. tankers.

Docks	*Max. length*	*Max. width*	*Max. draft (subject to tide)*
Indira	666 ft.	95 ft.	34 ft.
Victoria	460 ft. by day and 400 ft. by night	77 ft.	23 ft.
Prince's	500 ft.	61 ft. 3 in.	22 ft.

PRATIQUE: The Master of every vessel calling Bombay from a foreign port must send the following particulars by cable to "Quarantine Bombay" 24 hours prior to arrival and request for radio pratique:

AAA ports of loading BBB last port of call CCC date of departure DDD ETA discharging port EEE vessel's maritime Declaration of Health is negative and total number of crew on board all healthy FFF vessel has not called at any port in East Africa between Northernmost point of Eritrea and Southernmost point of Tanganyika including Zanzibar or any other yellow fever infected area within last 30 days GGG no unusual mortality of rats on board HHH no monkeys ill no persons embarked at Aden or Djibouti.

If the vessel is coming from a yellow fever area, then the Port Health Officer boards the vessel for inspection before granting free pratique.

RADIO: Bombay Coastal Station, call sign VWB.

Information regarding weather will be broadcast at 0630 and 1030 hrs. local time on 2000 m.

RADAR/VHF: No port radar service. Shipmaster contacts pilot vessel by ship's radio or VHF on international frequencies. Channels No. 12 and 14 also available on VHF.

TUGS: Tugs join vessel when close dock entrance and assist undocking. Ship's and tug's lines used.

BERTHING: *Indira Dock:* 21 berths, able to handle cargo vessels up to 20,000 d.w.t. Average length of berth 150 m. Most berths are equipped with one 6-ton crane and four 3-ton cranes.

Victoria Dock: 15 berths, able to handle vessels up to 5,000 d.w.t. Average length of berth 110 m. Most berths are equipped with 1.75 ton and 1.5 ton cranes.

Prince's Dock: Length 1,560 m. of which 1,200 m. is available for handling cargo. There are 8 berths able to handle vessels up to 5,000 d.w.t.

Ballard Pier: Length 244 m., width 110 m., when converted will handle passenger vessels up to 30,000 g.r.t. and cargo vessels up to 22,000 d.w.t.

The extension at Ballard Pier will be the new passenger terminal and will receive passenger vessels up to 30,000 g.r.t. at any stage of the tide.

CONTAINER HANDLING FACILITIES: New container terminal at Indira Dock No. 12B. Total area 12 acres. In the first phase the facility will have a Coles Colossus 200 ton mobile crane, Stothart & Pitt semi-automatic spreaders and various mobile container equipment.

A gantry crane will be installed at a later date.

CRANES: *Quay side:* Electric and Hydraulic cranes available at Indira, Prince's and Victoria Docks.

Mobile Cranes: 56 mobile cranes with capacities up to 43 tons available.

Heavy lift: Electric crane of 60 tons and steam crane of 20 ton capacity.

Floating cranes: 2 available, 60 ton and 125 ton capacity.

STEVEDORES: Supplied by Dock Labour Board. Port Trust supplies shore labour for handling cargo including stacking in sheds.

MEDICAL: Hospital facilities available. Notice in sufficient time, depending on seriousness of case, to arrange for transport, hospitalisation, etc.

TANKERS: Reducing pipe connections available at jetty. Dirty ballast tank available at Marine Oil Terminal. 3 berths at Butcher Island and 1 berth at Pir Pau exclusive to tankers. For draft details see "Max. size".

Pir Pau can handle tankers up to 16,000 d.w.t. and the Marine Oil Terminal at Butcher Island can handle tankers up to 54,000 d.w.t. at 2 berths and 36,000 d.w.t. at the other berth.

DENSITY: The Port of Bombay is essentially a salt water port and major fluctuations in the density occur on account of tide. Density varies mostly in monsoon period June to September.

FRESH WATER: Available all berths. By water-boat in stream, by water-mains in docks.

Ship Officer's Report: Vessel berthed at Ballard Pier, East side. Fresh water availability on pier dependent on capacity of storage tank at the time of call. The water was not available continuously and we had to wait for the tank to be refilled.

FUEL: Arranged by oil companies through Agents. Facilities at berths in docks and Butcher Island berths. No bunker facilities for vessels at anchor.

FIRE PRECAUTIONS: All regulations of Petroleum Rules (chapter 1/50 of BPT Port Rules). Port maintains fire stations, 24 hours per day, both at docks and at Butcher Island Oil Terminal. Special precautions taken for tankers at Marine Oil Terminal at Butcher Island.

DEVELOPMENTS: Satellite port in Nhava/Shewa area proposed also new harbour near Sassoon dock for trawlers drawing 5.5 m.

GANGWAY/DECK WATCHMEN: No deck watchman supplied. BPT gangways generally available all berths except Butcher Island and Pir Pau.

CERTIFICATES:

International Safety Equipment Certificate.
International Safety Radio Telegraphy Certificate.
International Safety Radio Telephony Certificate.
International Exemption Certificate (Deratisation).
International Load Line Certificate.

CARGO GEAR: Compliance BPT Port Rules and Docks By-laws essential. Hydraulic Quay Cranes, Electric and Heavy Lift Cranes, Floating, Mobile and Crawler Cranes all available.

IDENTIFICATION CARDS: Necessary for Police/Customs authorities.

REPAIRS: All repairs possible.

DRY DOCKS: Two: "Merewether" 525 ft. long, 65 ft. 6 in. wide. "Hughes" 1,000 ft. long, 100 ft. wide.

REPATRIATION: Can be arranged, also crew changes.

AIRPORT: International Airport Santacruz, 15 miles from Bombay Harbour.

TIME: Indian standard time ahead of GMT by 5 hours and 30 minutes. No alterations to clocks are made any time.

HOLIDAYS: Holidays for the docks (when cargo handling is closed) are fixed every year. Republic Day (January); Bakri-Id (February); Holi (2nd day) (March); Muharram (March); Maharashtra Day (May Day); Buddha Jayanti (follows May Day); Independence Day (August); Ganesh Chaturthi (September); Mahatma Gandhi Jayanti (October); Dasara (October); Diwali (November); Ramzan-Id (December); Christmas Day.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Arrangements for placing a telephone on board ship exist at all transit sheds in Docks.

SERVICES: Tank cleaning equipment is not available. Dirty ballast accepted in tank at jetty at Marine Oil Terminal.

REGULATIONS: Stringent Port Rules and Docks By-laws detailed in "Bombay Port Rules".

AUTHORITY: The Chairman, Bombay Port Trust.

CALCUTTA: 22.32 N. 88.22 E. (See Plan Book)

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Deratisation Certificate.
Port Clearance from Last Port.
Indian Coast Light Dues Receipt (if any).
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Through Cargo Manifest.
4 copies of Stores List.
1 copy of Cargo Manifest with B/Lading for the same.
4 copies of Opium and Dangerous Drugs Certificate.
Cargo Plan.
Cargo on Deck declaration.
4 copies of Certificate of Foreign Currency.
4 copies of Certificate of Arms and Ammunition.
Letter to Assistant Collector of Customs regarding Local Agency.
Letter to Assistant Collector of Customs regarding duty on ships stores.
Application to the Inspector of Police.
3 copies of Arrival Report.
4 copies of Watches and Clock List possessed by each member of the crew.

PILOTAGE: Telegraphic address of Pilot station: VWST "Pilots Sandshead". Radio message should be sent 48 hours prior arrival giving (a) ETA Eastern Channel Lt. Vs.; (b) from . . . . to . . . . (either Haldia, Budge Budge, or Calcutta); (c) deepest *fresh* water draft; (d) length overall; (e) g.r.t.; (f) whether VHF is or is not on board.

Pilot boards vessel Sandheads from pilot vessel fitted with W/T, DF, radar, echo sounder and other navigational equipment, maintains continuous watch on 500 kc/s. (600 m.) and receives ETA messages of incoming vessels.

As an aid to navigation, navigable channel in river is marked with lights and channel buoys. There is a lighthouse at Saugor and downstream from this point, 3 attended Light vessels are stationed at the Western Channel and 2 unattended Light Vessels at Gabtola and Lower Long Sand at Sandheads. Navigable channel leading to port from sea is about 126 miles long. 14 bars are in different reaches of river, 11 of these are upstream of Diamond Harbour and remaining 3 in estuary below Diamond Harbour. Since these bars are subject to fluctuations and there are sharp bends in river, the navigation of ships between port and sea requires services of trained Pilots employed by Port Trust. River Pilots take charge of vessels at Sandheads, navigate to Garden Reach and then make over to harbour Pilots who manoeuvre vessels to riverside jetties, moorings or dock entrance lock. Movement of ships inside docks guided by Berthing Masters.

ANCHORAGES: Anchorage in river Hooghly at Saugor Roads, Halida, Kalpi, Diamond Harbour, Royapur, Ulubaria and Garden Reach of which Royapur, Ulubaria and Garden Reach utilised only by ships on passage to and from the port in emergency. Depths of anchorages vary on day to day basis according to River Draft Forecast but on average 30 ft. deep.

RESTRICTIONS: Navigation on River Hooghly is carried out only with Pilot on board and according to tide. Speed of vessel important factor and must be declared to Pilot on board, preferably telegraphed 48 hours in advance to Pilot vessel.

MAX. SIZE: Maximum LOA 565 ft. with beam of 80 ft. for Nataji Subhas Docks and 515 ft. LOA with beam of 70 ft. for Kidderpore Docks. Maximum LOA of tankers for tanker terminal at Budge Budge is 620 ft. No restriction of beam for vessels berthed in Budge Budge only, as no lock entrance. Deepest draft alongside dock berths in Nataji Subhas and Kidderpore Docks 8.70 m. At Budge Budge deepest draft at any berth 9.00 m. Berthing of vessels, depends on prevailing draft of day published in Draft Forecast for month.

PRATIQUE: Procedure for obtaining pratique: To obtain Radio Praitque incoming vessels communicate by wireless to Port Health Officer, Calcutta, Cable address: "Quarantine Calcutta":

(a) No sickness or death from sickness on board within last 15 days.

(b) No sand, earth, pig, poultry, crew or passenger taken aboard from E. Coast of Africa between Port Sudan and Durban, both ports included.

(c) Ship not touched within last 30 days any port in E. Africa between Northernmost point of Eritrea and Southernmost point of Tanganyika, including Island of Zanzibar or any other yellow fever infected area.

(d) No abnormal mortality of rats or mice on board.

(e) No monkey on board.

(Item *(a)* to be sent in code under usual standard quarantine messages required by ships; rest in plain language through local wireless station.)

In case of any suspected disease or fever on board, local Agents may be contacted by cable who arrange for doctor to be sent or for removal of a patient if necessary. Vessels calling at another port in same country are exempted from obtaining pratique.

RADIO: Calcutta Radio, call sign VWC. R/T. and VHF.

Information regarding weather distributed at 1030 and 0630 hrs. local time on 2000 m.

TUGS: Tugs used for vessels after passing lock entrances at Nataji Subhas and Kidderpore Docks. Tugs used for vessels to turn. Vessels own lines. At Garden Reach sailing on ebb tide.

BERTHING: Vessels brought in for berthing according to tide. Movements from one berth to another inside dock not dependent on tide, but according to convenience of port. Vessels berthed at riverside jetties or river moorings required to have starboard anchor unshackled in order that stbd chain could be tied to buoy on arrival. After first chain is shackled on, port anchor is unshackled and 2 pieces of chain, each 30 fathoms long are removed from port cable and sent aft by boat and made fast to buoys etc, and tied to stern of ship. The remaining port cable is tied up to another buoy forward. Vessels at river jetties and river moorings if left during Bore Tide are to comply with following:

Half an hour before low water:

(a) Gangway to be hoisted up, if ashore.

(b) Pipe-lines disconnected and triced up (for vessels at Budge Budge Jetty).

(c) Heave tight on forward chains to keep vessel about 6 ft. off jetty or pontoon. Make sure weight is on bore springs and not on chains aft.

(d) Tighten all buoy ropes.

(e) When bores expected, all vessels in stream shall have steam on main engines, windlasses and winches and a sufficient number of officers and crew on board to tend vessel in case of emergency.

After bore made, and vessel stopped ranging, slack forward chains to old mark. Bore springs could be had through Agents from local suppliers.

Baj Baj (oil terminal) on banks of River Hooghly has river jetties, hence above instructions also apply to vessels berthed at Baj Baj Jetties.

At Baj Baj two lengths of chain provided by Port Trust for stern moorings.

BULK HANDLING FACILITIES: There is 1 semi-mechanical berth in Nataji Subhas Docks for handling iron-ore suitable for vessels up to 18,000 d.w.t. and up to 24 ft. 6 in. draft. See "Haldia".

BRIDGES: 2 bridges, 1 collapsible, 1 swing, situated inside Kidderpore Dock are open for navigation to suit convenience of port.

TANKERS: Not permitted discharge residue into dock (at C berth Nataji Subhas Dock).

S.G.	A.P.I. of local types of oil
0.91 and 0.94	0.9430 varying to 0.9550.

Tanker terminal at Baj Baj 15 miles from Calcutta Port.

BB Jetty	No. 1	for accommodating	vessels of OAL	620 ft.
,,	No. 2	,,	,,	,, 430 ft.
,,	No. 3	,,	,,	,, 230 ft.
,,	No. 4	,,	,,	,,
,,	No. 5	,,	,,	,, 620 ft.
,,	No. 6	,,	,,	,,
,,	No. 7	,,	,,	,, 510 ft.
,,	No. 8	,,	,,	,, 620 ft.

Deepest draft alongside jetty berths 9.0 m., but vessels brought up according to prevailing draft as per forecast.

STEVEDORES: 48 hours notice of arrival at Pilot station required by Agent.

MEDICAL: Masters in need of medical services required cable Agents. Hospital facilities. Ships leaving for foreign port or minor Indian port (where no Port Health Officer) required to ensure officers and crew have valid health certificates (for cholera, smallpox and yellow fever if proceeding to a yellow fever area).

DENSITY: Average density in port is about 1000.

FRESH WATER: Fresh water on application from Masters or Agents and preferable if at least 48 hours notice given. Supplies through barges and direct from quayline.

FUEL: Redwood 600/700 sec. supplied at Calcutta and require at least week's notice for supplying vessels lying inside dock. Fuel also supplied at Budge Budge terminal, 3 days notice to suppliers and Port Authorities.

FIRE PRECAUTIONS: Usual non-smoking precautions and Master, Owners, Charterers or their Agents of vessels carrying import cargo or intending to load export cargo of hazardous or inflammable nature, furnish 6 copies of list of cargo involved to Traffic Manager in prescribed form, at least 10 days before vessels intend to land or ship cargo. Traffic Manager on receipt of list, categorise items enumerated in list and landing delivery and storage of such cargo be done strictly in accordance with instructions.

DEVELOPMENTS: Refer to "Haldia".

GANGWAY/DECK WATCHMEN: Necessary and recommended by Agents at rate of 3 watchmen per shift of 8 hours.

OPENING/CLOSING HATCHES: Normally undertaken by stevedores, unless specifically mentioned that same will be attended to by crew.

CUSTOMS ALLOWANCES: 0.25 lb. tobacco and 200 cigarettes. Wine and/or Spirit: 1 bottle of wine or spirit per head for consumption on board.

CONTRABAND: Regulations provide that a vessel shall be liable to confiscation which is or has been in Indian Customs' waters where constructed, adapted, altered or fitted in any manner for the purpose of concealing goods.

The act also provides for a fine in lieu of confiscation which could in theory be up to the value of the vessel.

Indian Customs Authorities regard vessels as subject to the regulations if they have any alterations to the normal structure of the vessel or its fittings which is not of operational value, e.g. holes cut in panelling (over bulkheads) which are frequently found concealed from view behind cabin furniture such as settees, bunks desks, wardrobes, etc. Customs invariably impose fines for such cavities even though empty of about Rs. 5,000/-for 1 or 2 cavities and increasing if more cavities are found. Fines would be substantially higher if cavities in fact contained contraband.

To minimise fines it is essential that Shipowners should instruct their Masters to organise periodic anti-smuggling searches of all accommodation and other places in the vessel by ship's officers with a view to locating any cavities or contraband and such searches, and results thereof, should be logged. Furthermore, the Customs Authorities invariably obtain a statement from the occupant of the cabin whether instructions had been issued by the Owners or Master for each officer crew member to search his own cabin for cavities or hiding places or other unusual or irregular tampering with the normal structure of the cabin and to report to the Master any such cavities, hiding-places or such other unusual tampering found at any time whilst serving on the vessel.

If no such instructions have been issued, the Customs generally regard the Owners/Master as failing to take proper anti-smuggling precautions and the risk of increased Customs fines arises.

It is suggested that appropriate instructions should accordingly be issued without delay by all Masters to their officers and crews and that each officer or crew member should acknowledge receipt in writing of such instructions. It is also emphasised that such instructions should also be notified to any officer or crew member who joins the vessel after first issue of the instructions to the existing officers and crew.

CARGO GEAR: Proof of cargo gear tested by a competent authority required.

IDENTIFICATION CARDS: Not necessary if holding seamen's books or passport.

CONSULS: (Telephone Numbers)

REPAIRS: All types of deck and engine repairs undertaken.

DRY DOCKS: 5 dry docks owned by Port Trust available. 3 in Kidderpore Docks and 2 in Nataji Subhas Docks, dimensions as follows:

Dry Dock (Kidderpore) (1) 547 ft.×69 ft.×25 ft. (2) 497 ft.×69 ft.×27 ft. (3) 350 ft.×60 ft.×23 ft. (max. length of vessel 500 ft. max. beam 64 ft.).

Dry Dock (Nataji Subhas) (1) 581 ft.×80 ft.×22 ft. (2) 596 ft.×80 ft.×22 ft. (max. length of vessel 550 ft. max. beam 75 ft.).

Nataji Subhas Dry Docks arranged in tandem and used as one dock. Power supply, compressed air and fresh and unfiltered water supply, hydraulic capstans for propeller work and cranage service including heavy-lift available all dry docks. Each dock provided with automatic telephones for use on board ships.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORT: 12 miles; served by regular international airlines with minimum 1 flight per day.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed Holidays (when no work is permissible): Independence Day, Republic Day, Gandhi's Birthday, Vijaya Dashami and Kali Puja.

Holidays when double wages payable: Saraswathi Puja, Netaji's Birthday; Idul Fitr, Dholjatra, Muharram, Bengali New Year, May Day, Fateh Duaz Dahan, Durgapuja, Guru Nanak's Birthday, Id and Christmas Day.

POLICE/AMBULANCE/FIRE: Police (port) tel. 45–1701 and ask Port Police or dial 100; Ambulance dial 102 or 45–4163; Fire dial 101 or 45–1701 and ask Fire Fighting Service.

TELEPHONES: No arrangements for installing telephones on board, but use of telephones from Port Trust's/ Superintendent's Office on each dock.

GENERAL: *Important:* Masters of vessels in port should ensure that vessel's engines are not immobilised without prior permission of the Harbour Master.

SERVICES: Tank-cleaning equipment with minimum notice of at least 7 days. Discharge of tank-washings not permitted while vessels lying in dock. Compass and radar technicians available.

SHORE LEAVE: Seamen permitted to go ashore after cleared by Immigration Officer boarding vessel on arrival. In case of Chinese, special permission to be obtained from Immigration Authorities, through vessel's Agents.

REGULATIONS: Booklet "Dock and Jetty Handbook" supplied free by Port Commissioners to incoming vessels.

DELAYS: Delays occur during monsoon.

AUTHORITY: Calcutta Port Trust.

CALICUT: 11.15 N. 75.46 E.

DOCUMENTS:

Register.

Articles of agreement in the case of foreign-going vessels staying in port for more than 48 hours.

Nominal list of crew and passengers and the A & B Certificates.

Bill of Health in the case of a vessel arriving from an infected port.

Clearance from last port.

Port and Light dues receipts.

Vessel's manifest and any other document, which may be necessary.

PILOTAGE: No pilotage available.

ANCHORAGE: With Lighthouse bearing 074° in 5 to 5.5 fathoms. Mud – good holding ground.

HEALTH: In the case of all infected vessels Health Officer proceeds aboard, and in the case of all other vessels Health Officer may proceed on board and examine vessel. Master shall give every facility for examination of passengers, crew, personal effects, cargo, provisions, water-supply and any part of vessel Health Officer considers necessary to examine. Health Officer may require written declaration from medical officer (if any) of vessel or from Master (or from both) stating whether any death or sickness from an unknown or suspicious cause or any case of any disease occurred on board either during voyage or before departure, and whether any unusual mortality has been observed among rats on vessel. If Health Officer satisfied that such deaths or cases of sickness as may have occurred were not due to any of diseases specified he shall permit vessel to proceed to usual place of anchorage or berth in harbour and to discharge passengers and cargo without further restriction. Inspection by Health Officer not between sunset and sunrise except in unusual circumstances.

RADIO: Messages through Cochin Radio or Mangalore Radio.

SIGNALLING: The signal station is situated close North of the lighthouse. The station is manned 24 hours a day.

VHF is likely to be installed 1979.

TUGS: 3 motor tugs for towing lighters.

BERTHING: No berths.

STEVEDORES: Arranged through Agents and stevedore contractors.

MEDICAL: General Hospital and Medical College Hospital situated about 1 mile and 5 miles away respectively.

DENSITY: Sea water – 1025.

FRESH WATER: Available, water barge capacity 200 tons. 12 hours notice required.

FUEL: Available. Small quantity of 30 tons can be provided, 48 hours notice required.

DEVELOPMENTS: Dredging commenced at Beypore and expected to be completed within a year or two and then ships of 18 ft. draft can be berthed alongside.

CERTIFICATES:

Registry.

Radio Telegraphy.

Safety Equipment.

Load Line Certificate.

Certificates of Competency of Captain and other officers.

IDENTIFICATION CARDS: Necessary.

CONSULS: Nil.

REPAIRS: Minor repairs possible.

DRY DOCKS: Small slipway at Beypore.

AIRPORT: Construction of airport at Calicut is under consideration by the Government.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the State Government are holidays for the port. Cargo work can be arranged on holidays.

FIRE/AMBULANCE/POLICE: Police 100; Ambulance 100; Fire 100.

GENERAL: Ship-to-shore signalling is normally by morse light.

SHORE LEAVE: Permitted.

AUTHORITY: Port Officer.

COCHIN: 09.58 N. 76.15 E.

DOCUMENTS:

7 Crew Lists.

7 Passenger Lists.

1 Last Port Clearance.

4 Store Lists, including List of arms and ammunition.

5 Passengers' and Crew Personal Effects Declarations.

4 Cargo Manifests.

3 Cargo Certificates.

3 Deck Cargo Certificates.

3 Opium Certificates.

3 Currency Declarations.

PILOTAGE: Berthing arrangements, booking of Pilot, etc., normally done by Agent. Advisable send ETA messages at least 48 hours in advance to Agent. Amendments to ETA messages must be sent at least 12 hours in advance. ETA messages may also be sent to Harbour Master, Cochin Port Trust. Messages should contain time and date of arrival at outer roads in IST and also draft fore and aft (in fresh water). On arrival, information must be sent to Signal Station by aldis and sharp watch maintained for further instructions.

No Pilot vessel on station in outer roads. A Pilot boat with red hull and white superstructure exhibiting the normal international Pilot signal comes out to outer roads for embarking and disembarking Pilots. No special light or sound signal need be made for Pilots. All ships awaiting Pilot in outer roads must have engines ready at all times to enter harbour (unless instructed otherwise). Masters should ensure that a good pilot ladder with 2 manropes is lowered about 2 ft. above water for embarking Pilots. Also while embarking Pilot, lifebuoy must be kept handy, and a good lee given. Pilots must be escorted from and to the bridge, to the embarkation deck. Also see "Restrictions".

ANCHORAGE: Cochin roads is open anchorage with good holding ground of oily mud. Masters are required to anchor vessels in Westerly area from North to South of fairway buoy within radius of 0.5 mile. Deep-drafted vessels may anchor in a Westerly direction from fairway buoy within a distance of 0.5 to 1 mile. To facilitate entry and departure of deep-drafted ships, Masters not to anchor in line with direction of main channel, Westward of fairway buoy.

RESTRICTIONS: Unless otherwise *specifically* instructed, vessels not to enter main channel at any time without Pilot on board. Pilotage compulsory for all vessels over 100 tons gross. No night entry for crude oil tankers.

MAX. SIZE: Maximum size of general cargo ships presently handled is 700 ft. length OA with max. draft 30 ft. *salt water.* Such ships taken in only during slack ebb. Tidal Conditions: In Cochin Port ebb and flood run 2 to 2.5 hours before, to 2 to 2.5 hours after high and low water times. During monsoons, freshets are encountered and there may not be any flood for several days.

PRATIQUE: If a vessel requires radio pratique the Master is to send a message to the Port Health Authorities, Cochin (telegraphic address "Quarantine Cochin") which should contain all items of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the above, he should send the following information in plain language:

1. My Maritime Declaration of Health has negative answers to health questions or my Maritime Declaration of Health has positive answers to health questions (indicated by details) as the case may be.
2. Called at or not called at any port in Ethiopia, Somalia, Kenya and Tanzania and any port from Northernmost point of Senegal to Southernmost point of Angola in West Coast of Africa within 30 days.
3. Have or have not monkeys on board.
4. Have or have not taken any person embarking at Aden or Djibouti.

The message to be sent not more than 12 hours and not less than 4 hours out from port. Masters must send the complete message without omitting any item, and should request specifically for radio pratique.

Ships arriving from yellow fever area within last 30 days, pratique is granted by the Port Health Officer only after inspection. Pilot officer boarding is authorised to grant free pratique on satisfactory completion of Maritime Declaration of Health by the Master of healthy ships only.

Port Health Officer usually inspects crew before vessel sails.

RADIO: Cochin Radio, VWN, operating 24 hours daily. VHF Station at Harbour Master's Office, contact Channel 16.

TUGS: Presently 3 tugs; 2 of 1,000 h.p. and one of 1,400 h.p. Normally, tugs join off Vypeen and tug's wire used as necessary.

BERTHING: If particular ship required arrive at certain time, Agent informed in advance.

CARGO HANDLING: Modern systems of cargo handling such as pre-slinging and palletisation are commonly used. The numbers of fork lift trucks, mobile cranes and tractor trailers have been augmented for the purpose. International containers are also handled at the conventional berths using ship's own gear for export of shrimps and import of machinery.

There are 8 general cargo wharf berths, 2 coal berths, 1 boat-train pier jetty, 2 tanker berths, 2 low wharves and 1 open berth. The open berth (555 ft. 6 in.) is being extended to 808 ft. and the work is nearing completion. It is proposed in the fifth plan (1974-79) to convert the open berth into a container berth in a flexible way. It is also proposed to have a mechanised fertiliser berth for bulk handling fertilisers, sulphur, rock phosphate, etc. Cargo is also handled at the 12 stream moorings. At present, containers also handled at the general cargo wharf berths using ship's derricks. No facility exists for roll-on/roll-off traffic. Liquid chemicals can be handled at the wharf berths.

STEVEDORES: Booking of gangs undertaken by Agent on receipt of ETA message.

MEDICAL: Medical attention easily available in Cochin. If medical attention required immediately on arrival, Agent to be informed when sending ETA. Valid inoculation and vaccination certificates against cholera, yellow fever and smallpox are essential.

TANKERS: Only 2 tanker berths at Cochin at present. Maximum permissible draft 30 ft. *salt water*.

Length limited to 700 ft. OA at North tanker berth and 560 ft. OA at South tanker berth.

Deep draft tankers berth only on ebb tide and during daylight hours. Ballasted or loaded tankers can sail any time.

DENSITY: Varies from 1000 to 1020 depending on tidal and weather conditions.

FRESH WATER: Available from alongside jetties and from barges at moorings. Advance notice to be given Agent regarding amount of water required. Cost Rs. 3.50 per 1,000 litres for supply through water barges and Rs. 3/-per 1,000 litres for supply at docks, quay and jetties.

FUEL: All grades fuel oils normally available. Essential give advance notice to Agent to make necessary arrangements.

FIRE PRECAUTIONS: Fire wire to be fast and ready on quarter facing channel.

DEVELOPMENTS: The revised Fourth Five-Year Plan (1969-70 to 1973-74) for port development includes the construction of an inshore oil dock for tankers of 80,000 d.w.t. and 1 fertiliser berth, both having a draft of 40 ft. While preliminary steps have been taken on the former, the latter scheme has been postponed to the Fifth Plan. The extension of the existing Open Berth Quay 9 from 505 ft. 6 in. to 808 ft. has almost been completed. The plan also aims at the procurement of 3 new dredgers, 1 high-power tug, various cargo-handling equipments, etc., besides the improvement of the port's infra-structural facilities. A Fisheries Harbour Complex is being developed near the port to provide modern landing facilities for fish catches by deep-sea trawlers.

The Fifth Five-Year Plan for port development (1974-75 to 1978-79) aims at the completion of all the spill-over schemes of the Fourth Five-Year Plan, viz., inshore oil dock, procurement of dredgers, cargo-handling equipment and improvement of infra-structural facilities. Among the most important new schemes of the Fifth Plan, mention may be made of the provision for the purchase of a grab dredger, reclamation in the channels, construction of a new medium-sized dry dock, a fertiliser berth, etc. During the Fifth Plan, container-handling facilities will be provided at the extended Quay 9 berth.

GANGWAY/DECK WATCHMEN: Watchmen available at nominal cost. Recommended employ watchmen at gangway, on deck and in holds.

OPENING/CLOSING HATCHES: Opening hatches normally done by stevedores. Topping derricks and removing locking arrangements on hatches must be done by ship's personnel.

CARGO GEAR: All cargo gear must have valid test certificates and all other factory act requirements must be complied with.

IDENTIFICATION CARDS: Issued by Port Authorities.

CONSULS: Danish, Norwegian, Italian, French and Consular Agent of Switzerland.

REPAIRS: Minor repair facilities available.

DRY DOCKS: Port dry dock can handle ships of up to 217 ft. in length OA. However, not normally available for foreign craft.

REPATRIATION: Facilities for changing crew and repatriation available and can be arranged.

AIRPORT: Airport about 2 miles from harbour area. Cochin airport handles internal flights only.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed holidays: Republic Day (26th January); Independence Day (15th August); Gandhi Jayanti (2nd October); 1st May and 25th December.

FIRE/AMBULANCE/POLICE: 6555 Willingdon Island Fire Station; 6005 Willingdon Island Police.

TELEPHONES: Arrangements can be made for telephone connections on board ships on wharf berths only.

GENERAL: Floating crane 120 tons, fire float.

SHORE LEAVE: All nationalities except Chinese, Pakistanis and Portuguese allowed ashore.

AUTHORITY: Cochin Port Trust.

CUDDALORE: 11.43 N. 79.46 E.

DOCUMENTS:
8 Crew Lists.
8 Passengers Lists.
3 Forms of Import Manifest of Stores.
3 Lists of articles in slop chest.
3 Private Property declaration of Crew.
3 Manifests.
3 Bills of Lading.

PILOTAGE: No pilotage. Open roadstead port.

ANCHORAGE: Vessels anchor in 5 to 7 fathoms with Cuddalore Lighthouse bearing 295° to 315°, which is most convenient anchorage for communicating with shore at all seasons of year. Nature of bottom, sand.

RESTRICTIONS: No restrictions regarding entry of vessels during day or night.

MAX. SIZE: Any size of vessel handled.

HEALTH: On arrival, Master to signal Port Health Officer stating all crew well and requesting free pratique. In event of any crew member suffering from suspected infectious disease, Master to advise Agents sufficiently in advance to enable Port Health Officer to board vessel on arrrival. No free pratique necessary whenever vessels call from another Indian port.

RADIO: No radio station. Cables routed through Madras Radio (call sign VWM).

TUGS: None.

BERTHING: No berths.

STEVEDORES: ETA advice required 72 hours in advance to enable stevedores to make adequate arrangements for handling cargo. Average rate of discharging bagged fertiliser 750 tons, and for loading iron ore 2,000 tons per day, expected to increase to 3,000 tons per day.

MEDICAL: No advance notice required unless vessel arrives with crew member requiring immediate medical attention. Seamen can be treated at Municipal Dispensary at Old Town near port and also at Government headquarters hospital in charge of District Medical Officer at New Town about 6.5 km. from port.

DENSITY: Density of water 1024. State of tide does not affect density.

FRESH WATER: Boat with 16.5 tons capacity which goes alongside steamer and this quantity of water supplied. If one steamer at anchorage boat makes 2 trips a day and about 33 tons of water supplied.

FUEL: None.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended in interest of ship to avoid pilferage. 3 watchmen night and day per shift of 8 hours.

OPENING/CLOSING HATCHES: By stevedores.

CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Deratisation Certificate.
Last Port Bill of Health Authority.
Last Port Clearance.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each crew member to be held out of bond. Wine/Spirit, 1 open quart bottle per crew member permitted to be held out of bond.

CARGO GEAR: Register of cargo gear and machinery to be maintained up to date and to be attested by competent authority.

IDENTIFICATION CARDS: Needed.

CONSULS: None.

REPAIRS: Minor repair facilities available.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: Nearest airport at Madras, distant 118 miles.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Cargo work arranged on all holidays except Republic Day, Gandhi's Birthday, Pongal Karinal, Masimagam, Pennayar Festival, Independence Day and Deepavali, on payment of overtime.

POLICE/AMBULANCE/FIRE: Tel. Police 24; Fire and Ambulance 99.

GENERAL: Private launches arranged for purposes of crew going ashore. Such launches ply between 0600 and 1700 hrs. Laundry, provisions, etc., can be arranged.

SERVICES: Cleaning of hatches after discharging cargo available.

SHORE LEAVE: Crew members permitted to go ashore within municipal limits.

DELAYS: No delay of anchoring of vessels. Cargo work carried out during day. No night work.

AUTHORITY: Port Officer, Cuddalore.

HALDIA: 22.00 N. 88.05 E.

Subsidiary deep water modern dock of Calcutta, situated on West bank of Hooghly River and 56 miles downstream of Calcutta.

DOCUMENTS, PRATIQUE: All general information; refer to "Calcutta".

MAX. SIZE: Capital dredging in shipping channel is in progress and the results being constantly reviewed. Currently actual drafts as per draft of the day. Draft forecasts are issued six weeks in advance.

BERTHING: Project in its first phase is expected to be completed by 1978, envisages following.

1. An Oil Jetty – to provide berthing accommodation for supertankers with LOA of approximately 780 ft. and draft up to 35 ft. Operational.

2. A Finger Jetty – equipped with grab-bridge crane capable of transferring salt, rock phosphate and other bulk cargo from ship to barge, or vice versa at an average rate 5,000 tons per day.

3. A Coal Berth – capable of loading bulk carriers of the 60,000 d.w.t. class at rate 3,000 t.p.h. (Under trial).

4. An Ore Berth – rate of loading 6,000 t.p.h. and with provision for increasing to 8,000 t.p.h. Accommodation for carriers up to 80,000 d.w.t. (Under trial).

5. A Fertiliser Berth – for handling rock phosphate and sulphur from ships up to 50,000 d.w.t. class at a rate of 6,000–8,000 tons per day.

6. Two general Cargo Berths – each with a quay of 720 ft. and 120 ft. wide and back-up area of 18 acres. Both will have adequate cranage, latest in cargo handling machinery and direct rail-road facilities. One berth will have a modern 100,000 sq. ft. transit shed and a 30-ton payload Portainer Crane for handling containers.

7. Container Marshalling Yard – area 180,000 sq. ft. served by 1 rail-mounted Transtainer Crane of 30-ton payload, capable of storing 1,500 containers at a time.

AUTHORITY: Calcutta Port Trust.

HONAVAR: 14.16 N. 74.27 E.

DOCUMENTS:

Crew Lists.
Passenger Lists.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's Papers.

PILOTAGE: Open roadstead port. No system of pilotage. Pilot is, however available, on requisition by Master or Agent.

ANCHORAGE: Distance off 3 miles, depth of 5.5 fathoms.

MAX. SIZE: No restrictions on length and breadth. Generally up to 34 ft. draft vessels can anchor within 2 to 3 miles from entrance.

HEALTH: Port Health Officer grants pratique as and when necessary, on requisition.

RADIO: Wireless station at Karwar.

BERTHING: No berthing facilities. Ships anchor on open roadstead.

MEDICAL: Proper hospital facilities available only at Karwar about 60 miles North. At least 24 hours advance notice ETA to be communicated to Agents.

DENSITY: Varies 1020/1025.

FRESH WATER: Very small quantities available. No arrangements for delivery to ships.

FUEL: None.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: All ship's papers such as Certificate of Registry, WT Certificate, Safety Equipment Load Line, etc., to be on board for verification.

CARGO GEAR: Cargo gear Test Certificates, etc., to be produced.

IDENTIFICATION CARDS: Needed, if going ashore.

CONSULS: Nil.

REPAIRS: Nearest workshops undertaking major repairs available at Mormugao. Minor repairs may be carried out at Karwar.

DRY DOCKS: None.

REPATRIATION: Facilities available.

AIRPORT: Belgaum, about 178 miles.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Charter Party Holidays observed. Cargo work can be arranged on holidays. Dates of holidays vary from year to year.

POLICE/AMBULANCE/FIRE: Police 48; Ambulance 32; Fire Kumta 20.

SHORE LEAVE: Crew members are allowed ashore.

DELAYS: Generally no delays are expected.

AUTHORITY: Port Officer.

JAKHAU: 23.15 N. 68.37 E.

LOCATION: In Gulf of Kutch, on Godia Creek about 5 miles inside Arabian Sea. Port is about 7 miles West of Jakhau. Small sub-port exporting salt utilised by foreign-going and coastal traffic. Vessels calling Jakhau anchor in open roadstead about 6 miles off shore. Highest tidal range 14 ft. Current parallel to coast running about 4 knots.

AUTHORITY: Assistant Conservator Jakhau–Kutch.

KAKINADA: 16.56 N. 82.15 E.

DOCUMENTS: *(a)* To be supplied by Master on arrival:

Ship's Register.
Safety Equipment Certificate.
International Load Line Certificate.
Deratisation Certificate.
Last Port clearance.
ILH Dues Receipt, if coming from an Indian Port.
Crew List: 6 copies to Agents, 2 copies to Immigration Dept., 2 copies to Customs.
Customs Circulating Copy, if coming from another Indian Port.
Import Manifest of Stores (Store List).
Private Property Statement of crew and officers.

(b) Master to sign following certificates, in prescribed forms, presented by Agents, on arrival:

Port Entry.
Port Clearance.
Customs Entry.
Customs Clearance.
Departure.
Health.

PILOTAGE: No pilotage.

ANCHORAGE: *Allotment of Anchor Berths:*

Masters of vessels calling at the Port of Kakinada should cable the following information to the Port Officer directly, 24 hours before their arrival off the Port:—

(a) ETA (Indian Standard Time)
(b) Total cargo for loading/discharging at Kakinada and nature of cargo.
(c) Hatchwise distribution.
(d) Declaration of hazardous, inflammable and explosive cargo.
(e) Declaration of vessels winches in good working condition.
(f) Draft Fore and Aft.

A specimen cable covering the above is quoted below:

> "Port Officer Kakinada STOP Vessel XXX ETA Kakinada 22/10 0900 Local Time quantity loading 9,500 tonnes rice bran extractions hatch one 1,000 hatch two 2,000 hatch three 3,000 hatch four 3,000 hatch five 500 no hazardous inflammable explosives STOP All winches derricks good working condition draft fore 8 m. aft 9 m."

The above cable sent to the Port Officer (in addition to the cable sent to their Agents as per normal practice) will facilitate proper anchoring instructions from Port authorities to the Master and avoid difficulties in Port operations.

Masters should also keep watch on VHF Channel 16 to receive instructions from Port control and contact Port control on arrival at the approaches to the Port.

Specific instructions will be given by the Port Officer through Port control in respect of anchorage positions. When once anchored as above, Masters should not shift their position without specific reanchorage position given by the Port Officer, unless in case of emergency in regard to the safety of the vessel.

Masters of vessels calling at this port are advised to be in possession of the latest navigation chart corrected up to-date. The Indian edition available is 3009 "Approaches to Kakinada Port" with an inset of Kakinada Bay.

Main engines should not be immobilised without specific permission from Port authorities.

The Godavari Point (sand spit) is extending Northwestwards at a rate of about 170 ft. per annum and a port hand buoy (flashing red) 5 secs. is installed at the tip.

The holding ground anywhere in the anchorage is considered excellent (soft mud and sand).

MAX. SIZE: No restriction. Vessels any size can enter the port.

HEALTH: Masters have to send standard quarantine message not more than 12 hours and not less than 4 hours before arrival. Pratique will be granted by Port Health Officer basing on the quarantine message, which will be instructed to the Agents. Health inspection of the vessel will be carried out by the Port Health Officer at the earliest convenience. Vessels that have touched ports in the yellow fever endemic area within the last 30 days, should send the quarantine message at least 48 hours before the expected time of arrival.

RADIO: Radio stations are Visakhapatnam and Madras.

VHF: VHF radio station is in the Port Office (Port Control) on International frequency, Channels 16 and 12, communication from ship/Port control and vice versa. If ship requires communication on Channel 12, it should be advised in advance to prepare machine accordingly.

The Port control VHF functions round the clock at the following specified times:–

0045 to 0100 hrs.
0345 to 0415 hrs.
0545 to 0615 hrs.
0745 to 0815 hrs.
1045 to 1115 hrs.
1245 to 1315 hrs.
1445 to 1515 hrs.
1745 to 1815 hrs.
1945 to 2015 hrs.
2245 to 2315 hrs.

all times Indian Standard Time.

TUGS: There are 5 small tugs for towing cargo lighters.

CARGO LIGHTERS: There are 94 cargo boats with total capacity of 7,500 d.w.t. In addition 5 self-propelled mechanised barges each of 250 d.w.t. owned by the Port Authorities.

STEVEDORES: Gangs engaged by party doing stevedoring work. In case of liners, Agents attend. In case of chartered vessels, consignees/shippers attend. Master to give ETA with number of hatches to be worked on arrival. Revised ETA to be sent whenever there is change.

MEDICAL: Government general hospital available with specialists. Private nursing homes also available with efficient physicians and surgeons. Agents arrange medical aid on advance intimation. Being roadstead port, launches have to be arranged, hence advance intimation of 6 hours necessary through signal station while in port.
DENSITY: Ranging from 1010 to 1025.
FRESH WATER: Of the 5 mechanised barges owned by the Port Authorities, 1 mechanised barge is used for supply of fresh water up to 200 tons. Privately owned self-propelled barge is also available for supply up to 100 tons. Prior arrangements to be made through Agents of vessels 24 hours in advance.
FUEL: No fuel suppliers. In case of emergency small quantities of 10/15 tons, in 205 litre drums, can be arranged from Visakhapatnam, duty paid.
DEVELOPMENTS: Development programmes include canal protection, transport facilities, provision of 3 new transit sheds each measuring 300 ft. × 60 ft., construction of a 1,000 ft. long boat wharf, navigational aids, power supply to loading/discharging points and stacking yards at shore and providing breakwater of 880 m. in length (sea wall) and mooring circle on the West side of the sand-spit known as Hope Island.
GANGWAY/DECK WATCHMEN: Arranged by stevedores.
OPENING/CLOSING HATCHES: By ship's crew only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and Spirits: 16 oz. per head per week for those who are eligible for supply by ship.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: No facilities. Only minor repairs to winches, welding work, casting and repairing spare parts.
REPATRIATION: Can be arranged.
AIRPORT: Visakhapatnam 105 miles, Madras 350 miles.
TIME: GMT plus 5.5 hours = IST.
HOLIDAYS: Charter Party holidays are observed. Work is done day and night. Port and Customs also work on holidays and out of office hours on payment of overtime. No work even on overtime payment on following days: Bhogi, Pongal, Kanumu. Optional holidays to labour on Chollangi Amavasya, in January.
POLICE/AMBULANCE/FIRE: Police 3052; Fire 101; Ambulance 3311.
SHORE LEAVE: Shore permits given by Port Registration Officer (Immigration).
SERVICES: Fresh and dry provisions available.
NOTARY: Available for noting protest.
AUTHORITY: Port Officer.

KANDLA: 23.00 N. 70.12 E.

DOCUMENTS: To be submitted by Masters on arrival:
Customs: Crew List (3 copies).
Crew Private Property List – this should indicate all items they possess (3 copies).
Ship's Stores List (3 copies).
All valid documents of ship in English for verification of customs boarding officer.
Port Health: {Maritime declaration in duplicate.
Valid crew health cards and Deratisation Certificate.
Agents: Stowage Plan, Cargo Manifest and Bills of Lading.
PILOTAGE: Pilot station situated 22° 49.5′ N.; 70° 07′ E. Loaded vessels can cross bar only during high water. Vessel to report at Pilot station 2·5 hours before high water. Masters to keep Agents closely advised of ETA and anchoring time. 12 hours advance notice to be given by Agents for Pilot. No pilot ship or telegraphic address for Pilot station (Outer Tuna buoy). Vessels can contact Kandla Tower through VHF Channel 16. Pilot station 16 miles away from port. During all weathers vessels have to anchor at above position and await Pilot.

Shipmaster's Report: On calling at Kandla, the Pilot advised that anchorage outside a 2-mile range from the Outer Tuna buoy and the Pilot having to board there, increases the pilotage dues by 100 per cent.
ANCHORAGE: Vessels can anchor 1 mile S.W. of above anchoring position. Inside harbour, anchorages allotted by Port Authorities, and Pilots anchor vessels at suitable positions.
RESTRICTIONS: Being a tidal port, entering and leaving of loading vessels depends on tide, and loaded vessels can cross bar at entrance of channel only during high water.

During hours of darkness max. length for tankers is 575 ft.

Ships having speed of less than 9 knots through the water will not be moved in and out of the port of Kandla during hours of darkness.

Berthing and unberthing of ships at the moorings will be restricted to daylight only. Daily draft forecast for crossing Kandla Bar published at intervals by the Kandla Port Trust.
MAX. SIZE: Max. overall length 740 ft. No breadth restrictions.

For oil tankers max. permissible overall length is 700 ft.

Draft according to water on the bar varies between 28 and 34 ft.

Shipmaster's Report: Max. draft, chart datum (=14 ft.)+rise of tide.
PRATIQUE: The Masters of all ships arriving at Kandla are required to send the Port Health Officer, Kandla (cable address "Sandgrodh") a wireless message embodying all applicable terms of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the International Code message, Masters are also required to give the following information in plain language:

(*a*) Whether there is any abnormal mortality of rats or mice.
(*b*) Whether there is any monkey on board.
(*c*) Whether touched or embarked at Aden or Djibouti any person.
(*d*) Names of all ports touched en-route within preceding 30 days, with dates of departure.
(*e*) Request for radio pratique.

Upon anchoring Pilot station, cable again Sandgrodh stating time anchored and requesting radio pratique.

In cases where the vessels have touched any yellow fever area within preceding 30 days it is necessary for Master, for good order sake, to certify that all officers and crew/passengers on board possess valid yellow-fever certificates.

The Pilot Officer boarding is authorised to grant free pratique on completion of the Maritime Declaration of Health signed by the Master in cases where vessels have failed to obtain radio pratique for any reason. If the Maritime Declaration is not in order, the Pilot refers the Master to the Port Health Officer who then boards the vessel and grants free pratique after his inspection of the vessel.
RADIO: Within a range of 35 hours off Kandla, vessels can contact Kandla Radio on call sign VWK. Before 35 hours off, Kandla can be contacted through Bombay Radio only.
TUGS: Port tugs join ships inside harbour off berth. Ship's wires used.
BERTHING: The cargo jetty provides 5 alongside-berths with total quayage of 3,825 ft. which can accommodate ships drawing up to 30 ft. loaded draft. The cargo jetty is served with 21 electric level luffing cranes, 16 of 3 tonnes, 4 of 6 tonnes and 1 of 10 tonnes capacity for handling cargo from ships.

3 mooring berths are available near the cargo jetty. In addition, there are separate moorings for (*a*) ships loading salt, (*b*) deep draft mooring for ships up to 37 ft. draft.

The Bunder basin has 3 wharves, two wharves with transit sheds. The South wharf is served with 4 quay electric level-luffing cranes of 3 to 10 tons capacity for handling cargo from lighters. The North Wharf is for country craft. The West wharf is provided with a 60 tons capacity electric gantry crane.

Marine unloader with rated capacity of 500 tonnes per hour for discharging bulk fertiliser and its raw materials has been commissioned.
STEVEDORES: Minimum 24 hours notice required for arranging stevedoring labour and gangs. Bulk fertiliser and grain average 1,000 tons and 1,500 tons respectively. General cargo 250 tons per hook, subject congestion prevailing in sheds, wharves, warehouses and clearance, and on number of vessels working at particular period.
MEDICAL: Private Doctors' services available for vessels at berth. For vessels at Pilot station or inner anchorages minimum advance notice of 12 hours and 6 hours respectively required. Very limited facilities of private practitioners. No hospital facilities. Inoculation and vaccination carried out by Port Health Officer (a Government body) – minimum 48 hours notice required.
TANKERS: Tankers with max. overall length of 700 ft., 35,000 tons displacement and 34 ft. draft permitted to berth. 3 main pipe-lines connected to tanks situated about 10 km. from berth, 2 generally used for white oils and one for black oil. White-oil pipe-lines diameter 12 in. and black-oil pipe-line diameter of 16 in. In addition, one 8 in. diameter pipe-line for soyabean oil, one 3 in. diameter pipe-line for acetone and one 4 in. diameter pipe-line for formaldehyde and one 12 in. diameter pipe-line for Phosphoric Acid imported by Indian Farmers Fertiliser Co-operative Ltd.

Shipmaster's Report: Tankers will sometimes be brought in to the port even though a berth may not be available at that time. Such vessel will then be moored to a mooring buoy close to the jetty, awaiting her berth at the tanker pier. Mooring to this buoy is effected by use of the vessel's starboard anchor chain, so that the anchor has to be disconnected from the chain before entering.

In securing alongside the oil-pier, tankers are required to utilise 1 insurance wire fore and aft as supplied from shore. In addition vessel is required to use all her available ropes and wires owing to strong currents – 4 head-ropes, 2 breast-ropes, 2 springs.
DENSITY: Varies from 1020–1030.
FRESH WATER: Can be supplied through shore pipe connection and barges.

Shipmaster's Report: Water is very scarce and should be ordered at least 3 days prior arrival.
FUEL: Furnace oil (heavy oil) and light diesel oil can be supplied. Usually 12 hours advance notice required for bunkering. In event of oil tanker discharging at berth, bunker supply can only be commenced 18 hours after completion of discharge by tanker. Quantities up to 500 tons supplied by tank trucks, above 500 supplied through pipe-lines if berth vacant. However, any quantity can be supplied by tank trucks.
FIRE PRECAUTIONS: 3 sea water fire fighting pumps installed at oil jetty. These pumps are under charge of fire brigade officers and have adequate fire fighting equipment. A tug fully manned with fire fighting arrangements also available at short notice.
DEVELOPMENTS: Berths and bar continuously under dredging and drafts will increase in future.
GANGWAY/DECK WATCHMEN: All ships engage 2 watchmen round the clock at gangway. To look after mooring lines, 8 mooring men (4 each at fore and aft) are engaged round the clock.
OPENING/CLOSING HATCHES: Unless specified in relative Charter Party to contrary, ship's crew to accomplish this work.

SHIP CERTIFICATES:
Registration.
Safety Equipment.
Safety Radio and Telegraphy.
International Load Line.

CUSTOMS ALLOWANCES: 200 cigarettes per week per person. Wine and/or Spirit: 2 pegs of spirit per person per day or 4 pints beer.

Shipmaster's Report: Very strict Customs supervision, particularly in regard to declaration of foreign currency.

CARGO GEAR: Ships should possess valid Cargo Gear Certificates.
IDENTIFICATION CARDS: Required. See "Shore Leave".
CONSULS: Nil.
REPAIRS: Minor repairs carried out. Chipping and painting work also carried out.
DRY DOCKS: A floating dry dock to accommodate small craft up to 70 m. (230 ft.) in length, 10.7 m. (35 ft.) beam and 3.1 m. (10 ft.) draft of max. weight 500 m./tons for repairs, available.
REPATRIATION: Though adequate facilities not available, this can be done in case of necessity.
AIRPORT: Situated about 70 km. from port.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Holidays for each year declared by Port Authorities, are Republic Day, Idu'l Zuha, Muharram, Holi (2nd day), Chetichand, Ramnavami, Good Friday, May Day, Independence Day, Janmashtami, Mahatma Gandhi's Birthday, Dussehra, Diwali (New Year Day), Idu'l Fitr, Guru Nank's Birthday, and Christmas.
TELEPHONES: Available on board, only for oil tankers.
GENERAL: Port equipped with 21 electric level luffing shore cranes of 3 to 10 ton capacity used for discharging all ships alongside cargo jetty. For discharging tankers with bulk grain port's vacuvators belonging to Food Corporation of India used.

Kandla port is a prohibited area where entry and exit are restricted to those persons having bona fide work only. Masters are requested to exercise a strict check at the gangway in order to ensure that only those persons with bona fide business to transact are allowed aboard. In the event that any unauthorised person is found to be aboard the vessel, the matter should be reported to port officials and the police on duty.

Masters are requested to advise their crew in advance of arrival at Kandla that photography within the port area is strictly prohibited, and it is suggested that all cameras should be left in the safe custody of the Master in order that crew members may not violate this regulation inadvertently and become involved in legal proceedings.

SERVICES: Tank cleaning by shore labourers. Tank washings and residue not allowed to be discharged in port area.
REGULATIONS: Photography in port area prohibited. No Crew members allowed to take with them liquor of any kind ashore and not permitted to drink liquor outside port limit.
AUTHORITY: Kandla Port Trust.

KARWAR: 14.48 N. 74.06 E. (See Plan Book)

PORT LIMITS: *North.* A line drawn from Dayamada Point to Parker Rock.

East. Seashore of Karwar bay from Dayamada Point to Badchidar Point 50 yards above high-water mark including Baithkiol Cove, Kalinady and all branches thereof as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including all islands and thence to Mogera Guda Island (including Mogera Guda Island). All patta lands and other private sites excluded.

South West. A line drawn from Mogera Guda Island through Gudsav Sunv, Westernmost point of Mandal Island to Parker Rock.

DOCUMENTS:
8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists (if any).
4 Import Manifests.
1 Last Port Clearance.

PILOTAGE: The approach from Northward is between Oyster Rock Lighthouse and 2 front and rear leading lights on Simshigudda and Kurmagad Islands, respectively, in positions Lat. 14° 50′ 11″ N. Long. 74° 05′ 43″ E. and Lat. 14° 50′ 33″ N. Long. 74° 05′ 59″ E. Vessels approaching from Southward may enter between Oyster Rock Light and Karwar Head. Currents in bay are negligible. Ocean-going steamers are piloted by Departmental Port Officer who is a licensed Pilot. No pilotage charges at present.
ANCHORAGE: Anchorage for shallow draft steamers is with the Port Signal Station, bearing 120° (T), distance 1 to 2 miles, or Oyster Rock Lighthouse, bearing 278° (T), distance 2.5 miles in about 24 to 28 ft. of water. Anchorage for deep drafted ships is with the signal station, bearing 099° (T), distance 3 to 3.5 miles in depths of 38 to 42 ft.
RESTRICTIONS: No entry restrictions. Karwar Bay may be entered on either side of Sunghiri Island, according to draft and anchorage taken as required. A vessel can enter Karwar either by day or night after having made lighthouse on Devghad Island.
MAX. SIZE: Any size of vessel can be worked as loading and unloading operation done in open sea. Depth at Outer Roads over 7 fathoms increasing accordance distance from land.
HEALTH: District Civil Surgeon acts as Port Health Officer. Free pratique to incoming vessels from foreign ports granted by radio. All vessels calling from foreign destination must give radio message addressed "Civil Surgeon Karwar" at least 48 hours prior entering port giving last port of call, number of crew, health conditions, approximate time of arrival and requesting pratique, same message must be repeated to Agents who obtain pratique on shore. Anchoring time is pratique time. For vessels calling from an Indian port, pratique not required.

Vessels which have taken on board passengers or crew from yellow fever areas, within 30 days of departure from such ports will be under quarantine. Free pratique will not be granted until such time as a mosquito search party, from nearest major port (e.g. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship is fit for granting pratique.

Necessary for Owners or Masters to inform Agents well in advance in case of vessel arriving from yellow fever area to enable arrange mosquito search party and quick pratique.

RADIO: ETA and pratique messages should be sent via Goa or Bombay Radio as Karwar Radio has been shut down.
TUGS: No tugs necessary as vessels work in stream.
BERTHING: No berth, vessels work in open sea. Baithkol Cove is safe berthing place for lighters. Alongside wharves 10 to 12 smaller vessels can obtain safe berth with depth of 6 to 8 ft.
STEVEDORES: 48 hours notice ETA required order enable Agents advise shippers and stevedores to keep cargo and labourers ready. Main commodity export of ore. Mechanised barge loading operations in port. Ore loading rate up to 4,000 tons per day. General cargo 1,000/1,300 tons per day.
MEDICAL: Good hospital facilities exist. 2 hospitals about 1.5 miles from port. In case of inoculations and vaccination at least 2 days advance notice to be given enabling bring vaccine from nearby town (Hubli or Belgaum) distance 100 and 150 miles respectively.
TANKERS: No facilities for tankers.
DENSITY: 1025.
FRESH WATER: Dumb Water Barge for supply to steamers anchored in open Roadstead.
FUEL: No bunkering facilities for ocean-going vessels. Diesel and petrol storage depots within port for supply to small vessels.
DEVELOPMENTS: Proposed to develop port of Karwar into all-weather intermediate port, with 2 berths and 1 mechanical berth, an approach channel and turning basin. Intended arrangements include ability accommodate up to 60,000 d.w.t. ore carriers, loading up to 8 million tons ore and 1.25 million tons other cargo per year. Also intended develop fishing harbour with facilities accommodate large-scale deep-sea fishing industry for 1 million tons fish per year.

Provision of Channel Marks:
1 Fairway buoy.
10 channel marking buoys.
Provision of a mooring boat with equipment for maintenance of buoys.
Experimental dredging.
Dredging approach channel and turning basin.
Land acquisition for future expansion.
Diversion of present main road alongside port wharf.
Improvement of Binga/Karwar Road.
Provision of 2 berths and 1 mechanical berth for ocean-going steamers.

OPENING/CLOSING HATCHES: Generally carried out by ship's crew.
CERTIFICATES:
Ship's Register.
Cargo Gear Certificates.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derating Certificate.
Vaccination and Inoculation Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits.
CARGO GEAR: Before commencement of loading, Master to present shippers or their Agents with valid international cargo gear certificate, which shall not be more than 12 months old. Validity of said certificate to cover whole period for loading and discharging. Fourth five-year plan includes proposals for mechanical front-end loaders, tipping trucks, mobile cranes and forklift trucks.

A 10 ton mobile crane is available.

CONSULS: None.
REPAIRS: Moderate-sized workshop in town able carry out minor deck and engine repairs.
REPATRIATION: Shipping Master arranges crew changes and necessary repatriation. Crew signing off repatriated via Goa or Bombay.
AIRPORT: No airport, or rail connections. Nearest airports Goa or Belgaum, 60 and 150 miles distant respectively. 2 flights per day to Bombay from Goa.
TIME: GMT plus 5.5 hours. Permanent.
HOLIDAYS: Charter party holidays declared and published every year by Honorary Secretary of the Karnatak Chamber of Commerce and Industry, Jaya Chamaraj Nagar, Hubli-20.

Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).

POLICE/AMBULANCE/FIRE: Circle Police Inspector 116; City Police Station 33; District Superintendent of Police 7; Reserve Police Headquarters 18; Ambulance 19.

GENERAL: Port functions normally from 16th September to 15th May. Port closed from 16th May to 15th September due S.W monsoon.
SHORE LEAVE: Crew members are allowed ashore provided not of Chinese nationality.
AUTHORITY: Office of the Port Officer.

MADRAS: 13.06 N. 80.18 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the Port:

To the North: A line "NP" running from a point in position "N" Lat. 13° 7.2′ N. Long. 80° 17.95′ E. to a position "P" in Lat. 13° 12′ N. Long. 80° 25′E.

To the South: A line "SQ" running from a point in position "S" Lat. 13° 4.1′ N. Long. 80° 17.25′ E. to a position "Q" in Lat. 13° 2′ N. Long. 80° 25′ E.

To the East: A line "PQ" connecting the Eastern extremities of the above described North and South boundaries, that is from point "P" in Lat. 13° 12′ N. Long. 80° 25′ E. to point "Q" Lat. 13° 2′ N. Long. 80° 25′ E.

DOCUMENTS:
3 Private Property Lists.
3 Stores Lists (Bonded Stores).
3 Crew Lists.
1 Last Port Clearance.
1 Valid Derat Exemption Certificate.
1 Bill of Health (only if vessel has touched yellow fever areas).
3 Slop Chest Declarations.
3 Currency Declaration.
Passenger List (if applicable).
Ship's Papers.
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Ship's articles (if vessel is Indian or Commonwealth flag).
Ship's papers to be handed over to Agent's Representative for final entry of vessel in Customs House. Same returned to Master.

PILOTAGE: Pilotage compulsory, both inward and outward, also for purpose of shifting inside harbour. Master required to advise ETA at least 48 hours before arrival, when local Agents contact Harbour Authorities for arranging berthing. If any berthing delay vessel has to anchor at Outer Anchorage – anchoring point below 10 fathoms line from breakwater light. Vessels requiring Pilot fly "G" flag by day and 1 white light exhibited on a conspicuous point on ship by night.

ANCHORAGE: Good anchorage found with breakwater light bearing between 240° and 300° – distance 1 to 3 miles.

RESTRICTIONS: No restrictions of entry, both day and night navigation. In Jawahar Docks and Bharathi Dock restriction of movement (inward/outward/shifting) during night time from 2200 hrs. to 0600 hrs. Tankers of 50,000 d.w.t. and over are berthed during daylight only. Tankers of 30,000 d.w.t. are berthed and unberthed at Bharathi Dock from 0600 hrs.–2200 hrs.

MAX. SIZE: Max. length South Quay III is 518 ft. (157.88 m.). Max. length Jawahar Dock is 750 ft. (228.59 m.) and breadth 100 ft. (30.48 m.). Max. length of 850 ft. (259.07 m.) for oil tankers using the "Bharathi Dock" is in force for the outer oil dock jetty during the fair weather season from January to October. During the period from October to January in the North-East monsoon period maximum size of vessel is restricted to 750 ft. (228.59 m.) with suitable draft restrictions.

Draft in the enclosed harbour varies from 26 ft. (7.92 m.) to 35 ft. (10.67 m.). Draft at the outer oil berth during fair weather season is 46 ft.

Details may be obtained from the Deputy Port Conservator, Madras Port Trust, Madras – 600001.

Bharathi Dock: Vessels up to 46 ft. (14.02 m.) draft.

HEALTH: All vessels arriving from foreign ports have to apply for pratique through their radio – not earlier than 12 hours and not later than 4 hours before arrival. Pratique message to be addressed "Quarantine Madras" and worded as required by Port Authorities on receipt of which Port Health Officer cables ship granting pratique. In case of any infectious disease on board, Port Health Officer boards vessel and after due inspection grants pratique.

Telegram should take the following form: Name of vessel. ETA, in hours and date. No monkeys on board, last port (ports touched in last 30 days with departure dates). Request radio pratique.

Port health require to sight derat and vaccination certificates when vessel due to leave before issuing clearance for Pilot and Customs who then issue port clearance.

RADIO: Coast Station Madras Radio, call sign VWM. Information regarding weather distributed twice daily. VHF communication available on Channel 16. Pilot station on Channels 10, 12 and 14, open round the clock to transmit and receive berthing and other operational messages.

Radar is installed on the fourth floor of M.P.T. Administrative Office Annexe Buildings.

RADAR/VHF: VHF communication available, see "Radio".

TUGS: Join vessel just inside breakwater. Vessels use own lines and no tugs' lines used/supplied. Tugs' lines are also used if required by Pilot.

BERTHING: Vessels berth at all times except in "Jawahar Docks" where there is no night navigation between 2200 hrs. to 0600 hrs. There are in all 18 general cargo/bulk cargo berths and 3 moorings. Drafts of these berths/moorings vary from 26 ft. (7.92 m.) to 35 ft. (10.67 m.).

There is an exclusive oil berth in the Outer Harbour with a draft of 46 ft.

An iron ore berth with modern mechanical loading facilities is in operation.

The Bharathi Dock has the potential for accommodating 3 more berths 1 of which can be converted into a container berth.

Outer Harbour present draft is 46 ft. (14.02 m.) and it is likely to be increased.

BRIDGES: There are 2 bridges for pedestrian traffic only. 1 swing bridge at the entrance of Jawahar Dock and another Bascule bridge at the entrance of boat basin.

CRANES: Heavy duty floating crane capacity 120 tons available.

STEVEDORES: A copy of Manifest for stevedores' on board required.

Working hours: 1st shift, 0600–1400 (Recess 1100–1200); 2nd shift, 1400–2200 (Recess 1900–1930); 3rd shift, 2200–0600 (Recess 0200–0230).

MEDICAL: Advance notice for medical aid useful if vessel anchored/anchoring outside and not coming alongside, as it takes time to arrange for launch, etc. Medical assistance arranged easily if vessel alongside. Various hospitals and private nursing homes with modern equipment available. All crew members to be in possession of valid health cards in respect of inoculations/vaccinations against smallpox, cholera, etc. Facilities for renewal available.

TANKERS: There is an oil berth with 46 ft. (14.02 m.) draft at the Outer Harbour with 5 unloading/loading arms, 3 for unloading crude and 2 for handling refined products at a rated capacity of 1,500 tonnes per hour per arm. There are 2 moorings with 30 ft. (9.14 m.) draft in the inner harbour for non-dangerous petroleum products.

Manifold is equipped with 300 mm. Quick fixing cam lock coupling.

Facilities for deballasting the oil tanker are provided.

BULK HANDLING FACILITIES: There are 4 berths, 3 in the Jawahar Dock and 1 in South Quay. Handling of iron ore has been discontinued due to the operation of mechanised iron ore plant at the Bharathi Dock. Instead bulk cargo like barytes is handled.

RATE OF DISCHARGE/LOADING: Grains, by hooks/derricks:
Bulk: 300 tons per day per hook.
Bagged: 300 tons per day per hook.
By Vacs: 250 tons per Vac. per day.
Fertiliser. By hooks/derricks.
Bulk: 200 tons per day per hook.
Bagged: 300 tons per day per hook.
General Cargo: 150 tons per day per hook.
Liquid Cargo: About 150 t.p.h.

CRANES: Three 13-tonne cranes available, 3 similar will be available shortly.

DENSITY: Varies from 1019 to 1025 according to season. No variation due to state of tide.

FRESH WATER: Available and can be supplied to vessels either through shore connections or by water barges. During Summer months due to scarcity of water, full requirements of vessel may not be possible.

FUEL: Bunkers available, but supply dependent on stock position. At least 48 hours advance notice required. Suppliers should receive nomination from their Head Office. Companies supplying bunkers are:

The Indian Oil Corporation Limited.
Caltex (India) Limited.
Esso Standard Eastern Inc.
Burmah-Shell Oil Storage and Distributing Company of India Ltd.

Usual rate of bunkering is about 40 to 80 t.p.h. Grades of fuel available:

Fuel oil, 700 Secs. Redwood No. 1 at 100° F.
L.D.O., 70 Secs. Redwood No. 1 at 100° F.
Gas oil, 30/30 Secs. Redwood No. 1 at 100° F.

GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and they can be engaged from Dock Labour Board.

OPENING/CLOSING OF HATCHES: Work of opening/closing of hatches usually depends on what Charter Party says and also type of hatches of vessel. Liner Term Vessels:-"McGregor Type" – These types of hatches are opened/closed by the crew; but, if Owners/Master desires, rigging gangs may be hired for this work at Owner's expense. Ordinary – Beams & Hatch Boards or Pontoon Type-Opening/closing of this type of hatches is done by stevedores.

CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes and half-ounce tobacco per week can be held by each crew member. Wine/Spirit. 1 open bottle of spirit or wine per week can be held by each crew member.

CARGO GEAR: Vessel should be in possession of valid cargo gear certificate issued by competent authority. Port Dock Safety Inspector may inspect cargo gear before or during loading/discharging in spite of vessel being in possession of a valid certificate.

IDENTIFICATION CARDS: All crew members should be in possession of their respective CDC's/Z. Cards/Passports.

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

DRY DOCKS: None.

CONSULS:

U.S.A.	Tel.	83041	Japan	Tel.	88677

Germany	,,	82125	Ceylon	,,	85316

REPATRIATION: All facilities for effecting crew changes and arranging repatriation exist.

AIRPORT: The Madras Airport (Meenambakkam) about 15 miles from harbour and served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Declared by authorities are observed, but work completely closed on: Pongul, Republic Day, May Day, Independence Day, Mahatma Gandhi's Birthday and Deepavli.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 101; Fire 101.

TELEPHONES: Can be placed on board, but only on vessels at certain berths. All berths on West Quay, i.e. WQ 1, WQ 2, Centre Berth, WQ 3 and WQ 4, North Quay berth and berths on Jawahar docks (West) only, i.e. JD 1, JD 3 and JD 5.

SERVICES: All special services available.

SHORE LEAVE: Crew members allowed ashore after securing shore passes issued by port security officer. However, they must restrict themselves to city limits.

PORT REGULATIONS: Normal Port Regulations. No photography allowed in harbour except with Chairman of Port Trust's permission.

DELAYS: When there is heavy arrival of bulk grain and fertiliser, vessels may expect a delay of about a week or so. General cargo vessels may expect a delay of about 2/3 days during congestion.

AUTHORITY: Madras Port Trust.

MANDVI: 22.49 N. 69.21 E.

DOCUMENTS: Arrival: Arrival Report with ship's details, Voyage Memorandum, Crew Lists, Stores Lists.

Departure: Departure Report with ship's details, Export General Manifest, Certificate of Cargo Tonnage Loaded.

PILOTAGE: None. All vessels anchor in stream.

RESTRICTIONS: Vessels anchor in open roadstead in 3–5 fathoms, 2–2.5 miles from shore. Vessels of 9 ft. draft can reach wharves at high water and vessels drawing 12 ft. can reach Albert Edward breakwater. Vessels having 60–70 tons cargo only can enter port during high tide. Highest tidal range 14 ft., average range 10 ft. Current 2 knots during fair season.

HEALTH: Government Medical Officer attends as health officer.

RADIO: No radio. All messages delivered through Kandla.

TUGS: Services optional 3 tugs and 1 launch. Charges basis time and BHP.

STEVEDORING: Arranged by Agent with Port Authority.

MEDICAL: 24 hours notice required of any medical requirements.

FIRE PRECAUTIONS: Fire extinguishers are available at the port. Fire fighter is available at the Port workshops. Smoking strictly prohibited in port area.

WATCHMEN: Arranged through Agents.

HATCHES: Opened and closed by crew.

CERTIFICATES: Non-carriage of dangerous cargo, Cargo Gear Certificates, Statement that no passengers carried.

CUSTOMS ALLOWANCES: No restrictions for crew of coastal vessels. Stocks of tobacco, wine and spirits to be declared to Customs. Wines and spirits prohibited in Gujarat States but Master permitted daily quota by Customs Authorities.

REPATRIATION: No facilities.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Usually possible to arrange work on holidays.

POLICE/AMBULANCE/FIRE: Police 8; Ambulance 32; Fire 10.

GENERAL: Gulf of Kutch Ports, viz. Mandvi, Mundra, Jakhau and Koteswar administered by Director of Ports, Gujarat States, Ahmedabad. Mandvi located on Southern coast Gulf of Kutch at mouth of river Bukmavati, seasonable, tidal and intermediate ports.

SHORE LEAVE: Crew of coastal vessels only allowed ashore subject prior permission from Captain of the Port.

DELAYS: Delays to be expected in supply of cargo at times of lowest water.

AUTHORITY: Deputy Engineer & Port Officer.

MANGALORE (Minor Port): 12.55 N. 74.52 E.

PORT LIMITS:

North: A line drawn due West from the Northern boundary pillar on the seashore about 740 yards from Sultan's Battery to 9 fathoms of water.

South: The line drawn due West from the Southern boundary pillar to the seashore, about 1,000 yards below the marine yard to 9 fathoms of water.

West: The 9 fathom line between its intersections with the lines above defined as the Northern and Southern limits.

DOCUMENTS:

Crew Lists (6 copies).

Crew's declarations for Customs (4 copies).

Store Lists (4 copies).

Currency declaration (2 copies).

Import Manifest inclusive of Deck Cargo and bottom cargo (3 copies).

Bill of Lading (1 copy).

Ships particulars inclusive of service stand (2 copies).

Declaration of opium, dangerous drugs, gold, arms, ammunitions and explosives, monkeys on board, last and next port of call (2 copies).

Arrival report and Port and Light dues receipts (2 copies).

PILOTAGE: No pilotage. Open anchorage port. When shifting to nearest safe anchorage, free pilotage assistance rendered by Port Officer.

ANCHORAGES: Vessels anchor in depths of 4.5 to 6 fathoms with Mangalore Lighthouse (12° 50.8′ N., 74° 50.3′ E.) bearing between 250° and 270° (T).

HEALTH: Vessel arriving from foreign country sends radio message in code or otherwise to respective Agents who contact Port Health Officer accordingly. If vessel from yellow fever area Master should give prior notice to Agent to arrange for Mosquito Party from Cochin to come to Mangalore and board ship on arrival. If suspected or infected, vessel should anchor not less than half a mile from all other vessels and notify Port Authorities of situation either by radio or through signal station.

RADIO: Call sign VWL on 500 kc/s and 438 kc/s working frequency.

STEVEDORES: Stevedores available. Average loading/ discharging rates per day:

(*a*) Iron ore 400 tons per hook (weather permitting).

(*b*) Fertiliser or wheat bags 200 tons per hook (weather permitting).

(*c*) General cargo bagged 200 tons per hook (weather permitting).

TUGS: 1 Port Trust tug and two launches and 2 private tugs capable of towing over 600 tons each are available.

MEDICAL: 24 hours notice necessary to arrange for a doctor on board. Goverment Hospital and Nursing Homes available.

DENSITY: Density of 1022/3 throughout year except in September (immediately after Monsoon at beginning of shipping season) when density about 1016.

FRESH WATER: Supplied by water barge at rate of 110 tons per trip with 48 hours prior notice. Cost of supply inclusive of all charges except crew overtime on holidays. Minimum order 35 tons.

FUEL: Small quantities not exceeding 40 tons of diesel oil can be supplied by oil barge.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: As per terms and conditions of Charter-Party.

CERTIFICATES:

Ship's Registry.

Deratisation Certificate.

Articles of Agreement.

Dock Safety Register (cargo gear).

Radio Telegraphy Certificate.

Load Line Certificate.

Port Clearance from last port.

Bill of Health.

Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes per week. Wine and spirits, 1 open bottle of spirits per week.

CARGO GEAR: Derricks and boat devices to be hoisted in when not required to prevent contact with masts and sailyards of lighters alongside. Advisable that lifeboats be lowered only on non-working side.

IDENTIFICATION CARDS: Passport or identification cards to be carried by crew plus letter of permission from Master for shore leave.

CONSULS: None.

REPAIRS: Minor repairs to engines and gear carried out by auto-workshops.

DRY DOCKS: Small dry dock, maximum capacity 450 d.w.t. Dimensions, 110 ft.×30 ft. Depth on sill 8 ft. at MHWS. For repairs only.

REPATRIATION: Can be arranged by ship's agents or at shipping office.

AIRPORT: Airport situated 12 miles away. Daily flights to Bombay. Tuesday, Thursday, Saturday to Bangalore. Services by Indian Airlines Corporation.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Port Authorities. Work can be arranged on all holidays except principal Muslim festival days.

POLICE/AMBULANCE/FIRE: Port Police Station 5196. Fire service on lighter wharf only (no fire-floats available), tel. 3333.

TELEPHONE: No arrangement for placing telephone on board.

GENERAL: Port open only in fair season from 15th September to 15th May. However, ships may call at port and work between 15th May and 15th September (weather permitting) with prior permission of Port Officer.

SHORE LEAVE: Permitted, except for Pakistan and Communist-Chinese crew.

DELAYS: Adverse bar conditions necessitate stopping work for bad weather.

AUTHORITY: Mangalore Port Trust Board.

MORMUGAO: 15.25 N. 73.47 E. (See Plan Book)

PORT LIMITS: Roughly up to 10 fathom line running North and South from Cabo to Grand Island. Vessel is considered "arrived vessel" when she comes under direction of Signal Station.

DOCUMENTS:

10 Crew Lists.
10 Passenger Lists, if any.
3 Copies of Manifest.
1 Last Port Clearance.
1 Bill of Lading in case of imports.
3 Stores Lists.
3 Personal Property Lists.
1 Letter of Authority to Agents addressed to Asst. Collector of Customs (prepared on arrival).
1 Arrival Report to Immigration Officer.
1 Customs Declaration.
1 Inward Clearance Certificate.
1 List of Particulars.
1 Deck Cargo Certificate.
1 Arrival Report.

Last 7 items to be signed by Master in port after arrival.

Ship's papers: Documents placed at disposal of port:

Ship's Registry.
Deratisation Classification.
Safety Equipment.
Load Line.
Radio Telegraphy.
Indian Light Dues.
Annual Cargo Gear Certificate.
Safety Construction Certificate.

PILOTAGE: Compulsory. ETA required at least 24 hours before arrival to order Pilot. Call Pilot by international code signals on arrival at signal station or contact by VHF Channel 16.

Pilot launch is white launch showing Pilot flag. In fair weather Pilots board West of fairway buoys. In bad weather, Pilots guide vessel from launch until boarding possible. Pilot launch leaves from inner harbour with Pilot and is not stationed at any particular position. International regulations for Pilots' ladders applicable. Vessels awaiting Pilot may anchor 2 miles West of fairway buoy 6.

RESTRICTIONS: Pilotage only during daylight hours. Draft restricted. Deep-laden vessels await high tide. Max. draft permissible 28 ft. to 30 ft. Draft particulars for incoming ships berth No. 3, 4, 5 and 6 – 23 ft., 27 ft., 27 ft. and 27 ft. Max. draft outgoing ships: berth No. 3, 4, 5 and 6: 23 ft., 27 ft., 27 ft. and 27 ft., respectively. Masters of outgoing vessels wishing to load beyond allocated drafts required to obtain permission 24 hours before sailing/shifting and must sail at fixed time.

MAX. SIZE: Length 650 ft., also see "Entry Restrictions". Vessels loading West of breakwater in fair weather: no restrictions on size or draft. Tankers max. length 700 ft. Also see "Developments".

HEALTH: International Regulations apply. Pratique automatic when calling from another Indian port. Pratique granted by Pilot Officer who boards vessel on arrival. Telegraphic pratique can also be obtained from Port Health Officer cable address "Quarantine Mormugao".

Master should send quarantine message not less than 4 and not more than 12 hours prior arrival indicating:

(1) Name of ship.
(2) Expected date and time of arrival.
(3) My Maritime Declaration of Health has negative answers to all 6 Health Questions or ZT or My Maritime Declaration of Health has a positive answer to question (indicated by complements) or ZU (indicated by complements 1–6).
(4) List of ports of call with dates of departure during last 30 days.
(5) Have or have not monkey on board.
(6) Have or have not any person on board embarking at Aden, Djibouti or Yemen.

Request radio pratique.

RADIO: Goa Radio, call sign VWG. Operating continuously on 500 kHz, 417 kHz, and 2182 kHz. Communication range 100 miles.

VHF radio telephone station at signal station headland, call sign Goa Port, calling Channel 16, working Channel 12.

Ships desiring to contact port on VHF should establish contact by means of *(a)* light signals, *(b)* hoisting "Z" flag, *(c)* blowing "Z" on whistle or siren.

Port VHF station attracts attention of desired ship by hoisting "Z" flag with call letters of ship or by light signalling.

VHF service restricted for port operation, ship's emergencies and movements. All messages to be addressed to Harbour Master. Third party communication not allowed.

TUGS: Tugs usually used inside breakwater. Normally push, but when towing, use ship's lines.

BERTHING: Deep loaded incoming vessels berthed 2 hours before high water. Vessel also use anchor and quarter line to mooring buoy to keep off berth.

BULK HANDLING FACILITIES: One berth equipped for mechanical handling of iron ore. Loading rate about 750 t.p.h. At present vessels of 30,000 d.w.t. and draft of 27 ft. can be accommodated.

The current development project includes provision of iron-ore berth capable of handling vessels of up to 60,000 d.w.t. initially, and 100,000 d.w.t. ultimately with ore-loading plant capacity 8,000 t.p.h.

STEVEDORES: Original ETA of 48 hours and a definite ETA of 24 hours required and Master should indicate stowage and gangs required before arrival, also how derrick booms must be arranged so as to enable stevedores to arrange same on arrival.

MEDICAL: No hospital facilities for any serious sickness but facilities available for first aid, which should be informed 24 hours in advance. Port Ambulance can be obtained during day-time only.

TANKERS: Discharge line 14 in. No loading facilities. Permissible draft 28 ft. at Oil Berth No. 8. In addition, discharge facilities are available at Berths Nos. 4, 5 and 6 with 27 ft. draft.

DENSITY: Salt water 1025 – slightly fresh during monsoon season.

FRESH WATER: Available alongside berths also from 180 tons capacity barge. Pumped by hose at 20 t.p.h. at berth, and 30 t.p.h. from barge. Sometimes restricted to 50 tons maximum if supply is limited.

FUEL:

Grades	*Viscosities*
High speed diesel oil	Less than 45 Redwood
Light diesel oil	41 ,,
Furnace oil (also known as light fuel oil)	of 623 ,,

48 hours advance notice required.

FIRE PRECAUTIONS: During discharge of oil tanker, great care taken that no naked lights are visible nearby. Movements of unauthorised persons at point of discharge strictly restricted. Ships alongside or up to a distance of 100 ft. are advised not to emit smoke through funnel. Round the clock standby duty carried out by Fire Service, around tanker, till completion of cargo discharge.

DEVELOPMENTS: Under the port development scheme the following points are included:

Dredging harbour to 45 ft. with an alongside depth of 43 ft. at new berths to be provided.

Construction of new ore-handling complex for up to 100,000 d.w.t. vessels.

Construction of new deep drafted oil berth which has already been commissioned.

GANGWAY/DECK WATCHMEN: Necessary to have watchmen in case of loading general cargo to protect goods. In case of loading iron ore no watchman required.

OPENING/CLOSING HATCHES: Usually by crew, unless contrary to Charter Party.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per crew member per week. Wine and/or Spirit: 4/5ths of bottle per week for each member of European crew. 2/5ths of bottle per week for each member of Asian crew as per practice.

IDENTIFICATION CARDS: Not essential but according to Immigration Rule temporary Police landing pass issued to each Crew member going on shore, valid for municipal area of Vasco town; if valid passport is possessed.

REPAIRS: No major repairs. Minor repairs only and no underwater welding facilities.

DRY DOCKS: None.

REPATRIATION: Facilities exist for changing and repatriating crew.

AIRPORT: Approx. 7 kms. from harbour. One local flight daily to Bombay. No international flights from Goa and all outgoing foreign passengers have to be repatriated via Bombay.

CARGO GEAR: Certificates to be valid.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Republic Day; Mahashivratri; Holi; Gudi Padva Muharam; Good Friday; Independence Day; Ganesh Chaturthi; Mahatma Gandhi's Birthday; Dussehra; Feast of St. Francis Xaviour; Idu'l Fitr; Goa Liberation Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 2234 through Postal Exchange; Ambulance (Health Centre) 2454 through Postal Exchange; Fire 222 or 223 through Port Exchange and 2300 through Postal Exchange.

TELEPHONES: No arrangements for installation of telephones on board.

SHORE LEAVE: Crew members allowed to go on shore with Police landing pass.

AUTHORITY: Mormugao Port Trust.

MUNDRA: 22.54 N. 69.42 E.

LOCATION: In Gulf of Kutch near Navimal Lighthouse, about 2 miles inside Bocha Creek. Port is about 6 miles West of Mundra town. Salt exporting port open for deep sea and coastal traffic. Vessels calling Mundra anchor in open roadstead 2 miles from shore. Vessels of 8 ft. draft can berth alongside jetty. Highest tidal range 17 ft. Current parallel to coastline running about 3 knots.

AUTHORITY: Assistant Conservator.

NAGAPATTINAM: 10.45 N. 79.50 E. (See Plan Book)

DOCUMENTS: To be completed by Masters of vessels on arrival:

8 Crew Lists.
8 Passenger Lists.
3 Form of Import Manifests of Stores.
3 Lists of articles in slop chest.
3 Private Property. Declaration of the Crew.
3 Manifests.
3 Bills of Lading.

To be handed to Agents:
- Ship's Register.
- Load Line Certificate.
- Safety Equipment Certificate.
- Safety Construction Certificate.
- Safety Radio Certificate.
- Last Port Bill of Health.
- Last Port Clearance.

PILOTAGE: No Pilot station, being open roadstead port. Vessels not piloted to anchorage.

ANCHORAGE: Vessels anchor according draft and prevailing weather conditions. In fine weather, good anchorage in depths of 3.75 to 6 fathoms with lighthouse bearing 281° to 255°. Holding ground, sand and mud, good. Agents, in consultation with Port Authorities, signal Master on arrival of vessel, anchorage position for guidance.

MAX. SIZE: No restrictions. Vessels choose anchorage according to draft.

HEALTH: On arrival Master to signal local signal station, addressed Port Health Officer stating vessel arrived and no sick person on board. Agents then obtain free pratique from Port Health Authorities. In event any person having chicken-pox or smallpox on board, advisable that Master informs Agents sufficiently in advance to enable them make necessary arrangements for Port Health Officer to board vessel on arrival and obtain free pratique after Port Health Officer is satisfied that isolation arrangement on board adequate.

RADIO: Madras Radio or Colombo Radio. No radio station locally.

TUGS: 2 tugs of 45 h.p. each and a motor launch of 30 h.p. are available for towing lighters.

BERTHING: Open roadstead port. No berths. A mobile crane of 4 tons capacity is available in the port for handling heavy cargoes.

STEVEDORES: Port usually handles fertiliser imported on Government of India account and rate of discharge per day about 750 to 1,200 tons. Advisable that ETA of vessel is passed to Agents at least 2 days in advance to enable them to advise receivers to arrange necessary gangs.

MEDICAL: No advance notice required unless sickness of serious nature when Medical Officer boards vessel on arrival. In case of sickness to officers or crew, Medical Officer boards vessel or if in condition to go ashore, necessary arrangements made to take sick crew to Doctor. District Headquarters Hospital with all medical facilities available. Special wards available for sick members of crew. Vaccination, inoculation against yellow fever, cholera, plague, etc., can be arranged.

DENSITY: 1025.

FRESH WATER: Available in limited quantities and dependent upon port getting continuous supply from municipality. 2 tanks of 14.5 tons capacity placed in lighter are sent alongside vessel and a petrol-driven pump is used to pump up water from tanks into vessel.

FUEL: Diesel oil available in a limited quantity.

GANGWAY/DECK WATCHMEN: In the interest of vessel, 2 gangway and deck watchmen daytime and at night to be employed to avoid pilferage.

OPENING/CLOSING HATCHES: Opening and closing of hatches on arrival of vessel before commencement of discharge and on completion carried out by stevedores. Time used for opening and closing of hatches not counted.

CUSTOMS ALLOWANCES: Tobacco, 1 carton per week per crew member. Wine and Spirit, Whisky or brandy 1 quart each member for a week. No restriction for beer as the issue is based on weather, etc. This rule relaxed if necessary.

IDENTIFICATION CARDS: Needed.

CONSULS: None.

REPAIRS: Minor repairs in engine room and on deck can be effected. Chipping and painting can also be arranged.

DRY DOCKS: None.

REPATRIATION: Facilities available for effecting crew changes and arrangements can be made for repatriation.

AIRPORT: Nearest airport Madras, served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Authorities. Vessels work on Charter Party and Government holidays but time not counted. No closed holidays but overtime charged for any work done on Government holidays and on Sundays.

POLICE/AMBULANCE/FIRE: Police 267; Ambulance 299; Fire 299. The Police and Customs Departments maintain their own W/T stations which can be contacted or utilized at times of emergency.

GENERAL: No regular launch service between ship and shore. Agents hire out private launch and obtain permission from port office to ply launch between ship and shore, to facilitate officers and crew to go ashore and for Doctor, Agent and Port Health Officer. Port Authorities do not permit plying of launch after 1800 hrs. 3 trips arranged for launch to go to vessel and back from 0600 to 1800 hrs. every day weather permitting.

SERVICES: Hatch cleaning after discharge of cargo can be carried out.

SHORE LEAVE: Officers and members of crew allowed to go ashore and necessary passes obtained by Agents.

DELAYS: Usually no delay in anchoring vessels and generally all formalities including survey carried out on vessel's arrival. If vessel arrives between 0600 and 1400 hrs., she commences discharge same day.

AUTHORITY: Port Officer.

NAVLAKHI: 22.57 N. 70.27 E.

DOCUMENTS: Arrival:
- Last Port Clearance.
- Bill of Health/Maritime Declaration of Health.
- Customs Arrival Report.
- Port Arrival Report.
- Agent's Arrival Report.
- List of Same Bottom Cargo.
- Crew List (6 copies).
- Import General Manifest.
- Lighthouse Dues Receipt (in case the last port of call being Indian port).
- Store List & Private Property List (8 copies each).
- Misc. Declaration.

Departure:
- Port Clearance (handed over by Customs).
- Bill of Health.
- Port Departure Report.
- Agent's Departure Report.
- Income Tax Clearance Certificate (in case of export cargo).

PILOTAGE: Not compulsory. If required an experienced local guide provided by Port Authorities. In such cases Pilot meets vessel at Tuna Buoy Pilot station about 19.5 miles from port.

ANCHORAGE: Open roadstead port. Vessels work in stream. 2 vessels can be brought to inner anchorage and work conveniently. In case a third vessel arrives, it has to anchor at Buoy No. 5 until 1 of the vessels sails from inner anchorage. During non-monsoon times vessels can be moored at Buoy (Navlakhi) No. 5. Chart of the approaches is No. 2017.

RESTRICTIONS: Night navigation risky. Generally vessels' movements during daytime high water period. Vessels should arrive Tuna Buoy 3 hours before high water in daytime.

HEALTH: No Port Health Officer available. Customary for Port Health Officer Kandla to board vessel at Tuna buoy and grant free pratique (in case vessel within 30 days called any other restricted ports). Otherwise Customs Officer grants free pratique after vessel's arrival in port limits.

RADIO: Radio messages intended for this port should be addressed either through Kandla or Bombay Radio Stations.

TUGS: Four tugs available, 150 h.p., 370 h.p., 382 h.p., and 240 h.p.

CARGO HANDLING: Ships lie at anchor in the stream about 2.5 km. from shore and cargo is shipped/landed through lighters. There are 17 barges of 100 tons capacity each. There are godowns of 234,000 sq. ft. floor area to store the cargo passing through ports. There are four 3 tonnes capacity cranes and two of 5 tonnes capacity.

STEVEDORES: At least 24 hours notice to arrange gangs. Rate of loading and discharging for grain and fertiliser about 900 tons a day if 1 ship working; in case 2 vessels working simultaneously, average of about 600 tons can be maintained in fair weather days.

MEDICAL: No facilities available. Small dispensary under control of Medical Practitioner who undertakes emergency cases. Good medical facilities available at Morvi which is 30 miles away, or Rajkot about 60 miles. Generally doctor called from Morvi to attend vessels.

DENSITY: 1025.

FRESH WATER: Supplied only in small quantities. 1 barge with carrying capacity of about 50 tons a trip. Due to very low pressure pipe-lines, minimum 12 hours to fill barge.

FUEL: None available.

DEVELOPMENTS: A new lighter-wharf in Sui-Side creek is under consideration so as to work lighters all round the clock.

GANGWAY/DECK WATCHMEN: Necessary to appoint watchmen on board to avoid possible thefts.

OPENING/CLOSING HATCHES: Depends upon terms of working. Local stevedores generally attend to this operation but charge to vessel (Owners) in case these operations are vessel's account.

CERTIFICATES:
- Load Line Certificate.
- Safety Equipment Certificate.
- Safety Radio Certificate.
- Ship's Register.
- Derating Certificate.

IDENTIFICATION CARDS: Customs examine and issue pass to land. But if crew go to suburbs (beyond Morvi which is 30 miles away), identity cards should be carried.

CONSULS: None.

REPAIRS: Workshop for repairs to port equipment and urgent repairs of minor nature can be carried out.

DRY DOCKS: None.

REPATRIATION: Crew being repatriated from this port would be sent to Kandla (after Customs examination) where facilities are available.

AIRPORT: Navlakhi not connected by air. In case of emergency, Kandla or Rajkot nearest airports.

TIME: GMT plus 5.5 hours.

HOLIDAYS: The port holidays are taken as Charter Party Holidays. Except for some restricted holidays, work will be carried out on payment of overtime.

POLICE/AMBULANCE/FIRE: Checkpost Police Station without telephone.

TELEPHONES: Few important offices are connected with telephones, and no telephone service can be provided on board vessel.

SHORE LEAVE: The crew members are allowed ashore. See "Identification Cards".

AUTHORITY: Port Officer.

NEW MANGALORE: 12.57 N. 74.48 E. (See Plan Book)

LOCATION: New Mangalore port is situated at 9 km. North of the existing minor port of Mangalore.

PILOTAGE: Compulsory.

ANCHORAGE: Vessels are advised to anchor in a depth of 10 m. (33 ft.) in a position with Surathkal lighthouse, flashing 10 seconds, bearing 011° (T) distance from lighthouse 4.3 miles. Entry into the channel with Pilot is made with 2 transit towers.

NAVIGATION AIDS: Include fairway buoy, front and rear leading lights and channel marking buoys.

APPROACHES: The port has been created by carving out of the mainland a 260-acre lagoon 10.1 m. deep. The lagoon is connected to the sea by an approach channel, 3,200 m. long protected by 2 breakwaters each 340 m. long, constructed one on either side of the channel.

BERTHING: New Mangalore port provides for three alongside berths to cater to (1) general cargo, (2) iron ore and manganese ore, (3) raw materials import for fertiliser factory, (4) one shallow draft berth for export of finished fertilisers and, (5) an oil jetty for handling of naphtha and petroleum products. The dredged depth available at the alongside berths including oil jetty is 9.75 metres, the shallow draft berth has a draft of 6.15 m.

The port has been well provided with storage facilities and cargo handling equipments such as floating crane, electric level luffing cranes, mobile cranes, pay loaders, tractor trailer unit etc., all of varying capacities.

TANKERS: The oil jetty is located in the S.W. portion of the lagoon very near to the approach channel. The dredged depth at the oil jetty site during the first phase of construction will be R.L.-9.75 m. During high tide, the depth will be R.L.-10.65 m. affording berthing facilities for 30,000 d.w.t. tankers.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Well equipped workshop.

COMMUNICATIONS: Port is connected by a broad gauge railway line to Madras via Shornur and National Highway 17, connecting Bombay to Cape Comorin passes by the side of the new port.

DEVELOPMENTS: Provision for procurement of 22.5 ton bollard pull tug and construction of a slipway have been made in the 5th Five Year Plan. The second stage development of the port for providing port facilities to export iron ore concentrates from Kudremukh region through New Mangalore port has been taken up for execution and is in progress.

The Kudremukh Iron Ore Project envisages transporting of the beneficiated ore in slurry form from the mine head to the filtration plant near the harbour, converting the same into filter cakes and stacking in a covered stock pile in the port area. The concentrates are then loaded into the bulk carriers by means of mechanical loading comprising of ship loaders, reclaimers and stackers. After completion of the project the port will be exporting annually about 7.5 million tonnes of iron ore concentrates to Iran for a period of 20 years.

In order to develop the existing New Mangalore port to cater to the needs of receiving 60,000 d.w.t. ore carriers for export of these iron ore concentrates, the following developmental works are being taken up in the port.

1. Construction of an iron ore berth.
2. Deepening the lagoon, inner and outer approach channel −13.0 m. and −13.5 m. respectively.
3. Protection of entrance channel by extending the breakwaters on either side from −3.66 m. contour to −5.00 m. contour.
4. Additional navigational aids including aids for night navigation.
5. Additional harbour crafts for berthing and unberthing of bulk ore carriers.
6. Bunkering facilities for ore carriers.
7. Electrical installations, water supply connections, etc., etc. and
8. Extension of roads, drainage and other facilities to the ore berth.

AUTHORITY: The Administrator, New Mangalore port.

OKHA: 22.28 N. 69.05 E.

DOCUMENTS: 5 copies each of Import Manifest, Crew List. Passenger List, Ship's Stores Manifest, Crew Property List.

PILOTAGE: Compulsory. Pilot station Lat. 22° 30.5′ N.; Long. 69° 04.6′ E.; 1.35 miles N.W. of Samiani Light Tower.

ANCHORAGE: Roadstead anchorage near Pilot station.

MAX. SIZE: 525 ft. LOA during N.E. monsoon and 540 ft. LOA during S.W. monsoon. Max. draft 25 ft.

PRATIQUE: The Master should cable the Port Health Officer (Quarantine Okha) in International Health Code, requesting free pratique. If radio pratique is not effected, then Masters should present Maritime Declaration to the Customs Boarding Officer who is authorised to grant free pratique. If the vessel is arriving from yellow-fever area, the mosquito control team is arranged from Kandla, where the cable address of the Port Health Officer is "Sangrodh Kandla".

RADIO: Post and Telegraph Department Wireless station call sign VWO can be contacted from 0800 to 2000 hrs. I.S.T. for communication to and from Local Agents.

TUGS: Port-owned tugs join vessel while entering port channel and/or vacating it at time of berthing and/or unberthing.

BERTHING: Only daylight hours. Vessels should be ready in all respects to move to berth 1.5 hours before high water at Pilot station.

Sayaji Pier – East side 25 ft. draft; West side 20 ft. draft.
Dry cargo berth – 23 ft. draft.

CRANES: Vessels use own derricks for heavy lifts. There are 2 electric cranes at the Dry Cargo berth each 1.5 – 2.0 tons capacity.

BRIDGES: None.

STEVEDORES: Firm ETA including requirements order avoid delay. *(a) Exports:* Mainly cement, bauxite and chemicals and general merchandise, rate 100/125 tons per shift per hook. *(b) Imports:* Mineral oils average rate about 200 to 300 t.p.h. according to ship's pumping capacity; general cargo same rate as export.

MEDICAL: Port Health Officer always available. Well-equipped hospital at Mithapur under Tata Chemicals at a distance of about 7 miles from port. Medical aid available throughout day and night.

TANKERS: All dry cargo vessels regulations apply for tankers, particularly size, etc. 1 berth, draft 25 ft. No slop facilities.

DENSITY: 1025.

FRESH WATER: Limited. Port supplying water by barge and shore pipe-line. In normal cases 25 tons water supplied per day. In cases of emergency 40 tons water can be supplied per day.

FUEL: Available but arrangement should be made through oil companies head offices at Bombay.

FIRE PRECAUTIONS: Port Department maintains a small fire station.

GANGWAY/DECK WATCHMEN: Vessel to provide own gangway watchmen. Shore-watchman available for employment on shift basis (8 hour shifts).

OPENING/CLOSING HATCHES: To be attended to by ship's crew, if not contracted with stevedores which may cost extra.

CERTIFICATES: Ship's Register, Load Line Certificate, Safety Equipment, Safety Gear, Radio.

CUSTOMS ALLOWANCES: At Customs Preventive Squad's discretion.

CARGO GEAR: Normal gear supplied by stevedores for hire.

IDENTIFICATION CARDS: Necessary.

CONSULS: None.

REPAIRS: Only minor repairs.

DRY DOCKS: None.

REPATRIATION: Necessary formalities to be completed at District Headquarters situated at Jamnagar, a distance of about 110 miles: such as Police, Health, (whereas Customs formality can be completed locally).

AIRPORT: Nearest airport Jamnagar about 110 miles connected with Okha by rail and road. Only local service to Bombay daily operated.

TIME: GMT plus 5.5 hours. (I.S.T.)

HOLIDAYS: As declared by Port Authorities, cargo work can be arranged by paying usual scheduled overtime but labour's observed holidays (about 5 to 6 days in a year) completely closed.

TELEPHONES: Only for tankers by respective oil installation.

GENERAL: Port governed by Gujarat State and all rules and regulations laid down by them in addition to Central Government rules applicable to this port. Port connected with hinterland by rail, motor transport, 300 miles by sea from Bombay, 2 tides in 24 hours, mean high water spring rise about 11.5 ft. and mean low water neap rise 9.5 ft.; current in neap tide is 2 to 3.5 knots. Wind force/direction during April/September S.W. 3/5 and in October/March N.W. to N.E. from 2/4.

SERVICE: Tank cleaning by manual labour.

SHORE LEAVE: Crew allowed ashore after vessel cleared by immigration officer who boards vessel on arrival.

DELAYS: Delay only encountered if berth or moorings are occupied.

AUTHORITY: Port Officer, and Superintendent of Customs, Okha (Ahmedabad Collectorate).

PARADIP: 20.14 N. 86.42 E. (See Plan Book)

PORT LIMITS: 10-fathom line in Bay of Bengal.

DOCUMENTS:
"No opium" Certificate.
Deck Cargo Certificate.
Arrival and departure reports.
Anchorage Certificate.
6 copies of Crew Lists.
Manifest or Bills of Lading.

PILOTAGE: Pilotage available during daytime only. Last pilotage 1630 hrs. Give ETA to Agents at least 24 hours in advance. Agents book Pilot and arrange for inward pilotage after arrival.

ANCHORAGE: Anchorage particulars given in chart published as "Paradip Anchorage". Vessel can anchor depending on draft, 4 cables from Fairway Buoy, positioned Lat. 20° 14.51′ N. and Long. 86° 42.19′ E. Pilot boards during daytime with help of Pilot launch.

RESTRICTIONS: Vessels not berthed/sailed during night-time after 1630 hrs. Vessels to have maximum ballast for entering.

MAX. SIZE: LOA 850 ft. and max. draft 39 ft. Also see "Berthing".

Subject to weather conditions longer vessels may be berthed. A vessel of 840 ft. has been berthed, also vessels with 39 ft. draft.

HEALTH: Send usual quarantine message to "Quarantine Paradipport" 24 hours before arrival for radio pratique. Pilot gives free pratique on boarding vessel subject to no sick person on board. In case of suspected disease or fever on board, Port Medical Officer visits ship at anchorage/berth and cases of contagious disease are isolated and sent to nursing home.

RADIO: VHF radio installed at signal station in the Harbour Office. Calling Channel 16. Working Channel 9.

Working Hours: every even hour for 10 minutes from 0600 hrs. to 2200 hrs. and when ships are making or leaving the port.

VHF: Vessels are requested to establish contact with the control station when within VHF range (approx. 40 to 60 miles) and before entering, moving in or sailing from the port.

When within VHF range, ships are requested to give the following information:

(1) Name of ship.
(2) Ports of departure, call and destination.
(3) ETA.
(4) Vessels gross tonnage, LOA, breadth, draft and speed.
(5) Number of cases of dangerous contagious diseases on board.
(6) Type and quantity of cargo.
(7) Name of Agents and requirements.

TUGS: Tugs join vessel just inside approach channel. Ship's lines only used.

BERTHING: 1 iron ore berth, 1 general cargo berth and 1 mooring berth.

Iron-ore Berth: Overall length 320.5 m., draft 11.89 m., beam unrestricted. Accepts vessels up to 80,000 d.w.t.

General Cargo Berth: Length 290 m., draft 10.69 m.

Mooring Buoy Berth: Vessels up to 850 ft. with draft 39 ft. can be moored.

CRANES:

Types of crane	*Nos.*	*Capacity*
E.L. wharf cranes	3	13 T
Mobile cranes	8	7 to 20 tonnes each

Cargo Handling Equipment:

Fork lift trucks	10	3 T
Front end loaders	2	2.3 cu.m.
Rear dumpers	7	4.5 cu.m.
Tractor trailers	4	5 T
Tractor trailers	1	10 T
Tractor trailers	1	20 T

BULK HANDLING FACILITIES: 1 iron ore berth with mechanical loading plants of rated capacity 2,500 t.p.h.

SPECIALISED CARGO HANDLING FACILITIES: At present no facilities available for container, roll-on/roll-off traffic or liquid chemicals.

STEVEDORES: Stevedores required for loading/unloading at General Cargo Berth and Mooring Berth and at Iron Ore Berth when there is no Iron-ore vessel at the Port. Average loading rates achieved for different cargoes as follows:

Cargo	*Tons per day*
Chrome-ore	1,200
Pig-iron	1,500
Coal	3,000
Iron & Steel	1,000
Foodgrains	1,500
Fertilisers	750
Other General Cargo	750

TANKERS: No facilities available at present.

MEDICAL: After arrival, Doctor can board vessel to attend to any urgent case. No hospital facilities. Sick crew sent to Cuttack/Bhubaneshwar about 90/120 km. from Paradip.

DENSITY: Varies from 1018 to 1024 with average of 1021.

FRESH WATER: Water supplied both at iron ore berth, Quay berth and also at moorings but not at roads. Water supplied at an average of 100 tons per day.

FUEL: HSD and furnace oil can only be procured from Cuttack on duty paid oils only. Arrangements will have to be made well in advance and the port will only provide berthing facilities for taking bunkers.

FIRE PRECAUTIONS: Fire extinguishers available.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Undertaken by crew only.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Last Port of Clearance.
Deratisation Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or Spirit: 1 bottle of 24 ounces per head per week.

CARGO GEAR: Valid cargo gear certificate required.

IDENTIFICATION CARDS: Authorities issue landing pass.

CONSULS: None.

REPAIRS: Minor repair facilities exist.

DRY DOCKS: A 500-ton slipway available.

REPATRIATION: Repatriation of foreign personnel is strictly not allowed as Paradip has not been declared a port of embarkation and disembarkation. Only emergency cases considered provided sufficient time is given, for permission from the Home Secretary of local Government from Bhubaneshwar and other immigration authorities.

AIRPORT: Nearest airport at Bhubaneshwar 120 km. Only local flights available. Flight timings to Visakhapatnam 1100 hrs. and Calcutta at 1500 hrs. and 1925 hrs. daily.

TIME: Local time GMT plus 5.5 hours.

HOLIDAYS: Charter Party holidays. Normally work carried out on all days.

POLICE/AMBULANCE/FIRE: Police 227; Ambulance 241. No fire service station at present.

TELEPHONE: No facilities for telephones on board.

SERVICES: None available.

SHORE LEAVE: Port Immigration issue shore passes to all foreign nationals excepting Chinese and Pakistanis and with shore passes crew allowed ashore.

DELAYS: Vessels generally get berth on "First Come First Served" basis.

DEVELOPMENTS: Turning Basin enlarged to 520 m. Second cargo berth under construction. Transit sheds and warehouses have been constructed.

SHIPMASTERS REPORT No. 1: (1975). Suggest vessels follow the normal procedure for Calcutta re-arrival documents.

Customs officials require the personal attention of the Purser to a greater extent than in any other Indian port.

Stores: Fresh stores about average quality for Indian ports. One is not advised to try to buy meat or fish as these commodites come from Cuttack, a good distance away, and frozen imported meat is not available.

SHIPMASTERS REPORT No. 2: (1976).

Berths: Apart from 1 iron ore berth and 1 mooring berth there is now a general cargo berth. The long arm has a length of 290.65 m. and a short arm 118.40 m. The depth alongside is 36 ft. 2 ships are normally berthed at the long arm but the ship at the Southern end normally overhangs slightly (when 2 average size ships are berthed).

Stevedores: There are a number of stevedores available at the port. No notice is required.

Services: Fresh provisions are available but 24 hours notice is required for most items. Laundry can also be arranged by Agent.

AUTHORITY: Chairman, Paradip Port Trust.

PONDICHERRY: 11.56 N. 79.50 E.

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Store List with Private Property Declaration in Triplicate.
Crew List (8 copies).
Light Dues Receipt.
Manifest (Import or Export).
Bill of Lading.

PILOTAGE: Not necessary as open roadstead anchorage.

ANCHORAGES: Proper anchorage in line with New Pier. 2 chimneys in line (276°) will provide good transit in day time and at night green/red light in transit with red pier light can be taken.

MAX. SIZE: Anchorage is 7 fathoms within 1 mile from New Pier.

HEALTH: Free pratique obtained on arrival and Master expected to address message to Port Health Officer, advising that all are well on board. Free pratique automatic for vessels calling from any Indian ports.

RADIO: Cables routed through Madras Radio (call sign VWM).

TUGS: Tug kept ready at New Pier for towing barges.

BERTHING: No berths.

STEVEDORES: 48 hours notice prior to arrival. Rate of discharge of bagged cargo 800 to 1,000 tons per day.

MEDICAL: No advance notice necessary. General Hospital and Jipmer Hospital available.

TANKERS: Transfer operations are carried out at anchorage 1.5–2.5 miles off shore.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

DEVELOPMENT: Proposals finalised for construction of new lighthouse near New Pier.

GANGWAY/DECK WATCHMEN: Services not compulsory, but recommended to avoid pilferage. 3 watchmen day/night.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each Crew member to be held out of bond. Wine and/or Spirit, 1 open quart bottle per Crew member permitted to be held out of bond.

IDENTIFICATION CARDS: Not needed if furnished with Crew List.

CONSULS: Only French Consulate General. Tel. 58.

REPAIRS: Deck and Engine repairs not attended. Special arrangements can be made from Madras. Minor repairs carried out privately.

DRY DOCKS: None.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.

AIRPORT: Nearest airport is Meenambakam Airport, Madras, distant 160 km.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Authorities but cargo work arranged on all holidays on payment of overtime, except on Republic day, Gandhi's Birthday, May Day and Independence Day.
POLICE/AMBULANCE/FIRE: Police 100; Fire 101; Ambulance arranged through hospital doctor on duty, tel. 198.
TELEPHONES: No facilities to place on board.
GENERAL: For purposes of crew going ashore, launches arranged between 0600 hrs. and 1800 hrs. weather permitting, hired from private parties. Laundry facilities, supply of fresh vegetables and provisions arranged.
SERVICES: None.
SHORE LEAVE: Crew members permitted ashore but have to remain within town limit.
DELAYS: Delays occur only under unavoidable circumstances such as Surf Declaration, Cyclone, etc. Vessels arriving at night, commence discharge operations next morning.
AUTHORITY: Port Officer.

PORBANDAR: 21.38 N. 69.36 E.

DOCUMENTS:

Crew Lists (6 copies).
Passenger Lists (6 copies).
Customs Documents to be prepared by Agents and signed by Master (4 copies).
Arms and Ammunition Certificate 4 copies duly signed by Master.
Health Documents; all yellow fever, cholera and smallpox books should be valid on arrival as well as on departure, if they are not valid on departure Port Health Officer should visit ship and give required injection to persons for completing health books before obtaining Bill of Health.
Port Clearance: Port Clearance of last port to be submitted to Boarding Officer of Customs.
Private Property List (6 copies duly signed by Master).
Store List (4 copies duly prepared by ship's officer).
Currency Declaration (4 copies).
Bills of Lading: Bills of Lading for export cargo generally to be prepared and signed by Agents.

PILOTAGE: Compulsory for inward/outward or for all shifting in the Harbour between berth and buoys.
ANCHORAGE: Anchor in stream about 1.5 miles off shore. 6 fathoms at low water, with good holding ground.

Outer anchorage is with Rajah's Old Palace, about 1.5 miles South-eastward of lighthouse, bearing 85° and lighthouse bearing 26°, 4.5 to 5 fathoms sand and rock (or further out as required).
MAX. SIZE: Any size vessel at anchorage. Alongside berth – Max. LOA of vessels up to 215 m. Max. permissible draft 9.75 m. No beam restrictions.

1 mooring buoy – max. draft 7 m.

For roadstead, no restrictions on length or breadth.
HEALTH: If arriving from yellow fever area within 30 days a grant of free pratique is necessary. Mosquito Party to be deputed from Kandla, which can only be arranged by prior intimation, failing which vessel would have to proceed to either Kandla or Bombay for free pratique.
RADIO: Porbandar call sign VWY, working frequency 462 kc/s. and watch keeping on 500 kc/s.
TUGS: Will join ships for assisting berthing/unberthing.
BERTHING: 1 alongside berth and 1 mooring buoy.
STEVEDORES: 24 hours notice required for Agents to arrange gangs.

Average rate of working – 380 to 400 tons per gang per day.
Export Commodities: G.N. extraction in bags, cement in bags, soda ash, frozen fish, lime and lime stone, lime powder, bauxite.
MEDICAL: Government hospital available. There are also private hospitals.
TANKERS: Presently no facility for discharging oil.
from bonded stores of ship. Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.
CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: A dry dock of 150 ft.×55 ft. for repairs to port crafts. Also port workshop for repairs to shore and marine equipment.
AIRPORT: 3 miles from town, daily flight to Bombay.
TIME: GMT plus 5 hours.
HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.
POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.
SHORE LEAVE: Police, port and Customs permission required before landing.
AUTHORITY: Port Officer.

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS: Arrival:

Maritime Declaration of Health Form (in duplicate).
Port Clearance from last port of call.
Ship's Stores List (in triplicate).
Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
Crew Lists (6 copies).
Ship's Currency List (in triplicate).
Arms and Ammunition Declaration.
Passenger List – if any.
Through Cargo Manifests.

Departure:

Medical Inspection or Examination Certificate (Bill of Health).
Port Clearance.
Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Bombay Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.
ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44′ N. Long. 73° 39′ E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about three-quarters of a mile S.S.W. and about half a mile Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).
MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.
HEALTH: On arrival, Customs Authorities board and grant free pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for radio pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants pratique after boarding vessel with mosquito party deputed from Bombay at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Bombay and/or Mormugao for free pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging pratique. Vessels transitting through above infected areas for bunkers or water only do not require mosquito party for obtaining pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.
RADIO: Bombay Radio.
BERTHING: No berths. Open roadstead port.
LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOBT terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increase fleet and improvement of shore loading facilities.
MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations and smallpox vaccination done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.
DENSITY: Average 1025.
FRESH WATER/FUEL: None.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.
CERTIFICATES: All certificates, particularly Cargo-gear Certificate to be in order and valid.
CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: None.
REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.

AIRPORT: Belgaum and/or Vascodagama 90 miles distant.
TIME: Indian Standard Time GMT plus 5.5 hours.
HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.
GENERAL: Regular Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.
SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, crew list and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.
REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.
DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.
AUTHORITY: Port Officer.

TUTICORIN: 08.48 N. 78.10 E.

DOCUMENTS: Required on arrival:
4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Store List.
2 Health Report Form.
PILOTAGE: Pilotage compulsory within Port Limits. However, there is no night pilotage.
ANCHORAGE: Anchorage in roadstead with Pandyan Tivu Lighthouse, bearing between 260° and 292°, distant 2 to 2.5 miles, in depths 27 to 33 ft. (8.2 m. to 10 m.); holding ground good, mainly sand, mud and shingle.

In N.E. monsoon, vessels should have a good length of cable and second anchor always ready, as sea breeze blows on reef Eastward of Pandyan Tivu. In S.W. monsoon, middle May to middle August, wind though violent, is invariably off shore, West to S.W., and water fairly smooth.
HEALTH: Free pratique granted to vessels carrying food grains or fertilisers on Government of India a/c. Master required wireless Port Health Officer, Tuticorin, requesting grant of free pratique. On receipt of message Port Health Officer grants pratique and message passed by radio to steamer. This applicable only in cases where steamers have no infection, epidemic or disease. Otherwise Port Health Officer boards vessel on arrival and grants pratique after inspection.
RADIO: When vessels within 24 hours distance Tuticorin Radio could be used and call sign VWT. Otherwise according to route followed, steamers use Madras or Bombay Radio.

VHF service available between ship and shore.
TUGS: Tugs available but if services required special arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.
BERTHING: See "Developments".
STEVEDORES: Agents require 48 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.
MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired arrangements made for re-vaccination/re-inoculation and renewal of certificates.
TANKERS: No facilities.
FRESH WATER: Available. Barge-capacity 100 tons. Delivery in units of 100 tons only. During Summer, usually shortage of water. In other seasons water available but as only 1 barge, delivery of water arranged by turn depending upon number of steamers in port. Fresh water also available at Berth No. 1.
FUEL: None.
DEVELOPMENTS: The New Major Port has been declared a Major Port under Indian Ports Act with effect from 1974. All four berths are open for traffic. The 4 berths have a draft of 27 ft. at all stages and approximately 30 ft. on high tides. Two cranes of 3 tons and one crane of 5 tons are available for cargo handling at all times.
GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.
OPENING/CLOSING OF HATCHES: By ship's crew. If done by stevedores charges extra.
CERTIFICATES:
Ship's Register.
Safety Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio & Telegraphy Certificate.
Deratisation Certificate.
Cargo-gear Stability Certificate.
IDENTIFICATION CARDS: Identification cards or seamen's passbook required to be presented to Police and immigration authorities while coming on shore.
CONSUL: None.
REPAIRS: No maritime workshops. Only minor repairs.
DRY DOCKS: A dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of departmental vessels. It is spared to other Departments and Owners of sailing vessels for docking their vessels whenever required.
REPATRIATION: Could be arranged via Madras.
AIRPORT: Nearest airport is Madurai, distant 100 miles, which could connect Madras.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by authorities but boatmen do not work on following holidays as these are days of obligation and festivals: New Year's Day, Republic Day, Maundy Thursday, Good Friday, Tamil New Year Day, May Day, Ascension Day, Corpus Christi, Our Lady of Snows Feast, Assumption Day and Christmas.
POLICE/AMBULANCE/FIRE: As steamers are in open roads about 5/6 miles from shore all emergency to be passed to Port Authorities through signal station and to respective Agents.
SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.
REGULATIONS: Usual regulations. All crew members coming into shore and returning to ship must report to Customs and Port Police on every trip.
AUTHORITY: Port Conservator, Tuticorin Port Authority.

VERAVAL: 20.54 N. 70.22 E.

DOCUMENTS:
Last Port Clearance.
Ship's Stores Manifest (3 copies).
Crew List (5 copies).
Private Property List of Crew (3 copies).
Same Bottom Cargo (3 copies).
Ship and Crew Currency List (3 copies).
Indian Coast Light Dues Receipt (if vessel arriving from Indian port).
Maritime Declaration of Health.
Customs Arrival Report.
Customs Declaration for arms ammunition, etc.
Port Arrival Report.
PILOTAGE: Not required. Vessels anchor midstream.
ANCHORAGES: Veraval light exhibited on coast near Political Residency (occ. 15 sec. 110 ft.). Known as New Lighthouse. Breakwater near harbour under 3 fathoms (5.5 m.). No perceptible tide streams in roadstead. During night/neap tide with low water ships suffer cargo feeding for about 5 hours, 4 to 5 days in month.

Anchorage depth 48 to 60 ft. opposite Phiriya Temple. Good anchorage obtained with Veraval Lighthouse Bearing 317°, breakwater end. True Bearing 336.5°, Bhiria Beacon 27°.
RESTRICTIONS: None, day or night anchorage possible.
MAX. SIZE: No restriction.
HEALTH: Vessels having called yellow fever area and taken on board passengers or crew (other than bunkers or water) granted free pratique by mosquito party deputed from Kandla Port which only arranged by prior notice, failing which vessel would have to proceed either Kandla or Bombay for free pratique. Vessels other than above are granted pratique by Boarding Officer of Customs upon presenting Maritime Declaration of Health. Radio pratique not available.
RADIO: Messages via Bombay Radio. No VHF.
TUGS: Not required.
BERTHING: No berths.
STEVEDORING: Particulars of ETA and labour gangs required well in advance. Average loading/discharging:

Loading bagged cargo oilcake, etc.	225/250 Ts. per hook per day
Loading GN oil in drums	150/175 Ts. per hook per day
Discharging fertiliser (bagged)	150/200 Ts. per hook per day
General cargo loading/discharging	150/200 Ts. per hook per day

MEDICAL: Qualified doctors and hospital facilities.
TANKERS: No tanker berths.
FRESH WATER: No guarantee of supply as this is a scarcity area however 100 tonnes of fresh water may be supplied on every third day.
FUEL: None available.

GANGWAY/DECK WATCHMEN: Not necessary unless required. Can be arranged through Agents.
OPENING/CLOSING HATCHES: Carried out by stevedores. Ships' derricks worked by crew.
CERTIFICATES:

Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-Telegraphy Certificate.
Deratisation Certificate.
Ship's Registration Certificate.

CONSULS/REPAIRS: None.
REPATRIATION: Can be arranged.
AIRPORT: Nearest airport Keshod, 30 miles from Veraval, but motor transport not easily available and advance arrangements have to be made.
TIME: Local Time GMT plus 5.5 hours.
HOLIDAYS: On which work not allowed for loading/discharging: Indian Republic Day, Holi (Second Day), Ramnavami. Mohurram (Ashura or 10th day), Gokulashtami, Dussera, Diwali (New Year's Day), Ramzan-Id (Id-ul-Fitr).
POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.
TELEPHONES: No arrangements for placing telephones on board the ship.
GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.
SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.
DELAYS: 3 ships can work and fourth vessel if for lifting frozen fish can work during night hours only. Fourth vessel other than frozen fish cargo wait in turn.
AUTHORITY: Port Officer.

VISAKHAPATNAM: 17.41 N. 83.20 E. (See Plan Book)

PORT LIMITS: 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel". It is proposed that 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary.
DOCUMENTS:

12 copies of Crew List.
3 copies of Store List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of watch lists, giving details of make and value, etc.

The vessel must possess following valid certificates:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy Certificate.
Cargo Gear Test Certificate.
Deratisation Certificate.
Last Port Clearance.

Pilot on boarding vessel before bringing her in gives a copy of Maritime Declaration form which should be filled in and signed by Master.
PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.
ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 miles.
RESTRICTIONS: *Inner Harbour:* Round-the-clock pilotage, subject to following restrictions.

Ore carriers of 640 ft. length overall and 100 ft. beam can enter the port between 0600 and 1800 hrs. Ore carriers of 640 ft. length, 100 ft. beam, and 33 ft. 6 in. draft can sail on high water on a minimum rising tide of 3 ft. 6 in.

Vessels of 630 ft. overall length, 33 ft. draft and 100 ft. beam can enter the port between 0600 and 1800 hrs. on high water on a minimum rising tide of 3 ft. Such vessel can sail from the port at any time, draft being less than 31 ft., between 31 ft. and 33 ft. subject to height of tide of 3 ft. for 33 ft. draft.

Vessels of 575 ft. length overall or less and draft 30 ft. or less can enter and sail from the port at all hours.
Outer Harbour: No tidal restrictions.
MAX. SIZE: *Inner Harbour:* Max. permissible length 640 ft. overall. Max. permissible breadth 100 ft. Max. permissible draft 33 ft.
Outer Harbour: L.O.A. 885 ft. 10 in. (270 m.)
Beam 137 ft. 10 in. (42 m.)
Draft 50 ft. 03 in. (15.3 m.)
PRATIQUE: A separate radio free pratique message addressed "Quarantine Visakhapatnam" must be transmitted by all vessels arriving from foreign port not less than 4 hours and not more than 12 hours prior ETA. No necessity for any vessel to obtain free pratique when she arrives directly from any Indian port.
Shipmaster's Report: 1978. Specimen of Quarantine Message:
"Vessels name ETA .... ZT Malta 15/4 (Ports called last 30 days with departure dates). No monkeys aboard, no persons embarked at Djibouti or Aden. Request Free Pratique".
RADIO: Radio station call sign VWV. Working round clock. Range about 600 miles during daytime and 1,000 miles during night. Better to use Madras Radio Station for all communications in respect of vessels arriving from Madras side. Vessels coming from Calcutta side, use Calcutta Radio. Generally Visakhapatnam Radio station used for vessels anchored at roadstead. VHF Channel 16.
TUGS: For ships entering the port, the tugs wait in the lee of the breakwater. Ship's lines and/or tug's lines are used, depending upon the mode of making fast.

SPECIALISED CARGO HANDLING FACILITIES: Inner Harbour: *WOB-1 and WOB-2 Berths:* For the export of iron ore through a mechanical ore-handling plant capable of loading at the rate of 3,200 t.p.h.

Fertiliser Berth: For the import of fertiliser raw materials, viz., sulphur and rock phosphate, by grab unloading on to a conveyor belt.

OR-1 and OR-2 Berths: For the import and export of P.O.L.
Q-1 and Q-2 Berths: For the export of manganese ore and other ores by semi-mechanical means. Portable flat belt conveyor system for handling bulk cargoes.

Use of grabs for unloading bulk cargoes.
Poclain hydraulic excavator for handling bulk cargoes.
A large number of electric cranes, mobile cranes, forklifts, dumpers, trailers etc.

Outer Harbour: *OB-1 and OB-2 Berths:* For the export of iron ore through a mechanical ore handling plant capable of loading at the rate of 8,000 t.p.h.

Also see "Tankers" and "Developments".
BERTHING: No specific requirements of arrival times for berthing.
STEVEDORES: Agents must give proper notice of vessel's arrival to the stevedores not less than 48 hours to make necessary arrangements for working vessel and also to order sufficient gangs, etc.
MEDICAL: All crew and officers must possess individual international vaccination certificates against smallpox and cholera before leaving this port for any foreign port. Smallpox vaccination and cholera inoculation facilities available within 24 hours notice. Well-equipped hospital facilities available round the clock.
TANKERS: There are two berths OR-1 and OR-2 for discharging and loading oil. The max. permissible draft at these berths is 33 ft. at High Water. The depth alongside OR-1 and OR-2 is 32 ft. In the Outer Harbour, an oil mooring berth is available to accommodate tankers of up to 100,000 d.w.t. with a draft of not exceeding 47 ft.
DENSITY: Fluctuates from day to day between 1020 and 1023.
FRESH WATER: Normal quantities available and delivery made by Port Trust both from shore and barges.
FUEL: Esso, Indian Oil Corporation and Caltex, Bombay, to be contacted for particulars of stocks, etc., as local offices controlled by them.
DEVELOPMENTS:
Outer Harbour Project:

1 The Outer Harbour will have a set of breakwaters to form a protected basin. The Southern part of the basin will permit entry and berthing of 100,000 d.w.t. ships fully loaded, initially. This would ultimately be developed to take 200,000 d.w.t. vessels or even more. The Northern part of the basin will be suitable for use as a large fishing harbour.

2 It will have a finger-type berth for iron-ore loading, designed to handle 200,000 d.w.t. vessels ultimately, providing facility for berthing of 2 vessels on either side of the jetty at the same time. There will also be room for 3 additional general cargo/container berths for 60,000 d.w.t. ships which could be brought into commission in future by reclaiming the area between the fishing harbour basin and outer harbour basins.

3 The ore loaded at the outer harbour berth will be conveyed through a conveyor system and necessary steps will be taken to eliminate the dust nuisance to the utmost extent.

4 The outer harbour project has been designed to load 100,000 d.w.t. vessels at 8,000 tonnes per hour initially. This can be increased to 12,000 tonnes per hour and 16,000 tonnes per hour to load 150,000 and 200,000 d.w.t. vessels respectively when such a demand builds up. A stockpile capacity of 30 days supply on the basis of the levels of shipment will be provided. The receiving system including the 2 existing dumpers and additional railways and shunting locos can handle about 10 million tonnes of iron ore per year from the mines. With a third dumper, the capacity could be increased to 15 million tonnes.

5 Provision will be made to the installation of a screening and/or calibrating plant and pallet plant, in future.

6 The project includes navigation aids, harbour craft, as well as other ancillary facilities required for operation of the outer harbour.

The construction of outer harbour project is almost complete. The trial loading of iron ore in the outer harbour is on and formal commissioning is expected during the third quarter of 1976. The outer harbour project will be the deepest harbour in the country with a depth of 16.5 m. (54 ft.), alongside the berth. An oil mooring berth in the outer harbour was constructed and commissioned to accommodate tankers of 100,000 d.w.t for transhipment of oil from mother tankers to daughter tankers. Max. draft allowed at the oil mooring is 47 ft.

Break-waters under construction:

In connection with the Outer Harbour Project, the 3 breakwaters under construction are in the following positions:

	Latitude	Longitude
(1) South Breakwater:		
Western end:	17° 40′ 41.10″ N.	83° 18′ 00.30″ E.
Eastern end:	17° 41′ 01.43″ N.	83° 18′ 49.12″ E.
(2) East Breakwater:		
Southern end:	17° 41′ 14.93″ N.	83° 18′ 29.30″ E.
Northern end:	17° 41′ 47.29″ N.	83° 18′ 34.72″ E.
(3) North Breakwater:		
Northern end:	17° 42′ 02.00″ N.	83° 18′ 24.00″ E.
Southern end:	17° 41′ 47.77″ N.	83° 18′ 27.23″ E.

Spoil ground: A new spoil ground has been established in the following position:

Latitude	Longitude
17° 39′ 35″ N.	83° 19′ 19″ E.
17° 40′ 01″ N.	83° 19′ 40″ E.
17° 40′ 40″ N.	83° 20′ 37″ E.
17° 38′ 59″ N.	83° 19′ 45″ E.
17° 39′ 26″ N.	83° 20′ 04″ E.
17° 40′ 06″ N.	83° 21′ 01″ E.

GANGWAY/DECK WATCHMEN: Necessary according to demands of local labour unions.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or spirit: Asian Crew 2/5 units per 3 days. Non-Asian crew 4/5 units per 3 days. Bottle of liquor equals unit.

CARGO GEAR: Valid cargo gear test certificate must be on board all vessels using ships' gear for loading or discharging.

IDENTIFICATION CARDS: Not needed if have valid seaman's books.

CONSULS: None.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 2. 1 owned by Hindustan Shipyard Limited, 800 ft.×125 ft.×26.5 ft. (maximum length of vessel 780 ft.). Second owned by Port Trust – 450 ft.×60 ft.×18.5 ft. (maximum length of vessel 400 ft.).

REPATRIATION: Facilities exist to foreign countries via Madras, Calcutta or Bombay. About 3 days delay to obtain travel permit.

AIRPORT: Distant 6.5 miles. Regular daily flights to Calcutta and Hyderabad by Indian Airlines Corporation.

TIME: Indian Standard Time is local time, and no alterations made to clocks during the year. GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by authorities but port's closed holidays are: Pongal, Kanumu, Mukkanumu, Republic Day, Kotha-Amavasya, May Day, Independence Day, Gandhi's Birthday and Nagulachaviti, when work not possible even on payment of overtime.

POLICE/AMBULANCE/FIRE: Police Station 2140; Fire Station 4841 – Ext 239; Ambulance 4841 – Ext 213 (Port Hospital).

TELEPHONES: No arrangements exist for placing telephone on board.

SERVICES: Tank cleaning facilities available at Caltex berths.

SHORE LEAVE: Crew members allowed ashore after receiving immigration permits.

GENERAL: *Priority:* Vessels arriving at this port for berthing at various berths on priority if they so desire can register their priority at "Roads" and move to other ports. But the vessel should be back within Visakhapatnam Port limits when the berth (for which registration was made) falls vacant. If the vessel is not ready at Roads, the vessel would lose its priority and take its turn along with other waiting vessels including vessels which have registered with the port for the priority berthing.

DELAYS: Normal delays such as waiting for Pilot, waiting for tugs, etc., since this port can handle only one movement at a time. Other delays such as no power to shore cranes, bad weather, shed congestion, etc., expected.

SHIPMASTERS REPORT:

Port Limits: Appear to be accepted upon the basis of VHF information to local port control that one has in fact anchored, rather than being in a particular area.

Anchorage: Harbour Master and Pilots prefer that ships anchor South of a line running East/West from the entrance, depth chosen to suit individual requirements.

Special Cargo Handling Facilities: The "Q" berths are now No. 1 for manganese, Nos. 2 and 3 for grain and the remainder for general cargo. All are in difficulties with Customs over shed and wharf clearances and this has created long delays both in getting alongside and working. The grain is bagged in the holds and discharged via snotters on ship's gear. Total rate roughly 1,000 tons per day per ship.

Fresh Water: There have been no useful rains for several years and water is at a premium. When a ship advises the local authorities that she is out of water, a layup berth or buoys is allocated and a minimum amount is supplied by barge. This is repeated throughout the ship's stay. No question of filling tanks, and supply may be 30 tons every 2 or 3 days.

Fuel: Diesel oil here is not suitable by choice for most merchant ships. 2 grades, heavy diesel of some 225° Redwood at 100° and light diesel which is 57° Redwood at 100°.

Repatriation: Allow 5 days for travel permits.

Delays: Tankers berth more or less on arrival. Ore loaders wait 1 or 2 days as the terminal becomes vacant – 2 loading arms at around 1,000 t.p.h. Grain and cargo boats can expect to wait up to a month for a berth and will be 2 or 3 weeks alongside.

AUTHORITY: Visakhapatnam Port Trust.

NOTES

Please also advise Shipping Guides Ltd.

Indonesia

AMBON: 03.41 S. 128.10 E.

DOCUMENTS:

- 14 Passenger Lists.
- 7 Crew Lists.
- 2 Customs Documents.
- 2 Health Documents.
- 7 Cargo Manifests.
- 7 Bills of Lading.
- 5 Ship's Papers.
- Sailing Permit.

PILOTAGE: No Pilot station. Apply for pilot boat by calling Ambon Coast Station (Ambon Radio) or fly "G" Flag. Pilot boat located at Ambon Bay. Entrance in all seasons and weathers. All parts of Ambon Bay suitable for anchorage to await Pilot.

ANCHORAGE: Areas of anchorage can take all sizes of vessel.

RESTRICTIONS: Open 24 hours. Tides do not affect entry. But when entering at night ship must anchor and await orders.

MAX. SIZE: Joos Soedarso Pier: length 187 m., breadth 35 m., draft 12 m. Wainitu Pier: length 100 m., breadth 20 m., draft 8 m.

HEALTH: Port Health officer boards vessel together with Pilot.

RADIO: Ambon Coast Radio, call sign PKE. Operating 24 hours. Frequencies 500–470 kc/s., 8472 and 8799 kc/s. VHF all Channels used.

TUGS: Normally tugs do not join vessel but when necessary to use tugs call PT "Dock Waijame".

STEVEDORES: Agent arranges. 3 stevedore companies: PT. "Gotong Rojong", PT. "Mastra" and PN. "Varuna Tirta Prakarsa".

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: Berth at Wainitu Pier. Type of pipe, 6 in. and 8 in. Discharging capacity, 125 t.p.h.

FRESH WATER: Available only at Joos Soedarso Pier. Loaded by pipe-line with 25 tons/hour capacity.

FUEL: Only diesel and marine fuel.

DEVELOPMENTS: Plans for future developments dependent on Government expenditure.

GANGWAY/DECK WATCHMEN: Deck watchmen needed, particularly for tankers.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Cannot be held out of bond.

IDENTIFICATION CARDS: Needed by Immigration (landing permit).

CONSULS: No consuls available locally.

REPAIRS: Deck and engine repairs available. Floating dock, lifting capacity for 2,000 d.w.t.

REPATRIATION: Possible. Dealt with by Immigration through Jakarta.

AIRPORT: Distance from airport about 7 miles. Regular airline "Garuda Indonesian Airways" (GIA). 4 flights per week from Ambon to Jakarta.

TIME: Local time GMT plus 10 hours.

HOLIDAYS: Port open for 24 hours even in holidays.

POLICE/AMBULANCE/FIRE: Police and Port Health at Port. But when necessary to use fire brigade call by connecting to "Burgomaster".

SHORE LEAVE: All crew members allowed ashore with permission of Immigration.

AUTHORITY: Ambon Port Administration.

ARDJUNA: 05.54 S. 107.57 E. (See Plan Book)

LOCATION: Ardjuna Marine Terminal is an open, unsheltered mooring in the Java Sea, about 18.5 miles from the nearest point on the North Coast of Java.

The Terminal is approximately North 72° East distant 59 nautical miles from Jakarta.

There are 4 standard type single buoy moorings and one rigid arm single buoy mooring situated as follows:

1. A chartered crude oil Storage Tanker SBM (Buoy No. 1)
   Latitude 5° 54′ 15″ South.
   Longitude 107° 44′ 22″ East.
2. Butane SBM for Butane Export Tankers (Buoy No. 2)
   Latitude 5° 53′ 19″ South.
   Longitude 107° 45′ 18″ East.
3. Crude oil Storage Barge "Arco Ardjuna" SBM (Buoy No. 3)
   Latitude 5° 54′ 11″ South.
   Longitude 107° 43′ 45″ East.
4. Export SBM for loading from "Arco Ardjuna" (Buoy No. 4)
   Latitude 5° 53′ 29″ South.
   Longitude 107° 43′ 20″ East.
5. Liquefied Natural Gas Storage Barge "Ardjuna Sakti" rigid-arm type SBM. (Buoy No. 5).
   Latitude 5° 53′ 10″ South
   Longitude 107° 44′ 13″ East.

THE FOLLOWING ITEMS ARE OF PARTICULAR IMPORTANCE:

1. No dirty ballast.
   Tankers with dirty ballast will be rejected and will have to tender a new Notice of Readiness upon second arrival.
2. No shore leave.
3. No crew changes.
   If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.
4. No stores available.
5. No clinic is available.
6. The laws of Indonesia govern this Terminal and all personnel are urged to abide by them.
7. During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.
8. Ardjuna time is GMT plus 7 hours throughout the year.
9. No bunkers are available.
10. Pertamina Directorate of Shipping and Telecommunications Jakarta, handles all Agency matters for tankers.
11. The Unit of Currency is the Indonesian Rupiah.
    The rate of exchange varies from time to time. The Master can obtain the current exchange rate from the Agent.
12. There are no Consulates available at Ardjuna Marine Terminal. However, there are many Embassies and Consulates represented in Jakarta 59 nautical miles S.W. of the Terminal.
13. Language of the port is English and Indonesian.
14. Only authorised personnel or visitors are permitted on the Storage Barges and/or Export Tanker.
15. No fresh water is available.
16. No slop tanks are available.
17. The Crude Oil testing laboratory is equipped to perform the following tests:
    API Gravity, B.S. & W. and Pour Point.
    Any additional tests that may be required will be performed in Jakarta.
18. For convenience, mail for personnel on incoming tankers may be sent to the Jakarta Office of the Company for delivery to the tanker when it arrives at Ardjuna Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

DOCUMENTS: The Harbour Master submits a Harbour Report Form for the Master to complete.

The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Life Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate; Derating Certificate or Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and light dues receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian port clearance for Panamanian flag vessels is not required at Ardjuna.

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, and arrival clearance will be marked on the Crew List.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Ardjuna Marine Terminal. When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only and is not authorized to accept such letters.

Departure Procedure:

Prior to the vessel's departure, the Immigration Official requires 6 copies of the Crew List to be marked for *"Departure Immigration Clearance"*, and duly signed, it will be distributed as follows:

Master of the vessel	1 copy
Harbour Master	1 copy
Customs	1 copy
Pertamina Agent	1 copy
Immigration	2 copies
Total	6 copies

The Customs Official on duty will issue the Customs 5-B Form which serves as Customs Departure Clearance.

Upon presentation of the Crew List which is signed and marked for Departure Immigration Clearance and Customs Clearance, the Harbour Master will issue the *Port Clearance.*

Final Clearance formalities will be carried out aboard the tanker, either at the Export SBM or alongside the storage barge "Ardjuna Sakti" or in the Anchorage Area, as circumstances dictate.

Before leaving the Terminal Area, the Master should advise the Terminal, the vessel's ETA at destination through the Mooring Master.

PILOTAGE: Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the Terminal using the International Marine Calling & Safety Channel 16, Freq. 156.800 mHz for Terminal instructions.

The Mooring Master will act on behalf of the company to sign acknowledgement of tankers' Notice of Readiness. Such notice wi not be accepted for a time earlier than:

(a) the Master has received the Mooring Master onboard or

(b) the tanker shall have dropped anchor within th recommended anchorage area, and has advised th Terminal the time of anchoring.

Exception to (a) and (b) will be if the tanker is within th anchorage area awaiting arrival of the Mooring Master and ha been requested by the Terminal not to anchor.

In this case N.O.R. will be accepted from the time the Termina requested the ship not to anchor.

The company reserves the right to decline to berth a specifi tanker if its condition or facilities are unsafe for berthing or loading even though the berth may be open to other tankers.

The decision of the Atlantic Richfield Indonesia Termina Superintendent or his designated alternate to berth or not to bert a vessel shall be final.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area Northward from the Single Buo Moorings enclosed by a line drawn through the following positions

"A" Latitude 5° 51′ 35″ S. Longitude 107° 43′ 30″ E.
"B" Latitude 5° 50′ 05″ S. Longitude 107° 43′ 30″ E.
"C" Latitude 5° 50′ 05″ S. Longitude 107° 45′ 30″ E.
"D" Latitude 5° 51′ 35″ S. Longitude 107° 45′ 30″ E.

Prior to their arrival Masters of tankers should contact the Terminal for instructions concerning anchorage positions.

Under no circumstances should the export tanker enter the Restricted Area around the structures without a Mooring Maste aboard.

The attention of Masters is drawn to the existence of underwate pipe-lines in the Restricted Area.

NAVIGATION AIDS:

Approaches: Approach information can be obtained by radio from the terminal. Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

In addition to the single buoy mooring points for export tankers and the storage barges, various oil wells and production structures are located in the immediate vicinity and the areas extending East South and Westerly from the storage barges which constitute a hazard to navigation for mariners.

SBMs, storage barges and structures within Ardjuna Marine Terminal area display the following visual characteristics:

Export Single Buoy Moorings (Buoy No. 2 and No. 4): A white light flashing every second, visibility 5 miles, mounted on the rotating deck of each SBM. Buoy No. 4 is fitted with a rada reflector.

Storage Barges "Arco Ardjuna" and "Ardjuna Sakti": By day, the black ball as required by the Regulations for Preventing Collisions at sea. The 2 storage barges at night display the lights for tankers a anchor as required by the Regulations for Preventing Collisions a sea and are equipped with automatic fog signals at the bow and a the stern.

Each barge has a bell forward as required by the Collisior Regulations and gong aft, under the same rules. When visibility is restricted the Fog Signals are continuously sounded. The SBM tc which the "Arco Ardjuna" is moored, is fitted with a radar reflecto and a white light flashing every second visibility 5 miles. The charted SBM (SBM No. 1) shows a white light flashing every seconc visibility 5 miles.

The SBM to which "Ardjuna Sakti" is moored, shows a white ligh flashing alternately for a 3-second period and a 1-second perioc every 12 seconds, visibility 5 miles.

Crude Oil Production Platforms and Natural Gas Liquids Processing Facilities: There are 5 crude oil production platforms 16 well platforms, 1 junction platform, 1 natural gas processing facility platform and 1 quarters platform for the natural gas facility within the Ardjuna Marine Terminal area.

"B" (Bravo) flow station, situated approximately 0.5 of a mile South of the "Arco Ardjuna" Barge. Indicated as BB.

"E" (Echo) Flow Station, situated 12 nautical miles Eastward o Bravo. Indicated as platform EA.

"K" (Kilo) Flow Station, located 8 nautical miles S.S.W. of Bravo Indicated as platform KA.

"L" (Lima) Flow Station, situated 15 nautical miles West of Bravo Indicated as platform LA.

"U" (Uniform) Flow Station, located 13 nautical miles S.S.E. o Bravo. Indicated as platform UB.

"LNG" The natural gas facility and quarters platforms are joined by a bridge. Their position is:

Lat. 5° 54′ 36″ S., Long. 107° 44′ 01″ E.

In addition to the above specified obstructions and navigationa aids, all platforms display interrupted quick flashing white lights The storage barges, flow stations, LNG facility and quarters platforms will brightly illuminate the areas around them at nigh through the use of lights for normal working purposes.

MAX. SIZE: SBM No. 2 up to 100,000 d.w.t. (For Butane Liquids SBM No. 4 up to 200,000 d.w.t. Depth of water, approximately 132 ft below mean sea level.

RADIO: *Advice of arrival by cable or telex:* It is important tha incoming tankers advise Ardjuna Marine Terminal 72 hours before estimated time of arrival, giving the best estimate of ship's arrival a the Terminal, via:

Cable address: ARDJAK, Jakarta
Telex number: 011-44379, Jakarta.

Time to be used for ETA is "GOLF" Time Zone of GMT plus 7 hours throughout the year.

The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time. (Note: If a separate/permanent ballast system is fitted on board, ability of ship to load crude oil and discharge ballast simultaneously must be stated.)
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8 If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation or smallpox vaccination required. If so, number required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Ardjuna Marine Terminal via above cable address and Telex Number when the tanker is 24 hours and 12 hours distant from the Terminal and any other time, if any appreciable change occurs in the original ETA or those subsequent thereto.

RADIO COMMUNICATIONS:

(1) VHF/FM Radio Telephone: (International Marine Calling & Safety Channel 16, Freq. 156.800 mHz).

Masters are recommended to use this system when they arrive within radio range of the Ardjuna Marine Terminal, particularly when approaching the port. If poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the means of avoiding delay in berthing.

During berthing the ship's radio will be under the sole control of the Master, and the storage barge radios will be under the sole control of the Terminal Marine Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain constant listening watch on VHF Channel 16 to receive Terminal instructions.

Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

The Ardjuna Marine Terminal is equipped with VHF/FM Radio Telephone Sets and continuous watch is maintained on Channel 16 (Freq. 156.800 mHz) and Frequency 157.725 mHz.

Tankers approaching the Terminal should make initial contact on Channel 16. For subsequent inter-ship communications within the Terminal a "Walkie Talkie" Radio Freq. 157.725 mHz will be used by the Mooring Master.

This frequency will not be used for general purpose, unless clearance is obtained by the Terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the Terminal of the radio failures. Upon hearing this signal from a loading tanker the storage barges will immediately stop loading to the Export Tanker until communications have again been established.

(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is inter-connected to the Ardjuna Marine Terminal via local communications system and maintain a continuous watch on HF Frequency 7320 kHz (Upper Side Band A3J Mode, 100 Watts, Vertical Whip Antenna, Call Sign 8GJ9).

(3) *Pertamina Control Radio Stations — HF/SSB:* In the event incoming tankers are not able to contact the Ardjuna Marine Terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, Call Sign PKI 2 may be contacted on HF/SSB per following frequencies and during the following service hours:

Frequency/kHz	*Hours/GMT*			*Keep Watch/kHz*
452	0000–2400			500
8626	0200–0400, 1000–1200,	0500–0600, 1400–1500,	0700–0800, 1700–2000,	8363.2–8364.8

VHF CH. 9/16/19	0000–2400			CH. 16

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta by telephone numbers:
584214, 584121, 584122, 584123, 584124, 584125, 584126, 584359, 584360 by Pertamina Internal Telex System number 18 which is the designated number of Atlantic Richfield Indonesia Inc., Jakarta.

HEALTH: In accordance with practice in Indonesian ports, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Ardjuna. These signals shall be displayed continuously until clearance is granted. The signals are as follows: Sunrise to sunset: quarantine flag "Q". Sunset to sunrise: signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Harbour Master officials will board the vessel after arrival to grant clearance.

Each tanker entering the port of Ardjuna must have requested and been granted Flag Dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance.

If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each Crew member should be in possession of an International Vaccination Card.

After the tanker is all secured, the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo onboard the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Ardjuna is granted.

TUGS: 1 tug to assist berthing and unberthing. A mooring launch will be available to pass line to the storage tanker on berthing.

The following mooring Launches will be available for running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker.

Name and description	*Length*	*Rated HP*
(1) *Arco Ardjuna III*	40 ft.	260
(2) *Arco Ardjuna IV*	40 ft.	260

TERMINAL FACILITIES: For Crude Oil Tankers:

Export SBM No. 4 is designed, during reasonable weather conditions, to handle tankers up to 200,000 d.w.t., and is equipped with dual 160 ft./15 in. circumference floating braidline mooring ropes with 22 ft. long anti-chafe chains fitted, so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy. The other export SBM No. 2 is designed to handle tankers up to 100,000 d.w.t., weather permitting, and is equipped with dual 150 ft./12 in. circumference floating braidline mooring ropes together with anti-chafe chains, length 22 ft. Presently this buoy is prepared to service tankers loading butane.

The crude oil loading hoses are connected to the ship's manifold on the port side of the Export Tanker. Tankers arriving are requested to have the derrick on the port side raised and rigged, ready to lift aboard the Terminal equipment.

Crude oil tankers are loaded through 2 strings of 16 in. I.D. floating hoses extending from the Export SBM No. 4, connected to the tanker's manifold at the ends by means of the rail hoses of 12 in. I.D. All crude oil tankers not having 12 in. hose connection should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On SBM No. 4 the length of the hose strings is 795 ft.

For crude oil tankers intending to load in the Ardjuna Marine Terminal, the distance from the bow to the loading manifold should not exceed 450 ft.

The minimum loading rate at the Ardjuna Marine Terminal for crude oil tankers is 15,000 bbls per hour. Any tanker arriving unable to receive crude oil at the above rate may be rejected. Tankers loading crude oil on the SBM No. 4 can accomplish a maximum loading rate of approximately 35,000 bbls per hour.

In order to save time as well as to make the berth available for others, it is requested that ships receive crude oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons, it is advisable to have the ship half loaded as quickly as possible. Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of crude oil flow is almost immediate.

Storage Barge "Arco Ardjuna": The company marine administrative offices, storage and laboratory for testing crude oil stock are located on board a 137,673 tons d.w.t. Storage barge of Liberian Registry designated "Arco Ardjuna".

Overall length of the barge is 467 ft. and 10 in. Total crude oil capacity is 1,022,000 gross barrels, for the Arco Ardjuna plus approximately 1,000,000 gross barrels for the chartered crude oil storage tanker.

Loading of crude oil from the storage barge to the tankers will be through A.O. Smith Positive Displacement Meters, of which there are four, each having a maximum capacity of 12,500 bbls per hour. "Arco Ardjuna" barge is moored on the SBM No. 3, Lat. 5° 54′ 10.6″ South and Long. 107° 43′ 45″ East.

Chartered Crude Oil Storage Tanker: The storage tanker is located at mooring SBM No. 1, the position of which is Lat. 5° 54′ 15″ South and Long. 107° 44′ 22″ East.

Ardjuna crude oil of approximately 39.0° API at 60°F. is available from the above storage tanker, by transfer through the Arco Ardjuna metering system.

For LPG Refrigerated Vessels:
Storage Barge "Ardjuna Sakti":

1. The LPG storage facility is a prestressed concrete barge, measuring 461 ft. in length, 136 ft. in width and having a depth of 56.4 ft.
   The barge carries 12 tanks each of which has a capacity of 31,528 barrels giving a total of 378,336 barrels.
   A pumping rate of 20,000 bbls (1,600 metric tons) per hour can be achieved. The following operating rules have been adopted which shall apply to the lifting of products from the "Ardjuna Sakti".
2. Refrigerated LPG vessels *will not be considered ready for loading* at Ardjuna Marine Terminal *unless and until all LPG tanks contain LPG vapours and are cooled down sufficiently* to permit loading of products nominated.
3. Vessels receiving fully refrigerated products will only be acceptable for loading provided they are capable of receiving the products at their boiling points at 0.5-2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 20,000 bbls per hour, and including those vapours formed as a result of heat gained by the vessel's tanks.
4. The "Ardjuna Sakti" is equipped with a vapour compressor and condensing facilities for liquefying vapours, however, no liability of any kind whatsoever, to provide the compressor and or condensing facilities for vessels use is accepted.
5. Provided a vessel has the capabilities described in paragraph (3), at the sole discretion of the Terminal Superintendent or his designated representative, in the event the vessel has difficulties with her refrigeration system, the facilities available on the "Ardjuna Sakti" may be made available to assist the vessel, provided they are operational. There is *no obligation* implied or accepted to continue to assist the vessel with chill down, even if assistance is commenced. In the event that assistance is requested and is provided all charges and expenses incurred shall be paid for by the consignee. Such charges shall include any amount payable in demurrage for all the time that chill down operations causes the vessel to exceed the allowed laytime. The conditions set out in this paragraph (5) for assisting in chill down operations shall apply to purging operations.
6. Ardjuna Marine Terminal has no facilities for inerting arriving LPG tankers. It is imperative that arriving vessels do not arrive with tanks designated to receive product "in air". Vessels arriving to load LPG will not be accepted for loading product if the oxygen in the tanks exceeds 8.0 mole per cent.
7. Loading lines and vapour return lines at the Ardjuna Marine Terminal are fitted with quick release Camlock flanges which are 12 in. ASA 150. Arriving vessels must be able to connect to these flanges. The terminal will have a limited number of spool pieces and reducers available but will accept no obligation or liability to provide them. It is the vessel's responsibility to provide a connection suitable to connect with the Camlock flanges described above. Failure of the loading vessel to present the required 12 in. ASA 150 flange for connection will result in rejection of the vessel for loading and cancellation of her Notice of Readiness. All costs, charges and expenses incurred due to rejection will be for vessel's account.

Should it be necessary to assist a ship with the use of the terminal ship vapour compressor a charge of US$250 will be made for each hour or part of an hour that the terminal ship vapour pressure is used by the ship.

MOORING/LOADING/UNMOORING: The Ardjuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances at the sole discretion of the Company Terminal Superintendent night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour.

Tankers to be moored or manoeuvred at the Ardjuna Marine Terminal will be boarded by the Company Mooring Master within the anchorage area.

Under normal weather conditions if a tanker is scheduled to berth on arrival, the Mooring Master will board such vessel in the close vicinity of the mooring area.

All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the tanker being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of his vessel.

The ship's Master, or one of his *designated and qualified deck officers, must* be on the navigating bridge at all times while the vessel is being manoeuvred.

The Mooring Master will report unsatisfactory conditions to the company Terminal Superintendent who may in turn, reject the tanker until corrections are fully made. All costs accruing therefrom will be for the vessel's account. The services of the Mooring Master are provided upon the express understanding and conditions that when any Mooring Master provided goes on board a vessel for the purpose of assisting such vessel, he becomes for such purpose the servant of the owners of the vessel and the company shall not be liable for any damage, or injury resulting from any advice, or assistance, or actions directed, or made, by such Mooring Master while on, or in the vicinity of the assisted vessel.

The tanker's cargo tanks are to be inspected by the Mooring

Master, and if suitable for loading crude oil, a signed notation to this effect will be made on the company Dry Certificate.

The Company Terminal Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Ardjuna Marine Terminal. All these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Ardjuna Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

Request for the terminal to stop the flow of oil at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master, that the company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage barge. The ship's Master will also be held responsible for any oil spills caused by this request.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area.

Unauthorised radio communications will be cause for cessation of all operations, except clearing of the berth, and the vessel's Notice of Readiness will be immediately nullified.

The Master of each tanker will be given a copy of the Conditions of Use of Port of Ardjuna Marine Terminal which he will be required to sign before the vessel proceeds to berth.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the products being handled, weather conditions and any other circumstances requiring special care or caution.

Ships are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch.

A combination of pilot ladder and ship's accommodation ladder, so arranged that the personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large tankers. A light line should be ready to take aboard the Mooring Master's equipment.

Tankers will provide a broad lee for the Mooring Master both when boarding and leaving the ship. Adequate explosion proof lighting at night must be provided near the pilot ladder, and manifold connection area. During loading overside lighting must be provided in the vicinity of sea valves and floating hoses.

During a crude oil tanker's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern on each quarter of the vessel. These wires shall be secured on the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted.

It is absolutely essential that extremely careful supervision be exercised by officers of all tankers while loading operations are in progress. A responsible ship's officer is required to be on duty continuously while the tanker is being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended on crude oil tankers. The Mooring Master at any time, may direct an additional ship's line to be secured to the buoy and this line to be hove up or slackened off under the supervision of a responsible ship's officer so as to prevent the vessel overriding the buoy. *At all times sufficient crew must be available* to carry out under the supervision of a responsible officer, instructions given by the Mooring Master.

Masters of crude oil tankers are advised that raising, lowering, connecting and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed *by the ship's crew directed by a responsible officer* as required by the Mooring Master. Loading of crude oil tankers is through 2×12 in. I.D. hoses with 150 ASA flange rating. The weight of each hose is approximately 2.5 tons. All tankers loading crude oil at Ardjuna Marine Terminal must be able to connect their manifolds to the 12 in. hoses. Masters are strongly reminded, it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 12 in.

Preparations for mooring will be advised by the terminal through VHF communication prior to tanker's arrival or by the Mooring Master before the mooring operation commences.

Crude oil tankers are required to have ready:

1. On the portside: a derrick of at least 5 tons safe working load, rigged, and ready to pick up the mooring and hose connecting gear from the Mooring Master's launch.

   This derrick subsequently will be used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.
2. On the forecastle: at least 6 good ship's mooring lines shall be required. Two of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM.

   The 4 remaining ship's lines will be laid out 2 and 2 on either side of the foc'sle deck, eyes about 3.5 m. distant from the fairleads as advised by the Mooring Master. When the terminal mooring lines have been hove up and anti-chafe chains have been hove about halfway inboard through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain, so arranged that in the final position of mooring, the tanker is tied to the SBM using the terminal mooring lines/chains and made fast to the ship's bollards by means of the ship's own lines. This will be backed up by 2 lengths of wire strops each 30 ft. in length and 2 in. diameter.

   These wires will be provided by the terminal to be used as preventer wires. These 2 wire strops will not be used as the permanent mooring system.

Their purpose is to hold the ship safely moored in the event one or more of the ships lines part until the crew can replace such lines.

Refrigerated LPG tankers will berth alongside the starboard side of the LPG storage barge "Ardjuna Sakti". The "Ardjuna Sakti" is secured to a rigid arm single buoy mooring system which allows the storage barge to rotate according to direction of wind and tide. There are 4 large Yokohama type rubber fenders aboard the storage barge which are supported on davits. The fenders are lowered to the water prior to the berthing operation. Each fender is 6.5 m. in length the diameter of the fenders is 3.3 m. Line running launches are available to pass the mooring lines between the barge and the ship.

When secured in position the moorings will be as follows:

5 lines on the forecastle.
4 lines on the poop.
2 springs on the maindeck forward leading aft.
2 springs on the maindeck aft leading forward.

Each LPG tanker loading at Ardjuna Marine Terminal will be required to provide the above ropes. Where tension winches are available they will only be used if they can be locked in a fixed position.

EQUIPMENT: A ship may be rejected if, upon inspection, it is not properly equipped, or if it is not suitably manned, or tanks unsuitable for the cargo, or if in the case of crude oil tankers the ballast is dirty.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in a sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships or partly inoperative ships will be rejected. Should a ship become inoperative or partly inoperative while berthed alongside the storage barge "Ardjuna Sakti" or while secured to a crude oil export single buoy mooring, it will be removed at the ship's expense.

No repairs to main engines or other essential equipment or machinery while alongside the storage barge "Ardjuna Sakti" or while secured to an export SBM may be carried out, unless with the permission of the Terminal Superintendent or his designated alternate.

Crude oil tankers must lift the export hoses from the water to connect with the ship's manifold by means of its *own derricks and using its own crew*.

A vessel must have both bow anchors in good working condition. Both bow anchors and anchor cable must be of a size and standard to meet either "Lloyds" or "A.B.S." requirements, even though they may in fact, be classified by other societies.

All vessels must have ready on deck suitable stoppers for manila, synthetic lines and wires used for mooring purposes.

All vessels must have suitable winches or capstans in good working order.

Such winches or capstans must have sufficient power to heave the ship to the position required by the Terminal Mooring Master. Crude oil tankers must have the capacity to heave on the 12 in. and 15 in. braid lines used to secure them to the export SBMs. Power supply to all deck machinery must be maintained throughout the period the ship is secured alongside the storage barge "Ardjuna Sakti" or to the export SBM. Failure to comply with this requirement will result in cessation of loading and delay, and expense so caused will be for the ship's account.

To assist in vessel's turn around, ships should have all necessary gear ready on arrival. Crude oil tankers must have the cargo boom on the port side raised with the cargo gear rigged and ready before the ship is boarded by the Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

Masters of crude oil tankers are reminded that the hose connecting operation will normally be carried out while the ship is deballasting.

The cargo derrick required to raise the hose from the water, must have a sufficient length of strong lifting wire rope on the winch drum to enable the cargo hook to reach the water and still have adequate turns of wire left on the drum to ensure safety.

BALLAST: Owners and Masters are responsible to observe International Convention Laws and Indonesia Government Regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

No facilities are available for disposal of dirty ballast. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

As soon as practical after arrival, all tankers will be inspected by an Ardjuna Marine Terminal Official for dirty ballast. During discharge of ballast, similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection, or during progress of loading, it is revealed that the ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading unless satisfactory evidence of repair duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors is submitted. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, sawdust, dispersant etc. should be used at all times especially when disconnecting hoses in order to avoid any spillage of oil overboard.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his Notice of Readiness and will lose any priority of position for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum safe ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the company Terminal Superintendent or his alternate.

Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on shipboard and treating these washings with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of lifting companies, the terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea.

Masters are required to certify in writing the quantity of slops remaining on board (if any). If they intend to load crude oil on top of the slops, it must be clearly stated. The Mooring Master will confirm the amount stated in writing by ullaging and calculating the slops to ensure the amount declared is correct.

Provided agreement is reached on the amount of slops the Mooring Master will confirm the amount of slops on the Dry Certificate.

Note: Separate "Slop Certificate" signed by Chief Officer and witnessed by the Mooring Master is required to substantiate calculation.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately and not be resumed until the oil is cleaned up and removed from the decks of the vessel and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Ardjuna Cargo Supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer – in charge of loading.

All spillages of oil must be reported immediately to the Ardjuna Terminal Superintendent, or his alternate, and subsequently a detailed report in writing submitted by the Master of the vessel concerned giving all relevant details.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

MEDICAL: No clinic is available.

CONSULS: There are no consulates available at Ardjuna Terminal. However, there are many embassies and consulates represented in Jakarta about 59 miles S.W. of the Terminal.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs' seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars.

Special allowances are made for the Master under special circumstances.

REPATRIATION: No crew changes. If emergency conditions prevail, for humanitarian reasons exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: Ardjuna time is GMT plus 7 hours throughout the year.

SHORE LEAVE: Not allowed.

SAFETY/FIRE REGULATIONS: Safety and Fire Regulations will be strictly adhered to.

The notice "Instructions In Case Of Fire", and the notice "Safety And Fire Regulations" must be posted in prominent positions on board the export tanker by the Master, or by his designated alternate.

The Safety Check List must be jointly completed by a ship's officer designated by the Master, together with the Terminal Marine Supervisor/Mooring Master. After completing and signing the Check List both the ship's officer and Marine Supervisor/Mooring Master will retain copies.

Terminal Safety and Fire Inspections: It is the duty of the Mooring Master to make periodical inspections on board vessels in respect of any breach of the Terminal Safety and Fire Regulations.

For this purpose he must be allowed free access to all parts of the vessel at all times and must be accompanied by a responsible ship's officer to assist him in carrying out such inspections. The Mooring Master will advise the ship's Master when he wishes to make a safety inspection. It is the responsibility of the ship's Master to ensure that the Mooring Master is given every assistance to carry out this duty.

AGENCY:

General Agent: Pertamina Directorate of Shipping and Telecommunication, 32–34, Jalan Yos Sudarso, PO Box 327, Jakarta – Indonesia. Cable Address: Pertaminaship Jakarta. Telephone: 690312 – 690322 (11 lines), extensions 225–315. Telex number: 42885.

Procedure for appointing Agent: Owners should telex or cable appointment of Pertaminaship as General Agent to attend the vessel at Ardjuna Marine Terminal and telex/cable should be sent 1 week prior to vessel's arrival.

The following information should also be given in the telex or cable to enable the General Agent to obtain Flag Dispensation for the vessel:

1. Name of vessel
2. Flag
3. Port of Registry
4. Certificate of Registration Number
5. Name of Master
6. Number of Crew
7. Last Port of Call
8. ETA Ardjuna Marine Terminal
9. Indonesian Ports of Call

Advance Payment: The tanker Owner or Charterer must comply with the Procedure for appointing Agent as mentioned above.

Pertamina Directorate of Shipping and Telecommunication will acknowledge receipt of cable appointment, and will request an advance deposit of US$4,000 to US$10,000 – depending on the size of vessel, to cover the above Port Charges.

Advance payment for government charges should be made payable to:

"Pertamina Agency"
Account No. 11.51.006.000.005
Bank Negara Indonesia
Cabang Gambir
Jalan Kebon Sirih 77A
Jakarta, Indonesia.

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate of Shipping & Telecommunications" advising Telegram Transfer (T.T.) Number, the name of vessel and the port(s) of call. Telex number: 42885.

In those instances where payment exceeds the actual port charges, the balance will be credited to the Owners/Charters account or remitted by the Agent.

Neither the Agent nor Atlantic Richfield Indonesia, Inc., will be responsible for demurrage or other charges resulting from failure to prearrange obligations in this manner.

OPERATOR: Atlantic Richfield Indonesia Inc.

Principal Offices:

Pertamina Head Office: Jalan Medan Merdeka Timur No. 1, Jakarta, Indonesia.

Atlantic Richfield Indonesia Inc.: Gedung Veteran R.I., Jalan Jenderal Soedirman, PO Box 63/JKT, Jakarta, Indonesia.

Atlantic Richfield Company: International Division, Arco Plaza, 515 South Flower Street, Los Angeles, California 90071.

Carver – Dodge Oil Company: Division of Reading & Bates, Offshore Drilling Company, 3800, First Place, Tulsa, Oklahoma 74103.

Independent Indonesian American Petroleum Company: Division of Natomas International Corporation, Jalan Letjen. M.T. Haryono 58, PO Box 2759 Jakarta, Indonesia.

Independent Indonesian American Petroleum Company: Division of Natomas International Corporation, 5251 Westheimer, Suite 700, Houston, Texas 77056, U.S.A.

Tidewater N.W. Java, Inc.: 1440 Canal Street, Suite 2100, New Orleans, La. 70112, U.S.A.

Warrior Minyak Inc.: 1776 Lincoln St., Suite 80, Denver, Colorado 80203, U.S.A.

Nominations: Tanker nominations for liftings of either Ardjuna crude oil or liquefied natural gas are co-ordinated through Atlantic Richfield Company, Los Angeles, California and Atlantic Richfield Indonesia Inc., Jakarta.

All crude oil and liquefied natural gas sales, also tanker chartering are arranged by the following parties in each of their respective locations. Pertamina, Atlantic Richfield Company, Carver Dodge Oil Company, Independent Indonesian American Petroleum Company, Natomas Company, Tide Water N.W. Java Inc. and Warrior Minyak Inc.

Tanker scheduling is co-ordinated for all of the partners through Atlantic Richfield Company, Los Angeles, California and arranged through Atlantic Richfield Indonesia Inc., Jakarta.

BALIKPAPAN: 01.13 S. 117.00 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Loading Line Certificate.
Safety Certificate (passengers ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 Crew Lists and Passenger's Lists.
Ship's Articles.
2 Stores Lists.

PILOTAGE: Compulsory pilotage. Application for Pilots can be made via Radio Station or the Signal Station on Tokong Hill. Vessels arriving by night should anchor off the outer buoy and give their call sign to the Signal Station. Pilot boards in position 1° 19′ 30″ S. 116° 54′ 30″ E. Vessels leaving should order a Pilot at least 6 hours prior to departure and when leaving between 0600–1200 hrs. application should be made before 2000 hrs. the preceding day. If vessel's draft exceeds 70 dm. same should be mentioned in the pilot's cable application.

APPROACH: The surrounding land is in general low with few conspicuous hill rows as background. Only the high spit on which Balikpapan is built can be used as a landmark with the regular cone-shaped hill Tokong.

RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only.

MAX. SIZE: Tankers: Shell normally permit max. LOA of 750 ft. Drafts are restricted by the bar where the depth below chart datum is 25 ft. 3 in. Minimum keel clearance required is 1 ft. 3 in. Sailing drafts depending on rise of tide up to a max. of 33 ft. salt water.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

TUGS: One small tug is available.

BERTHING: Dry-cargo jetty 1: berth length: 240 m. with depths alongside 75 dm. at LWS. Combination dry cargo and oil: berth length: 300m. depth 75 dm. at LWS.

TANKERS: Jetties 3, 4, 5, 6, 7 and 8 are oil berths. When alongside vessels should keep 2 wires ready over the water-side so that vessels can be towed away in case of emergency.

STEVEDORES: Working hours: 0700–2000 Monday–Friday. 0700–1500 Saturdays. 0700–1500 overtime if required.

FRESH WATER: Available in limited quantity.

FUEL: Available at the berth 200 t.p.h. Coal not available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore-pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50. – (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents with the local prevailing Customs with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AUTHORITY: Department of Sea Communications.

BANYUWANGI: 08.13 S. 114.23 E.

OLD PORT NOW PRACTICALLY CLOSED FOR SHIPS.
(OPENED FOR BOATS AND FISHING BOATS ONLY).

DOCUMENTS: Customs and Harbour Master requires:

Crew List.
Passenger List.
Customs Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Derat. Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.

PILOTAGE: Not necessary because anchorage open.

ANCHORAGE: Position: Lat. 8° 12′ S. Long. 114° 23′ 16″ E. Depth 25–30 m.

MAX. SIZE: No restrictions, vessels must be anchored outside harbour.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: None, moved to Meneng Port.

TUGS: 2 tug boats belong to P.T. Jakarta Lloyd Banyuwangi Branch.

BERTHING: Distance 500 to 750 m. from lighthouse. Anchorage berths only.

STEVEDORES: 6 gangs available. P.T. Jakarta Lloyd Banyuwangi Branch. 1 gang consists of 13 labourers, 1 gang boss, 1 tallyman, 2 winch drivers, 1 commander.

MEDICAL: Arranged by Department of Health.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: None available from shore.

OPENING/CLOSING HATCHES: Arranged by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wine and/or spirits: Enough for own use, if more required must pay import duties.

CARGO GEAR: Ship's gear used. Cargo loading on board by lighter.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: No facilities.

REPATRIATION: Not possible.

TIME: GMT plus 7 hours.

HOLIDAYS: On Sundays and holidays no work available, but if necessary, work can be arranged. No work when raining.

POLICE/FIRE/AMBULANCE: Police and ambulance available. Fire brigades belong to District and Paper Mill. Phone Nos. 352, 653, 353 and 503.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed.

DELAYS: Possible. During loading if it rains.

AUTHORITY: Kepala Pelabuhan (Port Administration).

BANYUWANGI (Port Meneng): 08.07 S. 114.23 E.

NEW PORT FOR LARGE VESSELS.

DOCUMENTS: Customs and Harbour Master require:

Crew List.
Passenger List.
Custom Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Deratisation Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.

PILOTAGE: Compulsory pilotage for vessels over 5,000 gross tons. Pilots must be ordered by respective Agent at least 48 hours in advance of the time their service is required.

MAX. SIZE: Draft alongside quay max. 40 ft. Present quay permits max. LOA of 500 ft. Bar 200 m. East of quay, depth below chart datum is 24 ft.

RESTRICTION: Mooring and unmooring is restricted to daylight hours only.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: Name: Department of Sea Communication. Call sign: 8 AD 22 with freq. 8110 kc/s., receiver SSB 5316 kc/s. Shore radio station only used for district contact (used by Department of Sea Communication).

VHF: Call sign: Meneng Radio, freq. Channel 16, 14, 13, 12, used shore to ship and can be contacted about 25 miles before arriving at Meneng Port.

TUGS: 2 small tugboats are available. Both of 80 h.p., owned by P. T. Jakarta Lloyd.

BERTHING: Present berth length 110 m., to be lengthened to 200 m. in 1977/78. Depth alongside 40 ft.

STEVEDORES: 12 gangs available P. T. Jakarta Lloyd, Banyuwangi Branch and P. T. Pelni Banyuwangi Sub. Branch.

One gang consists of 1 gang boss, 2 winch drivers, 1 Pilot and 13 labourers.

GODOWN: One transit godown 20×50 sq. m. owned by Port Administrator and one transit godown 20×50 sq. m. is being built.

Two 2nd line godowns capacity 10,000 tons owned by P. T. Jakarta Lloyd Banyuwangi Branch. Open storage 10,000 sq. m., 6 godown 2nd line owned by National Logistic Board capacity +20,000 ton specially for rice.

Equipment: One forklift capacity 2.5 tons owned by Port Administrator. Five lorries at 1 ton owned by P T. Jakarta Lloyd. Crane 15 tons can be supplied if necessary.

MEDICAL: Arranged by Department of Health.

FRESH WATER: Available. Handled by Harbour Board, with a loading capacity of about 300 tons per day.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wines and/or spirits enough for own use. If more required must pay import duties.
CARGO GEAR: Ship's gear used.
IDENTIFICATION CARDS: Required.
CONSULS: No local representation.
REPAIRS: No facilities.
REPATRIATION: Not possible.
TIME: GMT plus 7 hours.
HOLIDAYS: On Sunday and holidays no workers available, but if necessary work can be arranged, except Independence Day (17th August) and 1st Sjawal (Idhul Fitri/Moslem Holiday).
POLICE/FIRE/AMBULANCE: Police and Ambulance available. Fire Brigade owned by District and Paper Mills, telephone Nos. 352, 653, 353 and 503..
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed, shore pass required.
DELAYS: Possible. During loading if it rains.
DEVELOPMENTS: A new port is being constructed about half a mile South of the port of Meneng. Operated under Pertamina management for oil offloading purposes, the open roadstead harbour will have a 150 m. long wharf with a 10–12 m. depth. Development began in July, 1977, and completion is expected in July, 1979. Exact location of the port, which will be especially for domestic shipping, is Lat. 8° 08′ 09″ S., Long. 114° 24′ 03″ E.

AUTHORITY: Kepala Pelabuhan. (Port Administration).

BELAWAN: 03.47 N. 98.41 E. (See Plan Book)

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
2 Stores Lists.

PILOTAGE: Pilotage for vessels over 500 cu.m. gross is compulsory. The location of anchorage for vessels awaiting a Pilot is 03° 54′ 50″ N. 98° 45′ 50″ E., near light buoy No. 0 (03° 54′ 14″ N. 98° 44′ 40″ E.).

The new lighthouse at Tg. Nipa Larangan (03° 54′ 00″ N. 98° 40′ 50″ E.) with characteristic GpFl(3)20 sec. 37M 40m, will assist Masters to approach the anchorage. Before arrival Masters have to contact their Agents via Belawan Radio (PKB) and give Information about: ETA, cargo, LOA, draft etc.

To receive information, Masters may use the VHF radio on Channel 12 calling "Belawan Pilot" or "Pilot Boat".

Pilot's service available 24 hours a day.

Pilot must be ordered by the Agent at least 6 hours in advance of the time their service is required.

A sea Pilot and harbour Pilot embark at anchorage when berth has been allotted.

Vessels will proceed when the draft enables vessels to pass through the channel.

The channel is approximately 9 miles in length, 100 m. width and 8 m. depth at LWS with a tidal range about 2 m. and is provided with 7 light buoys and 5 light beacons.

Basin 1,350 m. length. 220 m. width.

Pilot boat is located in the harbour.

When the Pilot is on pilot vessel, H flag will be flown in daylight and quick flashing white light at night.

RESTRICTIONS: Bar is silting excessively and continuous dredging is necessary to keep the shallowest part at 8 m. at LWS. Narrowest part of channel is 50 m. wide.

Outer roads about 600 m. square marked by light buoy. No pilot light vessel. This roadstead is approx. 600 m. wide, the centre of which is the range-line of the swept channel. This channel is provided with buoys and beacons.

TUGS: Join the vessels at buoy No. 11 about 1 mile from harbour. Ship's line to be used for towing line.
Port Authority Regulation:
a. Vessels with LOA less than 100 m. assisted by ....1 tug
b. Vessels with LOA from 100 up to 150 m. assisted by ......2 tugs
c. Vessels with LOA over than 150 m. assisted by 3 tugs
Tugs: 2×800 h.p and 1×1,200 h.p.

RADIO: Coastal Radio Station: Call sign PKT; Class A1, Frequency 8714, A2, Frequency 8754.4.
BERTHING:

Dock or Quay	*Berth No.*	*Nominal Depth below Chart Datum (m.)*	*(ft.)*	*Length of Quay (m.)*
Ocean-going Ujung Baru	104 105 106 107 108 109 110 112 113	10	33	2,187

Oil Jetty	Pertamina	10	33	60
Mooring Buoys	Pelabuhan Lama	8.5	27	

STEVEDORES: Working hours: Monday–Thursday 0800–1200 hrs., 1300–1600 hrs. Friday 0800–1100 hrs., 1300–1600 hrs. Saturday 0800–1200 hrs., 1300–1500 hrs. Overtime to be applied for from authorities concerned and is usually granted: on working-days during meal-hours, from 1600–2000 hrs. and occasionally till 2200 hrs.; on Sundays and holidays, except Independence Day, 1st Ramadhan, Christmas and 1st January.
CRANES: Mobile cranes, 2×15 ton capacity and 3×25 tons capacity. Floating crane 40 tons capacity. 5 shore cranes with 3–5 tons capacity.
FRESH WATER: Handled by the Harbour Board. Artesian wells all along the Ocean quay with a loading capacity of about 10 t.p.h. The water is regularly laboratory checked and declared drinkable but boiling before use remains recommended. Barge with 200 tons capacity also available.
FUEL: Coal not available. Oil, at 5 points on the quay alongside godown 18 and 19 for Stanvac diesel and marine fuel oil, applications for which must be made 2 weeks in advance. Pumping capacity about 60 t.p.h. Barge with 200 tons capacity also available.
REPAIRS: Slipways available for small craft only. Machine-shops available for minor repairs. Radio repairs available, viz. the Post Telegraph and Telephone Office. Electronic repairs not available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50. – (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents for the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
SHIPMASTER'S REPORT: 1976: I would inform you that all vessels are now berthed or unberthed on a round-the-clock basis, within the draft limits imposed by the dredged channel, which at present is 8 m. LWS with a tidal range of about 2 m. The chief Pilot stated that they would berth vessels up to 10 m. draft at high water.

The pilot station is now equipped with VHF and works on Channel 12: they pass berthing information on this Channel to vessels at anchor. They use 12 as a calling-up and working Channel.

AUTHORITY: Departmeen Perjubungan, Direktorat Djendral Perhubungan Laut.

BIMA: 08.25 S. 118.42 E.

DOCUMENTS:

6 Crew Lists.
6 Vaccination Lists.
6 Stores Lists.
6 Passenger Lists.

PILOTAGE: None available.
ANCHORAGE: 300 m. off the quay in depths of 16 m.
RESTRICTIONS: None, vessel may enter harbour day or night.
MAX. SIZE: Not limited at anchorage.
RADIO: Coastal Radio Station, cable address Pelni Bima by Post Office.
TUGS: No tug-boat available.
BERTHING: Entering and sailing allowed after dark. No berthing facilities except for very small ships.
STEVEDORES: Ordered by Agent. No work allowed on Muslim holidays, New Year and 17th August.

MEDICAL: 1 government hospital available.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None available, police and Customs officers posted on board.
OPENING/CLOSING HATCHES: Carried out by stevedores.
AIRPORT: Flights from Bima to Sumbawa, Ampenan, Bali. By AOA Zamrud (Dakota) every Sunday, Tuesday, Thursday and Saturday. Aviation Corporation.
TIME: GMT plus 8 hours.
HOLIDAYS: Muslim holidays, New Year, 17th August.
TELEPHONES: No phone connections between ship and shore available.
SHORE LEAVE: Crew members are allowed to go ashore and arranged by Agents.
DELAYS: 1 motor-boat, 4 lighters each of 15 tons and 1 lighter of 25 tons. Loading general cargo live buffaloes and fodder. For heavy cargo max. 7 tons each lift can be handled through lighters.

BITUNG: 01.26 N. 125.12 E. (See Plan Book)

PORT LIMITS: The area between:

01° 26′ 24″ N.	125° 11′ 30″ E.
01° 26′ 24″ N.	125° 11′ 30″ E.
01° 27′ 15″ N.	125° 12′ 40″ E.
01° 25′ 25″ N.	125° 12′ 40″ E.

DOCUMENTS:
4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
3 Cargo Lists.
3 Provisions Lists.
1 List of Articles new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Ship's Register.
International Vaccination Certificate for Crew and Passengers. (Especially for International Travellers.)
Health Book/Maritime Declaration of Health.
Derating Exemption Certificate.

PILOTAGE: Contact Coastal Radio Station Bitung (call sign PKM), telegram address: Bitung Port Administration; advance notice of ETA 24 hours. Pilot boats: 110 h.p. and 350 h.p. light grey. Requiring a Pilot: flag, sound and Morse Signal: "G". Anchorage for vessel awaiting a Pilot: the area between: 01° 26′ 30″ N., 125° 10′ 25″ E; 01° 25′ N., 125° 10′ 08″ E. and 01° 24′ 01″ N., 125° 07′ 01″ E; 01° 24′ 01″ N., 125° 09′ 54″ E.
ANCHORAGE: The area between coast of Lembeh Island and coast of Sulawesi: 01° 27′ N., 125° 12.3′ E.; 01° 26.2′ N., 125° 13.5′ E. and 01° 26.3′ N., 125° 10′ E.; 01° 25′ N., 125° 10.8′ E. Depths: 42 ft. to 114 ft.
RESTRICTIONS: No restrictions on night entry.
Shipmaster's Report: Numerous fishing boats at the port entrance especially at night time, also fishing sticks, and small fishermen's houses on bamboo sticks built at sea, without lights, dangerous to navigation. Approaching or sailing from port at night time, should not be attempted.
MAX. SIZE: Draft alongside pier, max. 32 ft. L.O.A. 760 ft. or 65,000 cu.m. B.R.T.
HEALTH: Vessels coming direct from other countries or coming from infected port: "Q" flag to be flown. Pratique procedure and action necessary to obtain pratique according to the International Sanitary Regulations.
RADIO: Bitung Radio (Call sign P.K.M.) for vessels to route ETA cables to Agents, Receivers, etc.
(MF–Working frequency 438 and 500 kc/s, listening frequency 500 kc/s, emission A.1., A.2.).
Time Schedule: 00.00—01.00
04.00—05.00 } G.M.T.
08.00—09.00
TUGS: 1 tug, 1,160 h.p. also 1 motor launch 40 h.p.
BERTHING: Depths alongside piers are:
A. Ocean going: 16 ft. — 35 ft.
B. Interstate: 17 ft.
STEVEDORES: Arranged by handling Agent.
MEDICAL: Masters to advise by radio prior to arrival if medical attendance required aboard. Vaccination/fever certificates required, 3 copies.
TANKERS: 1 oil jetty for domestic tankers.
DENSITY: About 1030.
FRESH WATER: Available from hose connections on the pier, at a rate of 30 t.p.h.
FUEL: Not all grades fuel available. Diesel and marine lubricants can be supplied. 48 hours notice required.
DEVELOPMENTS: Extension of pier (1,862 ft.) to total length of 2,982 ft. to be completed 1979.
REPAIRS: Some deck and minor engine repairs are possible at Bitung dockyard. Radar and electronic repair available, but not for big repairs.
GANGWAY/DECK WATCHMEN: Not needed.
OPENING/CLOSING HATCHES: Normally by crew/stevedores, otherwise according charter party.
SHIP CERTIFICATES: Registered Tonnage Certificate and all certificates normally required to be on board.
CUSTOMS ALLOWANCE: 100 cigarettes or 20 cigars or 100 gram. tobacco each crew member; 1 bottle wine or spirits for each crew member.
Passengers: Commodity to be worth US$25 per person or US$100 per family.
CARGO GEAR: Loading and discharging by ship's own derricks. Shore cranes capacity 15 and 35 tons.
IDENTIFICATION CARDS: Shore pass issued by the Immigration Office for crew members at Agent's request.
CONSULS: Philippines only.
REPATRIATION: Facilities available.
AIRPORT: About 50 km. from port of Bitung. Regular airlines: Garuda Indonesian Airways (G.I.A.) 7 flights a week.
TIME: Local time GMT plus 9 hours, permanent.
HOLIDAYS: New Year's Day; Idul Adha; 1st Muharam; Ascension Day; Birthday of Prophet Mohammad S.A.W.; Good Friday; Proclamation Day (August 17); Idul Fitri and Christmas Day.
POLICE/AMBULANCE/FIRE: Fire 111.
SHORE LEAVE: Crew members are allowed ashore with a shore pass issued by the Immigration Office.
AUTHORITY: Port Administrator.

CINTA TERMINAL: 5.30 S. 106.14 E. (See Plan Book)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:
Maritime International Declaration of Health.
Valid Deratisation or Exemption Certificate.
6 copies of Crew Lists.
Passenger List, if any.
Smallpox Vaccination Certificates for all Crew members or passengers within three years.
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seaman's Certificates for all Crew members or passengers.
Notice of Readiness.
Indonesian Consular Clearance.
1 Crew Declaration of Personal Belongings.
1 Ship's Stores Inventory.
6 copies of Cargo Manifest for Cinta Terminal loading.
1 Copy of Cargo Manifest for Transit Cargo with a Summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyds" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all Manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is 5° 25′ 25″ S., 106° 12′ 10″ E. with a radius of one mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The holding area is West of the SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.
MAX. SIZE: *Minimum size tanker acceptable:* The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. size tanker acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 175,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to IIAPCO for any delays.

NAVIGATION AIDS: The SBM is fitted with a 5 nautical mile white flashing light; flashing at a rate of 60 flashes per minute. The SBM is located Lat. 5° 25′ 21″ S. and Long. 106° 14′ 10″ E. and bears 318° True, approximately 51 nautical miles from the Port of Jakarta.

A large 602 ft. long barge "Cinta Natomas" is used for storage of crude oil and for accommodation and headquarters of Cinta Terminal personnel. It lies permanently anchored to an SBM 5° 26′ 40″ S. and 106° 14′ 42″ E. on a line bearing approximately S. 22° E. and 8,500 ft. from the location of the SBM. The barge shows lights and shapes as prescribed in the International Regulations for preventing collisions at sea for vessels engaged in underwater operation, see Rules 4 (c) and 11 (b) (c) (d). The barge is also equipped with a foghorn with 5 seconds on and 55 seconds off sequences forward and 5 seconds on and 55 seconds off abaft, 10 seconds apart.

Four permanently fixed oil producing structures are located in the Terminal area:

There are 15 platforms within 6 miles of the terminal plus one accommodation barge permanently moored in position Lat. 5° 27′ 18″ S. Long. 106° 15′ 52″ E.

Cinta platform "A" rises approximately 65 ft. above water and is located approximately 7,100 ft. from the barge at 5° 26′ 23″ S. by 106° 15′ 50″ E.

Cinta platform "B" is an identical structure to platform "A" and is located at 5° 27′ 01″ S. and 106° 15′ 22″ E. and 4,500 ft. from the barge.

Cinta platform "A" and "B" have heliports.

Cinta platform "C" rises approximately 54 ft. from minimum low water and is connected by a 110 ft. long bridge to Cinta platform "B" on East side.

Kitty platform "A" is located about 33,000 ft. from the barge at 5° 30′ 57″ S. and 106° 11′ 59.5″ E. This platform rises approximately 54 ft. from minimum low water.

RADIO:

Cable address: "Iiapco Jakarta".

Telex: 44221-1A.

Operating Schedules and frequencies: Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2-4-8 and 12 mHz bands and by International Marine VHF Channel 16. (156.80 mHz).

Cinta Terminal (call sign: 6ZFT) particulars are as follows: operated by: Independent Indonesian American Petroleum Company (IIAPCO). Position: Lat. 5° 26′ 40″ S. Long. 106° 14′ 42″ E. Hours of operation: 24.

Frequencies	*Class*	*Power*	*Mode*
2182 kHz	A3, A3H, A3J	150 W	AM
2398 kHz	A3, A3H, A3J	150 W	AM
2638 kHz	A3, A3H, A3J	150 W	AM
2738 kHz	A3, A3H, A3J	150 W	AM
4078.0 kHz	A3, A3H, A3J	150 W	AM
4456.0 kHz	A3, A3H, A3J	150 W	AM
8281.2 kHz	A3, A3H, A3J	150 W	AM
8223.6 kHz	A3, A3H, A3J	150 W	AM
12421.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 — 156.30 mHz Simplex
12 — 156.60 mHz Simplex
13 — 156.65 mHz Simplex
14 — 156.70 mHz Simplex
16 — 156.80 mHz Simplex
20 — 157.00 mHz Receive 161.60 mHz Duplex
26 — 157.30 mHz Receive 161.90 mHz Duplex
28 — 157.40 mHz Receive 162.00 mHz Duplex

Notes: 6ZFT keeps continuous watch on 2182, 4456 and 8281.2 kHz. 6ZFT keeps continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will be by way of this station except should a vessel be unable to contact 6ZFT, she should send messages through: Singapore Radio/9VG or Pertamina Radio/PKI-2.

Initial Communications: It is most important that ships establish communications with the Centa Terminal (6ZFT) not less than 72 hours prior to arrival at the Terminal, giving estimated time of arrival. Further ETA information should be sent when the vessel is 48 hours, 24 hours, 12 hours and 4 hours distance or any time a change of one hour in original ETA occurs. These messages should specifically state whether ETA is given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) will transmit a message to her giving preliminary requirements and details as to Terminal. Masters are urged to comply with this in all details in order to facilitate vessel turn-around and Government formalities.

Communications within 4 hours of terminal: Once ships are within the 4 hours distance of Cinta Terminal (6ZFT) communication, valid radio-telephone communications on International marine VHF may be established on Channel 16 (156.80 mHz). This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation will be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distance from the Terminal.

Communication in Terminal: The Mooring Master will be in direct control of all ship communications while in the Terminal Area. Any unauthorised communications will be cause for cessation of all operations excepting clearing the berth, and the vessel's Notice of Readiness will be nullified immediately.

PRATIQUE: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Cinta Terminal area. These signals shall be displayed continuously until pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port. The boarding officials will attend the incoming vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and when the tanker is in every respect ready to load, the Master may tender his Notice of Readiness. Notice of Readiness will not be accepted during periods when the Terminal is closed. The Terminal is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the Terminal will rest with the Terminal Superintendent. Tenders by vessels to load crude oil cargo will be normally accepted and berth assigned to vessels in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast (if any), and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These are under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administrative Offices are located on board the 143,000 d.w.t. crude storage barge *Cinta Natomas* permanently moored approximately 8,500 ft. on a line bearing South 22° E. from the SBM. The nearest port with facilities is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 11 m. in diameter, and designed to handle tankers in the 175,000 d.w.t. class. The buoy is equipped with dual 12-inch floating hose with ASA 150 pound flanged connections. Both strings must be taken aboard. Loading rates will be from 13,000 to 40,000 barrel per hour range. The SBM is also provided with two permanently attached 15-inch circumference synthetic fibre floating mooring lines. These lines should be held under tension by the vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle head the following:

- *(a)* Messenger lines on the forecastle head for bringing 2 mooring lines aboard from the SBM (min. 6-in. circumference).
- *(b)* Mooring winches on forecastle head for handling two 12-in. circumference synthetic fibre floating mooring lines from the SBM.
- *(c)* Adequate chafing gear to prevent damage to mooring lines.
- *(d)* Derrick rigged and ready to pick up from launch, mooring shackles, nylon stops and hose connection gear on the port side midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon stop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons min. hoist size required.) Vessel's loading manifolds should be prepared for two 12-in. ASA 150-lb. flanged hose connections prior to vessel's arrival at Terminal. Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8-in. hose connections to be removed; also, if necessary, "Y" pieces removed so that max. flow through the 12-in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 40,000 b.p.h. (5,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyds or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging ballast at night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Jakarta. All expenses will be charged to the ship owner.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed one litre of beer or half litre of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AUTHORITY: Independent Indonesian American Petroleum Company, Jakarta.

DUMAI: 01.41 N. 101.27 E. **(See Plan Book)**

DOCUMENTS:

Maritime International Declaration of Health.
Valid Deratisation or Deratisation Exemption Certificate.
12 Crew Lists.
12 Passenger Lists (if passengers carried).
Smallpox Vaccination Certificates for all crew members and passengers.
Certificates of inoculation against any communicable diseases.
Valid Passports and/or Seamen's Certificates for all crew members and passengers.
Quarantine Certificates if expired, can be renewed.
Harbour report/last port clearance.
Load Line, Ship's Registry, Safety Radio, Construction and Equipment Certificates.
For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copies Stores List.

APPROACHES: The Dumai Port installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessels must make a turn of approximately 180 degrees to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait fairways have been wire-dragged clear to a depth of 24 m. and 18.3 m. LWS respectively.

PILOTAGE: Harbour pilotage is performed by Government Pilots. The Harbour Pilot will board a vessel at anchorage for berthing or immediately on arrival at Buoy No. 18 when berth is available.

Sea piloting for the Rupat and Bengkalis Straits is provided by the Department of Sea Communication.

Sea piloting for the Rupat Strait is compulsory. According to the Dumai Port Authority's letter dated June 25, 1974, there are 2 piloting areas for Sea Pilot.

Bengkalis Strait and Rupat Strait from fairway buoy or Eastern part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.)

Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area. Subject to pilotage compulsory for the vessel capacity more than 300 cu.m. gross.

For arriving, vessel should call 6 hours prior CPI's Radio Telephone (VHF) on Channel 12 and 16 at fairway buoy as "request for Pilot" or hoist International Code Flag, painted white, to call "Pilot".

According to the Dumai Port Authority's memo dated May, 1972, effective on 1st June, 1972, all vessels proceeding to Dumai should hoist the International code flag H or PT when passing buoy No. 17 as "requesting for Pilot" and call CPI's Radio Telephone (VHF) on Channel 12. You will be informed whether or not Pilots are available, if not you may then proceed directly to Dumai Harbour anchorage area.

The practice of berthing and unberthing vessels utilising CPI mooring masters has been discontinued.

Shipmaster's Report: 1977. Sea pilotage for the Rupat and Bengkalis Straits is now compulsory. The sea Pilot will board vessels at Fairway Buoy, position Lat. 01° 54.5′ N., Long. 101° 51.5′ E.

Contact with the pilot station "MORONG" is allowed on Channel 16.

In case the Pilot is not available, the recommended anchorage area is 0.5 mile N.N.E. from Fairway Buoy.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instructed by the Dumai Port Control Radio to berth on arrival, it is suggested that they proceed to the recommended anchorage area.

MAX. SIZE: Length 1,263 ft., draft 57 ft.

ETA ADVICES:

1. Proceeding direct from ports other than Palembang and not stopping at Singapore en route:
   - *(a)* Radio 96 hour ETA to "Calpaking Dumai" (include operational data).
   - *(b)* If any time this estimated arrival time changes by 2 hours, send an amended ETA message immediately.
   - *(c)* 24 hours before arrival, *confirm* or *amend* the ETA message regardless of any change from the last advice.
2. Proceeding from Singapore:
   - *(a)* Prior to arrival at Singapore, radio 96 hour ETA Dumai include words "From Singapore" to "Calpaking Dumai" predicted on estimated time of stay at Singapore.
   - *(b)* At Singapore, when departure time from Singapore is known confirm or amend the ETA to "Calpaking Dumai" through your Singapore ship's Agent.
   - *(c)* Immediately upon departure from Singapore, and when able to use the vessel's radio legally, again *confirm* or *amend* the ETA to "Calpaking Dumai".
3. Proceeding from Palembang:
   - *(a)* When departing Dumai on voyages to Palembang and return, give the Dumai Agent a verbal estimate of arrival back at Dumai in each instance.
   - *(b)* Whether or not *(a)* is applicable, when time of departure from Palembang is known, cable an ETA message to "Calpaking Dumai" through your Palembang Agent.
   - *(c)* Immediately on departing Palembang, and when able to use the vessel's radio legally, *confirm* or *amend* this ETA to "Calpaking Dumai".

RESTRICTIONS: All vessels inbound to Dumai from the time abreast Raleigh Bank light buoy until anchoraged off Dumai Terminal must display the following recognition signals.

By day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.

By night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian naval patrol crafts. The foregoing is subject to change.

For some years, the Rupat-Bengkalis Strait area has been designated a restricted Maritime Zone by decree of the Government of Indonesia. A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this zone has been granted by the Indonesian Navy to tank-vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable.

RADIO: There is a Government coastal station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name: Dumai Radio.
Call Letters: "PKP"

Time (GMT)	*Transmits*	*Listens on*
0000–0030	448 kc/s.	500 kc/s.
0400–0500	448 kc/s.	500 kc/s.
0800–0900	448 kc/s.	500 kc/s.
1200–1300	448 kc/s.	500 kc/s.
1300–1400	8726/AL kc/s.	8726 kc/s.
0030–0130	8726/AL kc/s.	8726 kc/s.
0230–0330	13101 kc/s.	13101 kc/s.
0630–0730	17184 kc/s.	17184 kc/s.
0130–0200	2182 kc/s.	3195 kc/s.

If contact cannot be made with Dumai Radio, then you should immediately contact Singapore Radio, Call Sign 9VG and forward your ETA message to "Amoseas Singapore RS–21349".

A C.P.I.-operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities. Channel 12 is utilised. Frequencies: 156.6.

Channel 16 is also utilised. Frequencies: 156.8.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not free pratique).

TUGS: Mooring and unmooring assistance is provided by three 3,000 h.p. diesel electric tugs which are stationed in the immediate vicinity of the wharves. While rendering assistance the tug-boats are under order of the Pilot on duty.

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 6 wharves. 1 wharf is a Government-owned and operated cargo wharf which can also handle discharge of petroleum products. Another wharf is Pertamina, owned and operated for the sole use of its refinery. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading of crude oil and can handle refinery product and caustic soda resin.

- *(a)* Oil Wharf No. 1, located in approx. position 01° 41′ 14″ N. 101° 28′ 07″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,008 ft., and a draft of 57 ft. Orientation of the wharf parallels the current flow.
- *(b)* Oil Wharf No. 2, located in approx. position 01° 41′ 14″ N. 101° 27′ 52″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,465 ft. 8 in. Least depth at face of wharf 58 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,263 ft., and a draft of 55 ft. Orientation of the wharf parallels the current flow.
- *(c)* Oil Wharf No. 3, located in approx. position 01° 41′ 14″ N. 101° 27′ 42″ E. Design capacity 84,000 d.w.t. Length between outer dolphins 1,170 ft. Under favourable weather conditions capable of receiving vessels of 100,000 d.w.t. Least depth at wharf face 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 940 ft. and a draft of 54 ft. Orientation of the wharf parallels the current flow at 095–275 true.
- *(d)* Oil Wharf No. 4, the former T-2 wharf, located between the Cargo Wharf and Oil Wharf No. 3. Wharf used mostly for handling domestic tankers. Basic design is for 55,000 d.w.t. In terms of vessel's size and design this would be an LOA of approx. 680 ft. and a draft of approx. 46 ft. Least depth of water at face is 51 ft. (MLWS). Overall length between mooring dolphins is 680 ft. Orientation of the wharf parallels the current flow.
- *(e)* Government Cargo Wharf located in approx. position 01° 41′ 14″ N. 101° 27′ 04″ E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (MLWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of five (5) tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.
- *(f)* Pertamina Refinery Wharf, located in approximate position 01° 41′ 12″ N. 101° 28′ 16″ E. Design capacities, Outer Berth 100,000 d.w.t., Inner Berth 10,000 d.w.t.

BALLAST: There are no shore facilities at Dumai for disposal of dirty ballast water. Vessels should arrive with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. All ballast water must be pumped overboard after arrival at berth, and prior to loading, unless "load on top" procedures apply. If, after arriving alongside, a vessel is found to have oily ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. A new Notice of Readiness to load must then be tendered.

Effective First Quarter of 1977 (approx.) there will be shore facilities for the disposal of dirty ballast water.

Minimum draft schedules recommended for various tonnage tankers are as follows:

D.wt. *(deadweight tons)*	*Minimum draft* *forward – aft*
(a) 12,000–22,000	12 ft. – 20 ft.
(b) 22,000–32,000	16 ft. – 24 ft.
(c) 32,000–45,000	18 ft. – 26 ft.
(d) 45,000–60,000	19 ft. – 27 ft.
(e) 60,000 and over	22 ft. – 28 ft.

CARGO: There are 2 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API Gravity=35° approximate Pour Point ± 100°F Solid Point ± 95°F.
2. Duri Crude with API Gravity=22.0° approximate Pour Point ± 40°F Solid Point ± 35°F.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

Wharf	*Size of arms*	*Number of arms*	*Size of flanges*	*Capacity b.p.h.*
Oil Wharf No. 1	12 in.	4	12 in.	60,000
Oil Wharf No. 2	16 in.–12 in.	3	12 in.	90,000
Oil Wharf No. 3	12 in.	4	12 in.	60,000
Oil Wharf No. 4	12 in.	2	12 in.	40,000

Oil Wharves 1, 2 and 3 use U.S. standard flanges, faced and drilled. These wharves have Chicksan loading arms while Oil Wharf No. 4 operates with hoses swung on board by the wharves' derricks.

Wharf crews and launch crews are on duty to handle loading arms and/or oil hoses and mooring lines on the wharf. Mooring lines on the vessel will not be handled by C.P.I. personnel. Ratguards must be fitted on all mooring lines.

The required reducers to fit vessel's manifold must be connected and disconnected by ship's personnel.

Upon completion of loading, the vessel will be required to leave the berth immediately after disconnecting hoses and await clearance at the anchorage.

Notice must be given by the vessel to the Piermaster one half hour before the vessel completes deballasting.

Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradually be increased until the desired rate has been reached.

The vessel must give 30 minutes notice to the wharf before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the Piermaster may reduce to 1 pump.

Ship's valves shall not be closed against loading pump pressure.

On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: The port health doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the port health doctor might refer such cases to CPI hospital facilities. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessel's main propulsion machinery shall be in readiness for instantaneous use on short notice. No repair facilities ashore.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs officials on arrival and will remain sealed until the vessels leave Indonesian waters.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated.

TIME: GMT plus 7 hours all year round.

REPATRIATION: Due to stringent Indonesia Government regulations, normally no passengers and/or crew members from any vessel are allowed to disembark for repatriation purposes.

SHORE LEAVE: Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by harbour authorities, and open for 24 hours. Recreational facilities are not available for seagoing personnel at present and few facilities exist in the village of Dumai. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the CPI compound is out of bounds with the exception of the road from the wharves to the village road.

PROVISIONS: No facilities for supplying provisions, nor for handling ship's laundry.

CONSULS: At Dumai the Indonesian Government Port Authorities are located in the Government Building situated close to the Government Cargo Wharf.

There are no Consuls or other foreign Government Representatives located at Dumai, or in the immediate vicinity.

TELEPHONE: As soon as the vessel is berthed a ship-shore telephone connection will be provided.

Ships berthed at No. 1 oil wharf tel. 351; No. 2: 352; No. 3: 353; and No. 4: 354.

The loading master will provide a list of important numbers in Dumai.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.W. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 and 0200 hrs.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70 to 90 per cent).

GENERAL: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

AUTHORITY: Caltex Pacific Indonesia (C.P.I.).

AGENTS: C.P.I. will act as ship's Agents for vessels loading at C.P.I. facilities Dumai except for certain interinsular vessels. As mail service to and from Sumatra is relatively slow and subject to some frequent delays, ample time should be allowed in dispatching mail to vessel calling at ports in this area. The mail and cable addresses for C.P.I. are as follows:

Mail: P.T. Caltex Pacific Indonesia (for Dumai), Kebon Sirih 52, Jakarta, Indonesia (via mail).

Cable: Calpaking Dumai (via Radio Station "PKP").

Another Agent is Pertamina, a State enterprise, who usually handles matters pertaining to Pertamina owned or chartered tankers.

JAKARTA (Tandjong Priok): 06.10 S. 106.50 E.
(See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the wing Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's arrival and departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Ship's Certificate: The Ship's Certificate should be delivered to the Harbour Master through the Agent. This certificate will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the N Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the N Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Compulsory. Pilots will board the vessel at the Outer Anchorage, from 0800–1800 hrs.

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of M.27 is used for communication between the pilot boats and the Pilot station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater.

RESTRICTIONS: Max. draft is approximately 10 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	150	7
2nd	170	8
3rd	170	10
Oil	170	10
Coaster	60	4

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose captain has declared that a quarantinable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantinable disease (QL/QQ).

The concerned vessel is free from quarantine measures when free pratique has been obtained. The free pratique becomes invalid when a vessel is in quarantine as stated above or a quarantinable disease occurs during the validity of free pratique.

The Port of Tunjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "provisional pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "provisional pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "free pratique".

Accordingly vessels enjoying "provisional pratique" are still required to hoist the quarantine flag.

Vaccination/Immunization: Vaccination and Immunization against smallpox and cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

Harbour Master	Channel 16
Pilot	Channel 12–14
Tugboat Operations	Channel 12
Port Operations	Channel 14
Public Service	Channel 16

TUGS: Tugs are operated by the State-owned P.N. Tunda Bara, Cable address: "Coaltug", which also handle the mooring facilities. Vessels over 80 m. in length have to use at least 1 tug. 10 tugs available from 135 h.p. to 1,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth* (m.)
Coaster Harbour	663	3–4
1st Inner Harbour	1,855	5–8
2nd Inner Harbour	1,900	
for coal	150	7–9
for fertilizer	150	
for mineral oil	25	
3rd Inner Harbour	1,080	8–10.5
Mineral Oil Harbour		
Oil Jetty (3 at 25)	75	9–10
Bogasari (wheat)	140	9–10
Wooden	100	5–7

Buoys	*Number*	*Capacity* (tons)
West buoys	6	15,000
East buoys	10	5,000
1st Inner Harbour buoys	7	6,000
3rd Inner Harbour buoys	4	15,000
Nusantara buoys	2	5,000
Dredging Yard buoys	1	2,000

SPECIALISED CARGO-HANDLING FACILITIES: There are 2 transporters with grippers available at the coal wharf.

CRANES: *Mobile cranes:*

No.	*Capacity* (tons)
4	5
5	20
1	35
14	3–20

Shore cranes/Portal cranes:

12	3

Floating cranes:

1	15
1	60
1	25
1	200

STEVEDORES:

Working hours: The usual working hours at the harbour are:

Monday–Thursday	0800–1200 hrs.
	1300–1600 hrs.
Friday	0800–1100 hrs.
	1330–1600 hrs.
Saturday	0800–1200 hrs.
	1300–1400 hrs.

Overtime is allowed on request.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipe-line or barge, rate 50/60 t.p.h. Barge capacity 60–350 tons.

FUEL: Available by pipe-line or barge, supplier is Pertamina.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CUSTOMS ALLOWANCES: Tobacco: Each crew member is allowed to carry 200 cigarettes or 50 cigars or 100 grams of tobacco ashore without paying import duty. Alcohol: There is no allowance for alcoholic drinks. Other commodities: Maximum value of US $100. Each crew member is allowed to bring personal goods in use up to maximum value of US $100.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

AIRPORT: Kemayoran International Airport is approximately 8 km from Tanjung Priok, and Halim International Airport is approximately 25 km. Kemayoran Airport phone: 47031.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire 291399; Security 291691/291459; Ambulance 291045/290097.

CREW IDENTIFICATION CARD: Crew members having no passport are required to carry a Seamen Identification Card (S.I.C.).

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

AUTHORITY: Port Administrator.

KIDJANG: 00.51 N. 104.37 E. (See Plan Book)

LOCATION: The Bauxite Loading Port of Kidjang is situated at the S.E. coast of Bintan Island in the Riau Archipelago, in the position of 00° 50′ 44″ N. and 104° 36′ 31″ E.

FLAGS: To be flown by incoming vessel:

Vessel's National Flag.
Indonesian Flag.
Vessel's Number.
Quarantine & Immigration Flag. ("Q" and "N").

DOCUMENTS: To be produced upon vessel's arrival:

12	Crew Lists
4	Passenger Lists (if any).
4	Parcel Lists (if any).
4	Store Lists.
4	Cargo Manifests.
4	Narcotic Lists.
2	General Information.
4	Fire Arms & Ammunition Lists.
4	Personal Effects Lists.
2	Vaccination Lists.
1	*Declaration of Health Certificate.
2	*Harbour Reports.
	International Load Line Certificate.
	Certificate of Registry and Tonnage.
	Certificate of Vessel's Nationality.
	Safety Equipment Certificate.
	Seaworthy Certificate.
	Safety Radio Telegraphy Certificate.
	Derating Certificate.
	Last Port Clearance.
	*Forms to be supplied by Agents.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books & crew list and issues shore passes.

PILOTAGE: One Government Pilot available. Pilot compulsory.

Pilot's office : c/o Port Administration Tanjung Pinang.
Priority : First come first served.

There are 3 Pilot Stations:

1. Tanjung Pinang:	00° 53′ 47″ N.	104° 24′ 10″ E.
2. Tanjung Tillie:	00° 48′ 12″ N.	104° 35′ 30″ E.
3. Temborak Laut:	00° 49′ 00″ N.	104° 41′ 30″ E.

If vessel wishes to be piloted to the port on arrival day, vessel has to arrive at the desired Pilot Station as mentioned hereunder:

1. Tanjung Pinang: Not later than 1600 hrs. local time.
2. Tanjung Tillie: Not later than 1800 hrs. local time.
3. Temborak Laut: Not later than 1600 hrs. local time.

However Tanjung Tillie or Temborak Laut Pilot Station are preferable to Tanjung Pinang.

In case vessel is long overdue (3 hours delay after Master's last ETA cable), Perbaki shall charge compensation for keeping labourers, waiting, etc.

RESTRICTIONS: The height of vessel from waterline to top of hatch coaming or railing must not exceed 12.00 m. Each side deck breadth from bulwark to king post or mast must not be less than 5.50 m. and from bulwark to hatch coaming must be preferably 7.00 m. min., and 9.00 m. max.

MAX. SIZE: LOA 185 m. Max. draft 11.00 m.

Greater than the max. draft and LOA exceeding 185 m. might be possible after consultation with the Pilot/Harbour Master and considering the depth at entrance of the port upon departure.

RADIO: Cables to Perbaki Tanjungpinang can be sent through Dumai Radio Station, Call Sign "PKP" or through Tanjung Pinang Coastal Radio Station, Call sign "PKJ2", with working frequency/time:

8734 Kc/s 0100 hrs. — 0130 hrs. GMT.
8734 Kc/s 0500 hrs. — 0530 hrs. GMT.
4295 Kc/s 0130 hrs. — 0145 hrs. GMT.
4295 Kc/s 0230 hrs. — 0245 hrs. GMT.
4295 Kc/s 0430 hrs. — 0445 hrs. GMT.
4295 Kc/s 0830 hrs. — 0845 hrs. GMT.
Local Time — GMT plus 7 hours.

Arrival Notice: Owner's advise: Owner to advise by cable to Anekatambang Jakarta and Perbaki Tanjungpinang at least 8 working days notice of vessel's ETA at loading port.

Master's advise: At least 48 hours before vessel's arrival at desired Pilot Station, Master shall give the following information to Anekatambang Jakarta and Perbaki Tanjungpinang: Last port of call, draft on arrival, quantity of bauxite to be loaded, stowage plan (hatch division for bauxite cargo), quantity and kind of commodity (ies) to be discharged — if any — and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Perbaki Tanjungpinang waits for the Master's telegram in order to make necessary preparation such as ordering Pilot, etc.

Availability of berthing space: The availability of berthing space will be confirmed by Sub-Agents.

TUGS: Available and compulsory.

BERTHING: Vessels are moored alongside 2 jetties and 7 dolphins with good nylon ropes, 5 fore, 5 aft, 1 forespring, 1 after spring, 1 fore breastline and 1 after breastline. For Spring tide a hercules wire rope (extra) is obtainable.

Same will be carried out from the Southern part of Perbaki's jetty and serves then as additional breastline. If a vessel has not got sufficient lines, same may be hired from Perbaki.

When moored alongside jetties, vessels must take special care of the moorings during hours of ebb-tide, which runs in S.-N. direction.

Due to strong current in Strait of Kidjang the ship's Master is kindly requested to pay attention to Sub-Agents advices.

Vessels of over 20,000 d.w.t. will need extra 2 stern and 2 head lines.

Shifting Ship: Shifting ship will be done during slack water only by utilizing ship's gear and with assistance of tugboat if necessary. But to finalize loading as scheduled in stowage plan, shifting may be done even during unslack water using vessel's engine.

Jetty: There is no quay. Vessels are moored alongside 7 dolphins and 2 jetties.

Distance between the 2 extreme dolphins is 135 m.

Loading Facilities: Loading installation consists of 2 loading conveyors or stacker. Bauxite is loaded in the hold of vessel by means of conveyor belt.

Stacker can be moved vertically from 13° to 35°, but the maximum position for proper operation is only up to 18° inclination angle.

Each stacker can swing 16.00 m. (7.50 m. to inner side and 9.00 m. to outer side).

Distance between the 2 stackers in parallel position is 50.00 m.

The minimum distance between the end of stacker is 36.00 m. and the maximum is 68.00 m. (if there are king posts near bulwark, these distances might be less).

The length of stackers is 47.79 m. each. At the lowest position (13°) the end of stackers outreach about 10.50 m. from jetty seaward. (In this position the height from water line to the end of stackers is about 13.0 m. HWS).

Loading Capacity: About 500-600 t.p.h. for each stacker, however, it depends on the type of vessel, available cargo space, size of hatches, duration of trimming by bulldozer, etc.

Weighing: The bauxite is automatically weighed during loading by weightometer. The specific gravity of bauxite is around 1.25 and stowage factor around 29.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Labourers will be supplied by Perbaki. Making the vessel ready for loading/unloading to be done by vessel's Crew members.

Loading is performed by Shipper's personnel. Loading/unloading equipments to be furnished by the vessel.

If necessary and at vessel's request, trimming of the bauxite can be done by bulldozer, except in deep tanks, cross bunkers, small hold in which bulldozer cannot operate.

Weight of bulldozer is 5 tons, so double gear is compulsory when loading, discharging or shifting bulldozer.

In hold where bulldozers are going to operate, all beams of upper as well as lower tween decks have to be removed.

This has to be done by vessel's Crew members. Loading/unloading and shifting bulldozers (with engine off) to be done by vessel's Crew members.

The vessel is responsible for any damage to the bulldozers while loading/unloading or shifting.

Working Hours: Loading/unloading to be effected with Customary Quick Despatch (CQD) on weather working days, whereby Sundays, Holidays, Governmental Local Holidays and Saturdays between noon and midnight and Monday between 0000 hrs. and 0800 hrs., are always excepted.

At Shipmaster's request, work on these days can be arranged. The Ordering Party will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available. The nearest bunker station is at Pertamina Tanjung Uban (Bintan Island), North Secton of Riau Strait.

Lubricants: None. In emergency cases, a limited quantity will be made available in drums.

TIME: GMT plus 7 hours.

CUSTOMS ALLOWANCES: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Kijang port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

REPATRIATION Can be arranged.

AIRPORT: Domestic airport about 9 miles from Kidjang. There are 4 regular flights from the said airport to Jakarta. Also a daily ferry service is available from Tanjung Pinang to Singapore. Sailing time about 4 hours.

CONSULS: None.

SHORE LEAVE: *Shore Pass:* Shore pass must be carried by Crew members during shore leave.

Invitation: Vessel's Crew members are strictly prohibited to invite friends, hawkers from shore aboard the vessel.

Anchorage: While lying at anchor waiting for berth no one is allowed to go ashore as long as vessel is not cleared.

It is also prohibited to lower lifeboats or rafts for the purpose of fishing, sailing, visiting nearby islands etc.

Leaving for Kidjang and Around: Permitted.

SERVICES: *Cash Advances:* At Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Ship's Chandlers: None. In emergency cases, Perbaki can act as ship's chandler for a limited quantity.

GENERAL:

Depths: Entrance: 10.50 m. LWS; Alongside jetty: 11.00 m. LWS

Current: Direction: At high tide, from North to South; At ebb tide, from South to North.

Velocity: Around 2–6 knots.

Chart: Indonesian Sea Chart No. 42, 44A and 44B.

Nature of bottom: Sand and soft materials.

Density: Approx. 1020.

AGENCY:

2. *Sub-Agents:* PT Aneka Tambang Unit Pertambangan Bauksit, Kijang.
Address: Kidjang Tanjungpinang.
Cable Address: Perbaki Tanjungpinang (through Tanjung Pinang Radio Station Call Sign PKJ2 or Dumai Radio Station Call Sign PKP).

MPS Tax: So called MPS Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta at the same time with the remittance of advance payment.

The amount of MPS Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remit advance payment.

The final calculation of the MPS Tax will be made later.

Disbursements:

Advance Payment: At least 14 days before vessel's arrival at Kijang, vessel's Principals have to remit US $3,000 to the account of PT Aneka Tambang Jakarta as General Agents, at Bank Dagang Negara Gambir Branch Jakarta (Telex: Stacob J.44132 Jakarta), as advance payment of the related ship's disbursement, and inform PT Aneka Tambang, Jakarta and Perbaki Tanjung Pinang about the remittance accordingly.

Vessel's Disbursement Account: All vessel's expenses will be charged to the related Principals through the Vessel's Disbursement Account Statements.

SHIPMASTERS REPORT: 1977.

Vessel's Dimension: Length 185.5 m. Beam 25.5 m.

Vessel sailed after loading wet bauxite ore in bulk. Vessel has previously visited the port 3 times and loaded to a draft of 11.2 m., however, due to poor tides loaded draft this voyage was 10.8 m.

Entrance to the port is from the North between Mapor Island and Merapas Island. The channel is clear and swept to 13.5 m. (chart datum) there are no navigational problems and Pilot boards in position 00° 50′ N. and 104° 43′ E. Also one can proceed onwards to the North of Kambat and Rusa Islands and then between Gabi and Riau to Tanjung Tillie anchorage. This is the accepted Pilot boarding ground and pilotage is compulsory and daytime only. The Pilot is accommodated at Tanjung Pinang but drives by car to the bauxite terminal and takes a launch from there to the vessel. He may not board upon arrival of vessel if the tide is unsuitable for berthing, as the ebb tide can reach 8 knots in Selat Kijang. There are 3 tugs available which are small, but quite adequate for berthing. The vessel proceeds past the berth then turns so as to berth starboard-side alongside. Moorings consist of 6 headlines, one breast line and 2 springs forward and 3 springs and 6 stern lines aft. Nylon lines are in position and can be hired as needed from the shore. The loading arms are fixed and shifting of the vessel is carried out at slack water.

Communication can be difficult at times. Tanjung Uban functions for 15 minutes in the hour and is not normally raised until day of arrival. All cables are sent through radio "PKI" Jakarta and seem to arrive at their destination. If possible despatch 3 copies of the Crew List to the port in advance as this speeds up clearance on arrival.

AUTHORITY: Dept. of Sea Communications.

LABUANTRING BAY: 08.44 S. 116.04 E.
AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:

Health Certificate.
1 Vaccinations List (Smallpox and Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Store Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: Normally not provided. When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar enter Labuantring Bay, normally calling Ampenan awaiting particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: 1 tugboat of 125 h.p. 2 motor launches only, for cargo handling purposes.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kc/s. and 430 kc/s. Times GMT: 0000–0100, 0500–0600: except Friday and Saturday: 0000–0100, 0900–1000. Sunday and holiday closed.

BERTHING: Length of quay at Labuantring Bay approx. 40 m. Vessels with a length of less than 100 m. and a draft of less than 6 m. may berth safely. Berthing at Ampenan (anchorage) for all sizes of vessel.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Some specialised surgery is not. Smallpox vaccination and Yellow Fever Certificates inspected on arrival.

TANKERS: Berthing at Ampenan.

FRESH WATER: Not available.

FUEL: Not available.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Deratisation Certificate, Clearance from previous port, all to be shown on arrival.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

OPENING/CLOSING HATCHES: Normally carried out by stevedores; ship's crew may if required by vessel to do so.

CUSTOMS ALLOWANCES: No restrictions. Custom's Officer supervises opening and resealing of bond.

CONSULS: None available locally.

AIRPORT: Served by regular airlines to Bali and Java.

TIME: GMT plus 8 hours.

HOLIDAYS: 1st January; Independence Day (17th August); Christian, Islamic and Balinese holidays as appointed by the Indonesian Government.

GENERAL: Vessels should not use ship's radio station. Harbour Police and Customs' guards on board during ship's stay in harbour.

SHORE LEAVE: Crew allowed ashore; passports required whilst ashore.

DELAYS: Normally minimal.

MACASSAR: 5.05 S. 119.24 E.

DOCUMENTS:

Certificate of Registry.
Crew List.
Log Book.
Certificate of Seaworthiness.
Certificate of Plimsoll Mark.
Radio Certificate.
Health Certificate.
Equipment Certificate.

Shipping documents as follows:

Manifest of Cargo.
Bills of Loading.
Charter Party (if necessary).

PILOTAGE: Compulsory for all vessels, who have to use Port Administration's tug-boat. To order Pilot contact Macassar Radio, call sign PKF. Besides, Agent contacts the Harbour Master (Inspektur Keselamatan Pelajaran). Pilot boards vessel at anchorage, about 1 mile off shore. Exact area where vessel waits for Pilot or anchorage is between Lae-Lae Island and Samalona Island. Depth of anchorage is 3 fathoms.

RESTRICTIONS: Every ship needs permission from Dit. Dken. Perhubungan Laut (General Directorate of Sea Communication) to enter Macassar Harbour. When ship has no permission, Agent must apply to Port Authority and give details of ship, i.e. name of vessel, nationality, name of shipping enterprise, ETA, ETD, last port of call, next port of call, loading or discharging and aim of entry. No entry after 1800 hrs.

MAX. SIZE: No limit on length or breadth. The port consists of 2 bases; Base No. 1, 1,360 m. long and Hatta Base, 550 m. long. Draft at Base No. 1. 8 m. Draft at Hatta Base 9 m. Besides these bases there is a special pier for oil carriers outside main port area not far from Base No. 1.

HEALTH: Every vessel must have a certificate of health on board. When vessel enters a member of Port Health Authority boards. If there is any disease on board the vessel must go to quarantine area.

RADIO: Macassar Radio with call sign PKF.

TUGS: 1 tug *Anggada VII*. Used for vessels of 5,000 d.w.t. or over, and 4 tugs of smaller size.

STEVEDORES: Stevedoring by shipping enterprise or shipping enterprise agent. Capacity for discharging about 20 tons every gang/hour. No heavy cranes.

MEDICAL: Doctor and clinic available.

FRESH WATER: Ground-pipe with 10 t.p.h capacity. Barge with machinery pump 25 t.p.h. capacity.

FUEL: Fuel capacity in a day 400 tons.

DEVELOPMENTS: In near future, Macassar to have bonded warehouse.

GANGWAY/DECK WATCHMEN: There are no special deck watchmen services but can be arranged through Agent.

OPENING/CLOSING HATCHES: Work carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco – only sufficient for personal use. Wine and/or spirits – none permitted out of bond.

CARGO GEAR: Local regulations comply with Bureau of Classification with which vessel registered.

IDENTIFICATION CARDS: Identification cards needed by Immigration Office.

CONSULS: None available locally.

REPAIRS: Minor deck or engine repairs possible.

AIRPORT: Macassar Airport, called "Mandai Airport" Distance from town about 23 km. Services (1) Macassar – Kendari and (2) Jakarta – Surabaja – Macassar – Manado 3 times a week.

TIME: Middle Indonesian Time. GMT plus 8 hours.

HOLIDAYS: Every Sunday; New Year (1st January); Idul Adha (27th February); 1st Muharam 1389 H. (19th March); Isa Almasih (15th May); Maulud Muhammad (29th May); Sancta Maria (15th August); Proclamation Day (17th August); Mikradj Muhammad (9th October); Idul Firit (11th and 12th December); Christmas Day (25th December). Work can be arranged at overtime rate.

POLICE/FIRE/AMBULANCE: Police, Fire 4306; Ambulance 7227.

TELEPHONES: No arrangements exist for placing telephones on board.

SHORE LEAVE: Crew members are allowed ashore.

DELAYS: Caused by rain; no mechanical equipment for cargo handling.

AUTHORITY: Departemen Perhubungan, Direktorat Djenderal Perhubungan Laut, Port Administrator Macassar.

MALILI: 02.39 S. 120.59 E. (See Plan Book)
MANGKASA: 02.44 S. 121.04 E. (See Plan Book)

OPERATOR: P.T. International Nickel Indonesia (P.T. Inco).

LOCATION: Malili and Mangkasa Tanker Terminal are situated in the Gulf of Bone, South Sulawesi about 300 miles N.E. of Ujung Pandang.

Malili:

Malili port is situated in the Gulf of Bone, South Sulawesi about 5 miles from Mangkasa sea tanker terminal.

Vessels arriving at Malili port must remain in the roads anchorage area which is about 02° 42′ 00″ S. and 120° 59′ 00″ E. and having average depth of more than 20 m. (LWS)

This port *is to be assigned for* dry general cargo discharging and loading of nickel ore.

The sea chart to be used is Indonesian Chart No. 319 and all vessels calling at Malili port must call first at Ujung Pandang for clearance.

Mangkasa Sea Tanker Terminal:

The terminal is located at 02° 44′ 25″ S. and 121° 04′ 00″ E. This terminal is provided for tankers of about 20,000 d.w.t. which are to be equipped with hose lifting derrick at the port side manifold.

The sea terminal itself consists of a four-buoy mooring.

The hose has a diameter of 12 in. and fitted with 12 in. × 150 lb ASA flange. The submarine pipe diameter is 20 in.

FLAGS: In accordance with the practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching the port. These signals shall be displayed continuously until clearance is granted.

The above mentioned signals are:
Sunrise to sunset: quarantine flag "Q".
Sunset to sunrise: signal lights red over white.

The flag "N" should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Pilot boards.

The vessel should also fly its call sign until the vessel is secured in the berth. These call sign flags must be flown again when the vessel is sailing until the vessel is clear of the anchorage area and the Pilot has departed.

The "G" flag should be replaced by "H" flag if the Pilot is already aboard the vessel.

The "P" flag may may be flown if the vessel is going to sail within 24 hours.

DOCUMENTS: Indonesian Immigration, Customs and Port officials will board the vessel to grant clearance. Each crew member should be in possession of an International Vaccination Card and passport.

The following documents may be required for granting pratique for the vessels arriving from foreign ports:
Certificate of Registry.
Ships Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Exemption Certificate.
Cargo Gear Certificate and Deratting Certificate.

The last port clearance and Crew Lists are also required.

Flag Dispensation: All foreign vessels entering Indonesian ports must have requested and been granted Flag Dispensation prior to the arrival at the port. Also a loading or discharging permit must have been applied for from the authority concerned. All this will be done by the general Agent.

PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided.

MAX. SIZE: The tanker buoy mooring is designed for a vessel of 20,000 d.w.t., 26,700 tons displacement, LOA 600 ft., and max. draft of 31 ft.

RADIO: *Notice of Arrival:* 72 hours prior to the arrival at Malili or Mangkasa tanker terminal, the Master has to cable his ETA to "Inco Ujungpandang" through Ujung Pandang coastal radio station which then, will be passed on to Malili or Mangkasa coastal radio station.

The Master has to reconfirm or amend the ETA 48 hours and 24 hours before arrival at the port.

The cable address of "P.T. International Nickel Indonesia" (P.T. "Inco") of Ujung Pandang is Nikel Indonesia Ujung Pandang.

The coastal radio station of Ujung Pandang has the following particulars:
Name of station: Ujungpandang Radio.
Call sign: PKF.
Frequency: 465–500–8686–13101 Kc/s (A1), and 4409–2182–6518.6–8738.4 Kc/s (A3).
Power: 1 KW.
Service hours: See book of Indonesia Coastal Radio Stations.
Geographical location: 05° 06′ 30″ S. 119° 26′ 20″ E.

Details of Cable: The information cable should give the following data:
1. Name of vessel and radio call sign.
2. ETA in GMT and date (local time, GMT plus 8 hours).
3. The quantity of cargo to be discharged.
4. Maximum discharging capacity (for tanker only).
5. Vessel's draft on arrival.
6. If there is any sick crew on board or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead or valve leakages which may cause pollution (for tanker only).
9. Distance in feet from bow to vessel's manifold connection.
10. Flange dimensions of vessel's manifold.
11. Any requirements such as provisions, fresh water, etc.

Language: The languages used are: Indonesian and English.

BERTHING: Mangkasa Sea Tanker Terminal: Mangkasa sea tanker terminal is an offshore system with 4 fixed anchors connected to buoys which have a quick release mooring system. Buoys are located to suit 20,000 tonners with 2 buoys on the bow and 2 buoys at the stern. These buoys are not lit.

Connection to tank farm is via 12 in. flexible hose joined to 20 in. undersea pipe to the tanks. The flexible hose is fitted with a 12 in. × 150 lb ASA flange. 8 In. and 10 In. reducer fittings are available.

If the jetty of Mangkasa tanker terminal or "four mooring buoys" is unoccupied and has been fixed for certain vessel, the vessel will be boarded by a Mooring Master in the anchorage area providing that the vessel in all respects ready to commence discharging her cargo. The NOR tendered by the Master concerned will be accepted at the time the Mooring Master boards.

Anchoring: A vessel which has to anchor on arrival due to certain circumstances has to inform the Port Control of her exact time of arrival at the port. This is important for adjusting the acceptance of the NOR tendered, providing:

1. It is within daylight i.e. 0600 to 1800 hrs. local time except if night berthing is possible. The NOR is considered to be accepted at the time the Mooring Master boards. Should the vessel have been at anchor, NOR is also accepted at the time the anchor is aweigh providing the Mooring Master is already onboard the ship.
2. It is not a public holiday or Sunday, unless the vessel is actually handled on that day.
3. the port is still open.

In addition to the above conditions, vessels arriving at an unreasonable time ahead of their last signalled estimated time of arrival will not be accepted.

Exact Time of Arrival: It is stressed that every Master has to advise the Port Control of his exact time of arrival to avoid unfavourable situations.

Work Crew Service: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches etc., will be required.

Tanker Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on stand-by during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with table shown on Page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Safety: Every vessel which berths at the buoys shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the mooring buoys shall ensure that all parts of the vessel to which any person may be lawfully required to proceed are properly illuminated.

Efficient and easy means of access shall be provided to every vessel at anchor and at the mooring buoys and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems necessary for the safety of the vessel or the moorings or both or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient crew members must be immediatley available at all times to assist with any or all operations on board the vessel at the terminal.

MEDICAL: Treatment possible at the Iron projects hospital.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPATRIATION: Crew changes especially foreign crew are difficult to arrange.

REPAIRS: No facilities.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs and sealed from time the ship arrives in port until she leaves territorial waters.

Each person is allowed to bring in 200 cigarettes or equivelent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officials will seal the stores.

SERVICES: Provisions and stores not available.

AIRPORT: P.T. "Inco" operate a charter flight between Malili and Ujung Pandang (formerly Makassar) twice a day with a Cessna type aircraft, flying time 1 hour.

GENERAL: *Chart:* Chart for the area is the Republic of Indonesian Chart No. 319 (The Gulf of Bone).

Facilities: Malili region in which nickel ore mine exploration is taking place is a newly opened region, isolated in the middle of the jungle. It is, therefore, not surprising if no facilities are available at present.

AGENCY: Owners have to appoint one of the Indonesian shipping companies as their general Agent for Indonesia. This shipping company will then appoint P.T. "Inco" to be their sub-agent for the port of Malili and/or Mangkasa tanker terminal to attend the arriving vessel.

The agency appointment which should be confirmed by official company letter which has to be received at least 10 days prior to the ship's arrival at Malili port or Mangkasa tanker terminal to give the general Agent a chance to arrange the necessary permits from the Indonesian government.

MUNTOK: 02.04 S. 105.10 E.

DOCUMENTS:

Register Book.
Load-line Certificate.
Deratisation Certificate.
Harbour Report.
Radio Certificate.
Nationality Certificate.
Safety Equipment Certificate.
Port of Call List.
Last Port Clearance.
Light dues Payment.
Health Book.
6 copies Crew List.
3 copies Store List.
6 copies Passenger List (if any).
Navy Book.
Next Port Manifest from every port.
Vaccination Certificate.
All loading Custom paper from every port.

PILOTAGE: Not available.
ANCHORAGE: Safe anchorage in 10 m.
RESTRICTIONS: None.
MAX. SIZE: 2 m. draft at quay length 100 m., breadth 30 m.
RADIO: Not available.
TUGS: 7 tugboats available for communication between shore and ships, with capacity 340 h.p. each.
BERTHING: Anchorage 165° Tg. Kalian, 2 miles from shore. Only small vessels draft 7 ft. alongside quays.
STEVEDORES: Ordered by Agent.
MEDICAL: Facilities available.
TANKERS: None.
FRESH WATER/FUEL: None.
CUSTOMS ALLOWANCES: 200 cigarettes per man; 1 bottle per man.
IDENTIFICATION CARDS: Not necessary.
CONSULS/REPAIRS/DRY DOCKS: None.
AIRPORT: None.
HOLIDAYS: On Moslem holidays, no cargo work.
SHORE LEAVE: After permit by Chief of Police.
REGULATIONS: Customs, Harbour Master, Police Maritime, visit ship on arrival.
DELAYS: Delays due shortage lighter space.

PALEMBANG: 02.59 S. 104.45 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 copies Crew List.
6 copies Passenger List.
2 copies Ship's Articles.
2 copies Store List.
Manifests.
Bills of Lading.

Maritime declaration to be completed by Master upon arrival, obtainable from boarding Quarantine officer, or via Agency.

ARRIVAL: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services.

Agent/Owners to advise Port Administration (Pilot Division) of vessels arrived 24 hours in advance.

PILOTAGE: Compulsory, consisting of Outer (River) and Harbour Pilot. Applications should be cabled to pilot vessel via Palembang Radio Station. Pilot vessel located at station position 02° 11′ 08″ S. 104° 57′ 08″ E.

The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Vessels arriving in afternoon and unwilling to navigate the river in darkness should not hoist the Pilot signal. The signal station is at the aforementioned pilot vessel, which answers the pilot signal as follows:
By night:

A flare-up light slightly over the railing, or waving with a white light means: Pilot will soon board the vessel. 1 red light vertical over a white light means: No Pilot available, vessel allowed to proceed until Pilot is met.
By day:

1. The international flag signal KYS from the International Code of Signal meaning: Pilot unable to attend due to motor defect or heavy seas. The Pilot can be picked up by ship's motor-boat.

2. The flag signal KKO meaning: No Pilot available, vessel allowed to proceed until Pilot is met.

Use of Harbour Pilot in Palembang is compulsory.

ANCHORAGE: *Musi Bar:* anchorage position 2° 08′ 30″ S. 104° 58′ 30″ E., in depth of 9 fathoms, used for topping up ocean tankers from river craft.

RESTRICTIONS: Palembang is 54 miles upstream. The main entrance is the river arm between Tg. Tjarat and Tg. Gedeh. Depths from sea to Palembang:

Outer Bar	45 DM at mean level
For incoming vessels Channel East of Pajung	42 DM
For outgoing vessels Channel West of Pajung	45 DM „ „ „
Channel South of the light-buoy South of Pajung	48 DM „ „ „
Bar of Kupang	50 DM „ „ „
Bar downstream of Kampung-Peradjen (9 miles from Palembang)	50 DM „ „ „
Bar downstream of S. Lais (opposite Kundur)	50 DM „ „ „

Incoming ships have priority in passing the Outer Bar from 2 hours to 1 hour prior to HW. From 2 hours to 45 minutes prior to HW, outgoing ships have to wait between Tangjung Gedeh and Tandjung Tjarat.

Channel East of Pajung for incoming ships.
Channel West of Pajung for outgoing ships.

MAX. SIZE: Max. length 185 m. Max. draft 7.5 m.
RADIO: Call sign PKC.

CRANES: *Palembang:* (Mobile cranes). 1 at 7 tons, capacity, 1 at 10 tons, 3 at 15 tons, 2 at 18 tons, 1 at 25 tons and 1 at 30 tons.

There are 17 fork-lift trucks available, capacity 2-15 tons.

Pusai: 2 mobile cranes, Capacity 5 & 7.5 tons 3 shore cranes, capacity 25,40 and 100 tons.

Plaju and Sungai Gerong: 3 Mobile cranes, capacity 15, 30 and 45 tons. 3 shore cranes, 1 at 15 tons and 2 at 5 tons.

MEDICAL: Hospital and First Aid available.

TANKERS: Pladju Terminal (Right Bank): Downstream of Harbour Board quay operated by P. N. Pertamina Unit II (Pladju) (ex-Shell).

Sungai Gerong Terminal (Right Bank): Downstream of Harbour Board quay, operated by P. N. Pertamina Unit II Sungai Gerong (ex-Stanvac).

DENSITY: 1000.

STEVEDORES: According to the requirements of the vessel concerned, labourers are requested from the U.K.A. (Port Labour Pool).

The usual working hours at the harbour are:

Monday – Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1300 – 1600 hrs.
Saturday	0800 – 1200 hrs.
	1300 – 1400 hrs.

Overtime is allowed on request.

FRESH WATER: Piped water supply is at 15/20 t.p.h., and through water barges is at 50/60 t.p.h. Water barge capacity 100 tons.

FUEL: Obtainable from Pertamina provided payment is arranged in advance through their Head Office in Jakarta. Delivery by pipe-line or barge.

REPAIRS: Facilities available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 100 grams of tobacco. There is no alcohol allowance.

TIME: The Port is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 104° 46′ 36″ East Longitude.

AIRPORT: Talang Betutu Airport is approximately 12 km. from the port.

POLICE/FIRE/AMBULANCE: Security – 22386, Fire 20451/22386, Ambulance 22531.

IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.). A re-entry into country if there is no S.I.C.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

CUSTOMS/NAVY REG.: Upon vessels arrival/departure, boarding team will come on board consisting of:

- 2 Navy Officers.
- 2 Customs Officers.
- 2 Health Officers (in case vessels coming from infected ports or abroad).
- 2 Immigration Officers (in case vessels coming from abroad only).
- 3 Clerks from Agents.

Nobody allowed on board until this team declares the vessel cleared.

AUTHORITY: Port Administrator.

PANARUKAN : 07.42 S. 113.56 E.

DOCUMENTS:

Port Clearance.
5 B/Model/Customs Clearances.
Customs papers.
Store List.
Crew List.
Passenger List.
Light Dues Certificate.
Seaman's Book and Health Certificate.
Ship's Registry.
Load Line Certificate.
Safety Radio Certificate.
Deratting Certificate.
Certificate of Nationality.
Tonnage Certificate.
Suez Canal Certificate.
Dispensation for Deck and Engineer Officers.

PILOTAGE: Nil.

ANCHORAGE: With bearings: Patjaron Hill, 275°; white light, 128°; red light, 187°. This anchorage leaves ship 300 m. from 20 m. line and over 500 m. from 7.5 m. patch.

RESTRICTIONS: No restrictions, vessel may enter and leave port at any time.

MAX. SIZE: In anchorage position draft permissible up to 15 m.

HEALTH: Pratique will be arranged by Agent and especially if the ship is just coming from a country suspected of special disease or fever, otherwise pratique is automatic and a quarantine doctor boards.

RADIO: *(a)* Coastal station: Call sign, PKD 2; medium wave, 500 kc/s.; WF, 474 kc/s.; working hours GMT, 2400–0100 hrs., 0400–0500 hrs. *(b)* Fixed station: Call sign, 8 AD 3; short wave, 8 Mc/s.; working hours GMT, 0100–0400 hrs., 0500–0600 hrs.

TUGS: Tugs join vessel at anchorage position. Vessel can use tug's lines and the Agent will arrange. Usual charge for use of tug's lines.

BERTHING: There are no berths alongside quays.

STEVEDORES: 24 hours before ETA advice needed to arrange gangs.

MEDICAL: Hospital facilities available, vaccination/fever Certificates for crew can be issued by authority.

FRESH WATER: No facilities.

FUEL: No facilities.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: No restriction as long as goods remain on board ship.

CARGO GEAR: All gear supplied by stevedores except rain tent.

IDENTIFICATION CARDS: Needed if crew going ashore.

CONSULS: No local representation.

REPAIRS: No facilities.

TIME: GMT plus 7 hours.

HOLIDAYS: Sundays, 1st January; 17th February; 9th March; 7th May; 18th May; 15th August; 17th August; 28th September; 30th November; 1st December; 25th December. Work cannot be arranged on 30th November and 17th August but on other holidays cargo work can be arranged.

SHORE LEAVE: Can be arranged.

PANJANG (Lampung): 05.28 S. 105.19 E.

(See Plan Book)

Well protected port at inner-end of Lampung Bay.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report (obtainable from the boarding Pilot, or from the Harbour Master's Office).
Pilot's Certificate.
List of Ship's Articles.
Ship's Store List.
Personal Effects List.
General Declaration of Cargoes Aboard Ship.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.

PILOTAGE: Compulsory. Pilots are in Government Service. Pilot signals according the International Code of Signals. Boarding area is on the outer (West) side of a line of reefs, which extends from South to North on the West of the port. Pilot (4) can be ordered from the Port Administration via ship's Agents; Pilotage available throughout 24 hours.

APPROACHES: *Navigational Report:* Approaching Panjang there are numerous small fishermen's houses built on bamboo sticks at sea, some without lights. Therefore approaching or sailing from Panjang at night time should not be attempted.

ANCHORAGE: Panjang Roads; outer (West) side of the reef.

HEALTH: Vessels arriving from aboard have to fly the "Q" Flag (Yellow flag) until boarded and released by the Quarantine Officer.

Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:

Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

RADIO:

(a) Coastal Radio Station, Panjang Radio, call sign PKC 4 working hours GMT 0100 – 0230 and 0400 – 0530.

(b) Fixed station, call sign 8 AB2; working hours GMT 0230 – 0400 hrs. and 0530 – 0700 hrs.

(c) VHF radio telephone service operating on Channels 12, 14, 16 from Monday to Thursday, 0730 – 1430 hrs. local time. Friday 0730 – 1100 hrs. and Saturday 0730 – 1330 hrs. local time.

TUGS: 2 tugboats of 800 h.p. and 250 h.p. owned by the Port Administration; it is compulsory for ships to use tugboat in berthing and unberthing operation.

4 other diesel tugboats, from 100 h.p. to 230 h.p., owned by the PJKA (2) and the PT. Djarkarta Lloyd (2).

BERTHING: Quay A on the South side, length 172 m. and an average depth of 8 m. LW alongside.

Quay B on East side with a length of 110 m. and a depth of about 7 m. LW. This quay is partly used by PJKA (state owned railway company) vessels that serve the Panjang Merak route as regular ferry-boat service.

Quay E on the East side, length 20 m. depth 4 m. LW.

Quay D on the North side, length 200 m., depth 11 m. LW.

Quay C on the West side, length 140 m., depth 5 m. LW.

Oil jetty (timber-decked) for Pertamina tankers on the South of quay C, length 20 m. and depth of 6 m. Ocean vessels can also be berthed at 3 buoys in the Inner Harbour.

LIGHTERAGE: 16 lighters available, capacity between 70 and 170 tons, owned by Port Administration and Shipping Agents, can be hired for loading vessels at anchor or buoys.

STEVEDORES: There are 1,300 registered labourers; working hours 0800 – 1200 and 1300 – 1600 local time. Overtime possible after being granted by the authorities concerned; 24 hours per day working time recommended.

Gang's average capacity 20 t.p.h. for bulk work cargo and 15 t.p.h. for general cargo.

MEDICAL: Medical attention can be arranged through the Agents. There is a port doctor. The general hospital is in Tanjungkarang, about 13 km. away, where sick Crew members may be hospitalized.

TANKERS: 1 pier for tankers, length 20 m. No tank cleaning facility available.

FRESH WATER: Supply is handled by the Port Administration to the wharves through pipe-lines. All berths fitted with fresh water connections (6 hydrants). Capacity is normally about 72 t.p.h. No water barge available.

FUEL: Bunkering not available.

FIRE PRECAUTIONS: The Port Administration handles 1 fire-fighting truck and 1 fire trailer.

Smoking strictly prohibited in warehouses, inside the Pertamina yard, on oil-jetty, and on board tankers. During the time a tanker is discharging, fire extinguishers must stand ready on the pier.

CONSULS: No local representation.

REPAIRS: Minor repairs can be carried out.

DRY DOCKS: None available.

SURVEYORS: None available; no Classification Society is represented at the port.

GANGWAY/DECK WATCHMEN: None available.

OPENING/CLOSING HATCHES: Opening and closing of ship's hatches is normally carried out by stevedores.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agent about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

CARGO GEAR: Loading and discharging effected by ship's gear. 6 mobile cranes, between 3.5 tons and 15 tons, are available from the Port Administration, as well as 17 forklifts (between 2 and 15 tons) owned by Port Administration and shipping Agents.

AIRPORT: Branti airport situated about 34 km. from Panjang. Regular (domestic) flights, Tanjungkarang–Jakarta v.v. 4 times daily.

TIME: GMT plus 7 hours.

HOLIDAYS: Fixed dates are: New Year (1st January); Independence Day (17th August) and Christmas Day (25th December). Other holidays: Idhul Adha, First of Muharram, Maulid of the Prophet Mohammad, Good Friday, Christ's Ascension, Mi'radj of the Prophet Mohammad and Idhul Fitri (2 days).

POLICE/FIRE: Telephone 31.491 (Harbour Police). 31113 or 52741 (Fire Brigade).

TELEPHONES: No arrangement exists for placing telephone on board.

SERVICES: No special service available.

SHORE LEAVE: Crew members are allowed ashore.

INDENTIFICATION CARDS: Shore passes needed, obtained via Agents.

DELAYS: Normal expected delays due to shortage of berthing facilities and rainy weather.

DEVELOPMENTS: 3 big companies (Government-owned and private) are making preparations for construction of cement-grinding factory, molasses-tanks, offices and godowns, all located on the North side of the harbour.

Quay D is planned to be extended with another 200 m. pre-stressed concrete quay, and additional transit sheds.

GENERAL: The port's status is general exports (rubber, coffee, pepper, timber, cattle fodder, corn, etc.)

Charts and nautical publication concerning this port are issued by the Indonesian Naval Hydrographic Office (HIDRAL).

Port security is maintained by the State Police.

All Government offices in the port (Except Customs) keep working hours as follows: Monday to Thursday 0730 – 1430, Friday 0730 – 1100, Saturday 0730 – 1330 (The Customs 0700 – 1600 hrs.)

Regular ferry-boat service, plying the Panjang-Merak (Jawa v.v. route, is held by 2 PJKA vessels, twice daily. Another ferry service on the same line is held at Serengsem (2 km. to the South of the port) by 4 ro-ro type ferry boats, the frequency is 5 times daily.

AUTHORITY: Port Administration of Panjang.

PANGKALAN SUSU: 04.07 N. 98.13 E.

PILOTAGE: Pilot obtainable.

TUGS: 2 tugs available, each of 400 h.p.

ANCHORAGE: Suitable anchorage for vessels up to 40,000 d.w.t. at outer bar.

BERTHING: Alongside wharf max. draft 5 m., overall length 95 m. Depth at low water spring 3 m.

TANKERS: Pertamina/Japanese Terminal: A single buoy mooring situated 17 km. offshore in 15 m. depth of water. Mooring designed for vessels up to 150,000 tons. Loading rate 3,000 t.p.h.

SHIPMASTER'S REPORT: December 1978.

Location: 04° 13′ 05″ N., 98° 24′ 30″ E.

Time: GMT plus 7 hours.

General: Normally weather is fair with moderate variable winds. But from November to March there are very often very strong North-easterly winds together with heavy rain showers and thunderstorms. There are 2 tides a day, following the coast-line. The current on flood tide sets from N-buoy to S-buoy, the ebb tide sets from S-buoy to N-buoy. The depths around the SBM inside of these buoys are between 18 to 25 m. Vessels up to 100,000 d.w.t. are berthed at the SBM. The density is approximately 1023.

For approaching B.A. Chart No. 1353 is used. The Operator of the Terminal is Pertamina, Pangkalan Susu.

Navigation: Agent in Pangkalan Susu is Pertaminaship. Cable address is Pertaminaship Pangkalan Susu. ETA cables should be sent 72, 48 and 24 hours prior to arrival. First ETA should include the requested cargo.

Pangkalan Susu Radio belongs to Pertamina. Call sign is "PKBZ". Frequency 6456.5 kHz, calling band 6 mHz. The working hours are from 0700 to 1900 hrs.

VHF Channel for calling (Susu Radio) Ch. 16, working Ch. 12, 19, 20 and 24 for information. No radio pratique.

On arrival vessel has to anchor 2 miles East of SBM. At the anchorage the Pilot boards with the Loading Master and 7 crew, after the vessel is cleared by the Port Authorities. All stay on board to assist berthing and connecting cargo hose, and vessel has to supply food and accommodation. Regarding food – they are all very strict Moslems. They will also stay until the loading operation is completed.

Pilotage is compulsory (Government Pilot). A vessel will berth only during daylight, but unmooring day and night. After which the vessel has to anchor to await cargo papers.

Vessel must arrive with sufficient clean ballast for berthing at the SBM. Pilot ladder only is required.

Berthing at the SBM is normal SBM procedure with messenger rope from the vessel to pick up 1 rope only from the SBM. Then 3 ship ropes, eyes going from the vessel to the SBM and then back to the vessel again. During the vessel's stay at the SBM one tug is made fast with the ship's rope aft and the tug keeps the vessel clear of the SBM.

Tugs: Three tugs are used as follows:

1 tug 300 h.p. for floating hose.
1 tug 300 h.p. for line handling during mooring.
1 tug 1,700 h.p. for towing the vessel off the SBM and keeping her clear during the whole operation.

Steam turbine vessels have to run their turbine with 3–5 revs astern during their stay at the SBM and the tug aft.

Wharves/Buoys: SBM Pangkalan Susu is situated on Lat. 4° 13′ 05″ N., and Long. 98° 24′ 30″ E. and has a diameter of 15 m. and a height of 4.4 m. The buoy is an orange colour and has a red light with 3 long flashes, also 1 floating hose with 12 in. diameter. The SBM is used for export production of Katapa Crude and North Sumatra Crude. Four buoys are situated around the SBM within 1,000 m. of the SBM. Their positions are as follows:

"N"–Buoy	Lat. 4° 13′ 38.5″ N.,	Long. 98° 24′ 30″ E.
"S"–Buoy	Lat. 4° 12′ 40.0″ N.,	Long. 98° 24′ 30″ E.
"E"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 25′ 30″ E.
"W"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 23′ 57″ E.

The depth of water is between 18 m. and 25 m. in this area.

Repairs/Dockyards: No repairs possible.

Supplies/Service: Provision supply possible. But no bunkers, water, deratting certificate, no Consuls, crew change or medical treatment available.

Cargo Operations: Terminal Operator is Pertamina, Pangkalan Susu. Cargo information can be received on Channel 19. Other informations on Channel 16 (Susu Radio) 19, 20 and 24. Loading rate 2,000 t.p.h., but can be reduced to 1,600 c.b.m. when necessary for topping tanks. One ×12 in. cargo hose is connected from SBM to ship's manifold, for connections, ship's derrick is used on portside with minimum 5 tons load (SWL). Seven crew with Loading Master assist for connecting the hose.

API=50.0 Temp.=85°F

One hour and again half-hour before completion of loading the Loading Master is to be informed. He will then stand by for stopping the cargo. All papers are typed on board the vessel and vessel has to supply typewriters, two if possible, to reduce the waiting time. After completion of loading the vessel will anchor about 1 mile off the SBM to wait for the cargo papers to be completed (about 2 to 3 hours).

Rescue/Distress: No salvage or Coast Guard available.

Port Authority: The vessel has to anchor about 2 miles off the SBM and the Custom Officials, Immigration, Quarantine Officer and Agent will board the vessel at the anchorage, about 12 persons in all. The authorities also clear the vessel if she is also bound for Kuala Beukah. For clearance the following are requested:

12 Crew Lists; 2 Vaccination Lists; 3 Stores Lists; 3 Crew Effects Lists; 1 Health Declaration; 1 Ship's Health Book for Indonesian Ports only, if not on board it will be issued by the authorities.
Approaches: The approach is very easy. The coast line gives a very good picture on the radar for navigation. But it is very difficult to pick up the SBM on the radar due to many fishing boats and fishing houses. The fishing boats will also interfere with the approach, especially during the night, many of them are showing no lights, until the vessel is very close.

PANGKALBALAM: 02.06 S. 106.08 E.

DOCUMENTS:
Register Book.
Load Line Certificate.
Deratisation Certificate.
Harbour Report.
Radio Certificate.
Nationality Certificate.
Safety Equipment Certificate.
Port of Call List.
Last Port Clearance.
Light dues payment.
Health Book.
6 copies Crew List.
3 copies Store List.
6 copies Passenger List (if any).
Navy Book.
Next Port Manifest from every port.
All loading Custom paper from every port.
Vaccination Certificate.

PILOTAGE: Not available.
ANCHORAGE: Safe anchorage at green buoy, 10 m.
RESTRICTION: No night entry. No anchoring at Eliot (red buoy).
MAX. SIZE: Length 140 m., breadth 30 m. Only steamers drafted 8 ft. allowed to discharge alongside the quays.
RADIO: Port radio station. Working times 0800–1300 hrs. except Sunday. Call sign PKC7.
TUGS: 1 tugboat available owned by P.N. Djakarta Lloyd for communication between shore and ships. Capacity 120 h.p.
BERTHING: Near green buoy, and as near as possible to shore. Sounding 10 m. Only small vessels 8 ft. draft alongside quays.
STEVEDORES: Ordered by Agent.
MEDICAL: Facilities available.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle per man.
IDENTIFICATION CARDS: Not necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: None.
REPATRIATION: Not available.
AIRPORT: Airport service by regular airlines 6 times per week.
HOLIDAYS: On Moslem holidays, no cargo work.
POLICE/AMBULANCE/FIRE: Police 386 SM; Ambulance 444 Otm; Fire 39 LB.
SHORE LEAVE: After permission by Chief of Immigration.
REGULATION: Every ship on arrival must be passed by; Customs, Harbour Master, Police Maritime, Health service and Chief Immigration.
DELAYS: Due shortage of lighter space.

POLENG: 06.39 S. 112.55 E.

SHIPMASTER'S REPORT: April 1978.
LOCATION: The Poleng Terminal consists of the tanker "Lynda" moored stern first to an SBS. The "Lynda" is a tanker of some 72,000 d.w.t. and is 5 years old. The position of the "Lynda" is 06° 38′ 42″ S., 112° 55′ 23″ E.
PILOTAGE: Performed by the Master of the "Lynda".
ANCHORAGE: The anchorage position is anywhere North and West of the "Lynda" distance 1 mile. The depth of water is 26 fathoms and 9 shackles of cable is recommended.
RESTRICTIONS: The "Lynda" is moored in 180 ft. of water and there is no restriction regarding the draft or the size of ship that she can accommodate alongside.
RADIO: The Post and Telecommunications Department do not permit the use of the WT/RT on the "Lynda" so all ETA's are sent via Pertaminaship Jakarta.

Once the "Lynda" receives the ETA they then organise the 'opening of the Port' and the officials to clear the ship are ordered from Surabaja. The usual documents are required and 2 Agents come out with the officials.
VHF: The "Lynda" keeps watch on Channel 6 and only monitors Channel 16 when a vessel is expected.
BERTHING: The "Lynda" has 4 "Yokohama" type fenders on her port side for berthing. Six ropes are required at each end. Berthing is port side alongside.

The "Lynda" is loaded direct from the well and the API is 55 with a loading temperature of 84°. Normally, the API is 42-47. The pumping capability of the "Lynda" is 2,000 t.p.h. although we were only able to get 1,557 t.p.h. The cargo is loaded through 1×12 in. hose.

Prior to loading the tanks on the "Lynda" are ullaged in the presence of the Customs and the cargo calculated. This is repeated at the end of the load for the Bill of Lading figures. Clearance is granted from Poleng and all documents are signed prior to sailing. There being no early departure available.

At present they are receiving 1 ship about every 2 months, mainly topping-off operations and it is thought that the vessel may be moved to another position.
FRESH WATER: Not available.
FUEL: Not available.
STORES: Not available.
GENERAL: No Walport film exchange. All shore personnel are accommodated aboard the "Lynda". Some vessels have parted their mooring lines during the Winter months with winds of 25 knots and 8-18 ft. seas running.

POMALAA (Tandjong Lepee): 04.14 S. 121.32 E.

(See Plan Book)

LOCATION: Port of Pomalaa, Kolaka, is situated in the Gulf of Bone, S.E. Sulawesi in position 04° 10′ 30″ S., 121° 36′ 00″ E.
LOADING POSITIONS:
Berth: 04° 10′ 30″ S., 121° 35′ 56″ E.
Anchorage position for ore loading at Pomalaa: Vessels of 15,000 d.w.t. and over, 04° 10′ 00″ S., 121° 35′ 24″ E. Vessels up to 15,000 d.w.t., 04° 10′ 06″ S., 121° 35′ 30″ E.
Anchorage position for ore loading at Tanjung Leppe: 04° 13′ 38″ S., 121° 32′ 31″ E.
FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessels numbers; Quarantine & Immigration Flag.
DOCUMENTS: To be produced upon vessel's arrival:
14 Crew Lists
4 Passenger Lists
5 Parcel Lists
5 Store Lists
8 Cargo Manifests
3 Narcotics Lists
5 General Information
5 Personal Effects Lists
5 Vaccination Lists
5 Fire Arms & Ammunition Lists
International Load Line Certificate
Maritime Declaration of Health Certificate
Health Book or Bill of Health
Derating Certificate
Last Port Clearance
Safety Radio Certificate
Harbour Report.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books and crew list and issues shore passes.
PILOTAGE: Pilotage is not compulsory and there is no Pilot at Pomalaa. Because Pomalaa waters are still declared as uncleared waters, it is advisable that vessels calling for the first time at Pomalaa, use a Pilot.

Pilot can be ordered from Ujung Pandang via Nikel Ujung Pandang not less than 72 hours before vessel's arrival at Pilot station.

There are 2 Pilot stations: (1) For Pomalaa loading point and berth, 04° 04′ 03″ S., 121° 28′ 00″ E. (2) For Tanjung Leppe loading point, 04° 15′ 00″ S., 121° 29′ 00″ E.

If vessel wishes to be piloted to the loading/unloading point on arrival day, vessel has to arrive at Pilot station before 1200 hrs. local time for Pomalaa loading point and berth and before 1400 hrs. local time for Tanjung Leppe loading point.
RESTRICTIONS: *Arriving/Departing hours:* Arrival: from 0600 – 1800 hrs. local time. Departure: 1. Pomalaa loading point and berth: from 0600 – 1600 hrs. local time. 2. Tanjung Leppe loading point: from 0600 – 1800 hrs. local time.

Mooring: The undermentioned vessels can be moored alongside beerth: General cargo vessels of max. LOA 135 m. and tankers of max. LOA 110 m.

Depths: Bar channel 11.00 m. (LWS); Alongside berth, North Pier, 5.00 m. (LWS); South Pier, 7.00 m. (LWS). At Pomalaa anchorage or loading point: for vessels of 15,000 d.w.t. and over – 13.00 m. (LWS); for vessels up to 15,000 d.w.t. – 11.00 m. (LWS). At Tanjung Leppe anchorage or loading point – 24.00 m. (LWS).
MAX. SIZE: *General Cargoes:* At North Pier: LOA not to exceed 135 m. and fully loaded draft not more than 5.00 m. At South Pier: LOA not to exceed 135 m. and fully loaded draft not more than 7.00 m.

Tankers: LOA not to exceed 110 m. and fully loaded draft not more than 7.00 m.

Ore Carriers: Fully loaded draft not to exceed 11.00 m. Vessels without cranes or derricks are not acceptable. Minimum capacity of cranes or derricks must be 5 tons.

General Cargo at Anchorage: Fully loaded draft not to exceed 11.00 m.
RADIO: Cables to Nikel Ujungpandang can be sent through Ujungpandang (Macassar) Coastal Radio Station, call sign PKF.

Arrival Notice: Information required.

Owner's advice: Owner to advise by cable to Aneka Tambang

Jakarta and Nikel Ujungpandang at least 8 working days before vessel's arrival at loading port.

Master's advice: At least 48 hours (or 72 hours if Pilot's assistance required) before vessel's arrival at Pomalaa waters, Master shall give the following informations to Aneka Tambang Jakarta and Nikel Ujungpandang. Last port of call, draft on arrival, estimated draft on departure, quantity of nickel ore or ferro-nickel ingots to be loaded, stowage plan (hatch division for the respective cargo), quantity and kind of commodity(ies) to be discharged and other necessary messages. Final amended arrival time must be sent at the latest 24 hours before arrival. Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call in due time, therefore Nikeel Ujungpandang waits for the Master's telegram in order to make necessary preparation.

Shipper/Agent's advice: Shipper/Agents shall cable the Master 3 working days before vessel's arrival indicating the loading/unloading position prepared and other necessary messages.

Priority: Ore carriers. First come first served. Other vessels: Priority to be given to tankers.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING: The wharf consists of a concrete quay extending 70 m. seaward and 18 m. breadth.

Loading/Unloading facilities for general cargoes:

Shore facilities: A number of mobile cranes with capacities of 5, 20 and 40 tons are available, also forklifts.

Lighters: A number of lighters of 70 d.w.t. up to 120 d.w.t. are available.

Loading/Unloading capacity: About 12 tons per gang per working hour, depending on the type of vessel, available cargo spaces, vessel's cargo gear, kind of cargoes, size of hatches, etc.

Unloading facilities for tankers:

Pipe-lines: 1 line of 10 in.×1,600 m. for M.F.O.
1 line of 8 in.×1,600 m. for I.D.O.

Pumps: 3 booster pumps with capacity of 150 cu.m./h. each.

Hoses: 4 pieces flexible hoses of 10 in.×9.40 m. with ASA 150 flanges connections.

Unloading capacity: maximum 200 t.p.h. by ship or shore pumps.

Tank farm capacity: 2×5,000 KL for M.F.O.
1×1,500 KL for I.D.O.

Tank cleaning: Tank cleaning operation is not allowed in Pomalaa waters.

Lay-time: Lay time shall commence 6 hours after N.O.R. tendered.

Loading facilities for ore carriers:

General: Loading of nickel ore at Pomalaa and Tanjung Leppe loading point is done by means of barges.

Number of gangs: Usually 4 gangs are used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading capacity: About 2,000 tons/24 hours per vessel, depending on the type of vessel, vessel's cargo gear, weather conditions, etc.

Unloading: Cargo for Aneka Tambang only.

Vessels without cranes or derricks are not acceptable.

Labourers will be supplied by shipper. Making the vessel ready for loading/unloading to be done by vessel's crew members.

STEVEDORES: Stevedoring is performed by P.T. Aneka Tambang's personnel. Loading/unloading equipment to be furnished by the vessel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours Sunday and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Independence Day (August 17th); Christmas Day (December 25th). Idul Adha, Maulid Day, Easter, and Lebaran determined by Moslem calendar and differ from year to year by international calendar. For definite dates consult Port Administrator.

Despatch/demurrage money to be paid in accordance with the related contract.

Loading/unloading to be effected with customary quick despatch (C.Q.D.) on good weather working days whereby Sundays, holidays, governmental local holidays and Saturdays between noon and midnight and Mondays between 0000 hrs. and 0800 hrs. are always excepted.

At Shipmaster's request, work on these excepted days can be arranged. The principals will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation services available.

FRESH WATER: Can be supplied alongside and at anchorage by 40-ton water barge.

FUEL: Not available.

TIME: GMT plus 8 hours.

CONSULS: None.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

REPATRIATION: Can be arranged. Repatriant is to be guarded by Immigration Officer from Pomalaa to Jakarta via Ujung Pandang until his departure from Jakarta to the destined country.

AIRPORT: There is a daily flight between Ujung Pandang and Pomalaa, served by Merpati Nusantara Airlines (MNA) using Twin Otter Planes. Flying time about 60 minutes.

GENERAL:

Cash advances: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Survey on/off hire: Can be arranged.

Ship's Chandler: None. In emergency cases, for a limited quantity Agents can act as ship's chandler.

Chart: Indonesian Sea Chart No. 152.

Nature of bottom: Sand and soft materials.

M.P.S. Tax: So called M.P.S. Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the general Agents, Jakarta at the same time as the remittance of advance payment as stipulated below.

The amount of M.P.S. Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the principals, if possible a few days before principal remits advance payment for disbursements. The final calculation of the M.P.S. Tax will be made later.

Disbursements: Advance payment for ore carriers: At least 14 days before vessel's arrival at Pomalaa, vessel's principal have to remit US$3,000 to the account of PT Aneka Tambang Jakarta as General Agents, at Bank Dagang Negara Gambir Branch Jakarta (Telex: BDN GB JKT.44432 Jakarta), as advance payment of the related ship's disbursement, and inform PT Aneka Tambang Jakarta and Nikel Ujungpandang about the remittance accordingly.

Advance payment for general cargo: A reasonable amount to be remitted to the same address and following same procedure as above.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related principals through the vessel's Disbursement Account Statements.

SHORE LEAVE:

Shore pass: Shore pass must be carried by crew whilst ashore.

Visitors: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Visiting Kolaka: Crew members are prohibited to leave Pomalaa for Kolaka, except Master and Officers, who must be guided by Agents. Local leave in Pomalaa concession is permitted.

Shore leave hours: From 0600 hrs. to 2300 hrs. local time.

SHIPMASTER'S REPORT: 1976.

Tandjong Lepee is only an anchorage port, being a convenient outlet for the shipping of Nickel Ore in bulk, the operation being based on Pomalaa, about 5 miles away, where the Mining Company plant etc. is situated.

Charts: B.A. Chart No. 3616 is quite inadequate for approaching either Pomalaa or TG. Lepee, Japanese Chart No. 903 is better, while Netherlands Chart No. 152 is the best.

Documents:

6 Crew Lists.
4 Vaccination Lists.
2 Customs Declaration of Crew Effects.
2 Bonded Stores Lists.
1 List of Favour Parcels (including a Nil declaration).

Last Port Clearance and Derat. Certificate to be produced together with usual Safety, Loadline Certificates, etc. Port Health Doctor brings Health Declaration Form on arrival. 'Q' Flag must be flown until pratique granted.

Pilotage: No Pilots available, a small tug meets the vessel in a position about 1.5 miles West of Tandjong Pakar, in approx. Lat. 4° 14.5′ S., Long. 121° 30′ E. The Agent and officials board from the tug (accommodation ladder only) and the tug then leads the vessel into the anchorage.

From the above rendezvous position, a course of 055° for 1.5 miles will lead between 2 beacons marking reefs N.W. of Tg. Pakar. Right ahead on this course will be sighted another beacon to the North of Tg. Pakar, when this beacon is about 9 cables off, course should be altered to 090°, and about 8 cables from here should then bring the vessel to the anchorage position, half-way between 2 beacons approximately 6 cables apart.

Beacons are only thin posts about 4 m. high with small top marks similar in appearance to half of a 200 litre oil drum painted white, they are quite difficult to pick up under the best of conditions. Would not recommend making an approach at early morning if sun is shining, once the sun is well up the reefs themselves show fairly well, especially at LW. There are no navigational lights in this area, beacons do show up on radar at short range, but due to the possibility of local fishing boats being present, too much reliance should not be placed on radar detection of beacons for night navigation.

At Master's request, each can, can be prepared with light for departure at night time.

Radio: Macasser Radio (Ujung Pandang). The Mining Company have telex link with Jakarta. No VHF communication here.

Tugs: One tug of 800 h.p., 2 tugs of 175 h.p. mainly used for towing barges, and 1 ferry for crew service.

Medical: There is a hospital at Pomalaa, which is reputed to be well equipped.

Stevedoring: Mining Company supply competent crane drivers to operate ships' cranes and grabs, to load Nickel ore in bulk from barges. There are 12×80 ton barges, 2×120 ton, 1×200 ton flat top barge and 1×300 ton coaster available, this 'fleet' is divided according to requirements between a vessel working at Pomalaa and one working at Tandjong Lepee. At Tg. Lepee there is a barge loading conveyor capable of handling 4,500 tonnes per 24 hours. A similar loader exists at Pomalaa, and if there is no ship at Pomalaa, this is also used to feed cargo to Tandjong Lepee.

Stowage Factor of the Ore is declared as 0.7 cu.m./tonne (approx. 25 cu.ft./ton) but during a dry spell stowed at about 30 cu.ft./ton with an angle of repose over 45° and became very compacted, even reluctant to fall out of a wide open grab. The ore has mainly the appearance of coarse soil with a few stones and small rocks mixed in.

Fresh Water: Can be supplied by barge in 40 ton tanks, but ship must provide pumping facility.

Communications: One flight daily, served by Merpati Nusantara Airline between Pomalaa and Macasser. Repatriation can be arranged in emergency.

Shore Leave: Permitted, official shore passes provided, which must be returned prior to departure.

SHIPMASTER'S REPORT: December 1978.

ETA's: Our first ETA and request for a Pilot was sent on leaving Singapore, as per charterers' instructions. Macassar Radio, which is recommended by the Nickel Company, could not be raised by the Radio Officer, so our first ETA was sent via Jakarta Radio. This telegram never reached the shippers, so I would strongly advise against using Jakarta Radio in the future.

Our second ETA was sent via Macassar Radio 48 hours prior to our arrival off Pomalaa. This cable took some 30 hours to reach the shippers and by the time they acknowledged it, vessel was only 12 hours from Pomalaa. Since the first cable had still not reached them, the shippers had not arranged a Pilot but asked if I was prepared to be led into Pomalaa by a tug from the Nickel Company. They were doubtful, they said, whether they could arrange for a Pilot to be flown across from Macassar for the morning of our arrival.

Since our third ETA had already been sent off 12 hours previously I replied to this cable that I requested the Nickel Company to do their best to arrange a Pilot as the vessel had never visited the port previously and had only a poor photostat copy of the chart of the area. Nothing more was heard from the Shippers before our arrival off Pomalaa, so we arrived not knowing whether there would be a Pilot waiting for us.

Pilotage: There is no British Admiralty Chart of Pomalaa and Approaches, the best chart available being Indonesian Sea Chart No. 152. We were supplied with a very poor photostat copy of this chart by the charterers' Agents in Singapore which did not show very clearly the extent of the reefs in the approaches to Pomalaa. Both ports are surrounded by numerous reefs and arrival or departure during hours of darkness is not to be recommended, particularly in view of the fact that there are no lights at all marking these reefs and radar cannot be relied on too heavily to locate the beacons marking them. Similarly, arrival or departure in rough seas is not to be advised. Vessel arrived off Pomalaa at around 2200 hrs. and with the sea conditions being flat calm at the time, we drifted about 12 miles off the entrance until daybreak. The pilot station for Pomalaa is in position Lat. 04° 04′ 03″ S. Long. 121° 28′ E. which, as will be seen from the plans in the 1977–78 edition of the "Guide" is well inside the islands. Admiralty Sailing Directions were closely followed when proceeding in to the pilot station and no problems were encountered. The echo sounder was run constantly during this period and recorded depths tallied closely with those charted. The passage recommended in the sailing directions keeps the vessel in deep water at all times. Tidal streams in the approaches appear to be very weak.

The vessel was met outside the islands by a tug from the Nickel Company which provided us with an original copy of Indonesian Chart No. 152 and a plan of the anchorage area. The tug's crew did not know whether a Pilot would be coming out to us or not, but offered to lead the way into the port. We proceeded at slow speed, with a deck officer standing-by forward throughout, in towards the pilot station, arriving there at around 0900 hrs. After only a few minutes of following the tug I decided to follow the Admiralty Sailing Directions and the chart which I had just received, as the tug had a habit of forgetting that we were very much deeper drafted than himself, and kept cutting corners when passing the shoals and reefs.

Seeing no sign of the pilot boat in the channel and with weather conditions being so ideal, I decided to proceed very slowly up channel to the designated anchorage of which I now had a plan. No problems were encountered and plenty of water was found in the centre of the channel. Had I decided against proceeding without a Pilot I would have had to take the vessel out to sea again and drift off, as anchorage in the vicinity of the pilot station is out of the question owing to the depth of water and the unevenness of the sea bottom. The reefs are nearly all marked by stick beacons with white cans on top and under certain weather conditions could easily be missed. Conditions at the time of our arrival, however, were ideal and no difficulty was encountered in spotting the various beacons as we proceeded up channel.

The Pilot eventually arrived at 1045 hrs., too late to be of any assistance to me, as by that time we were approaching the anchorage area. Vessel eventually came to anchor in the designated area shown on the chart. She lay quietly to 3 shackles in 12 m. of water for the 3 days of our stay in Pomalaa. The holding ground is good there and the anchorage is somewhat sheltered.

The passage from Pomalaa round to Tanjung Leppe was made again without a Pilot, owing to the difficulty in obtaining a Pilot without plenty of prior notice. The draft leaving Pomalaa is restricted to about 10 m. owing to the fact that there are several 11 m. patches in the anchorage area. Anchor was weighed at daybreak and the same route was used to leave as was to enter. As will be seen on the plan in the "Guide" there are other channels marked leading down to Leppe, but I personally would not recommend them. The safest route by far is to go out around the outside of Padmarang again and approach Tanjung Leppe in deep water from the West. The anchorage at Leppe is much more restricted than that at Pomalaa and is far more exposed to Westerly winds. Holding ground is again good but several anxious hours were spent on the bridge during the 5 nights we were anchored at Leppe when rain squalls from the West passed over the ship. There is about 25 m. of water at the Leppe anchorage, so there is no draft restriction on leaving, but with the anchorage being so exposed to the West there is quite a heavy sea running at times.

I would recommend that any vessel calling at these ports in the future do their best to obtain Indonesian Chart 152 in advance. I was able to purchase the copy which they provided me with from the Nickel Company.

Loading: Loading of the nickel ore is from barges at both ports. There is a total of 14 barges available for use between the 2 ports, but during vessel's stay there was a Japanese ship also loading nickel ore, so the barges had to be shared between the 2 ships. Thus, at no time were there ever more than 7 barges available for our vessel's use. The barges range in capacity from about 80 tonnes to 200 tonnes, with most of them around the 100 tonnes mark. The barges at both ports are loaded by a small conveyor. It is capable of pouring at a max. rate of 150 tonnes per hour. Thus, once cargo has been started, the max. loading rate is around 3,600 tonnes per day. Since vessel is capable of loading at a much faster rate than this, long delays were experienced waiting for barges to be filled ashore.

Loading Master lives aboard throughout the loading, together with his assistant. The Loading Master and his assistant have walkie-talkie VHF sets for communication with the shore. The figures given to us by the Loading Master each day for cargo loaded did not tally with the figures obtained by the chief officer from draft surveys. The stevedores' figures are based purely on the number of barges loaded and since they have no real idea of what each barge holds are largely guess work. Draft surveys were conducted by the chief officer on arrival and departure and it is his figure which decides the Bill of Lading quantity. Basically the ship is just loaded until the chief officer says she's full and everybody seems agreeable to accept the figure he gives them. To obtain an accurate figure as to what has been loaded in each hatch is thus virtually impossible. Stowage factor of the nickel ore was found to be around 33 cu.ft. per tonne and not 28 cu.ft. per tonne as claimed by the stevedores. This may of course be attributable to the fact that there had been little rain in Pomalaa for several weeks prior to vessel's arrival.

Tyre fenders were employed by the ship to prevent the barges from scraping against the ship's side, but the stevedores do provide some floating wooden fenders for this purpose. Despite these precautions a certain amount of chafing did occur, and on one occasion a barge landed heavily against the ship's side causing an indentation in the shell plating. The stevedores are reluctant to accept responsibility for damage caused but on this occasion were persuaded to sign a letter acknowledging liability. Most of the stevedore damage was repaired to our satisfaction prior to departure.

The crane drivers provided by the stevedores are quite competent and few worries were experienced by the ship in this respect. Cargo is worked 24 hours a day although little cargo is actually loaded during the night, only 1 crane normally being employed during hours of darkness. The stevedores were found to be generally co-operative, especially with regards to trimming the cargo out into the wings.

Medical: There is a hospital with limited facilities in Pomalaa, which is operated by the Nickel Company. It provides adequate medical attention. Crew inoculation can be arranged and the Doctor, who is also the Port Health Officer, is licensed to issue Derat Exemption Certificates, as he did for our vessel.

Shore Leave: Shore passes are issued by the immigration authorities to each member of the crew. Shore leave is permitted, although there is little to see in Pomalaa and Tanjung Leppe. A free boat service is offered by the Agents, but few members of the crew took advantage of this.

Seamen visiting Pomalaa after dark are advised not to venture into the native village, for fear of being attacked and robbed, a not uncommon occurrence in the port. Crew may, however, visit any of the establishments within the Nickel Company's compound where limited recreational facilities are available.

Communications: There is no communication by Marine VHF in the Port of Pomalaa. Walkie Talkies are used by the stevedores for ship-to-shore communication, but it is not possible to call the Agents office on these sets. There is a telex link with Jakarta only, so all outgoing telexes are subject to long delays. Use of the ship's radio equipment is expressly forbidden at both anchorages.

Agency: Difficulties were experienced due to language problems. Very little English spoken.

AGENCY:

General Agent for Ore Carriers: PT Aneka Tambang (head office). Jalan Bungur Besar 24–26, PO Box 2513, Jakarta, Indonesia. Cable address: Anekatambang Jakarta; Telex Antam JKT 46323; Telephone: 360011 – 360019 – 360027 – 360035.

General Agent for Non-Ore Carriers: To be nominated by principals.

Sub-Agents: PT Aneka Tambang, Unit Pertambangan Nikel, Pomalaa. Jalan Dr. Sam Ratulangi 60, Ujung Pandang, Indonesia. Cable address: Nikel Ujungpandang. Telephone 22237 – 22234.

PULAU SAMBU: 01.09 N. 103.54 E.

DOCUMENTS: Upon arrival ships have to fill in the following forms:
Harbour Report (obtainable from the boarding Pilot).
Pilot Certificate.
Also required from the Masters are:
6 copies of Crew List.
1 copy Stores List.
1 copy Personal Effects List.

PILOTAGE: Pilots are in Government Service. Pilot signals according the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agent. Pilot boards in position 1° 10′ 38″ N., 103° 52′ 12″ E.

RADIO: Vessels calling at Pulau Sambu for bunkers should communicate with PKC 2 Pladju Radio or Tunasix Singapore, or direct with Sambu Radio PKJ 51 (A3 Radio Telephone) and VHF Channel 19.

HEALTH: Vessels arriving from abroad have to fly the "Q" Flag (yellow flag) until boarded and released by the Quarantine Officer. Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:
Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

TUGS: Available.

BERTHING: Pulau Sambu has an excellent location 8 miles South of Singapore and approximately 3 miles from the International waterway. It has 2 deep water jetties with a max. depth of 36 ft., a max. length of 440 ft., and the length of the navigable channel is 1,500 ft.

FUEL: Ideally, it is necessary to advise suppliers of bunkers required at least 15 days before the ETA of the vessel. The authorities at Pulau Sambu also require the vessel to contact them 24 hours prior to their ETA.

Bunkers available: Fuel Oil, 1000 seconds, and MDO.

CUSTOMS: Masters have to declare all local currency on board. It is strictly prohibited to take local currency ashore. No limitation for foreign currency.

Master should consult the Agent about prevailing Customs regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and fines.

AUTHORITY: Department of Sea Communications.

SABANG: 05.50 N. 95.20 E. (See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Health Book or Bill of Health and vaccination certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists with vaccination dates.
Ship's Articles.
Stores List.

Passport or seaman's card remain in Immigration office until cleared and the crew to use shore pass to go on shore, issued by the Immigration.

PILOTAGE: *Approach:*
Vessel should steer on the light of Klah Island and keep at least 1 mile offshore, especially of Ujung Masam owing to an inward drift, until the bay is well open. When entering the bay, the light-buoy South of Ujung Lho Me should be kept on port side.

The Signal Station at Peunimpun reports day and night the arrival of ships, by night an unofficial white light, showing all around is shown, visible at a distance of 12 miles.

Signals by day with flags according the International Code of Signals and by night by signal lamp.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the Port. The provisional free pratique is only valid for this Port, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

RADIO: Sabang Radio. Call sign: PKA. Frequency: 500 kc/s./438 kc/s. Time: 0100–0200, 0400–0500, 0900–1000 GMT. 8473 kc/s./8686 kc/s. Time: 0200–0230, 1000–1030 GMT. 17184.5 kc/s. Time: 0230–0300, 1030–1100 GMT. VHF – Available. Power – 1 KW.

TUGS: A small tug available for mooring assistance, subject advance notice.

BERTHING: The usual anchorage in the inner roads is the North side of the bay, vessels can approach shore until in 32 and 29 m. depth. There is good holding ground. During S.W. or S.S.W. squalls in the West monsoon vessels have to be kept free from the quays by means of the mooring buoys moored off the berths.

Western coal wharf, usable berth length 140 m. with depths alongside of 7 m. at LWS.

Eastern coal wharf: usable berth length 150 m. depths 6.8 m. at LWS.

Commercial wharf, usable berth length 150 m. depths 8.0 m. at LWS (length: 220).

At the head of the oil jetty there is a depth of 10 m. at LWS.

FRESH WATER: Available, rate 30 t.p.h. with one hose. Usual to use 3 hoses. Water can be pumped faster if additional water pump used.

FUEL: Available from Pertamina, Jakarta if permit obtained.

REPAIRS: Minor repairs can be carried out at the West end of the Coal Wharf at the repair shop and electrical power station.

CUSTOMS: It is recommended that Masters consult the Agents about the local prevailing Customs Regulations, with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: Five domestic flights a week, 15 minutes drive from the Harbour.

AUTHORITY: Department of Sea Communication.

SALAWATI: 01.21 S. 130.59 E. (See Plan Book)

OPERATORS: Pertamina – Phillips Petroleum Co. Indonesia.

LOCATION: Phillips Salawati Marine Terminal is located in the Sele Straits between the Island of Salawati and mainland Irian Jaya, Indonesia

Salawati Marine Terminal Office is located on board the storage barge "Wampum" adjacent to the export tanker mooring.

Mooring system is positioned in Latitude 1° 21′ 18″ S. and Longitude 130° 58′ 39″ E. The minimum water depth in the area of the mooring system is 51 ft.

FLAGS: In accordance with practice in Indonesian Ports, Quarantine, Immigration, Pilot and call sign flags must be displayed by all vessels approaching the anchorage. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

Sunrise to sunset:	Quarantine Flag "Q"
Sunset to sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

DOCUMENTS: Indonesian Immigration, Customs and Harbour Master officials will board the vessel after it is all secured to grant clearance.

After the tanker is all secured, the Customs Officer will board the tanker to seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo on board the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Salawati is granted.

The Harbour Master submits a Harbour Report Form for the Master to complete. The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Cargo Gear Certificate and Deratting/Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance on departure provided clearance is also granted by the other governmental authorities (A Panamanian port clearance for Panamanian flag vessels is not required at Salawati).

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the crew list.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Prior to the vessel's departure the Immigration Official requires 2 copies of the Crew List to be marked for departure immigration clearance. The Master is given a signed copy by the Immigration official of the Crew List for departure.

Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time

Loading Report, Certificate of Origin, Cargo Manifest and Master' Receipt for Documents/Samples are prepared at Salawati Marin Terminal. When the tanker has been loaded, the documents sha be completed and final clearance formalities will be carried ou aboard the vessel, either at the mooring or in the anchorage area as circumstances dictate.

Customs will issue the 5–B form which is for departure clearanc of the vessel.

The Master should be prepared to issue 6 copies of the Crew Lis which will be distributed as follows:

	Immigration	*Harbour Master*	*Total*
On Arrival	2	1	3
On Departure	2	1	3
			6

Before leaving the terminal area, the Master should advise the terminal the Vessel's ETA at destination.

PILOTAGE: The Salawati Terminal Pilot will board the vessel in the anchorage area for passage to the Salawati Terminal. The channe is marked with numerous Navigational Aids to permit safe passage through the Sele Strait. Vessels arriving in the anchorage area afte 1400 hrs. local time (GMT + 9 hours) will be berthed at the termina at Pilot's discretion.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use, and long enough to reach the mooring launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Mooring Master's equipment. There should be adequate lighting at night Vessels will provide a lee for the Mooring Master both when boarding and leaving.

ANCHORAGE: If requested to anchor, the recommended anchorage area is 4.5 miles West of Sorong in position Latitude 00 53′ 00″ S. and Longitude 131° 10′ 00″ E. Under no circumstance should the export tanker enter the restricted area around th structures without the Mooring Master aboard.

RESTRICTIONS: The approach channel has a minimum depth of 5 ft. A minimum under keel clearance of 7 ft. is required, restricting the maximum loaded draft of an export tanker to 50 ft.

Strength of Tide: Up to 4.5 knots.

MAX. SIZE: Salawati Marine Terminal can accept vessels up to 60,000 d.w.t. Under certain weather conditions, vessels up to 100,000 d.w.t., light loaded to the equivalent of a 60,000 d.w. vessel may be accepted. Such acceptance is at the discretion of th Area Superintendent or his designated alternate.

The ship's Master must not permit his vessel to be loaded to a depth of more than 43 ft. deepest draft due to the restrictions o water depth in Sele Strait unless permitted to do so by The Company Area Superintendent or his designated alternate.

HEALTH: Each tanker entering the port of Salawati must have requested and been granted entry permit/agency permit prior to its arrival. At the same time application is made for provisional pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities. Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If provisional pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card.

RADIO: It is most important that incoming tankers contact Salawati Marine Terminal 72 hours before the estimated time of arrival. Further cables should be sent to the terminal 48 hours and 24 hours in advance of arrival, or when ETA changes by more than 3 hours. Communications with Salawati Marine Terminal can be established using one of the following links.

(1) *Sorong Coastal Radio Station*

Name of Station : Sorong Radio
Call Sign : PKY–4

Frequency kHz	*Nature*	*Hours GMT*
6518.6	SSB	H24
4361.6	SSB	H24
8755	AM	H24
8730	AM	H24

Master should request Sorong Coastal Radio Station to relay the necessary information to Salawati Marine Terminal.

	Friday	2300–0300
	Saturday	2300–0400

Master should request Pertamina Sorong Radio Station to relay the necesssary information to Salawati Marine Terminal.

(3) *Pertamina Coastal Radio Station*

Name of Station: Jakarta Radio
Call Sign: PKI–2

Frequency kHz	*Class*	*Hours GMT*	*Keepwatch kHz*
452	A1	H24	500
8626	A1	0200–0300, 0400–0500, 0700–0800, 1030–1200, 1400–1500, 1800–2000, 2200–2300	8354–8374
12980	A1	0000–0200, 0300–0400, 0500–0700, 0800–1030, 1200–1400, 1500–1800, 2000–2200, 2300–2400	12534–12561
VHF Ch. 9/19	FM	0000–1500	Ch. 16

According to information from the Department of Sea Communication, starting on January 1978 Jakarta Radio will change working frequencies and time schedules as follows:

Frequency kHz	*Class*	*Hours GMT*
4361.6	A3	0500–0700, 0900–1100, 1400–1500, 1800–2000,
4434.9	A3	0000–0200, 1200–1400, 1600–1800, 2200–2400,
6515.4	A3	0300–0500, 0800–0900, 1500–1600, 2000–2200
6518.6	A3	0200–0300, 0700–0800, 1100–1200

Frequencies 452 kHz and VHF will not be changed.

Masters should request Jakarta Radio Station to relay the necessary information to Phillips office in Jakarta at phone nos: 341793, 342569, 346351 or by telex to Philpetco Jakarta Telex No. 46798 Filpet Ia.

Details of Arrival Cable:

The following information should be included in the cable sent to Salawati Marine Terminal 72 hours in advance of arrival.

1. Name of vessel and radio call sign.
2. ETA in GMT and date (Local time is GMT + 9 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Arrival draft.
7. If there is any sickness aboard give whatever information is available as to the possible type of sickness, or confirm that vessel has clean bill of health.
8. Last Port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could effect loading or cause pollution.
10. Flange dimension of vessel's manifold connection.

Procedure for Appointing Agent:

Owners should appoint "Pertaminaship" Jakarta, as General Agent by cable/telex which in turn will appoint Pertamina Unit V as handling Agent to attend the vessel at Salawati Marine Terminal. Pertaminaship should be notified two weeks prior to tanker's arrival.

General Agents:	Pertamina Directorate of Shipping & Communications 32/34 Jalan Jos Sudarso P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.
Cable Address:	Pertaminaship Jakarta
Telex No.:	DKT 42885 Answerback Pertamina.
Telephone:	690312 (11 lines) Ext, 225, 315, 335 & 350 (Tanker Agency & Operation)

Entry Permit or Agency Permit:

Each tanker entering Salawati Marine Terminal must have requested and been granted entry permit prior to its arrival. It is vital that the General Agent receives the following information two weeks before vessel's arrival to obtain agency permit for foreign vessel from the Government/Directorate General of Sea Communication:

1. Name of owners/principals and full address.
2. Name of vessel.
3. d.w.t./Call Sign/Flag.
4. Name of Master/Number of Crew.
5. Last Port of Call.
6. ETA.
7. Destination after loading.
8. Indonesian Ports of Call.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area. Unauthorized radio communication will be cause for cessation of all operations, except clearing of the berth, and vessel's notice of readiness will be immediately nullified.

VHF: Vessels equipped with VHF radio telephone should contact terminal on International Mobile Service Channel 16/156.80 mc/s and then communicate on Channel 9 from 0000–2400 hrs. GMT. The other Channel used is Channel 19. The language of the terminal is English and Indonesian.

BERTHING: The Company Area Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Salawati Marine Terminal. All of these factors have to be evaluated before a final berthing decision is made.

After a vessel has been berthed and pratique has been granted, a terminal official will board to discuss loading arrangements. Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight, Approved mechanical means of closing scuppers may be accepted. A deck inspection will be made by Salawati officials and if the vessel is suitable for loading crude oil a signed notation to this effect will be made on the Company Dry Certificate.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended. Salawati personnel will constantly check the vessel's mooring and at any time may direct the lines to be heaved tighter or slackened off under the supervision of a responsible ship's officer, as circumstances warrant.

During the vessel's stay at the mooring emergency towing wires shall at all times be hung over the ship's bow and stern. These wires shall be secured to the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

The Mooring Master will report unsatisfactory conditions to the Company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing therefrom will be for the ship's account.

A ship may be rejected, if, upon inspection, it is not properly equipped, or if it is not suitably manned, or if it has dirty ballast or tanks unsuitable for the cargo as determined by the Company Area Superintendent or his designated alternate.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships, or partially inoperative ships will be rejected. Should it become inoperative while at the moorings it will be removed at the vessel's expense.

No repairs are to be made while mooring or unmooring, or at the moorings without the express permission of the Company Area Superintendant or his designated alternate.

A vessel must have both bower anchors in good working condition and in such sizes and amounts as to meet either "Lloyd's or A.B.S." standards although they may be, in fact, classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry adequate, synthetic lines used for mooring purposes. No wire ropes should be used for mooring export tankers at this terminal. Each mooring rope must not be less than 100 fathoms in length.

To assist in vessel's turn around, tankers should have all necessary booms and cargo gear rigged and ready before the ship is boarded by the Mooring Master.

BALLAST: No facilities are available for disposal of dirty ballast.

Owners and Masters are required to observe International Convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Sele Strait.

It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, saw dust, dispersant etc., should be used at all times especially when disconnecting hoses, in order to avoid any spillage overboard.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea.

Any fines imposed by governmental authority for pollution shall be for the vessel's account.

In the event that the Company has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters all labour and employment costs for cleaning operations will be to the vessel's account if caused by the vessel.

As soon as practical after arrival, all tankers will be inspected by a Salawati Marine Terminal Official for dirty ballast. During discharge of ballast similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions and also for safe passage through the Sele Strait. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels at the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable. The lighting will be of an approved and permanent nature.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the Company Area Superintendent or his designated alternate or independent inspector and provided the Pertamina representative agrees.

Most responsible ship Owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings with chemicals. The result is that no oil discharges into the sea and oil separated is collected in a sloptank. The terminal will load on top of such slops unless otherwise directed. This system is highly recommended to avoid pollution of the Sele Strait.

Masters are warned that inspection of ballast is strict.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his notice of readiness and will lose any priority of position for loading.

LOADING: It is absolutely essential that extremely careful supervision be exercised by officers of vessels while loading operations are in progress. A responsible ship's officer is required to be on duty continuously at a point near to the tanks being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

Raising, lowering, connecting, tending and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with loading of cargo or maintaining mooring lines in a correct manner will be performed by the ship's crew directed by a responsible officer as required by the Mooring Master. Loading of export tankers is through two loading hoses with 10 in. ASA 150 connections.

All ships using Salawati Marine Terminal must be able to connect their manifold to the 10 in. flanges. Masters are reminded it is the ship's responsibility to provide such reducers as may be required to make the connection and that the hose connecting operation will normally be carried out while the ship is de-ballasting.

Request for the terminal to stop the flow of oil cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage tanker. Ship's Master will also be held responsible for any oil spills caused by this request.

The export tanker must lift the export hoses from the water by means of its own derricks and using its own crew. The cargo derrick required to raise the loading hoses from the water must have minimum lifting capacity (SWL) 5 tons and have a sufficient length of strong lifting wire rope on the drum to enable the cargo hook to reach the water, and still have adequate turns of wire left on the drum to ensure safety.

An A.O. Smith metering system is used to load the export tanker.

Two loading hoses with 10 in. of ASA 150 camlock flange connections are used to load the export tanker. All vessels not having 10 in. connections must provide their own reducers.

A loading rate of approx. 25,000 bbls.p.h. can be accomplished.

Salawati crude oil of approx. 36–38° API at 60° F. is available from Salawati Marine Terminal.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately, and not be resumed until the oil is cleaned up and removed from the decks of the vessels, and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Salawati cargo supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer in charge of loading.

All spillages of oil must be reported immediately to the Company Area Superintendent, or his designated alternate, and subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

CARGO DOCUMENTATION: Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Reports, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal.

When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of protest, if any, should be handed to the Company Area Superintendent or his designated alternative for further delivery to Phillips Petroleum Company Indonesia, Jakarta.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Master should prepare two copies of the store list for Customs use.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: No clinic available.

REPAIRS: No facilities.

CONSULS: None.

REPATRIATION: Not possible. If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: GMT plus 9 hours throughout the year.

SHORE LEAVE: Not possible.

DELAYS: Delays to vessels using Salawati Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

GENERAL: *Advances:*
Owners are to pay advance funds for port charges amounting to US $4,000.00 to US $9,000.00 depending on d.w.t. before vessel arrivals. Settlement should be arranged by telegraphic transfer to "Pertamina Agency" account No. 135. 15.000.000005 with the Bank Negara Indonesia 1946, Cabang Gambir, 77A Kebon Sirih, Jakarta under advice to Pertaminaship.

Logs: Masters are advised to keep careful watch on the approaches for semi-submerged floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Admiralty Chart No. 3744
2. Admiralty Chart No. 3745.
3. Admiralty Chart No. 1416.
4. Indonesian Hydrographic Charts No. 213, 217 & 219.

Winds: Winds can reach a maximum of 75 m.p.h. during local storms and all vessels must make sure they carry sufficient ballast to be manoeuvrable in the restricted waters of Sele Strait during these storms.

Stores: Not available.

Visitors: Only authorized personnel or visitors are permitted on the storage barge and/or export tanker.

Crude Oil Testing: The crude oil testing laboratory is equipped to perform the following tests:

API Gravity, BS & W and Pour Point. Any additional tests that may be required will be performed in Jakarta.

Flag: During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.

SHIPMASTERS REPORT: *August 1978.*

General: The oil loading terminal of Salawati is jointly owned by Phillips Petroleum Co., Agip and Conoco and is operated by Phillips Petroleum Company.

The loading terminal is located on the East coast of Salawati Island at Sele Strait. Salawati marks the Western part of New Guinea and belongs to Indonesia.

Reference: Refer to B.A. Charts 3744, 3745, 1416.

Coast Pilot 35, Eastern Archipelago Volume III.

Documents: Inward and outward clearance carried out at anchorage. Watches in excess of one, radios, cassette recorders, perfume etc., will be sealed by Customs. Seal will be inspected when receiving outward clearance. Papers required for clearance:

15 Crew Lists.
1 Crew Vaccination List.
1 Maritime Health Declaration.
3 Passenger Lists.
3 List of Narcotics.
3 Lists of Fire Arms & Ammunition.
3 Crew Custom Declarations.
3 Store Lists.

Ship's registry taken ashore and returned on outward clearance.

Pilotage: Government Pilot and Mooring Master – usually from Kasim Terminal (See "Sorong") board at anchorage. Mooring Master acts as Pilot. From the anchorage vessel proceeds through Sangoilin Mon (Heilige Straat) and Sele Strait towards Salawati. Heilige Straat is marked by unlit buoys and beacons, privately maintained by the oil companies. The min. depth is 57 ft., max. sailing draft from Salawati is 50 ft.

Anchorage: Recommended anchorage in position 00° 53′ S., 131° 10′ E. in approx. 40 m. of water.

Restrictions: Usually transit from anchorage towards Salawati is carried out during daylight hours only. In case of emergency, when storage barge is topped off, vessels will proceed to and from Salawati during darkness. In this case buoys will be temporarily lit by battery powered lights.

Vessels of 120,000 d.w.t. have been berthed at Salawati.

Health: Radio pratique not available.

Radio: Pertamina office listens on VHF Channel 16 but calls are seldom answered. Kasim Marine Terminal listens on 16 and contacts Pertamina office by telephone.

Advance notice. As per Charterer's instructions to Pertamina, Jakarta.

Tugs: Two tugs are available from Kasim Terminal (See "Sorong") to assist in berthing and unberthing.

Berthing: Berth is constructed of 2 mooring dolphins and 2 breasting dolphins with storage barge "Wampum" being moored to the Western side of dolphins and export tanker being moored to the Eastern side.

Vessel may berth port or starboard side to, depending on stage of tide. The vessel is moored with 8 ropes forward and 8 aft, ropes being handled by mooring launches.

Two hoses of 10 in. are connected to ship's manifold by ship's crew. The barge is said to have a capacity of about 50,000 LT, the maximum loading rate of Salawati crude is 16,000 bbls/hr.

Vessels not having received inward clearance by 1500 hrs. local time at the latest will have to await the following daylight before proceeding towards Salawati.

Weather/Winds: Uniformly high temperatures, high humidities and abundant rainfall. Winds are usually light, with a seasonal reversal as N.W. and S.E. Monsoon, however, winds can reach a maximum of 75 m.p.h. during local storms.

Tide: Between 2–5 knots at berth and in Sele Strait, rise of tide about 2 m.

Repairs: Not available.

Supplies/Services: None available.

Shore Leave: Not possible.

AGENCY: Pertamina Shipping Directorate, Jakarta, handles all Agency matters for tankers.

SANTAN TERMINAL (Attaka): 00.06 S. 117.32 E. (See Plan Book)

LOCATION: The Terminal is situated on the East Coast of Kalimantan, Indonesia in the Makassar Strait. It is about 80 miles North of Balikpapan.

DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique. Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Exemption Certificate, Cargo Certificate and De-Ratting Certificate. Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Santan Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Each Crew member should be in possession of an International Vaccination Card and Passport or Seaman's Book. Indonesian Immigration, Customs and port officials will board the vessel to grant clearance.

Flag Dispensation: Each tanker entering the Santan Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for provisional Pratique through the Directorate of Quarantine and if granted, a cable advice is sent to the harbour authorities. Port Health clearance is issued prior to the tanker's arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Customs and Immigration: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching Santan. These signals shall be displayed continuously until clearance is granted.

The signals are as follows:

Sunrise to Sunset:	Quarantine Flag "Q"
Sunset to Sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign, (signal letters). This signal may however be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth available on arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, mooring ropes on deck, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Also see "Operations".

ANCHORAGE: If vessels are obliged, or instructed, to anchor, they should do so in the recommended anchorage and on no account are they to manoeuvre or anchor West of Longitude 117° 33.5′ East unless a Mooring Master is on board. The depth of water is 40 m. with a bottom of mud/clay. Holding ground is considered good.

The Southern limit of the anchorage is defined by two buoys Number "10" coloured red and Number "12" coloured red and white chequers. At night both buoys show a white light flashing 1 second every 6 seconds.

The Southerly limit of a reef on the Northern side of the anchorage area is marked with a buoy numbered "11" and coloured black. At night this buoy shows a green light flashing green 1 second every 5 seconds. Another buoy coloured with red and black horizontal bands and marked with the letter "A" shows a group flash light showing 3 white flashes every 6 seconds.

All the buoys are fitted with radar reflectors.

READINESS: *Procedure when instructed to anchor on arrival:* A vessel which has been instructed by Santan Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) Vessel is within scheduled date range.
b) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
c) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
d) That the Port is open.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clauses (a), (b) and (c) above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep Pilots (Mooring Masters) on station in the anchorage. Santan Port Control maintains a continuous listening watch on Channel 16 VHF.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Also see "General".

NAVIGATION:

Attaka Reef: The Attaka Reef is marked with a buoy coloured red and yellow chequers. At night it shows a white light flashing 2.5 seconds every 6 seconds.

Ship Approach Channel: The ship approach channel to the Santan Anchorage is marked with 4 buoys and numbered from seaward 2, 4, 6 & 8 respectively. At night they show a white light flashing 0.5 seconds every 2 seconds. The number 2 buoy is positioned at 00° 04′ 7.5″ South and 117° 47′ 39.5″ East. Ships should stay to the North of these buoys.

SBM: The SBM is fitted with a radar reflector and at night shows a Qk. Fl. W. light. One of the floating hose strings is fitted with two winker lights.

Inshore Area: Inshore of the SBM area a concrete pile beacon painted red and numbered "16" shows a white flashing light every 6 seconds and marks the Northerly limit of two dangerous reefs.

The work boat canal is marked by 2 buoys, the Northerly one numbered "15" and showing a white flashing light and the Southerly numbered "18" and showing a red light.

There is a beacon on each bank of the canal, at the shore line. The North bank beacon showing a white light and the South bank a red light.

Onshore Area: A radio antenna approx. 150 ft. high is located at approximately 0° 05′ 24″ South and 117° 26′ 34″ East. The mast shows fixed red air lights by night on the top and midsection.

MAX. SIZE:

Minimum Size Acceptable: The minimum sized tanker acceptable at the Terminal is the T-2 Class or equivalent of not less than 17,000 d.w.t.

Maximum Size Acceptable: The maximum sized tanker acceptable at the Terminal calling for a full cargo is 125,000 d.w.t.

RADIO:

Procedure for Appointing Agent: Owner should cable: Pertamina Ship Jakarta. The cable should appoint Pertamina as Agent to attend the tanker at Santan and should be sent 2-4 weeks prior to vessel's arrival.

Advice of Arrival: 72 hours prior to arrival at the Terminal vessels should advise the company of their estimated times of arrival by cable sent via "Pertamina's" coastal radio station at Balikpapan. They should also confirm or amend ETA when they are 48 hours and again when 24 hours, distant from the Terminal.

Union Oil Company of Indonesia cable address: Pertamina Tanjungsantan.

"Pertamina's" Coastal Radio Stations:

I. Name of station – Balikpapan Radio; Call Sign – PKN 2; Frequency – Keeps watch on 2182 kc/s A3, answers on 4415 kHz A3, 6520 kHz A3 (vessel's selection); Class – A3H-A3J; Power – 500 watt; Service – 24 hour; Location – 01° 16′ South, 116° 50′ East.

ETA messages sent to PKN2 should be addressed:

Pertamina Tanjung Santan =
Message ....
Master..............

As long as no direct contact exists with PKN2, ships send ETAs to PKI2 (See below).

II. Name of station – Jakarta Radio; Call sign – PKI2; Frequency – 500 kHz (operates on 452 kHz), 2182 kHz answers on: 4178, 4280.5, 4363, 4410, 6457.5, 6520, 6516 kHz. 8 mHz (operates on 8628 kHz); Class – A1 500 kHz; A3 2182 kHz; A1 8 mHz; Power – 1 kW, 500 kHz, 500 watt, 2182 Khz; 1 kW 8 mHz.

Service – 500 kHz H24, 2182 kHz 0400–0500, 0700–0800, 1000–1100, 1500–1600, 2000–2100, 2300–2400 hrs. GMT; 8 mHz 0100–0300, 0500–0600, 0900–1000, 1100–1200, 1400–1500, 1730–1900, 2100–2200 hrs. GMT.

Location: 06° 08′ 00″ S. 106° 50′ 00″ E.

ETA messages sent to PKI2 should be addressed:

Pertamina Tanjungsantan via PKN2 =
Message ....
Master..............

Details of Cable: The following information should be included in the cable:

Name of vessel and radio call sign.
ETA in GMT and date (local time is GMT+8 hours).
Cargo requirements.
Deballast time.
Maximum loading rate.
Vessels draft on arrival.
If there is any sickness aboard or clean bill of health.
Last port of call.
Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
Distance in feet from bow to vessel's loading manifold.
Flange dimensions of vessel's manifold connection if not to ANSI B76.5, B.S. 1560, Series 150 or equivalent.

VHF: Vessels equipped with VHF radio telephone should contact "Santan-Control" on Channel 16 (156.80 mc/s) when within range to request instructions. The language of the Terminal is English and Indonesian.

MOORING/UNMOORING: This description is only intended as a guide and may be varied as to the order in which lines are taken up etc. according to the circumstances prevailing at the time of mooring.

Moorings required from tanker: The ship must provide and have ready the following: Two mooring ropes and one rope messenger line on the forecastle.

The Approach: The ship approaches the buoy from down tide and wind, taking care to keep the wind right ahead. Adequate ballast must be retained on board to ensure that the vessel retains full manoeuvrability throughout the approach to the buoy and the actual mooring.

Bringing aboard the Mooring Lines: The vessel will be brought to a position close to the buoy with the vessel stopped in the water and with the buoy fine on the port bow. During the approach to the buoy and while mooring, a terminal work boat will keep the hoses pulled well clear to port. Under normal conditions the port rope will be the first taken on board. The Mooring Master will advise as to which rope is to be taken first and as to which fairlead this will be taken. The actual work of mooring will be done by a terminal work crew. The ship will lower a strong messenger line to the mooring boat who will in turn make this fast to the approach rope. The approach rope of 10 in. circumference will be hove aboard and will in turn be hove in until the chafing chain and triangular plate is centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being hove aboard, a strong wire strop will be made fast to a set of forecastle bitts. To the end of this strop will be fitted a 50 ton shackle and the strop will be so made fast at the end and the shackle will be about 5 ft. inboard of the fairlead. The approach rope will be hove on until the large link of the chafing chain is sufficiently far inboard for it to be connected to the strop by the 50 ton shackle. When this is done the approach rope will be slacked off until the full weight comes on the strop/chafing chain/buoy rope. The buoy rope is 150 ft. long and is 12 in. circumference double nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a preventer. The second rope is now taken aboard and made fast in the same way. When both the ropes are fast, good ropes or strops, provided by ship, can be made fast to the spare links on the chafing chains to back up the main moorings.

Fire Wires: A fire wire must be rigged on the starboard side for'd and on the stern. These must be tended throughout vessels stay at the SBM to ensure that they are kept within 2 to 3 feet of water. In case of fire the tugs would connect to these wires to pull vessel clear of the SBM.

Connecting Hoses: When the mooring is completed, the work boat holding the hoses clear will bring these alongside the ship in way of the port side manifold.

Unmooring: To unmoor from the buoy any extra back up lines that have been made fast to the chafing chains are slipped first. The approach ropes are then taken to the ship's windlass/capstan and the weight taken on them until the shackle between the strop and chafing chain is undone. With the vessel moving slowly astern the approach ropes are slacked off and finally slipped and allowed to float free. While the ship is unmooring, a terminal work boat will keep the floating hoses towed clear and will keep them clear until the ship has slipped the moorings and is clear of the buoy.

Strops and shackles will be provided by the Terminal and put on board as the vessel approaches the buoy. The ship must provide 2 mooring ropes at least 8 in. circumference and 100 fathoms long, a 4 in. circumference messenger line, and two rope lashings 4 in. circumference and 15 ft. in length. These lashings should be of manilla or polypropylene, nylon is not acceptable.

BERTHING FACILITIES: The sea Terminal consists of a "single point mooring" loading berth also known as a "mono-buoy" or "single buoy mooring". The berth is located at 00° 06′ 18.6″ South and 117° 32′ 18.8″ East.

The "single buoy mooring" is approximately 4.33 miles offshore in 28 m. of water. The submarine line to the "single buoy mooring" is 30 in. in diameter. A single string of 20 in. submarine hose connects the submarine line header to the "single buoy mooring". Two strings of 16 in. floating hose connect the "single point mooring" to the tanker rail hoses which are 12 in. in diameter. The hoses are always taken up on the port side.

Hose lifting Derrick Capacity: Tankers must be equipped with a hose lifting derrick with a lifting capacity in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to also connect to 10 in, 12 in, and 16 in. manifolds. Tanker manifolds should terminate in ASA Series 150, flat face flanges.

Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of other sizes or ratings will be rejected.

BALLAST/POLLUTION:

Adequate Ballast: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian government regulations concerning pollution of the sea, having particular regard for this area of the Makassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipelines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by governmental authority for pollution shall be for the vessel's account.

OPERATIONS:

Mooring Master: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

Work Crew: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches, etc. will be required. Ship's crew will assist in hose connection/disconnection/mooring/unmooring and carrying equipment from deck to forecastle as required. Any vessel whose crew do not give such assistance may be rejected and returned to the anchorage. Costs of such a delay would be for the ship's account.

Tankers Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Only the automatic turning gear should be used. If it should become necessary to turn the propeller(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission *must* be obtained before any such increase in revolutions.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel, to which any person may be lawfully required to proceed, are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor or at the SBM and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient Crew members must be immediately available at all times to assist with any or all operations on board the vessel at the Terminal.

LOADING: *Loading Rate:* Maximum loading rate will be about 30,000 bbls.p.h. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressures which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the vessel will contact the Terminal despatcher ashore every half hour by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a shore stop will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting shore stop. When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for, overload the vessel, it is not possible to pump oil back from the ship to the shore.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officer will seal the stores.

FACILITIES: There are no facilities of any kind at Santan. There are no engineering repair shops; no fresh water; no bunkers available; no provisions or stores; no crane or barge service; no shore leave; no crew changes; no consulates available.

GENERAL: *Exact Arrival Time:* It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Attaka Unit.

Conditions of Use of Port: The Master of each tanker will be given a copy of the Conditions of Use of Port of Santan Marine Terminal, which he will be asked to sign.

Delay Due to Excessive Deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Republic of Indonesia, Chart 130, East coast of Kalimantan, Balikpapan to Muara Berau.
2. Republic of Indonesia, Chart 37, East coast of Kalimantan, Muara Berau Kutie River to Cape Mangkalihat.
3. U.S. Naval Oceanographic office, old Chart H.O. 3044, new Chart N.O. 72014 Borneo East coast. Sandakan Harbour to Sungai Mahakam.
4. U.S. Naval Oceanographic office, old Chart H.O. 6185, new Chart N.O. 72110 Borneo East coast, Tanjung Mangkalihat to Tanjung – Tamarong.
5. British Admiralty, Chart 2636, North part of Strait of Makassar.
6. British Admiralty, Chart 2660, China Sea – Southern Portion.
7. British Admiralty, Chart 941-B, Eastern Archipelago.

Sailing Directions: Sailing directions are in the following: Eastern Archipelago Pilot, Vol II. 7th Edition, 1961.

Hydrographic Survey: A detailed hydrographic survey was carried out from November 1971, to January 1972, of an area between Latitudes 0° 03′ S. and 0° 13′ S. and extended from the shore line to some 20 miles offshore. Charts are available on request from the Terminal showing the results of this survey for the approaches to the Terminal on a natural scale of: 1:25,000 and for the anchorage and loading area on a natural scale of 1:12,500.

SHIPMASTER'S REPORT: 1976

Situated about 80 miles North of Balikpapan on the East coast of Borneo, in 00.07 S. 117.28 E., the only chart available BA2636 is of too small a scale to advise safe first time entry in darkness. So, after a number of unsuccessful attempts to contact Santan Terminal for instructions – only the latter portion of his transmissions were being received, and very underpowered, it was decided to await daylight, cruising on 118.00 Meridian.

At 0600 hrs. vessel was again in the vicinity of Attaka Buoy, Pilot contacted by VHF 16. He instructed us to proceed 270° T and he would meet us, East of SBM. The SBM is located about 4.5 miles offshore, marked by a QK.FL.W. light, vis. 6 miles, and is impossible to distinguish from Attaka Buoy.

The best approach is to reach a point 4 miles North of Attaka Buoy which has a Ra.Refl. and was identified at just under 12 miles. From thence, subject to the Master's assessment of the situation, and assuming possession of a copy of the Chartlet, to proceed inward on 257° T, which will take him along the Approach Channel. But he should be prepared for quite strong set to North or South – this being my experience, both inward and outward. Pilot states that up to 125,000 d.w.t. can be handled. Originally, the channel had 4 buoys, marking the South side of the channel, but the outer 2 have been withdrawn. Channel has been swept and min. depth shown is 50 m. Each buoy has a Ra.Refl. and with 3.5 mile spacing, are easy to track on radar and visually, once their existence is known, from the Chartlet.

An anchorage area exists between 0.5 and 2 miles East of the SBM, bounded by 3 buoys to West side and 1 to South. These mark Coral Shoals. The Pilot said it was acceptable to come straight in from Attaka Buoy, in ballast, but loaded vessels must stay in Swept Channel, as the possibility of isolated Coral Heads exists, and the area South of the channel has not been fully swept.

A mooring/hose party boards with the Pilot, and takes care of these duties, the vessel only being required to provide an officer and 2 winchmen on the foc's'le and an officer and winchman for connecting the hoses (2×16 in.). A ship's mooring line is lowered to the launch to pick up the port SBM polypropylene line, this finally brings up a chain (approx. 8 in. dia. link). A special very flexible wire, provided by shore, is secured round both Port and Starboard forward bitts on foc's'le head, with an eye at each end projecting forward. The mooring chain is then shackled to this. A stout messenger is acceptable for picking up the starboard mooring, but it is advisable to have a second mooring line available on deck in our opinion. The chain is then shackled to the South eye of the shore wire, which is around the bitts. There is no provision for quick release gear, so letting go in an emergency, e.g. wind, would not be easy.

Hoses are 16 in., but fitted with 12 in. flanges (not reducers) and are bolted to manifold, again no quick release provided. Pilots' estimate of weight of each hose is 7.5 tons. Hoses are hung off on chains passed round manifold supports, instead of cruciform bollards – apparently because of the length of chain used. Hose/mooring party work well and safely.

EDP is not available, and vessel had to lie awaiting papers after leaving SBM for about 40 minutes, after which passage outward along the channel was without problem, with adequate water depths all the way.

Radio messages are sent via Balikpapan PNK2 to Petroleum Balikpapan, but appears to be on only 2 hours a day. But Pilot said they had not received our ETA's, but said this was quite normal. Agents were Pertaminaship Jakarta. No relief facilities, stores, water or bunkers available, and mail both in and out not advised, due uncertain delivery.

SEMARANG: 07.01 S. 110.27 E.

DOCUMENTS:
Crew Lists.
Passenger Lists (if any passengers to be disembarked).
Customs Documents.
Health Clearance from last port of call.
Harbour Report forms supplied by Harbour Master.

PILOTAGE: Ships with deadweight of more than 900 tons and with draft of more than 3.5 m. must anchor in roads. To enter the Harbour, Pilot required. Pilot can be applied for by raising "G" flag while ship is anchoring/arriving.

ANCHORAGE: Anchorage 3 nautical miles from coast, where depth 9 m. For smaller ships safe anchorages 1,900 m. from pier, where depth 5–7 m.

HEALTH: Vessels arriving must hoist "Q" flag. Work can only begin after inspection of security team boarding vessel upon arrival during working hours.

RADIO: Name, Semarang Radio. Call sign, PKR.

TUGS: Normally tugs join vessel in roads.

BERTHING: Ships anchoring in roads can anchor any time of day. For berthing alongside quays ships with a draft max. 3.6 m. require Pilot. Entering port guided by a pilot vessel.

STEVEDORES: Necessary to inform Agent exact time of arrival. Labour gangs to be arranged 1 day before. Also details of cargo to be discharged needed to arrange stevedoring materials, especially for ships anchoring in roads.

MEDICAL: Medical assistance can be given upon ship's arrival. First aid can be given by harbour doctor in harbour area. Serious cases taken to hospitals in town. 4 hospitals available. Port Health Officer can issue vaccination/fever Certificates if required.

FRESH WATER: Can be supplied by 100 ton barge once every 2 days. Suggest take on water in Jakarta or Sourabaja.

GANGWAY/DECK WATCHMEN: No gangway/deck watchmen needed.

OPENING/CLOSING HATCHES: Opening and closing hatches done by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent in tobacco permitted for each crew member to hold out of bond. Wine and/or spirits, maximum value of U.S. $10.

IDENTIFICATION CARDS: Needed.

CONSULS: No local representation.

REPAIRS: Minor repairs only. Small dock only for repairing vessels no longer than 36 m.

REPATRIATION: Repatriation of crew members arranged by Agents by contacting Immigration Officer for permits concerned.

AIRPORT: 5 mins. drive from harbour. Domestic flights only.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year. (1st January); Independence Day (17th August); Id el Fitr; Christmas Day (25th December).

POLICE/AMBULANCE: Semarang 245 or 726.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Normally the speed of loading of bulk cargo is 20–25 tons 1 gang/hours. Delays by bad weather during December, January and February, where it is impossible to come out of the inner port to ships anchoring on the roads.

AUTHORITY: Administrator Pelabuhan Semarang.

SENIPAH TERMINAL: 01.03 S. 117.13 E.

(See Plan Book)

OPERATOR: Total Indonesie.

LOCATION: The Sea Terminal consists of a SBM (Single Buoy Mooring), loading berth also known as "mono-buoy". Berth is located in position Lat. 1° 03′ 05″ S., Long. 117° 13′ 13″ E.

The Terminal is situated about 45 km, N.E. of Balikpapan on East Coast of Kalimantan, Indonesia, at position 0° 58′ 05″ S., 117° 08′ 27″ E.

DOCUMENTS: Indonesian Immigration, Customs, Harbour Master and Port Officials will board the vessel to grant clearance and will require the following for inspection:

3 Crew Lists.
1 Crew Declaration of Personal Belongings.
1 Ship's Store List (inventory).
3 Passenger Lists (if any).
1 Cargo Manifest for Transit Cargo with a summary.
Clearance from the Last Port of Call.
Valid Passport and/or Seaman's Certificate for all Crew Members.
Smallpox Vaccination Certificates for all Crew members or passengers of date not exceeding 3 years.
Certificate of Inoculation against any contagious diseases.

If arriving from a foreign port, the following documents may be required for granting pratique: Certificate of Registry; Ship's Construction Certificate; Load Line Certificate; Life Safety Equipment Certificate; Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate and De-Ratting or Exemption Certificate.

Crude oil loading documents will be prepared at the Senipah Terminal and when the vessel has been loaded, the documents will be completed and final clearance formalities will be carried out on board.

Procedure for Appointing Agent:

Owner should cable/telex: PERTAMINASHIP JAKARTA.

The cable/telex should appoint Pertamina as Agent to attend the tanker at Senipah and should be sent 7 days prior to vessel's arrival.

The above procedure is applicable to vessels whose Operators do not have a long term agreement with Pertamina.

Flag Dispensation/Agency Permit:

Each foreign tanker entering Indonesia for lifting from Senipah Terminal must have been granted flag dispensation/security clearance prior to entering Indonesian waters.

At the same time application should be made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the Harbour Authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the General Agent.

It is vital that TOTAL INDONESIE, Jakarta receives the following information by telex 7 days before the vessel's arrival in order to apply for flag dispensation/security clearance through the General Agent.

1. Name and address of owners.
2. Name of Vessel and radio call sign.
3. Flag.
4. D.W.T., G.R.T. and N.R.T. of vessel.
5. Name of Master.
6. Number of Crew.
7. Last foreign port of call and ETD.
8. Consignee.
9. Destination(s) after Loading.
10. ETA at Senipah Terminal.
11. Quantity and grade to be loaded.

FLAGS: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Senipah. These signals shall be displayed continuously until clearance is granted.

The signals are as follows: Sunrise to Sunset: Quarantine Flag "Q". Sunset to Sunrise: Signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Mooring Master boards. The vessel should also fly its call sign (signal letters). This signal may, however, be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area and the Berthing Master has left. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth is available on arrival.*

A vessel for which the berth is available on arrival will be boarded by a Mooring Master in the anchorage area and, providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the notice of readiness will be acknowledged as soon as tendered to the terminal by the Master of the vessel.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, 6 mooring ropes on forecastle head, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

The Mooring Master will advise the Master on all manoeuvres to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch.

At night, adequate lighting should be provided.

When Mooring Master boards all mooring and hose equipment will be lifted on board from the mooring launch.

NAVIGATION AIDS:

S.B.M. The S.B.M. has a 360° white light, flashing 6 times per minute, visible for 5 miles under an atmospheric transmissivity of 0.85. This operates from sunset to sunrise.

The floating hose has 3 marker beacons along the string, placed one at every 7 sections of hose. This light is mounted in a vertical position on one of the hose flanges. The 90 mm. lamp has a flashing rate of between 20–60 flashes per minute, and is visible at up to 1,850 m. (1 nautical mile).

Oil platforms: Oil platforms of Bekapai oil field which are situated approximately 17 miles East by North of Senipah SBM, show at night a white light flashing, 2 short and 1 long flash (letter U).

Marking buoys: The submarine pipe-line bringing the oil from Bekapai field to the Terminal, as well as the recommended anchorage area, are intended to be marked in the future.

The buoys to be used for this purpose are presently under study.

ANCHORAGE: If vessels are obliged, or instructed to anchor, they should do so in the recommended anchorage area which is centred at position: 1° 05′ 29″ S., 117° 15′01″ E. and has a radius of 1 mile. Water depth is between 40 to 45 m. While at anchor they should exercise vigilance and keep in touch with the Terminal by VHF at all times.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Senipah Terminal to anchor on arrival should, after doing so, inform the Terminal of the precise anchoring time. According to the practice of the Terminal acknowledgement of the Notice of readiness will coincide with this anchoring time, providing:

a) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
b) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
c) That the Terminal is open.
d) That cargo is available in accordance with accepted loading date.

In addition to clauses (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last advised ETA. It is not the practice of the Terminal to keep Pilots (Mooring Masters) on station in the anchorage area. Senipah Terminal maintains a continuous listening watch on VHF (Channel 16 or 12).

MAX. SIZE:

Minimum size: Minimum size tanker acceptable at the Terminal is 50,000 d.w.t. However, on an exceptional basis, it will be possible to accommodate tankers of 33,000 d.w.t. minimum size.

Maximum size: Maximum size tanker acceptable lifting a full cargo will be 125,000 d.w.t.

Tankers of a larger size may be accommodated in the future, provided that Senipah is their first port of loading and that they load a part cargo only. These limits are at present under study.

Draft requirement on arrival: Vessels arriving at Senipah Marine Terminal should have the following draft:

d.w.t.	Fore	Aft
Under 60,000	19 ft.	27 ft.
Over 60,000	22 ft.	28 ft.

RADIO: *Advice of Arrival:* 72 hours prior to arrival at the Terminal, vessels should advise the Company of their ETA by cable sent via Pertamina's coastal radio stations at Jakarta/Merak/Balikpapan. They should also confirm or amend them when they are 48 hours, and again when 24 hours, distant from the Terminal.

Total Indonesie cable address: Totalindo Balikpapan. Attention: Senipah Marine Terminal and Totalindo Jakarta. Attention: Shipcoord.

Communication for Contacting Agent: PERTAMINA Jakarta radio/PKI2 (owned and operated by PERTAMINA).

Note: All messages destined to "PERTAMINASHIP" can be sent to either PKI2, PKQ or PKN2.

Details of Cable: The following information should be included in the cable;

1. Name of vessel and radio call sign.
2. ETA and date in local time (GMT plus 8 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. If there is any sickness aboard or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
9. Distance in metres from bow to vessel's loading manifold.
10. Flange dimensions of vessel's manifold connection, if not to ASA series 150 or equivalent.

Failure to advise Terminal of ETA may lead to loss of berthing turn.

VHF: Vessels equipped with VHF Radio Telephone should contact terminal on international mobile service Channel 16 (156.80 mc/s) and then communicate on Channel 12 from 0000–2400 hrs. GMT.

Other Channels used are 6–9–19.

The language of the Terminal is English, French, and Indonesian.

BERTHING: The SBM is approximately 6 miles (11.1 km) offshore in approximately 28 m. of water.

The SBM is served by 2 submarine lines of 26 in. diameter. Two strings of 20 in. hose connect the SBM to submarine line header. Two 20 in. floating hose strings reduced to 12 in. are connected to Tanker for loading purposes. Hoses are lifted up and connected individually on port side. For quick connection/disconnection to ships manifold hose ends are fitted with "Camlocks".

Work Crew Service: Mooring, unmooring, lifting, lowering, connecting and disconnecting hoses will be done by ship's crew under the direction of the Mooring Master and assistance of Terminal crew.

Accommodation and meals: The company Mooring/Loading Master and his crew (3 to 4 persons) stay on board the tanker during the time of the operations. Free accommodation and meals of the same standards as those of the Tanker's officers (for the Mooring Master) and of the Tanker crew (for company crew) must be provided.

Tanker's Engines: Being on open roadstead, vessels must keep engines on standby during their stay in berth. No repairs to main engines may be undertaken while in berth.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order to ensure that there is no inconvenience to do so.

The Mooring Master's written permission must be obtained before any such increase in revolutions.

MOORING/UNMOORING: *Method of Securing to Buoy:* This description is only intended as a guide and may be varied as to orders of lines etc. according to circumstances and weather prevailing at time of mooring.

When Mooring Master boards all mooring and hose equipment for the job on hand will be lifted from the mooring launch.

The Approach: The vessel will be brought to a position close to the buoy with vessel stopped in water with SBM fine on port bow. During approach to SBM, one mooring launch will keep hoses well clear of vessel. Under normal conditions the starboard SBM rope will be the first rope taken on board. Mooring Master will advise which rope will be taken first. Actual work of mooring will be done by ship's crew with assistance from terminal work crew. Vessel will lower a mooring rope with good lashing on eye to the mooring launch which will make this fast to approach rope. The approach rope of 10 in. circumference polypropylene will be hove on board until the chafing chain is approximately centred in the fairlead.

Securing the Mooring Lines: While approach is being made, two 11 in. rope strops will be made fast one on each side to the forecastle bitts. To the end of each strop will be attached a 50 ton shackle with pin removed. This shackle should be lying between 2 to 3 m. in board of fairlead. When sufficient chafing chain has been heaved on board, the eyes of the ship's lines will be shackled on to the end links of the chain. The approach rope will then be slackened off so that all weight is on the ship's lines. This will be backed up by an 11 in. rope strop provided by the terminal similarly attached to the chain and used as preventer. The second rope is made fast in the same manner.

Connecting hoses: When mooring is completed a work boat holding the hoses clear will bring the hoses alongside the port side manifold for connection. When hose connection is completed the mooring launch will be made fast by a mooring rope through the centre lead aft so as to be in position to tow as necessary.

Unmooring: To unmoor from the SBM all extra back up lines that have been secured are slipped first. The approach rope is then taken to ship's windlass/capstan and hove up until sufficient chain is in board to remove shackles from the ship's lines and terminal strops. When the vessel is moving slowly astern the approach ropes are slackened off into the water and finally slipped until allowed to float free.

LOADING:

Loading Rate: Maximum loading rate will be nearly 40,000 barrels (6,000 metric tons) per hour. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible.

Care should be taken not to overload, as there is no possibility whatever of pumping back to Terminal. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in completely light condition.

Hose Lifting Derricks – Deck Winches: Ship booms and deck winches must be capable of operating with a SWL of 5 tons for tankers to be secured to the SBM. Vessels with inadequate hose lifting equipment will be rejected. Power must be kept on deck winches in case adjustments to mooring lines are found to be necessary.

Manifold sizes: The hoses at the terminal are 12 in. in diameter. The minimum size manifold connection acceptable will be 8 in. Terminal is equipped with flanged reducers to connect 8 in. – 10 in. and 16 in. manifolds.

Tanker manifolds should terminate in ASA series 150. Unless terminal is given adequate notice, tankers equipped with other sizes or ratings will be rejected.

Grades of crude oil available: There are 2 grades of Crude Oil available at Senipah Marine Terminal, namely, Bekapai Crude Oil and Handil Crude Oil. Vessels lifting Bekapai Crude are not required to heat the oil during voyage to the discharge port.

Vessels lifting Handil Crude Oil are required to be equipped with heating coils.

It is recommended, as from commencement of loading of Handil Crude, the vessel should endeavour to maintain a temperature of 105°F or at least a temperature slightly above the pour point until the time the vessel discharges its cargo at the unloading port.

In case a vessel has to load 2 parcels of cargo (i.e. 1 Handil 1 Bekapai), loading must be stopped between the two parcels for line flushing with the second grade of oil.

Outward clearance: A tanker will be considered clear to depart Senipah Terminal when the crude oil loading documents have been delivered to the Master.

Any protests by the Master concerning the quantity of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

BALLAST:

Adequate ballast: Due to the exposed location of the crude oil SBM berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the Terminal.

Inspections during loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution, whatsoever, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

CUSTOMS ALLOWANCE: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances.

The Customs Officer will seal the stores.

SERVICES: There are no facilities of any kind at Senipah:

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.
No clinic available.

GENERAL:

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

AGENCY: Pertamina Shipping Directorate, 32-34, Jalan Jos Sudarso, PO Box 327, Tanjung Priok, Jakarta, Indonesia. Cable address: Pertaminaship Jakarta. Phone numbers: 290312–290322 (11 lines), Ext. 225 and 315 and 425. Telex number: 42885 Jakarta.

SORONG (Kasim Terminal): 01.18 S. 131.01 E.

(See Plan Book)

LOCATION: The terminal is located on the Island of Jef.

DOCUMENTS:

Certificate of Register.
Load Line Certificate.
Safety Equipment.
Safety Construction Certificate.
Radio Certificate.
Derating Certificate.
6 Crew Lists.
6 Vaccination Lists.
2 Crew Declaration.
2 Stores Lists.

PILOTAGE: Compulsory. Pilot boards in-bound vessels in position 00° 53′ S. 131° 10′ E. Vessels berth and unberth at any stage of the tide during the day.

Accommodation ladder not required; pilot ladder is sufficient. Also see "Anchorage". Vessels must make a lee for Pilot boat in choppy seas.

ANCHORAGES: Recommended anchorage area is 4.5 miles West of Sorong in position 00° 53′ S. 131 10′ E. Under no circumstances should the vessel enter the restricted area around the structure without the Mooring Master aboard.

Any vessel arriving in the anchorage area after 1600 hours local time may have to wait in the anchorage area until first light the next morning to transit the Sele Strait to the terminal.

On arrival at anchorage contact "Sorong Control" on VHF Channel 16 and between hours of 0600 and 1800 contact Kasim Marine Terminal Channel 16.

RESTRICTIONS:

	Controlling depth (MLW)	*Mean tidal range*	*Velocity of current*	*Nature of bottom*
Entrance:	51 ft.	Approx. 5ft.	Max. 7 kt.	Sand, mud
Channel:	51 ft.	,,	,,	Sand, rock, coral
Anchorage:	120 ft.	,,	,,	Rock, sand
Berth:	60 ft.	,,	,,	Sand, rock, coral

MAX. SIZE: The channel is swept to a depth of 57 ft. Vessels max. draft is 51 ft. Also see "Berthing".

PRATIQUE: Available night and day Customs and Immigration board on arrival.

RADIO: *Advice for arrival:* 72 hours prior to arrival at Sorong vessels should advise the Company of their estimated time of arrival by cable sent via "Pertamina's Coastal Radio" Station at Jakarta or

Government Radio Station at Sorong. They should also confirm or amend them when they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, Unit 5, Sorong.

Cable address: Pertamina – Jakarta.

Name of the station: Jakarta Radio. Call signal: PKI-2.

Frequency	*Class*	*Power*	*Nature*	*Service (hrs.)* (GMT)

6518.6 kc/s.	SSB	H.24
6518.6 kc/s.	SSB	H.24
8755 kc/s.	AM	0000–0100
8730 kc/s.	AM	0200–0300

The following information should be included in the cable:

(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.

TUGS: 2 tugs of 45 ton bollard pull each tug.

BERTHING: Berthing is usually daylight hours but night berthing undertaken if required. It is not unusual to undock with a strong stern tide running.

Kasim terminal is owned by Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 51 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksan loading arms and vessels with non-standard manifolds must provide their own reducers. Max. loading rate 60,000 bbls. p.h.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is situated ashore level with mooring dolphin No. 2. A Mooring Master remains on board throughout the vessels stay and is in radio contact with the tank farm, pump station and Marine Office. The berth has its own gangway which is placed onboard the ship by shore crew.

DRY CARGO BERTH: 370 ft. long with depth of 20 ft. MLWS alongside vertical wooden face with rubber fendering. 2 cranes available for discharge/loading with SWL 40 and 60 tons.

MEDICAL: Doctor available.

FRESH WATER: Available at US$2.40 per ton.

FUEL: Not available.

REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

REPATRIATION: Possible in an emergency.

TIME: GMT plus 9 hours.

SHORE LEAVE: No shore leave.

GENERAL: Before sailing it is necessary that Sorong Harbour Master is aboard. No stores but clinic available.

During daylight hours Indonesian flag must be flown.

AGENT: 2 to 4 weeks before arrival, vessels must appoint as General Agent Pertaminaship, Jakarta 3234 Yos-Sudarso, P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.

Telex JKT 2885, Answerback: Pertamina. Tel. 290 312 Ext. 217.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E.

(See Plan Book)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles.
2 Stores Lists.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 24 hours before arrival and 6 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position 06° 55′ 43″ S. 112° 43′ 46″ E. Application for Pilots can be cabled via above radio station and must be received at least 24 hours prior to the ship's arrival at the boarding area, by the Harbour Master of Tg. Perak. Upon arrival at the Pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green light over a white light means: Pilot will board your vessel by row-boat as no motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at the entrance by means of a pilot barge dispatched from Tg. Perak Pilot station at the Harbour Master's office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbour Pilot takes over.

ANCHORAGE: Waiting anchorage for Pilot within: 06° 51′ S. 112° 45′ E.; 06° 51′ S. 112° 47′ E.; 06° 52′ S. 112° 47′ E.; 06° 52.5′ S. 112° 45′ E. Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Eastern Channels.

Western Channel: Used for deep-drawing vessels with depth of 9.0 m. at LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depths through this channel is 4.0 m. at LWS. Distance to Tg. Perak is about 16 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Inner Roads (anchorage).

MAX. SIZE: The max. draft for vessels entering the access channel to the port is 31 ft. 03 in. with a max. LOA of 210 m.

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

RADIO: Coastal Radio Station call sign PKD. Classes: A1 Frequency 430, 550, 8730, A2 Frequency 430, 500, A3 Frequency 8754, 4.

Pilot station Karang Djamuang is also reachable through radio call sign PKW: frequency 500 kHz. This station can also be contacted by VHF Channels 12, 16.

TUGS: For poor steering vessels and those with deep drafts, tugs assistance is indispensable from light buoy No. 5 till light buoy No. 4 is passed.

The tug service is provided by the Port Administration for which the Port Administration has 6 tugs. Two tugs – 1,700 h.p., 2 tugs 1,500 h.p. and 2 tugs – 800 h.p.

Tugs equipped with VHF Channels 12, 14 and 16.

BERTHING: The total length of effective quay in Tanjung Perak Port is 4620 m.

Quay	*Length*	*Depth at LWS*
Jamrud Utara	900 m.	8.6 m.
Jamrud Selatan	800 m.	7.9 m.
Jamrud Barat	210 m.	8.2 m.
Berlian Barat	750 m.	7.3 m.
Berlian Timur	780 m.	8.4 m.
Berlian Utara	140 m.	7.5 m.
Nilam Timur	900 m.	8.2 m.
Perak	140 m.	8.2 m.

Tanker Terminal:

Government Petroleum Pier Depth alongside at LWS is		90 dm.
Semampir East	,,	120 dm.
Semampir West	,,	100 dm.

Coal Wharf: Situated at the Southern end of Tambatan Nilam, equipped with 1 transporter and 2 bunker barges with steam operated grippers, owned by P.N. Tunda Bara.

CRANES: 1 floating crane, capacity 50 tons. 5 electric cranes of 3 tons capacity and 3 electric cranes of 5 tons capacity. 2 mobile cranes of 3 tons capacity. One gantry crane of 5 ton capacity, 2 tractor cranes of 2 tons capacity.

STEVEDORES: Working hours: Monday–Thursday 0700–1200; 1300–1500 hrs. Friday 0700–1100; 1300–1500 hrs. Saturday 0700–1200 hrs. Overtime: Monday–Friday 1500–1700 hrs. Sundays,

holidays 0700–1200; 1300–1500 hrs. Night work allowed after permission from the Port Authority.
Average for bulk cargo 20 t.p.h. per gang
Average for bagged cargo 27 t.p.h. per gang
Average for general cargo 20 t.p.h. per gang
Average for machinery/iron 8 t.p.h. per gang
MEDICAL: Hospital and Port Health Centre.
FRESH WATER: Supply is handled by the Harbour Board to the berths and by 3 water barges. Present capacity about 875 tons per day for the whole harbour. Priority is for Passengers vessels and application required 48 hours prior to ship's arrival.
FUEL: Fuel can be obtained via pipe-lines to all berths.
REPAIRS: Dry-docking and all sorts of repairs are carried out by the State-owned P.N. Dock. There are floating docks, capable of lifting 15,500, 3,500 and 4,000 tons. There are several slipways for coasters.

Electronic Repair Shop: All sorts of electronic repairs such as radar, echo-sounder, etc., can be repaired by private contractors.
CONSULS: U.S.A., U.S.S.R., Japan, Great Britain, Belgium, Australia, India, Pakistan, Philippines, France and Netherlands.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.– (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
AUTHORITY: Port Administration.

TANDJUNG UBAN: 01.03 N. 104.13 E.

P.T. Stanvac Indonesia Oil Terminal.
DOCUMENTS:
11 Crew Lists.
Harbour Report (form to be supplied by the Agent).
Maritime Declaration.
Vaccination List.
2 Stores Lists.
2 Bonded Stores Lists.
2 Personal Effects Lists.
PILOTAGE: Agent requests Pilot upon arrival of vessel, 72 hours advance notice of ETA required. Pilot boards vessel in harbour area.
ANCHORAGES: 0.5–0.75 miles opposite oil jetties.
MAX SIZE:

	Dock No. 2	No. 4	No. 5
Length	800 ft.	650 ft.	650 ft.
Breadth	any	any	any
Draft	34 ft.	33 ft.	32 ft.

HEALTH: Health Officer will board vessel after berthing. No pratique granted, even for vessel after calling at another port in same country.
RADIO: Tandjung Uban Radio – call sign PKJ.
TUGS: No tugs available.
BERTHING: Agent arranges berthing vessel. Dimension of oil hoses used: 6 in. and 8 in. Very limited slop facilities, depending on available ullage.
MEDICAL: Very limited facilities. Only a clinic with experienced wound dresser available. Valid smallpox and cholera certificates for crew members required.
DENSITY: 10254.
FRESH WATER: Available ex-pipe-line – 5 t.p.h.
FUEL: Medium fuel oil, viscosity Redwood 1, 600–900 seconds; heavy fuel oil, viscosity SSF, 30–40. Prior approval from PT Stanvac Indonesia, Jakarta, required for obtaining bunker fuels.
GANGWAY/DECK WATCHMEN: Port authority provides 1 safety guard during vessel's stay in port.
CUSTOMS ALLOWANCES: Reasonable quantity allowed to be used during vessel's stay in port.
IDENTIFICATION CARDS: Possession of a valid Seaman's Book sufficient.
REPATRIATION: No facilities available.
AIRPORT: Distance to airport, 60 miles. Served by Garuda Indonesian Airline 3 times a week (Mondays, Thursdays and Saturdays) to Jakarta only.
TIME: GMT plus 7 hours.
POLICE/AMBULANCE/FIRE: Police, tel. 55; Clinic, 37 and 58; Fire, 44 and 13.
TELEPHONES: Agents place telephone on board at no cost.
AUTHORITY: Penguasa Pelabuhan (Port Authority).

TARAKAN: 03.20 N. 117.45 E.

DOCUMENTS: See "Djakarta".
PILOTAGE: Compulsory pilotage consisting of sea and harbour pilots. Ships requiring pilot service should notify the Harbour Master at least 24 hours before arriving at outer buoy. Tide: semi diurnal.

Pilots do not normally work at night. The approach buoys and leading lights are frequently extinguished and vessels arriving at night are recommended to anchor at No. 1. Buoy and await a Pilot in daylight.
HEALTH: Vessels arriving from abroad direct in one of the 2nd Class Ports have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad from the 2nd Class Port concerned.
RADIO: Call sign: PKO Class A1. This station also has VHF Maritime Bands working on the same hours as the Short Wave Transmissions.
TUGS: Nil.
BERTHING: The anchorage will hold many ships but very little cargo is worked from the anchorage as most vessels calling are timber ships waiting to load. The very occasional ocean cargo ship usually unloads on to a barge but very occasionally goes alongside the Commercial Jetty.

The Commercial Jetty has a least depth of 4 m. and a length of about 150 m. There is a crane capable of lifting 2 tons on the inside berth. This jetty is very old and delapidated and normally handles only small craft of local inter-island character.
STEVEDORES: Working hours: 7 hours on normal working days. Overtime can be arranged.
TANKERS: The Pertamina jetty has a least depth of 8 m. and is about 180 m. in length. This pier is solely for the export of petroleum products in small tankers.

Off the Pertamina pier is a 6-buoy sea berth to which tankers of 35,000 tons d.w.t. are secured to load oil for export. The loading rate is about 1,000 t.p.h., through two 10 in. hoses. The berth requires a tanker with a derrick capable of lifting 3 tons.
GENERAL: Port doctor available.

Carrying a camera ashore or even on deck of a ship for photography is strictly prohibited.

There is a small hospital. No stores, water, or fuel oil are available. There are no repair facilities at all. Pertamina operates a small hospital and a clinic. There is air communication to other parts of Indonesia through Balikpapan.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

TEGAL, Java: 06.55 S. 109.10 E.

DOCUMENTS: Upon arrival, vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificates.
Seaworthiness Certificate.
Tonnage Certificate.
Deratisation (Exemption) Certificate.
International Loadline.
Safety Equipment Certificate.
Safety Constructions Certificate.
Safety Radio-telegraphy Certificate.
Vaccination List.
5 Crew Lists.
2 Stores Lists.
2 Crew Baggage's Declaration.
Last Port Clearance.
Health Book.
Custom Clearance and Custom Documents.
Cargo Manifest and Bills of Lading.

When vessels arrive direct from foreign port, Customs and Harbour Police officials board for search.
PILOTAGE: None.
ANCHORAGES: Tegal roads. Safe anchorages: Lat. 06° 49′ 00″ S. Long. 109° 08′ 07″ E. Lighthouse 210°. Distance 2.5 miles off.
RESTRICTIONS: No restriction night entry, but work is done next day (after 0800 hrs.).
MAX. SIZE: Length and breadth no restriction. If draft above 25 ft. will be 2.5 or 3 miles off shore (anchorage on roads).
HEALTH: Maritime Declaration of Health needed from Master, if vessels coming direct from abroad. If vessel comes from other Indonesian ports, automatic free pratique.
RADIO:
I. Fixed Station:
Call sign 8AC on freq. 5315 kc/s. at 0100–0130 GMT
0230–0300
freq. 5165 kc/s. at 0430–0500 GMT
1000–1015
II. Coast Station:
Call sign PKD 21 on freq. 2182/2690 kc/s. at 0030–0100 GMT
0400–0430
Channel 16 – VHF 156.80 mc/s. 0100–0500 GMT
III. Open every day except on holidays.
TUGS: Only used for towing lighters to vessels on the roads.
BERTHING: None. Anchorage only.
STEVEDORES: Ordered by Agent. If possible before arrival of

vessel, some information mainly concerned with requirements of the Shipmaster advises Agents to arrange gangs and available space for Tegal cargo.
MEDICAL: Normally medical attention for crew to be arranged by Agent at order of Master.
FRESH WATER: Nil.
FUEL: Nil.
GANGWAY/DECK WATCHMEN: Services of watchmen if necessary to be ordered by Master.
OPENING/CLOSING HATCHES: Is carried out by crew – sometimes by stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits not allowed to be taken ashore.
IDENTIFICATION CARDS: Necessary.
CONSULS: None available locally.
REPAIRS: None.
REPATRIATION: Agents arrange necessary repatriation of crew.
TIME: Indonesian Western Time = GMT plus 7 hours.
HOLIDAYS: Only Moslem holidays: Id el Fitr. For 2 days no cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Accident, Police, tel. 10; First Aid for Ambulance (Texin Hospital), tel. 387; Fire Departments (Texin), tel. 17.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore from 0800 up to 2100 hrs. every day. Not allowed to spend night on shore.
REGULATIONS: Crew members not allowed to bring cameras, foreign money, on shore leave.
AUTHORITY: Sjahbander, Djl.

TELUK BAYUR (Padang): 00.58 S. 100.20 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and Wharfage if any.
Crew Lists and Passenger's Lists.
Ships' Articles.
Other Certificates and Documents as required.

Immigration: Vessels arriving from abroad with passengers must hoist the 'N' flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: (a) disembarking (b) transhipping (c) through passengers.

No persons are allowed on board until the vessel has been examined and the 'N' flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.
PILOTAGE: Compulsory harbour pilotage. Ships have to wait for Pilot inside the roads limits, anchoring as near the breakwater as possible. Pilot is available each day from 0600–1800 hrs. ETA required 6 hours before arrival. ETD required 3 hours before departure.
HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port. The provisional free pratique is only valid for the port and the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.
RADIO: Coastal station: Call sign PKP2. *Type of equipment:* Transmitter, JRC 250 watt, Transmitter, JRC 125 watt, Receiver, JRC –.

Frequency: 500 kc/s. 0000–0100 hrs., 0400–0500 hrs., 0800–0900 hrs. Frequency: 6355 kc/s. 0130–0200 hrs., 0530–0600 hrs.
TUGS: 1 Tug-boat (SKMP 8) of 250 h.p. is stationed at Teluk Bayur, the use of which is compulsory for incoming and outgoing ocean-going ships. 1 additional tug 180 h.p.
CRANES: 1 electric crane, capacity 6 tons, 2 mobile cranes, capacity 3 and 5 tons.
STEVEDORES: *Working Hours:*
Monday to Thursday: 0800–1200; 1300–1600.
Friday: 0800–1100; 1330–1600.
Saturday: 0800–1200; 1300–1400.
Overtime until 2400 hrs. in normal time, round the clock special permit.
Cargo Handling Speeds:
1. General cargo: 15 to 20 tons per gang/hour.
2. Bulk cargo/cement: 20 to 25 tons per gang/hour.

BERTHING:

Quay/Used by	*Length (m.)*	*Depth Below LWS Actual (m.)*	*(ft.)*	*Remarks*
Pier No. I				
Pilgrim Priority for tourist vessels, ocean-going for export	120	8.0	26.2	In case of Pilgrim tourist and ocean-going vessels are not used, this pier could be used also for passenger (RLS), import and inter-island vessels.
Pier No. II				
Idem	108	8.0	26.2	Idem
Pier No. III				
Inter island	108	7.5	24.6	
Pier No. IV				
Idem	96	7.5	24.6	
Pier No. V				
Own ship's/tug boat and mooring boat	10	7.0	23.0	
Pier No. VII				
Oil tanker	10	7.0	23.0	Oil jetty, special for white oil
Pier No. VIII				
Inter island. Temporary used for oil/asphalt tanker	27	7.0	23.0	Black oil and asphalt

Note: 1. High water Spring 1.65 m. (duration).
2. Maximum length of vessels 165 m. (540 ft.).
3. Gate: 7.1 m. (23.3 ft.).

FRESH WATER: Available at wharf, officially at a rate of 8 cu.m. per hour, unlimited quantity during the wet season (September-April). During the dry season with a maximum of 150 cu.m. and a capacity of 4–6 cu.m. per hour. Water should be boiled or chemically treated before consumption.
FUEL: Very limited (Diesel oil only).
REPAIRS: Dry dock available for ships up to 150 tons. Machine-workshops for minor repairs available.
MEDICAL: Teluk Bayur has harbour clinic for emergency cases. Hospitals at Padang.
AIRPORT: At Tabing, distance 15 km.
AUTHORITY: Department of Sea Communications.

TJILITJAP (CILACAP): 07.41 S. 109.05 E.
(See Plan Book)

(a) TJILITJAP PORT.
(b) CILACAP – IRON SAND PORT.

(a) TJILITJAP PORT.
DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
Ship's Stores List.
RESTRICTIONS: Least depths at the bar and in the channel are 70 dm at LWS.

Current: semi-diurnal. By the influence of the Donan River, especially during the rainy season, the duration of the outgoing current is longer than that of the ingoing. In the rainy season the outgoing current can reach 5 knots.
PILOTAGE: Compulsory. The Pilot station is in Tjilitjap. Outbound vessels, application for Pilots must be made 2 hours before departure, provided that ships sailing before 0800 hrs., must apply before 1800 hrs. of the preceding day. Ships arriving by night must hoist the pilot signals at daybreak. Pilot signals as in the International Code of Signals until the Pilot boards the vessel or till a central signal is made at the signal yard of the Coastal Light "Gunung Tjimiring", where Tjilitjap will be phoned about approaching ships. The Lighthouse-keeper can make the following contra signals:
(a) The Indonesian Flag at the signal yard meaning the Pilot is coming out.
(b) 1 black ball over 2 black cones pointing upwards meaning wait for the next message.
(c) Double cones meaning no Pilot available permission granted to enter without.
(d) Black ball over a black cone pointing upwards meaning Pilot is not coming out, permission to enter without Pilot until you meet one.
Pilotage by night is not available except in very extraordinary cases.

It takes the Pilot 1 hour from Tjilitjap to sea. If a ship can't enter on the same day 2 black cones pointing upwards will be shown with a black ball in between.

HEALTH: Vessels arriving from aboard direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

TUGS: Not available.

VHF: Pilot on Channels 16 and 20.

BERTHING: Outer roads while waiting for the Pilot during the West monsoon a safe anchorage in 12 m. water. During the S.E. monsoon not a safe anchorage.' Inner roads, under all circumstances a safe anchorage in 9 m. water in the vicinity of Nusa Kambangan opposite the quays for small crafts and East of Tg. Sodong. Vessels over 80 m. length have to moor due to limited swinging space, current and winds.

Berth length:

Berth I 120.0 m. depth alongside 70 dm at LWS.
Berth II 146.0 m. depth alongside 70 dm at LWS.
Berth III 142.5 m. depth alongside 70 dm at LWS.
Berth IV 130.0 m. depth alongside 70 dm at LWS.

TANKERS: Shell Tanker Terminal: Petroleum jetty with dolphins where tankers of 85 m. length can berth.

STEVEDORES: Working hours Monday–Thursday 0730–1200 hrs. and 1300–1530 hrs. and Saturday. Overtime Friday 0730–1130 hrs. and 1300–1530 hrs.; Sunday–holidays 0730–1200 hrs. and 1300–1530 hrs.; Night shift 1700–2300 hrs. Gang's capacity: Loading manganese ore average 15 t.p.h.; loading scrap iron average 6 t.p.h.; loading copra cake average 10 t.p.h.

FRESH WATER: Water is supplied through pipe-lines to the wharves, capacity 7 t.p.h.

FUEL: Not available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.–(fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

Ship's Inspection Team: Consisting of members of the Port Authority. This team will search the vessel, after the ship is cleared by the Port Medical Officer. Prior to mentioned search no Cargo handling is allowed. This Team will search the Store Rooms and Cargo hatches, and subsequently seals the Bonded Stores and Radio Transmitter. Careful attention should be given in making up the Store Lists, as any difference found in the items declared and discovered during the search may lead to difficulties.

SHORE LEAVE: Leaving and entering the Custom's Area the crew is checked on the basis of the Crew's List and Identification cards and searched.

(*b*) CILACAP – IRON SAND PORT.

LOCATION: Iron Sand Jetty (loading installation) is situated at the Port of Cilacap, South coast of Central Java, in position: 07° 45′ 03″ S., 109° 00′ 51″ E.

FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessel's Number; Quarantine & Immigration Flag.

DOCUMENTS: To be produced upon vessel's arrival:

15 Crew Lists
10 Passenger Lists
5 Parcel Lists
8 Stores Lists
8 Cargo Manifests
3 Narcotic Lists
5 General Information (if any)
5 Personal Effects Lists
5 Vaccination Lists
Last Port Clearance
10 Firearms & Ammunition Certificates
10 Harbour Reports
5 Crew's Radio & Camera Lists
International Loadline Certificate
Maritime Declaration of Health Certificate
Safety Radio Certificate
Health Book or Bill of Health
Derating Certificate
Safety Equipment Certificate
Certificate of Registry and Tonnage
Certificate of Vessel's Nationality.

Inspection Team: This team consists of the Port Health Officer, Custom Officer, Harbour Master, Immigration Officer and Police.

After the vessel is granted free pratique, the Immigration Officer will check passports, seamen's book and crew list and issue shore passes.

PILOTAGE: Pilotage is compulsory. Two Government Pilots are available.

There is one pilot station in position 07° 44′ 08″ S., 108° 59′ 34″ E. If vessel wishes to be piloted to Iron Sand jetty on day of arrival vessel must arrive at the pilot station before 1500 hrs. local time at the latest provided the Pilot is available (information of which will be confirmed by Sub-Agent).

RESTRICTIONS: Vessels served on first come, first served basis. Vessels berth between 0600 hrs. and 1500 hrs. and leave during daylight hours on high water. The depths at LWS are: Alongside wharf, 13.0 m.; Channel Bar 11.30 m.

Vessel's Conditions: The height of vessel from water line to top of hatchcoaming or railing must not exceed 15 m. Each side deck breadth from bulwark to hatchcoaming must be preferably 7 m. minimum and 9 m. maximum.

MAX. SIZE: LOA 186 m. max. draft 10.40 m. Deeper possible but it depends on depth at the time of passing bar and after consultation with the Harbour Master.

RADIO: Messages to Pasirbesi Cilacap can be sent through Cilacap Coastal Radio Station, call sign PKR 3.

Arrival Notice – Information required:

Owners advice: Owner to advise by cable to Anekatambang Jakarta and Pasirbesi Cilacap at least 10 working days before vessel's expected arrival at the loading port.

Master's advice: At least 48 hours before vessel's arrival at Cilacap Pilot Station, the ship's Master shall give the following information to Anekatambang Jakarta and Pasirbesi Cilacap: Last port of call, draft on arrival, quantity of iron sand to be loaded, stowage plan (hatch division for iron sand cargo) and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Pasirbesi Cilacap waits for the Master's telegram in order to make necessary preparation such as ordering Pilot etc.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING:

Mooring: Vessels are moored alongside 1 jetty and 6 dolphins with 4 bollards with good nylon ropes, 4 fore, 4 aft, 1 fore breastline and 1 after breastline. Distance between the two extreme dolphins is 160 m.

Loading Facilities: Loading installation consists of one boom (stacker), iron sand is loaded into the hold of the vessel by means of conveyor belt. Boom can be hoisted vertically from 00° to 60° but the maximum position for proper operation is only up to 15° inclination angle and can swing 26.85 m. (60°) to each side. The length of boom is 33.33 m. The maximum outreach is about 16.33 m. from jetty to seaward.

Loading capacity: About 400–500 t.p.h., however, it depends on the type of vessel, cargo space and size of hatches available.

Weighing: The iron sand is automatically weighed during loading by means of weightometer. The specific gravity of iron sand is around 2.60.

Unloading: Cargo for Aneka Tambang only.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's Crew members.

STEVEDORES: Loading is performed by shipper's personnel. Loading equipment to be furnished by the vessel.

Working hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Independence Day (August 17th); Christmas Day (December 25th). Lebaran, Maulid Day and Idul Adha determined by Moslem calendar and differ from year to year by international calendar, For definite dates consult Port Administrator.

CUSTOMS: Vessel's bonded store will be sealed by Custom Officer on arrival and will remain sealed until the vessel leaves Cilacap Port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available.

TIME: GMT plus 7 hours.

REPATRIATION: Can be arranged. Repatriant to be guarded by Immigration Officer from Cilacap to Jakarta until his departure from Jakarta to the destined country.

CONSULS: None.

SHORE LEAVE:

General: Crew members are permitted only to go to Cilacap. Shore pass must be carried by crew during shore visit.

Going beyond Cilacap is prohibited without special landing permit, which can be issued by the local Immigration Officer through Agents.

Visitors: Crew members are not allowed to invite friends, hawkers from shore aboard the vessel. It is also prohibited to lower lifeboats or rafts for purpose of fishing, sailing, visits to nearby islands, etc.

At Anchorage: While lying at anchor awaiting berth, no one is allowed to go ashore until vessel cleared.

Shore leave hours: From 0600 hrs. to 2300 hrs. local time.

GENERAL:

Cash advance: Cash advance in Rupiah can be supplied by Agents at Master's request.

Fumigation: No facilities.

Nature of bottom: Sand and hard materials.

Currents: Direction: at high tide, from East to West; at ebb tide, from West to East. Velocity: around 3-5 knots.

Chart: Indonesian Sea Chart No. 108.

Ship Chandlers: None.

M.P.S. Tax: So called M.P.S. Tax has to be paid in advance to the Indonesian Tax Office at Jakarta, through P.T. Aneka Tambang, Jakarta at the same time as the remittance of advance payment as stipulated in paragraph below. The amount of M.P.S. Tax (about 2% of concerned freight earned) will be advised by P.T. Aneka Tambang, Jakarta to the Principal, if possible a few days before Principal remits advance payment in paragraph below. The final calculation of the tax will be made later.

Disbursement:

Advance Payment: At least 14 days before vessel's arrival at Cilacap vessel's Principal has to remit US$2,000 to the account of P.T. Aneka Tambang Jakarta, at Bank Dagang Negara, Gambir Branch Jakarta, as advance payment of the related ship's disbursement and inform P.T. Aneka Tambang, Jakarta as well as Pasir Besi Cilacap about the remittance accordingly.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the Vessel's Disbursement Account Statement.

AGENCY:

General Agents: P.T. Aneka Tambang, Head Office: Jalan Bungur Besar 24–26, P.O. Box 2513, Jakarta, Indonesia. Cable Address: Aneka Tambang Jakarta; Telex: Antam J 46323 Jakarta; Telephone: 360011 – 360019 – 260027 – 360035.

Sub-Agents: P.T. Aneka Tambang Unit, Pertambangan Pasir Besi, Cilacap. Jalan Pandanarang, Cilacap Central Java. Cable Address: Pasirbesi Cilacap; Phone: 339 – 142.

TJIREBON: 06.41 S. 108.33 E.

DOCUMENTS:

Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Not compulsory. Applications made through Agent or to Port Administrator via coast station Tjirebon radio.

ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35′ 30″ E. and the parallels of 06° 42′ 15″ S. and 06° 43′ 40″ S.

A light buoy on the position of 06° 42′ 10″ S. and 108° 36′ 20″ E. is placed on the guidance line to the entrance of the harbour.

RESTRICTIONS: Tjirebon roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong light buoy at port hand. Only ships with 4 m. max. draft can enter Inner Harbour and moor alongside wharves.

All other ships anchor at outer roads. The harbour is open for 24 hours. For vessels entering the harbour, a signal is given from signal station.

HEALTH: Usual international procedures.

TUGS: Tug services available. Order through Agents.

RADIO: Call sign PKZ2. Working freq. 6491.5 kc/s. and 8799.5 kc/s., watching freq. 6265–6285 kc/s. and 8204–8249 kc/s. Working time 0030–0130 hrs. and 0600–0700 hrs. GMT.

STEVEDORES: Arranged by Agent.

MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.

TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.

DENSITY: 1025.

FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.

FUEL: None available.

DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.

GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.

CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.

CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.

IDENTIFICATION CARDS: Preferably passports, seamens ID cards (issued by maritime authorities; vessel's country).

CONSULS: At Djakarta, 280 km. from Tjirebon.

REPAIRS: Light repairs only by local dockyard.

DRY DOCK: Graving dock of 600 d.w.t. capacity.

REPATRIATION: Can be arranged by Agents.

AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.

TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August); Maulud, Mir'adj and Idul Fitri determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitri (2 days) not guaranteed due to labour shortage.

POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.

SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.

DELAYS: Bad weather (mostly rain).

AUTHORITY: Port Administrator.

NOTES

Please also advise Shipping Guides Ltd.

Iran

ABADAN: 30.20 N. 48.16 E.

Port of Abadan situated on right bank of the Arvandrud, about 47 miles up river from Rooka Buoy.

OPERATORS: National Iranian Oil Company, Abadan Refinery.

DOCUMENTS/PILOTAGE: See "Khorramshahr".

ANCHORAGES: On arrival of pilot boat vessel can anchor with no depth restriction. On entering the Arvandrud the following are the recognized anchorages: Kasba Anchorage position about 2 miles above Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchorage position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water. Vessels which are too deep to pass out of the river on one tide will be required to anchor at Kasba.

RESTRICTIONS: The Port is open for day and night navigation with arrival and sailing being controlled by the tide. Vessels normally enter the Bar at 4 hours before high water at the Bar or at 2 hours after high water at the Bar. Those entering 4 hours before, arrive at Bawarda anchorage generally during flood tide, so must anchor for 6 hours awaiting ebb. Those entering 2 hours after high water, arrive Bawarda during ebb tide and berth on arrival, providing berth available, weather conditions permit and outward movements do not delay. Vessels always berth starboard side to stem the ebb tide and without using tugs and leaving Abadan 4 to 6 hours before high water at Bar.

MAX. SIZE: Max. draft at jetties 31 ft. fresh. Max. length 600 ft.

HEALTH: Inward clearance is affected on board after receiving free pratique. Also see "Khorramshahr" – "Documents".

RADIO: The National Iranian Oil Company Coastal Radio Station call sign EQZ. The station listens for various calls on the normal International Marine Calling frequencies. When close to may be contacted on 500 kHz transferring to 428 kHz for exchange of traffic. Traffic list sent at 5 minutes past odd hours.

TUGS: Not available.

BERTHING: While no changes have actually occurred in the production capacity of the Abadan Refinery, the number of jetties on the Abadan riverside have been reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintained and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be kept taut at all times to prevent surging on the jetties thereby breaking lines and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of taking bunkers are:

Jetty No. 3	Draft alongside	31 ft.
Jetty No. 9	,, ,,	28 ft.
Jetty No. 22	,, ,,	25 ft.
Jetty No. 16	,, ,,	25 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo are:

Jetty No. 7A	Draft alongside between 28 ft.-31 ft.
Jetty No. 7B	
Jetty No. 7C	

MEDICAL: Emergency cases: an ambulance will be dispatched on demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arrange transportation of patients, and advise Masters regarding necessary medical attention forms. If patient does not speak English he should be accompanied by an interpreter. Only in exceptional cases will a medical officer visit a patient on board.

TANKERS: Deliveries of the refined oil products of Abadan Refinery are effected to ocean-going tankers at Bandar Mahshahr since the inauguration of the products terminal of the National Iranian Oil Company at that port, therefore such shipments are not taking place from Abadan any more.

DENSITY: Fresh water.

FRESH WATER: Available at all jetties.

FUEL: Ships' bunkers are available; however not all types are available at all jetties, therefore, ship's Master should advise by radio the exact quantity and kind of bunkers required. Bunkers are delivered concurrent with loading unless otherwise requested by Master. Due to heavy bunkering commitments it is mandatory that vessels take their bunkers when convenient for the terminal, any delay incurred by a vessel taking bunkers after loading is the responsibility of the Master.

DEVELOPMENTS: A new berth "7D" under construction adjacent to berths A, B and C.

GENERAL: All other items, see "Khorramshahr."

AUTHORITY: National Iranian Oil Co. Abadan Refinery.

AGENT: See "Khorramshahr."

BANDAR ABBAS: 27.15 N. 56.19 E.

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Abbas. Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on Manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Abbas Port Radio EQI. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: Approx. position 27° 04′ N. 56° 04′ E. Depth 36 ft. The distance from the outer anchorage at buoy No. 1 to the port entrance is about 2 miles.

RESTRICTIONS: Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.

MAX. SIZE: Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.

RADIO: Bandar Abbas Port Radio EQI – 500 kc/s.

Port telecommunications working from 0600 hrs. to 2400 hrs every day.

VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio".

TUGS: 2 tugs 550 h.p. each, for harbour services, as well as for towage, in case of necessity.

BERTHING: Also see "Developments". Berthing after sunset is not permitted, and if a vessel arrives after sunset berthing will not take place until the following morning. Unberthing after sunset is permitted subject to overtime payments being made to Pilots and tug workers, but this arrangement is not official and is subject to mutual agreements.

Quay is 1,050 m. in length, 35 m. width and capable of accommodating 6 vessels each of 175 m. LOA.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Grain discharged at rate of 700 to 800 tons per day. No silos.

STEVEDORES: Bagged cargo can be discharged at the rate of 800/900 tons per day, working 5 hooks.

Working hours at the New Port are, 0730 to 1200 hrs., 1300 to 1800 hrs., and 1900 to 2300 hrs., making a total of 3 shifts.

CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment available ashore is as follows: 2 mobile cranes with lifting capacity of 18/20 tons; 2 mobile cranes with lifting capacity of 7 tons each; 2 mobile cranes with lifting capacity of 5 tons each; 3 forklifts with capacity of 3 tons; 7 forklifts with capacity of 2 tons; 2 tractors for towing trailers; 8 small trailers; 4 big trailers.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.

FRESH WATER: Fresh water is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fresh water (and bunkers) before or after loading as there is no connection at the ore loading berth. Fresh water also available ex-barge at the anchorage. Cost about US $15.00 per ton.

FUEL: Fuel is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.

CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs available at private workshops.

WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in Winter, and seldom exceeds 40 degrees centigrade in Summer.

AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged by BASCO Limited. Contact through Agent.

SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.

DEVELOPMENTS: An additional port area is under construction and is expected to be completed 1978/79. The new facilities will include the following:—

10 Jetties to be used for general cargoes. Length of jetties is to be 1,920 m., and there will be 162,000 sq.m. of covered sheds with an open area of 100,000 sq.m. Vessels of up to 30,000 d.w.t. will be accommodated alongside these jetties.

4 Jetties to be used for special cargoes. Length of jetties to be 720 m. with an open area of 60,000 sq.m. and suitable for vessels of up to 30,000 d.w.t.

4 Jetties for container cargoes. Length of jetties to be 960 m. with warehouses of 12,000 sq.m. and open area of 430,000 sq.m. suitable for vessels of up to 45,000 d.w.t.

1 special Jetty for cereal cargoes. Length of jetty to be 375 m. with a transit silo of 135,000 tons capacity and suitable for vessels of up to 100,000 d.w.t.

5 Jetties to be used for import/export of bulk ore cargoes. Length of jetties to be 1,140 m. with an open area of 220,000 sq.m. and suitable for vessels of up to 60,000 d.w.t.

5 Lash-Terminals with warehouses of 9,000 sq.m. and open area of 50,000 sq.m. suitable for barges of up to 500 d.w.t.

A special Ro-Ro Terminal which will accommodate vessels of up to 45,000 d.w.t.

A Bunkering Jetty, length 300 m. and to accommodate vessels of up to 30,000 d.w.t.

GENERAL: *Hotels.* The Gameron is a modern hotel equipped with air-conditioning and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about 4 in number are also available.

Provisions. There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.

Transport. Distance between port and the town of Bandar Abbas is about 10 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.

Laundry. Subject to time available, can be arranged by ship's Agent.

AUTHORITY: Port Director.

AGENT: Gulf Agency Co. (Iran) Ltd., PO Box 761 Bandar Abbas Iran, Cables: "CONFIDENCE" Bandar Abbas. Telex: Tehran 212507, 212856, 213043 and 213044 (stating for Bandar Abbas). Tel.: 4168, 4169.

BANDAR MAHSHAHR 30.27 N. 49.20 E.

(See Plan Book)

Refined Products Loading Terminal of the National Iranian Oil Company.

Iranian Flag: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Store Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position 29° 36′ 32″ N. 49° 34′ 47″ E. At end of approaches channel, near buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Shahpour, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers. Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in 29° 42′ 30″ N., 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel. Approaching vessels should steer for Khor Musa light float, in position 29° 36′ 32″ N., 49° 34′ 47″ E., and from there a course should be set along marked channel for buoy No. 12 in position 29° 56′ 03″ N., 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Shahpour Port Authorities up to Bandar Shahpour, and by Oil Company between Bandar Shahpour and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Shahpour is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot station. If for any reason a vessel is required to wait at any time at Bandar Shahpour, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Shahpour, will arrange for Berthing Master to board vessel at Bandar Shahpour anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers. Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar. 29° 59′ N., 49° 04′ E. and inner Khor Musa Bar 30° 02′ N., 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan. A rocky shoal, in 30° 12′ N., 48° 58′ E. approximately 10 miles North of inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18. Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar. Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel. After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Government Bandar Shahpour.

Bandar Shahpour. All inward bound ships required to anchor on arrival off Bandar Shahpour, where Pilot disembarks and a Government Medical Officer comes on board to grant pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Bandar Mahshahr Roadstead. Shortly after leaving Bandar Shahpour, the channel to Bandar Mahshahr is entered between the starboard hand beacon No. 1 (flashing white) and the port hand beacon No. 2 (temporarily removed). Channel well marked by light beacons to entrance of Bandar Mahshahr, at beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Shahpour Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.

ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa channel, West of Bandar Shahpour, and await arrival of Oil Company Berthing Master.

WIND AND TIDE:

Khor Musa Bar. Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, Mean Higher High Water has rise of 11.6 ft. and Mean Lower High Water has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.

Khor Musa. Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near inner Khor Musa beacon No. 18.

At ports of Shahpur and Mahshahr. Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. Mean Higher High Water has rise of 17.0 ft., and Mean Lower High Water rise of 14.6 ft. above Mahshahr chart datum.

Mahshahr Terminal. N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E., and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.

MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at berth No. 4 up to 43.5 ft. at berth No. 6.

Vessel up to 740 ft. LOA can be berthed day or night at any stage of the tide. Vessels lengths 741 – 780 ft. can only be berthed during daylight hours flood tide and unberthed on flood tide day or night.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members. Medical officer boards at Shahpour Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.

Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot vessel station.

Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10-in. loading arms, 6-in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosines	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

LPG LOADING: Propane and butane gas is loaded at No. 6 jetty at a rate of 1,500 t.p.h. Propane and butane cannot be loaded simultaneously.

As 16-in. fixed Chicksan liquid and vapour return arms are used for loading, certain ships are limited to one-side berthing only. To avoid delay of vessels, it is advisable to have vapour return connections on both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adapters.

Loading temperature of propane is about minus 48° F., and butane is about minus 23° F.

BALLAST: Tankers may discharge ballast ashore at Jetties No. 1, 2, 5 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at rate of 200 t.p.h.

MEDICAL: No medical facilities at terminal. Agents may arrange medical attention through Oil Company clinic in Abadan. In event hospital treatment required, patient would be taken to Abadan.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10-in. loading arms connected to 6-in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.

FIRE PRECAUTIONS: On arrival Shahpour Anchorage Master is given 6 copies of Fire and Safety Regulations. Fire Station and Emergency tel. 4111.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Shahpour. In emergency, the Oil Company may be able to undertake minor repairs. No main engine repairs whilst alongside loading jetties without permission from Terminal Superintendent.

TIME: GMT plus 3.5 hours.

TELEPHONES: Available at each jetty. If requested, telephone may be placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation centre opposite No. 2 jetty.

CURRENCY: The unit of currency is the Iranian Rial. It is illegal to use any other than Iranian currency ashore and heavy fines have been imposed for infringement of this regulation. Masters are requested to bring this matter to the individual notice of their officers and crew. Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.

AGENT: Gulf Agency Co. (Iran) Ltd., Bandar Mahshahr. Cables "Confidence". Iranian Head-office: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2278, 2280, 4755 and 4758; Cables "Confidence", Khorramshahr. Telex: 654033, 654000 and 654051. (answer back: "GAC IR").

If it is difficult to reach Khorramshahr with international telex messages, communicate via Tehran office, telex No. 212507, 212856, 213043 and 213044. Tehran, (answer back: "GAC IR"), stating "For Khorramshahr".

Ships' mail and spare parts for vessels calling at Bandar Mahshahr to be routed by flights arriving directly to Abadan Airport without transhipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

Cables from vessels should be sent via Khorramshahr Port Radio to "Confidence", Khorramshahr, as well as to "Confidence" Bandar Mahshahr.

BANDAR SHAHPOUR: 30.27 N. 49.05 E.

(See Plan Book)

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Shahpour Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

The names of consignees must be inserted on the manifest at the port of origin. This is due to the fact that names have not been inserted as per Iranian Customs authorities requirements.

In view of the above, Owners are kindly requested to make sure that manifests for Bandar Shahpour are properly made out at loading port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Shahpour Port Radio – EQN – 500 kc/s. If Agents required to arrange Pilot they should be informed well in advance.

Pilotage operated by Shahpour Authorities up to Shahpour. Pilot vessel approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Approach within 2.5 cables of pilot vessel. During adverse weather pilot vessel may proceed above Bar, in such cases, do not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with lightbeacons and buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

MAX. SIZE: Vessels of 29 ft. draft may enter port at any time. Higher drafts depending on state of tide. Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Shahpour. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Bandar Shahpour Port Radio EQN 500 kc/s.

Continuous watch on 500 kc/s. is to be maintained at all times while navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. 24 hours service.

TUGS: Normally not required, but available if necessary due to bad weather.

BERTHING: Berth No. 1 – 31 ft. depth alongside.
Berth No. 2 – 29 ft. depth alongside.
Berth No. 3 – 29 ft. depth alongside.
Berth No. 4 – 33 ft. depth alongside.
Berth No. 5 – 34 ft. depth alongside.
Berth No. 6 – 34 ft. depth alongside.
Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capacity about 2,000 tons per day. The loading installation consists of 2 powerful moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-shaped containers with a capacity of 30 tons each and a 600 m. long conveyor belt with a capacity of 175 t.p.h.

Sulphur: The shiploader travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loader maximum clearance. Radio aerials, and fore and back stays to be removed.

Due to high temperatures, every precaution must be taken to combat risk of fire.

Grain: All berths are available for grain discharge. Grain is bagged in holds and discharged in slings using ship's gear. At only one berth is discharge possible by vacuvators. All discharges into railway wagons and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepared to handle discharge with own gear.

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply on every jetty, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the inner anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside.

FUEL: Not available. In case of absolute need can be arranged at Bandar Mahshahr but jetty fees extremely high.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: See "Khorramshahr".

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At B. Shahpour minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

DEVELOPMENTS:

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	**
Extension of the 10-berth jetty	5	1,051.5	*
Extension of the 10-berth general cargo jetty	5	911.2	*
Construction of the 14-berth jetty	14	2,552	1979
Construction of the Lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	,,
Construction of the ore-loading facilities	1	220	,,

*Completed June 1978
**Completed December 1977 depth alongside 12.5 m.

SHIPMASTER'S REPORT:

Congestion; In the event of the port being congested vessels anchor initially in the vicinity of No. 12 buoy. Masters should then cable "Harbourmaster Bandar Shahpour" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Assadeh" keeps watch on 2182 k/cs and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Shahpour jetties to await turn.

No water or stores can be obtained at outer anchorage.

At inner anchorage water and stores can be obtained by launch but with some difficulty.

AUTHORITY: Port Director.

AGENT: See "Khorramshahr".

BUSHIRE: 29.00 N. 50.45 E. (See Plan Book)

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bushire Agents as far in advance of vessel's arrival as possible:
Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Compulsory. Application for Pilot to be made well in advance through Bushire Port Radio EQM, 500 kc/s. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: In outer port in (approx.) position 28° 58′ 30″ N., 50° 44′ 50″ E.

RESTRICTIONS: Entry and departure day or night. Depth in outer channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 35 ft. at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.

MAX. SIZE: LOA 600 ft. Max. draft see "Berthing".

RADIO: Bushire Port Radio EQM, 500 kc/s.

VHF: VHF radio, operating on International VHF Marine Channels 13, 16 and 25. MF call sign EQM available at following zone times: 0500 to 0800 hrs. and 1200 to 1500 hrs.

TUGS: Normally not used. In event of bad weather tug will assist berthing. 2 small and 1 large tug available.

BERTHING: Jetty 360 m. long.
Max. draft No. 1 Jetty – 28 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.

MEDICAL: 24 hours advance notice of medical requirements to be passed to Agents. Doctor available for vaccinations and inoculations.

FRESH WATER: Available at berths ex-pipe-line.

FUEL: Not available.

HATCHES: To be opened and closed by shore labour.

CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

CARGO GEAR: Discharge by ship's gear. Heavy-lift crane capacity 15 tons available. There are also some private cranes available, but these cranes are stationed in Bushire for limited periods only. The lifting capacity of these cranes varies from 35 to 100 tons.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs possible by local workshops.

AIRPORT: 7 km. from port. Regular flights.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be connected on board.

SHORE LEAVE: Permitted.

DELAYS: Occasional delays awaiting berth turn.

SHIPMASTER'S REPORT: 1976.

Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 and 20 tons capacity) at an approximate cost of 200 rials per ton. Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.

Identification Cards: Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

Fuel: Bunker fuels and lubricating oils not available.

Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.

SHIPMASTER'S REPORT: 1977.
Vessel discharged 726 metric tonnes of crane parts in 2 days (4 hatches).

ETA: To be given at least 7 days in advance through Bahrain Radio as telegrams take 2 days. From the outer anchorage the following Telegram must be sent to "Port Director Bushire" via Bushire Radio EQM 500 kHz: Anchor time, Draft, Length, Breadth, Cargo, Last Port.

Outer anchorage: Buoy No. 2 of fairway bearing 130° and 250° to the prohibited area in 10 to 20 m. water. The anchorage is not protected, but the holding ground is good, even in bad weather.

Pilots: The Pilot comes by a fast blue boat to the outer anchorage. There is 1 Pilot, also assistant and 1 docking master with 1 assistant, they only come out in daytime and good weather.

Tugs: There are 2 small and 1 large tugboat, which are used for turning the ship.

Pier: The 360 m. long pier has good wooden and rubber fenders and sufficient bollards. Ships always berth port side alongside. The starboard anchor is used for turning.

Clearance: The following documents are necessary:

5 crew lists.
1 health clearance.
1 vaccination list (cholera/smallpox).
1 store list.
1 crew effects list.

The stores and the radio-room are sealed, beer is not sealed.

Immigration: The immigration officials do not come aboard, the Agent takes all seamen's books ashore and exchanges them for shore-passes which are valid from 0600 hrs. until 2200 hrs. while the ship is in port. Before leaving the seamen's books will be returned in exchange for the shore-passes.

Provisions: Fruit and fish can be obtained, good quality and low prices at the local market.

Water: Water from the pier in any quantity and good quality. The pipe-line – pressure is only enough for heights of about 3 to 4 m., so that some "tricks" must be used larger ships.

Doctor: 24 hour's advance notice required.

Sea Protest: Notary public available, no consulates.

Bunkers: Not available.

Repairs: Were urgently required by the vessel and confirmed by Agent's, but nobody came on board.

Photographs: Taking of pictures not allowed, as Bushire is Military Base.

Crew-change: Very easy and can be done even on the outer anchorage when the ship has no clearance. The crew coming without delay directly from the airport to the ship in a launch which costs, for 1 trip (4 hours) only, US $71.00.

AUTHORITY: Port Director.

AGENT: See "Khorramshahr".

CHAR-BAHAR: 25.17 N. 60.37 E.

Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

CYRUS TERMINAL: 29.01 N. 49.28 E. (See Plan Book)

Oil loading terminal of the Iran Pan American Oil Company.

LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N., Long. 49° 28′ 51″ E. Storage barge (*Pazargad*). Lat. 29° 01′ 57″ N., Long. 49° 29′ 30″ E.

APPROACHES:

Obstructions. In addition to submarine export mooring and storage vessel *Pazargad*, various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows:

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38.7″ N.	49° 27′ 23.1″ E.
C–4	29° 00′ 15″ N.	49° 32′ 00″ E.
C–5	29° 02′ 52″ N.	49° 31′ 34″ E.
C–6	29° 03′ 57″ N.	49° 29′ 57″ E.
C–7	29° 03′ 31.2″ N.	49° 29′ 05.6″ E.
C–8	29° 03′ 31.2″ N.	49° 30′ 48″ E.
C–9	29° 02′ 15″ N.	49° 29′ 57″ E.
C–10	29° 03′ 33″ N.	49° 27′ 22.5″ E.
C–11	29° 04′ 51″ N.	49° 26′ 31″ E.
C–12	29° 03′ 33″ N.	49° 23′ 56.5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39.5″ E.

Safest and most desirable direction of approach to Cyrus Terminal is from S.E. Due to numerous obstructions noted above any approach should be made with extreme caution.

Navigational Aids. All structures located within Cyrus Terminal area display interrupted quick flashing white lights and sound a fog horn. The storage barge *Pazargad* displays, as required, those day and night signals as prescribed by articles 4 (b) and 11 (c) of International Rules. The 6 mooring buoys for the Cyrus Terminal are not lighted.

DOCUMENTS:

Bill of Health.
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consulate. If vessel is in ballast, no legalisation dues).
Clearance (from last port).
Register.
5 Crew Lists.
Passenger Manifest (if any passengers are on board).
5 Store Lists.
Bonded Store List.

PILOTAGE: Vessels will be boarded by Mooring Master of IPAC within 2 miles, approximately 180° true from *Pazargad*. Mooring Master will advise Master on approaches to berth, mooring and unmooring, connecting and disconnecting submarine hose and all other operations within berthing area. All manoeuvring within loading berth area shall be done only in accordance with advice of an IPAC Mooring Master, subject to understanding that Master shall remain solely responsible for safety and proper manoeuvring. Master or qualified deck officer must be on bridge at all times while ship manoeuvring.

Vessels requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. If at night, adequate lighting must be rigged overside for Mooring Master to approach side of ship and climb ladder safely. Adequate searchlights should also be rigged on both wings of bridge when mooring at night, to assist in running lines to buoys.

ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. between meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms.

Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and East of Long. 49° 31′ 00″ as there are numerous flow lines on sea bed connecting various structures, storage tanker and submarine terminal. During Winter months, November through March, severe South-easterly storms often encountered with little or no indication of impending storm. Vessels at anchor, and loading in submarine terminal, must have engines ready with full power for immediate use. Masters cautioned to use adequate scope of chain while anchored awaiting berth.

RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

MAX. SIZE: Ship loaded by means of submarine pipe-line and 1 hose at 1 loading berth, located in approximately 140 ft. of water. Mooring buoys numbered 1, 2, 3, 4, 5 and 6. Starting with No. 1 East of mooring and numbered consecutively in clockwise direction. Max. capacity 70,000 d.w.t., max. length 950 ft.

HEALTH: The rules governing quarantine are the same as found in other ports of the world. Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: *Advice of Arrival:* Incoming tankers must send incoming ETA at least 3 days before arrival. The OSCO main radio station at Abadan will handle IPAC's radio traffic, pre-arrival messages, etc., for vessels calling Cyrus Terminal. The station call sign is EQZ. Messages for IPAC should be prefixed "Cyrusiran IPAC" with copy to Agent. Further ETA messages should be sent when vessel 24 and 12 hours distant from Cyrus Terminal and at any other time any appreciable change occurs in original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Radio Watches: While at the anchorage off Cyrus Terminal, vessels should maintain normal listening watches on both HF and WT.

VHF: Cyrus Terminal base (*Pazargad*) is equipped with VHF radio telephone and maintains a radio watch. Vessels arriving at Cyrus Terminal may communicate with the *Pazargad* on Channel 6.

TUGS: A charge for each tug movement will be made in accordance with rates established by IPAC. When tug/tugs are standing-by vessel mooring/unmooring, for use if required, the full fee will be charged. IPAC maintains launches to assist in mooring and unmooring.

BERTHING: (Also see "Max. Size"). Tankers to have ready: *(a)* Windlass and deck winches fore and aft. *(b)* 12 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5.5 tons. *(d)* 1 bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. *(e)* Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of 6 steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a 2 heading basis, using 12 mooring ropes (4 bow, 4 beam, and 4 quarter).

LOADING: Maximum crude oil loading rates for a tanker using one 12-in. deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p.h. Requested that ships receive oil as fast as it can be delivered, with due regard for safety, also that any fittings on manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into the ships, be removed before arrival at terminal. Preferable that connections be provided so that a 12-in. deck hose can be used.

BALLAST: It is the ship Master's responsibility to see that no oil (crude, bunker, diesel or bilge water) is pumped or spilled overboard from the ship. Drip pans, etc. should be used at all times, especially when disconnecting hoses in order to prevent any loss of oil overboard. The waters in and adjacent to the Cyrus Terminal must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged inside of a circle 50 miles radius around the Cyrus installations.

Discharge of oil mixture from tankers while enroute is prohibited except when the following conditions are all satisfied.

1. The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.
2. The total quantity of oil discharged on ballast voyage does not exceed 1/15,000 of the total cargo carrying capacity.
3. The tanker is more than 50 miles from the nearest point on the Iranian coast.

Masters are warned that when disposing of dirty ballast or bilge waters (50 miles or more off Cyrus), all pipe-lines, sea suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

A vessel must have sufficient ballast for safe manoeuvring. However, by a careful watch of the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast, thereby lessening any possibility of infringement of the pollution restrictions of the area.

As soon as practicable, after arrival all vessels' tanks will be inspected for evidence of oil in ballast, and during discharge of ballast similar inspection will be continued. In order to ensure the cleanliness of the ballast during or after the berthing of tankers, a sample of the said ballast will be tested before discharging. Ballast water so tested should prove that the oil content of the discharge is less than 30 parts per million of the mixture. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 50 miles from the Cyrus installations and there, completely discharge all oily or dirty ballast.

The above rules also apply to bilge water discharged from the vessels.

Any vessel required to return to a position at least 50 miles off Cyrus, for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time, loses any priority held for loading.

Upon return from the sea, the vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

The contamination with oil, when discharged at Cyrus Terminal or at anchorage must be such that even on a clear sunny day no oil could be traced on the surface of water.

If, during the first inspection or during progress of loading, it is revealed that a ship's tanks are not oil-tight, the ship will be rejected, or refused further loading. Ship will not be accepted for loading later, unless satisfactory evidence, duly certified by Lloyds or American Bureau of Shipping Surveyors, or any other recognized survey agency, of effective repairs is submitted.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship, to the satisfaction of the Mooring Master, in order to readily detect any oil on the surface of the sea and take appropriate action. Vessels unable to illuminate the sea satisfactorily, may not discharge ballast during darkness. Vessels should provide suitable flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval of both Terminal Superintendent and Petroleum Inspector is secured.

MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.

DENSITY: Salinity approximately 20% more than normal sea water.

TIDE/CURRENT: Tidal range between 6 and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.

FRESH WATER: No fresh water available.

FUEL: No bunkers or lubricants available.

FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

REPATRIATION: No facilities.

TIME: GMT plus 3.5 hours.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS:

Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

Classification agencies: Lloyds Register of Shipping (maintain office with Surveyor in Khorramshahr). American Bureau of Shipping (to be arranged from Bahrain where nearest ABS office available, with at least 5 days advance notice. A Surveyor available in Tehran and Khorramshahr). Bureau Veritas (Agents and Surveyor in Khorramshahr). Norske Veritas (Agents in Khorramshahr). German Lloyd (Agents and Surveyor in Khorramshahr).

GOVERNMENT OFFICIALS: Iranian officials, such as the Customs Officers, Immigration Officer and Quarantine Officer, are available on the barge *Pazargad.* Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials. All vessels calling at Cyrus Terminal must provide an accommodation ladder, rigged for Iranian officials.

AUTHORITY: Iran Pan American Oil Co.

AGENT: See "Khorramshahr".

Ships' mail for vessels calling Cyrus Terminal to be addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHARG ISLAND: 29.14 N. 50.19 E. (See Plan Book)

A. DARIUS TERMINAL. Oil-loading terminal of the Iran Pan American Oil Company.

B. KHARG TERMINAL. Oil-loading terminal of the Iranian Oil Exploration and Producing Company. Including Sea Island Terminal.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate at port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).

Health Declaration (International Health Form to be filled out by Master on arrival).

Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).

Clearance (from last port).

Register.

Crew List.

Passenger Manifest (if any passengers are on board).

Store List.

Bonded Store List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Khargu Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall. 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, 1 or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers. Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about 0.25 mile seawards along whole coast line. To S.W. of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon. 29° 12′ 46″ N., 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 215° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon. 20° 15′ 02″ N., 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon. 29° 20′ 20″ N., 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Kharg Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon, 29° 35′ 20″ N., 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles N.W. of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, 1 flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-east Buoy. 29° 11′ 29″ N., 50° 19′ 51″ E. Red can buoy, white light, 1 flash every 2 seconds. Near edge of reef, S.E. Kharg Island in 54 ft. of water.

North-east Buoy. 29° 14′ 51″ N., 50° 20′ 10″ E. Red conical buoy, white light, 1 flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy. 29° 16′ 12″ N., 50° 20′ 27″ E. Red conical buoy, white light, 1 flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts. At South end of Kharg Island a high radio mast painted red and white positioned at 29° 12′ 47″ N., 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at 29° 14′ 10″ N., 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb. On highest point of Kharg Island, 29° 14′ 57″ N., 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb. On N.E. part of Kharg Island at 29° 15′ 10″ N., 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees. On Khargu Island, at 29° 18′ 45″ N., 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards. On North, S.E. coast and S.W. of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area. The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of oil loading jetty, and await arrival of Berthing Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages. 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines. Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms. Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(c) Harbour Area (East): The area surrounding the "T" jetty and extending approximately 2.5 km. offshore from the East coast has been declared as a Harbour Area.

(d) Harbour Area (West): The area surrounding the sea island and extending to a distance of approximately 4 km. offshore has been declared as a Harbour Area. The Harbour Area is used by vessels manoeuvring to and from the oil loading jetty. No vessel is allowed to enter or anchor within these areas unless a Berthing Master is on board.

Cautions. (a) Unlit mooring buoys at S.E. of Kharg Island (see Darius Terminal). (b) Oil Platforms to S.W. of Kharg Island. (c) Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

RADIO: OSCO main radio station at Abadan will handle radio traffic. Call sign EQZ. Vessels bound for Kharg Terminal should prefix messages with "Khargiran", and vessels bound Darius terminal should prefix with "Khargiran IPAC", in both cases with copy to Agents.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on station EQZ on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

Schedule of watch (GMT) (Hours)	*Listening watch frequencies* kHz	*Transmitting frequencies* kHz	*Receiving frequencies* kHz	*Remarks*
Continuous	500	500	500	Distress: Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405–535	Traffic list every 2 hours from 0105 to 2305 hrs. GMT.
0400–0700	8356–8374	8471	8374–8460	
0700–0900	12534–12561	13069.5	12561–12689	*Traffic lists every 2 hours from 0405 hrs. GMT.
1000–1300	12534–12561	13069.5	12561–12689	
1400–1700	8356–8374	8471	8374–8460	
1700–1830	4178–4187	4294	4187–4231	

*During scheduled watches on HF while station/EQZ is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according their schedules of watch.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 mc/s. Other channels, available after contact has been established are: No. 12, 11 and 10. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

HEALTH: Tankers calling at Kharg Island and requiring radio pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against smallpox or cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights	*Tidal streams*	
L.A.T. = +0.4 ft.	Slack water	10.75 hrs. before HHW
MLLW = +1.8 ft.	Ebb (full)	7.75 hrs. before HHW
MHLW = +3.6 ft.	Slack water	4.50 hrs. before HHW
MSL = +4.1 ft.	Flood (full)	1.50 hrs. before HHW
LLHW = +4.7 ft.	Slack water	1.00 hr. after HHW
MHHW = +6.5 ft.	Ebb (max.)	3.75 hrs. after HHW
H.A.T. = +8.2 ft.	Slack water	6.50 hrs. after HHW
Heights in feet above Chart Datum	Flood (max.)	9.50 hrs. after HHW
		Times are approximate only

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

LAUNDRY: No laundry services available.

IDENTIFICATION CARDS: Each seaman will be issued with a pass which will be punched when crossing the jetty limits going out and in, and may be used once only. In addition to this pass, seamen should carry an Identification Card or Vaccination Certificate, bearing the owner's photograph.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives, for most nations, maintain offices in Teheran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

REPATRIATION: The following is part of a letter from Oil Services Company of Iran to all shipping agencies Kharg Island.

"You are well acquainted with the fact that under normal operating circumstances only a very limited amount of sleeping accommodation is available at the Kharg United Seamen's Services Centre, which is the only, repeat, only available premises at Kharg for overnight lodgings. At present the United Seamen's Services Centre is undergoing modification, and when this is completed there will be only 18 beds available. It is not O.S.C.O. policy to permit building of any additional sleeping accommodation.

"Due to the above limitation it will now be our policy to limit the number of people sleeping overnight in the United Seamen's Services Centre to 18 and no other Crew members will be accepted for overnight accommodation.

"It will be the responsibility of agencies to co-ordinate crew changes so that no overload is imposed on U.S.S. Centre.

"In order to ensure this, all crews arriving from abroad will have to travel via Abadan where ample overnight accommodation is available and where they can be retained until required at Kharg. Ship's crew leaving their ships should be retained aboard until a suitable commercial or charter flight is arranged.

"Any Crew members arriving on Kharg direct from Teheran will not be allowed to land at Kharg unless

1. The vessel they are joining is at Kharg, or will be at Kharg before 0100 hrs. next day.
2. The Agent has a written agreement from the manager of the U.S.S. that sleeping accommodation is available.

"If neither provisos 1 or 2 are complied with the Crew members will be oncarried and accommodated in Abadan at the Agent's expense.

"To summarise: no sleeping accommodation is available at U.S.S. Centre unless the Agent obtains written agreement to that effect from U.S.S. Centre manager. Agents not having written agreement for sleeping accommodation will either have to return Crew members to their respective ships or arrange commercial or charter flights for them to stay in Abadan.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3.5 hours in Winter and plus 4.5 hours in Summer.

A DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Island 29° 12′ 40″ N. 50° 20′ 40″ E.

LANDMARKS: *OSCO (Iranian Oil Services Company) Jetty:* Approximately half a mile North of the mooring is a "T" shaped wharf for the berthing of Supertankers.

Khemco Jetty: Approximately quarter mile West of the terminal is a dolphin type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuous gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg South Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous gas flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435 ft.

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flares burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distances. However, on occasions, 1 or more or all of the flares may not be burning.

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio contact with IPAC when 3 days distant from Kharg Island and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hour ETA message to IPAC, giving the best estimate of ship's arrival time at the Terminal. This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to IPAC when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time when an appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival, and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Ship-to-shore communication: Kharg Terminal (IPAC & OSCO) is equipped with VHF radio-telephone, using international frequencies. A continuous watch is kept on the international calling and emergency Channel No. 16, frequency 156.80 mc/s. Other Channels which are available after contact has been established are:

Channel	*Frequency in mc/s.*	*Call sign*
IPAC 14	156.700	IPAC Marine
IPAC 6	156.300	IPAC Marine
OSCO 12	156.600	Kharg Pilot
OSCO 20	157.000	Kharg Pilot

Masters are recommended to use this facility when within range, particularly when approaching the port. In poor visibility, when a vessel's approach may not be observed from the shore, VHF communication may be the means of avoiding delay in mooring. While a ship is in mooring, communication will be by portable VHF radiotelephone units. The Mooring Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units becoming inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches with station EQZ on W/T and Kharg Terminal on VHF.

MOORING: Vessel requested to have Pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Mooring Master will board 2 miles seaward of the Terminal sea-buoy. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by IPAC line handling crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Starting with No. 1. East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, each with not less than 120 fathoms of chain. *(b)* 9 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hoses at 1 loading berth, located approximately 1 mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12-in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 t.p.h.

In order to save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12-in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (· – –) on blinker light. To attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at OSCO main jetty having obtained nomination through Iranian Oil participants in London. Tankers loading crude oil at OSCO "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details)

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22.0 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	Depth of water (metres)	Maximum capacity D.W.T.*	Loading and bunker arms†	Height limits ship's manifold in metres above chart datum
1	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
2	19.8	38,000	4×12 in.	3.4 to 18.9
3	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
4	20.1	65,000	5×12 in.	3.4 to 18.9
5	21.3	250,000	3×16 in. 2×12 in.	5.8 to 25.3
6	20.4	120,000	3×16 in. 2×12 in.	4.3 to 23.8
7	18.3	175,000	3×16 in. 2×12 in.	4.3 to 23.8
8	19.2	45,000	5×12 in.	3.4 to 18.7
9	17.4	140,000	3×16 in. 2×12 in.	4.3 to 23.8
10	17.7	90,000	5×12 in.	3.4 to 18.7

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

† 12 in. Bunker arms at all berths. All Chiksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berths Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 4 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in 29° 13′ 29″ N., 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	Depth of water (metres)	Maximum capacity D.W.T.	Loading and bunker arms	Height limits ship's manifold in metres above chart datum
11	32.0	500,000	4×24 in. 2×16 in.	6.1 to 33.5
12	29.5	300,000	4×16 in. 2×12 in.	6.1 to 28.3

The Sea Island has been extended to the Northward to create two new berths, 14 and 15.

Berth	Depth of water (metres)	Maximum capacity D.W.T.	Loading and bunker arms	Height limits ship's manifold in metres above chart datum
14	25.9	300,000	2×16 in. 4×16 in.	6.1 to 28.3
15	27.4	500,000	2×16 in. 4×24 in.	6.1 to 33.5

Loading Arms: Luceat – quick coupling.

Effective Loading Rate: Berth No. 14 – 16,000 t.p.h. Berth No. 15 – 30,000 t.p.h.

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chiksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System. Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations. Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position. No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chiksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chiksan loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of sand, by gravity flow through 4×48-in. diameter pipe-lines and to the Sea Island by 2×78 in. shorelines and 2×56 in. sealines. Loading rates of up to 15,000 t.p.h. to one berth can be achieved at Kharg Terminal. Up to 60,000 t.p.h. can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. 2 grades available, marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 t.p.h., and bunkering will normally commence before loading cargo. Only fuel oil available at Sea Island berths.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. 5 additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SHORE LEAVE: Fully air-conditioned Recreation Centre operated by United Seamen's Services, situated close to shore end of the trestle to the Oil Loading Jetty. Facilities include: cinema, film exchange, restaurant, dining-room and bar, library and waiting-room, PX gift shop, 2 billiards and snooker tables, 2 table tennis tables, darts, chess, etc., official money exchange.

Note: Shore leave restricted to grounds and buildings of Recreation Centre only.

SAFETY:

Amendment to Safety Regulations and Safety Inspections.

To keep Safety Regulations and Safety Inspections in line with current world-wide practice, the following new Rules will be put in force immediately.

1. At least 50% of the crew including sufficient senior officers shall be available on board at all times to deal with emergencies.
2. Two dry powder extinguishers plus one fire hose to be available at the manifold at all times.
   Note: This is especially important before connecting lines.
3. Present funnel deck hoses, now only required at inside berths, are now required on all berths including Sea Island.

SHIPMASTER'S REPORT: 1977:

There are 4 loading berths on the Sea Island. There are also maximum displacement limits for coming alongside these berths ballasted or with part cargo. On the inside berths the top limit is 175,000 tons and the outside berths it is 250,000 tons displacement.

Also the outside (seaward) berths can supply 16 in. reducers for loading cargo. Both seaward berths have a maximum depth of 106 ft.

For berthing at No. 15, vessel used 10 lines each end – 2 head/stern lines, 4 breasts and 2 springs. The ship is 330,000 d.w.t. We used 4 tugs, 1 each end on the hook and 2 pushing at the side. I feel Mariners could be warned that these tugs have very heavy wires which takes time and plenty of men to handle.

We also found that we needed 3 Crew Lists.

Ships cannot be berthed if the wind is N.W'ly over 20 knots.

C. KHEMCO TERMINAL: (Additional requirements and details)

OPERATOR: Kharg Chemical Company, Ltd. (Khemco), Tehran, Iran. Cable Address "Chemkharg" Tehran. Telex: 2402 Khemco Tn.

LOCATION: Khemco Terminal dolphin jetty is located at the S.E. corner of Kharg Island 29° 12′ 45″ N. 50° 20′ 05″ E.

APPROACHES: Vessels entering Kharg Island Roads must not approach or anchor West of Long. 50° 21′ 30″ E. (being approximately 1 mile East of Khemco Terminal), unless a company's Berthing Master is on board.

PILOTAGE: Company has own Berthing Masters, who will board vessels outside the port area and will pilot and berth the vessel alongside Khemco jetty. Berthing Masters will also carry out the duties of safety officer.

Vessels with the Berthing Master on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured on the leeside of the ship for the Berthing Master. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the Mooring Masters, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.

NOTICE OF READINESS: Notice of readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.

RESTRICTIONS: Vessels can be berthed day or night in 2 directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.

MAX. SIZE: Length of pier is 1180 ft. with maximum of 42 ft. water alongside at MLLW.

RADIO: The OSCO main radio station at Abadan will handle Khemco's radio traffic. The station call sign is EQZ. Messages for Khemco should be prefixed with "Khargiran Khemco", with copy to Agent.

Advice of Arrival: It is important that ships establish radio contact with Khemco, when 3 days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, Agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.

TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by the Company. Normally 2 tugs are used for berthing and 1 for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.

MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. 4 powerful mooring launches are provided by the Company and normally 1 is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during Winter periods, some additional 4 lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of 1 main and 8 smaller dolphins. 4 on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.

BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by a company's Berthing Master at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take 2 tugs (1 to the bow and 1 to the stern), alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide an efficient gangway with a net rigged underneath. During the hours of darkness, they shall install adequate safe lighting for the gangway. These lights are in addition to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hooks, fitted on all dolphins and under normal conditions 1 tug is used on the hook at the bow of the vessel in order to clear her off the berth. Usually the documents are signed before departure, unless the berth is needed for another ship.

BALLAST: A. Rules and Regulations. Vessels arriving at Kharg should maintain a reasonable draft fore and aft for safe manoeuvring and berthing. When conditions permit, the Berthing Master will advise the Master to commence discharging ballast. It is the Master's responsibility to see that dirty ballast, whatsoever, is not pumped or spilled overboard. Only clean ballast or bilge water may be discharged within 50 miles of the coast-line. In the event of contaminated ballast or bilge water, the vessel will be required to divert this material to a ship's slop tank. Otherwise, the vessel may be unberthed and returned to a point not less than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipelines, sea suctions, strainers and pumps. Ships will not be accepted for loading if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore to discharge dirty ballast, or for any similar reason, automatically nullifies any "Notice of Readiness" already tendered and loses any priority held for loading. The vessel will be entered for loading at the time of second arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitted to load cargo and discharge clean ballast at the same time provided all safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pier. Ships will be allowed to draw sea water ballast while alongside.

LOADING: A. Ship's Gear. Although the jetty is equipped with a boom to handle loading hoses, ships are requested to rig jetty side boom in a proper and safe manner for possible use. Masters will be responsible for ensuring that the ships gear or fittings are in good working order and will not in any way interfere with or hamper the working of the facilities.

B. Inspection. After the vessel has been berthed and all formalities carried out the vessel will be boarded by the loading Master. A joint inspection will be made by an authorised ship's officer and the loading Master after the exchange of information and documents. If the ship's tanks, piping or equipment are in such condition that a potential hazard exists, the ships will be refused permission to load until such hazards are corrected. In any case, the owners or charterers of the ship will be notified of any delay or refusal to load because of hazardous conditions and any expense due to such delay or refusal to load will be borne by owners.

If the ship does not arrive with tanks and/or piping sufficiently cooled to permit loading, the time required to cool down shall not be counted as lay time. Any expenses, including LPG furnished by company, demurrage, etc., involved with the cool-down period and operation shall be borne by the owners or charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in its tanks, after purging from a previous cargo of ammonia or other gas to prevent contamination of shore lines and facilities, the inert gas should be vented if possible before ship is moored. If the ship's tanks to be loaded previously contained a product different from what is to be loaded, the Master shall verify that the tanks are clean and ready to receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loading will begin until the ship is safely moored with fibre mooring lines, gangway lowered and secured, the ship grounded and ground tested, ship's and shore emergency fire hose pressurised and ready for use, fire wire in place, and ship/shore communications tested and in good working order.

All loading personnel will wear fibreglass hard hats, leather-palmed gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks, and sandals or shoes that do not have spark-generating material, such as steel nails, cleats, toe or heel plates. Non-sparking tools will be used in making hose and ground connections. Silk clothing or headgear will not be permitted due to its affinity for collecting static electricity. Ship's grounds will be tested for continuity to shore before product or vapours pass through hoses.

Since the LPG may not contain an odorant, particular care shall be taken that the atmosphere does not become explosive. If there is no air movement, explosimeter readings will be taken hourly, and if an explosive atmosphere exists, loading shall stop until conditions change. Prior to loading the main cargo a small quantity of propane and/or butane will be loaded or circulated initially for cooling down purposes. The amount set aside for cooling down will depend on whether the cool down is for the ship's lines or ship's tanks. Generally, the ship's lines will be cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained in the bottoms of the ship's cargo tank during the trip to Kharg Island, the tank vapour space and tank walls are warmer. For a period of about an hour while low temperature circulation of the shore lines continues, a small amount of propane may be taken by the ship from cargo holds and sprayed into ship's tanks. This method cools the upper parts of the ship's tanks and vapour spaces. If propane is taken from shore lines, this is replaced from shore tankage as the circulating pump suction is "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkheads should be frequently monitored by ship's personnel for cargo leakage.

The measures for dealing with any leakage to prevent the temperature of the hull structure from falling below a safe level depends upon the ship's design. The Master shall have standing orders for dealing with any leakage observed on the ship and shall so inform the Loading Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses; propane 8 in. (with 8 in. ASA 150 flanges); butane 8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 psi at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (2 lines)	10,900 barrels per hour
Butane (2 lines)	7,800 ,, ,, ,,
Propane (1 line, pumping)	7,000 ,, ,, ,,
Butane (1 line gravitating)	3,900 ,, ,, ,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24-hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipe-lines/vent system and/or liquification system shall be manifolded so that only those pipe-lines connected to the ship's tank being loaded will be open. All other pipe-lines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Packaged goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while re-aligning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.

(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.

(c) The hose valves and ship's manifold valves must be shut.

(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.

(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.

(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the owners or charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contain residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 t.p.h. via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore communications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that 1 line could be used to pull a man out of a hatch. For each man working in the hold 1 man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower down-spout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimise this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24-hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty. However, 2 grades (marine fuel oil and marine diesel oil) are available at OSCO main jetty. This is supplied to vessels having made previous arrangements and obtained nomination.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-Summer are extremely warm and humid with the temperature reaching 117°F. (47°C.) and a relative humidity ranging from 10% to 98%. The Winter months, from November to March, are pleasant with a minimum temperature of about 39°F. (4°C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87°F.
Mean minimum temperature	66°F.
Extreme maximum temperature	117°F.
Extreme minimum temperature	39°F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the N.E. through S.E. The prevailing wind for most of the year is from the N.W., but during the Winter period strong S.E. storms occur with very little warning. The Khemco jetty is sheltered from the N.W. winds.

D. Tides. The tidal range is between 7 and 8 ft., with a maximum rate of about 1.5 knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63°F. to 97°F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all port's safety rules and regulations.

GENERAL: *(a)* Shore Leave. Shore leave at the terminal must be arranged between Master and ship's Agent. Sufficient personnel must be on board at all times for emergencies.

(b) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(c) Light Dues. A charge of half a Rial per g.r.t. is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East Navigation Service. The company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(d) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(e) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(f) Repairs. No workshops or other facilities for repairs at Kharg Island.

(g) Customs. There are customs and other official offices on the Island. Vessel will normally be boarded by a custom director, immigration officer and director of Ports and Shipping.

(h) Consulates. No consulates on Kharg Island. Nearest consulates or diplomatic representatives are at Khorramshahr.

(i) Marine Surveyor. No marine surveyor on the Island, but can be available at 48 hours notice through ship's Agent.

(j) Recreation Centre. Use of Seamen's Club will be cleared through NIOC and Consortium. If used, transportation to and from Club will be provided by the Agent.

(k) Supplies. No provision of any kind is available at Kharg Island. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(l) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

AGENTS: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2280, 2278, 4755/58. Cables: "Confidence", Khorramshahr. Telex. 654033, 654000, 654051 (answerback: "GAC IR").

If difficulty is experienced in reaching Khorramshahr with international telex messages recommend you communicate via Tehran office, Telex No. 212507, 212856, 213043 and 213044. Tehran, (answerback: "GAC IR"), stating in your message "For Khorramshahr".

Recommend that all urgent communications be sent by cable directly to Khorramshahr.

Ships' mail and spare-parts for vessels calling at Khemco Terminal are to be routed by flights arriving directly to Abadan Airport without transhipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHORRAMSHAHR: 30.26 N. 48.10 E.

Khorramshahr lies at confluence of Karoon and Shatt-el-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(a) Iraqi Quarantine Officer. Vessels arriving Outer Bar (Shatt-el-Arab Pilot station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of Crew List and crew vaccination certificates for presentation to Quarantine Officer.

(b) Iranian Quarantine Officer. Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires 1 copy Crew List, and all vaccination cards should be available for inspection.

(c) Customs Officer. Customs officer boards ship at anchorage or alongside Khorramshahr jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).
Stores List (2 copies).

(d) Port Authorities.

Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled in and returned to the port Berthing Master.

(e) Agents.

Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions etc. (if any) be reported early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-el-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by River pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-el-Arab boarded by river Pilot from Pilot vessel situated in proximity of Rooka Buoy (29° 49′ N. and 48° 47′ E.), showing a white flash every 6 seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by River Pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-el-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-el-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a max. depth of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. max. draft for crossing Karun Bar and also at Khorramshahr (Failieth) anchorage is 29 ft., fresh water. Max. draft at Karun Bar in December 1976 was 26 ft. so it is advisable to check before vessel proceeds to the port. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos. 8 and 9 is 29 ft.

SPEED RESTRICTIONS: Engine speed must be reduced well in advance so that the vessel's speed when passing jetties at Khorramshahr and Abadan will not exceed 3.5 knots for vessels with more than 20 ft. draft, and 5 knots for all other vessels of over 100 g.r.t.

The same speed restrictions will apply in the Shatt-el-Arab when passing ships at anchor with barges or other vessels moored alongside, tugs with barges or other vessels in tow, and vessels engaged in dredging or other salvage work.

SHIP'S REGISTRATION: Ships have to register upon arrival at outer bar by sending telegram to Port Director Khorramshahr via EQK Khorramshahr Port Radio. At present the vessel, after registering her turn should wait at outer bar. If vessel proceeds to another port for discharging, her registration will not be valid. Vessel after registration of berthing turn for Khorramshahr can however call at Abadan Port during waiting period without losing her turn.

HEALTH: See "Documents". Inward clearance is effected on board after receiving free pratique.

RADIO: Khorramshahr Port Radio, call sign EQK, 500 kHz, 2182 mHz.

Khorramshahr Harbour Master can be contacted on VHF Channels 13 and 16, 18 and 25.

Vessels destined for Khorramshahr should send a radio message to the Port Director Khorramshahr and to the ship's Agent 24 hours prior arrival at the Shatt-el-Arab Pilot Station (Outer Bar). Times should be quoted in GMT. Also see "Ship's Registration".

TUGS: The Port Organisation of Khorramshahr owns 2 tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment of tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive 9 ocean-going vessels at a time.

CARGO HANDLING: *(a) Jetty.* All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are no shore cranes and no floating cranes available for the purpose of discharging cargo. All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(b) Barges. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also employ watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees. Against these services Agents are presently collecting Rials 110 per ton of 1,000 kilos as a landing charge from the consignees. This rate has been agreed upon between the Agents and the Chamber of Commerce of Khorramshahr.

(c) Cranes. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

There is 1 electric crane permanently installed at Failieh Creek with lifting capacity said to be 100/120 tons. This crane can be used for discharging cargo from barges at Failieh barge jetty.

(d) Storage. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(e) Wagons/Trailers. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24-hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in Summer and of 9/11 hours in Winter is unavoidable.

(f) Delivery of cargo discharged at jetty. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's Agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily, under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to Port Authorities and an official Process-verbal will be drawn by respective warehouse-keeper corresponding to remarks noted at the time. This arrangement is to prevent any delay to operations of the vessel.

(g) Overtime Costs. Wages of port staff on board for official hours are borne by port Authorities but overtime and food allowance are paid by carriers.

(h) Port Working Hours (Ordinary). Summer 0600 to 1400 hrs.; 1700 to 0100 hrs.; Winter 0700 to 1500 hrs.; 1700 to 0100 hrs. (Overtime) 0100 to 0500 hrs.

24 hour discharging at jetty is compulsory. The only stoppages are for lunch and dinner, 1 hour each. In Summer season, however, due to heat, discharging at jetty is stopped from 1400 to 1700 hrs.

(i) Liquid Cargo. Due to non availability of tank barges as well as storage area at Bandar Shahpour, vessels carrying liquid cargo are bound to call at Khorramshahr, where consignees have their own tank-barges and storage tanks. This being the case, the Port Authorities do not divert vessels carrying liquid cargo, to Bandar Shahpour.

In the port of Khorramshahr, importers of vegetable oil and other liquid commodities, have arranged their own storage area outside Customs yard, and liquid consignments will be received directly ex-vessel into consignees' barges without any expenses to carrier. (Discharging performed at anchorage.)

Vessels carrying part-liquid cargo can discharge their cargo while awaiting a berth or alongside jetty, whilst unloading other cargo on the pier.

Further to above, whenever Port Authorities divert any vessel to Bandar Shahpour, in the diversion order they indicate "Subject no liquid cargo on board", as vessels with liquid cargo will have to be accepted in the port of Khorramshahr.

Notice of Readiness for vessels carrying liquid cargo, has to be tendered after vessel has anchored at Khorramshahr anchorage (within Khorramshahr port limits). If, due to congestion, there is no space at Khorramshahr anchorage, vessels may have to remain at Arvandrud Pilot station for 1 or 2 days before entering the river.

(j) Dangerous Cargo. Dangerous cargoes are divided in two categories:

1. Acid and flammable cargoes.
2. Explosives such as dynamite, etc.

Vessels carrying acid and flammable cargoes are accepted alongside Khorramshahr berths to unload their general cargo plus dangerous cargo, and Port Authorities unload the dangerous cargo in a yard at Failieh, which yard is mainly used for storing iron joists, but a part is allocated for dangerous cargo.

Vessels carrying explosives are not allowed to berth at Khorramshahr. Recently the Port Authorities have stopped accepting any vessel with explosive cargo on board into the port of Khorramshahr, and those vessels have to proceed directly to Bandar Shahpour before calling Khorramshahr for discharging general cargo, if any. The main port for discharging explosive and special cargoes consigned to Iranian Army is Bandar Shahpour, where the Army have an agreement with the Port Authorities for 1 berth out of the 6 berths. Berth No. 3 is allocated for vessels carrying cargo consigned to Iranian Army, and whenever such vessel arrives at Bandar Shahpour it will be berthed immediately, even if the port is congested; in other words, vessels with Army cargo have priority for berthing.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent on gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: Private doctors and hospitals located in the town for medical and dental treatment and hospitalisation. Arrangements for patients' visits to the doctors, dentists and hospital will be made by Agents upon request. In case of emergency special medical attendance on board can also be arranged. X-Rays, radiographies, blood and urine tests can also be conducted by equipped hospitals existing in Khorramshahr and Abadan.

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pipe-lines and at anchorage by barges, capacity 100 tons.

FUEL: Bunkers are not available at Khorramshahr Jetty, and cannot be supplied by barge. All classes of bunkers are supplied at Abadan jetties only. Bunkers could be obtained from Abadan provided arrangement for supply has been made beforehand with Iranian Oil Participants, London (Iranop London).

CUSTOMS ALLOWANCES: After receipt of documents, the Customs Officer will seal the store room. All liquor and cigarette stocks will be sealed and reasonable ship's requirements while in port should be taken from store before sealing. This amount recommended to be assessed and be ready for removal from the stores prior to the vessel's arrival in port. During the stay at the port, and upon request and giving prior notice to the Agents' supervisor on board, arrangements may be made to have the Customs officials open the stores to issue further quantities of stores for crew consumption.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's Books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

CONSULS:

Denmark	Tel. 2203	Norway	Tel. 2616
France	Tel. 3656	Sweden	Tel. 2280
India	Tel. 3056	U.S.A.	Tel. 2196
Netherlands	Tel. 3628		

REPAIRS: Minor repairs can be carried out to a limited extent by private workshops existing at Khorramshahr. However due to lack of skilled workers the workshops in question do not undertake any responsibility or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc. as well as refrigerator and air condition service there are a few engineering groups at Khorramshahr as well as Abadan, and technicians of these groups will attend to the repairs on board both at Khorramshahr and Abadan jetties or at anchorage, upon request.

Ships moored to the jetty are not permitted to disable main power-plants for repairs without prior approval of Marine Department. A port tug will be assigned to stand by alongside ship with tow line attached during entire period while plant is disabled.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norsk Veritas; Bureau Veritas. Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

AIRPORT: Abadan International Airport about 10 minutes by car.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SHORE LEAVE: See "Identification Cards".

DELAYS: The port of Khorramshahr is generally congested, with a waiting time of about 2/5 days. Port Administration sometimes orders vessels to discharge their Khorramshahr manifested cargo in Bandar Shahpour to ease the congestion at Khorramshahr.

PROVISIONS: Fresh provisions in limited quantity can be obtained but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24-hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

DEVELOPMENTS: As additions to the existing 9 jetties, 4 new jetties are under construction suitable for vessels of up to 10,000 d.w.t. Length of jetties will be 720 m., and construction will include sheds of 20,000 sq.m. and an open area of 31,500 sq.m.

In the Failieh Canal, where steel cargo is discharged from barges, the existing jetty has been extended 500 m. This jetty can accommodate 15 barges, and has an open area of 15,000 sq.m. Construction of the extension has been completed, and dredging is taking place to increase the depth available to the barges.

AUTHORITY: Ports and Shipping Organisation. Tehran.

AGENTS: Gulf Agency Co. (Iran) Ltd., serving: Khorramshahr, Abadan, Bandar Shahpour, Bandar Mahshahr, Ras Bahregan, Kharg Island (Kharg, Darius and Cyrus Terminals), Bushire, Lavan Island and Bandar Abbas. Freight Booking Office: Tehran.

Head Office: Khorramshahr: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Cables: "Confidence", Khorramshahr. Tel. 2280, 2278, 4755/58; after office hours: 2670, 2950, 3193. Telex: 654033, 654000, 654051 (answerback "GAC IR").

Tehran office: Telex 212507, 212856, 213043 and 213044 (answerback: "GAC IR"). Please state: *"For Khorramshahr"*.

LAVAN ISLAND: 26.47 N. 53.20 E. (See Plan Book)

Lavan Island Loading Terminal. 26° 47′ 10″ N. 53° 20′ 30″ E.

Operators: Lavan Petroleum Co. ("LAPCO").

LOCATION: Lavan Island (shown on some charts and pilot publications as Sheikh Shuaib) lies on the North side of the Gulf about 6 miles from the mainland with Lavan Island Loading Terminal in Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E., which is on the S.E. end of Lavan Island.

The island, roughly eliptical in shape, is about 13 miles in length, with a maximum width about 2 miles. It is light brown in colour and its Eastern and Western extremities are low but thence it rises to a number of hummocks having a maximum elevation of 180° on the West part. Crude oil is delivered from Sassan Oil Field to the terminal by a 22 in. diameter submarine pipe-line which runs seaward from the island on a bearing 188° from a position in Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E. for a distance of 76 miles where it joins the Sassan Oil Field. The Company Flow Station and Pumping Station are located in position Lat. 25° 32′ 16″ N., Long. 53° 09′ 01″ E. in the close vicinity of which is a gas flare.

PORT LIMITS: Limits of port extend approximately 1 mile Westward from East coast of Lavan Island, from Terminal Sea Buoy to half a mile Westward from Sassan Submarine Pipe-line Buoy.

Lat. 26° 47.5′ N.	Long. 53° 22.0′ E.
Lat. 26° 46.4′ N.	Long. 53° 22.0′ E.
Lat. 26° 47.5′ N.	Long. 53° 19.4′ E.
Lat. 26° 46.8′ N.	Long. 53° 19.4′ E.

Vessels must not enter the Port Limits unless a LAPCO Mooring Master is on board.

DOCUMENTS:

5 Crew and Passenger Lists.
2 Stores Lists.
2 Bonded Stores Lists.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

In Iran, an additional copy of the Bill of Lading is required for all exports from the country. This must be signed by the Master and forwarded to the Customs Authorities, Lavan Island by the ship's Agent.

EARLY SAILING PROCEDURE:

Notice to Masters – Early Sailing Procedure:

In order to minimize delays to tankers awaiting official documentation after loading at Lavan Island, an Early Sailing System is now in force.

The following documents are prepared in advance, **except for cargo figures,** and presented by the ship's Agent to the Master for his signature upon the ship's arrival at the loading dock.

(A) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Bill of Lading.

(B) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Certificate of Origin and Cargo Manifest.

(C) Nos...... Originals & Nos...... Copies LAPCO IMINOCO Tanker Time and Loading Report.

(D) Nos...... Originals & Nos...... Copies LAPCO/IMINOCO Report of Cargo and Ship's Ullages.

(E) Masters Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the LAPCO Terminal Office.

Official cargo figures will be passed to the Master by radio **within 1 hour** of his departure. Advice of quantities loaded should be inserted by the Master on the 'Bill of Lading' and 'Certificate of Origin' forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In cases of disagreement on cargo figures, the Master may,

(1) 'Note Protest' by cable or telex.
(2) Authorise the ship's Agent to 'Note Protest' on his behalf.
(3) Pass a written 'Note of Protest' to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

LAPCO appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(a) Landfall. There are 5 gas flare towers and 1 ground flare. The most conspicuous flare is in position Lat. 26° 47′ 34″ N., Long. 53° 20′ 39″ E. situated in the vicinity of Port Area. This flare onshore, when burning, makes a conspicuous landfall for Lavan Island, but at night from a distance tends to obliterate the various navigational lights.

The other flares are in position,

Lat. 26° 47′ 41″ N.,	Long. 53° 20′ 19″ E.
Lat. 26° 48′ 25″ N.,	Long. 53° 20′ 03″ E.

(group of 3 flares).

All tanks in the LAPCO Terminal Tank Farm are painted white. The two front tanks have the word LAPCO painted in black on the South side. Tank No. 2 is in position Lat. 26° 47′ 57″ N., Long. 53° 20′ 24″ E. A 1,000,000 bbls. tank has recently been constructed and added to the Tank Farm capacity. It is sited at the rear of the former 6×500,000 bbls. tanks.

(b) Navigational Dangers. South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

PILOTAGE: Pilotage compulsory for vessels berthing on, or departing from Oil Jetty, and when manoeuvring in restricted area. Men-of-war do not require Pilots as they are accommodated in cargo anchorage. Vessels with LAPCO cargo will be moored at a buoy berth for which operation a LAPCO Berthing Master and tug are provided, without charge. Pilots provided automatically on arrival for tankers if berth available. If no berth available due to bad weather or other causes, vessels will be instructed accordingly. The normal international pilot signals are to be used.

Channel 16 VHF is to be used to call Radio Room. Pilots will normally board vessels 2 miles S.E. of Oil Loading Jetty. ETA is to be signalled 96 hours before arrival and confirmed, confirming ETA 48 hours before arrival.

Ships requested to have pilot ladder safely and securely rigged, and ready for immediate use, and long enough to reach Berthing Master's launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder, until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard Berthing Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for Berthing Master both when boarding and leaving.

NAVIGATIONAL AIDS: *Note:* Masters are cautioned to consult their latest Notices to Mariners and Light Lists for most recent information regarding navigation aids.

Lavan Island Terminal Beacon. Lat. 26° 48′ 04″ N., Long., 53° 21′ 20″ E. Located behind the Main LAPCO Administration Building on the S.E. end of the Island, a rotating white light on a steel lattice tower, painted maroon, 182 ft. above MLWIS exhibiting 3 flashes every 12 seconds, with a visibility of 15 miles.

Pipe-line Lavan Island Rear Beacon. 26° 48′ 04″ N., 53° 20′ 12″ E. is located to West of Tank Farm on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seawards and centred along submarine pipe-line coming to Island from Sassan Oil Field. The light is 192 ft. above MLWIS, range 12 miles in clear weather.

Pipe-line Lavan Island Front Beacon. Lat. 26° 47′ 34″ N., Long. 53° 20′ 08″ E. and is located in a position 2,800 ft. bearing 176 degree from the rear beacon fixed on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seaward and centred along submarine pipe-line coming to Lavan Island from the Sassan Oil Field.

The light is 115 ft. above MLWIS and has a range of 12 miles in clear weather. The beacons when in transit from seaward, will indicate that the observer is over the submarine pipe-line and therefore should not anchor in the proximity of this line of bearing.

Sassan Oil Field Radio Beacon. Located in position 25° 32′ 12″ N., 53° 09′ E. Station indentification signal is LA transmitting on 397 kc/s sec., primarily meant as an aircraft beacon but can be received clearly by ships.

Terminal Radio Beacon. Located in position Lat. 26° 47′ 40″ N., Long. 53° 23′ 04″ E. Station identification signal is LD, transmitting 310 kc/s (kHz/sec) from a tower on the above location. This is primarily meant as an aircraft beacon, but can be received clearly by ships.

Light Float. This light float is on station with colour and characteristics as described.

Lat. 26° 47′ 00″ N., Long. 53° 23′ 14″ E. Located approximately 1.1 miles Southward of the Eastern extremity of Lavan Island. Painted red exhibiting a white group flashing light showing 2 flashes every 10 seconds.

Leading Lights – Oil Dock: Located in Lat. 26° 47′ 34.8″ N., Long. 53° 19′ 27.9″ E. Lat. 26° 47′ 30.8″ N., Long. 53° 19′ 35.0″ E. on a bearing of 302° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. W. 5 miles.

Leading Lights – Cargo mooring: Lat. 26° 47′ 39.0″ N., Long. 53° 22′ 32.3″ E. Lat. 26° 47′ 33.0″ N., Long. 53° 22′ 34.1″ E. on a bearing of 344° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. W. 5 miles.

Oil Loading Dock Lights. The N.W. and S.E. ends of the dock are marked by single fixed red navigation lights placed on Mooring dolphins Nos. 1 and 4, respectively.

Small Craft Harbour. There is a small craft harbour located in position Lat. 26° 47′ 33″ N., Long. 53° 23′ 13″ E. which has no navigational lights displayed.

Terminal Sea Buoy. Located in position Lat. 26° 46′ 30″ N., Long. 53° 22′ 07″ E. White can buoy with lattice tower, radar reflecting, characteristic 1 flash every 5 seconds (0.5 seconds on 4.6 seconds eclipse).

Sassan Submarine Trunk Pipe-line Buoy. Located in position Lat. 26° 46′ 48″ N., Long. 53° 20′ 00″ E. Red can buoy with lattice tower, radar reflecting characteristic 1 flash red every second (0.4 seconds on 0.6 seconds eclipse).

Iminoco Radio Tower. Immediately in front of the main Iminoco Administration Building there is a steel tower painted red, elevation above MLWIS is 408 ft. Location is Lat. 26° 48′ 15″ N., Long. 53° 19′ 10″ E. A red light occulting every second is exhibited from the top of the tower.

Decca Navigator Station Tower. A lattice work tower painted in red and white bands 336 ft. high above MLWIS is located Eastward of the Terminal in position Lat. 26° 47′ 39″ N., Long. 53° 22′ 25″ E.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of Long. 53° 22′ 00″ E., and in suitable depths of water wait for LAPCO Berthing Master. The sea bottom is good holding ground. Depth about 40 m.

Prohibited Anchorages. Anchorage is prohibited in the vicinity of the Sassan and Rostam submarine pipe-lines and for a distance of 2,000 ft., on both East and West sides of pipe-lines and parallel to same. The Sassan 22 in. pipe-line runs 188° seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E., and the Rostam 18 in. pipe-line runs 205° seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 19′ 58″ E.

In addition to the above, a 14 in. submarine pipe-line has been laid from the Bahram Oil Field (undeveloped) to Lavan Island.

The pipe-line runs approximately 056° T from an offshore location in

Lat. 26° 18.8′ N.
Long. 52° 32.8′ E.

to a shore location on Lavan Island at

Lat. 26° 47.6′ N.
Long. 53° 19.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

To draw attention to the Prohibited Anchorage Area in the vicinity of the Sassan Oil Field to Lavan Island 22 in. submarine pipe-line 3 notice boards have been established. The notice boards are 3 m. high and 8 m. long, painted white, with the words "Prohibited Anchorage" painted in red in English and Farsi.

These notice boards are in the following positions:

Lat. 26° 47′ 33″ N.,	Long. 53° 19′ 41″ E.
Lat. 26° 47′ 33″ N.,	Long. 53° 20′ 08″ E.
Lat. 26° 47′ 20″ N.,	Long. 53° 21′ 18″ E.

Terminal Port Area. Area bounded by a line joining positions:

Lat. 26° 47′ 31″ N.,	Long. 53° 22′ 00″ E.
Lat. 26° 46′ 21″ N.,	Long. 53° 22′ 00″ E.
Lat. 26° 47′ 26″ N.,	Long. 53° 19′ 22″ E.
Lat. 26° 46′ 49″ N.,	Long. 53° 19′ 22″ E.

Anchorage within Port Area prohibited. Port Area used by vessels manoeuvring to and from oil loading jetty, and no vessel permitted enter Port Area until Company Berthing Master on board.

Offshore Oil Platform. Anchorage prohibited in area of Sassan Oil Field, some 76 miles South of Lavan Island Marine Terminal, due to existence of numerous submarine oil pipe-lines connecting oil wells and production platform.

RESTRICTIONS: 24-hour service. No restrictions for vessels up to 200,000 d.w.t. Tankers in ballast required to have on board at least 33% of their d.w.t. in ballast (including permanent ballast) and not more than 10 ft. by the stern. The state of the tide does not affect entry.

The max. draft allowed for tankers using Berth No. 2 is 43 ft. 6 in. (13.26 m.).

Keel clearance of 3 ft. required by the terminal at all times.

MAX. SIZE: Vessels of 200,000–225,000 tons d.w.t. may be accepted with prior approval from LAPCO, which is based on standard 14 point questionnaire, detailing dimensions, loaded and ballasted draft and ability to segregate or load concurrent with deballasting. Determining factor is maximum elevation of the loading arms above the water line. Cargo vessels bound for the LAPCO cargo buoy mooring are limited to 26 ft. (7.92 m.). No restriction on vessels using the anchorages.

Max. Load on arrival: Following is a table of maximum loads that different size tankers can have on board on arrival, and remain acceptable for berthing:

(a) The maximum size vessel that is acceptable for berthing in a fully loaded condition is 100,000 d.w.t. This refers to vessels nominated for bunkers only.

(b) The maximum acceptable arrival load for tankers in the range 101,000–120,000 d.w.t. is 90,000 tons (675MB ±).

(c) The maximum acceptable arrival load for tankers in the range 121,000–170,000 d.w.t. is 85,000 tons (638MB ±).

(d) The maximum acceptable arrival load for tankers in the range 171,000–225,000 d.w.t. is 70,000 tons (525MB ±).

This schedule to be used in conjunction with the standard 14 point questionnaire for VLCCs.

CLEARANCE: *(Arrival):* After Berthing Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. *(a)* Condition of use of Port of Lavan Island, *(b)* Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection form. After pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. 5 copies of the crew list and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.*

The Terminal operates an Early Sailing System covering all cargo documentation. The following documents will be prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(a) B/L. (b) Certificate of Origin and Cargo Manifest. (c) Tanker Time and Loading Report. (d) Report of Cargo and Ships Ullages. (e) Master's receipt for documents.

Official cargo figures will be passed to the Master within 1 hour of his departure for insertion by the Master on the Bill of Lading and Certificate of Origin and Cargo Manifest.

In cases of disagreement over cargo figures the Terminal will accept the Masters "Note of protest" by telex, by the authorised ships Agent, or by written note handed to the Berthing Master.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at masthead; by night: red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

There are occasional outbreaks of cholera. International Certificates of Inoculation/Vaccination are essential.

See Radio, "Free Pratique".

RADIO: Vessels nominated to load at Lavan Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bahrain Radio (A9M) or Khorramshahr Radio (EQK) or Lavan Radio (EQV).

"LAPCO Tehran Tlx 21–2420 LAPC IR ATTN MARSUPT LAVAN".

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Lavan in GMT and last port.
CC Cargo(s) required and bunker(s) required.
DD Deballast time.
EE Size and number of connections for cargo/bunker.

If bunker connection only one side of manifold, state location.

Lavan Radio Station, is operating on 500 kHz, call sign EQV, from 05.30z–13.30z.

Lavan Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Lavan Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

LAPCO tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Pourandokht I" when passing the Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

Radio Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Lavan Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Smallpox and Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

Masters should use item letters and digits to minimise cable length.

TUGS: 2 diesel powered tugs. Both tugs are twin screw, 3,120 b.h.p. Kort Nozzle types with a static bollard pull of 42 long tons. 2 tugs are used on every movement.

For each tug employed berthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master. For each tug employed unberthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master.

The LAPCO tugs and launch assist in berthing and unberthing. These are under the direct supervision and control of the LAPCO Berthing Master. Service and facilities provided by the company including the services of the LAPCO Berthing Masters, tugs, mooring launch, or berthing equipment, are at the vessel's risk.

Note: On occasions when tugs are employed standing by vessels whilst in the berth for use, if required, the full tug charge will be charged.

BERTHING: The Oil Loading Dock is located on the South Coast approximately 2.5 miles from the East end of the Island. The loading platform is 2,030 ft. from the shore, located in position Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E.

Deck level is 31 ft. 4 in. above sea level Mean Low Water Indian Springs. Under normal conditions, 12 lines used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm periods, usual to use one each additional headline and breast line at each end, making a total of 16 mooring lines. Breast lines and springs of wire rope acceptable, and normally secured to jetty patent quick-release hooks. Three-inch circumference messenger lines, 240 ft. in length, available each berth for hauling lines from mooring launches up vertical face of jetty fendering and along jetty deck, with assistance of electrically operated capstans sited at intervals along jetty.

Berth No.	*Least depth water (in ft.) above chart datum MLWIS‡*	*Maximum capacity d.w.t.*
1	68.33	200,000*
2	65	75,000**

‡Chart Datum is MLW Indian Springs and highest tide is 7 ft. 3 in.

*Vessels in the range 200,000–225,000 d.w.t. may be accepted subject to prior approval from LAPCO Management which is based on answers to a 14 point questionnaire.

**Vessels are accepted for berth 2 based on tonnage, overall length (maximum 850 ft.=259 m.), position of the manifold in relation to the bow, and always subject to a maximum loaded draft of 43 ft. 6 in. (13.26 m.). Vessels over 65,000 d.w.t. should always be cleared by LAPCO prior to firming-up a nomination.

Distance from ship side to manifold flange	*Maximum elevation of manifold above chart datum*
10 ft.	76 ft. 6 in.
12 ft.	75 ft. 9 in.
14 ft.	75 ft. 0 in.
16 ft.	74 ft. 0 in.
18 ft.	72 ft. 9 in.

Loading Arms: Rigid "Chicksan" hydraulic operated loading arms are situated on both sides of the loading platform.

On Berth No. 1 4×16 in. for crude oil loading.
1×12 in. for product loading (fuel & gas oil).
On Berth No. 2 2×16 in. for crude oil loading.
*1×16 in. for naphtha loading.
1×8 in. for product loading (fuel & gas oil)

*Gas oil can also be loaded through this arm.

All loading arms are fitted with a series 150 ASA American Standard outer flange with quick connection coupler.

The Terminal carries a full range of aluminium reducing spool pieces and flexible hoses (15 ft. × 8 in.) for crude and product/bunker connections.

Tankers to have ready: Fore and aft winches ready for use, and minimum of 16 good mooring lines, 120 fathoms each.

The Terminal accepts tension wires or ropes, only with proper supervision on the brake. Derricks, winches and gear must be rigged on port and starboard sides, topped over the manifold.

Ship's crews perform all operations of mooring, and unmooring, on board ships.

Shore gangways provided at both berths.

LOADING: Tankers should arrive with 16 in. series 150 ASA flanges on all manifold connections to be used for loading.

Sassan Crude Oil of approximately 34° API gravity is available from the LAPCO 4,000,000 barrel Tank Farm. Delivery of oil to the loading dock is by gravity flow, through two 36-in. diameter pipe-lines.

Rostam Crude Oil of approximately 35° API gravity is available from the IMINOCO 1,500,000 barrel Tank Farm, immediately West of the LAPCO tanks. Delivery of oil to the loading dock is by gravity flow through two 36-in. diameter pipe-lines.

The temperature of Sassan crude oil varies between 91°F and 78°F (Summer/Winter), and the temperature of Rostam crude oil varies between 85°F and 66°F (Summer/Winter).

After the vessel has berthed, the Berthing Master, who acts as a Loading Master, will discuss arrangements, inspect tanks, sign the tanker dry certificate, and finally check cargo figures with ship's personnel. Before loading commences, all items on the "LAPCO Safety Check List" will be complied with, and an inspection made by the Chief Officer and the Berthing Master.

Loading rates of up to 52,000 bbls/hr. to Berth No. 1, and 32,000 bbls/hr. to Berth No. 2 can be achieved at Lavan Island when only 1 vessel loading.

Up to 40,000 bbls/hr. to Berth No. 1 and 24,000 bbls/hr. to Berth No. 2 can be achieved when loading 2 ships simultaneously.

The minimum flow rate is 15,000 bbls./hr. All vessels accepting nominations to load at Lavan Island must be capable of loading crude at rates above this figure.

Do not close valves against crude oil flow.

Emergency Flow Stop Signal if all communications fail will be a continuous sounding of the ship's whistle.

GENERAL CARGO: Vessels with general cargo for LAPCO should wait for instructions from port control in the general anchorage area, approximately 2 miles S.E. of the loading dock.

A sea berth has been laid adjacent to the small craft harbour at the East end of the Island to enable cargo vessels to discharge in most weather conditions.

The vessel is secured by port and starboard anchors on a running moor spread together with three stern ropes secured to a stern mooring buoy. The vessel lies in a heading of 225° in such a manner as to provide a lee side against either the N.W. or S.E. prevailing winds.

To assist the vessel to moor, LAPCO Berthing Master, tug, and mooring launch are provided without charge.

All cargo vessels shall comply with the Port Rules and Regulations as far as it affects them. Upon arrival, Masters will be issued with and sign for a copy of the official Port Book.

Cargo vessels should use the same procedure of arrival notification as laid down for tankers.

LAPCO operates a 300 ton flat top barge which is permanently stationed at Lavan Island to off-load general cargo. As soon as the vessel is moored, the barge will be available alongside and will operate on a 24 hour basis.

Stevedoring is carried out on board by an independent Agent and at the dock side by LAPCO.

BALLAST:

(a) Masters are warned that no dirty ballast, or bilge water should be disposed of in sea within 50 miles of coast of Iran. When so disposing of ballast all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

(b) As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast simple inspections will continue.

(c) Should ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by "Lloyds" or "ABS" Surveyors, or other recognised surveyors of repair is submitted.

(d) Any vessel rejected because of dirty ballast or sea pollution will automatically nullify "Notice of Readiness" and will lose any priority of position for loading. On return from sea, Masters should tender new Notice of Readiness to LAPCO. If this accepted by LAPCO the vessel will be entered for loading as of new time of acceptance. Vessels will be rejected for dirty ballast at all times.

(e) Vessels equipped with separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the LAPCO Terminal Superintendent and provided NIOC Petroleum Inspector agrees.

(f) Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge enroute to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, and discharge concurrently, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

(g) A vessel must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a Ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

DENSITY: The temperature of sea water alongside the Loading Dock varies from 71°F. in January to 93°F. in August. The density of sea water alongside the Loading Dock varies between 1023 and 1026.

TIDE: The tide is mainly diurnal with a mean range of 3 ft. 0 in., and extreme range of 5 ft. 6 in., and an extreme height of 7 ft. 0 in. above chart datum, which is MLWIS.

The current runs 1 to 2 hours behind the tide, both on ebb and flood, mainly setting the vessel onto the dock.

There are only very short periods when there is no current running.

An automatic chart recording tide gauge is fitted on berth No. 2.

WEATHER: In Summer time from May to September temperature reaching 110°F. (43°C.) and humidity ranging from 10% to 100%. The Winter (November to March) mild and pleasant with minimum temperature approximately 48°F. (9°C.). The wind for most of year from N.W., but sometimes particularly during Winter strong S.E. storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from N.W. winds, but exposed to winds from South.

During Winter storms, waves of 8 to 10 ft. often occur. A max. wave height of 15 ft. has been recorded at the Southern end of the Island.

STEVEDORES: For cargo vessels the Agent requires 4 days Notice of Arrival in order to transport labour from Bandar Abbas. Agent provides labour for working cargo "to the rail" and receiver provides lighterage and labour thereon.

MEDICAL: LAPCO and IMINOCO operate small clinics on the Island with resident doctors. This facility will be made available for emergency cases only.

FRESH WATER: None available.

FUEL: Bunkers are now available at Lavan Island and can be loaded at both berths of the tanker loading dock through rigid hydraulic operated Chiksan loading arms.

These bunker products are provided by the Lavan Distillation Complex (LDC) which is operated by the National Iranian Oil Company (NIOC). Available bunker products are fuel oil and gas oil.

The plant also produces naphtha.

Bunker Requests:

Requests for information on bunkering should not be directed to LAPCO or IMINOCO. All questions relating to the bunker facility at Lavan Island will be handled by NIOC Marketing & Exports Division.

The address is:

Marketing & Exports,
National Iranian Oil Company,
P.O. Box 1863,
Tehran, Iran.
Cable Address: Naftmelli Tehran
Telex: 21-2514, 21-2613 and 21-2182
Telephone: 6151 – ask for Marketing.

LDC Tank Capacity is:

Naphtha 53,000 cu.m. (333,360 bbls.)
Fuel Oil 38,400 cu.m. (241,530 bbls.)
Gas Oil 30,800 cu.m. (193,730 bbls.)

LDC loading rates, by pump are:

Naphtha 1,500 t.p.h.
Fuel Oil 500 t.p.h.
Gas Oil 500 t.p.h.

LDC loading arms at the tanker dock are:

Berth No. 1: 1×12 in. supplying both fuel and gas oil.
Berth No. 2: 1×8 in. supplying both fuel and gas oil.
Berth No. 2: 1×16 in. supplying both naphtha and gas oil.

LDC product specifications are:

Naphtha SG at 60°=0.7205 (API at 60° 64.9)
Fuel Oil SG at 60°=0.9560 (API at 60° 16.5)
Viscosity Redwood at 100°=1,440 seconds.
Gas Oil SG at 60°=0.8450 (API at 60° 35.9)

CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.

FIRE PRECAUTIONS: Vessel receives full detailed instructions from Berthing Master. Vessels must have fire-wires and engines not to be immobilised.

CONSULS: No consular representation on Lavan Island. Nearest consulates at Khorramshahr near Abadan.

REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ship's main engines must be available at all times while alongside jetty.

MARINE SURVEYS: Lloyd's Surveyor based at Khorramshahr and can usually be called through vessel's Agent at 72 hours notice. A.B.S. surveyor also based at Khorramshahr.

AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.

TIME: Standard zone time for Iran is GMT plus 4 hours. Daylight saving time, which was adopted in 1977, advances clocks 1 hour from March through October.

POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by LAPCO staff in case of tankers.

SHORE LEAVE: Ships' crew not allowed to go ashore.

CREW CHANGES: Not permitted.

REGULATIONS: (Miscellaneous): *Painting and scaling.* Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.

GENERAL: *Flag:* All vessels are required to fly the Iranian Flag (green uppermost) in Iranian territorial waters which extend 12 miles offshore.

Garbage: Dumping overside of garbage and refuse prohibited in Port Area.

Sanitation: Government Health Regulations require suitable covers to be fitted over all lavatory, discharge outlets, etc., to prevent fouling of jetty or craft alongside.

Damage to Port Facilities: If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with LAPCO Berthing Master as to nature and extent of such damage, and this must be confirmed by LAPCO Marine Superintendent. LAPCO has standard liability forms which cover both ship and shore, and are issued on every occasion.

Rat-guards: All ships berthed alongside must provide Rat-guards for Ship's Moorings.

No visitors: No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Marine Superintendent. Only persons having authorised work will be given access to port limits, dock or vessels.

AUTHORITY: LAPCO Tehran. Terminal Office: Lavan Island.

AGENT: Gulf Agency Co., Lavan Island.

Head Office: Khorramshahr. Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Cables "Confidence", Khorramshahr. Tel. 2280, 2278, 4755–58. After office hours 2670, 2950, 3193. Telex 654033, 654000, 654051 (answer back "GAC IR").

Tehran office: Telex 212507, 212856, 213043 and 213044. (answer back "GAC IR") stating: "For Khorramshahr".

Air-freighted spare parts and ships' mail should be addressed: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran, and sent to the Abadan International Airport marked "In Transit for M/S ......".

Air-freight consignments should be routed by flights arriving *directly* to Abadan Airport without trans-shipment at Tehran. Cable advise "Confidence", Abadan, of flight details and airway bill number.

RAS BAHREGAN (Norwuz Loading Terminal): 29.43 N. 50.10 E. (See Plan Book)

DOCUMENTS:

5 Crew and Passenger Lists.
4 Stores Lists.
4 Bonded Stores List.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

PILOTAGE: Vessels to be moored at Bahregan Terminal will be boarded by a Mooring Master of the Company within 2 miles of the SBM. The Mooring Master will advise the ship's Master on approaches to the berth, mooring and unmooring, connecting and disconnecting the floating hose, and in all other operations within the berthing area.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side of the ship and climb the ladder safely. Adequate searchlights should also be rigged when mooring at night.

The Mooring Master will be in direct charge of the portable VHF ship-to-shore radio-telephone communications.

ANCHORAGE: The SBM is in the open sea with no surface obstructions in the vicinity. However, anchorage is prohibited in the following areas:

(a) Immediate vicinity of the SBM – within a 1.2 mile radius of the SBM.

(b) One mile on either side of 36-in. submarine pipe-line from SBM to Bahregan Oil Centre.

Suggested anchorage area is 2 miles S.W. of the SBM.

RESTRICTIONS: The Bahregan SBM Terminal operates 24 hours per day, 7 days a week. However, mooring or unmooring is only carried out if fair or moderate weather conditions are prevailing.

In the event that berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the terminal area on account of weather (terminal closed) should keep in contact with the terminal via radio in order to be available when weather moderates.

FLAG: All vessels are required to fly the Iranian flag on the foremast during daylight hours. Iranian territorial waters extend 12 miles seaward from the mainland and adjacent islands.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with SIRIP when 3 days distant from Bahregan Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to SIRIP giving the best estimate of ship's arrival time at the Terminal.

Further ETA messages should be sent to SIRIP when the vessel is 24 and 12 hours distant from Bahregan Terminal and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12-hour ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring, as well as details of the flange size of the manifold.

MAX. SIZE: SBM terminal designed for tankers up to 250,000 d.w.t. Min. depth at the SBM is 24 m.

HEALTH: The rules governing quarantine of vessels is the same as found in other ports of the world.

RADIO: Bahregan Oil Centre Radio Telephone Station maintains a daily watch on the following frequencies at the times stated.

GMT: 0530–0630 on 2477 kc/s., 1130–1230 on 8230 kc/s.

In addition, once a tanker has advised its 72 hours ETA the Bahregan Oil Centre maintains a watch on VHF Channel 16. The call sign for Bahregan Oil Centre is "BOC". Contact can be made on other frequencies if requested.

Telegrams of ETA may be sent to Khorramshahr Port Radio Station addressed to SIRIP Liaison Office, Khorramshahr.

Communications during mooring and loading: Portable VHF radio-telephone units are brought on board by the Mooring Master.

NOTICE OF READINESS: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at time, carry clean ballast and are in all respects equipped and ready to moor.

Tankers to have ready:

(a) Windlass and deck winches forward, maindeck and aft.

(b) Ten good nylon or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line.

(c) On port side, opposite ship's manifold, equipment capable of lifting floating hose safely and expeditiously. Weight lift of 5.5 tons.

Ship's crew performs all operations on ship.

SBM: The single buoy mooring is 13.5 m. in diameter and 3.65 m. high at its highest point. It is equipped with the following navigational aids.

Signal light: White colour, flashing morse code "U" every 15 seconds. Range 5 miles.

Fog horn: Morse code "U" every 45 seconds.

Radar reflector fitted. The whole SBM is painted a bright orange colour.

TUGS: Available and required.

SINGLE BUOY MOORING: The Monobuoy is situated about 15 kms. from the shore in position 29° 43′ 02″ N., 50° 09′ 46″ E. Depth of water in vicinity of buoy mooring is 30 to 31 m. Buoy is served by a 36-in. loading line with a capacity of 700 cu. m. per hour.

MOORING: The optimum approach to the single buoy mooring is into the wind and sea. Sometimes, however, this will not be possible because of tides at variance with strong wind conditions. Accordingly, it is incumbent upon the Master to exercise careful judgement when approaching the Terminal, particularly during the hours of darkness and in poor visibility. It should be noted that the incoming tides flow towards the N.W. (approx. 310°) and outgoing tides towards the S.E. (approx. 130°). The company Mooring Master will give all necessary advice to the ship's Master.

Particular attention must be paid to the location of two strings of floating loading hose. Normally the position of the floating hoses will be controlled by the tidal currents rather than by wind effect. During daylight hours the hose string is highly visible by virtue of their covering of orange plastic floats.

When approaching the SBM at night or during poor visibility the radar is an excellent means of ascertaining the exact distance to the Terminal. The floating hose strings normally stand out very clearly on the lower radar range scales.

Once the optimum approach route has been selected, the tanker should proceed towards the SBM at a suitable speed dependent upon conditions at that time. At approximately 3,000 ft. from the SBM the tanker should have only sufficient way on for steerage. The floating hoses should be on the port side, and it is recommended that the tanker make the final approach with the SBM on the port bow, rather than dead ahead. This permits the Master on the bridge to observe the SBM at all times and in the event of any misjudgement of the approach speed there is no danger of over-running the Terminal. (The tanker should adjust her engines such that all way is off the vessel between 150–50 ft. from the SBM).

At a suitable distance from the SBM the service launch which will have maintained station during the approach, will take two lines from the ship and secure them to the mooring bitts on the SBM. The launch will then bring the 2 large SBM float ropes to the ship, which should have a messenger line ready to raise them. Once these float ropes (each of which has a breaking strain in excess of 305 tons) are secured the ship may, if so desired, recover its own lines which are used only to provide a safeguard during pick up of the SBM float lines.

In the event that the floatrope mooring lines provided by the Company are not used or not available, the ship is secured using 6 lines from the tanker all on port side.

HOSES: 2 flexible floating hoses connect the ship's manifold with the Terminal's cargo manifold, and separate hoses connect the underside of the SBM to the submarine pipe-line end manifold (PLEM) on the seabed. A submerged peripheral fender extending outward from the hull is provided to prevent damage to the floating hoses and SBM, should the tanker ride up against it.

After the vessel is securely moored the service launch will tow the end of the floating hoses to a point on the port side of the tanker immediately below the tanker's cargo manifolds. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons.

The hoses are fitted with 16-in. flanges, and the Company will provide reduction pieces to 14 in. or 12 in.; other sizes (as well as gaskets) as required to make connections to ship's manifold. The hose connection is normally performed by SIRIP's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

LOADING: The ship's officer responsible for loading should give SIRIP's Mooring Master at least half an hour's notice of readiness to commence loading. In any event, the ship should advise SIRIP during its last radio contact prior to arrival of the estimated time required to discharge ballast, so that an approximate time for commencement of loading can be established. It is also helpful if the ship advises the size and type of flange and also the distance of the manifold from the ship's side during radio connection.

The initial loading rate is normally about 1,500 long t.p.h. while the recently coupled flanges are inspected for leakage and the Mooring Master and ship's officer satisfy themselves that all is in order with the SBM and the ship's facilities. As soon as this is done, the loading rate is increased to the max. of 6,000 long t.p.h.

Caution: The incoming oil stream is controlled from the shore and it is extremely dangerous to close a ship's valve against the pressure, which may damage hose, ship's piping, or shore facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

The ship's officer in charge of loading should advise the Mooring Master half an hour before he estimates loading will be completed.

On advice from the ship a min. of 3 minutes is required to stop the flow of crude oil, however, a reduction in loading rate before topping up the final tanks may be arranged on request to Mooring Master.

During loading or unloading the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

CARGO: Bahregan Sar Crude, API from 20 to 32, Temperature 85°F.

BALLAST: The waters of the Gulf must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged.

As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil ballast and during discharge of ballast, similar inspection will continue. If evidence of oil appears at either of these inspections, the ship must leave mooring and proceed at once to a point not less than 50 miles from any coast or island and there completely discharge all oily or dirty ballast.

Vessels equipped with a separate system of ballast and cargo tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval is obtained.

Note: When loading is carried out under rough weather conditions the tanker should not be allowed to get into a light condition, and therefore deballasting should not be completed until a reasonable amount of the cargo has been loaded.

PETROLEUM INSPECTORS: Services of the Saybolt Agency available subject to at least 3 days advance notice.

MEDICAL: Depending on the availability of the Company doctor, medical assistance can be provided, although there is no hospital available. In cases of extreme emergency, SIRIP will arrange transport to Abadan at the ship's expense and responsibility.

CUSTOMS: A Customs Officer boards each vessel calling at the terminal.

DENSITY: Salinity is approximately 20% more than normal sea water.

BUNKERS: Not available.

WATER: Not available.

STORES: Not available.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the terminal is situated off-shore in the Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

REPAIRS: Masters of vessels loading at Bahregan Terminal are advised that this port is considered an "open roadstead" and under no circumstances may engines be shut down for repairs while their ships are moored. There are no facilities at Bahregan Terminal for making vessel repairs.

CONSULS: There are no consulates at the Bahregan Terminal; however, consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities.

TERMINAL OPERATORS: Societe Irano Italiene des Petroles (SIRIP).

AGENTS: See "Khorramshahr". (Actual handling is effected by Oil Company SIRIP, but Khorramshahr Agents are in a position to handle ETA messages, etc., addressed to them via Khorramshahr Port Radio EQK, also to communicate messages to and from SIRIP Khorramshahr and shipowners. Agents can also pass arrival and sailing details to principals, and despatch copies of loading cargo documents as required by Owners. Forwarding ship's mail to Bahregan and despatching official and crew mail received from ship, can be arranged by Agents. Such services are not undertaken by the Oil Company, and it is advisable to appoint an Agent at Khorramshahr.)

SIRRI ISLAND: Approx. 30 miles West of Abu Musa.

Only barge jetties available for discharging barges and to accommodate supply vessel. This so called "Port for Supply Vessels" is located on South-eastern part of the island where the loading terminal will be constructed.

All cargo for Sirri Island consequently has to be discharged onto barges in open-sea and barges towed to above port for discharge.

Stevedores from Sharjah, Dubai and Abu Dhabi allowed to work cargo for Sirri.

NOTES

Please also advise Shipping Guides Ltd.

Iraq

GENERAL

TANKERS: Please note that all correspondence, cables, and telexes concerning tankers calling at Iraqi terminals are to be directed to following addresses.

Postal address: State Enterprise for Maritime Agencies. P.O. Box 3, Basrah.

Cable address: Tankers Basrah. Tankers Fao.

Telex No.: 7009.

Cables for arrival should be addressed to both "Tankers" Basrah and "Tankers" Fao.

ALBAKR TERMINAL: 29.41 N. 48.49 E.

(See Plan Book)

LOCATION: The terminal is 31 miles S.E. of Fao in position 29° 40′ 36″ N. 48° 48′ 38″ E. Depth of water 29.30 m. at MLWOST.

PILOTAGE: Pilotage is compulsory for all inward and outward tankers using the Khor al Khafja buoyed channel when the draft is over 15.85 m.

NAVIGATIONAL AIDS: 8 lighted buoys define the deep water channel at the 69 ft. (21m.) depth contours in the immediate vicinity of Albakr Terminal. The buoys are battery powered with quick flash characteristics with visibility range of 1 mile. The perimeter of Albakr Terminal is outlined with flashing marine lanterns to define a hazard to marine navigation. The lanterns are battery powered, some are white lens flash with 5 mile range and others are red lens flash with 2 mile range.

The radio tower is equipped with an aviation hazard light (red). It is also equipped with a long range marine beacon (white) located below the red hazard light.

MAX. SIZE: Max. length, 366 m. Max. draft 21 m. Night berthing possible.

RADIO: Tankers are requested to contact Albakr Terminal through Basrah Control Radio (YIR) at least 72 hours, 48 hours and 24 hours prior to arrival giving ETA. Prior to docking the tanker must also provide the terminal operator with information required to prepare the "loading order" format, this information should include the type of crude to be loaded, loading rate in barrels, the Registry No. of vessel, nationality, name of Master. The Master will be informed of approach instructions such as location of berth, weather and sea conditions, and the communication channel to be used for vessel docking assistance.

Vessels bound for Iraqi territorial waters should also contact Fao Radio (YIS) at least 24 hours before entering territorial waters requesting free pratique from Medical Officer Fao. The request should indicate the state of health of the crew on board together with relevent information.

RADIO:

Name of Station: Khor al Khafja FC(10) Albakr Terminal FP
Call Sign : Albakr Radio
Service : 24 Hours

The following table shows the details for contacting the Iraqi port coast stations. The No. between brackets corresponds to the notes explained below.

Frequency	*Emission* Channel	Class	Power	*Service* Nature
156.375 mHz.	67	F³	0.02	OT (2) (3) (6) (8)
156.550 mHz.	12	F³	0.02	OT (2) (3) (3) (5)

161.80 mHz.	24	F³	0.02	

FC	Coast Station
FP	Port Station
OT	Station open exclusively to operational traffic of the service concerned
(1)	Transmits urgent notices to mariners
(2)	Transmits meteorological bulletins (North Arabian Gulf Weather Forecast)
(3)	For Navigation and harbour control services
(4)	Calling and Safety frequency
(5)	First priority working frequency
(6)	Second priority working frequency
(7)	Weather bulletins at 0630, 1430 hrs. and on request
(8)	Used for marine traffic control
(10)	Station under the direction of Iraq administration
(11)	Permanent watch

While in Iraqi Territorial waters, ships under way shall maintain watch on Channel 16 (156.80 mHz) and/or (461.5 kHz) to ensure immediate reception of the instructions issued by the controlling authorities.

(a) Khor Al-Khafja, Albakr Terminal Radio, maintains listening watch on Channel 16 (156.80 mHz).

(b) Pilot station (Al-Rasheed Radio YIBE maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(d) Basrah control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz.) and 500 kHz.

Instructions:

(a) Navigation warnings are transmitted on 500 kHz. by Basrah Control Radio (YIR).

(b) North Arabian Gulf weather forecast is transmitted by:

1. Basrah Control Radio on:
   440 kHz. at 0530, 1330 GMT and on request.
   6493.25 kHz. at 0530 GMT and on request.
   8668 kHz. at 1330 GMT and on request.
2. Khor Al Khafja, Albakr Terminal Radio, on Channel 16 (156.80 mHz.) at 0530 GMT and on request.

(c) Traffic control signal on Channel 16 (156.80 mHz.) and on 500 kHz. by Basrah Control Radio (YIR).

(d) Traffic control signal Channel 16 (156.80 mHz.) and 500 kHz. by Fao Radio (YIS).

(e) Traffic control signal on Channel 16 (156.80 mHz.) by Albakr Terminal Radio.

Commercial and Public Correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz.) 500 kHz. 4, 6, 12 and 16 mHz. bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

TUGS: 3 available, 2 of 4,000 h.p. and 1 of 2,200 h.p.

BERTHING: The terminal consists of 2 loading platforms (A) and (B) each loading platform has 2 loading berths. Berths 1 and 2 of platform "A" and berth 4 of platform "B" can accommodate tankers ranging in size from 35,000 d.w.t. to 350,000 d.w.t., berth 3 of platform "B" can accommodate tankers ranging in size between 85,000 d.w.t. and 350,000 d.w.t., Total length of structure is 975.4 m. and 106.7 m. wide at centre.

LOADING: Storage and pumping facilities on shore are connected to Albakr Terminal by two 48 in. pipe-lines. The Terminal is capable of loading through either one of the pipe-lines at a time or both. Capacity of each line varies between 77,000 to 89,000 b.p.h. depending on type of crude (Basrah heavy or Basrah light type). With both lines in operation at the same time loading rate can be increased to max. 141,500 b.p.h. (19,000 M.T.H.). 2 tankers can load with different types of crude at the same time. Loading facilities can be remotely controlled from the Control Room.

Loading will be stopped if any regulations are not observed and in the case of oil spillage.

Loading may be stopped in still air conditions, during severe electrical storms and/or high wind and sea conditions.

Loading Arms: For each loading berth, 3 identical 24 in.×80 ft. long Luceat DCMA loading arms, with hydraulically operated coupling fitted with adaptors to allow automatic and fast coupling to tanker manifold flanges ranging from 16 in. to 24 in. (spools for 10, 12 or 14 to 16 in. are available at the terminal if required).

Gangway: A power operated telescopic personnel gangway is provided at each berth. These gangways can withstand 500 lb. load at mid-span in the extended position.

Meters: 16 in. A. O. Smith positive displacement meters, 16 meters for each platform, capacity of each meter 12,500 b.p.h.

Meter Prover: One 24 in. triple "U" bi-directional mechanical displacement meter prover for each platform. The occurence of each prover is decided bi-yearly utilizing certified volume tanks.

Continuous Crude Oil Gravity Analyzer: There is a number of ARCCO Anulus Model 1-F10 50X liquid gravity analyzers on each loading platform capable of detecting API gravity from 45° to 15°, the output from these analyzers are displayed on the appropriate loading formats and is recorded on charts in the Control Room.

These gravity analyzers are to be checked constantly and re-calibrated bi-yearly according to the manufacturer's recommendations.

A responsible member of the crew must be in contact with the terminal officials at all times.

READINESS: Notice of readiness will be received by INOC representative provided the vessel is ready to load. Lay time will commence 6 hours after receipt of Notice of Readiness berth or no berth.

SAFETY PRECAUTIONS: On arrival at the terminal, INOC Representative will discuss with the Master the "Safety Requirements" letter addressed to him also the Safety Check List.

Attention is also drawn to the Tanker Safety Guide published by the International Chamber of Shipping and to the International Oil Tanker Terminal Safety Guide.

SHIP DOCKING ASSISTANCE SYSTEM: 1 unit for each berth, consisting of speed of approach measuring instrument with fixed wide and narrow beam R.F. heads, a data processor and visual display units when the vessel is within 2 miles of Albakr Terminal. The rotatable R.F. head which is nearest to the vessel shall be aimed at it, during the docking the system will display approaching vessel's velocity.

FRESH WATER: Can be made available by Ports Administration after 24 hours notice from tankers. Water supply is from barges or small water tankers. Notice to be through Agent.

FUEL: May be made available after 72 hours notice through Agent. Supply is direct from small bunker tanker or barges. Bunkering however, not allowed while tanker is on berth and it is allowed only when tanker is waiting for berth or after completion of loading and unberthing.

SHORE LEAVE: Not allowed.

LIGHT DUES: The Iraqi Ports Administration will collect any light dues payable including those due to the Middle East Navigation Aid Service.

REGULATIONS:

(a) Mooring.

"All vessels after arrival, having been moored to the satisfaction of the Harbour Master, shall tend their own anchor cables, ropes, lines and hawsers. It is important for tankers to tend their mooring frequently"

(b) Ship must be ready to move under its own power.

While in berth, ships must be ready to move under their own power in the event of their breaking adrift, catching fire or any other emergency. No repairs are to be carried out while in the berth, which would immobilise the ship or impair her firefighting efficiency.

(c) Cleaning of Boiler Tubes.

Cleaning of boiler tubes alongside the Island Terminal is forbidden.

POLLUTION: No dirty ballast. No oily water or other refuse to be discharged overboard.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master delivered to the representative of the terminal to this effect.

Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

Vessels are subject to heavy fines and liabilities for claims arising.

AUTHORITY: All approaches to Albakr Terminal and Khor al Khafja are controlled by the Iraqi Ports Administration.

Cable MAWANI-BASRAH Telex 7008 Ports

Attention is drawn to port rules and bye laws 1942, Quarantine Regulation No. 28 of 1963 and schedules of dues and charges.

The terminal is the property of Iraq National Oil Company (INOC) and is administered and controlled by the said company to facilitate the loading of tankers with Crude Oil.

Cable Address INOC (Basrah) - PETROLNA BASRAH
INOC (Baghdad) - PETROLNA BAGHDAD

Telex No. INOC (Basrah) - 7003
INOC (Baghdad) - 2204/2295

The sole Agent for all vessels visiting Iraqi ports is The State Enterprise for Maritime Agencies. All requests for services to tankers should be directed to the Agent.

See "General" before first port.

BASRAH (Maqal and Umm Qasr): 30.31 N. 47.50 E.

DOCUMENTS: On arrival at Pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at an Israeli port, all Health Certificates of Crew must be valid against cholera and smallpox, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo and heavy lift list (if any).

PILOTAGE: Compulsory. Owners having vessels bound for Basrah should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir Basrah" to arrange Shatt-el-Arab Pilotage. Owners should also put Iraqi Maritime Transport in funds by remittance well in advance of vessel reaching Outer Bar of Shatt-el-Arab in order to cover port tonnage dues, pilotage and dredging dues, for sailing from Outer Bar to Basrah and return.

The pilot boat is located usually in position 29° 45′ 15″ N. 48° 50′ 45″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Maqal and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR on 500 kc/s for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kc/s from YIR or use VHF on Channels 14 and 12. On boarding the river Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. Master to hoist the Iraqi National Flag.

The pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

The Navigation of the Shatt-el-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. fresh water.

Bawarda Anchorage, position about 2 miles below Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 6 miles above Abadan with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 12 miles above Hartha Point with a max. depth of 29 ft. in fresh water.

Khora Anchorage, position about 3 miles from Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

Jubailah Anchorage, position at Basrah Silo about 0.5 below Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

The maximum length between perpendiculars permitted by the Iraqi Ports Administration for vessels in the Shatt-el-Arab River is 560 ft.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet of Tide Tables each year and the movements of vessels in and out of the Shatt-el-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The max. draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Umm Qasr. Although the draft obtainable alongside the wharves is 31 ft. the max. draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

MAX. SIZE: For vessels proceeding to Basrah the max. L.O.A. allowed by the Iraqi Ports Administration is 560 ft. There is no restriction on the breadth. The max. draft in fresh water for vessels to and from Basrah is 29 ft. The max. L.O.A. for Umm Qasr is 580 ft.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kc/s. call sign "YIS" requesting free pratique 24 hours before vessel's arrival at pilot station. All crew vaccination certificates should be valid and available for Medical Officer's arrival on board. He will also expect to find a valid Deratisation Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine. Special precautions are taken in case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the Pilot station. The Iraq Government is very sensitive about the spread of cholera and smallpox. Derat Certificate renewable at Basrah.

RADIO: When a vessel is 3 days away from Basrah, radio contact can be established with Basrah Radio, call sign YIR on HF 4, 6, 8, 12 and 16 kHz bands. When the vessel is within 3 days of arrival, Basrah Control Radio (YIR) can be used (transmitting on 500 kHz and receiving on 461.5 or 440 kHz).

List of Coast Stations (Iraq). Summary of Procedures:

1. Whilst inside Iraq territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).

(b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.

(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(f) Umm Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions:

(a) Navigational Warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).

(b) North Gulf Weather Forecast is transmitted by:

1. Basrah Control Radio on:
440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs. GMT and on request. 8668 kHz at 1330 hrs. GMT and on request.

2. Khor Al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.

(c) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Basrah Control Radio (YIR).

(d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).

(e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao Radio (YIS).

(f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).

(g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages. Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answer on*	*Traffic Lists*
H24	500	440 461.5	–
0400–0600	6265.5–6280.5	6493.25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986.5	1505
1600–1800	4177– 4187	4356.5	1705

TUGS: River and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Maqal Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:

(a) Maqal – Plus 12.5 ft. above zero port datum. Port datum is 3.96 ft. above mean zero level at Fao.

(b) Umm Qasr – 24.65 ft. above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:

(a) Maqal: A daily variation of 5 ft. between tides and max. of 8 ft.

(b) Umm Qasr: An average of 12 ft. between tides, and max. of 17 ft.

Maqal (Ma'gal). Wharves have continuous frontage of 2,000 m. depth alongside 9.15 m. Max. length of vessel, 171 m., berthing for 12 vessels.

Umm Qasr. The port is situated at the South end of the Khor Zubair, where it joins the Khor Abdullah. The sea approach to Umm Qasr is some 103 km. in length along the Khor Abdullah, commencing in deep waters of the Gulf near the mouth of the Shatt-el-Arab.

A navigation channel the lowest part of which is 9 m. at LLW and of ample width is well marked with beacons and light buoys from the Shatt-el-Arab entrance pilot vessel to Umm Qasr. Loaded vessels with a draft of 9.75 m. will be able to sail on 2 tides each day to and from Umm Qasr. Pilot and Harbour Master services are compulsory.

The wharves are of reinforced concrete with a continuous frontage of 640 m. and depth of 9.75 m. at LLW. They are able to accommodate 3 cargo ships at one time. Each berth is 183 m. long. The wharves are provided with a total of 10 electric shore cranes from 3-15 tons capacity. In addition there is a 100 ton floating crane, 2 sea-going tugs and an ample number of mobile cranes, forklifts, eel trucks, tractors, trailers, etc. The Umm Qasr wharves are directly connected with roads and railway lines of the Iraqi Republican Railways.

There are also 2 mooring buoys 247 m. apart.

Fresh water available directly from mains on wharves.

A new project for building more berths is in hand. 5 of these berths are under construction.

3 new steel jetties at Abu Flus directly North of the Fertilizer jetty have been completed. These jetties are served by 6 electric shore cranes of 5 tons capacity. Vessels up to 171 m. long and 8.84 m. draft can lie alongside.

Grain Silo: Capacity 65,000 tons, loading capacity into ship's holds, 1,050 t.p.h. jetty 213 m. long, available for berthing ships up to 183 m. long with a draft of 8.84 m. for loading and unloading of grain.

Muftiyah Jetties: One wooden jetty with limited length owned by Port Authority for distribution of oil products and for the purpose of handling crude and refined oil for local consumption, also for exporting oil products outside Iraq. Also a further new concrete jetty available for berthing vessels 175 m.

Fertilizer Wharf: A modern concrete wharf situated on the banks of Shatt-el-Arab river at Abu Flus with a total length of 100 m., width 10 m., can accept vessels with length 182 m. and draft 8.84 m. It is allocated for the exportation of fertilizers by the State Co. for fertilizers.

Mooring Buoys: There are also 13 mooring buoys, 7 at Ashar, 4 at Sunger and 2 at Abu Al Khasib, 220 m. apart.

CRANES: The wharves are served with 60 electric shore cranes from 1.5 tons to 15 tons capacity and 1 electric shore crane of 60 tons capacity, in addition there are 2 floating cranes one of which is 100 tons capacity capable of lifting direct from ships to railway trucks on the wharves, and the other of 20 tons capacity capable of lifting cargo at a distance of 30 m. from the centre of the jib. Also about 200 pieces of various type of mechanical and electrical handling equipment.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 80 miles).

STEVEDORING: Information of the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio. The average rate of discharge of general cargo at Basrah (Maqal and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships' derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

Bulk Cargoes: Discharged by grab direct to the Dock at Umm Qasr and by suction to the silo at Basrah. The equipment at Basrah is rated at 2,500 L/tons per day discharge and 5,000 L/tons per day loading, but under favourable conditions discharge rate may exceed 3,000 L/tons per day.

VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

MEDICAL: For a vessel in to Basrah (Maqal and Umm Qasr) no advance notice is required, in order to obtain medical attention. Hospital facilities available at the new port hospital and other local hospitals.

For arrival at Basrah it is necessary to hold valid cholera and smallpox certificates.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Maqal and Umm Qasr but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker.

FUEL: Only 1 grade of fuel oil available from the Basrah Refinery, a fuel oil viscosity 200 to 210 Red. No. 1, SG 0.920. Diesel oils also available.

Fuelling is direct if taken alongside Muftiyah Refinery jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah.

(Wine and/or Spirit). Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-el-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

IDENTIFICATION CARDS: All crew members are required to carry with them some form of identification when going on shore.

CONSULS:

Belgium	Tel. 3666	Pakistan	Tel. 3598
Denmark	„ 3205	Sweden	„ 3511
Norway	„ 3511	U.S.A.	„ 4231
Saudi Arabia	„ 3219	India	„ 4824
United Kingdom	„ 4251	Portugal	„ 4469
Greece	„ 3601	U.S.S.R.	„ 5410
Kuwait	„ 2235		

REPAIRS: All types of repairs except major engine repairs can be carried out.

DRY DOCKS: Floating dock available, capacity 4,000 tons. Also slipway, capacity 700 tons.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Maqal Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with International flights.

TIME: Iraq time is 3 hours ahead of GMT and there are no alterations made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The other holidays are: 3 days Id-el-Fitr; 4 days Id-el-Adha; Al Hijaa; Ashura; Birth of the Prophet Mohammad; New Year 1st January; Army Day 6th January; 8th February; 21st March; 1st May Labour Day; 14th July; 17th July.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to the department required.

TELEPHONES: Telephone is placed on board a vessel as soon as secured alongside wharf.

GENERAL: The rain season in Basrah is between November and April and during the Summer months from May to October the temperature can be as high as 55°C. It is important that crew members keep the backs of their necks covered whilst working on deck during the heat of the Summer. The use of salt tablets are recommended during the heat of the Summer.

SPECIAL SERVICES: There is a laundry service available.

SHORE LEAVE: There is no restriction on crew members going on shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that no photography takes place from the ship whilst passing naval or military installations.

DELAYS: As the port of Basrah is considered very well equipped, cargo vessels usually receive a very quick despatch and it is very seldom that a vessel experiences waiting time for a berth for discharging, loading or bunkering. All discharge takes place at the wharves and all loading takes place in midstream at mooring buoys. Where a vessel can load whilst discharging, this is permitted.

AUTHORITY: President State Organisation of Iraqi Ports, Basrah.

AGENTS: The business of Shipping Agencies relating to all ships calling at Iraqi Ports is entrusted solely and exclusively to State Enterprise for Maritime Agencies, P.O. Box 3, Basrah.

General Cargo: Cable address: Maragent. Telex No. 7009.

Tankers: Cable address: Tankers. Telex No.: 7009.

FAO: 29.58 N. 48.29 E.

DOCUMENTS: On arrival at Pilot station, vessel requires the following:

Ship's Register.

Letter from Owner confirming that vessel has not called at Israeli Port.

Health Certificates of Crew must be valid against cholera and smallpox.

2 copies Crew List.

2 copies Provision List.

2 copies Manifest.

Dangerous Cargo List, if any.

PILOTAGE: The pilot boat is located in position 29° 46′ 45″ N., 49° 48′ 37″ E., and on arrival vessel should contact Pilot boat immediately for instruction. VHF Channels 14 and 12. Provided

Master has given Agent 48 hours' notice of vessel's ETA, Pilot will board immediately. The Pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

ANCHORAGE: On arrival of the Pilot boat vessel can anchor with no depth restriction.

MAX. SIZE: *Tankers* – 675 ft. LOA. Vessels may load to a max. draft of 35 ft. (10.65 m.) depending on the tidal conditions at the time, otherwise to a draft suitable to cross the bar with safety.

HEALTH: Masters are requested to call the Port Medical Officer at Fao on 500 kc/s, call sign "YIS4", requesting free pratique between 8 and 12 hours before vessel's arrival. All crew vaccination certificates should be valid and available for the medical officer's arrival on board. He will also expect to find a valid Deratisation Exemption Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine.

Special precautions are taken in the case of a vessel arriving from an epidemic area and even if the crew are holding valid vaccination certificates the vessel may be delayed at the Pilot station. The Republic of Iraq is very sensitive about the spread of cholera and smallpox.

RADIO: Basrah Radio, call sign "YIR" on high frequencies 4, 6, 8, 12 and 16 bands. Fao Radio, call sign "YIS", traffic control signals on Channel 16, and 500 kHz. Also see Khor-al-Amaya.

Tankers should establish contact with Iraqi National Oil Co. 48 hours before arrival. Call sign RNT. Frequency 6493 kHz.

TUGS: Available on request.

BERTHING: There are 4 loading jetties with a depth of 10.95 m. alongside at LWST. Each jetty has one 60 cm. crude oil delivery line with four 25 cm. flexible hoses. Jetties are floodlit and fitted with fire monitors and four 3 ton SWL cranes. Lengths of berth, 205.75 m. each. Max. draft 10.65 m. Night berthing possible. Loading rates Nos. 2 and 4 jetties average 4,000 t.p.h.

FRESH WATER: Available, rate approximately 10 t.p.h.

REPAIRS: Minor repairs possible.

MEDICAL: No advance notice is required in order to obtain medical attention. Medical units are present at Fao, Umm Qasr and Maqal. A modern hospital containing all the essential units is found at Maqal. Crew in need of special attention or admission may be referred to it by the medical units.

TIME: 3 hours ahead of GMT.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

KHOR-AL-AMAYA: 29.46.44 N. 48.48.36 E.

OPERATORS: Basrah Petroleum Company Limited.

LOCATION: Island Terminal about 17 miles out in the Gulf from the mouth of the Shatt-el-Arab River.

ADMINISTRATION: All waters of the Shatt-el-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: *(a) Lights.* One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles: candlepower 7,400.

Red lights are fitted at the 4 extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

The channel between the entrance to the Shatt-el-Arab and the Khor-al-Amaya Sea Island Oil Terminal is marked by buoys and the Shatt-el-Arab Light Vessel (refer to relevant notices issued by the Iraqi Ports Administration, M.E.N.A.S., and Admiralty Notices to Mariners).

(b) Tides. High water at the Terminal may be expected to occur about 20 minutes before high water at the Shatt-el-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed 0.75 knots.

DOCUMENTS:

Crew List (5 copies).
Store List (2 copies).

PILOTAGE: Compulsory. Masters of vessels bound for Khor-al-Amaya Terminal should contact the Pilot vessel which cruises in an area about 2 miles S.E. of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

(a) All vessels using Khor-al-Amaya buoyed channel are reminded that loaded tankers outward bound from Khor-al-Amaya Terminal have top priority in navigating the buoyed channel and all other vessels are to keep clear in all cases.

(b) All inward-bound vessels are to contact Khor-al-Amaya Harbour Master on VHF Channels 16 and 14 before entering Khor-al-Amaya channel for information regarding deeply laden tankers using the restricted channel, and for berthing and anchoring instructions.

(c) Pilotage is compulsory for all inward and outward bound tankers using the Khor-al-Amaya buoyed channel when the draft of the tanker is 15.85 m. (52 ft.) or over.

(d) Tankers arriving to load at Khor-al-Amaya with draft in excess of 15.85 m. (52 ft.) must give their ETA at Shatt-el-Arab Light-vessel at least 12 hours in advance by contacting the Pilot station or Khor-al-Amaya Terminal.

ANCHORAGES: Anchorage areas have been established bounded by lines joining the following positions:

(a) *Anchorage "A"*

(i)	29° 32′ 08″ N.	48° 58′ 59″ E.	(iii)	29° 32′ 53″ N.	48° 56′ 56″ E.
(ii)	29° 31′ 24″ N.	48° 58′ 06″ E.	(iv)	29° 33′ 14″ N.	48° 57′ 20″ E.

(b) *Anchorage "B"*

(i)	29° 44′ 03″ N.	48° 49′ 34″ E.	(iii)	29° 42′ 08″ N.	48° 50 18″ E.
(ii)	29° 43′ 52″ N.	48° 49′ 12″ E.	(iv)	29° 42′ 21″ N.	48° 50′ 45″ E.

(c) *Anchorage "C"*

(i)	29° 45′ 39″ N.	48° 48′ 41″ E.	(iii)	29° 44′ 06″ N.	48° 49′ 31″ E.
(ii)	29° 44′ 28″ N.	48° 47′ 38″ E.	(iv)	29° 43′ 35″ N.	48° 48′ 28″ E.

(d) *Temporary Lightering Anchorage*

(i)	29° 46′ 00″ N.	48° 48′ 28″ E.	(iii)	29° 45′ 34″ N.	48° 46′ 35″ E.
(ii)	29° 45′ 40″ N.	48° 48′ 39″ E.	(iv)	29° 44′ 06″ N.	48° 47′ 18″ E.

Note:

(i) Anchorages "A" and "B" are for deep-draft vessels of 12.19 m. (40 ft.) and upwards.
(ii) Anchorage "C" is to be used by tankers (laden or in ballast) whose draft does not exceed 12.19 m. (40 ft.).
(iii) The temporary lightering anchorage is for the exclusive use of lighters. No other ships or vessels are to anchor within this area.

MAX. SIZE: 330,000 d.w.t. loading part cargo. Max. LOA: 1,200 ft. Max. draft, 69 ft.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N., Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,356–8,374 and work on 8,374–8,457.5 kHz. Periods 0400–0430 hrs. 0800–0830 hrs. 1200–1230 hrs. 1600–1630 hrs. All times GMT. Services: C.V. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).
(b) Pilot station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.
(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(f) Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions.

(a) Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
(b) North Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs., GMT and on request. 8668 kHz at 1330 hrs., GMT and on request. 2. Khor-al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.
(c) Traffic Control Signals on Channel 16 (156.80 mHz) and on 500 kHz by Basrah Control Radio (YIR).
(d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
(e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao radio (YIS).
(f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).
(g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor-al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Frequencies instruction to pass messages time table 1200–1400 hrs. listen on 8354–8374 answer on 8668 traffic lists 1305.

Note. All messages are changeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: 3 tugs of 4,000 b.h.p. are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 22 m. of water, having 1 tanker berth on one side and 2 berths on the other side with suitable mooring dolphins and platforms ahead and astern which are connected by cat-walks. The orientation is 320°/140°. The max. loading rate, with only 1 berth in use, is 9,000 t.p.h.; with 2 berths in use the max. loading rate at each is 4,500 t.p.h. Fire-fighting towers are provided, also a helicopter platform. Loading by "Woodfield" flow booms offering 4×16 in. and 2 or 4, 12-in. hoses. Vessels of the order of 120,000 d.w.t. can be accepted at berths 5 and 6 and 330,000 d.w.t. max. draft 21 m. at berth No. 7.

The S.G. and A.P.I. and temperature of the crude oil will be supplied to the Master on radio request.

Berthing of tankers: MENAS NOTICE No. 114/74.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth or unberth at the existing Wharf No. 7 in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at Wharf No. 7 and in the S.E. Direction.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth at the proposed Wharf No. 8 and in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at the proposed wharf No. 8 and in the S.E. Direction.

MEDICAL: An Iraqi Ports Administration Medical Dresser will always be available to attend to quarantine matters, deratisation certificates, etc. A doctor can be made available, through vessel's Agent, upon prior request, but necessary to give 24 hours notice to arrange.

FRESH WATER: Available with 24 hours notice.

FUEL: Not available ex-wharf.

CUSTOMS ALLOWANCES: During vessel's stay at Terminal, 1 carton of cigarettes only allowed to each crew member.

SAFETY REGULATIONS: Safety regulations and fire fighting procedures will be discussed with the Master on arrival.

GANGWAYS: Ships must supply their own gangways when alongside. Accommodation ladders and other ship side ladders are not suitable.

REPAIRS: Basrah Petroleum Company has no facilities to undertake ship repair work of any description.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

AGENCY: Masters of tankers should contact the Agent through Basrah Radio Station prior to arrival. Agent's representatives are not housed on the island. Ship's documents for port clearance purposes are passed by them to the Agent for action. Stores and provisions will be sent out by the Agent, given sufficient prior notice.

See "General" before first port.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Ireland

BANTRY BAY: 51.41 N. 09.27 W. (See Plan Book)

DOCUMENTS:
1 Crew List.
1 Stores List.
1 Crew Declaration.
1 Maritime Health Declaration.
Ship's Register (tonnage).
British Light Dues (receipts).
Clearance from Last Port.

APPROACHES: The approaches to the Bay are marked by the Sheep Head Light, visible 18 miles, Roancarrig More Light, visible 12 miles, and Whiddy Island Light, visible 3 miles.

The channel to the Gulf Oil Terminal is marked by radar reflecting buoys numbered 1 to 9, the starboard hand buoys having odd numbers.

The buoys marking the channel to the Inner Harbour do not have radar reflectors, but can easily be picked up on radar screens.

PILOTAGE: Pilot can be requested through Land's End Radio or Valentia Radio to "Harbour Master Bantry", giving 6 hours notice. Also through VHF Channels 11, 14 and 16 to Gulf Control when within 10 miles. Pilot boat blue and white fast motor launch (28 ft.) flying Pilot flag from stern.

For tankers of 250,000 tons and upwards, Pilot boards between No. 2 and No. 3 buoys.

For all other vessels, Pilot boards at West Ground Buoy.

ANCHORAGE: For tankers of 250,000 to 350,000 tons in vicinity of No. 2 Buoy.

For tankers of 45,000 tons in vicinity of No. 5 buoy.

All other large vessels, South of No. 5 buoy at mouth of Glengarritt Harbour. For smaller vessels, the East end of Whiddy Island (10 fathoms) and Bantry Harbour (25 ft. depth).

MAX. SIZE: (a) Oil Terminal – up to 500,000 tons with draft up to 96 ft.

(b) Bantry Harbour – draft not more than 25 ft.

(c) Bantry Pier – 150 ft. length with draft 12 ft.

HEALTH: All vessels must exhibit quarantine signals until quarantine formalities completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light.

No person other than Pilot is allowed to board any vessel either alongside jetty or at anchorage until pratique has been granted. Pilot to be informed when any suspected disease or fever on board.

RADIO: Messages and ETAs through Valentia Radio, Land's End or any UK station. Port Operation (Gulf) Service, call sign "Gulf Control" (24 hours) VHF Channels 11, 14 and 16.

TUGS: Four tugs of 3,200 h.p. serve Oil Terminal. Two tugs of 300 h.p. available in Inner Harbour. Tugs' lines used.

BERTHING: Allowed at all stages of tide at Oil Terminal Jetty, depending on weather conditions.

Berthing at Bantry Pier depends on size of vessel and state of tide.

GULF OIL TERMINAL: Tankers berth alongside island jetty 1,600 ft. in length situated approximately 1,300 ft. offshore. The Island is comprised of a central loading platform with connected mooring dolphins. The outside berth designed for tankers up to 500,000 d.w.t. with max. draft of 96 ft. The inside (South) berth can accommodate vessels up to 85,000 d.w.t. with max. draft of 85 ft.

Outside berth fitted with 16-in. cargo lines.

Inside berth fitted with 12-in. cargo lines.

All bunker lines are 12-in. diameter.

BALLAST: There is strict enforcement of law against oil pollution. All ballast must be discharged ashore at terminal, where 16-in. ballast lines available to shore.

STEVEDORES: Available; 24 hour advance notice to Agent required.

MEDICAL: 24 hour standby launch available if vessel enters Bantry Bay for medical attention to crew. Vessels should give instructions whether doctor needed on board. Vessel should pass ETA through Valentia Radio to "Harbour Master Bantry". Or if in VHF range (50 miles) ETA to "Gulf Control" on Channel 14.

FRESH WATER: Available at Bantry Pier.

FUEL: Gas oil and heavy fuel for tankers available at Oil Terminal. Gas oil and fuel available at Bantry Pier in road tenders of 20 tons.

REPAIRS: Local repair firms can undertake limited repairs, but nearest dockyard available for major repairs is at Cork.

DENSITY: 1025.

CUSTOMS ALLOWANCES: Tobacco: Depending on stay in port. Approximately 80 to 100 cigarettes per man for 2 to 3 days. Wine and/or Spirits: half litre per man.

IDENTIFICATION CARDS: Required.

REPATRIATION: There are facilities for crew repatriation.

CONSULS: No local representatives.

AIRPORT: Situated 48 miles away at Cork. Frequent International flights.

TIME: GMT plus 1 hour during Summer months. GMT from October to March.

HOLIDAYS: Cargo work can be carried out on most holidays, except Christmas.

POLICE/AMBULANCE/FIRE: Call local exchange.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Permitted. Liberty launch available for tankers at 1 hour's notice.

SERVICES: Vessels requiring any of the following services should advise Agent prior to arrival, giving fullest possible details:

Divers: Services of divers available to vessels for inspection and freeing fouled propellers.

Provisions: Normal supplies of most categories available. Ample time should be given to ship chandler.

Laundry: Large amounts sent to Cork (24 hrs. return service), but rather expensive.

GENERAL: All vessels required to fly Irish Ensign on foremast during daylight hours. Irish territorial waters extend 12 miles seaward from mainland.

AUTHORITY: Harbour Master.

CASTLETOWNBERE: 51.41 N. 09.54 W. (See Plan Book)

DOCUMENTS:
Health Certificate.
Crew List.
List of Bonds.
Ship's Register.
Log Book.
Crew Passports.

PILOTAGE: No recognised Pilot; Pilot can be contacted through a Harbour Master.

ANCHORAGE: See Charts: 13 ft. available at MLWST.

MAX. SIZE: Max. permissible draft 12 ft. and 16 ft. at mainland wharf. 17 ft. at Dinish Island Quay.

HEALTH: Customs give pratique if ship clear; if not, Doctor will be notified.

RADIO: Land's End and Valentia.

TUGS: No tugs.

BERTHING: In accordance with a Harbour Master's instructions.

STEVEDORES: No stevedoring arrangements.

MEDICAL: No advance notice necessary. Hospital facilities available.

FRESH WATER: Available at quay.

FUEL: Diesel available at quay; no advance notice necessary.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by crew.

CUSTOMS ALLOWANCE: Tobacco: Captain 8 oz. Officers 6 oz. Crew 4 oz. Wine and/or Spirits: Captain: 1 gal. wine, 1 gal. beer and 1 pint spirits. Officers: 1 gal. wine, 1 gal. beer and 1 pint spirits. Crew: 1 gal. beer or 1 gal. wine and 1 pint spirits.

IDENTIFICATION CARDS: Required.

AIRPORT: 80 miles to Cork Airport, served by regular airlines.

TIME: GMT plus 1 hour. Reverting to GMT from October to March.

HOLIDAYS: Cargo work can be arranged on all holidays.

POLICE/AMBULANCE/FIRE: Police Castletownbere 2; Ambulance Castletownbere 4; Fire Castletownbere 49.

TELEPHONES: Not available for placing on board.

SHORE LEAVE: Allowed.

AUTHORITY: Ministry of Fisheries and Forestry, Dublin.

CORK (including Cobh, Whitegate): 51.50 N. 08.17 W. (See Plan Book)

PORT LIMITS: Line joining Cork Head and Power Head.

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Health Declaration.
3 Customs Manifests.

For shore formalities
Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Light Dues Certificates.
Deratisation Certificate.

PILOTAGE. Minimum 24 hours notice of ETA and draft to Agent. Accurate ETA's are vital as Pilots only go afloat on this basis. When within VHF range, contact should be established through "Cork Harbour Radio" (see "Radio"). This station combines Port Operations and Information service and co-ordinates the pilotage service. The pilot launches are also fitted with VHF. Channels 6, 12 and 16.

For large deep-drafted vessels, Pilot usually boards up to 2 or 3 miles South of Roches Point. Compulsory river pilotage area extends upstream from Spit Bank Light.

ANCHORAGES: Safe deep-water anchorages as arranged with Pilots.

RESTRICTIONS: Navigation by night and day. Ships of 5.4 m. draft can make passage of river to Cork at any stage of tide.

MAX. SIZE: *Cork:* Max. length 152 m. extendable to 158 m. at discretion of Harbour Master. Draft fresh water on spring tides 8.7 m. on neap tides 7.8 m.

Whitegate: Tankers up to 275 m. length. 11.6 m. draft. Max. draft 12 m. at highest tides.

HEALTH: Health Declaration form is presented to Customs Officer or Port Health Inspector and pratique issued without delay. In cases of disease on board notify Agents who inform Health Authorities.

RADIO: Coast Station – Valentia Radio. W/T and R/T. R/T link call facilities available. Telex fitted. In U.K., Coast Stations also relay messages direct to Agents.

VHF: Harbour Radio: VHF Channels 12, 14 and 16, 24 hour watch maintained. Call sign "Cork Harbour Radio". A port operations and information service is provided and it is through this organisation that the requirements of the Harbour Master will be made known.

Vessels underway are required to maintain a VHF watch on Channel 12 or 14 as instructed.

TUGS: Deep draft vessels take tug assistance from Horse Head to Cork and vice versa. Tug's lines are used. Tankers use two to four tugs for berthing at Whitegate Terminal.

BERTHING: The quays at Cork afford good accommodation for vessels up to 152 m. LOA, on fresh water drafts of 7.8 m. on Mean Neap tides and 8.7 m. on Mean Spring tides with 8.8 m. alongside quay. The Deep Water Quay at Cobh is 189 m. long and vessels of 5.5 m. draft can berth with safety.

SPECIAL CARGO FACILITIES:

Grain: Two mobile suction discharge plants, combined discharge rate up to 240 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tide. Storage capacity 80,000 tons.

Ore: One mobile loading conveyor, max. rate 250 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tides. Conveyor system used in conjunction with mobile cranes for discharging of vessel up to 5,000 d.w.t.

Coal/Fertiliser/Sulphur: Four 6 ton level luffing grab cranes combined discharge rate up to 360 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft.

Containers: 30 ton travelling transporter crane. Length of berth 122 m. Max. depth at LWOST 5.5 m.

Roll-on/Roll-off and Passenger Car Ferry Terminal: Max. height of link span 8.6 m. above LWOST. Min. height of link span 2.7 m. above LWOST. Max. loading 65 tons. Distance from side of berth to centre line of link span 11.4 m. Max. ship size 137 m. LOA. Berth dredged to 5.2 m. L.A.T.

Livestock loading Ramp and Lairage: Max. ship size 106.7 m. plus LOA. Berth dredged to 5.2 m. L.A.T.

Pfizer Jetty: Length between dolphins 259.2 m. Max. draft 10 m. on all tides.

Molasses discharge rate, 1,000 t.p.h.
Fuel Oil discharge rate, 600 t.p.h.
Sulphuric Acid discharge rate, 200 t.p.h.

STEVEDORES: Labour hiring times. Week-days 0800, 1000 and 1130 hrs. Gangs for week-end working must be hired at 1700 hours on Fridays. ETA advice could include number of gangs workable.

MEDICAL: All medical and hospital services available at short notice.

TANKERS: Irish Refining Co. Terminal at Whitegate is situated on East side of Lower Harbour. Two deep water berths for tankers. Max. size, 55,000 d.w.t. or 90,000 d.w.t. partly laden. Slop reception facilities available.

Length between dolphins, 366 m.
Crude discharge rate up to 4,000 t.p.h.
HOF loading rate up to 1,700 t.p.h.
Gas Oil loading rate up to 700 t.p.h.
Petrol loading rate up to 600 t.p.h.
LPG loading rate up to 20 t.p.h.

Diameter of Hoses:
Berth No. 1: Crude and Black Oils 10 in. ASA.
Clean Products 8 in. ASA.
Berth No. 2: All Products 6 in. ASA.

DENSITY: Average density of water in river 1008.

FRESH WATER: Available at all quays ex hydrants – delivery rate 25 t.p.h.

FUEL: All fuels with exception marine diesel oil available. 24 hours notice required. Delivery by either road or river tanker.

DEVELOPMENTS:

N.E.T. (Nitrigen Eireann Teo.). Jetty under construction in 1977/8 at Marino Point. Overall length dolphin to dolphin 375 m. Dredged to 10.6 m. to accommodate Ammonia tankers of up to 15,000 d.w.t. and bulk or general cargo vessels of up to 25,000 d.w.t. (Partly loaded). Vessels of up to 186 m. OAL and 9.5 m. draft will be acceptable.

A major harbour development scheme is at present in progress aimed at providing certain infrastructural facilities in advance of demand as a means of attracting port related industry to the harbour. By mid 1978 work had been completed on the deepening of the harbour's entrance to 13.4 m. L.A.T. thereby providing accommodation for vessels of 90,000/100,000 d.w.t. in the Whitegate/Aghada area and an inner bar had been deepened to 11.1 m. L.A.T. to permit vessels of up to 50,000 d.w.t. to proceed to the Commissioners prime development area at Ringaskiddy. Work on the digging out of a deepwater berth and on the reclamation of approximately 150 acres of land is due to commence in late Summer or early Autumn 1978 and construction of a roll-on/roll-off ferry terminal and a deepwater berth for vessels of 50,000 d.w.t. will commence towards the end of 1979.

The ferry terminal will be operational by the end of 1980 and the deepwater berth will be operational a few months later.

In addition to the marine development, Cork County Council is in the course of providing a new fresh water supply scheme which, in time, will provide up to thirty million gallons per day in the Ringaskiddy area. In addition the Industrial Development Authority has purchased 1,000 acres of land at Ringaskiddy for port industry.

The industrial package being so provided will ensure that in a little over 2 years Cork Harbour will be in the forefront of prime industrial locations within the European Economic Community.

The Kinsale Head gasfield, located 30 miles due South of Cork Harbour, is due to go into production in late Summer/early Autumn 1978. The gas will be used in a new 270 m.w. power station at present under construction, in an ammonia/urea plant also under construction, in an existing power station and in the Cork city town gas system.

Dredging and reclamation of a new deepwater marine terminal at Ringaskiddy will commence in 1978. Berth construction is scheduled for 1980 with provision initially for one 50,000 d.w.t. Bulk Carrier and a new Ro-Ro Ferry Terminal. Basin will be dredged to depth of 11.7 m. L.A.T.

WATCHMEN: Recommended but not compulsory.

OPENING/CLOSING HATCHES: Crew must perform this work as dockers decline to do it.

CUSTOMS ALLOWANCES: 200 cigarettes per man, and 1 bottle spirits per man.

CARGO GEAR: No special local requirements. Regulations similar to British Board of Trade safe working requirements. 30 ton crane available.

IDENTIFICATION CARDS: Not required.

CONSULS: *France, Sweden, Norway, Netherlands:* B.A. Gotto, c/o James Scott & Co., Glanmire House, Lower Glanmire Road, Cork. Telephone No. 54200. *Finland, Denmark:* J. C. Hannigan, c/o James Scott & Co., Glanmire House, Lower Glanmire Road, Cork. 54200. *Belgium:* G. Jones, 33 St. Patrick's Quay, Cork. 54018. *Italy:* P. Cali, University College, Cork. 26871. *Germany:* T. J. Clifford, Cooper & Lybrand, South Mall, Cork. 21552.

REPAIRS: All types of deck and engine repair facilities available.

DRY DOCK: Verolme Cork dockyard main dry dock can take vessels up to 158.5 m. in length. Floating docks of 2,000 and 10,800 tons lifting capacity, also four 40 ton cranes. Able to carry out repairs to ships afloat of any tonnage using the port.

SURVEYORS: Lloyd's surveyor at Cork.

REPATRIATION: Can be carried out without difficulty.

AIRPORT: Five miles from city. Regular flights twice daily to London. Onward connections to all destinations.

TIME: GMT from 0200 hrs. on Sunday following 3rd Saturday in October to 0200 hrs. on Sunday following 3rd Saturday in March (unless latter is Easter Saturday, in which case to 0200 hrs. on Sunday following 2nd Saturday in March).

One hour ahead on GMT (i.e. Standard European time) for remainder of year.

HOLIDAYS: New Years Day, St. Patrick's Day (March 17th); Good Friday; Easter Monday; First Monday in June; First Monday in August; Christmas Day (December 25th); St. Stephen's Day (December 26th).

POLICE/AMBULANCE/FIRE: 999 is emergency number for all services. Actual: Police 23161; Fire 21107; Ambulance 21107.

SERVICES: All tanker services available at Whitegate. Otherwise, various general services required by ships available at Cork.

SHORE LEAVE: No restrictions on shore leave.

DELAYS: Except waiting for tide there are very few occasions on which entry to or departure from the port is subject to delay.

AUTHORITY: Cork Harbour Commissioners.

DUBLIN: 53.21 N. 06.15 W. (See Plan Book)

PORT LIMITS: Port of Dublin includes all water between Rory O'More Bridge (over River Liffey) and imaginary line drawn from Martello Tower at Sutton on North side of Dublin Bay to Sorrento Point at Dalkey on South side, but excluding Dun Laoghaire Harbour.

DOCUMENTS:

Forms C. 1 or C. 2 Customs report form (actually a copy of Manifest).
Form CU. 35 Victualling Bill (note covering Bonded Stores to be loaded Dublin).
Form CU. 7 Entry Outwards in ballast (for vessels sailing light).
Form CU. 10 Entry Outwards with cargo.
Form CU. 25 Entry Outwards (details of previous and forthcoming voyages.
Health Form.
"Jerque" Note (list of bonded stores on board on arrival).

Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).

PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:

(1) Ships trading coastwise of not more than 200 tons gross tonnage.
(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

Incoming Vessels: Pilots board incoming ships from black-hulled pilot cutter in Dublin Bay. Cutter only cruises when vessels are expected, and accurate ETA requested to avoid delay.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Channel 16; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office Tel. 748771 or Telex No. 5476 during office hours; and Tel. 48772 outside office hours. Following details should be given: name and situation of vessel, destination, draft, time of departure. It must be stressed that such orders must be made in sufficent time making due allowance, particularly at night, for accessibility of vessel.

ANCHORAGES: Scotch Bay – S.E. Dublin Bay and just East of Dun Laoghaire 6/10 fathoms at low water.

RESTRICTIONS: Draft restrictions: 30 ft. HW Neap Tides; 30 ft 6in. HW Normal TIdes; 31 ft. 6 in. HW Spring Tides. Vessels less than 400 ft. overall, drawing 20 ft. 6 in. or less can enter at any state of tide.

ENTRANCE: Approach well lighted and easy of access. Inner Channel of Harbour, formed by almost straight channel of River Liffey from entrance at Poolbeg Lighthouse to Alexandra Basin, is 800 ft. wide for greater part of length and maintained at depth of 27 ft. LW. From Alexandra Basin entrance, River is quayed for a distance of nearly 2 miles to Butt Bridge in centre of City.

MAX. SIZE: State of tide governing max. draft, but no length or breadth restrictions.

HEALTH: Pratique automatic for movements Ireland/U.K. area. Maritime Declaration of Health indicates requirements. This declaration must be submitted on arrival by master of ship coming from foreign port. This requirement does not now normally apply to vessels trading *solely* between the Republic and ports in West Germany, Belgium and Netherlands, Atlantic and Mediterranean coast of France, Italy and Greece. Other requirements mentioned on Maritime Declaration of Health form still apply to such ships.

"Foreign Port" is port situated elsewhere than Eire, Northern Ireland, Great Britain, Isle of Man, or Channel Islands.

Master of foreign-going ship may be asked to produce valid Derating Certificate or Derating Exemption Certificate in respect of vessel. Travellers (passengers and crew) may be requested to produce valid certificates of vaccination against smallpox if from an infected local area, or if from countries in Africa, Asia, North and South America. This requirement does not apply to arrivals from Azores, Bermuda, Canada, Canary Islands, Madeira, French Guiana, Guadeloupe, Martinique, Greenland, Suriname, Netherlands – Antilles, United States of America. Ships may be subjected to sanitary inspection by inspectors of Port Health Service.

Swill must not be landed from vessels which trade outside Eire.

Granting of pratique by radio not practised at Dublin, But is under consideration at present.

RADIO: Valentia Radio, Ireland. Portishead Radio, U.K. Anglesea Radio, U.K.

TUGS: Normally meet vessels at North Bank Lighthouse (roughly half-way mark of main channel) 1 mile West of Poolbeg Lighthouse. Tugs rope optional.

BERTHING: Customs House Docks – from 2 hours to one half hour before high water. Otherwise no restrictions.

The area available for shipping extends from Eastern Breakwater to Butt Bridge and inclusive of Alexandra Basin, Alexandra Basin Extension, Custom House Docks and Grand Canal Docks; it is 227 acres in extent.

North Side of the River, from Butt Bridge to North Wall Light, available as berthage 7,529 ft., depth LW 9 to 22 ft.

South Side of the River, from Butt Bridge to Ringsend Gut, available as berthage 5,728 ft., depth LW 16 to 22 ft.

South Bank Quay serving Electricity Supply Board's Ringsend Power Station, 700 ft., depth LW 28 ft. Two transporter cranes of 5 tons each for discharge of coal, and pipe-lines for discharge of oil.

Alexandra Basin. Quays on *South* and *West* sides 2,690 ft., depth LW 24 to 26 ft.

Alexandra Quay West on North side of Alexandra Basin, 1,230 ft., depth LW 32 ft.

Alexandra Quay East, 1,200 ft., depth LW 32 ft.

Alexandra Basin East comprises East side Ocean Pier, Alexandra Quay East and East and West Oil Jetties.

Fertilizer Jetty in Alexandra Basin has a main section of 750 ft. used for bulk cargoes, depth LW 31 ft. with provision for deepening, equipped with pipe-lines for liquid sulphur and ammonia; conveyor and 2 electric cranes of 10 tons each for rock phosphate and potash in bulk. 300 ft. long approach section leading to main jetty (with special facilities for working acids and ammonia and loading out grain) for accommodation of smaller bulk vessels.

Ocean Pier West at Eastern end of Alexandra Basin, 1,372 ft., depth LW 32 ft.

Ocean Pier South at Eastern side of Alexandra Basin entrance, 467 ft., depth LW 32 ft.

Ocean Pier East, 800 ft., depth LW 32 ft.

STEVEDORES: ETA required by Stevedores before 1500 hrs. Monday to Thursday for work the following day, and by 1500 hrs. Friday for work Saturday, Sunday or Monday.

Average discharge rates: *Grain:* 3,000 tons per day. *Timber:* 30 standards loose per gang/day. 120 standards packaged per gang/day. *General:* Bagged cargo and fast general, including paper, 250 tons per gang/day. *Other Generals:* 90 tons per gang/day.

TANKERS: No slop residue discharge facilities.

Tanker Berths	*Max. Draft*
No. 1, West Oil Jetty, West Side	31 ft.*
No. 2, West Oil Jetty, East Side	31 ft.*
No. 3, East Oil Jetty, West Side	31 ft.*
No. 4, East Oil Jetty, East Side	19 ft.
South Bank Quay (E.S.B.)	27 ft. 6 in.*
South Bank Quay (Poolbeg)	35 ft.*

*Time suitable for navigation in approaches – 1 hour before High Water.

Common User Oil Pipe-line System: This system provides 5 pipe-lines to Eastern Oil Jetty and 7 pipe-lines to Western Oil Jetty. Cargoes of tankers berthed at these jetties can be discharged to storage installations of any of the oil companies.

E.S.B. (Electricity Supply Board): At Poolbeg Jetty (formerly known as "Pigeon House 'B' Jetty"). Max. size 35,000 d.w.t. with the aid of tugs. Present depth sufficient for vessels of this size.

DENSITY: 1025 at all stages of tide.

FRESH WATER: Available at all berths by 2.5 in. hoseline – 8/10,000 gal. per hour per hydrant.

FUEL:

Grades of Fuel Oil	*Viscosities*
Heavy Fuel Oil	3,500 sec. max.
Inter. Fuel Oil	1,500 sec. max.
Medium Fuel Oil	950 sec. max.
Light Fuel Oil	200 sec max.

Advance Notice required. Bunkering by pipe-line depends on availability of Oil Berth. Bunkering by Oil Barge normally a.m. notice on day required. Bunkering by Road Tanker – 24 hours notice.

FIRE PRECAUTIONS: Port By-Laws; Harbour Master's orders/Letters to Masters. Ref.: Board of Trade "Carriage of Dangerous Goods in Ships" and Aeby "Dangerous Goods".

Packed Petroleum: Small consignments (7,000 gal. max.) Class A product – must be removed from port area ex-ship, or to special compound. Class B or Class C may be permitted on quays after check for leaks.

Fibrous Cargoes: See Directives No. 2 and 3 to Masters. Jute, hemp and sisal must be removed ex-ship from port area.

Cotton, cocoa fibre, kapok, etc., must be removed ex-ship to Hazardous Goods Shed.

General: Harbour Police-Watch obligatory during handling of all hazardous or inflamable cargoes, and on tankers during vessels' stay in port. No smoking permitted in Oil Zone, sheds, etc.

GANGWAY/DECK WATCHMEN: If no watchmen from crew, then shore watchman is recommended.

OPENING/CLOSING HATCHES: Patent hatches by crew; other hatches with some assistance from dockers.

CERTIFICATES:

Certificate of Registry.
Radio Safety Certificate.
Load Line Certificate.
Current Trinity House light bills.
Safety Equipment Certificate.

CUSTOMS ALLOWANCE: Tobacco per 8 days: 200 cigarettes – Master; 150 cigarettes – Officers; 100 cigarettes – Crew. Wine and/or Spirits: quarter pint per day per man.

CONSULS:

South Africa: *Honorary Trade Commissioner:* N. P. McEvoy, 4 Mary's Abbey, Dublin 7. Tel. 47372.

Turkey: *Honorary Consul General:* William Anderson, Turkish Consulate, 5 Clyde Road, Dublin 4. Tel. 758721.

REPAIRS: All classes of repairs carried out by Liffey Dockyard Ltd.

DRY DOCKS: Graving Dock No. 1: Length overall 412 ft.; width at entrance 70 ft.; depth over sill at HWOST 17 ft. 9 in., depth over blocks at HWOST 15 ft. 6 in. Equipment – one 6 ton EP crane.

Graving Dock No. 2: Inside length with caisson gate in: Extreme outer position 663 ft.; normal outer position 637 ft. Centre position 367 ft.; inner position 257 ft. Width at entrance 80 ft.; depth over sill at HWOST 25 ft. 6 in. Depth over blocks at HWOST 23 ft.

The intermediate positions for the caisson gates make it possible to operate inner section so as to accommodate a small or medium-size vessel independently of remainder of dock.

Equipment: One E.P. crane, 25 tons at 72 ft. radius to 5 tons at 100 ft. radius. Seven power capstans of 5, 10 and 15 tons pull. Fresh and salt water hydrants at dock sides.

Patent slips: No. 1 – Length of cradle 76 ft. for vessels up to 200 tons displacement. No. 2 – Length of cradle 106 ft. for vessels up to 900 tons displacement.

REPATRIATION: May be arranged by ship's Agent through Department of Justice.

AIRPORT: Dublin Airport, 6 miles North of city centre, served by regular services direct to U.K., Europe, U.S.A. and Canada.

TIME: GMT plus 1 hour. Reverting to GMT between October and March.

HOLIDAYS: New Year's Day (1st January); St. Patrick's Day (National Holiday) (17th March); Good Friday*; Easter Monday†; Spring Bank Holiday† (1st Monday in June); August Bank Holiday† (1st Monday in August); Christmas Eve, half holiday (24th December); Christmas Day (25th December); St. Stephen's Day (26th December).

*Not a port holiday, but all other offices closed.

†These days can be worked at Sunday rates and conditions.

POLICE/AMBULANCE/FIRE: Contact Harbour Police patrol or at Dock Gates, or dial 999 on public telephone for all emergency services.

TELEPHONES: Coin-box telephones available on request at Oil Berths. No rental charges; normal coin-box rates.

GENERAL: Masters' cash requirements for week-end must be notified to Agent by noon on Friday.

SERVICES: No facilities for tank cleaning or discharge of tank washings.

SHORE LEAVE: No port restriction on crew's shore leave.

AUTHORITY: Dublin Port and Docks Board.

DUN LAOGHAIRE: 53.18 N. 06.07 W. (See Plan Book)

PORT LIMITS: As defined by Dublin port and docks Board, as ships have to pass through their pilotage area. The limits of Dun Laoghaire Harbour are defined in its bye-laws as per its fairway extending beyond its pierheads.

DOCUMENTS: See "Dublin".

PILOTAGE: See "Dublin".

ANCHORAGES: See "Irish Coast Pilot".

RESTRICTIONS: See "Irish Coast Pilot".

MAX. SIZE: Fairway dredged to 5.4 m.

HEALTH: See "Dublin".

RADIO: See "Dublin".

VHF: British Rail operate channels 14 and 16 when their vessels approach the port. The Harbour Office does not have VHF.

TUGS: None.

BERTHING: Harbour formed by 2 breakwaters, East breakwater length 4,230 ft. West breakwater, length 5,080 ft. Width at entrance between breakwaters, 760 ft. Depth at entrance 6.2 m. – 7.9 m.

	Length m.	*Depth* m.
Mail Boat Pier, E. side	139+24*	5.4
Mail Boat Pier, W. side	130+24*	5.4
Car Ferry Pier, E. and W. side	142+11*	5.4
Traders Wharf, outside	149	3.7
Traders Wharf, inner side	131	2.7

**Note:* These piers are rounded at the seaward end.

The lengths given for the berths are the straight edge of the pier, the extra length given is the additional length continued along the straight line that meets the tangent to the pier.

CRANES: One 2 ton and one 5 ton crane, available for fitting out yachts near Traders Wharf.

SPECIALISED CARGO HANDLING FACILITIES: Three Ro/Ro ramps. Ramps are to M.O.T. loading requirements, width of ramps – 3 m.

BRIDGES: None.

STEVEDORES: None. British Rail arrange gangs.

MEDICAL: See "Dublin".

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: Arranged by Agent.

FIRE PRECAUTIONS: Only usual non-smoking precautions.

CONSULS: See "Dublin".

REPAIRS: See "Dublin".

DRY DOCKS: See "Dublin".

SURVEYORS: As per Lloyd's Shipping Agents, Dublin.

GANGWAY/DOCK WATCHMEN: The ship's watch.

CUSTOMS ALLOWANCES: As per E.E.C. regulations.

REPATRIATION: See "Dublin".

AIRPORT: Dublin Airport (Collinstown) 20 km.

TIME: As United Kingdom.

HOLIDAYS: Eight (8) Bank Holidays each year.

POLICE/AMBULANCE/FIRE: Available locally. Police, Tel. 801285 Fire Brigade and Ambulance, Tel. 801903.

TELEPHONES: None on board visiting ships.

SERVICES: None.

SHORE LEAVE: Possible, Seamen's I.D. card sufficient, shore passes are not issued.

REGULATIONS: Nothing unusual.

DELAYS: There are no delays.

DEVELOPMENT: None in foreseeable future.

AUTHORITY: Commissioners of Public Works, Dublin 2.

GALWAY: 53.16 N. 09.03 W. (See Plan Book)

DOCUMENTS:

1 Crew List (official form).
1 Passenger List (official form).
1 List of Articles (dutiable) in Possession of Crew (official form).
1 Stores List (to include bonded surplus stores for seal, firearms, ammunition, animals, radio transmitting and receiving sets) (unofficial form).
Maritime Declaration of Health (official form).

Documents, etc., required by Agent for Customs Purposes:

Ship's Register.
Load Line and Safety Certificates, etc.
Receipt for previous payments of light dues if any.

PILOTAGE: Pilots board incoming vessels only at "tide times" (approx. 2.5 hours before HW until HW); vessels arriving at times outside this period should anchor and await Pilot. Safe anchorages at inner roadstead or near Margaretta Buoy according to tonnage and draft, Pilot will board at either. Application for Pilot should be to Agent with notice of ETA. International light and sound signals may be used.

ANCHORAGES: During S.W. gales safest anchorage is at Black Head.

RESTRICTIONS: Entry from 2 hours before HW until HW only.

MAX. SIZE: Governed by depth on sill of 28 ft. at springs and 24 ft. at neaps: width of dock gates, 65 ft. and length of turning area 480 ft.

HEALTH: Master of ship arriving from foreign port must deliver Maritime Declaration of Health in order to obtain Pratique. An oral Declaration will suffice for ships trading solely between Republic of Ireland and Belgium, Holland and European France. Pratique will be granted or withheld depending on answers given to questions put in Health Declaration.

In event of a suspected disease or fever on board, vessel is detained pending arrival of Medical Officers of Health. No unauthorised person is allowed to leave ship without authority of Chief Medical Officer.

Pratique is automatic when vessel arrives from ports in Great Britain, Isle of Man, Northern Ireland and Channel Islands or another port within Eire.

RADIO: ETA cables to Agents, etc., through Valentia Radio if approaching from South or Malin Head if from North. Valentia has telephone link service. Port VHF on Channel 16.

TUGS: No tugs available.

CARGO HANDLING FACILITIES: One 30-ton cantilever crane in operation at Dun Aengus South Quay. Grain, ore, coal, bulk fertilisers, etc. are all handled by grabs. Ore is loaded by special conveyors (200 t.p.h.).

STEVEDORES: Agents arrange after receipt of ETA.

MEDICAL: No special port medical requirements. Ships medical requirements should be included in ETA signal.

TANKERS: No special requirements. 1 berth.

DENSITY: 1012 (average).

FRESH WATER: Available by hose.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: (Open quays) watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Wine, Spirits and Tobacco: members of a crew who remain out on a vessel during her stay in port are allowed to retain in their own possession, under certain conditions, the following quantities of the undermentioned goods:

	Tobacco in any form (to cover 8 days)	*Spirits in any form* (to cover 4 days)	*Wine* (to cover 4 days)
The Master	8 oz.		
Officers (i.e., mates, engineers, wireless operators, ship's surgeons, pursers, chief stewards or serangs)	6 oz.	1 pint	1 gallon
Other Crew members	4 oz.	1 pint	

IDENTIFICATION CARDS: Not needed.

CONSULS: T. McDonogh & Sons Ltd., Merchant's Road, Consuls for France and Belgium only. No others in Galway.

REPAIRS: Deck and engine repairs carried out afloat.

DRY DOCKS: No dry dock.

REPATRIATION: Crew changes and repatriation can be effected.
